For Tanya, Hannah, and Madeleine

My Advice to you is, That it be your Practice, to *Read* the *Sacred Scriptures* in the *PORISMATIC WAY*; Or, with a Labour to observe and educe, the *Doctrines of Godlineß*, which this inexhaustible *Store House of Truth*, will yield unto them that are seeking after it. Make a *Pause* upon every *Verse*, and see what *Lessons of Piety* are to be learnt from every *Clause*. Turn the *Lessons* into *Prayers*, and send up the *Prayers* unto the GOD, who is now Teaching of you.

Manuductio ad Ministerium (1726)

Acknowledgments

Cotton Mather's holograph manuscript "Biblia Americana" had a very long gestation period – considerably longer than the decade it took me to transcribe, edit, and annotate the first of ten-volumes, in which Mather's commentary is now going to be published for the first time. I have been frequently asked what possessed me to undertake this gargantuan project. A well-meaning friend, no doubt speaking from experience, pointed to several renowned compilers of Bible commentaries (let alone their editors) who did not live long enough to see the final volume through the press. With so much left to be done, the rumors of my premature elevation, I hope, are greatly exaggerated.

The origins of this project go back a good number of years. My friend and colleague Jesper Rosenmeier of Tufts University serendipitously bestowed upon me the content of several filing cabinets, which Kenneth B. Murdock had lovingly gathered for his splendid edition of Cotton Mather's *Magnalia Christi Americana* (1977). What Murdock had gathered here in the sixties and seventies – before word processors, the internet, and online databases became the tools of the academic trade – is a testimony to his labor of love, an obsession no less than a conviction that a scholarly edition of colonial America's most significant history was well worth the effort. Much the same motivation led me (in the early eighties) to work on Cotton Mather's "Trip paradisus" manuscript at the AAS, a book-length essay on eschatology, which subsequently appeared as *The Threefold Paradise of Cotton Mather: An Edition of "Trip paradisus"* (Athens: University of Georgia Press, 1995). The initial transcription of this manuscript was undertaken, it is hard to believe, on one of the first home computers a poor student's budget could muster. The technological breakthroughs since then are mind-boggling. Without them, editing and annotating the "Biblia Americana" manuscript would hardly have been possible.

For support of my ongoing research on Cotton Mather's "Biblia Americana," I wish to thank the Department of English at Georgia State University for various research and travel grants, including a summer 2008 RIG grant, which allowed me to spend time writing rather than grading essays. I am grateful to my colleagues at the Massachusetts Historical Society for a W. B. H. Dowse Fellowship, to the Huntington Library for a Mayer's Fellowship, and to the American Antiquarian Society for a Kate B. and Hall J. Peterson fellowship. Moreover, I wish to thank Marcus A. McCorison Librarian and Curator of Manuscripts

Thomas G. Knoles; John B. Hench and Nancy Burkett (both retired); Caroline F. Sloat, Director of Book Publishing; and the many fine librarians on staff at the AAS for the collegial atmosphere and the stimulating lectures at the Society during my residence in Worcester. Every research library should have a Goddard-Daniel House to accommodate its fellows as royally as the AAS does! My heart goes out to Stephen T. Riley Librarian Peter Drummey and to Worthington C. Ford Editor Conrad E. Wright at the Massachusetts Historical Society for their professional support and the stimulating environment in one of the premier research libraries for colonial Americana materials. Thanks, Conrad, for the delicious food during the heady fellowship lunches! Thank you, Peter, for the many conversations and the coffee on those Saturdays when the library was undergoing renovation.

Apart from the quality time at the Huntington, the AAS, and the MHS, I had the privilege of accessing rare books at the Andover-Harvard Library, the Boston Public Library, the Harvard Divinity School Library, the William Andrews Clark Memorial Library and the Rare-Book Room of the Science and Engineering Library at UCLA, the university libraries of Tübingen, Mainz, and Berlin; and, closer to home, Pitts Theology and Woodruff Libraries at Emory, and Pullen Library at Georgia State University. Special thanks go to Margret A. Pitts Librarian Patrick Graham at Pitts Theology of Emory, and Margie Patterson (now retired) of Interlibrary Loans at Pullen Library. In this context, it is not remiss to praise Dean Lauren Adamson, Dean Nancy Seamans, and Provost Ron Henry (now retired) for their prescient investment in expensive online Humanities databases (EEBO and ECCO) – in the nick of time before the mortgage industry, AIG, and Wall Street took us to the cleaners on Sub-Prime Alley.

Over the innumerable hours during the vetting process, of collating the typescript against a digital version of the microfilm copy of the “Biblia Americana,” and during a marathon onsite vetting session of five weeks at the MHS, I benefited from the help of many kind individuals. Particular thanks go to Merit Kaschig, Florian Schwieger, Jan Saathoff and, especially, Damien Brian Schlarb, for their faithful support. Thank you Damien! And thank you Matthew Roudané and Randy Malamud for the gift of a graduate research assistant for the past several years. Without your and their help, the “Biblia” would still repose in a computer file. I am indebted to Heribert Dillmann of Niederbrechen (remember?), to Käthe Ristow of Mainz (on whatever cloud that good angel might now rest), to Jeffrey Walker of Oklahoma State University for the inspiring summer seminar on the *Magnalia*, to Mark Langley of Topeka for many valuable suggestions on the transcript and annotations, to my dear colleague Patricia Graves, who went the extra mile to make my writing more felicitous, to Ken Minkema and Adriaan Neele of the Jonathan Edwards Center at Yale Divinity School for their support, to H. Clark Maddux of Austin Peay University and, especially, to Robert E. Brown of James Madison University, and to Jan Stievermann of

the University of Tübingen, for reading portions of the manuscript and for suggesting improvements; to Bernd Engler, rector of Eberhard-Karls Universität Tübingen, and to Jan Stievermann, for hosting and organizing the first ever International Symposium on Cotton Mather's "Biblia Americana" (October 23–25, 2008) in the Hohentübingen Castle of the University (Mather could not have wished for a setting or audience more illustrious).

Jan Stievermann, Assistant Professor of American Studies at Tübingen, Executive Editor of Cotton Mather's "Biblia Americana," and dear friend, deserves my particular gratitude. It is through his hard work that the Mather Symposium in Tübingen was made possible. Jan was also instrumental in introducing me to Dr. Henning Ziebritzki, Editorial Direktor of Mohr Siebeck, the Tübingen publishing house, which is bringing out the "Biblia Americana" in collaboration with Baker Academic, a Division of Baker Publishing Group. It is through the vision of Henning Ziebritzki and James Ernest, Editor of Baker Academic, that Cotton Mather's magnum opus is now being made available. Indeed, there's a time and season for everything – even if it takes nearly three-hundred years to get there.

My deep appreciation also goes out to several scholars who have given their "thumbs up" for our Mather project: To Dale C. Allison, Jr., of Pittsburgh Theological Seminary, to Bernard Bailyn of Harvard University, to E. Brooks Holifield of Emory University, to David Lyle Jeffrey of Baylor University, to Donald K. McKim of Memphis Theological Seminary, to Robert Middlekauff of University of California, Berkeley; to Mark A. Noll of Notre Dame University, to Stephen J. Stein of Indiana University, to Harry S. Stout of Yale University for their sterling endorsements. I believe I can speak for all of my fellow editors – Jan Stievermann, Ken Minkema, Harry Clark Maddux, Rick Kennedy, Michael P. Clark, and Ava Chamberlain – when I extend our warmest thanks.

Two more paragraphs and we are done: I wish to thank the Massachusetts Historical Society for permission to edit and publish Cotton Mather's "Biblia Americana" manuscript, Linda Smith Rhoads, editor of the *New England Quarterly*, for permission to reprint major portions of my article "How to Go to Heaven or How Heaven Goes? Natural Science and Interpretation in Cotton Mather's 'Biblia Americana' (1693–1728), published in *The New England Quarterly* 81.2 (June 2008): 278–329; to Gaby van Rietschoten of Koninklijke Brill NV for permission to reprint a portion of my article "Authority and Interpretation: Cotton Mather's Response to the European Spinozists," which appeared in *Shaping the Stuart World, 1603–1714*. Eds. Alan I. Macinnes and Arthur H. Williamson. Leyden: Brill, 2006. 175–203. My special thanks go to Frau Anna Krüger of Mohr Siebeck for her expertise in all matters of the production.

Finally, my family: Tanya, dearest spice of my life. Thank you for generously giving of your heart and soul, for sharing your love of literature and history, for giving me feedback when all seemed muddled. I know how hard it was

on you, Hannah, and Madeleine, when I “disappeared” in my study and was lost to you and the children in the interminable Mather bog. I am ready to take up my badge of shame. Hannah Sophie, dearest Hannah Montana, daughter after my own heart: how many times did I want to get away from the computer and spend quality time with you on the playground before you grew up to become a young person? Madeleine Marie, dearest Maddie Chatterley: how you tugged on my shirtsleeves and pleaded with me “to come down” and play with you? Oh, sweet child of time. I promise to do better. My siblings Irene, Horst, Gudrun, and Ute: so much anguish, so little time. My beloved parents, Horst and Anneliese Smolinski: I wished you had lived long enough to share in the pleasure of seeing my Hannah and Maddie grow up, and to feel the warm embrace of your grandchildren. Doch es kam alles ganz anders.

PART 1

EDITOR'S INTRODUCTION

Section 1

“Biblia Americana”: An American Commentary on the Bible

It may be, God our Saviour will in His Time, dispose the Minds of some eminent and opulent persons, to cast a benign Aspect upon a work [“Biblia Americana”] which may hand down their Names with lasting Acknowledgments unto posterity. Be it as it will, I do with the greatest Acquiescence of Mind in the holy Dispositions of His Providence Leave all in His glorious Hands. (Cotton Mather, 1715)

Cotton Mather’s “Biblia Americana” has waited nearly three hundred years to be published. By cooperative agency of Mohr Siebeck and Baker Academic, it is finally brought “into the Light,” as Mather once expressed his hope for publication (*Diary* 2:332), in a ten-volume scholarly edition. Written between 1693 and 1728, “Biblia Americana” is the oldest comprehensive commentary on all the canonical books of the Bible to have been composed in British North America. With its more than 4,500 folio pages bound in six volumes, Mather’s holograph manuscript, which has remained almost unstudied in the archives of the Massachusetts Historical Society, represents one of the great untapped resources in American religious and intellectual history. Combining extensive discussions of biblical scholarship with scientific speculations and advice for practical piety, Mather’s scriptural interpretations reflect the growing influence of Enlightenment thought in America as well as the rise of the transatlantic evangelical awakening. His commentary also marks the beginning of historical criticism of the Bible in New England theology, a solid one hundred years before German Higher Criticism gained a permanent foothold in American theological seminaries. In his annotations Mather engages a vast array of source-texts, from the Church Fathers, medieval and Reformation theologians, Rabbinic scholarship, ancient history and geography, to the cutting-edge philological and philosophical studies of his period. “Biblia Americana” thus represents the greatest achievement of an American theologian before Jonathan Edwards.

In this General Introduction, I will address a number of issues that are relevant to Mather’s commentary on Genesis and to the ten-volume edition as a whole. Examining the nature and significance of “Biblia Americana,” Section 1 provides a sketch of Mather’s life, surveys the history of the manuscript’s composition, and explains his failure to publish the opus he deemed “one of the greatest Works, that ever I undertook in my Life” (*Diary* 1:169). Section 2

appraises his biblical interpretations in the context of the scientific revolution of the early Enlightenment: Newtonianism, the miracles debate, and philosophical accommodationism. Section 3 examines Mather's changing understanding of the Bible, his hermeneutical approach to the scriptures and doctrinal position on key issues, and his response to the historical and philological criticism of the Bible as text in the late seventeenth and early eighteenth centuries. Finally, section 4 assesses the physical condition of the manuscript and outlines the editorial principles governing the entire project.

Among the Bible commentaries of Mather's time, "Biblia Americana" is unique in more ways than one. Even a cursory comparison of Mather's commentary with those of his English peers – Matthew Poole (1624–79), Simon Patrick (1625–1707), Samuel Clarke (1626–1701), and Matthew Henry (1662–1714) – uncovers major conceptual differences.¹ Mather abandons the standard approach and instead devises rhetorical questions for each chapter-and-verse annotation. He assumes a skeptical reader, incorporates excerpts from opposing camps of the hermeneutical debate, and tries to harmonize the new philological methods and scientific discoveries of his age with the Reformed exegesis of the Bible. Unlike his peers who compiled conventional commentaries, Mather elects to concentrate on those chapters and verses he deemed most in need of updating. He also abandons the traditional chapter summaries and reprinting of each verse, and adopts, instead, a dialogic question-and-answer method of presentation. For each annotation he devises a rhetorical question that brings specific topics and interpretative problems into focus. His answers are digests of the most pertinent philological, scientific, and theological debates of his day, often incorporating excerpts from opposing camps and his own judgment on the issues. Through the persona of his rhetorical interlocutor, Mather also voices the concerns of the most radical biblical critics of his period – Hugo Grotius (1583–1645), Thomas Hobbes (1588–1679), Isaac La Peyrère (1596–1676), Benedict Spinoza (1632–77), and Richard Simon (1638–1712) – and engages their ideas in a surprisingly constructive manner (see Section 3). It is another distinguishing quality of "Biblia Americana" as a Bible commentary and of Mather as an intellectually open-minded theologian that he does not necessarily seek to refute those who destabilize the authority of the scriptures, but allocates ample space to each arbiter, as if to provide a forum for Enlightenment debate. In many places his observations show unmistakable traces of modern skepticism – a new form of Pyrrhonism that he valiantly seeks to redress by reconciling the Bible wherever possible with all available modern insights into the natural sciences. In the philosophical battle between skeptical rationalism and revealed religion,

¹ Matthew Poole, *Annotations Upon the Holy Bible* (London, 1683–85); Simon Patrick, *A Commentary Upon the Historical Books of the Bible* (London, 1695–1710); Samuel Clarke, *The Holy Bible, containing the Old Testament and the New, With Annotations and Parallel Scriptures* (London, 1690); Matthew Henry, *Exposition of the Old and New Testaments* (London, 1708–10).

Mather – like his contemporary Isaac Newton – merged facets of what Richard H. Popkin has defined as “empirical and rationalist thought with theosophic speculation and Millenarian interpretation of Scripture” to meet the intellectual challenges of his time.²

The range of subjects Mather engages in the “Biblia” is, quite simply, breathtaking. Beyond the more conventional concerns of biblical philology and academic theology, he ventures into the realm of natural philosophy and wrestles with the questions raised by the great scientific thinkers of his day such as René Descartes (1596–1650), Sir Isaac Newton (1643–1727), or William Whiston (1667–1752). (See Section 2). Moreover, Mather frequently includes asides on specifically American topics such as Native American religions, culture, and medicines, as well as discussions of the flora and fauna of the New World. Occasionally, Mather’s answers grew into independent essays of ten or twenty pages that far exceed the immediate concerns of the biblical chapters and verses under discussion. With its breadth of topics and essay-length discourses, “Biblia Americana” in more ways than one resembles works such as Johann Heinrich Alsted’s *Encyclopaedia Septem tomis distincta* (Herborn, 1630) or Pierre Bayle’s *Dictionnaire historique et critique* (Rotterdam, 1695–97, 1702) rather than such popular Bible commentaries as those by Matthew Henry or Matthew Poole. If “Biblia Americana” explodes the framework of conventional commentaries, it more than lives up to Robert Boyle’s call for a scholar-theologian to address the philosophic advances of his age in a biblical handbook: “I cannot but hope,” Mather quotes his friend and correspondent, “that when it shall please God, to stir up Persons of a Philosophical Genius, well furnished with Critical Learning, and the Principles of true Philosophy, and shall give them an Hearty concern for the Advance of His Truths, these men will make Explications, & Discoveries that shall be admirable.”³ How seriously Mather took the famous scientist’s call to arms is evident throughout “Biblia Americana.” In fact, in a missive to Dr. John Woodward of the Royal Society of London, Mather confesses his secret obsession. Referring to himself in the third person (ostensibly to appear as a disinterested observer), he explains that in spite of all his duties of composing sermons, ministering to the largest congregation in English America, and publishing more than two-hundred books, “neither these, nor *any* other obstructions could retund his passion for the Favourite Work of his, *Biblia Americana*.”⁴

Here, then, we find competing explanations of the Mosaic creation account and mechanistic theories of Noah’s flood; Cartesian rationalism and Newtonian science; miracles vs. natural causation; reason vs. revelation and verbal inspiration; problems of philological-textual transmission, lacunae, scribal errors, and

² R. H. Popkin, *Third Force* (90–91).

³ Cotton Mather, *Bonifacius* (200).

⁴ Mather’s “Letter to Dr. John Woodward, Nov. 17, 1712,” in David Levin, “Giants in the Earth” (760).

interpolations; Spinozism; the Calling of the Jews; millennialism; Trinitarianism vs. Unitarianism; African slavery, Native American conversion, and captivity narratives; the origin of fossils, religious rituals, dogmas, and idolatry; pietism and world missions, and many more topics difficult to summarize. As he put it in the "General Introduction" to his *Magnalia Christi Americana* (London, 1702),

I considered, That all sort of *Learning* might be made gloriously Subservient unto the *Illustration* of the *Sacred Scripture*; and that no *professed Commentaries* had hitherto given a thousandth part of so much *Illustration* unto it, as might be given. I considered, that Multitudes of *particular Texts*, had especially of later Years, been more notably *Illustrated* in the *Scattered Books* of Learned Men, than in any of the *Ordinary Commentators*. And I consider'd, That the *Treasures of Illustration* for the Bible, dispersed in many hundred Volumes, might be fetch'd all together by a Labour that would resolve to *Conquer all things*; and that all the *Improvements* which the *Later-ages* have made in the *Sciences*, might be also, with an inexpressible Pleasure, call'd in, to assist the *Illustration* of the *Holy Oracles*, at a Rate that hath not been attempted in the vulgar *Annotations*. (104)⁵

In short, "Biblia Americana" goes beyond the immediate concern of a commentary on the Holy Scriptures, because in digesting a whole library of ancient, classical, and Enlightenment research filtered through the screen of Reformed theology, Mather collects the most significant discoveries of the ages in *all* disciplines from literally hundreds of different tomes.⁶ Strongly invested in the traditional belief in a divinely organized universe of correspondences, hence the unity of all knowledge, he sought to bring together the combined learning of the different branches of human and divine knowledge.⁷ "Biblia Americana" was to become a clergyman's personal encyclopedia (in the absence of a college library), a one-stop shop where educated readers could interface with Pagan antiquity, Newtonian science, and Old-Time Religion.

As the most renowned member of a family dynasty of Puritan clergymen spanning four generations, Cotton Mather was the leading New England divine of his generation. He was one of the last Renaissance men who had the knowledge of the ages at his fingertips. Above all, he understood the need of his Reformed peers for a conservative guide to stir a safe course between the Scylla and Charybdis of the early Enlightenment. Mather intended his "Biblia Americana" to be this vademecum. If the effigy of Mather as America's "national gargoyle" is still railroaded through the popular press on occasions, there is little to support this grossly distorted caricature in his commentary on the Bible.⁸

⁵ Unless otherwise noted, all citation references to the *Magnalia* are to Kenneth B. Murdock's edition.

⁶ See "Bibliography of Primary Works" at the end of the present volume.

⁷ See J. Stievertmann, "Writing to Conquer All Things" (263–97).

⁸ See K. Silverman, *Life and Times* (425); and D. Levin, "Monster" (157–76).

Quite to the contrary, a completely different Mather emerges from the manuscript pages: an urbane, erudite scholar-theologian who had long transcended narrow partisan exegesis by incorporating in his commentary the landslide of philosophical innovations of his age. In doing so, he not only demonstrated that American scholarship easily matched that of his European peers but also created a unique record of the hermeneutical, philological, and scientific debate then raging in Europe. His "Biblia Americana" is the product of his lifelong endeavor to synthesize and – if possible – to reconcile this new, threatening scholarship with his abiding faith in the authority of the Bible.

Samuel Mather (1706–85), Cotton Mather's son and heir to the pulpit of Boston's Second Church (Old North), did not exaggerate when he described his father's huge *Biblia* manuscript as

a Work the writing of which is enough constantly to employ a Man, unless he be a *Miracle of Diligence* the *half* of the *Threescore Years & Ten* which is the Sum of Years allowed us. I mean, his *Illustrations of the sacred Scripture*. The Doctor, from an Hint given by that very great and learned Man my Lord BACON, begun this Work in his *thirty first* Year, tho' he had before *some* Materials for it by him; and in his *fifty first* Year so finish'd it, as to publish his PROPOSALS for printing it, intitled, *A new Offer to the Lovers of Religion and Learning*. Ever since that Time to his *Death*, he was adding to it; so that now it is judged to be *by far the greatest Amassment of Learning that has ever been bro't together to illustrate the Oracles of GOD*.⁹

Indeed, "Biblia Americana" is an immense resource for students, scholars, and pastors interested in American religious and intellectual history. Our scholarly edition will make this work accessible to a wide audience. Before we can appreciate Mather's magnum opus and begin to understand its full import, we should review some of the highlights of his life and times.¹⁰

9 Samuel Mather, *Life of... Cotton Mather* (1729) 73. For Cotton Mather's proposal "A New Offer" (1713/14), see below.

10 There are several well-known nineteenth- and twentieth-century biographies of Cotton Mather's life in addition to the most recent one by K. Silverman (mentioned above): Rev. William B. O. Peabody, *Life of Cotton Mather* (1836) was published in volume VI of the highly popular "The Library of American Biography" series, edited by the Unitarian Jared Sparks, and designed for school use ("School District Library"). The biography went through at least three editions and reprints in its lifetime (1836, 1840, 1856). Rev. Enoch Pond, *The Mather Family* (1844), a partisan biographical history of the Mathers which is as unabashedly apologetic as those of Pond's contemporaries are unashamedly disparaging. Rev. Chandler Robbins, *History of the Second Church, Or Old North* (1852) is intended as an encomium to the bicentennial of the Old North Church and its pastors. Barrett Wendell, *Cotton Mather: The Puritan Priest* (1891); Rev. Abijah Perkins Marvin, *The Life and Times of Cotton Mather* (1892), and Ralph and Louise Boas, *Cotton Mather: Keeper of The Puritan Conscience* (1928). Wendell's biography, almost exclusively based on Mather's then unpublished diary, was written by the first professor of English and American literature at Harvard and reveals a remarkable sympathy for New England's roots and for Mather as a towering figure of the Puritan Priest; Marvin's *Life and Times* is a highly readable apologia by a Congregational minister in Winchendon, MA, and prolific author of American histories. Marvin views Mather's life through the lens of his pastorate. *Cotton Mather: Keeper of*

Cotton Mather (1663–1728)

The eldest son of New England's leading divine, Increase Mather (1639–1723) and grandson of the Massachusetts Bay Colony's spiritual founders Richard Mather (1596–1669) and John Cotton (1585–1652), Cotton Mather was born in Boston (12 Feb. 1663), educated at Harvard (B.A. 1678; M.A. 1681), and honored with a D.D. degree from the University of Glasgow (1710). As pastor of Boston's Second Church (Congregational), he stepped into the political limelight during the colonies' version of the Glorious Revolution, when Bostonians rose against the tyranny of James II and deposed their royal governor, Sir Edmund Andros (April 1689). During the witchcraft debacle (1691–93), Mather both warned the Salem judges against admitting "spectral evidence" as grounds for indictment and, instead, advocated prayer, fasting, and reassurance as antidotes to cure the afflicted, but he also wrote New England's official defense of the court's procedures, on which his modern reputation largely depends: *The Wonders of the Invisible World* (Boston, 1693). As the Lord's remembrancer and keeper of the Puritan conscience, he wrote the grandest of American jeremiads, his epic church history of New England *Magnalia Christi Americana* (London, 1702). Like his father a staunch defender of Puritan orthodoxy, Mather persuaded Elihu Yale, a Welsh merchant and practicing Anglican, to endow Yale University (1701, 1718) as the new nursery of Puritanism, when Harvard seemed to become too liberal under the influence of John Leverett and William and Thomas Brattle, Mather's erstwhile rivals. If such endeavors bespeak Mather's partisan politics on the one hand and his transcendent thinking on the other, it was his chiliastic credo that led him to champion Pietist ecumenism, his effort

the Puritan Conscience is one of the first psychoanalytic studies of Mather's life, written by the Boases, two professors of English at Wheaton College, Massachusetts. They translated for generalist readers the many controversies surrounding Mather's life into a highly readable journalistic account unencumbered by such traditional academic tools as a table of contents, footnotes, bibliography, or index. The fashionable psychoanalytic approach of the day, however, is not without its problems. Robert Middlekauff, *The Mathers: Three Generations of Puritan Intellectuals* (1971). This Bancroft-Prize winning biography of the Mather dynasty is one of the finest studies covering an entire century of Puritan hegemony in New England. David Levin, *Cotton Mather: The Young Life of the Lord's Remembrancer* (1978) – along with his collection of essays in *Forms of Uncertainty* (1992) – is a sympathetic, but forthright study of Mather's accomplishments and some of the controversies surrounding his life. Written as a college-level introduction, Babette M. Levy, *Cotton Mather* (1979) is a sympathetic discussion of Mather's life and principal works, still one of the best prologues for readers unfamiliar with his complex personality. Although not a biography per se, Richard F. Lovelace, *The American Pietism of Cotton Mather* (1979) is still unsurpassed as a study of Mather's theological impact on the development of American religion. Finally, Kenneth Silverman, *Life and Times of Cotton Mather* (1984) remains one of the most comprehensive studies of Mather's life. It is hoped that the appearance of the *Biblia Americana* in ten volumes over the next decade will inspire a new generation of scholars and biographers to reassess Mather's significance as scholar-theologian, an assessment that may well re-examine Jonathan Edwards's monolithic status as America's foremost theologian.

to unite not only all Christian denominations in New England, but also all Christians, Jews, and Moslems in the Orient and Occident, under the umbrella of his "Maxims of Piety" to hasten the Second Coming of Christ.

Likewise, his interest in the new sciences and in new medical theories distinguishes Mather from his American contemporaries. He was elected a Fellow of the Royal Society of London (1713) for his physico-theological contributions to the Society, his "Curiosa Americana." He popularized in his *The Christian Philosopher* (London, 1720/21) the new scientific theories of William Derham, John Ray, John Woodward, Robert Boyle, Thomas Burnet, William Whiston, and Sir Isaac Newton, and staunchly advocated a new germ theory and inoculation against smallpox – in the face of the united opposition of Boston's physicians during the epidemic of 1721. Whereas Increase Mather never quite made the transition into the Enlightenment, Cotton was well on his way; he represents the best of early Enlightenment thinking in colonial America. His contributions to the literature of the New England "Errand" are as diverse as his publications are prolific and inexhaustible. In all, he published more than 450 works on all aspects of the contemporary debate: theological, historical, biographical, political, and scientific.¹¹ It is therefore deplorable that Mather's reputation is still largely overshadowed by the specter of Salem witchcraft.

No single work of Mather's gargantuan publication record does justice to his long, productive career in New England's foremost pulpit, but several representative types afford a glimpse of his interior life and overall achievement. *The Diary of Cotton Mather* (1911–12, 1964) provides a more comprehensive insight into his volatile nature than his autobiography *Paterna* (1976), which (by and large) is extracted from his diary.¹² Often called his "Reserved Memorials," his diary is a Puritan document par excellence.¹³ It focuses on his inner life and on Mather as an instrument of divine providence. If his public persona in his sermons is overbearing and pompous by modern standards, his private persona in his diary can be modest, even unostentatious, yet passionately confessional and soul-searching. No doubt, baring his breast to public inspection was a risky business – if his Reserved Memorials were to fall into unsympathetic hands.

¹¹ Cotton Mather's son Samuel estimated the number of his father's publications at 382 (*Life* 67). The bibliographer of the Mathers, Thomas J. Holmes, raised the number of Cotton Mather's "known printed works" to 444, in *Cotton Mather: Bibliography* (1:ix). Keith Arbour identifies additional works in his article "Additions" (81–130). Some of Mather's largest manuscripts he had intended for publication were not printed until the twentieth century: *Diaries* (1911–12, 1964), *Angel of Bethesda* (1972), *Paterna* (1976), "Problema Theologicum" (1994), "Trip paradisus" (1995). His largest manuscript, the tome he considered his most important work, is "Biblia Americana" (1693–1728).

¹² *The Diary of Cotton Mather* (1911–12), hereafter, *Diary* 1 and 2. *The Diary of Cotton Mather for the Year 1712* (1964), hereafter, *Diary* 3. *Paterna: The Autobiography of Cotton Mather* (1976).

¹³ D. Levin, "Misnamed Diary" (177–97) and L. A. Rosenwald, "Cotton Mather as Diarist" (129–61).

Revealing his most intimate thoughts, fears, and desires, Mather inadvertently invites modern readers to psychoanalyze and thus to misapprehend his record of meditation and introspection. For as he poured over his real and imagined sins, examined the promptings of his passions, and confided his musings to the privacy of his diary, Mather created a didactic ledger to measure his spiritual progress toward sanctification. Yet when read as a civic document intended for public consumption, his memoir becomes a goldmine for those who scour his confidential thoughts for hidden motives. Those not personally conversant with the nature of religious affections, with a Puritan's vulnerability in the process of introspection and self-humbling, with his psychological need to heighten his want of grace by deeming himself "the chief of sinners," – in short, those unaware of the psychological turmoil involved in the Puritan *ordo salutis* are likely to misjudge his acts of mortification and incessant confessions of vanity and pride as admissions of true character flaws: "*Proud Thoughts* fly-blow my best Performances!" (*Diary* 1:16), the young Mather early on confided to his diary as he consciously or unconsciously emulated St. Paul's confession (1 Tim. 1:15): "Christ came into the world to save sinners; of whom I am chief." The more he magnified his sin of pride and vanity, the greater his self-abasement; and the more intense his soul's agony, the more perfect his Augustinian *imitatio Christi*.¹⁴ Modern readers unacquainted with this quaint ritual are struck by this seemingly mechanical, if morbid, exercise. Unless read in small doses, Mather's private confessions may appear to be repetitious, formalistic, and ultimately insincere. Yet each of these exercises represents untold pangs of distress and breast-beating couched in the language of self-abnegation. Such, then, is his principal purpose of keeping a diary.¹⁵ The modern reception of his diaries is not the only source of his problematic reputation.

14 In his *Treatise Concerning Religious Affections*, Jonathan Edwards explained the psychological pitfall of one marooned in the cycle of religious introspection as follows: "[He] that is truly humble, and really sees his own vileness, and loathsomeness before God, the distance [from the sin of pride] appears the other way. When he is brought lowest of all, it does not appear to him, that he is brought below his proper station, but that he is not come to it; ... And this distance he calls pride. And therefore his pride appears great to him, and not his humility. ... The degree of humility is to be judged of by the degree of abasement, and the degree of the cause for abasement: but he that is truly and eminently humbled, never thinks his humility great, considering the cause. The cause why he should be abased appears so great, and the abasement of the frame of his heart so greatly short of it, that he takes much more notice of his pride than his humility" (*Religious Affections*, part 3, sec. 6, subsec. 3.2, in *Works* (2:333). Benjamin Franklin, it is well known, poked fun at this spiritual exercise in his autobiography. "In reality there is perhaps no one of our natural Passions so hard to subdue as *Pride*," Franklin commented facetiously. "Disguise it, struggle with it, beat it down, stifle it, mortify it as much as one pleases, it is still alive, and will every now and then peep out and show itself. ... For even if I could conceive that I had completely overcome it, I should probably be proud of my Humility" (*Autobiography* 76).

15 See D. Leverenz, *Language of Puritan Feeling* (esp. chs. 4, 6, and 7); P. Caldwell, *Puritan Conversion Narrative* (chs. 1–2); D. B. Shea, *Spiritual Autobiography* (chs. 3–6); J. O. King, *Iron of Melancholy* (1983), and J. H. Rubin, *Religious Melancholy* (1994).

Mather's mythic status still rests on his involvement in the Salem witchcraft debacle (1691–93) and on Robert Calef's unfounded allegation in *More Wonders of the Invisible World* (London, 1700) that the clergy incited the hysteria to recoup their political power in the colony. It is important to remember that the most educated theologians, philosophers, and scientists of the time believed in the existence of the demonic world as much as the common man did. Far from being the delusion of some gullible and superstitious few, the certainty of the invisible world was official dogma among all Christian denominations throughout the ages. The American colonies – Puritan or no – were no exception. Mather's most important publications on the supernatural include *Memorable Providences, Relating to Witchcraft and Possessions* (Boston, 1689) and *Wonders of the Invisible World* (Boston, 1693). *Memorable Providences* mostly recounts the possessions and antics of the Goodwin children, the eldest of whom Mather observed in his own home and eventually cured through a regimen of fasting, prayer, and patient reassurance. While to modern readers the narrative smacks of singular gullibility, Mather's practical tests, careful observations, and experimental procedure in restoring the girl's mental health are – for the time – innovative treatments of the case. His second work on the topic, *Wonders of the Invisible World*, aimed at several purposes. On the one hand, the book served as New England's official defense of the court's verdict, which was consistent with the English witchcraft statutes of the time; on the other, it is Mather's contribution to pneumatology, with John Gaul, Sir Matthew Hale, Henry More, Joseph Glanvill, and Richard Baxter serving as some of his principal sources.

Before Mather excerpts the six most notorious cases of Salem witchcraft, he tries to protect himself and his account with the official endorsement of Lt. Governor William Stoughton (one of the Salem judges), with a disquisition on the invisible world, with a previously delivered sermon on the subject, and with his own experimental observations. Mather's *Wonders*, however, does not end without express caution against the use of "spectral evidence," a warning he had repeatedly sounded even before the first person was tried and executed on June 10, 1692.¹⁶ While exposing "Satan's plot to overthrow" New England's churches,

¹⁶ *The Return of Several Ministers Consulted* (June 15, 1692) strongly cautioned the Salem judges and magistrates against convicting anyone on the basis of "spectral evidence," incriminating evidence collected from witches who were believed to assume the shape of innocent individuals and invisibly torture their victims. Cotton Mather's authorship of *The Return* is all but certain, as is evidenced in his letter (May 31, 1692) to Judge John Richards, who had requested guidance in the matter ten days before the first victim was executed: "I must humbly beg you that ... you do not lay more stress upon pure specter testimony than it will bear. ... It is very certain that the devils have some times represented the shapes of persons not only innocent, but also very virtuous. ... I would say this: if upon the bare supposal of a poor creature's being represented by a specter, too great a progress be made by the authority in ruining a poor neighbor so represented, it may be that a door may be thereby opened for the devils to obtain from the courts in the invisible world a license to proceed unto most hideous desolations upon the repute and repose" of innocent individuals. Mather's letter to Judge John

Mather also recommended his father's caveat *Cases of Conscience* (Boston, 1693). What ties the various parts of *Wonders* together is Mather's millenarian theme of Christ's imminent Second Coming, for which he found proof in the devil's assault on New England. Robert Calef's politically motivated smear has been discredited by modern scholars, but Calef's charge of Mather's ambidextrous disposition seems warranted. For while Mather defended the court's verdict and justified the government's procedure, he also reiterated his opposition to the use of spectral evidence as grounds for indictment. *Wonders* appeared in print just when the trials were halting, but it remains, in his own words, "that reviled Book."¹⁷

His most enduring and, at once, most famous legacy is his epic *Magnalia Christi Americana* (London, 1702), an ecclesiastical history of New England in the time-honored tradition of providence literature. In seven books of uneven length, Mather commemorated on an epic scale virtually every aspect of New England's formative period (1620–1698): the migration to and settlement of the colonies; their governors and ministers; the founding of Harvard; New England's Congregational church polity, synods and schisms; supernatural occurrences, providential rescues, exemplary deathbed confessions; Indian wars and captivities – all ostensibly demonstrating God's providential hand. From a literary point of view, Mather's Plutarchan biographies of New England's governors (book 2) and ministers (book 3) are of greatest value.¹⁸ Much of the information provided here cannot be found anywhere else. Puritan patriarchs are juxtaposed with heroes of biblical and classical antiquity, emulating their exemplary characteristics. Even though each life follows the pattern of a medieval hagiography, Mather does not fail to mention some of his heroes' shortcomings and how they overcame them. Since its appearance, *Magnalia Christi Americana* has been criticized for its lack of thematic unity, baroque flourishes, and uneven material. However flawed by modern standards, each of the seven books develops a specific interlocking thesis, unified by Mather's Virgilian theme of the mighty works of Christ in the Western hemisphere; Mather's baroque wordplay and rhetorical techniques – though outdated by the standards of his time – are entirely consistent with his own stylistic principles delineated in the *Magnalia* as well as in *Manuductio ad Ministerium* (Boston, 1726): to entertain with stylistic flourishes while instructing with nuggets of wisdom. Finally, Mather's consistent

Richards is reprinted in K. Silverman's *Selected Letters* (35–40). *The Return of Several Ministers Consulted* is reprinted in David Levin's *What Happened* (110–11).

17 The perennially popular subject of Salem witchcraft has been studied from many different theoretical approaches and angles. Among the best are the studies by G. A. Adams, P. Boyer and S. Nissenbaum, E. G. Breslaw, J. P. Demos, R. Godbeer, D. D. Hall (*Witch-Hunting*), C. Hansen, P. C. Hoffer, C. F. Karlson, G. L. Kittredge (*Witchcraft*), M. B. Norton, B. Rosenthal, M. L. Starkey, K. Thomas (*Religion*), R. Weisman.

18 See G. van Cromphout's "Plutarchan Biographer" and "Renaissance Humanist."

narrative voice and rhetorical intent unify his subject matter as the grandest of jeremiads that American Puritanism has brought forth.¹⁹

Out of Mather's Pietist impulse and scientific endeavor grew three strands of works, the best examples of which are his civic-minded *Bonifacius* (1710), his compendium of the new sciences *The Christian Philosopher* (1721), his medical handbook *The Angel of Bethesda* (wr. 1723/24, publ. 1972), his manual for the ministry *Manuductio ad Ministerium* (1726), and his definitive discussion of his eschatology in "Triparadisus" (wr. 1712, 1720–27; publ. 1995). Mather's *Bonifacius. An Essay Upon the Good, that is to be Devised and Designed, By Those Who Desire to Answer the Great End of Life, and to do Good While they Live* (Boston, 1710) represents the most comprehensive expression of his life's purpose: "Fructuosus," to be productive and serviceable to his fellow man.²⁰ A lifelong interest in the German Pietism of August Hermann Francke of Halle (Saxony) convinced Mather that specific practical advice rather than pious exhortations could engender social reform.²¹ Conceived as a manifesto for a benevolent society, *Bonifacius* outlines how each of society's classes – aristocracy, magistrates, ministers, physicians, lawyers, merchants, tradesmen, teachers, parents and children, servants, and slaves – can serve God by benefiting their fellow men. Far more than mere pious advice for doing good, yet never far from the Reformed tenet that works without grace are dead, *Bonifacius* is a manual for social reform, perhaps the best of the early self-help and reformist tracts that grandfathered the many benevolent and reforming societies of nineteenth-century America. *Bonifacius* was Mather's most popular book.²² Reprinted in many editions, *Bonifacius*, popularly known as *Essays to Do Good*, was the muse of young Ben Franklin's satiric *Dogood Papers* and yet his acknowledged guide and source of inspiration for the older Franklin's benevolent projects.²³

In typical Renaissance fashion, Mather was at home in virtually every discipline of human knowledge, ancient and modern. Though a theologian by vocation, he was a virtuoso of science by avocation, as his "Curiosa Americana" (1712–20) and his *Christian Philosopher* (London, 1720/21) attest. In the former, he describes in more than twenty-three separate epistles his pseudo-scientific observations of the American flora and fauna, ornithology, birth defects,

¹⁹ Mather is a highly self-conscious stylist, who defends his characteristic flair in *Magnalia Christi Americana*, Murdock ed. (100–02) and in his handbook for young clergymen, *Manuductio ad Ministerium* (1726) 44–47. For an analysis of Mather's style, see W. R. Manierre, "Cotton Mather and the Plain Style" (1958) and his "Verbal Patterns" (402–13). For a more recent study, see J. Stievermann, "Writing to Conquer All Things" (263–97).

rattlesnakes, earthquakes, Indian customs, and many other American curiosities – natural and supernatural. Perfectly consistent with the European standards of the time, “Curiosa” also pioneers theories of psychogenic causes of disease and of plant hybridization, the earliest known account, which became the basis for the Linnaean system of botany.²⁴ The Royal Society of London bestowed upon Mather the prestigious title of F. R. S. (1713). He was only the eighth colonial American to be elected a Fellow. Like Increase Mather’s *Illustrious Providences* (Boston, 1684), Cotton Mather’s *The Christian Philosopher: A Collection of the Best Discoveries in Nature, with Religious Improvements* attempts to reconcile Scripture revelation with natural science and the teleological arguments of the day. But unlike his father’s earlier work, *Christian Philosopher* moves with ease between scientific explanations and theological justifications. In thirty-two essays ranging in subject from astronomy, meteorology, geology, mineralogy, botany, zoology, to biology, the book ends on human physiology, his longest chapter.²⁵ A work of his mature years and originally an integral part of “Biblia Americana,” *Christian Philosopher* reveals Mather’s enthusiastic embrace of Newtonian science which, though barely distinguishable from the arguments of early Deists, demonstrates the adaptability of Reformed theology to the philosophy of the early Enlightenment.

As an experimenter in medicine, Mather was as qualified as any medical practitioner in the Old and New World; he had turned to the study of medicine when his adolescent stammer seemed to render him unsuitable for the ministry. His lifelong interest and solid foundation in medicine is apparent in this single, most comprehensive medical handbook in colonial America, *The Angel of Bethesda* (wr. 1723/24, publ. 1972).²⁶ Its threefold purpose – religious, medical, scientific – is an outgrowth of his practical Pietism: to provide the indigent with medical advice in the absence of a physician. In sixty-six chapters (or Capsules, as he wittily calls them), Mather quotes from more than 250 of the best medical authorities and borrows remedies from the Galenical, chemical, and occult schools of medicine. Here loom large such worthies as Hippocrates, Galen, Paracelsus, Zoroaster, Plato, but also van Helmont, Boyle, van Leeuwenhoek, Malpighi, Harvey, and Sydenham. Each capsule follows the same pattern: (1) Mather’s pious improvement on the disease, followed by (2) its clear description and interpretation, and (3) the best-known remedies and dosages for the possible cure of the ailment. Yet Mather’s *Angel* is remarkable not for the singular medical lore characteristic for its time, but for its advanced

theories that are of continuing interest to modern medicine. Among still valuable recommendations are his prophylactic rules of temperate diet, physical exercise, and discouragement of smoking. His most enduring legacy, however, is his method of overcoming stammering, his benevolent treatment of psychiatric cases, his discussion of psychosomatic causes of illness, his immunological recommendations on inoculation against smallpox (eighty years before Edward Jenner developed his vaccine), and his disquisition on germ theory (animalcules) – long before Lister and Pasteur discovered their bacteriological approaches to preventive medicine in the nineteenth century. The warm, comforting, and understanding tone of Mather's *Angel*, its clear structure and consistent narrative voice, are characteristically embellished by his entertaining wit, nuggets of wisdom, and occasional metaphors and puns.

In light of his scientific achievements, one almost forgets that Cotton Mather was a pastor and minister first and foremost. Emphasizing the nearness of the Second Coming, he hastened to write his *Manuductio ad Ministerium. Directions for a Candidate of the Ministry* (Boston, 1726), a handbook for the young minister.²⁷ Short on sectarian ideology, Mather emphasizes religious tolerance and ecumenism under the auspices of his Maxims of Piety, the reconciliation of Independents, Presbyterians, Episcopalians, Antipedobaptists, Lutherans, and Calvinists – all united at the Lord's Table (127). *Manuductio* also embodies Mather's educational principles for the gentleman minister: After the traditional classical languages, he recommends such modern languages as French and Spanish; he devalues the customary Aristotelian curriculum of rhetoric, logic, and metaphysics in favor of the new Cartesian logic implemented at Harvard, and advises students to spend their time on the study of the Bible, German Pietism, medicine, mathematics, astronomy, the new science, geography, ancient and modern history and biography, as well as music for refreshment and poetry for recreation.²⁸ His revealing recommendations on style (not an end in itself but a means to an end), composition of sermons, and polished oratory, evince just how far Mather had come in his old age: the minister of the future was to be above all a humane, liberal, erudite gentleman pastor, whose reformed Calvinism, humanistic scholarship, and polished grace did not neglect such practical matters as a balanced diet and physical exercise to offset the stress of his duties. Complete with a "must have" of the best books for a young theology student's personal library, *Manuductio* recommends such works as Thomas Lewis's *Origines Hebraeae: or, the Antiquities of the Hebrew Republic* (London, 1724–25), Edward Wells's *An Historical Geography of the Old and New Testament*

²⁷ Perry Miller's assessment of *Manuductio* remains as useful as ever, in Thomas J. Holmes, *Cotton Mather: A Bibliography* (2:630–36). Informative annotations and translations are provided in K.M. Woody, "Cotton Mather's 'Manuductio ad Ministerium'" (3–48) and in Woody, "Supplement" (1–98).

²⁸ See R. Kennedy, *Aristotelian & Cartesian Logic at Harvard* (1995).

(London, 1708, 1711–12), William Whiston's *A Short View of the Chronology of the Old Testament, and of the Harmony of the Four Evangelists* (Cambridge, 1702), Thomas Fuller's *History of the Worthies of England* (London, 1662), Edward Leigh's *Critica Sacra: Containing Observations on all the Radices of the Hebrew Words of the Old and the Greek of the New Testament* (London, 1639), Matthew Poole's *Annotations on the Holy Bible* (London, 1683–85), and Johannes Arndt's pious mainstay translated into Latin, *De Vero Christianismo* (London, 1708).

Cotton Mather's lifelong preoccupation with millennialism and its significance to his thought and work have only recently attracted full-scale attention. Beginning with *Things to be Look'd for* (Boston, 1691), he published more than fifty works in which eschatology played a major role. In fact, it is hard to read any of his writings without finding some reference to the imminence of Christ's Second Coming. Of his major works on that topic, three stand out: "Problema Theologicum" (wr. 1695–1703; publ. 1994), a 95-page manuscript reflecting the principal issues in Mather's early millennialism; "*Trip paradisu*," his definitive treatment of his millenarian theories (wr. 1712, 1720–27; publ. 1995) in response to the hermeneutical debate in Europe; and his "Biblia Americana," an unfinished critical commentary on the Bible, fortified with synopses of the best hermeneutical scholarship of the day. Unlike his earlier "Problema Theologicum" in which Mather advances an inchoate system of pre- and postmillennialist theories, his *Threefold Paradise* ("*Trip paradisu*") is his most comprehensive study of chiliasm.²⁹ As a hermeneutical defense of revealed religion, Mather's discourse seeks to negotiate between orthodox exegesis of the prophecies and the new philological and historical-contextual challenges to the Scriptures by such European scholars as Grotius, Hobbes, Spinoza, Whiston, and Collins. *Threefold Paradise* marks Mather's decisive break from the hermeneutical positions he had inherited from his intellectual forebears but also represents the culmination of his lifelong interest in eschatology, which lay at the core of his cosmology and which was the fundamental mainspring of his ministerial and theological office. Late in his life, Mather's exegesis underwent a radical shift from a futurist interpretation of the prophecies to a preterit position – from arguing that several signs of Christ's return were yet to be fulfilled to asserting that all signs had been given several times over. Part I of Mather's *Threefold Paradise* delineates the history and location of the Garden of Eden as evidenced in the Pentateuch, ancient histories, patristic literature, and contemporary travel accounts. Part II is largely a refutation of psychopannychism, that is, a rebuttal of the idea that the soul is dormant after the body's death and a defense of the soul's immortality. Part III is by far the longest and most valuable discussion and covers in twelve subsections

²⁹ See J. S. Mares, "Cotton Mather's 'Problema Theologicum'" (330–440), and R. Smolinski, *The Threefold Paradise of Cotton Mather: An Edition of "Trip paradisu"* (1995) and <http://digitalcommons.unl.edu/etas/48/>

a variety of topics affected by the hermeneutical revisionism then taking shape in Europe: the tradition of a literal conflagration of the Earth, his defense of a literal New Heaven and New Earth during the millennium, his allegorization of the conversion of the Jewish people, and his prophetic timetables calculating the millennial reign of Christ. “*Trip paradisu*” is Mather’s last word on the prophecies and rejects the old notion that New England represented the culmination of prophetic history in an American New Jerusalem.

“*Biblia Americana*”: Origin, Growth, and Significance

Like modern believers who live during a time of tremendous intellectual and religious turmoil, Mather lived during the early Enlightenment (1660s–1730s) when cosmological, scientific, and philological challenges had begun to destabilize the authority of the Bible as the Word of God: the Copernican cosmology and its heliocentric universe had just begun to displace the Ptolemaic geo-centrism that had governed the cosmology of Judeo-Christian believers since ancient times; Cartesianism laying the foundation of the modern empirical sciences had rejected the weight and authority of tradition as proof for all natural and supernatural phenomena described in the Bible; the new philological, historical, and contextual criticism of the Bible had begun to question the textual accuracy, transmission, and verbal inspiration of the Bible; and the new theories about the nature of light, gravity, and atomism posed tremendous problems to literalist readings of the Mosaic creation account – these new ideas required harmonization with orthodox interpretation if theologians were to survive this age of revolutionary uncertainty. Hence Mather’s predicament was not unlike that of modern believers whose faith in God and the inerrancy of the Bible is buffeted from all sides: creationism vs. evolutionism; divine revelation vs. human wisdom; verbal inspiration vs. philological and historical criticism; patriarchal authority vs. feminist and liberation theology; moral and ethic standards vs. philosophical relativism. Mather courageously faced these challenges head-on and invested more than thirty years of his life in devising ways to reconcile this new knowledge with the teachings of the Bible.

What makes this enormous “*Amassment of Learning*” commentary so compelling to modern scholars and believers is that he furnishes his readers with verbatim excerpts from both proponents and opponents on many controversial issues, allows them to present their case, withholds his own opinion until the end of each excerpt, and finally – after due consideration of all evidence – harmonizes old and new in his own synthesis generally delivered at the end of each annotation. “*Biblia Americana*” is therefore more than just another commentary on God’s Word. Unlike some of the most respected commentaries of the seventeenth through the early eighteenth centuries (Henry Ainsworth, Hugo Grotius,

Matthew Poole, Henry Hammond, Matthew Henry, Simon Patrick, William Burkitt, Augustine Calmet, Daniel Whitby, Philip Doddridge), Mather's "Biblia Americana" is a record of the historical debate in the marketplace of ideas. When compared with Jonathan Edwards's private "Notes on Scripture," "Miscellanies," or with his "Blank Bible," "Biblia Americana" pursues different strategies because Mather intended his commentary for public consumption – to provide generations of readers with up-to-date summaries of the critical debates and with means to reconcile their differences.³⁰ The plan for "Biblia Americana" was conceived in the late summer of 1693, the same year that Mather outlined his plans for his *Magnalia Christi Americana* (*Diary* 1:166). He aimed to gather into two folio volumes the most significant discoveries of the ages, scattered across the various disciplines, and appearing in hundreds of different tomes, but rarely accessible in a single location: "I considered, that Multitudes of particular Texts, had, especially of later years, been most notably *illustrated*, in the scattered Books of learned Men, than in any of the ordinary Commentators; and I considered, that the Treasures of *Illustrations* for the Bible, dispersed in the Volumes of this Age, might bee fetch'd all together by a laborious Ingenuitie" (*Diary* 1:170).

At the "Rate of *one Illustration*" per day, Mather intended over a period of seven years (an auspicious number signifying perfection) to fetch from the dispersed volumes of his peers "all the *Improvements*, which the *later Ages* have made in the Sciences," to include the "innumerable *Antiquities*, Jewish, Chaldee, Græcian, and Roman," to amass "in *one Heap*, Thousands of those *remarkable Discoveries of the deep Thing[s] of the Spirit of God*," and to incorporate "the delicious *Curiosities* of *Grotius*, and *Bochart*, and *Mede*, and *Lightfoot*, and *Selden*, and *Spencer*, and many more *Giants* in Knowledge, all sett upon *one Table*" (*Diary* 1:170, 231).³¹ By 1698, Mather hoped to entice potential buyers with a whole library of innovative research in an easily accessed digest form and with discoveries that had not yet found their way into the standard Bible commentaries of the time. He was sufficiently familiar with the exigencies of the marketplace when he advertised his American offering as complementing – not competing with – those of his English peers Matthew Poole and Matthew Henry, promising all along not to duplicate or undercut their commentaries (*Bonifacius* 202; *New Offer* 6). Yet Mather also made sure to point out in his *Magnalia Christi* that Poole "*left many better Things behind him than he found*," because Poole had lacked the resources to incorporate in his *Annotations* (1683–85) the "*many miscellaneous Criticisms, occasionally scattered in other Au-*

³⁰ One of the few studies to compare Mather and Edwards as biblical scholars is Stephen J. Stein, "Cotton Mather and Jonathan Edwards on the Number of the Beast" (293–315) and Stein, "Cotton Mather and Jonathan Edwards on the Epistle of James."

³¹ Nearly identical announcements appear in his *Magnalia Christi Americana* (London, 1702), ed. Kenneth B. Murdock (102–06); *Diary* (1:169–70, 229–31); *Bonifacius* (220–06), "Advertisement"; and, of course in his *A New Offer* (1714), see below.

thors" (*Magnalia* 105). Mather's "Biblia Americana" was therefore to supply that deficiency. In Feb. 1706, having added "very many Thousands" of illustrations, he took pride in his "Amassment," which he hoped "one day to send out" for publication (*Diary* 1:545). Yet three months later, Mather was worried that his failing strength might put an end to his plans. Exerting himself beyond measure ("doubtless a Disadvantage to my Health"), he added to his "Biblia" as many illustrations "in three Weeks" as he might have added in "so many Months." His exertions during these weeks of illness must have been exceedingly productive, for he recorded on May 28, 1706,

I finished my BIBLIA AMERICANA. So finished it, that there is no Necessity of my casting in any more, to my vast amassment of *Illustrations* upon the Divine Oracles; Tho' doubtless, I may be occasionally and continually adding thereunto, till the Manuscripts are dismiss'd out of my Hands for Publication. T'wil be two large Volumes in *Folio*; and I am now to wait upon the Lord, for His Direction, how to obtain a conveyance of the Manuscripts, into those Hands, that may publish them for the Service of His Churches. (*Diary* 1:563–64)

If Mather thought his optimistic appraisal was warranted after thirteen years (1693–1706) of scouring for fresh material and things left out of Matthew Poole's *Annotations*, he was quick to learn that his "Biblia Americana," in two volumes folio, was even harder to get published than his *Magnalia Christi Americana* (1702), which was long mired in disputes with his agents and publishers.³² Things would turn out far different than expected for his Bible commentary.

On August 26, 1706, Mather petitioned his God in prayer to direct him "how and when" to ship the bulky manuscript over to England and to "raise up Encouragement for the Publication of it" (*Diary* 1:567). To those ends, Mather composed less than four weeks later an advertisement "as *Prodromous* and *Engaging* for that work" with the descriptive subtitle "AN AMERICAN OFFER to serve the Great Interests of Learning and Religion in Europe" (*Diary* 1:570). Nothing came of the matter. Nearly five years later, on his forty-eighth birthday (February 12, 1710/11), he again petitioned his God that "some, eminent and opulent Persons may be raised up; to forward the Publication of my *Biblia Americana*" (*Diary* 2:40), but a year later – again reviewing on his birthday

³² It took more than four years to see his *Magnalia* in print after Mather thought he had finished the manuscript. In March 1698, he recorded in his diary that he had received assurances in his prayers that his "*Church-History*" and his "*Confirmed Christian*" (now lost) "shall bee carried safe to *England*." But neither manuscript left his library until sometime after June 8, 1700, and he did not receive a printed copy of the *Magnalia* until Oct. 29, 1702 (*Diary* 1:254–55, 353, 445). On the *Magnalia*'s complex publication history and the book's reception, see T. J. Holmes (2:582–96), and K. B. Murdock, "The *Magnalia*" (26–47). On the controversies surrounding Mather's London agent John Quick, Parkhurst (his publisher), quality of paper, typesetting, and proofreading, see C. Greenough, "John Dunton's *Letters*" (20–58) and "A Letter Relating" (134–47); and, more recently, D. N. Deluna, "Cotton Mather Published Abroad" (esp. 153–56); and D. D. Hall, *Ways of Writing* (143–45).

the desiderata of the bygone year – he took stock of the “many more than a thousand” illustrations he had added to the existing store of annotations in the previous year, and promised himself “To write some Illustrations for the most part every Day” (*Diary* 2:162). Later that same year (Nov. 17, 1712), Mather decided to take matters in his own hands. He sent a missive to the English geologist Dr. John Woodward (1665–1728), erstwhile council member of the Royal Society of London, whose distinguished *Essay Toward a Natural History of the Earth, And Terrestrial Bodies* (London, 1695), Mather would subsequently put to good use in his “Biblia” (*BA* 1:490–91) and elsewhere. The first of several letters to Woodward, Mather tried to arouse the great geologist’s interest in the giant fossils of Claverack, which Dutch settlers had unearthed in 1705. Mather enclosed a detailed description of the bones for potential publication in the Society’s *Transactions*, but the main purpose of his letter was to recruit Woodward’s help to publish “Biblia Americana.”³³ Incorrigible punster that he was, Mather explained that the account of the giant fossils was “fetched from an amassment of treasures” (his “Biblia Americana”) which, he hoped, would not remain buried “like the subterraneous ones; and that the library in which they lodge may not be so like the horrid cellars of Indoustan, where your silver and gold, after they have been brought out of their subterraneous condition, and circulated thro’ the business of the world, again return into it, and are again buried by the covetous Mogols, and have no more to do on the face of the earth.” Perhaps concerned that Woodward might mistake his meaning, Mather became more explicit: “My meaning is, tho’ I need not explain what I mean, I wish they [the treasures in his “Biblia”] had the publication which they are waiting for, and that your presses would return to print something else besides your politics, and serve to better purposes than to vent the ill humors of your nation.” What follows next is an example of Mather’s torturous panegyric on his own importance from the perspective of a humble, third-person advocate:

There is an American friend of yours who, tho’ he never traveled out of America, has had the honor to be related unto one of your European universities, and has been desirous to oblige a number of the best people in Europe with a composure which now arises to two considerable volumes in folio, wearing the title of *Biblia Americana*. He had long since been of your excellent Boyle’s opinion, that *you should no more measure the wisdom of God couched in the Bible by the glosses and systems of common expositors, than estimate the wisdom He has expressed in the contrivance of the world by Magnus’s or Eustuchius’s Physics*; and agreed with him in hopes that

³³ Richard Waller, secretary of the Royal Society, published a synopsis of Mather’s disquisition on the giant bones of Claverack, in *Philosophical Transactions of the Royal Society* 29 (1714–16) 62–63. Mather incorporated the full account along with his discussion of the giant Nephilim in his “Biblia Americana” (*BA* 1:582–99). See also D. E. Stanford’s contemporaneous accounts of the excavation of the mastodon bones in his “The Giant Bones of Claverack, New York, 1705” (47–61) and D. Levin’s reprint, in “Giants in the Earth” (762–70). See also my discussion in the next chapter.

learned men would go on to make more admirable explications and discoveries in that wonderful Book than what usually occurred in the vulgar (tho' very useful) *Annotations*. (Silverman, *Selected Letters* 110, 111)

Before giving Woodward an example of just the kind of scientific material he would find in the "Biblia Americana," Mather summarized the distinguishing qualities of this magnum opus. They included "the fairest hypotheses (and yours, my most honored Doctor!) of those grand revolutions, the making, and the drowning, and the burning of the world, are offered" along with "the meteors, the minerals, the plants, the animals, the diseases, the astronomical affairs, and the powers of the invisible world" – all conforming to the best theories of natural philosophy of the day (*Selected Letters* 112).³⁴ If that did not make the heart of a physico-theologian beat faster, then surely nothing would. For his scientific communications ("Curiosa Americana"), the Royal Society of London would, within a year's time, honor Mather by electing him a member of its distinguished body. It would even publish his celebrated *Christian Philosopher* (London, 1720/21). Yet helping him find a publisher for "Biblia Americana" the Society evidently did not.

The year following his letter to Woodward, Mather took pride in the "considerable Accession to our *Biblia Americana*," and having yet again added "many more Illustrations than Dayes in the Year" – in addition to the "Seventeen Books [he had] prepared for publication, and most of them actually published" during 1712 (*Diary* 2:178). Over the next year, Mather kept adding hundreds of new illustrations to his ever-growing collection, and just before turning fifty, he felt it was "now high time" and "to come into Action" that his "*Biblia Americana*, may be brought forth into the World." Mather therefore resolved to circulate "a Sheet, entituled, *A New Offer, to the Lovers of Religion and Learning*" (Boston, 1713/14) and thus to garner support through subscriptions from contributors at home and abroad (*Diary* 2:283).³⁵ Not to let things languish any longer, Mather set out to solicit support from several of his European friends and acquaintances. The first of several letters – all written between May, 1714, and November, 1715 – was addressed to the Rev. Thomas Reynolds (1667–1727), a Presbyterian minister at Weigh-House, Little Eastcheap (London), whose *Practical Religion Exemplify'd in the Lives of Mrs. Mary Terry and Mrs. Clissold* (London, 1712) Mather had been instrumental in reprinting in Boston (*Diary* 2:309).³⁶ Mather welcomed Reynolds's gift of £30 in support of the Society for Promoting Chris-

³⁴ See also K. Silverman, *Life and Times* (247–54).

³⁵ Mather's *A New Offer* (1713/14) is reprinted in full (below).

³⁶ W.C. Ford, the editor of Mather's *Diaries*, states that Mather's letter to Reynolds was "written in the spring of 1715" (*Diary* 2:309n2), but given Mather repeated worries about not receiving any response from Reynolds, Silverman's date of "c. May, 1714" (*Selected Letters* 147) is more likely. For historical background on Reynolds, see W. Wilson, *History and Antiquities* (1:157–69), D.L. Wykes, "Reynolds, Thomas (c. 1667–1727)."

tian Knowledge in America as well as his charity work in Southwark, which had much in common with Mather's Pietist *Orphanotrophium* (Boston, 1711). With such obliging connections, Mather could be fairly certain of a sympathetic ear with regard to his "Biblia Americana." His letter to Reynolds (c. May, 1714) suggests that Mather hoped to interest in his project London's Presbyterian clergy who, for a brief period, had joined with their English and American confreres, the Congregationalists, to form the United Brethren.³⁷ Emphasizing that the Puritan congregations of New England were ambitious "to be acknowledged as your *United Brethren*" and "to be bound up in one Bundle, of Life and of Love," Mather more than hinted that the gracious performances offered to God in the American hemisphere deserved nothing less than the loving support of the Brethren in the other: "Behold, now laid before you, *A New offer to the Lovers of Religion and Learning*, made by one of yours, at a Thousand Leagues distant from you." Mather evidently did not shy away from arousing ecclesiastical jealousies between Anglicans and Dissenters as a means to rally the United Brethren behind publishing Mather's Bible commentary: "Some eminent Persons in the Church to the Rites whereof we are Non conformists," Mather alluded to their Anglican rival, "have given me such a Prospect of Encouragement from them, for our, *Biblia Americana*, that if you should wholly cast it off, it may happen by their Means to make its way into the World. But, I think my Duty to you, obliges me to chuse, that it should rather be by yours" (*Diary* 2:312). There is no telling the mixed emotions of the Rev. Thomas Reynolds upon receiving Mather's imposing request, especially since Reynolds was expected to drum up support for the project and to find a bookseller willing to lay out his capital for the massive commentary. Reynolds did not respond until more than a year later.

As was usual with grand projects like the one Mather proposed, publishers were wary of committing resources when a reasonable return was not assured. And so, Mather set out to generate interest in advance by including a handbill in his letter to Reynolds to be circulated among his friends and correspondents. The Bible commentary was to be made available in two volumes, at the rate of "five Pounds of our Money, to the Subscribers." Booksellers might expect "Subscriptions for many more than one hundred setts of the Work; to be paid in upon their Arrival here [Boston]; if they will run the Risque thereof" (*Diary* 2: 310, 312). No doubt, the risk was all on the side of venture capital. Years earlier, Mather had also promoted "Biblia Americana" in his ecclesiastical history *Magnalia Christi Americana* (London, 1702), in his do-good essay, *Bonifacius* (Boston, 1710), and then again in *A New Offer To the Lovers of Religion and Learning* (probably printed in early 1714). Through the latter circular, he tried to strike a bargain with reticent booksellers, by promising one set gratis to all

³⁷ See W. Walker, "The 'Heads of Agreement'" (4:29–52), and his *Creeks and Platforms* (440–52).

those who "procure and send in *Subscriptions* for *Nine Sets* of this Work" (15). Mather asked Reynolds to approach his own publisher, the Presbyterian bookseller John Lawrence (c. 1684–c. 1714), at the Angel in the Poultry, to publish the "Biblia." However, Mather's clerical correspondent informed him in a long delayed missive of June 9, 1715, that Lawrence, in whom Reynolds "had Interest sufficient to entrust a Matter of such a Nature" had recently passed away. Worse yet, Reynolds in whose hands Mather's project was entrusted was "not yet able to get Subscriptions that might answer yours or the Booksellers Expectations." Besides quarrels among the United Brethren, the political unrest in Europe after the Peace of Utrecht (1713), and the turmoil of the Hanovarian succession upon the death of Queen Anne on August 1, 1714 – all betokened that Mather should wait for a more opportune time to publish his commentary (*Diary* 2:318).³⁸

Never putting all his eggs in one basket, Mather had also written to his Scottish friend and colleague the Rev. Robert Wodrow (1679–1734), minister of Eastwood and author of the esteemed *History of the Sufferings of the Church of Scotland* (Edinburgh, 1721–22), with whom Mather maintained a long and productive correspondence until the end of his own life. From this letter of May 17, 1714 (which may well have crossed the Atlantic in the same ship with the missive to Reynolds), we learn that Mather had "sent unto Mr. Thomas Reinolds [sic], with two other ministers in London, and Mr. John Laurence, a bookseller at the Angel, in the Poultry there, my new offer of our *Biblia Americana*, and am waiting for their direction."³⁹ Wodrow's response was quick – considering the unreliable and frequently circuitous ways of transporting mail. From his answer, dated Dec. 11, 1714, we learn that "Your new offer, or *Biblia Americana*, I have endeavoured to spread up and down this country, that ministers may be acquainted with the noble design; and I am persuaded your undertakers at London will not want encouragement, if they shall, as I hope they will, engage" (Wodrow, *Correspondence* 1:628). Wodrow's long letter, however, also reported about the political and religious anxieties in the United Kingdom, the death of Queen Anne and accession of the Hanovarian George I, and the all-too-cozy relations between the Roman Catholic Houses of Habsburg and Bourbon on the Continent even while the Ottoman Turk was "ready to fall upon the Venetians" and stir up war again after their devastating defeat and the Treaty of Karlowitz (1699) which, everyone had hoped, would put a stop to their aggression (Wodrow 1:630). It is to these political uncertainties that Reynolds would later allude

³⁸ *The London Topographical Record* (1907) lists the dates for the bookseller John Lawrence as "1684–1704" (4:65). According to H. R. Plomer's *Dictionary*, John Lawrence, who frequently collaborated with the London printer John Dunton, "was still in business in 1711" (184). However, if the missive of the Rev. Thomas Reynolds to Cotton Mather (June 9, 1715) is correct, the bookseller John Lawrence "died several months ago" (*Diary* 2:318).

³⁹ "Letter CLXXXVI" (Wodrow 1:626–27).

in his overdue letter to explain why there were no takers for "Biblia Americana" among the London printers and booksellers.

Meanwhile, impatient that his request had miscarried in one way or the other, Mather wrote to Sir William Ashurst (1647–1720), former Lord Mayor of London (1693–94) and subsequent governor of the New England Company (1696–1720). Mather's letter (Nov. 17, 1714) included a copy of his *New Offer* advertising his "Biblia" along with the news that he had solicited many other subscribers "in these plantations" including "three Governors who are all of them uncommon literators." Yet Mather also worried about his growing manuscript "ever getting without the walls of a private library" while the esteem for the New English colonials – Nonconformists to boot – was running low in Anglican England. His concern seemed especially warranted now that Mather had lost his influential friend and supporter in "the death of Mr. Matthew Henry, who diverse times offered me his best assistance for the publication of the work." Unless some benefactors "of a moderate and catholic (and your) spirit in the Established Church" were to sponsor its publication, Mather broadly gestured toward Sir William, "Biblia Americana" would "remain where it is." The only option left, Mather acknowledged, was to submit to the will of God and to await His pleasure (Silverman, *Selected Letters* 155). However, Mather did not bide his time, but tweaked providence as much as he could. This time (May 4, 1715), he wrote to Jeremiah Dummer (1681–1739), a prominent Harvard graduate with a doctorate from the University of Utrecht (1703), and New England's colonial agent in London.

Asking Dummer not to hold against him the disagreeable squabbles they had had in the past, Mather tried to mollify "my *Pamphilius*" and cajole him into looking into the little matter of his "Biblia Americana" which was going nowhere among English Dissenters in London. Mather reports that he is "some what sure of having above an hundred Setts taken off" by subscribers among his countrymen at the rate of £ 5.00 "of our Money." Yet he has "laid aside all Expectations of the Work Meeting with any Countenance, where according to common Sense ... [he] might most justly have expected it" since his esteemed friend the Rev. Thomas Reynolds deigned to disregard Mather's repeated requests to secure a publisher for the commentary (*Diary* 2:313, 314). Again Mather was prepared to resign matters into the hands of God and therefore told Dummer that "you will not in the least Measure disoblige me, if you never take one Thought more about this Work," while Dummer was busy with more important things. Lest "*Pamphilius*" take him at his word, Mather closes his letter by inviting Dummer to "bestow some Study on the Characters of true Love" and Christian charity (1 Cor. 13), according to which Mather endeavors "as a dying Man" to serve God by serving his fellow man (*Diary* 2:313, 315, 315).

Cotton Mather also wrote to Daniel Williams, D.D. (c. 1643–1716), an English Presbyterian clergyman, benefactor of Harvard, of the University of

Glasgow, of St. Thomas's Hospital, of a library in his name in London, and of various religious establishments in Scotland and New England.⁴⁰ The two clergymen shared many interests and had previously exchanged letters and books to strengthen their common ties. Given his largess, Williams was a likely promoter of the "Biblia." Mather's letter to Williams is of uncertain date, but the content suggests that it was written before Mather received Thomas Reynolds's negative response (dated June 9, 1715) about finding a publisher for the commentary. The series of letters Mather had sent to his friends in England and Scotland during the past twelve months had not yielded any positive news, and his urgency (if not impatience) in the matter comes to the fore in this rather formal missive: "You will pardon me," Mather wrote to Dr. Williams, "if I repeat my humble Wishes, that my Brethren, the Dissenters, would please to take into their consideration, whether it may conduce unto the best Interest, and their own, for our *Biblia Americana*, to meet with some countenance among them. I have diverse times addressed my excellent Friend Mr. *Reynolds*, for his Advice on that Head; and I have waited a Year and half, without the least Word of Return; which has held me in a little suspense, as to some Applications" (*Diary* 2:316). Mather's technique of pressuring Reynolds into responding seemed to have yielded some results since Reynolds's regrets arrived in Boston not too long thereafter. Reynolds's reply (June 9, 1715) indicates that an earlier missive in response to Mather's original request had miscarried. At any rate, he informed his Boston colleague that the Schism Bill (May 1714) outlawing Dissenters from serving as schoolmasters or educators in any capacity (unless they receive an Episcopal license) had stirred up considerable discontent and that "the publick Affairs are in such Distraction" at present, "that we scarce know where we are, and how matters are like to issue."⁴¹ The conflict between Whigs and Tories had reached such a high pitch, Reynolds reported, that "the City and [People] are obliged to be in Arms." Any hope to attract subscribers during this state of uncertainties was therefore to be despaired of, at least for now. When things improve, Reynolds promised, "I shall be ready to contribute what I can with the Rest of my Brethren to recommend your book that the publick may be obliged with the Benefit of it" (*Diary* 2:318). Nothing came of the matter as we learn from a missive nearly ten years later (April 22, 1724), in which Mather registers his disappointment that Reynolds no longer took "any further Notice of me (as for some years before indeed, he took very Little,)" no doubt alluding to the abortive attempt to enlist Reynolds's support of the "Biblia" (*Diary* 2:798).

But the story is not yet finished. In response to Sir William Ashurst's epistle (no longer extant), Mather felt encouraged to raise the issue once again (Oct. 18, 1715). He thought he had discovered between the lines "some Intimations" that

⁴⁰ D. L. Wykes, "Williams, Daniel (c. 1643–1716)."

⁴¹ On the vicissitudes of the "Schism Bill," see Novak (448–51).

Sir William desired more information about the commentary. "In obedience to your command," Mather gladly complied: "I have enclosed, a, *New offer*, which exhibits a brief Account of the Work." What follows is Mather's longest letter yet on the state of his "Biblia Americana." Here we learn that although he had published to date (1715) "more than 250 Books" of all sizes, on all manner of issues, and "in diverse Languages," yet nothing he had done so far came even close to his masterpiece. If potential subscribers only understood what a king's bargain "Biblia Americana" represented; if only they knew that his treasures had been distilled from "many copious and costly volumes," stripped of their "Superfluities," and amassed in his commentary, subscribers would surely welcome his labor of love and all the savings into the bargain. Lamenting the indifference and neglect with which his English brethren were treating their American confreres was almost too much for Mather:

I did not know, but that a Composure, which may pretend without Vanity to be the richest collection of the most valuable Treasures, in so little a Room, that ever the Ch[urch] of God was entertained withal, might hope for a favorable Reception, with people of Religion and Ingenuity. ... Indeed the good-spirited Mr. [Matthew] Henry, several times, in his Letter to me express'd his Good-will to this undertaking; but, he is dead. The Surviving seem to be of the opinion, that a poor *American* must never be allow'd capable of doing any thing worth any ones regarding; or to have ever look'd on a Book. ... Had not the work been in the English Tongue, my Correspondents in the most illustrious Frederician University [Halle, Germany] who have putt great Marks of their Favor upon me, would soon bring it into the Light. ... It may be, God our Saviour will in His Time, dispose the Minds of some eminent and opulent persons, to cast a benign Aspect upon a work which may hand down their Names with lasting Acknowledgments unto posterity (*Diary* 2:331, 332).

Indeed, a dark tone of disappointment and a touch of resentment resonate in these lines, no matter how much he tried to sound upbeat and hopeful. Even his appeal to Ashurst's vanity that the names on the list of subscribers would adorn the pages of the "Biblia" and thus bestow lasting fame on its benefactors sound a bit half-hearted.

Mather explored other venues for potential publication as well. There was no telling if his long-standing ties with his Lutheran Pietist friends in Germany might not yield some unexpected patronage. To these ends he wrote a long letter to Rev. Anthony William Boehm (1673–1722), Lutheran chaplain to Prince George of Denmark (royal consort of England's Queen Anne), member of the London-based Society for Promoting Christian Knowledge, and Mather's principal channel of contact with his Frederician colleagues in Halle (Germany).⁴²

⁴² For biographical information on Boehm, see A. Mielke and S. Yelton, "Böhme, Anton Wilhelm" (31:159–74). For Mather's communications with his German Pietist friends in Halle (usually via Boehm), see K. Francke, "Cotton Mather" (57–67), "Further Documents" (31–66), and "Beginning of Cotton Mather's Correspondence" (193–95). More recently, O. Scheiding,

In this letter to Boehm (Aug. 6, 1716), Mather acknowledged his happiness that his *Magnalia Christi Americana* appealed to Boehm, asking him to forward the copy to their mutual friends in Halle. Mather made sure to draw his attention to the Pietist focus of "Biblia Americana" and to the indifference with which English Dissenters had treated his proposals for its publication. Among "the most valuable Things" in the "Biblia," Mather assured Boehm, "are those which such men as your [Johann] Arndt, and [August Hermann] Franck[e], and others of the like truest Erudition, have led into."⁴³ But book publishers in England had cold feet about "Biblia." Besides, Mather did not expect much more than indifference from men of "narrow Spirits" (London Dissenters) among whom, he wished, "learning were more esteemed and exemplified." Perhaps thinking of Francke's famous printing house in Halle, Mather added, "If this work ever see the Light, I expect, it will be from the Countenance and Contribution, of men of our *Universal Religion*; who will every way appear more and more in the several Forms of Christianity. And among such I entreat of you, that my, *new offer*, may be communicated" (*Diary* 2: 413). Indeed, Mather left out no contact, at home and abroad, no venue unexplored, no stone unturned to garner support for his brainchild. It would be devastating if it remained stillborn.

And now the rest of the story: Two months later, on a day set aside for fasting and prayer (Oct. 6, 1716), Mather appeared resigned to accept the inevitable: "I glorified the Lord this day, with the sweetest Acquiescence and Resignation, in the Case of the *Biblia Americana*, whereof I receive Advice this day, that the publication thereof, is to be despaired of" (*Diary* 2:376). The origin of this "Advice" is unclear, but may well have been given him – if not in a letter from Europe – then through the conduit of prayerful communication with heaven. Sometimes, however, acceptance and resignation are cold comfort, especially in this case. Less than two weeks later, he meditated on that sore once again. Searching for answers why God seemed pleased to reject the "elaborate Preparations of my Pen, to serve the Cause of Piety in the World," Mather appeared downcast: "Strange Frowns of Heaven have defeated the Publication of those things, which it cost me a World of hard Study, to gett ready for the Church of GOD. Now, what shall I do on these Occasions?" God knows best when to accept and when to bring forth the "Biblia" to be most useful to the interest of the Kingdom of God, Mather mused. He added,

And I would satisfy myself in my Oblations ... and consider my sweet Acquiescence in His holy Pleasure to reject them, as a sweet Addition to my Oblations, and His Delight in them; and give a Demonstration, that the acquiring of a Name to myself (a Vile Idolatry!) is no End of my Oblations, in my patient and easy Bearing of it, and that they should be lost as to this World, and known unto Him alone. And I

"The World as Parish" and Wolfgang Splitter, "Fact and Fiction," come to different conclusions about the significance of the correspondence between Mather and August Hermann Francke.
 43 Mather's Pietist focus is highlighted in his *New Offer* (14, # XII).

would go on with all possible Industry to present as many Oblations to the Work of God, as I can; and cheerfully leaving to Him the Disposal of them. (*Diary* 2:378)

Although Mather did not succeed in placing his “Biblia” with a publisher at this time, he knew only too well that nothing was impossible for Him, who in His own time, would “dispose the Minds of some eminent and opulent persons” to come forward and publish Mather’s oblations. Such, then, appears to be his resolution to “go on with all possible Industry” and to continue to make his pen subservient to the interest of God.

Mather’s letter (Oct. 31, 1716) to Rev. Henry Walrond (d. 1724), a close friend in London and fellow millenarian, contains one of the few remaining references to Mather’s endeavor to find a publisher for his magnum opus. After updating Walrond on the growth of Boston’s seven churches of United Brethren – besides an Anglican, a Baptist, and a French church – Mather introduced the familiar subject. Mather is delighted to learn that a previous package of forty of his works had safely arrived for Walford’s personal use (or distribution) among his friends. “But indeed there are above two hundred more,” Mather pointed out, half-jesting about the matter close to his heart: “Altho’ some which are longer than any of these, (except the *Magnalia*,) and the *Biblia Americana* also (which are more than three times as big as the *Magnalia*,) and have cost me exquisite Elaborations, ly by unpublished.” Promising to send Walrond more care-packages of Mather sermons “from Time to Time,” he again shared his unhappiness about the state of his big commentary: “Tho’ I am, from very many parts of the world, solicited for the *Biblia Americana*, yet, I have no Prospect of its being undertaken by the *London-Booksellers*, until the present Storms are over; which, I am so far from expecting, that I beleeve, the Times must grow yet more tempestuous” (*Diary* 2:416). The storms and tempests to which Mather refers appear to be the political turmoil in the wake of the demise of Louis XIV (d. 1 Sept. 1715), who occupied a not so minor place in Mather’s eschatological speculations about the Second Coming.⁴⁴ The work he forwarded to Walrond in that package was Mather’s freshly published *Lapis e Monte Excisus. Atque Regnum Dei*, his bilingual *Stone Cut out of the Mountain* (Boston, 1716), presaging the apocalyptic scenario of Christ’s Second Coming looming on the horizon.⁴⁵

The *annus mirabilis* came and went, but the world kept turning as it had done from the beginning. Two days after his fifty-fourth birthday (Feb. 15, 1716/17), he tried once again to interest men in high places in his heart’s project. This time he singled out the newly appointed Governor Samuel Shute (1716–23),

⁴⁴ See Mather’s *Shaking Dispensations* (Boston, 1715) and his millenarian “*Triparadisus*” (*Threefold Paradise*), 336.

⁴⁵ Mather also includes a copy of *Lapis e Monte Excisus* (1716) in his “An Appendix. Containing Some General Stores, of Illustration; and a Furniture which will richly Qualify a Person to be a Reader of the Bible,” a collection of twelve separate essays that Mather included at the end of “*Biblia Americana*,” following his commentary on Revelation.

through whom Mather hoped to curry favor with the governor’s famous brother John Shute (1678–1734), the later Viscount Barrington, who (earlier in the century) had become instrumental in swaying Scotland’s Presbyterians to support the union between the two kingdoms. The diary remains silent about Mather’s success in the matter. We know of one more attempt – three weeks later (March 5, 1716/17) – in which Mather approached Sir William Ashurst once again on the subject of his “Biblia.” This time around, Mather is much more direct if not forceful. The letter reiterates the main points of the missive Mather had sent more than a year earlier (Oct. 18, 1715), but also stresses the urgency of it: “I now grow so much in my encroaching Boldness upon you,” he sounded his apologies, “as to add this unto it. The *Opus Ecclesiae*, which is now waiting for the Light, is a Work wherein all sorts of Persons will find themselves accommodated with Entertainments, which, if they have been agreeable and acceptable in a separate Exhibition, how much more will common sense tell any man, they must be so in a refining Amassment of them! In these Varieties, none of all the Readers, will be more gratified, and edified, then the more curious Philosopher, who is on all Occasions here treated with such Things as would be fore the Palats of a *Christian Virtuoso*.” If Sir William were somehow able to “prevail with two or three Persons of Quality, to appear as Patrons and Favourers of a Work, so evidently Calculated for the Service of the Interests” of the Church, they would “thereby obtain the Monuments and Memorials of their generous Goodness which would be therefore due to them, and rais’d for them; the things desired, would be soon accomplished” (*Diary* 2:511). This is the last we hear of the matter.

Did Cotton Mather ever give up hope that his mighty commentary, “one of the greatest Works, that ever I undertook in my Life,” would ever get published? (*Diary* 1:169). Evidently, the last time he mentioned his unpublished work in an extant letter to a European correspondent is dated Nov. 12, 1719. Congratulating his old friend Robert Wodrow on having found a publisher for the *History of the Sufferings of the Church of Scotland* (Edinburgh, 1721–22), Mather glances with some noticeable envy at other colleagues whose works seem to prosper, while his own “Biblia” is languishing. Even his “dear Frankius” in Halle, Germany, Mather tells his Scottish friend, was singularly blessed in publishing his edition of the Greek New Testament “(for the publishing whereof our glorious Lord strangely supplied his expenses).” More often than not, God’s inscrutable will was hard to accept, let alone penetrate: “While the glorious Lord has accepted me more than two hundred and ninety times to serve his kingdom with my mean pen, in publishing composures, many of which have cost me very little thought, and been the fruits of no long projection, he seems to pass a sentence of death on several preparations that have cost me much more study than those that have come abroad; especially the *Biblia Americana*. And if he will have them to lie for ever buried, I am entirely satisfied in his will, and wisdom, and justice; and his grace, in what has been already done, will be sufficient for me. However,

I will wait upon Him, with hopes that he who raises the dead will, in his own time and way, bring into the service of his kingdom what it has no occasion for" (Wodrow, *Correspondence* 2:502–03). If the thousands of additions, excisions, and revisions in the six hefty manuscript volumes are telling indications, Mather never allowed his "Biblia" to be buried in oblivion. Nor did he ever lay the work aside completely. His many disappointments notwithstanding, he kept adding ever more material until the end of his life. Some of the very last entries in "Biblia Americana" for which a date can be estimated were made in 1727, less than a year before his death, the day after his sixty-fifth birthday (Feb. 12, 1727/28). By 1728, "Biblia Americana" had swelled to its present size of more than 4,500 double-columned manuscript pages in six volumes folio – too costly an undertaking to charm even his most dedicated patrons in Britain.

A New Offer To the Lovers of Religion and Learning: Publishing by Subscription

It is high time to examine Cotton Mather's advertisement, which plays such a prominent part in his effort to publish "Biblia Americana." Printed in c. 1713/14, Mather's pamphlet *A New Offer* – like many of his other works – went through an extended gestation period and multiple incarnations. As previously mentioned, Mather conceived his "Biblia Americana" as early as 1693 and began promoting his commentary in his church history *Magnalia Christi Americana* (105–06), in his essay to do good *Bonifacius* (200–06), and then again in his millenarian "*Tripuradisu*" (94). The substance and whole paragraphs of his pamphlet thus evolved over a long time period of nearly twenty years. With some significant variations, it appeared for the first time in its complete form as an advertisement appended to his popular *Bonifacius* (1710). As a separate pamphlet, however, *A New Offer* was probably not printed until shortly after Feb. 7, 1713/14, when Mather resolved to publish "a Sheet, entitled, *A New Offer, to the Lovers of Religion and Learning*" and to send copies throughout the American colonies and to Europe (*Diary* 2:383).

[1]

A
New OFFER
To the Lovers of
Religion and Learning.

IT is *Agreed* by all true Christians, and most *Certain* to them, That we are *highly Favoured* of Heaven, with a Divine *Storehouse of Truth* in our SACRED SCRIPTURES.

The World has nothing in it comparable to this BOOK of GOD, and of Life. A Book, which all the Learning under Heaven may be well employ'd, for the *Illustration* of; and is never so well employ'd, as when so employ'd. The *Illustration* of it, is indeed the most *Serviceable* and the most *Entertaining* Thing, that can be offered unto them that have any Value, and Relish or Concern for that Knowledge, which is of all the most valuable, and that would be *Wise unto the best of Purposes*. [2]

It is a Passage of the Celebrated BOYL; "When I Consider, how much more to the Advantage of the Sacred Writings, and of Christian Theology in general, diverse Texts have been Explained, and Discours'd of, by the Excellent *Grotius*, *Masius*, *Mede*, and Sir *Francis Bacon*, and some other late great Wits (to name now no Living ones,) in their several Kinds, than the same Places have been handled by *Vulgar Expositors*, and other Divines; And when I Consider, that none of these Worthies, was at once a great *Philosopher* and a great *Critick*; I cannot but hope, that when it shall please God, to stir up Persons of a *Philosophical* Genius, well furnished with *Critical Learning*, and the Principles of true *Philosophy*, and shall give them an hearty Concern for the Advance of His Truths, these Men will make *Explications* and *Discoveries* that shall be Admirable. You shall no more measure the Wisdom of God couched in the Bible by the Glosses and Systems of common Expositors, than æstimate the Wisdom He has express'd in the Contrivance of the World, by *Magirus's* or *Eustachius's* Physicks."

This *Wise Man* was a *Prophet*, when he wrote those Lines. An Age of *Light* comes on; *Explications* and *Discoveries* are continually growing; which all that will but *shew themselves* Men cannot but imbibe with Satisfaction. The *Path of the just One*, in His gracious Approaches to-[3]wards us, causes the *Light* which opens His Oracles unto us, to *shine more and more towards the perfect Day*. Doubtless the Pagan *Longinus* pleas'd his Jewish Empress, the brave *Zenobia*, when she read him admiring the *High Style* of *Moses* in that stately Stroke of the Creation; *God said, Let there be Light; And there was Light!* But how Admirable is that great Work of the *most High God*, which has given effectual Order for His Church in our Day; *Let there be Light in it, and let my Oracles be Illustrated!* And, *Lo, there is Light, and the Illustrations of the Sacred Scriptures are carried on to Wonderment!* The Instruments by whom this *Light* is brought down unto us, have of late been greatly Multiplied: *God has given His Word* of it, and *Great has been the Army of those that have published it*.

Anon, We have the Admirable WITSIUS Comforting of us, with his Report, of this Importance. *Neg: profecto Officio his suo defuerunt Illustres Animæ.* – "There have not been wanting those Illustrious Men," [And Thou, my dear Witsius, not the least of them!] "who have observed all the Solid Discoveries in *Philosophy*, all the Curious Researches of *Antiquity*, or that has occur'd in *Physick*, or in *Law*, relating to the *Sacred Scriptures*, and have applied it all with a signal *Dexterity* to the Illustration thereof: And so 'tis come to pass, that *Theology*, which had vast Riches of its own before, is now also enriched with foreign *Spoils*, and [4] appears with those Ornaments, which extort, even from them that are most of all disaffected unto it, a Confession of its most Charming Majesty."

The noble Service to Mankind, thus proposed, having been so far pursued, it is easy to imagine, that a Person of but common Abilities, [for He who now Writes may pretend unto no more;] applying himself unto it, may accomplish a very *Rich Collection of Illustrations upon the Sacred Scriptures*. An ADVERTISEMENT now comes forth, to Inform the Friends of Learning and Religion, that it is in some degree accomplished. An, *Opus Ecclesiæ*, is ready when it shall be call'd for.

No little Part of what has been Written on the great Intention of *Illustrating the Divine Oracles* has been perused. Some Hundreds of the *Latest* as well as the *Oldest* Writ-

ers that have had any thing looking that way, have been Consulted: If not for Number enough to have built an *Egyptian Pyramid*, yet so many, as to render the *Extract* alone which is now made from them, a sort of a *Library*.

Where small *Pamphlets*, as well as large *Volumns*, have made any valuable *Offerings* to the Service of the Sanctuary, they have not been wholly neglected. The *Names* of them, whose grateful *Stores* have been brought into this *Common Hive*, whether they be Dead or Living, are with all decent Ingenuity acknow-[5] ledged and eternized. Not only the *Rare Thoughts* of the more Illustrious Literators, who are known for *Stars of the first Magnitude* in the Catalogue of them that have *handled the Pen of the Writer*, but also the *Hints* occurring in Books that have made no Profession of serving this Cause, and many of them very *unsuspected ones*, have been seized for it. Many Thousands of those *Fine Thoughts*, whereof sometimes *One* or *Two*, or a very *Few*, have enabled the Writer to find some Acceptance in setting up for *Authorism*, are here together set upon the Table, in order to a Feast of *Fat Things full of Marrow, of Wines in the Lees well refined*. It cannot be presumed that the *Eye* of the poor Industry, which has laboured on this Design, has yet *seen every precious Thing*, yet, in the more than three Lustres of Years, which have run since it began the Undertaking, it has often *visited the Place of Sapphires*, and *found the Dust of Gold*, which is here to be exposed unto the more Sensible and Ingenuous part of Mankind, when it shall be thought a time for it. And it may be easily supposed, that one of no more than a *Common Reach*, Conversing so much with such Things, may now and then also make a feeble Flight towards an *Illustration* of his own, that may deserve Attention. There is an *American Plant*, which alone, as *Hernandez* will with some Demonstration tell us, *Quicquid vitæ esse potest Necessarium, facile prestare potest*; it will answer [6] all the *Necessities* of Humane Life, yea, and supply the *Delicacies* of it also. It is possible, this *American Work*, may with as Universal an Accommodation, afford what may be *Necessary*, yea, and what may be likewise *Delectable* to them, who in acquainting themselves with the *Best of Books*, and Things, would have their Studies well accommodated. The *Collection* makes Two FOLIO'S, of some considerable Dimensions, which now lye ready for Publication: Hoping that *Vossius's* Complaint of another Country, will not always be true of *Ours*, That one can hardly get any thing Printed, but either *Quarrels* or *Trifles*; *Eristica et Nugalia, quibus nihil vendibilis, ut ipsi non dissimulant Typographi*.

It has been studied, that this Work might not interfere with the Large *Annotations*, begun by the Excellent POOL, and finished by some of his Brethren.⁴⁶ Those *Polan Annotations* have been left almost wholly unconsulted, in the Composing of this Work, that their Value and Vending may not suffer the least measure of Depreciation from it. Nor will the inestimable Performances of such as Mr. *Matthew Henry* lose the least Grain of their Esteem with the Faithful, by having this Work to wait, (if the Public please to have it so) as an *Appendix* upon them. These Composures will be singularly Useful to one another.

The Work is attempted by a Person so strictly adhering to the Principles of the *Christian* [7] *Religion*, professed in the *Reformed Churches*, that the Reader is perfectly released

⁴⁶ In his *Magnalia Christi Americana* (105), Mather makes the following pitch for his "Biblia Americana": "When the excellent Mr. Pool had finished his Laborious and Immortal Task, it was noted by some considerable Persons, That wanting Assistance to Collect for him many miscellaneous Criticisms, occasionally scattered in other Authors, he left many better Things behind him than he found." K. B. Murdock ("End Notes" 381) points out that Mather's italicized passage is quoted from Matthew Poole's posthumously published *Annotations upon the Holy Bible*, 2 vols. (1683–85) 1:A6v.

and secured from all Fear of his finding here, any dangerous *Innovations* in, or *Deviations* from, the *Faith once delivered unto the Saints*. Instead of that, he will very frequently find, that the most important Articles of our *most Holy Faith*, are here defended with a *New Force*, by setting in a *Clear Light* such Texts, as have not been observed heretofore to carry such Assertions in them, or have been encumbered with the Glosses which *Men of Corrupt Minds* have put upon them. Nevertheless, the *Attempt* is carried on, with such a *Catholick Spirit*, that it may be hoped no *Good Man*, will have any matter of just Offence given unto him. It is not a Work animated with the *Spirit of a Party*; and it may be hoped, that nothing but that ungenerous and contemptible Spirit, will cast the disdainful Eye of the *Scorner* upon it. Accordingly it is already come to pass, that very Eminent Persons, Divines of great Note, in the *Church by Law Established*, having been apprised of the Work, have generously offered their best Encouragements unto it. Numbers of the best Men among the *Dissenters* have expressed their Wishes, not without some Impatience for it. *Scotland* also invites it, expects it, requires it. In *America*, 'tis asked for, and waited for. And there may be some hope, That all *Impartial Christians*, of whatever Denomination or Subdivision in Christianity, will [8] reckon it, *An useful Work*. For indeed *Common Sense* will say, it must needs be so, if the *Books*, from which the *Best Things* are fetch'd, and laid here together, were so. And yet, there is more than *this*, to argue for it. Briefly, Men of *every Religion*, yea, and some of *no Religion* at all, have had *Spoils* taken from them, for the Enriching of this Work; And, why should not all good Men, who embrace the *True Religion*, tho' of different Perswasions in some lesser Points of it, Unite in the Enjoyment of the Riches?

To bestow the Censure of *Pride* and *Vanity*, on the proposing of such a Work for Publication, would be therewith to Censure and Reproach all Attempts in such a way to serve the Public. Most certainly 'tis no Trespass against the Rules of *Modesty*, to give the Public a Report and a Tender, of what has been thus prepared for it; but it would look like one against the Rules of *Equity*, to call it so. Most certainly, it is a *Modest Thing*, a *Sober*, a *Proper*, and a very *Lawful One*, for an *Honest Man* to desire, that so much of a short Life, as has been spent in such a Preparation, should not be *spent in Vain*.

The Pen, which all along this Work, pays all due Acknowledgments unto those, whom the Sovereign GOD furnished and honoured with the Treasures, which are thro' their Hands come into it, *seeks not its own Honour*; And if even the small Reputation of a little *Diligence* [9] and *Contrivance* be denied unto it, in this also it will Propound all imaginable Satisfaction. It would, if that had been possible, have kept the Authors Name under such a Reservation, that it must have been only a Retainer to *Placcius's Treatise, De Scriptoris Anonymis*. It is content, that the Writer be Clouded with all possible *Obscurity*; and that it be left wholly unconsidered, whether he has ever given any Testimony of a tolerable Capacity for such a Work as this, by any *other Performances*; or, whether any considerable *Societies* in the World, have ever thought him Worthy of being *Theirs*. It has nothing to object against as many *Diminutions* and *Annihilations*, as the superiour Part of Mankind may think agreeable for him. He only desires, that the Oblations which he brings from those that may be accounted *Better than himself*, (and which he might, if he had pleased, have made in the most *common Methods*, to pass for, *His own*,) may find Acceptance with the Church, to which we all owe our *All*: And that AMERICA may at length, with a Benign and Smiling Aspect of her Lady-Mother upon her, come in to do something, for an Interest that must *have these uttermost Parts of the Earth for its Possession*.

Sometimes very mean Things, have on the score of their being *Far-fetcht*, had a Value set upon them, and not been look'd upon as too *Dear-bought*, when a great Price

has been given [10] for them. If a Work, which is a *Tree*, that grew on the Western side of the *Atlantic*, may on *that score* hope to be valued by good Men, in the *other Hemisphere*, there will be an accession of *this peculiar Circumstance*, that, *Gentlemen*, the *Fruits* upon it, or at least, the *Seeds* that produced them, were most of them, Originally *Your own*: And it cannot but be a *Pleasure*, if not a *Surprize* unto you, to find that so many of your *Best Things*, have passed over *the great and wide Sea* unto the *American Strand*. Nor will it be New or Strange, if some Things happened to be *Meliorated*, and made more *Sweet* and *Fine*, by passing over this mighty Ocean. Or, to address you under *another Figure*; The Writers whom you made much of, while you had them *at Home* with you in a more *separate Condition*, certainly, will not lose your Favour, for having *Travelled Abroad*, and now *Returned Home* in *Company*; tho' with their *Habit* and *Language* having something of an *American Change* upon it.

But, what brings this *Promiser*; that may be worthy of so much Expectation?

THIS is the *TITLE* of it. These Promises may be made in the *Title-Page* of it. Behold here, a *Communi Fax*, unto it. [11]

BIBLIA AMERICANA.⁴⁷

The SACRED SCRIPTURES of the OLD and NEW Testament; Exhibited, in the *Order of Time*, wherein the several and successive Occurrences, may direct the Placing and Reading of them: which Exhibition alone, will do the Service of a *Valuable Commentary*. With,

- I. A proper Notice taken of those Instances, wherein the most Polite and Pious Masters in *Philology*, have expressed their Wishes to see the *Common Translation* Amended and Refined.⁴⁸
- II. A Rich Collection of ANTIQUITIES, which the studies Researches of Inquisitive and Judicious Men in the later Ages, have recovered; for a sweet Reflection of *Light* from thence upon the Heavenly *Oracles*: Especially those wherein the *Idolatry*, the

⁴⁷ The substantive differences between Cotton Mather's *New Offer* (1713/14), reprinted here, and his advertisement of the "Biblia" in *Bonifacius* (1710) reveal that he made several significant changes in his "Biblia" manuscript during the four intervening years. Fifteen years later, Samuel Mather's "Advertisement," appended to his biography of his father, *The Life* (1729), suggests additional revisions during the last dozen years of Cotton Mather's life, especially in items I and II (*The Life* 185–86).

⁴⁸ In *Bonifacius* (203), item I reads, "The common *Translation*, with all due Modesty, Amended and Refined in those many Instances, where an Army of Learned and Pious Men in our Days, have with great *Reason*, Proposed it." In Samuel Mather's *Life* (184), item I reads, "THE sacred Scriptures of the Old and New-Testament exhibited, *In the Order of Time*, wherein the several and successive Occurrences may direct to the lacing and Reading of them: which Exhibition alone will greatly enlighten them, and do the Service of a valuable Commentary." Samuel Mather's emphasis suggests that the whole section on "The OLD TESTAMENT in the Order of the History," followed by "The NEW TESTAMENT, in the true Order of the History," at the beginning of "Biblia Americana," which appears in the present edition in *BA* (1:213–68) was added sometime *after* Mather began circulating his *New Offer* (1713/14). Also see the following note.

*Oeconomicks, the Politicks, the Agriculture, the Architecture, the Art of War, the Music, the Habits, and the Diets in the former Ages, may be referr'd unto.*⁴⁹

- III. The LAWS of the *Israelitish Nation* in these *Pandects of Heaven*, interpreted; and the *Original* and *Intention* thereof, rescued from the Mis-representations, that some famous Writers have put upon them. With a particular History of the City JERUSALEM, under its wondrous Vicissitudes, from the Days of *Melchizedeck*, down to Ours; and a Relation of [12] the present & wretched Condition, in which it waits, the *Time to favour the set Time to come on.*⁵⁰
- IV. The TYPES of the Bible, accommodated with their *Antitypes*: And this Glorious Book of God, now appearing a Field, that yields a marvellous Mixture of Holy *Profit* and *Pleasure*, in those Paragraphs of it, which have sometimes appeared the least Fruitful with Instruction.
- V. *Golden Treasures*, and *more to be desired than such*, fetch'd out of those very *unpromising Heaps*, the TALMUDS, and other *Jewish Writings*; not only to Illustrate the *Oracles* once committed unto the *distinguished Nation*; but also to demonstrate the Truths of *Christianity*.
- VI. NATURAL PHILOSOPHY call'd in to serve *Scriptural Religion*. The fairest *Hypotheses* of those *Grand Revolutions*, the *Making*, the *Drowning*, and the *Burning* of the WORLD, offered. The *Astronomical* Affairs, the *Meteors*, the *Minerals*, the *Vegetables*, the *Animals*, the *Diseases*, the *Anatomical* Curiosities, and what relates to the *Invisible World* of Good or Evil Spirits, mention'd in these immortal Pages, represented with the *Best Thoughts of our Times* upon them. To all which there is added, *The Christian Virtuoso*,⁵¹ with the Commentary of the more Modern and Certain Philosophy on, *His Work which Men behold*; Embellished with the Discoveries which *our Days at Length* have made of Things wherein the Glorious GOD of Nature calls for our *Wonders* & our *Praises*. [13]
- VII. The CHRONOLOGY of this admirable Book, every where cleared, from all its Difficulties; and the *Clock of Time* set right, in its whole Motion, from the Beginning which *He that Inhabits Eternity* gave unto it. Besides the most Accurate *Harmony of the Gospel*, that has yet been offered among them that *know the Joyful Sound*.⁵²

49 In Samuel Mather's biography, item II reads, "An *Emendation* of our present Version; from the Discoveries of the most learned Philologists from the earliest Ages of sacred Literature down to *Bochart*, *Calmet* and *Parker*: and a particular notice of those many Instances wherein our greatest Masters of the Original Languages have express'd their wishes to see the common Translation amended and refined" (*The Life* 1984). This item is an expansion of item I as it appears both in *Bonifacius* (203) and in *New Offer* (11).

50 In *Bonifacius* (204), items II and III appear in inverse order.

51 In *Bonifacius* (204), item VI does not mention "*The Christian Virtuoso*" or its contents. Item VI reads as follows: "*Natural Philosophy* call'd in, to Serve *Scriptural Religion*. The Fairest *Hypotheses* of those *Grand Revolutions*, the *Making*, and the *Drowning*, and the *Burning* of the *World*, Offered. The *Plants*, the *Minerals*, the *Meteors*, the *Animals*, the *Diseases*, the *Astronomical* Affairs, and the *Powers* of the *Invisible World*, mention'd in the *book* of GOD, represented with the *Best Thoughts of our Times* upon them." Since Mather specifically advertises *The Christian Virtuoso* in his *New Offer* (see above), he evidently designed *The Christian Virtuoso* – later published separately as *The Christian Philosopher* (London, 1720/21) – to be an integral part of "Biblia Americana."

52 This last sentence (the reference to the *Harmony of the Gospel*) is absent from the advertisement in *Bonifacius* (205). This difference may well suggest that between 1710 and 1713/14, Mather interleaved the long section "PROLEGOMENA to the HARMONY of the Gospels"

- VIII. The GEOGRAPHY of it *Survey'd*; the Scituation, especially of *Paradise*, & of *Palestine* laid out: With an Account how the *whole Earth* has been Peopled: And many Notable and Enlightening Things contributed unto this Work, by *Travellers* of unspotted Veracity, by whose *Running to and fro Knowledge has been increased*.
- IX. A sort of *Twenty-ninth Chapter of the ACTS*; Or, An elaborate and entertaining History, of what has befallen the *Israelitish Nation*, in every Place, from the Birth of our great REDEEMER to *this very Day*: And the present Condition of that Nation, the Reliques of the *Ten*, as well as of the *Two Tribes*, (and of their Ancient *Sects*,) yet existing in the several parts of the World, where they are now dispersed, at *this Time*, when their approaching Recovery from their sad and long Dispersion is hoped for.
- X. The HISTORIES of all Ages, brought in, to show how the *Prophecies* of this Invaluable Book, have had their most punctual Accom-[14] plishment, and strongly established *Conjectures*, (yet made with all due Modesty,) on such as yet *remain to be Accomplished*: In the Prosecution whereof, the Reader finds an entire *Body of Church-History*, brought into his Possession.⁵³
- XI. The true Doctrine of the CHILIAD, which more opens & breaks in upon the more considerate Enquirers, *as the Day approaches*, brought in as a *Key* to very much of the Wealth, which the Church of God enjoys in this *Book of the Kingdom*. Whereto are added, the most *unexceptionable Thoughts* of the ablest Writers on the *Apocalypse*; defecated from the more Arbitrary and less Defensible Conceits, of *overdoing Students* in the Prophecies.⁵⁴
- XII. Some *Essays* to Illustrate the *Scripture* from EXPERIMENTAL PIETY, or the Observations of *Christian Experience*. With many of the *Excellent Things*, observed in and extracted from the *Holy Scriptures that make Wise unto Salvation*, especially by the *North-British Expositors*, who with a penetrating and peculiar Search after Hints for *Christian Practice*, have been found worthy to *Open* many *Books* of the Bible.
- And many Thousands of curious Notes, found scattered and shining, in the Writings both of the *Ancients* and the *Moderns*, laid here together, in a grateful Amassment of them.
- All done with a most Religious & Inviolable and Perpetual Regard unto the *Principles of Religion*, which are the Life of the *Reformed Churches*. [15]

between the section on "The New Testament" and "The Four Gospels" at the opening of his commentary on the New Testament ("Biblia Americana," vol. 6).

⁵³ In *Bonifacius* (205), item X reads "All *Appearances of Contradiction*, in the Pages fill'd from Inspiration, for ever taken away." This item probably refers to Mather's essay "Some Remarks, relating to the *Inspiration*, and *Obsignation*, of the CANON" and "I. VATES. Or, Some Remarks upon the SPIRIT of PROPHECY." Both of these sections are part of a series of essays entitled "Coronis" and "An Appendix. Containing Some GENERAL STORES, of Illustration," which Mather appends to his commentary on Revelation.

⁵⁴ Items X and XI in *New Offer* (13–14) appear as a single combined item (item XI) in *Bonifacius* (205). The separation of "The true Doctrine of the CHILIAD" (item XI) from "The HISTORIES" (item X) and his additional references to the "*overdoing Students* in the Prophecies" in (*New Offer*, item XI) suggest that Mather was in the process of rethinking his eschatology. Compare Mather's "Problema Theologicum" (1703) with his "*Trip paradisus*" (1712, 1720–27).

By the Blessing of CHRIST, on the Labours
of an *American*.

In Two Volumns.

¶ The usual Method for the Publication of such a Work, has been, first of all to Publish PROPOSALS for SUBSCRIPTIONS: For who can Dream, that such *Bulky & Costly Things*, can unassisted, make their own way into the World? But in the present Case, the Distance of the Author from *Europe*, & the Abode of the Work in *America* till it may be sent over with some hopeful Encouragement, and the uncertainty of what may be the *precise Number of Sheets* which will be needful on the Occasion, will oblige to something a little *Unusual* in the way of Proceeding.

Understanding that the Work will make *Two Volumns* in FOLIO, it is proposed, That it shall be afforded unto Subscribers, at the same Rate, that *such Books*, of the *Quantity*, and in the same *Character*, have usually been afforded at: Which is a Rate so generally *Agreed* (and very seldom or little *Varied*), that the venture of a more *Indefinite Subscribing* for it, need not be much scrupled at.⁵⁵

It shall also be insisted on, with the Booksellers, that whoever shall procure & send in *Subscriptions* for *Nine Sets* of this Work, shall have a *Tenth Gratis*. [16]

It is therefore PROPOSED, That the Persons who are Well-wishers to a Work of this Intention and Usefulness, would send in their *Names*, affixed unto the following Declaration.

When it shall please GOD, that the Work Entituled, BIBLIA AMERICANA, whereof the Public has been Advertised, in the New Offer to the Lovers of Religion and Learning; shall be Published, (and if it be done without unnecessary Delays,) the Subscriber will take off a Sett, (namely, The Two Volumns) at the Price assign'd by the Booksellers, with the Advice of Three unexceptionable Ministers of the City of London, within the general Rate which for a Work so Circumstanced has been formerly declared Reasonable.

Mather's *New Offer* employs most of the same advertising techniques found in the standard subscription announcements of the seventeenth and early eighteenth centuries.⁵⁶ It differs, however, in several major points: the absence of endorsements by well-known English Dissenters, Anglican bishops, or scholars with academic affiliation in Oxford, Cambridge, or Edinburgh; the want of a list of distinguished subscribers appended to his advertisement; the lack of a representative sample page of his commentary to vouch for print and paper quality; and (most of all) the nonexistence of an experienced and effective London agent with leverage among influential churchmen.

As is well known, financing costly publications by subscription became the preferred means of sponsorship in seventeenth and eighteenth-century

⁵⁵ Samuel Mather advertised his father's "Biblia" in "*Three Volumns* in FOLIO" for "between *Three & Four Pounds Sterling*; and in *New-England Money* according as the Exchange shall then be" (*Life* 186).

⁵⁶ See especially D. Farren, "Subscription" (93–154).

Britain and its American colonies.⁵⁷ Subscription – a form of advance payment of a share of the publisher's expense – began to replace the traditional mode of bankrolling publications through outright grants or gifts by well-heeled benefactors or aristocratic patrons whose largess was commemorated in sumptuous panegyrics of one sort or another. In its eighteenth-century context, Ephraim Chambers's *Cyclopædia* (London, 1728) defined the new meaning of *subscription* as follows: "Subscription, in the Commerce of Books, particularly signifies an Engagement a Person enters, to take a certain Number of Copies of a Book going to be printed; and the reciprocal Obligation of a Bookseller or Publisher, to deliver the said Copies on certain Terms."⁵⁸ The English lexicographer John Minsheu (1560–1627) is generally credited to be the first author to employ subscription as means to pay for the publication of his *Ductor in Linguas, The Guide Into Tongues* (London: John Browne, 1617), a polyglot dictionary in eleven languages.⁵⁹ This is not the place to rehearse the familiar history of subscription publication. It may suffice to single out some aspects of this relatively new form of commercial patronage to help us appreciate why Cotton Mather ultimately failed to publish his "Biblia Americana." As we learn from his "Secunda Epistola Lectori" (*Ductor* A3r-A5r) and from his separately published "Catalogue" (1617), John Minsheu went about charming subscribers like an expert. He first obtained official affidavits from Oxford and Cambridge scholars and testimonials from vice-chancellors of the university – all affirming the expert quality and usefulness of his polyglot dictionary. With these letters of support and "*His Maesties Letters Patents*" in hand, he approached the highest orders in the Church of England, Britain's escutcheoned nobility, judges and barristers at London's "*honourable Societies of the Innes of Court*" (A4v), physicians, merchants, and other moneyed aristocrats up and down the kingdom – more than four hundred subscribers whose names, titles, or occupations were neatly printed in his "CATALOGUE and true note of the *Names* of such *Persons* which ... have received the *Etymologicall Dictionarie* of XI. *Languages*" (London, 1617). The impressive list of subscribers is headed by "The KING. The QUEENE. The PRINCE" followed by a long train of subjects from the Lord Archbishop of Canterbury, bishops, earls, barons, knights, lords and ladies, esquires, all the way down to mere commoners of mercantile renown.

If Minsheu's formula of success found eager imitators by such theologians, lexicographers, and natural philosophers of note as Brian Walton, Matthew Poole, William Turner, John Tillotson, Nehemiah Grew, and many many oth-

⁵⁸ Ephraim Chambers, *Cyclopædia* (2:141, second pagination).

⁵⁹ See S. L. C. Clapp (205–16).

ers in the seventeenth and eighteenth centuries,⁶⁰ then Cotton Mather's *New Offer, To the Lovers of Religion and Learning* was stillborn: not a single armorial appellation, worshipful vice-chancellor or rector – let alone archbishop or maecenas – appears in his advertisement for "Biblia Americana" to endorse or subscribe to Mather's commentary. Not that he was insincere in emphasizing that "very Eminent Persons, Divines of great Note, in the *Church by Law Established* ... have generously offered their best Encouragements unto it. Numbers of the best Men among the *Dissenters* have expressed their Wishes, not without some Impatience for it. *Scotland* also invites it, expects it, requires it. In *America*, 'tis asked for, and waited for" (*New Offer* 7). However, no names of these well-wishers or patrons appear anywhere in his advertisement. Even the honor that would induce others to have their name associated with respected patrons on subscription lists – as illustrated in Minsheu's "Catalogue" (1617), Brian Walton's "Proposition" (1652/53), or Matthew Poole's "Advertisement" (1676) – is missing for want of takers.

Effective advertisement methods of the period also included specimen pages to illustrate the quality of print, paper, and content – provided in William Turner's proposal for publishing by subscription his *Remarkable Providences* (1695), in Abel Swall's "Proposal for Printing by Subscription *Cambden's Britannia*" (1693), in John Hudson's "Proposals For Subscription to Thucydides" (1695), a bilingual Greek and Latin edition; in Andrew Burrell's "Proposals for Printing by Subscription" (1738), his Hebrew and Chaldaic dictionary; or in Daniel Bellamy's "Proposal for Printing by Subscription, *A Paraphrase On the Books of the New Testament*" (1747). Mather was unable to supply specimen pages simply because he had not yet secured a London publisher. From the viewpoint of subscribers, yet another useful measure well illustrated in Brian Walton's "Proposition" was to identify and name treasurers to ensure orderly collection and disbursement of down-payments by subscribers, proofreaders to correct errors in typesetting and printing, and agents or "undertakers" who would supervise the entire project from beginning to end – none of these crucial abettors were available to Mather while he was still scouting for an experienced London agent willing and eager to see to it that a sufficient number of subscriptions would entice a reliable publisher to take on "Biblia Americana." Finally, without a printer-publisher, Mather was not able to pinpoint in his *New Offer*

⁶⁰ Several examples of successful subscription advertisement stand out: Brian Walton's advertisements for the six-volume London Polyglot, *Biblia Sacra Polyglotta* (1653–57) in "A Brief Description" (1652/53) and "Propositions" (1652/53); Matthew Poole, "Brief Description" (1667) and "An Advertisement" (1676) along with Cornelius Bee's countersuit in "Mr. Bee's Answer to Mr. Poole's Second Vindication" (1668); William Turner's proposal for his *Remarkable Providences* (1695); John Tillotson, "Proposals For the ... Works of ... Isaac Barrow" (1682); Nehemiah Grew's proposal to republish "*Musaeum Regalis Societatis*" (1679/80).

the necessary representatives in London, Oxbridge, and Edinburgh with whom subscribers could place their orders or pay their first installment.⁶¹

How much friends in high places and personal contact mattered can be seen in the case of Brian Walton's magnificent *Biblia Sacra Polyglotta* (London: Thomas Roycroft, 1653–57), which reprinted in parallel columns the Bible in Hebrew, Samaritan, Greek (Septuagint), Latin (Vulgate), Chaldaean (Aramaic), Syriac, Ethiopic, Arabic, Persian, along with the Targums Onkelos, Jerusalem, and Jonathan Ben Uzziel – from the best manuscript copies yet. His biographer reports that the renowned diarist and botanist John Evelyn (1620–1706), well connected with John Pearson (principal editor of the nine-volume *Critici Sacri* [London, 1660]), started promoting Walton's polyglot Bible sometime in late November 1652. "Before the close of that year [Feb. 1652/53], subscriptions to the value of near 4000*l.* were obtained; and, soon afterwards, were more than doubled." The most famous linguists and theologians of the day – John Worthington, John Selden, James Ussher, Edward Pococke, Henry Hammond, John Lightfoot, Thomas Gataker – were all involved in one way or the other in the supervision of the project and their approbation virtually guaranteed success of the huge project.⁶² No such illustrious promoters were at hand for Mather's "Biblia Americana."

How then did Mather succeed in finding a London agent and publisher for his *Magnalia Christi Americana*? At the distance of 3,300 miles (5,300 km), Mather turned to the Rev. John Quick (1636–1706), minister in Bartholomew Close, Smithfield, whose pious tract *Young Man's Claim unto the Sacrament of the Lord's Supper* (Boston, 1700) Mather had been instrumental in reprinting in Boston. Perhaps, Mather hoped thus to oblige his Presbyterian colleague in London to see the manuscript of the *Magnalia* through the press (*Diary* 1:364). The story is well known.⁶³ A personal friend of Increase Mather from his London days, John Quick – as it turned out – was neither a man of influence with London publishers nor a man of persuasive powers among London Dissenters. Cotton selected him because of his father's obliging relationship with Quick.⁶⁴ As is apparent from his letter to Cotton Mather (Oct. 10, 1701), Quick tried hard to negotiate with London bookseller-publishers for the best conditions he could get for the *Magnalia*:

⁶¹ See Brian Walton, "Propositions" (83r). When Samuel Mather advertised his father's "Biblia" in 1729, he included the following: "SUBSCRIPTIONS will be taken by *Samuel Gerrish, Daniel Henchman* and *Thomas Hancock* Booksellers, in *Boston*; and as soon as there shall appear sufficient Encouragement, the *Manuscripts* will be sent to *London* to be Printed there, with all convenient Expedition, and Care will be taken of the Paper, Printing and Binding, that it be suitable to such a Work" (*Life* 186).

⁶² Henry John Todd, *Memoirs* (ch. 2, esp. pp. 31 and 44–65)

⁶³ See Greenough, "A Letter" (134–47); Murdock, "The *Magnalia*" (27–29, 35); Silverman, *Life* (152, 157–58); Deluna (154–56).

⁶⁴ See Murdock, *Increase Mather* (198, 323).

1. 100 Guineas or so many Books well-bound. 2. Six of ye larger Paper richly bound for your Patrons. 3. To be put into ye Presse immediately. 4. Every sheet to be brought to me hot from ye Presse to be revised & corrected. 5. The Paper & character to be ye same with my printed Proposals. 6. not one to be sold off till all your Books were first delivered to me. 7. The best chart of New Engl. The best Topographical Delineation of Boston, & your effigies' in mezzotinto to be præfix'd to ye whole work.⁶⁵

Whether or not Quick was an effective agent or too concerned with negotiating the best deal he could get for his Boston colleague is anyone's guess. At least Mather, in time, thought not (*Diary* 1:400, 427). Nonetheless, Quick's letter demonstrates that Mather had difficulty controlling the transactions from afar – events that would ultimately lead Robert Hackshaw (the owner of reams of inferior paper) to strike a deal with Thomas Parkhurst (the London publisher) and Parkhurst to print the *Magnalia* on low-quality paper and without proofreading the printed sheets. Mather apparently never received a farthing for his pains.

Did he learn from his mistakes when a dozen years later he began to circulate his *New Offer* to drum up subscribers and publishers for his "Biblia Americana"? Unfortunately not. Mather proceeded in the same manner he was want to do along. As mentioned earlier, he wrote to the London divine John Reynolds, whose *Practical Religion Exemplify'd* Mather had previously republished in Boston (1713), and overwhelmed him with letters and messages at second and third hand to orchestrate the little matter for him (*Diary* 2: 206, 309–12). That Mather was a more proficient preacher and author than businessman is readily apparent from how he went about publishing his works abroad. As one recent critic put it, "All evidence suggests that Mather never cultivated any sustained direct relations with London publishers but, instead, relied on friends and relatives to secure connections and negotiate for him" (Deluna 151). Indeed, the publication history of Mather's *Magnalia* well anticipates how he would later go about trying to find patrons for his "Biblia Americana." Still, the main problems were the size of his Bible commentary and the conditions of the publishing market.

The Root of All Evil

One of Mather's most sympathetic biographers, the Rev. Abijah Perkins Marvin (1813–89) estimated the comparative size of "Biblia Americana," in his posthumously published *The Life and Times of Cotton Mather* (1892). Marvin approached the subject by beginning on familiar ground. The first ever published folio volume on a New England press was *A Compleat Body of Divinity*

⁶⁵ Greenough ("A Letter relating" 141). For John Dunton's rare "Proposal" to publish the *Magnalia*, see Greenough, "A Letter relating" (287–88, note 296).

(Boston: Printed by B. Green and S. Kneeland for B. Eliot and D. Henchman, 1736), a collection of 250 sermons on the Westminster Catechism, by Samuel Willard (1640–1707), revered pastor of the Old South Church in Boston, and acting president of Harvard (1701–07). This mighty volume consists of 914 folio pages in double columns, 134 lines per page, and “about 8.4 words” per line. According to these averages, Marvin calculates that “this gives 1,028,798 words” in Willard’s *Compleat Body* – “short lines and breaks in the pages and headlines are not counted.” This relatively large size was not unusual for the time, Marvin argues, as can be seen by comparing Willard’s folio volume with Mather’s own *Magnalia Christ Americana* (1702), which at that time was too large for any of the New England presses and had to be published in London: “In the *Magnalia*, there are 661,848 words, more or less, or nearly seven tenths as many as in” Willard’s sermon collection (Marvin 500).⁶⁶ From another source we learn that Willard’s *Compleat Body* was published by subscription, “the earliest work of learning to be financed in this manner” in New England, “by a coalition of Boston booksellers” and “some 630” subscribers.⁶⁷ If it took that many subscribers and several publishers and printers to issue Willard’s single-volume folio of 914 pages and a little over one million words, how much would it have taken to publish Cotton Mather’s “Biblia Americana,” which Abijah Marvin estimates at “2,888,000 words”? (Marvin 500). Modern computer technology allows us to refine Marvin’s estimate somewhat. From the current transcriptions of the manuscript, we can gather the following numbers: 4,583 holograph manuscript pages in double columns, folio (half or quarter pages, including snippets, counted as such), averaging 635 words per manuscript page, totaling 2,910,205 words more or less. Marvin’s estimate is right on target. Put in another way, “Biblia Americana” is nearly three times larger than Willard’s *Compleat Body* and four-and-one-third times bigger than Mather’s *Magnalia*. In terms of cost, if Mather’s agent is correct and the *Magnalia* “will cost about 600 *lb.*” in 1701 Pound Sterling (*Diary* 1:400), then his “Biblia,” considerably more than 4 ½ times larger and costlier thirty years later, would have run to at least £2,600 – a sizable fortune for a Boston clergyman. Put in yet another way, the retail-price index (purchasing power) for £600 in 1701 had risen to £756, 3s, 11d, by 1728, the year of Mather’s death; for £2,600 in 1701 money, the retail-price index had

⁶⁶ Marvin’s calculation here does not quite measure up. The *Magnalia* is about six (not seven) tenths the size of Willard’s *Compleat Body*.

⁶⁷ D.D. Hall, “Learned Culture” (1:427); S.A. Green points out that “the number of subscribers’ names in the ‘Body of Divinity’ is about 450,” but many individuals took 4, 6, 7, even 18 copies of the work (“Books Published” 20, 21). Likewise, according to Green (21), Thomas Prince’s *Chronological History of New England* (1736) was published the same year as Willard’s, but was considerably smaller (only 400 pages) and took its author and publisher eight years to gather 750 subscribers to publish the work in 1736 (21). Also see the studies by D. Farren (53) and R. G. Silver (163–78).

risen to £3,276, 16s, 11d.⁶⁸ In July, 1728, Mather's entire estate – without his prized library – was appraised at only "£245, 5s, 10d" (Silvermann, *Life* 428).⁶⁹ Clearly, Mather's personal resources fell far short of covering on his own the expense of publishing his beloved "Biblia" even if he had wanted to.

Drawing on the North American Imprints Program (NAIP), Hugh Amory has compiled a useful table of data of leading authors, an index that illustrates how Mather dominated the Boston publishing market for nearly three decades.⁷⁰ During the period of 1701–1710, Mather tops the record with 95 titles, which represent 26.91 % of all works of a personal authorship published in English North America (WPA), or 15.83 % of all North American imprints (NAIP). The figures for Increase Mather, who is second in line, amount to only one-third of those of his son: 29 titles, or 8.22 % (WPA), and 4.83 % (NAIP). During the same decade, the five most productive authors – after the two Mathers – published only from 5 to 12 titles. In the next decade (1711–1720), Cotton Mather again tops the list with 129 titles, or 23.33 % (WPA), representing 15.23 % (NAIP). Second in line is his colleague Benjamin Wadsworth with 42 titles, or 7.59 % (WPA), representing 4.96 % (NAIP). Increase Mather comes in third with 36 titles, 7.59 % (WPA), or 4.25 % (NAIP). Finally, during the decade of 1721–1730, Cotton Mather heads the list for a last time with 96 titles, or 12.77 % (WPA), amounting to 7.95 % (NAIP). Benjamin Colman, Mather's colleague at the Brattle-Street Church, comes in a distant second with 26 titles, which represents 3.46 % (WPA) and 2.15 % (NAIP).⁷¹ These numbers are revealing in several ways. Although Cotton Mather dominated the Boston book publishing market for thirty years with the largest number of works by an individual author, his books represent a decreasing percentage of the total number of publications of all National American Imprints (NAIP) over the same period. This overall decline does not come as a surprise. During the first three decades of the eighteenth century, an ever increasing number of book publishers and printers set up shop in English North America to meet the diversifying needs of the population. The demand for newspapers, broadsides, almanacs, works of a political nature, and government printing competed in the publishing market in ever larger proportion with such genres as sermons, poetry, schoolbooks, academic

⁶⁸ This calculation is based on L. H. Officer, "Purchasing Power of British Pounds from 1264 to Present" (Feb. 2, 2010).

⁶⁹ J. H. Tuttle, in "Libraries of the Mathers" (296), quotes the value of the estate as £235. 10s. 10d.—£10 less than Silverman does.

⁷⁰ See H. Amory, "A Note on Statistics" (1:504–18). The North American Imprints Program (NAIP), a database accessible through the American Antiquarian Society (Worcester), provides more accurate data on early American imprints than the hitherto standard bibliography, C. K. Shipton and J. E. Mooney, *National Index of American Imprints through 1800* (1969). See also S. E. Morison's discussion of printing and bookselling, in *Intellectual Life* (112–32).

⁷¹ Amory, "A Note on Statistics" (1:517).

dissertations, hymnals, and Psalmbooks.⁷² Furthermore, the number of books exported from London to English North America also showed a steady increase throughout the eighteenth century. During the fifty-year period (1701–50), the total is 73,202 books. Of this total, nearly one third (29.4 %) or 21,498 books went to the New England colonies alone.⁷³

Given these market conditions, how did Mather manage to publish more than 450 works that could have kept at least one Boston book publisher in business for several years without taking on projects by any other author? That he was one of the most popular preachers in Boston is well known; he and his father presided over a congregation of more than 1,500 members – the largest in the American colonies. Preaching at least three sermons per week potentially supplied the publishing market with plentiful homiletic discourses, and many of Mather's sermons were printed by popular demand. Covering the expense of printing trendy sermons was generally handled in several different ways. Occasional sermons on such topics as executions of criminals, natural disasters, Indian attacks, epidemics, funerals, or annual elections of governors and magistrates, were sought-after reading materials. For instance, Boston printer-publishers like Timothy Green or Daniel Henchman would frequently have someone take shorthand notes or request from a clergyman copies of the sermons that particularly resonated with their parishioners and print them at their own expense.⁷⁴ Public discourses on the executions of murderers or pirates, homilies on Boston fires, Indian raids, and on Indian or Barbary captivities were subjects in great demand, and publishers could count on tidy profits by venturing into print on their own. The expense for funeral sermons was generally underwritten by family members or friends of the deceased. The last sermon of a dead minister or a selection of his best discourses was customarily paid for by the clergyman's parishioners. Several incidents in Mather's diary offer interesting insights into how many of his works were published at no expense to the author. His *Parental Wishes and Charges* (Boston: Timothy Green, 1705) is a case in point: "I knew not presently how to procure the Publication of this little Book," he confessed in his diary in June 1705; "for the Method wherein I expected it, mett with some odd Obstructions. But I committed it unto the Lord; and entreated, that He would accept my Endeavour to serve Him. Immediately the Obstruction vanished; and I gave the Book unto the Printer." Prayer and providence – rather

72 On these genres, Amory's figures represent a period of 150 years, 1640–1790 ("Note" 1:511).

73 Amory, "Note" (1:514). See also S. Botein, "The Anglo-American Book Trade before 1776" (48–82).

74 Isaiah Thomas, the famous printer and president of the American Antiquarian Society, relates that Timothy Green was not always successful in recouping the expense of speculating in the publishing market: "Large quantities of these sermons lay on hand as dead stock; and, after his decease, they were put into baskets, appraised by the bushel, and sold under the value of common waste paper," in *The History of Printing in America* (1:185).

than firm knowledge of publishing exigencies – appear to be Mather's principal means of publishing his discourses.⁷⁵ His trust in supernatural agency, however, does not mean that he did not incur any expense or that he would sit idly by. It was his habit to purchase copies of his own sermons from the printer and to give them away to his parishioners in his weekly pastoral visits. "I hope, to make special Use of it, in my pastoral Visits; in which usually I give away half a dozen Books, more or less, every Day that I make them" (*Diary* 1:517–18).⁷⁶ Several other such cases can be cited to illustrate how Mather relied on his faith in divine providence to sponsor the publication of his sermons: His diary for Sept. 1713 records that he was at a loss what to preach on at the Thursday lecture. What he could not generate in a state of wakefulness was revealed to him in a dream, and the sermon and its delivery were well received by the congregants: "Some of my Neighbours desired a copy of the Sermon, that they might give it unto the Public. The Subject is the most important in the World; and the Sermon will be an agreeable Engine for me to employ on many Occasions, when Books of Piety are to be dispensed. So I fitt the Discourse for the Press; and give it unto the Bookseller" (*Diary* 2:241). *What should be most of all thought upon* (Boston: T. Green, for D. Henchman, 1713), the title of the sermon in question, instructed his readers how to prepare for death and the state of the soul in the hereafter. It was in much demand, and he gave away many copies during his pastoral visits.

Mather's biographers and historians of the period have frequently commented on his immoderate desire to get published, an obsessive compulsive addiction, they argue, that is of a kind with his inordinate vanity.⁷⁷ However accurate their diagnoses, they fail to consider that publishing homilies was the best available means at the time of reaching out to an audience beyond his immediate parish. Churches today rely on TV shows, radio stations, phone-a-thons, dial-a-prayer, mass-mailings, and the internet to spread their message far and wide, but the most efficient medium in seventeenth and eighteenth-century New England was the printed sermon.⁷⁸ Mather's two-part discourse *Family*

75 On this issue, see D. N. Deluna, "Cotton Mather Published Abroad" (145–72).

76 Mather also resolved that when his *Cares about the Nurseries* (Boston, 1702) was published, he would "take off two or three every Week, and scatter them in the Families where I make my Visits in the Neighbourhood" (*Diary* 1:421). Similarly, he decided "to purchase forty-shillings worth" of his *The Cure of Sorrow* (Boston, 1709) to be given away to those who suffer from "sorrowful Circumstances of Affliction" (*Diary* 2:20, 21). See also (*Diary* 2:685).

77 See S. E. Morison, *Intellectual Life* (195–97); P. Gay, *Loss of Mastery* (58–60); Silverman, *Life and Times* (37–38, 197–201, 402–03); W. C. Ford, "Preface" (xv–xvi); D. N. Deluna (145–50).

78 H. Amory's "Note on Statistics" reveals that for the period of 1640–1790, the sermon was the most popular genre in New England, averaging 2705 different titles, second only to the number after government imprints of 3372 titles (511). In "Religious publishing in England, 1650–1695," Ian Green and Kate Peter point out that "in the 1690s as much as the 1650s, work on 'divinity' comprised half of the output of English presses" (4:67). See also G. Parry,

Religion (Boston, 1705), a discussion of practical piety and the benefit of family prayer, illustrates his purpose:

And I printed a thousand of them. These I bound up in Bundles that had convenient Parcels in them; and printed a short Letter to be added unto each of the Bundles; entreating the Person, whose Name I inserted with my Pen, to find out what *prayerless Families* there may be in the Town where he lives, and to lodge these Essayes of Piety in them. So I concerted with some of my Friends a way to convey a Bundle to every Town in all these Colonies, and unto some other Places. Lord, accept my poor Endeavour, and lett there be good and great Effects of it; I pray thee! I pray thee! Thus I see the Lord employing me in *Services for Him, not in one or two Congregations only but in all His Congregations, from one end of the Countrey to the other.* (Diary 1:520)⁷⁹

If his mass-distribution bespeaks his farsightedness as a clergyman for whom the world is his parish, then the common criticism of Mather's alleged vanity to see his name in print ought to be re-assessed in light of how a great communicator availed himself of the standard mass-media of his day. Or, if Benjamin Franklin be here allowed to speak from experience, the once deadly sin of vanity (*o felix culpa!*) may be productive of good: "I scare ever heard or saw the introductory Words, *Without Vanity I may say*, etc. but some vain thing immediately follow'd," Franklin told his son William in 1771. "Most People dislike Vanity in others whatever Share they have of it themselves, but I give it fair Quarter wherever I meet with it, being persuaded that it is often productive of Good to the Possessor and to others that are within his Sphere of Action: And therefore in many Cases it would not be quite absurd if a Man where to thank God for his Vanity among the other Comforts of Life."⁸⁰ Be that as it may, Franklin – like Mather before him – knew best how to turn a vice into a virtue.⁸¹

Mather's effectiveness as an admired preacher can be seen in several other instances in which his homily was published by popular demand. During his Thursday lecture (April 6, 1699), he preached a sermon on one of his favorite subjects: how children and parents can do good by their mutual love and respect. The discourse was well liked by the "great Assembly of people," he remembered. "And, behold, as I come out of the Meeting-house, the Book-sellers come to mee, entreating that they may have a Copy of these two Sermons, when the next

"Patronage and printing" (4:174–88) and C. J. Sommerville, "Distribution of Religious and Occult Literature" (220–25).

⁷⁹ T. J. Holmes (1:368–75) shows that Mather's *Family Religion* and several of its variants went through at least three editions and eight different impressions. The sermon was published in London (1707, 1709, 1713), translated into the Algonquian tongue by the Rev. Jonathan Mayhew (1673–1758), missionary to the Wampanoags on Martha's Vineyard, and reprinted the last time in 1747.

⁸⁰ Franklin, *Autobiography* (1–2).

⁸¹ For a comparative study of the two New Englanders, see M. R. Breitwieser, *Cotton Mather and Benjamin Franklin* (1984).

shall bee delivered, for to bee published unto the Countrey. Thus mercifully and wonderfully does my Lord Jesus Christ, continue to employ mee the vilest of Men, in precious Opportunities of serving Him!" (*Diary* 1:296–97). His *FAMILY WELL ORDERED; or An Essay to render Parents and Children happy in one another* (Boston, 1699) was published by Benjamin Green and John Allen. In this case as in many others, Mather's sermons were sought-after by publishers and parishioners alike, perhaps lulling him into a false sense of security that the productions of his pen would always find a ready market. The popularity of execution sermons such as *The Valley of Hinnom* (Boston: J. Allen, for Robert Starke, 1717) and its sequel *Febrifugium: An Essay for the Cure of Ungoverned Anger* (Boston: J. Allen, for Benjamin Gray, 1717) again illustrate how he did not have to exert himself to find a willing publisher at home. Mather relates that his execution sermon on Jeremiah Fenwick, who had killed his neighbor with an axe, was in such high demand that in five days "the Bookseller sells off an Impression of near a thousand which he printed of the former essay, and now he comes to me for the Latter," even though the bookseller-publisher had at first turned down his *Febrifugium* (*Diary* 2:462). Surprising success stories like this one or like that of his *Words of Understanding* (Boston: S. Kneeland, for J. Edwards, 1724), a collection of several memorial sermons he preached on the death of his renegade son Increase ("Cressy"), lately drowned in the West Indies, proved to Mather time and again that he could trust in providence to intervene in his behalf. For when he gave to the bookseller Cressy's memorials "and with a considerable Expence enabled the Bookseller to publish them," his efforts "to do some good at his Death" were blessed with surprising success. "A strange Hand of Providence made such an Accession from others, to my Disbursements," Mather reported, "that I could add a third Sermon, to the Book, wherein I may yett more notably serve the Designs of Piety" (*Diary* 2:776–77). Clearly, then, Mather could rest assured that his sermons, tracts, and books – if placed in the service of his God – would always be in high demand. Boston's booksellers and publishers always appeared to be on the lookout for the productions of his pen. And if the press did not always recognize a winner from the start, Mather, apparently, could count on the collective good will of his congregation, or the generosity of one of his well-to-do parishioners, whom providence would stir up to foot the bill.⁸² More importantly, his ease of finding sponsors in New England may explain (in part) why he failed to secure subscribers for his magnum opus, "Biblia Americana," in Old England.

His fame in New England as a soul-searching preacher – though by no means acquired without tremendous effort – accounted in great measure for his publishing success at home. Here he had the kind of groundswell support

⁸² R. G. Silver ("Financing" 163–78) provides a useful list of forty-eight Mather sermons and the names of their sponsors, who covered the expense of publishing his homilies.

necessary to get things in the press – none of that existed in England. He may well have been a household name among his many European correspondents and among those of the Royal Society who sponsored the publication of his *Christian Philosopher*;⁸³ he may well have found ready sponsors for his reprints in England of *Memorable Providences* (London: Thomas Parkhurst, 1691) and of *Wonders of the Invisible World* (London: John Dunton, 1693), his books on witchcraft, a subject notoriously popular on both sides of the Atlantic;⁸⁴ he may well have found patrons of sorts for his *Magnalia Christi Americana* (London: Thomas Parkhurst, 1702) in John Hackshaw and Thomas Parkhurst, both of whom took advantage of Mather's desperation: the former by ridding himself of reams of cheap paper in exchange for one hundred copies of the *Magnalia* he would sell in America; the latter by printing the manuscript of the first full-fledged church history of New England for which a sufficiently large market existed in Old and New England, Scotland, and Northern Ireland – no matter who the author.⁸⁵ John Oldmixon's old gibe that Cotton Mather was "a Man of Fame in his Country," but (by implication) unknown in England, may well explain the rest of the story.⁸⁶ In depending on Rev. John Reynolds to orchestrate the publication of his "Biblia Americana," Mather in essence trusted in the good will and business skill of his London colleague. Gaining the confidence of hundreds of subscribers on behalf of someone who lived in faraway America was no easy task. There was no telling if a clean copy of the manuscript would be ready in time or what might happen to it when shipped across the Atlantic. Success of the whole business transaction was built on personal trust and a strong relationship among the author, agent, subscriber, and (ultimately) publisher. Mather's request therefore posed no inconsiderable burden for Reynolds. No wonder Reynolds discontinued his correspondence with his American colleague after telling Mather that times were too uncertain for such publishing ventures (*Diary* 2:309–12, 317–19, 798).

All of these impediments contributed to Mather's failure to publish his "Biblia" during his lifetime. What may well have been the deciding factor in the whole matter was the competition from rivaling Bible commentaries by lead-

⁸³ See K. Silverman, "Mather's Foreign Correspondence" (172–85); Silverman's introduction to his *Selected Letters* (1971); and T. Prince, "Preface," in Samuel Mather, *Life* (1).

⁸⁴ See Deluna (156–60).

⁸⁵ See Greenough ("Letter relating" 134–47).

⁸⁶ John Oldmixon, *The British Empire in America* (London, 1708) 1:108. See also K. B. Murdock, "The Magnalia" (30). In contrast to Oldmixon's view is that of the Rev. Thomas Prince of Boston, who relates that Mather's "vast Correspondence, and the continual Reports of Travellers who had conversed with Him, had spread his Reputation into other Countries: And when about Fourteen Years ago I travelled abroad, I cou'd not but admire to what Extent his Fame had reached, and how inquisitive were Gentlemen of Letters to hear and know of the most particular and lively Manner both of his private Conversation and publick Performances among us" ("The Preface," in S. Mather, *Life* 1).

ing divines, whose works were published and republished in Mather's lifetime. There were just too many worthy commentaries on the English publishing market. For instance, the prized nine-volume commentary *Critici Sacri, sive Doctissimorum Virorum in SS. Biblia Annotationes & Tractatus*, edited by John Pearson et al. (London, 1660), contained the annotations by such giants as Münster, Fagius, Vatablus, Castalio, Clarius, Drusius, Grotius, Masius, L. and J. Cappellus, Scaliger, Casaubon, and many more. *Critici Sacri* was republished in Frankfurt (1695) and Amsterdam (1698), and was conceived as a companion to Brian Walton's London Polyglot *Biblia Sacra Polyglotta* (1653–57). The huge London edition of *Critici Sacri* sold for £13, 16s, and was probably unaffordable for the average clergyman of Mather's time. Matthew Poole's labor of love to synopsize the *Critici Sacri* and issue a more affordable five-volume work, his *Synopsis Criticorum Aliorumque S. Scripturae Interpretum* (London, 1669–76), was therefore a splendid idea. It sold for £ 5, 10s – less than half the price of the *Critici Sacri* – and 3,800 sets of Poole's *Synopsis* (vols. 1–4) were sold even before volume five appeared in print.⁸⁷ Poole's brazen performance promptly resulted in a lawsuit by Cornelius Bee, the principal undertaker of the *Critici Sacri*. It was settled in Matthew Poole's favor.⁸⁸ Yet providence restored justice in its own way, and five pirated editions of Poole's *Synopsis* appeared in Frankfurt (1678), Utrecht (1684), and again in Frankfurt (1694, 1709, and 1712).

Likewise, Matthew Poole's *Annotations upon the Holy Bible* (London: John Richardson for Thomas Parkhurst, 1683–85), a two-volume commentary in English for the common reader, had gone through its fourth edition by century's end (Edinburgh, 1700–01) and is still reprinted today. Matthew Henry's acclaimed *An Exposition of All the Books of the Old and New Testaments* (London: Thomas Parkhurst, 1708–10) had attained its 10th edition by the end of the eighteenth century and remains as popular as ever. Simon Patrick's *A Critical Commentary Upon the Historical Books of the Old Testament* (London: 1694–1727) and its expanded version, *A Critical Commentary and Paraphrase of the Old and New Testaments* (London: 1727–60), included the commentaries by William Lowth, Daniel Whitby, and Richard Arnald. In its final version, Patrick's commentary (which went through at least five editions before 1800) was, perhaps, the only rival to Matthew Henry's popular *Exposition*. Lesser-known commentaries on the whole Bible, still reprinted in Mather's lifetime, included John Mayer's five-volume *A Commentary upon the Bible* (London, 1653), John Trapp's five-volume *Annotations upon the Old and New Testament*

⁸⁷ See S.A. Allibon, *Critical Dictionary* (2:1622). The Rev. Dr. Steven Dilday deserves our gratitude for currently translating into English and publishing Matthew Poole's *Synopsis Criticorum* (2007–).

⁸⁸ See Matthew Poole, "Just Vindication" (1667), and Cornelius Bee, "Mr. Bee's Answer to Mr. Poole's Second Vindication" (1668). For a discussion of the issue, see "Poole, Matthew," in S.A. Allibon's *Critical Dictionary* (2:1621–23).

(London, 1654–1662), and Samuel Clarke's *The Holy Bible, containing the Old Testament and the New, With Annotations and Parallel Scriptures* (London, 1690).

Cotton Mather's "Biblia Americana" also faced stiff competition from commentaries on the New Testament. By the end of the eighteenth century, Henry Hammond's *A Paraphrase and Annotations Upon all the Books of the New Testament* (London, 1653) had gone through seven editions, William Burkitt's *Explanatory Notes, with Practical Observations on the Four Evangelists* (London, 1700) through seventeen (!) editions,⁸⁹ Samuel Clarke's *Paraphrase on the Four Evangelists* (London, 1702) through ten editions, and Daniel Whitby's *A Paraphrase and Commentary on the New Testament* (London, 1703) through seven editions.⁹⁰ The London book market was simply not ready to take on yet another huge Bible commentary – British or no.⁹¹

Biblia Americana: Composition, Structure, and Sources

Anyone who merely glances at the holograph manuscript of the "Biblia Americana" at the Massachusetts Historical Society will be startled by the sheer bulk of the six folio volumes and the seemingly endless reams of double-columned sheets, interleaved with hundreds of half- or quarter sheets – even snippets of paper – pasted in the margins, and interpolated with thousands of textual revisions, erasures, excisions, and emendations. And yet, there is method to this seeming madness. To be sure, the bulky manuscript that Mather left behind at his death looks more like a rough draft than the cleanly edited copy he would have sent to his London publisher sometime after 1715 or 1716 had he succeeded in garnering the necessary subscriptions from hundreds of individuals or outright gifts from wealthy patrons. Perplexing to newcomers, the holograph manuscript is a revelation to those who discover Mather in the process of drafting, rethinking, and reshaping his ideas over a period of thirty-five years. Four recognizable stages or phases of Mather's composition and revision process,

⁸⁹ Advertising "Biblia Americana" for publication after his father's death, Samuel Mather added that his father's would "not interfere with the Works of the Excellent POOL, BURKIT, or HENRY: It being the constant study of the Author to avoid it" (S. Mather, *Life* 186).

⁹⁰ For the various editions of the Bible commentaries listed here, see Thomas H. Horne, *Manual* (253–67, 297–307), and Thomas R. Preston, "Biblical Criticism" (99–107).

⁹¹ T. J. Holmes (2:735) points to the saturation of the London market as the principal reason for Mather's failure to attract a London publisher: "It is clear that the Biblia Americana failed of publication not through defects in its literary or scholarly qualities, for the manuscript never left Boston, and was not viewed by any London publisher. The great work called for a large outlay of capital, which was not forthcoming. Matthew Henry's Exposition of the Old and New Testament ... had already advanced far in its publication. ... That work being in course of publication ... may have been a factor in discouraging new heavy undertakings of capital for what seemed to be another work of similar nature."

each with its own characteristic features, can be identified and assigned to four distinct periods:

- Stage I: Aug. 1693 to May 1706
- Stage II: May 1706 to the end of 1711
- Stage III: 1711 to Feb. 1713/14, 1716
- Stage IV: Feb. 1713/14, 1716 to end of 1728

Stage I: During this first stage of development (beginning sometime in the Fall of 1693 and most likely ending in May of 1706), Mather extracted from hundreds of books, sermons, treatises, and pamphlets whatever appeared to be serviceable to his purpose of compiling a Bible commentary, a digest of old and new and a whole library of innovative research and discoveries that had not yet found their way into the standard commentaries of the time. He recorded his findings on blank folio leaves of imported paper, creased them vertically in the middle to create a bi-columnar division, and creased them yet again on the right- and left-hand side to create margins, one to one-and-one-half inches wide. He gathered these blank leaves into fascicles of different sizes, partitioned them according to the division of books, chapters, and verses in the Authorized Version (without Apocrypha), and jotted down his annotations in the approximate location for every chapter and verse of every Bible book. Mather assigned ordinal numbers to each new gloss to track the sequence and order in which he recorded every notation. These Arabic numerals can be traced throughout the holograph manuscript. They appear in the left- and right-hand margins of the leaves depending on the respective column or location in which the annotation of the biblical verse occurs. For the most part, these numerals are recorded vertically and occur at the beginning of each new gloss. However, these figures are given only in about one third of all manuscript entries.

Mather’s sequential enumeration of every new gloss in the first stage of composition is an important key to gauging the relative time period in which the entry was made. One of the lowest extant numbers is 33 and distinguishes Gen. 4:23, 24 (*BA* 1:518) as one of the earliest extant annotations he recorded in “*Biblia*,” perhaps as early as the Fall of 1693 when he began his opus. Significantly, a much higher number, 4849, introduces an extract from William Whiston’s *A Short View of the Chronology of the Old Testament* (London, 1702) and appears early on in the “*Biblia*” in the section entitled “The Old Testament” (*BA* 1:277), preceding his commentary on Genesis. The publication date of Whiston’s book – assuming that Mather received the copy shortly after its appearance in London – accords with the end of the first composition stage: May 1706 (*see below*). One of the highest numbers in all of “*Biblia*” is 5096 and appears in one of Mather’s annotations on Deuteronomy. This figure comes close to the upper limit, because Mather discontinued the practice of numbering his annotations in the spring of 1706, when he stitched up the fascicles into larger

batches to be shipped to England (*see* below). To be sure the final tally cannot be ascertained until all volumes of the “Biblia” have been edited. However, an exact count may never be known with absolute certainty because many of the numerals governing the sequence of his glosses were recorded in the manuscript’s gutter, were lost in the binding through perforation and defacement, or were eliminated altogether when Mather excised whole sheets and fascicles of older commentary that had been removed to be published separately or superseded by more up-to-date material.

A preliminary examination of the six bound folios at the Massachusetts Historical Society has established that Mather’s numerals range from 1 to not much above 5,100 and are, with slight variations, more or less evenly distributed throughout the whole set. The predominant numbers for Mather’s annotations on the Pentateuch, for instance, are distributed in the 2,000, 3,000, and low to mid-4,000 range, but many numerals are below 1,000 as well. The same holds true for his commentaries on all the other OT books. Even in his glosses on the NT (vols. 5–6), all numbers are evenly distributed – except, perhaps for his annotations on Revelation in which the numbers in the 4,000 range predominate. The wide dispersion of these numerals therefore indicates that Mather did not concentrate his annotations on any one part or book of the Bible before moving on to others, but jotted them down as he distilled them during his wide reading. However, it is well to remember that only about one third of all glosses in the entire “Biblia” manuscript is designated with such figures, a fact that limits their entry to the period between 1693 to 1706.⁹²

This first stage of composition appears to have come to an end in May, 1706, when Mather recorded in his diary, “I finished my BIBLIA AMERICANA. So finished it, that there is no Necessity of my casting in any more . . . Tho’ doubtless, I may be occasionally and continually adding thereunto, till the Manuscripts are dismiss’d out of my Hands for Publication” (*Diary* 1:563, 564). In September of the same year, he composed a prospectus of the “Biblia” entitled “AN AMERICAN OFFER *to serve the Great Interests of Learning and Religion in Europe*” (*Diary* 1:570), which Mather intended to send to London “by the Fleet now going for *England*” (*Diary* 1:570). Thereafter, he appears to have laid his commentary aside for nearly five years, for his diary mentions neither his prospectus nor any additions to his stock of annotations until his forty-ninth birthday (Feb. 12, 1711–12). This silence does not mean that he did not add to his collection when he came across useful material during his reading. What it does suggest is that while he was waiting for his prospectus to arouse interest among potential subscribers and publishers in England, his additions during

⁹² In the introduction to his edition of *The Christian Philosopher* (xxxvi–xxxix), Professor Solberg presents a substantially different rationale for the development and sequence of Mather’s annotations throughout “Biblia.” However, since Solberg does not appear to examine the function of Mather’s ordinal numbers, Professor Solberg’s conclusion seems unreliable.

Courtesy of the Massachusetts Historical Society

this five-year period may have been minimal – or at least not large enough to be included in his annual review of achievements, which Mather was in the habit of recording in his diary on or just before the day of his birthday.

Furthermore, physical evidence demonstrates that Mather (or his amanuensis) stitched the contiguous leaves of his manuscripts into fascicles of coherent segments or bundles to safeguard their orderly arrangement and to send them off the moment his London publisher would call for their delivery shortly after 1706. This stitching process was done rather haphazardly. After all, the fascicles and bundles were intended to stay in place only until the London typesetter would take them apart during the typesetting process. Remnants of the fine thread that held the sheets and fascicles in place and most stitching perforations are still visible in the gutter and on the spine of the holograph manuscript. Unfortunately, this stitching and binding process defaced the notations of many ordinal numbers Mather had recorded in the gutter of the recto and verso pages. They were perforated in such a fashion that their mutilation rendered many figures illegible. To make matters worse, a second (or rebinding) process – occurring in the early nineteenth century – obliterated many more of the ordinal numbers in the gutter because the coarse twine and thick needle used during that occasion perforated many figures and rendered many more indecipherable.⁹³

Stage II: The second stage of Mather's composition process appears to have begun in earnest after a hiatus of about five years (May 1706 to the end of 1711). His diary entry for February 10, 1711–12 records that he had added "some Illustrations for the most part every Day" amounting to "many more than a thousand" during the course of the previous year (*Diary* 2:162). Significantly, Mather did not dismantle the bound fascicles he had intended to send to London by the fleet going to England (Sept. 1706). He was therefore unable to resume the sequential numbering of his glosses because many of these numerals were lost or covered up in the tightly stitched gutter of the fascicles. Since these numerals were now inaccessible without taking the binding apart, Mather elected to discontinue his practice of tracking his entries. Besides, excisions and erasures of older numerical entries or removal and replacement of existing leaves during the revision process necessitated constant renumbering, a procedure that would have been ever more impractical as the number of his entries increased exponentially over time. Mather responded to this challenge as follows: Whenever a new entry was recorded on an existing leaf, he overwrote the ordinal number of the old entry with thick inky loops to render the numeral illegible. However, he was able to do so only with those numerals that were not covered up in the gutter of the binding. (Those that were covered up in the

⁹³ See my description of the holograph manuscript in *Note on the Text*.

binding – unless perforated and defaced by the thread or twine – are completely legible in those places where the thread and twine fell apart and unraveled the binding.) Moreover, he interleaved additional sheets or half-sheets as needed to accommodate longer supplementary entries for which no room was left on the original leaf. It is for these reasons that the second stage of composition can be safely distinguished from the first.

Additional evidence to identify the stages of composition can be found in Mather's advertisements of the "Biblia." These ads appear in three separate places and were composed during three different time periods: in *Bonifacius* (1710), in *A New Offer* (1713/14), and in Samuel Mather's biography *The Life* (1729). Items VII in *New Offer* (13) and item VIII in Samuel Mather's *Life* (185) differ from their counterpart (item VII) in *Bonifacius* (205) in one important phrase that is absent from the "Advertisement" in *Bonifacius*: Mather adds, "the most accurate *Harmony of the Gospel* that has yet been offered." This added phrase refers to "PROLEGOMENA to the HARMONY of the Gospels," a gathering of 10 folio pages which Mather interpolates between the sections on "The New Testament" and "The Four Gospels" at the opening of his commentary on the New Testament (vol. 5 of the bound folios). A digest of William Whiston's *A Short View of the Chronology of the Old Testament, and of the Harmony of the Four Evangelists* (1702), the Prolegomena helps Mather explain the intertextual relationship of the synoptic gospels, and was inserted in the "Biblia" sometime after 1710 (the publication date of his "Advertisement in *Bonifacius*") but before the spring of 1713/14, when he published his handbill *A New Offer* to be sent to potential subscribers and publishers. No doubt many other additions – not otherwise specified – were made during this period.

Stage III: The third stage is much more difficult to determine. It probably commenced sometime in 1711, when he again added "many more than a thousand" illustrations, paused for a while after he published his handbill *A New Offer To the Lovers of Religion and Learning* (after Feb. 1713/1714), and ended in October, 1716, when heavy-hearted, he came to accept the inevitable: publication of the "Biblia Americana" "is to be despaired of" (*Diary* 2:376). Evidence for this third stage, which drastically impacted the content of the "Biblia" manuscript, can be allocated in several ways. A comparison of the *Advertisement* for the "Biblia" in *Bonifacius* (200–06), published in 1710, and of Mather's handbill *New Offer* (1–16), published in the Spring of 1713/14, reveals several clues in the list of twelve items, which Mather highlights as the most notable features of his Bible commentary as it existed at that time. Most of the twelve items are identical (with some minor variation) in syntax and content in both documents – except for some curious differences in items I and II, VII and VIII, and X and XI. These differences may well explain the major changes which Mather made in the holograph manuscript during this period (1711–1714, 1716).

Let me begin in inverse order: Items X and XI in *New Offer* (13–14) appear as a single, combined item (item XI) in *Bonifacius* (205–06). The two items differ from each other in that “The true Doctrine of the CHILIAD,” originally part of item X, “The *Histories* of all Ages” (*Bonifacius* 205), constitutes a completely separate item, item XI, in the *New Offer* (13–14). Furthermore, the added reference in this item to “more Arbitrary and less Defensible Conceits, of *overdoing Students* in the Prophecies” (*New Offer*, item XI) suggests that Mather was in the process of rethinking his eschatological system. He appears to gesture toward the revisions of his millennialist interpretations which, by 1713, were evolving from his earlier inchoate system he had outlined in “*Problema Theologicum*” (1703) and were moving toward a revision that did not become fully enunciated until he arrived at his final pre-millennialist system he discusses in sections 1–8 of his “*Trip paradisus*” (1720–27).⁹⁴ Dealing with such diverse topics as a single (rather than double) conflagration at Christ’s Second Coming at the beginning of the thousand-year reign, a naturalist description of the conflagration, and a “Golden Key to open the Sacred Prophecies,” Mather revised these exegetical issues in his Bible commentary on Daniel, Isaiah, Jeremiah, Matthew 24, 2 Peter 3, and on Revelation. These topics became the basis of “*Trip paradisus*” (part III) which (by and large) he extracted from the “*Biblia Americana*” and intended as a separate publication. It is during this stage that he probably added his *Lapis e Monte Excisus. Atque Regnum Dei* (Boston, 1716), a millenarian interpretation of Dan. 2:45, the stone cut out of the mountain that fills the whole earth. Mather inserted a published copy of this bilingual treatise on the Second Coming into an appendix of thirteen essays attached to the end of his commentary on the Revelation. This appendix is entitled “Appendix. Containing some GENERAL STORES, of Illustration, and a Furniture which will richly Qualify a Person to be a READER of the BIBLE.” His *Lapis e Monte Excisus* thus forms the second essay under the heading “II. The SPIRIT, and PURPOSE, of the *Sacred Scriptures*.”

Stage IV: Comparing Mather’s “Biblia” advertisement in *Bonifacius* (1710) with the one in *A New Offer* (1713/14) and the one in Samuel Mather’s *The Life* (1729) reveals that Cotton Mather undertook several significant changes in the “Biblia Americana” in the last dozen or so years of his life (1715–28). This is especially the case for items I, II, and VI. The substance of items I in *Bonifacius* (203) and in *New Offer* (11) is quite similar and suggests little more than stylistic changes. However, in Samuel Mather’s *Life*, composed fifteen years after the *New Offer*, the following supplement to item I identifies a major addition to the “Biblia” manuscript: “THE sacred Scriptures of the Old and New-Testament exhibited, *In the Order of Time*, wherein the several and successive Occurrences

⁹⁴ See J.S. Mares, “Problema Theologicum” (333–58) and R. Smolinski, *Threefold Paradise* (21–59).

may direct to the lacing and Reading of them: which Exhibition alone will greatly enlighten them, and do the Service of a valuable Commentary” (*The Life* 184). This completely new item refers to the two-part section “The OLD TESTAMENT, in the Order of the History,” followed by “The NEW TESTAMENT, in the true Order of the History,” a separate fascicle which Mather added to the commentary as a prolegomena to “Biblia Americana” (BA 1:213–68). This new section of nearly thirty nine manuscript pages (folio) contains a unique chronology of all historical acts mentioned in the OT and NT. Since the biblical authors generally do not narrate the historical episodes in their chronological order, Mather hopes to furnish his readers with a basic key to the sequence of unfolding events, to identify parallel events occurring during the same period yet related sequentially (or in other parts of the Bible), and to supplement the incomplete detail given by one author with the fuller (or alternate) version given by another. The two-part section of “the Order of the History” was added sometime after the spring of 1713/14 and now precedes “The Introduction” (BA 1:269) and consists of a sheaf of paper of identical size and watermarks.⁹⁵

Additional changes in the “*Advertisement*” in Samuel Mather’s 1729 biography (item II) appear significant. Item II reads, “An *Emendation* of our present Version; from the Discoveries of the most learned Philologists from the earliest Ages of sacred Literature down to *Bochart*, *Calmet* and *Parker*: and a particular notice of those many Instances wherein our greatest Masters of the Original Languages have express’d their wishes to see the common Translation amended and refined” (*The Life* 184). This description is an expansion of item I in *Bonifacius* (203) and in *New Offer* (11), but appears as item II in the biography (184). It emphasizes Mather’s increasing concern with philological and textual challenges to the Bible as the Word of God, with the dogma of verbal inspiration and its problems, and with textual transmission emerging from his study of the London Polyglot.⁹⁶ Discussions of these topical issues are interspersed throughout the “Biblia”⁹⁷ and are based in part on Samuel Bochart’s *Opera Omnia. Hoc Est Phaleg, Chanaan, et Hierozoicon* (1675), on Dom Augustin Calmet’s *Commentaire littéral sur tous les livres de l’Ancien et du Nouveau Testament* (1707–16) and his *Dictionnaire Historique, Critique, Chronologique, Géographique, et Littéral de la Bible* (1722), and last but not least – a work much after Mather’s own mind – on Bishop Samuel Parker’s *Bibliotheca Biblica* (1720–35).

Of the innumerable emendations, interpolations, interlineations, erasures, and excisions to which Mather subjected the holograph manuscript of the “Biblia” during its long gestation period, the final substantive changes appear among the most significant. These alterations were made sometime after 1715 and

⁹⁷ See my discussion in Section 3.

in the years following 1724. Again, let me begin in inverse order. A comparison between item IX in both *Bonifacius* (205) and *New Offer* (14) and item X in Samuel Mather's *Life* (185) demonstrates that Samuel Mather's 1729 advertisement of the "Biblia" reflects the modifications his father made during the final decade of his life. The history of the Jews of the Diaspora, their conversion, and ultimate return to the Holy Land was as much a mainstay in the pre-millennialist eschatology of the seventeenth and eighteenth centuries as was the quest to discover the Ten Lost Tribes and their expected return to Palestine. The occurrence of these events just prior to the Second Coming was a crucial element of Cotton Mather's unfolding literalist scheme and alluded to in item IX in the advertisements of both *Bonifacius* and *A New Offer*. Significantly, the concluding phrase "when their [the dispersed Jews] speedy Recovery from their Sad and Long Dispersion is hoped for" is absent from Samuel Mather's 1729 "Advertisement" (*Life* 185, item X) and reflects that Mather abandoned this millennialist tenet. Mather's diary for 1712, 1724, 1725/26 and his "*Trip paradisus*" provide important clues to what happened during one of his mystical communications with heaven, on 21 June 1724, while he wrestled with his God for more privileged knowledge about the state of Christ's millennial kingdom:

The glorious Lord has led me into fuller Views than I have ever yett had, and such as I have exceedingly longed for and asked for, of what shall be the true State of Things in His Kingdome. And I am now satisfied, that there is nothing to hinder the immediate Coming of our Saviour, in these Flames, that shall bring an horrible Destruction on this present and wicked World, and bring on the new Heaven, and the new Earth, wherein shall dwell Righteousness. I purpose quickly to write on these things. In the mean time, I would in all holy Conversation and Godliness, mightily endeavour to maintain such a Disposition of Mind, as the tremendous Descent of my glorious Lord, is to be entertained withal. (*Diary* 2: 733)

The work that Mather promised himself to write on these new insights turned out to be "*Trip paradisus*," his mature eschatological theories, which he also recorded in "Biblia" (1724–1727), but from which he never fully got around to expunging his old, discarded conjectures.⁹⁸ "*Trip paradisus*" was not completed until the winter of 1725/26 or even as late as 1727 (*Diary* 3:91n, 2:811, "*Trip paradisus*" 326).⁹⁹ The hermeneutic changes he undertook during this final revision process include a single, universal conflagration of the earth at Christ's Second Coming, a full restoration of the earth during Christ's thousand-year reign, the repopulation of the millennial earth by the offspring of the "Changed Saints,"

⁹⁸ Mather's eschatology, his changing views on the conflagration, the conversion of the Jewish nation, and the state of the New Heavens and New Earth during the millennium appear in *Threefold Paradise* (1995).

⁹⁹ A letter to Thomas Prince (Feb. 11, 1726/27) shows that Mather was now ready to have the holograph manuscript of "*Trip paradisus*" copied by a scribe to be sent to London for publication (Silverman, *Selected Letters* 415–16).

and a literal cubic New Jerusalem of gigantic proportions visibly floating in the heavens. Curious as his new conjectures are, perhaps the most significant changes in his eschatology of his late years are his abandonment of the literal conversion of the world's Jewry and of the expectation of their return to the Holy Land. In his old age, Mather became an allegorist (much to the dismay of Increase Mather, Samuel Sewall, and Thomas Prince) on this eschatological crux of the period. Henceforth he argued that spiritual Israel (Christ's Redeemed) – not carnal Jewry – was intended by the Apostle (Rom. 11). Interestingly, Mather's old, literalist scheme is still in place in "Biblia" (BA, Rom. 11) but his new allegorist interpretation is fully developed in "*Trip paradisu*" (295–318). A related change, though not yet fully expunged from all places in his commentary in "Biblia," is his reconfiguration of the state of the New Heavens and the New Earth and the nature of their occupants. This emendation is also indicated in Samuel Mather's 1729 advertisement and promises subscribers of the "Biblia" a fresh discussion of "the State of the Church and World in future Ages to the End of Time," the world *during* Christ's thousand-year reign (*Life* 185, item XI). This announcement is completely absent from the advertisements published years earlier in *Bonifacius* (205–06) and in *New Offer* (14). Mather's new theories on the millennial New Heavens and New Earth are fully formulated in "*Trip paradisu*" (244–94), but were mostly based on his new annotations in "Biblia" (BA, Isa. 17–30, 60, 65, Dan. 7, Acts 3, Rev. 19, 21–22).

Perhaps of greatest interest is that Cotton Mather's celebrated *Christian Philosopher* (London, 1720/21), his thirty-two essays on natural science, published by the Royal Society of London, originally constituted an integral part of "Biblia Americana" – probably as an appendix rather than as dispersed essays. This assertion has been made several times before. Perry Miller's claim that "*The Christian Philosopher* was culled out of the *Biblia*," though dismissed by Winton Solberg, may be correct after all – although neither historian supplies conclusive evidence for their respective positions.¹⁰⁰ Much new evidence of Mather's initial intent can be gleaned from his advertisements in *Bonifacius* (204, item VI), *A New Offer* (12, item VI), and in Samuel Mather's *Life* (184–85, item VII). First the evidence from Mather's correspondence: In a missive (c. Aug. / Sept. 1715) to his brother, the Rev. Samuel Mather at Whitney (Oxfordshire), Cotton Mather requests that he "would not lett my *Christian Virtuoso* be lost" and that he forward it to "Dr. Woodward's hand, into the Repository of the Royal Society" in case Samuel could

¹⁰⁰ P. Miller, *New England Mind* (441) and W. U. Solberg, "Introduction" (xxxvi–xl). T. Hornberger appears to be the first to argue that "there is some evidence that it [*The Christian Philosopher*] was originally a part of Mather's vast collection of materials of the ill-fated *Biblia Americana*" ("Notes 134). Hornberger's evidence is based on Mather's letter (Oct. 18, 1715) to Sir William Ashurst (*Diary* 2: 332). Much more conclusive documentation can be found in Beall and Shryock, *Cotton Mather* (40–42); in Beall, "Early 'Curiosa Americana'" (367–68, 371), and in R. P. Stearns, *Science* (412).

not find a publisher for it himself (*Diary* 2:324). Similarly, Cotton specifically praises his "*Christian Virtuoso*" in a letter written to Sir William Ashurst a few weeks later (Oct. 15, 1715), in which Cotton hopes to enlist Sir William's patronage for the "Biblia Americana." Cotton points out that his "Biblia" deserved to be published all the more because "one considerable Article in the work, namely *The Christian Virtuoso*, one would think, might procure some subscribers to it, among the members of the Royal Society, which have allowed my Relation to them" (*Diary* 2:332). If Mather's letters to his brother (Aug. / Sept.) and to Ashurst (Oct. 15) are correctly dated, then Mather had already sent the manuscript of *The Christian Virtuoso* (the title before *The Christian Philosopher* was published by the Society) to England while he still advertised his *Christian Virtuoso* as "one considerable Article" in his Bible commentary. The publication of the "Biblia" was all the more called for, Mather thought, because it included *The Christian Virtuoso*, his treatise on natural science, which would be particularly appealing to Sir William and the members of the Royal Society.

There is other external evidence to suggest that the essays in *The Christian Philosopher* were designed to be an integral part of "Biblia Americana." As previously noted, the substantive changes in "Biblia Americana" in the last decade of Mather's life are also reflected in his advertisements of the commentary. The description of Item VI in *Bonifacius* (1710) and that in *A New Offer* (1713/14) suggests that Mather began to work on the essays of the *Christian Virtuoso* sometime after 1710 and probably finished them before the spring of 1714, for they are not mentioned in *Bonifacius* (204), but appear in *A New Offer* (12): "To all which there is added," Mather complements item VI on natural philosophy, "*The Christian Virtuoso*, with a Commentary on the more Modern and Certain Philosophy on, *His Work which Men Behold*; Embellished with the Discoveries which *our Days at Length* have made of Things wherein the Glorious GOD of Nature calls for our *Wonders & our Praises*." However, this supplement to *New Offer* (1713/14) is again removed from the 1729 advertisement in Samuel Mather's *Life* (184, item VII). This external evidence indicates that henceforth he elected to publish "Biblia" without his essays he had gathered into his *Christian Virtuoso*. The decision made good sense. The thirty-two essays forming this collection had just been published under the title *The Christian Philosopher* (1720/21) by the most prestigious body of scientists Mather could imagine. Clearly, he tried everything in his power to promote the publication of the "Biblia" from afar. He approached every potential subscriber, patron, and potentate; he left no stone unturned. When his pleas with heaven remained unanswered, when providence seemed to consign his commentary to oblivion (an unacceptable fate, no doubt), Cotton Mather tried to salvage what he could by publishing his labor of love piecemeal – still hoping against hope that "God our Saviour will in His Time, dispose the Minds of some eminent and opulent persons, to cast a benign Aspect

upon a work [“*Biblia Americana*”] which may hand down their Names with lasting Acknowledgments unto posterity.”

This table of contents not only lists the major subdivisions that follow the order of books in the King James Version but also references Mather's individual essays in the prolegomena and appendixes of the "Biblia" and may thus serve as a preliminary guide to the entire collection.

Apart from the four identifiable stages of composition that shaped the growth of the "Biblia," the extant manuscript is also distinguished by a didactic Q-&A technique, which allowed Mather to cast his commentary into the form of a dialogue. This ancient method of debate, in which an interlocutor poses rhetorical questions to be answered by a wise respondent, was still popular in Mather's time and can be found in works as ideological disparate as Francis Turretin's *Institutio Theologiae Elencticae* (Geneva, 1679–85) and Matthew Tindal's *Christianity as Old as the Creation* (London, 1730).¹⁰¹ No doubt, Mather was familiar with this didactic teaching device as much as any of his college-educated peers trained in the classics of Greece and Rome. If anything, he had put it to good use in the several catechisms he wrote for children as well as for adults. For instance, in *The Man of God Furnished. The Way of Truth, Laid out;*

¹⁰¹ Tindal explained his *modus operandi* as follows: "The Manner of debating a subject Dialogue-wise, (as this between *A.* & *B.*) was esteem'd by the Ancients the most proper, as well as most prudent, Way of exposing prevailing Absurdities; & *Tully's* two *Discourses, de Naturâ Deorum*, and *de Divinatione*, both levell'd against the Superstition of his Countrey-men; are living Monuments of the Expediency, and Usefulness of this way of Writing. And certainly, the Reader may be better entertain'd thus, than by that dry way of Objection and Answer, with which Controversies are usually manag'd" ("Preface" 1v).

with a *Threefold Catechism* (Boston, 1708), he insisted that instructors should betimes implant in children the principles of religion, but “the way of instilling the *Christian Religion*, by Catechising, or a conference carried on with *Question* and *Answer*, is very Necessary, and highly Agreeable to awaken the *Attention*, and Enlighten the *Understanding* of the *Catechumens*; this also is the confession of all, who have considered, but how *Mankind* is to be dealt withal” (1). Mather was particularly fond of this method of engaging his audience, as his son Samuel well knew from experience. In fact, Samuel’s father deemed it such an efficacious tool that “he tho’t the *Spirit of Grace* might fall upon them [the catechumens] in this Action” of acquiring divine knowledge through Q & A that “they might be seiz’d by HIM and held as His Temple thro’ Eternal Ages” (*The Life* 18). Little wonder then that Mather put it to good use throughout his Bible commentary: every gloss is introduced by a rhetorical question that allows the author to supply the answer.

Mather’s Q-&-A method was also advantageous in several other ways: It allowed him to break away from the rigid framework of traditional Bible commentaries, enabled him to explore specific philological, historical, and cultural issues that transcended the immediate context of a given chapter and verse he glossed, and it helped him to turn individual annotations into separate essays which – though anchored in the particular biblical locus – could be transferred at will and fitted to suit other forms of discourse. The “Biblia Americana” thus became his database, an encyclopedia of universal knowledge that could be consulted for diverse purposes. Mather embraced this expedient more or less self-consciously in, for instance, his commentary on Gen. 21:1 on the birth of the Patriarch Isaac:

Q. Our learned *Heidegger* supplies us, with many rich *Illustrations* upon the Matters of the *Patriarchs*. To Translate or Transcribe the whole of his *Exercitationes*, would not answer the Design of the Work, we are upon; which is, To make a Collection of the *Finer Thoughts*, wherewith Men of Erudition, have Illustrated the Sacred Scriptures. And yett, rather than scatter them asunder, to be lodg’d at their several Texts, we would chuse to have the *Finer Thoughts* of our *Heidegger* as much together, as a *Particular Subject* will allow. Wherefore, what you find more observable in him, concerning the affairs of ISAAC, and his Two Sons; Lett us have all here together, if you please, in one Entertainment?

A. It shall be so.

Mather’s lengthy “Answer” (see *BA* 1:965–84) is digested from Johann Heinrich Heidegger’s אֲבֹתֵינוּ רַאשֵׁי דֵּי אֲבֹתֵינוּ *De Historia Sacra Patriarcharum Exercitationes Selectae* (Amsterdam, 1667–71), a two-volume analysis of Rabbi Shlomo Yitzchaki’s celebrated commentary on the Chumash and Talmud. Mather’s lengthy gloss (“Answer”) forms an independent essay of nearly ten pages folio in which he examines Rashi’s cabalistic readings of Isaac’s name, Sarah at age ninety nursing her son, Isaac’s weaning, growth, travels, and the story of his

offspring, along with many related issues that rupture the tight framework of conventional commentaries. Indeed, this approach allowed Mather to explore his topic from diverse angles and to add extrinsic material as needed without scattering his energies. Better yet, he did not have to break up his sources into fragments or individual references and disperse them across the more than 4,500 pages of the “Biblia.”

This approach is even more efficient than it appears at first glance. As previously noted, Mather compiled his commentary over a period of more than thirty five years. During this long gestation period, the “Biblia” grew from approximately 5,100 individual annotations (1693–1706) to more than three times this number by the end of 1728. Mather added new material from hundreds of different sources, excised superseded glosses, and replaced them with more trenchant and up-to-date annotations. If he had intended a conventional commentary, then he would have had to recast periodically every chapter-and-verse annotation to accommodate these changes and to streamline them into a single coherent narrative for each chapter as new data became available. No doubt, this time-consuming effort would have generated multiple versions of nearly identical glosses along the lines of what can be found in some of the religious writings of Sir Isaac Newton.¹⁰² Instead, Mather could add new annotations on the same verse by simply formulating yet another Q & A, and by adding them to the existing gloss. That is why multiple (but dissimilar) explanations on the same chapter and verse can be found side by side or appended to the end of the chapter. This procedure was also advantageous from yet another perspective. It allowed readers to select the desired material or to skip unwanted portions without having to read through a continuous narrative from beginning to end. Furthermore, it saved reams of expensive paper, which otherwise would have been discarded.

A note of caution may here be in order lest we judge Mather's method of digesting and extracting his source material as intellectual dishonesty or plagiarism – proprietary conventions that were not nearly as narrowly defined in his day as they are today. In his effort to reconcile the new discoveries in the natural sciences and philosophy with the standards of Reformed exegesis, Mather is less concerned with the identity of the authors of his sources than with the significance of their discoveries: not *who* they are, but *what* they have to say. In this respect, Mather's “Biblia Americana” has much in common with the centuries-old tradition of compiling catenae, florilegia, or anthologies of biblical commentaries much prized by scholars throughout the ages. The invaluable *Εὐαγγελικὴ Προπαρασκευή*, or *Preparation for the Gospel* (4th c. CE), by Eusebius

¹⁰² See for instance Newton's exposition on 2 Kings 17:15–16 (Yahuda MSS Iand 21, Ms. 437, HRC 130) or his “Three bundles of notes ... related to ‘Theologiae Gentilis Origines Philosophicae,’” dating to c. 1680s and early 1690s (Yahuda Ms. 17). They are made available through the magnificent AHRC Newton Papers Project, by R. Iliffe and S. Mandelbrote <http://www.newtonproject.sussex.ac.uk/prism.php?id=44>

Pamphili (c. 260–c. 340), bishop of Caesarea, or the *Catena Aurea* (Golden Chain), by St. Thomas Aquinas (c. 1225–74), or the nine-volume catena *Critici Sacri, sive, Doctissimorum Virorum in SS. Biblia Annotationes & Tractatus*, edited by John Pearson et al. (London, 1660) and subsequently digested by Matthew Poole in his *Synopsis Criticorum Aliorumque S. Scripturae Interpretum* (London, 1669–76), are some of the best-known compilations in Mather's time. Indeed, this genre allowed him to distill the "*Finer Thoughts*" into his commentary and nurture his penchant for philological problems of the Bible as text, for scientific discoveries, for social and cultural matters such as food, clothing, monuments, and customs of the ancients, and for pagan gods, rituals, heroes, myths, and peoples (including Native Americans) not commonly found in the conventional Bible commentaries of his time.

Not unusual for the time, verbatim extracts and close paraphrases were integrated with merely passing references to authors or works. This indiscriminate handling of intellectual property occurred in virtually all works of this genre. An example or two from the "Biblia" may suffice here to illustrate my point. In one instance, an exposition of the Psalms, Mather quotes a long passage from Basil Kennet's English translation of *Pensées de M. Pascal sur la religion, et sur quelques autres sujets* (1670) to serve as an annotation on the Psalms. After duly acknowledging the French philosopher and scientist Blaise Pascal (1623–62) and the title of his work, Mather comments, "It were easy for me in the way of Reading to make myself such a Master of these, and many more the like *Thoughts*, that my Reader should consider them, as no other than *Mine*, in the Proposing thereof. But I am not seeking & serving *my own* esteem in the World; it is the Service of *Religion* that I aim at; and I am desirous, that every one, whom God ha's employ'd as an Instrument of Good in that Service, may be duely acknowledged & remembred" (*BA*, Ps. 2:12).¹⁰³

Perhaps more to the point, Mather makes the following self-conscious acknowledgement at the conclusion of his commentary on Job:

Tho' I have chosen to putt these Observations, very much into my own Expressions, (and if I had imitated a great Part of those who sett up for *Authorism*, I might easily have made them to pass for *my own*;) yett I must own my honoured Master [*George*] *Hutcheson*, as the author of the Hints, which have afforded them. If any Acknowledgments at all belong to me, they are only those of a little *Industry*. But indeed we, both of us desire, *He* in the *Paradisian World*, and I hastening (as I hope) unto it, that instead of any Acknowledgments paid unto us, we may be *Nothing*, and they be all paid unto the Glorious Lord, from whom we have *Received*, all that we have *Offered* unto *Him*, & unto His People.

It is possible that sometimes in our *Illustrations* on this, & on other Parts of the Sacred Scripture, when I have been enriched with many good Thoughts together,

¹⁰³ Mather's long extract is from Basil Kennet's translation of Pascal, *Thoughts on Religion, and Other Subjects* (London, 1704) 87–92.

from one Man, I have not remembred always to *Quote* him, every Time I have *Us'd* him. Yett, I hope, no *such Writer* ha's gone without Proper Acknowledgments; nor indeed, any one been left wholly unmentioned, that ha's been useful to me. (*BA* Job, at the end)

Readers of the post-romantic era do not take lightly to the loose handling of conventions dear to our own age. After all, intellectual property and its commodification are protected by international copyright-laws and patents. But we must not forget that catenae and Bible commentaries throughout the ages were not shaped by romantic notions of originality or novelty, than by the compiler's purpose to place his productions in the service of God. Erudition, not originality, was in vogue; research, not invention, was considered proof of intelligence. Thus biblical commentaries then and now contain layers of paraphrases and citations at second, third, even fourth remove in which the wisdom of the ages becomes – without attribution – the common property of all, the collective heritage of mankind.

“Biblia Americana” Volume 1: Genesis and its Main Sources

Since each of the ten volumes of the forthcoming edition of “Biblia Americana” contains an analysis of Mather’s main source material synopsized in the respective volume, a basic summary of his principal works digested in his commentary on Genesis (volume 1) will suffice here. The “Bibliography of Primary Works” at the end of the present volume provides the best overview of *all* sources abstracted, digested, cited, referred to, or otherwise mentioned in Mather’s gloss on Genesis. The majority of these works – it is important to realize – are quoted at second or third hand, whether or not they were part of the Mather family libraries or otherwise accessible to him at nearby Harvard. Borrowing books from private collections of relatives, colleagues, friends, and neighbors was yet another important means of enhancing the availability of sources for “Biblia Americana.” The works in the “Bibliography” identified with a bullet • were (at one time or the other) part of the Mather family libraries.¹⁰⁴ Those marked with a diamond ♦ were available at the Harvard College library as established in *Catalogus Librorum Bibliothecae Collegij Harvardini Quod est Cantabrigiae in*

¹⁰⁴ See “Catalogue of Dr. Cotton Mather’s Library Purchased by Isaiah Thomas” and “Remains of Mathers’ [*sic*] Library Folio & 4to. Purchased by I. Thomas” (MS copies at the AAS). J. H. Tuttle’s bibliography “Libraries of the Mathers” (1910) is still the best (albeit incomplete) source for the remains of the Mather family Libraries. Since its first publication a century ago, this bibliography of works in Cotton Mather’s personal library has been updated (by hand) with more than five hundred additional titles, the updated copy has not yet been published but is accessible at the AAS in Worcester. See also H. J. Cadbury’s fine analysis “Harvard College Library and the Libraries of the Mathers” (1941).

Nova Anglia (1723) and *Supplementum* (1725).¹⁰⁵ The origin, growth, dispersion, and loss of the huge collection of books and manuscripts in the Mather family libraries are well known; Julius H. Tuttle published his findings more than a century ago and traced the descent of the family libraries from the small collection brought to Massachusetts in 1635, by the Rev. Richard Mather (1596–1669), Cotton Mather's paternal grandfather, to the dispersal of the whole family's collection after the death of the Rev. Samuel Mather (1706–85), Cotton Mather's only surviving son, at the end of the eighteenth century.¹⁰⁶

A word or two about the size of Cotton Mather's private library is in order before we can appreciate the significance of the works he digested in "Biblia Americana." No complete account of Mather's library exists because no inventory of its holdings or value was made at his death in 1728 – ostensibly to keep the prized collection from falling into the hands of his creditors.¹⁰⁷ However, John Dunton (1659–1733), a London printer and bookseller who visited Boston in 1686, went into raptures at the sight of Cotton Mather's library, which Dunton extolled as "the Glory of New-England, if not of all America" and "the best sight I had in Boston."¹⁰⁸ If the accumulated hoard of books merited such praise when young Mather was barely twenty-three, there is no telling what Dunton's ecstasy would have been like on seeing "between two and three thousand" volumes, the estimated size of Mather's private collection in 1700 (*Diary* 1:368). This estimate rose to "many more than Thirty Hundred Books" some years later, Cotton related in his autobiography (*Paterna* 42). Roughly one hundred years after Dunton's enthusiastic appraisal, Samuel Mather (1736–1813), Cotton Mather's Tory grandson who had inherited the huge libraries his father and grandfather left behind, had this to say about the prized collection:

My Father's Library was by far the most valuable Part of the family Property. It consisted of 7000 or 8000 Volumes of the most curious and chosen Authors, and a prodigious Number of valuable Manuscripts, which had been collected by my Ancestors for five Generations.

According to Samuel G. Drake, former president of the New England Historic-Genealogical Society, Cotton Mather's grandson believed that the

¹⁰⁵ Both of these catalogues are reprinted in the edition by W. H. Bond and H. Amory, *The Printed Catalogues of Harvard* (1996): 3–118.

¹⁰⁶ T. J. Tuttle, "Mather Libraries" (269–312).

¹⁰⁷ Mather inadvertently inherited considerable debts through his third wife, Lydia Lee George, a wealthy widow whom he married in 1715. Their prenuptial agreement may well have protected Mather's library from the auction block when his wife's ostensible wealth turned out to be encumbered by her deceased husband's creditors (*Diary* 2: 708, 745; Silverman, *Life and Times* 287, 383, 427–28).

¹⁰⁸ John Dunton, "Letter to George Larkin" (March 25, 1686), in *Letters written from New-England* (75). The untrustworthiness of Dunton's *Letters* is discussed in C. N. Greenough, "John Dunton's *Letters*" and "John Dunton Again."

value of the library amounted to “at least *eight thousand pounds sterling*.”¹⁰⁹ No doubt a sizable fortune in its day, this tidy sum, however, does not represent the true value Cotton himself put open “the Darling of my little Enjoyments ... so very dear to me above all temporal Possessions” (*Diary* 2: 708, 745). For when he contemplated the conflagration he expected at Christ’s return, his bibliolatriy almost got the better of him: “In the Midst of the *Desolations*, there has been scarce any thing, that some whom I know, would more beg to be spared, than the *Libraries*. Their most Pathetic Cry would be, *Oh! Spare the Libraries!*” The destruction of the 700,000 thousand volumes in the Alexandrian library, the loss of the library of Pergamus, the fire that destroyed more than 120,000 volumes in the library of Constantinople, and the transference of the famous Heidelberg library to the Vatican, “Tis as bad as *burnt*.” But that collection, too, “is quickly to be *Burnt* in a *Fire* more desolating than that which laid waste the Tower of *Shechem*” (“*Trip paradisus*” 241, 242). Indeed, the ravages of fire – so detrimental to the wooden edifices of the day – had decimated his father’s own collection once before. As Cotton Mather remembered the great fire of Boston, Nov. 1676, his father’s “own House also took a part in the Ruines: But by the Gracious Providence of God, he lost little of his Beloved Library: Not an Hundred Books from above a Thousand; Of those also he had an immediate Recruit, by a Generous Offer which the Honourable Mrs. Bridget Hoar made him, to take what he Pleased from the Library of her Deceased Husband” (*Parentator* 127). Books were treasured possessions to those who knew their value and rarity. No greater gift could be bestowed on either of the two Mathers than to supply their libraries with vellum-bound tomes of theology, history, or sacred geography – even bundles of sermon notes and manuscripts of unpublished scholarship.¹¹⁰ These became heirlooms, lovingly preserved and prized by generations of descendants. In more ways than one, the treasures of his family libraries are represented in Mather’s commentary on Genesis – the first of the ten-volume collection.

Only representative examples need here be treated. The “General Index” at the end of the present volume itemizes every reference to the authors and their works Mather relied on, along with the location of their citation references. Among the principal sources in Mather’s annotations on Genesis are works old and new. They are here classified according to their genre, because their use is (by and large) determined by the specific nature of the Book of Genesis: the *Primeval Story*: the Hexaemeral tradition, the garden, the genealogies, the flood, and the table of nations. The *Patriarchal Story*: the cycles of Abraham, Jacob, Esau, and God’s dealings with the patriarchs. The *Joseph Story*: the story of Jacob’s family, their travels, and Joseph’s rise to prominence in Egypt. In

¹⁰⁹ S. G. Drake, “Introductory,” *History of King Philip’s War* (1862) xxiii.

¹¹⁰ See especially *Diary* (1:214, 343, 368, 447, 532, and 2:2).

terms of genre, Mather's commentary on Genesis is dominated by works on chronology, natural science, geography, history and travel, Reformation and Post-Reformation literature, Patristic literature and Judaica. Given the nature of Genesis, these genres share many of the same concerns and frequently intersect and overlap with related works.

Chronology

The principal work of chronology Mather relies on in Genesis is William Whiston's *A Short View of the Chronology of the Old Testament, and of the Harmony of the Four Evangelists* (Cambridge, 1702), a state-of-the-art chronology based on the Masoretic texts, and a revision of Archbishop James Ussher's *Annales Veteris Testamenti, À Prima Mundi Origine Deducti* (London, 1650). For many of the faithful, Ussher's chronology was tantamount to holy writ; it not only identified the exact day and time when God created the universe and thus provided a fixed point from which all other dates could be firmly established, but also determined the calculations for generations thereafter, when Ussher's chronology became an integral part of the King James Version until the end of the nineteenth century.¹¹¹ Successor to Sir Isaac Newton's Lucasian chair of mathematics at Cambridge, Whiston (1667–1752) attempted to reconcile the many chronological and genealogical difficulties in the Septuagint, Masoretic, and Samaritan texts of the Bible. Mather and his peers were well familiar with these difficulties, and Whiston's astronomical calculations, based on the "Mathematical Canon" of Claudius Ptolemy's *Amalgest*, appeared to offer the best solution to this problem. What makes Whiston's *Short View* so attractive to theologians of the period is that Whiston also draws on the chronologies of Martino Martini (*Sinicae Historiae Decas Prima* [1659]), of Sir John Marsham (*Chronicus Canon Aegyptiacus Ebraicus Graecus* [1672]), of Philippe Couplet (*Tabula Chronologica Monarchiae Sinicae* [1686]), and of Simon de la Loubère (*Du Royaume de Siam* [1691]) – ponderous tomes which aimed at reconciling the ancient chronologies of the Chinese, Egyptians, Phoenicians, and Chaldeans with those of the Hebrews. Mather digested the more than five hundred pages of Whiston's *Short View* into twelve compacted folio pages and was truly grateful for "such a Treasure of Good Thoughts" because Whiston's work had "putt an End unto Thousands of Disputations" (BA 1:277, 300–01).

¹¹¹ As the venerable archbishop put it, "In the beginning God created Heaven and Earth, Gen. 1. v. 1. Which beginning of time, according to our Chronologie, fell upon the entrance of the night preceding the twenty third day of *Octob.* in the year of the Julian Calendar, 710," or 4004 BCE (Ussher, *Annals* 1).

Science

Mather's commentary on the Mosaic creation account is one of the longest sections in the "Biblia" on Genesis and draws on the following works: Thomas Pyle's *Paraphrase with Short and Useful Notes on the Books of the Old Testament* (London, 1717); William Whiston's *New Theory of the Earth, From its Original, to the Consummation of all Things* (London, 1696), which responds to Thomas Burnet's Cartesian *Telluris Theoria Sacra* (1681) and its later incarnation *The Sacred Theory of the Earth* (London, 1691); Erasmus Warren's *Geologia: Or, A Discourse Concerning the Earth before the Deluge* (London, 1690); Richard Bentley's *A Confutation of Atheism From the Origin and Frame of the World* (London, 1693); Nehemiah Grew's *Cosmologia Sacra* (London, 1701); John Edwards' *Discourse concerning the Authority, Stile, and Perfection of the Old and New Testament* (London, 1693–95); Edmund Dickinson's *Physica Vetus & Vera* (London, 1702), and Robert Hooke's *Lectures and Discourses of Earthquakes and Subterraneous Eruptions*, in *Posthumous Works* (London, 1705). Mather digests the relevant portions of these works and incorporates them in his commentary on Genesis 1 and 2. In doing so, he presents his readers with a spectrum of explications, which ranges from the more traditional accounts of Thomas Pyle, Robert Hooke, Erasmus Warren, and John Edwards to the cutting-edge explications of Thomas Burnet, William Whiston, Richard Bentley, Nehemiah Grew, and Edmund Dickinson. Mather clearly favors the Newtonian expositions of Whiston, Bentley, and Grew, in part because they leave ample room for miracles to offset the laws of nature. But he is also fascinated with the atomistic approach of Dickinson, who valiantly struggles to reconcile Gassendi's atomism and Descartes' vortices with Burnet's mechanism and to keep the whole from surrendering to pure Deism. The philosophic positions of these authors (and Mather's response) are the subject of a detailed analysis in Section 2: "Biblia Americana" in the Context of Early Enlightenment Science.

Geography

Samuel Bochart's learned *Geographia Sacra. Phaleg De Dispersione gentium & terrarum divisione facta in edificatione turris Babel; Pars Posterior: Chanaan De Colonijs & sermone Phoenicum* (Caen, 1646) was the standard work on the geography of OT at least until the end of the eighteenth century. This magnificent work and its companion, *Hierozoicon Sive bipertitum opus De Animalibus Sacrae Scripturae* (London, 1663), an interpretative handbook on all the animals of the scriptures, were prized possessions by theologians and natural philosophers of all stripes who turned to the Bible for explanations on the dispersion of peoples and nations after Noah's flood and on the multitude of new species they discovered

in hitherto unexplored regions. An eminent Huguenot scholar, theologian, and Orientalist, Bochart (1599–1667) was the foremost authority on biblical geography and zoology of his time. He had read and incorporated every conceivable source and quoted lengthy excerpts to document his analyses. His *Phaleg*, *Chanaan*, and *Hierozaicon* went through at least five editions until the end of the eighteenth century. Cotton Mather's own copy of Bochart's *Geographia Sacra* came from the collection of the Rev. Samuel Lee (1625–91), a short-time resident of New England, whose library was advertised in "The Library of The Late Reverend and Learned Mr. Samuel Lee" (Boston, 1693) after Lee had perished in a dungeon of a French privateer, waiting to be ransomed.¹¹² Although greatly indebted to Bochart's *Geographia Sacra*, Lee was put off by his French colleague's pompous erudition: He "is certainly a learned author," Mather quoted Lee's Latin inscription, "but not one of the best judgment, and too verbose in the least necessary trifles. Also, he often shows off how much he has read, when it is hardly necessary. He could even have reduced his lengthy work to a tenth of the size" (BA 1:804). If this critique bespeaks the kind of professional jealousy that even men of the cloth were known to harbor, then Lee, Mather, and most of their contemporaries relied on Bochart without compunction. Mather's commentary on Genesis, ch. 10 (BA 1:711–804) is a good case in point. It is greatly indebted to Bochart's folio volumes, as is Samuel Lee's geography of Eden, a lost manuscript, which Mather had digested and incorporated in his commentary on Genesis, ch. 2 (BA 1:444–64) and in "Trip paradisi" (93–106). Mather's extracts from the geographies of Bochart and Lee were supplemented with summaries from Pierre-Daniel Huet's *Traité de la Situation du Paradis Terrestre* (Paris, 1691), which appeared in an English translation under the title *A Treatise of the Situation of Paradise* (London, 1694), and from Edward Well's *An Historical Geography of the Old Testament* (London, 1711–12). If these standard geographies did not supply his wants, Mather resorted to André Thevet's *Cosmographie de Levant* (Paris, 1556), Adriaan Reland's "De situ Paradisi terrestris" (1706–08) and Joseph Pitton de Tournefort's popular *Voyage du Levant* (1717), translated into English and appearing under the title *A Voyage into the Levant* (London, 1718). These post-Reformation geographies, it goes without saying, relied as much on each other as on the medieval and ancient geographies and histories by Stephanus Byzantius, Abu Abdullah Mohammed Ibn al-Sharif Idrisi (Nubian Geographer), Ammianus Marcellinus, Pomponius Mela, Claudius Ptolemaeus, Dionysius Periegetes, Strabo, Josephus Flavius, Pliny, Diodorus Siculus, Herodotus, Hesiod, Homer, Manetho, and Berosus whose works were known to reach beyond pre-history into the age of myth.

¹¹² See S.A. Green, "An Early Book-catalogue" (542), and T. Hornberger, "Samuel Lee" (341–55).

Medieval, Reformation, and Post-Reformation Theologians

Because of the specific nature of the first book of the Pentateuch, the category of medieval, Reformation, and Post-Reformation theologians is sparsely represented in Mather's commentary on Genesis. Among the major theologians of the medieval period – Aquinas, Bernard of Clairvaux, Rupert of Deutz, Denys the Carthusian, Jean Gerson, Hugh of St. Victor, Nicholas of Lyra – only Aquinas, Denys, Hugh, Rupert, and Lyra are referred to in the “Biblia” on Genesis. Thomas Aquinas and Lyranus have the largest number of hits – Aquinas's *Summa Theologica* and Lyranus's *Postilla* are here represented with second-hand comments on social and historical matters. Much the same is true for the great Renaissance Humanists and Reformers: Marsilio Ficino, Johannes Reuchlin, Jean Calvin, Martin Luther, Heinrich Bullinger, Peter Martyr (Vermigli), Philipp Melanchthon, Huldrych Zwingli, Theodor Beza, Wolfgang Musculus – in declining order – receive only some attention, usually in terms of secondary references to historical matters. Post-Reformation theologians and their spiritual offspring in the seventeenth and early eighteenth centuries do much better in this respect. They are here listed in alphabetical order, but the frequency of their appearance in Mather's commentary on Genesis differs widely: Henry Ainsworth, Pierre Allix, Roberto Bellarmine, Jacques Bonfrerius, Johannes Buxtorf (father and son), George Calixtus, Dom Augustin Calmet, Jacobus and Louis Capellus, Hieronymus Cardano, Isaac and Meric Casaubon, Johannes Cocceius, Ludovicus De Dieu, Joannes Drusius, Pierre Du Moulin, Louis Ellies Du Pin, John Edwards, Paulus Fagius, Robert Fleming, Wolfgang Franzius, Nicholas and Thomas Fuller, Johannes Glasius, Hugo Grotius, Theodor Hackspan, Johann Heinrich Heidegger, Pierre-Daniel Huet, Johann Heinrich Hottinger, Jeremiah Jones, Francis Junius, Pierre Jurieu, Isaac La Peyrère, Joachim Langius, Cornelius à Lapide, Jacques Lefèvre d'Étables, Jean LeClerc, Johannes Leusden, John Lightfoot, Hiob Ludolphus, Andreas Masius, Joseph Mede, Giovanni Stefano Menochius, Joannes Mercerus, Arias Montanus, Sebastian Münster, Paulus Orosius, Simon Patrick, Conradus Pellicanus, Valentinius Benedictus Pererius, Dionysius Petavius, August Pfeiffer, Johannes Piscator, Edward Pococke, Matthew Poole, Humphrey, John, and Matthew Prideaux, Claudius Salmasius, Jacques Saurin, Joseph Justus Scaliger, Valentin Schindler, John Selden, Thomas and William Sherlock, John Spencer, Richard Simon, Joannes Temporarius, Agostino Tornielli, Alfonso Tostado, Immanuel Tremellius, Francis Turretin, Gerardus Johannes Vossius, Ludovicus Vartomannus, Franciscus Vatablus, Compegius Vitranga, William Henry Vorstius, Dionysius and Gerard Joannes, and Isaac Vossius, Johann Christoph Wagenseil, and William Whiston. This list only represents a cross-section of the most significant authorities cited, referred to, or otherwise mentioned in Mather's commentary on Genesis. But even at this stage it is clear that Cot-

ton Mather's Reformed position did not keep him from citing the works of Roman Catholics, Jesuits, Lutherans, even from well-known heretics, without hesitation. The old gibe that he refused to quote from Roman Catholic authors may thus be laid to rest.

Of the many authors mentioned here, the Swiss Reformed theologian and Hebraist Johann Heinrich Heidegger (1633–98) deserves to be singled out. As a close associate of the Dutch Reformed theologian Johannes Cocceius (1603–69), perhaps the leading proponent of covenant theology of his day, Heidegger was entrusted with composing the *Formula Consensus Helvetica* (1675), designed to unite the Reformed churches of the Swiss cantons. Mather's interest in Heidegger mainly centered on the two-volume *De Historia Sacra Patriarcharum Exercitationes Selectae* (Amsterdam 1667–71), a study of Rashi's *Aboth* and of his commentary on the Pentateuch by the renowned philosopher Rabbi Shlomo Yitzchaki (1040–1105). Heidegger's polyglot study of every conceivable aspect of the Patriarchal economy is one of Mather's principal sources. It supplied him with choice glosses from Rashi, Nachmanides, Maimonides, Ibn Ezra, and many other Talmudic commentators, which Heidegger fortified with citations from the Church Fathers and from his contemporaries. Mather digested Heidegger's thousand-page *Historia Sacra Patriarcharum* into little less than seventy pages and dispersed them throughout his commentary on Genesis.

Patristic Literature

The Ante-Nicene, Nicene, and Post-Nicene Fathers of the Church are well represented in Mather's commentary on Genesis. Their names are listed according to the frequency of their occurrence, with St. Augustine at the top of the list with 114 and St. Gregory of Nyssa with 3 references at the bottom. The numerals in parentheses signify the number of times they are cited or referred to: St. Augustine of Hippo (114), Eusebius of Caesarea (100), St. Jerome (77), St. Chrysostom of Constantinople (35) Origen of Alexandria (34), St. Epiphanius of Constantinople (26), Quintus Septimius Florens Tertullian (26), Theodoret of Cyrrhus (24), St. Ambrose of Milan (25), St. Clement of Alexandria (25), St. Cyril of Alexandria (22), St. Athanasius of Alexandria (21), St. Irenaeus of Lyon (12), Lactantius (11), St. Justin Martyr (11), St. Eustathius of Antioch (9), St. Cyprian of Carthage (7), St. Gregory I, the Great (7), St. Basil of Caesarea (6), St. Gregory of Nazianzus (6), St. Gregory of Nyssa (3). The majority of the ancient Fathers are quoted at second hand, even though editions of their main works were generally accessible at Harvard during Mather's lifetime.

Judaica

Perhaps most revealing are Cotton Mather's many citations (at first and second hand) from Jewish historians and Rabbinic commentators. The large number of references to the Talmud, Mishnah, Midrash, Zohar, and Targums, along with citations from medieval Jewish travelers, indicates that Mather's commentary on Genesis covers the whole range of available resources to enrich his "Biblia Americana." Of the most important Jewish commentators on the Pentateuch, Mather cites or refers to Rashi's commentary on the Chumash and Talmud 71 times, to Maimonides' *Moreh Nebuchim* and *Mishneh Torah* 60, to Abraham Ibn Ezra's classic commentary on the OT 78 times, to Nachmanides 26 times, to David Kimchi's extant commentary on Genesis 20 times, to Isaac Abarbanel's huge commentary on the Hebrew Bible 19 times, to Bachya (Bechai) ben Asher 8 times, to Yaakov's *Baal HaTurim*, a commentary on the Pentateuch, 6 times; and to *Midrash Tanchuma*, an Aggadic midrash on the Pentateuch, attributed to R. Tanchuma bar Abba, 6 times. The Aggadic *Midrash Rabbah* occupies a significant place with 114 references; the *Pirke de R. Eliezer*, by R. Eliezer ben Hyrcanus, is mentioned nearly 50 times; such standard commentaries and histories by Philo Judaeus and Flavius Josephus 61 and 120 times respectively;¹¹³ individual tractates from the Babylonian Talmud are cited 59 times; the *Zohar*, or *Book of Splendor*, appears on 10 separate occasions; and the *Targums Hierosolymitanus*, *Jonathan ben Uzziel*, and *Onkelos* – almost exclusively based on Brian Walton's *Biblia Sacra Polyglotta* (London, 1653–57) – are cited or referred to 26, 44, and 30 times respectively. Finally, Rabbi Benjamin Tudela's valuable *Itinerarium*, a twelfth-century travelogue of the Middle East and Mediterranean world, is represented with 18 references. In short, Cotton Mather's keen interest in the classic works of Jewish commentators and in those of Christian Hebraists – whether quoted a first or second hand – is a testimony to his extraordinary erudition as an American theologian. His participation in the transatlantic community of scholars and in the transference of their philosophic ideas – whether ancient or modern – has largely gone unrecognized. And yet, the diverse sources Mather relied on in his commentary on Genesis represent only a sampling of his interests and of his vast learning. The full extent of what he amassed in his commentary on the whole Bible will be better known only after the remaining nine of our ten-volume edition of the *Biblia Americana* have been published.

With this promise of things to come, why did Mather choose to give his life's work the provocative title *Biblia Americana*? This choice is all the more momentous if we remember that the term "American" (at least until the

¹¹³ On this topic, see L. H. Feldman, "The Influence of Josephus on Cotton Mather's *Biblia Americana*" (122–55).

mid-1750s) signified "Native American," rather than "American of European descent." Until less than a century ago, the designation "Native American" was anything but flattering. It pejoratively signified "Indian" or "savage," as the indigenous populations were labeled by European explorers from the moment of first contact. Cotton Mather, to be sure, was no exception. It is therefore all the more noteworthy that Mather appears to be the first descendent of European colonists to designate himself an "American."¹¹⁴ The issue is an interesting one in terms of American identity formation, when European colonists and their descendents began to embrace their New World identity as more than a purely geographic signifier. Certainly, the Puritan origins of the American Self are well known – even long before Sacvan Bercovitch underscored these origins in his study which appeared a year before the bicentennial celebration commemorated America's political independence from Britain. In Mather's case, more than mere pride of place in the hierarchy of spiritual elites (the elect) appears to be involved. In his millennialist tract "Problema Theologicum" (c. late 1690s–1703), Mather protested against Joseph Mede's exclusion of the American hemisphere from the blessings of Christ's millennial kingdom, at a time when many chiliasts believed that the Messiah's rule would be limited (for most of his thousand-year reign) to the realm of the Mediterranean and Middle Eastern regions as they were known to the apostles. This geographic limitation excluded not only most of Asia but also all of America and the as yet undiscovered islands of the world. Mather was vehemently opposed to this curtailment: "I that am an *American*," he countered in his tract, "must needs be Lothe to allow all *America* still unto the *Devils* Possession, when our Lord shall possess all the rest of the World" (412). "It was never intended that the Church of our Lord, should be confined always within the Dimensions of *Strabo's* Cloak; and that, *All the World* [Matth. 24:14] should always be no more, than it was, when *Augustus* taxed it" (*Theopolis Americana* 46).¹¹⁵ Mather insisted that at the Second Coming, Christ's kingdom would also extend to the New World – no matter what Joseph Mede conjectured.

What, then, is specifically "American" about "Biblia Americana"? One of Mather's principal aims in his commentary is to demonstrate that theologians in the English colonies of North America fully participated in the European debate. He corresponded with a large number of English and continental theologians – even as far as India and Ceylon (Sri Lanka).¹¹⁶ His own private

114 See his biography of John Eliot, *The Triumphs of the Reformed Religion, in America* (Boston, 1691), "Dedication" (sign. A6r) and *Magnalia Christi Americana* (105)

115 See R. Smolinski, "Israel Redivivus" (372). The passage from Mather's manuscript "Problema Theologicum" (68) appears in J. S. Mares, "Edition" (412).

116 See Mather's *India Christiana* (Boston, 1721), a letter in Latin which Mather had sent (in 1717) to the German Pietist Bartholomew Ziegenbalg (1683–1719), who had translated the scriptures into Tamil and served as a missionary in the Danish settlement of Tranquebar (SE India). K. Silverman has examined Mather's foreign correspondence and other missives in *Selected Letters*.

library and that of Harvard furnished him with up-to-date publications. More significantly, Mather incorporated in his "American" commentary specifically American subjects, which he later gathered in his "Curiosa Americana," his scientific communications with the Royal Society of London, some of which were published (in excerpts) in the Society's *Proceedings*. In "Biblia Americana" Mather brings to bear on biblical exegesis his knowledge of Native American religious practices and beliefs, their origin, methods of time-keeping, Indian creation stories and accounts of the Flood, and Indian medicine; American flora and fauna, ornithology (esp. the Passenger Pigeons) and entomology; rattlesnakes, earthquakes, and volcanoes; and his collection of American fossils, experimental observations about plant hybridization, and thoughts on African slavery. Significantly, Mather rejected the age-old belief in Noah's curse of Ham as the cause of his dark-skinned African descendents. Instead, he embraced a theory of skin pigmentation and climatic influences as the origin of the different skin colors of mankind (*BA* 1:672, 674–75, 698–99; *BA* 2, Exod. 21:16).¹¹⁷ If this enlightened view suggests that he was well ahead of his time, then Mather's opposition to the slave trade and to the crime of "man stealing" deserves equal credit. In short, Cotton Mather's "Biblia Americana" is a unique record of scholarship in the English colonies which is only now becoming available to a community wider than that of academics with access to microfilms or to the holograph manuscript at the Massachusetts Historical Society.

117 See J. Stievermann, "Genealogy of Races."

Section 2

“Biblia Americana” in the Context of Early Enlightenment Science: How to Go to Heaven, or How Heaven Goes?

Cotton Mather, Puritan New England’s eminent theologian, historian, and virtuoso of natural philosophy, took a leading role in introducing what is now called the new science to colonial North America. Mather, historians have established, not only popularized Newtonian science from his Boston pulpit but also embraced much of the early Enlightenment scholarship of the day.¹ Of a decidedly empirical bent, he studied the works of his European peers, supplied the Royal Society of London with his own American offerings (his “Curiosa Americana”), and hailed scientific affirmations that traced God’s providential hand in the physical universe.² In his much admired *The Christian Philosopher*, published for the Royal Society of London (1720/21), he set out to establish “that *Philosophy* [i.e., natural science] is no *Enemy*, but a mighty and wondrous *Incentive to Religion*” and “that PHILOSOPHICAL RELIGION” exhibits “a most sensible *Character*, and victorious *Evidence of a reasonable Service*.” Let us be thankful, for “Behold, a *Religion*, which will be found *without Controversy*; a

1 Among the most important discussions are G. L. Kittredge, “Scientific Communications”; T. Hornberger, “The Date, the Source,” “Cotton Mather’s Annotations,” “Notes,” and “Samuel Lee” (esp. 352–53); P. Miller, *New England Mind* (1953); O. T. Beall and R. H. Shryock, *Cotton Mather* (1954); R. P. Stearns, *Science* (150–61, 403–26); G. W. Jones, “Introduction,” *Cotton Mather: The Angel of Bethesda* (xii–xl); P. Vartanian, “Cotton Mather”; J. Jeske, “Cotton Mather: Physico-Theologian”; W. U. Solberg, “Science and Religion in Early America” and “Introduction” to *The Christian Philosopher* (xix–cxxxiv); M. P. Winship, *Seers of God* (1996); and, of course, the assessments of Mather’s interest in natural science by R. Middlekauff, *The Mather* (1971) 279–304; D. Levin, *Cotton Mather* (91–94); and K. Silverman, *The Life and Times* (243–54, 405–10).

2 Of the several collections of “Curiosa Americana” that Mather sent to London, only a small handful were abstracted in the *Philosophical Transactions of the Royal Society*. Mather’s First Series (1712), synopsis in “An Extract of several Letters from Cotton Mather” (62–71), include his description of giant bones found at Claverack, his disquisition on the “*Shittim Wood*” used for Noah’s Ark, Indian medicines, on American turkeys and Passenger Pigeons, on the psychosomatic power of the imagination, monstrous births, miraculous cures, Indian calendars, rainbows and parhelia, earthquakes, hurricanes, hieroglyphics, and many other curiosa that he ultimately incorporated into his “Biblia Americana.” The value of Mather’s “Curiosa Americana” is assessed by Beall and Shryock (42–50), Stearns (405–25), and Silverman (*Life and Times* 244–49).

Religion, which will challenge all possible Regards from the *High*, as well as the *Low*, among the People." God be praised for "a PHILOSOPHICAL RELIGION: And yet how *Evangelical*!" (7, 9).³

Mather's words of wonder convinced Raymond Phineas Stearns to conclude that in colonial New England, "there was no conflict between science and religion, nor were there any controversies of this nature either in colonial America or in the homeland."⁴ Likewise, in his superb edition of *The Christian Philosopher*, Winton U. Solberg asserts that "Mather always saw harmony rather than conflict between science and religion" (xxxiii). Mather's *Christian Philosopher* has thus become the hallmark of a widely accepted concord between faith and fact in early America. Such a consensus is not surprising, for Mather self-consciously sought to emulate natural theology's design argument as expressed in the works of Robert Boyle, John Ray, John Harris, George Cheyne, and William Derham – all of which Mather mined and copied into his American text. In fact, these five authors alone account for nearly fifty percent of Mather's *Christian Philosopher*.⁵ Invariably, their voluntarist belief in nature's divine order imposed by an all-wise God who can rescind nature's laws at will shapes the writers' selection of evidence as much as it colors the logic of their inferences. There is simply no room for blind chance in the Great Chain of Being, no species to which God had not assigned its particular place and purpose, no survival of the fittest or extinction, no natural catastrophe that God had not ordained at the beginning of time to accomplish His eternal plan. No wonder, then, the circular reasoning driving their teleology precluded any conflict between science and faith.⁶

But Mather's celebration of natural theology, however emphatic in the works he intended for public consumption, is much less certain and forthcoming in the unexpurgated record of his evolving thought. His massive commentary on the Bible, "Biblia Americana," thus becomes the litmus test for determining the degree to which Mather was committed to reinterpreting scripture in the light of early Enlightenment science. Otho T. Beall and Richard H. Shryock are not altogether off the mark when they suggest that "in the 'Biblia [Americana]' Mather had examined the Scriptures in terms of science, whereas

3 All page references to this work are to the Solberg edition. Hornberg's article "The Date of Mather's Interest in Science" (413–20) proves that that interest was not confined to the minister's old age.

4 Stearns (160) comes to the same conclusion as Perry Miller does in his *New England Mind* (437–38).

5 In his "Recapitulation of Mather's Sources," Solberg tabulates the number of lines Mather culls from his principal sources (*Christian Philosopher* 465).

6 R. Westfall details the pitfalls of circular reasoning among the physico-theologians of the day in his *Science and Religion* (49–69). T. Hornberger, in *Scientific Thought* (82); R. Middlekauff (*Mathers* 284); and more recently M. P. Winship, in "Prodigies" (93n, 105), are distrustful of this display of surface harmony in early Enlightenment America.

in *The Christian Philosopher* he reversed this by surveying science from a religious perspective” (*American Medicine* 50). If the theologian in Mather is at odds with Mather the natural philosopher, if his belief in God’s capacity to suspend nature’s laws clashes with the Cartesian view that these laws and matter operate autonomously, then the most productive way to examine those contradictions, I would suggest, is to turn to those passages in his exegetical commentary in which Mather was at greatest pains to collate Scripture and Nature into one seamless volume. In “*Biblia Americana*,” as he weighed in on a number of hotly contested issues of his day – the creation story, Noah’s flood, and such miraculous events as the confusion of tongues at Babel, the ten plagues of Egypt, the parting of the Red Sea, and Joshua’s arrest of the sun – Mather wavered between public affirmations and personal misgivings. After all, it is one thing to welcome the breath-taking discoveries of the age, yet quite another to reconcile them with the traditional interpretations that are directly affected by these breakthroughs.

Science and the Six Days of Creation

Mather’s commentary on the Book of Genesis alone consists of nearly 430 folio pages, arranged in double columns. Its bulkiness is not really surprising; the early Enlightenment’s revolutionary discoveries posed significant challenges to theologians and believers of all stripes who sought to harmonize the old with the new. In his commentary on the Mosaic creation account (Hexaemeron), Mather draws on a vast variety of ancient and modern sources and cites creation myths from Chaldea, Egypt, Greece, and Rome in the same space as typological and mystical readings from the Talmud, Targums, the early Church Fathers, and Renaissance and Reformation commentators. He incorporates up-to-date pre-Newtonian and Newtonian explanations from such contemporaries as Lord Chief Justice Sir Matthew Hale; from conservative and Latitudinarian divines such as Robert Fleming, Pierre Jurieu, and Thomas Pyle; and from physico-theologians and natural philosophers such as Robert Hooke, Edmund Dickinson, Nehemiah Grew, Richard Bentley, William Whiston, and Sir Isaac Newton. Over a period of more than thirty years, Mather gathered serviceable excerpts from their writings, but he seemingly had no intent to order the selections by chronology or significance. The sequential arrangement of Mather’s source material should therefore not be read as his endorsement of one account above another but as his delight in the richness of the Mosaic Hexaemeron and in the multiplicity of explanations it called for.

Unfortunately, dating his various entries is fraught with difficulty. Identifying the publication dates for his countless sources is easy enough, but they only allow one to approximate the relative date for each entry in the bound manuscript volumes. Mather initially numbered each new entry in sequential order.

Yet he was forced to abandon this counting method long before he had filled his six volumes. Renumbering thousands of entries was therefore an inefficient and never-ending process.⁷ Only in rare cases did Mather juxtapose old with new entry, for he intended a state-of-the-art commentary that would rival those of his English peers. Nonetheless, Mather's evolving intellectual position can be gauged from his frequent asides and his dissatisfaction with those neoteric philosophers who, in his opinion, crossed the line.

Mather's scientific explanations excerpted in his "Biblia Americana" demarcate the periphery of legitimacy he allows his commentators to probe from the center of conventional interpretations. The range of authors he included is as revealing as his critique of their theories, for the spectrum of views he considered suggests the degree to which he was willing to allow biblical authority to be questioned as he explored early Enlightenment science in the work he thought the crowning achievement of his life. In treating the Mosaic Hexaemeron – in more than seventy folio pages in double columns (BA 1:302–476) – Mather sampled ancient cosmogonies, early Enlightenment science, and philological and textual disputes about the authorship of the Pentateuch.⁸ During his lifetime, the biblical creation story was experiencing unprecedented challenges, with Peripatetics pitting their theory of the eternity of the universe against those of conservative physico-theologians who insisted that God had created the universe out of nothing, with Copernican heliocentrism replacing the ancient Ptolemaic geocentric cosmogonies, and with Cartesian mechanism and the immutable laws of nature contesting the venerable miracles and providentialist views of conventional literalists. The sudden explosion of knowledge and the formation of new fields of inquiry – physics, chemistry, botany, geology – disrupted the usual progress of biblical exegesis and demanded the attention of the brightest and the best.⁹

Mather's first extract concerning the Creation (BA 1:303–06), written in a hand different from that of the remainder of his holograph manuscript, is from Thomas Pyle (1674-c. 1756), an Anglican clergyman and prebendary of Salisbury, whose two-volume *Paraphrase with Short and Useful Notes on the Books of the Old Testament* (London, 1717) was accessible to Mather at the Harvard College library.¹⁰ In his preface, Pyle announces, "*I have had all just Regard to those Modern Discoveries, and vast Improvements in Philosophical Knowledge ... yet*

7 See my discussion of this issue in Section 1.

8 Mather does not paginate his "Biblia Americana" holograph manuscript; all recto and verso paginations refer to those permanently established in the present edition.

have I endeavoured so to express every Circumstance, as not (directly and explicitly) to clash with any one particular Hypothesis or Opinion."¹¹ Pyle's distinctly Newtonian bent never seriously compromises conservative exegesis of the Mosaic creation story, and his determination to keep the Battle of the Books out of his commentary appeals to Mather. With Pyle at his elbow, Mather predictably rejects the ancient Peripatetic heresy of a universe that was not created by God but had always been in existence; frowns upon such Necessitarians as Thales and Cicero who, while conceding that an Efficient Cause had formed the universe, asserted that its matter was preexisting and eternal; and decries the modern Cartesian disciples of Democritus and Epicurus, who insisted that an infinite number of imperishable atoms coalesced through blind chance or immanent mechanical laws to form countless worlds in a vacuum of immeasurable proportion. Mather quotes Pyle's disclaimer:

The World did not exist from all Eternity, by Necessity of Nature, nor did it, or any Part of it, come into being by chance and Fortune, but all things whatever, whether Visible or Invisible, Material, or Immaterial were in the beginning created, by the Power of that infinitely Wise, Good, and Alsufficient being whom we call GOD. (BA 1:303)¹²

Adding no commentary of his own, Mather allows Pyle's voluntarist cosmogony to uphold the flag and staff for conformist theologians. The harmony between science and religion so carefully controlled in Pyle's excerpt foreshadows much of what Mather would later do in his *Christian Philosopher*.¹³

11 Pyle, *Paraphrase* (1:A6v). Pyle situates his commentary between the radical scholarship of the French Oratorian Richard Simon (1638–1712) and the Dutch Arminian theologian Jean LeClerc (1657–1736) on the one hand and, on the other, the conservative commentaries of the celebrated Nonconformist Henry Ainsworth (c. 1571–1622), of the Bishop of Ely Simon Patrick (1625–1707), of the Lord Bishop of Bath and Wells Richard Kidder (1633–1703), and of Presbyterian minister Matthew Henry (1662–1714). In his *Histoire critique du Vieux Testament* (1678), Richard Simon denied the Mosaic authorship of the Pentateuch and postulated that groups of public writers periodically recast and updated much of the OT to accommodate their specific historical exigencies. Likewise, in his anonymous *Sentimens de quelques Théologiens* (1685), appearing in a partial English translation as *Five Letters* (1690); and in his *Genesis* (1693), translated as *Twelve Dissertations* (1696), LeClerc questioned the verbatim inspiration of the prophets and argued that Moses authored only parts of the Pentateuch. For detail, see section 3 of this introduction.

12 Pyle, *Paraphrase* (1:2). Years later, Mather refutes Aristotle's argument about the eternity of the universe with a counterargument from George Cheyne's *Philosophical Principles* (1705) 95–98: "That the Quantity of *Light* and *Heat* in the *Sun* is daily decreasing. It is perpetually emitting Millions of *Rays*, which do not return into it. ... 'Tis true, the Decrease of the *Sun* is very inconsiderable. It shews that the Particles of *Light* are extremely small, since the *Sun* for so many Ages has been constantly emitting Oceans of *Rays*, without any very sensible Diminution. However, 'tis from hence evident, that the *Sun* had a Beginning; it could not have been from *Eternity*; *Eternity* must have wasted it: It had long ere now been reduced unto less than the *Light of a Candle*" (*Christian Philosopher* 40).

13 See Mather's *Christian Philosopher* (18–42, 89–95).

With the old familiar story of the Creation thus firmly in place, Mather felt reassured to tackle the controversial *New Theory of the Earth, From its Original, to the Consummation of all Things* (London, 1696), by Anglican polymath William Whiston, Isaac Newton's fellow Arian and successor to the Lucasian Chair of Mathematics at Cambridge. Whiston's *New Theory* – like the avalanche of refutations that followed in its wake – was spawned by Thomas Burnet's popular *Telluris Theoria Sacra* (1681) and its later incarnation in English, *The Sacred Theory of the Earth* (London, 1691).¹⁴ Mather had repeatedly mocked Burnet's thesis that the earth's surface was, in their day, the mere ruins of the antediluvian crust that had collapsed in upon vast subterranean caverns filled with the ocean's waters.¹⁵ If this “Burnettian Romance” could be drowned in ridicule, Whiston's *New Theory* was not so easily dismissed: “Learned Men of late used several *Essayes*, all not with *equal Success*, to rescue the Inspired Writings of *Moses*, from the *Hardships* that have been put upon them,” Mather guardedly prefaces Whiston's abstract. “You must not expect, that I declare myself, how far *I* concur, with every Point, that shall bee offered. And I will also leave *you*, to the same Liberty that I take *myself*” (BA 1:337–38). Mather's half-hearted disclaimer and hedged praise for Whiston's *New Theory*, however, barely conceal the dilemma of New England's foremost virtuoso: his interest in the new natural sciences conflicts with the received exegesis of the Mosaic Hexaemeron.

Whiston had postulated that the great Chaos of the First Day, as described by Moses (Gen. 1:1–5), refers to the creation of our sublunary earth alone; the foundation of the universe, Whiston argued, was the product of an antecedent event, one not covered by Moses. In pondering the possibilities, Mather finds some logic in Whiston's position. How could the celestial bodies proceeding from a single center traverse such “Immense Distances” as to arrive at their “vastly *Remote Seats*” in outer space in so short a time as “a *few Hours*” of the First Day, he asks as he critiques the standard creation story, especially if the centripetal force of universal gravitation (Newton's Second Law of Motion) pulls all moving bodies toward “the common Center of *Gravity*”? Even if a thousand years were allowed for each of the six days of Creation, the magnetic property of matter would countermand the velocity of bodies wafting across space. Mather muses,

Now, if instead of the, *Vis Centripeta*, a *Vis Centrifuga*; instead of *Mutual Attraction*, a *Mutual Repulsion* or *Avoidance* were found to bee [a neat summary of our era's big-bang theory], the standing unchang'd Law of *Nature*, and Property of *Matter*,

¹⁴ See K. Collier, *Cosmogonies* (68–91), and M. H. Nicholson, *Mountain Gloom* (184–270). By 1755, Whiston's *New Theory* had gone through at least six editions, with Burnet's *Sacred Theory* through at least seven by 1759. James E. Force argues that “By 1700,” Burnet's *Theory* “had stimulated thirty replies,” in *William Whiston* (35).

¹⁵ See my *Threefold Paradise* (94) and Mather's commentary on Noah's Flood (Gen. 8:19), in BA 1:662–63.

this might have look'd like possible. But, when the contrary Force of *Gravitation* obtains, and that, as far as wee have any Means of knowing, *Universally*, there is now no *Room* for such an Imagination. ... In fine, This Fancy, that the *Heavenly Bodies* proceeded originally from the *Terrestrial Chaos*, and cast themselves off from it every Way, supposes the *Earth* to bee the *Center* of the World, or of all that *System* of Bodies, and them to bee placed in a kind of Circumference every Way about it. But this *Prolemaic* System of the World, must not hope, at this Time of Day, to bee entertained with considerate Men. (*BA* 1:342, 343).¹⁶

Suddenly, the tidy arrangement of the Mosaic Hexaemeron, no doubt pleasing in its poetic simplicity, seemed strangely outmoded and inadequate when examined within the context of the new theories. Though sacrosanct among the faithful for millennia, the old Mosaic order strained the credulity of physico-theologians like Mather as they wrestled with the problem of squaring religion and science according to one common denominator.

In the early Enlightenment, then, the hoary model of the cosmos began to lose force as the new science developed alternative concepts of space and time, hitherto the purview of theology. Mather grappled with the implications of Whiston's *New Theory*: To allot to Almighty God the "disproportionate" five out of six days to create the earth alone, yet "crouding into *One single Day*" the formation of our sun, moon, stars, and the rest of the vast cosmos – this disorderly arrangement is not only against reason but also disrespectful of God's sublime wisdom, he reasoned. If anyone were to propose such a flawed cosmogony, it would "bee look'd on as Marks of *Unskilfulness, Foolishness, & Imprudence*, in parallel Cases; & for which *Meer Men*, could not escape the most severe and Indecorous Imputations" (*BA* 1:344).¹⁷ If the lopsided allocation of activities during the first five days of Creation failed to prompt discerning minds to question the perfection of the Grand Scheme, Mather went on, then God's labors recorded for the sixth day, plainly "too Numerous for so short a Space," should certainly do

¹⁶ Whiston, *New Theory* (pt. 1, sec 4, pp. 37, 38); See also Mather's *Christian Philosopher* (89–90). On 23 December 1714, Judge Samuel Sewall recorded the following comment in his diary: "Dr. C. Mather preaches excellently from Ps. 37. Trust in the Lord &c. only spake of the Sun being in the centre of our System. I think it inconvenient to assert such Problems" (*Diary* 2:779); I wish to thank Kenneth P. Minkema for drawing my attention to Sewall's remarks. Whether Sewall persuaded his old friend Cotton Mather to abandon his acknowledgment of Copernicus' heliocentrism is not known, but the published version of Mather's Thursday lecture, *Pascentius* (1714), omits all references to the topic. Sewall's disapproving remark illustrates that Copernicus was not universally embraced in New England, even among the educated elite. Grant McColley (153–89) traces the conquest of Copernican heliocentrism in Britain from the late Renaissance to the end of the seventeenth century; Dorothy Stimson's still useful *Gradual Acceptance of the Copernican Theory* (85–106) does so for continental Europe; and Donald Fleming's "Judgment upon Copernicus" (2:160–75) does so for New England. Fleming's article especially demonstrates that although Copernican heliocentrism was readily discussed in almanacs and at Harvard in the last three decades of the seventeenth century, Copernicus and Kepler did not triumph over Ptolemy's geocentrism until the early eighteenth century.

¹⁷ Whiston, *New Theory* (pt. 1, sec. 5, p. 45).

so. In that brief period, God had supposedly fashioned earth's animals, including Adam; given Adam's latitude to exercise his dominion over other animals by naming each species by virtue of its nature; dropped Adam into a "*Deep Sleep*" (which must have lasted "more than a *Few Minutes*") during which God shaped the protoplast's rib into Eve and healed the wound, then giving the pair time enough to "know" each other, identify their food, and learn God's Law; and, finally, permitted the arch marplot of Eden to wriggle himself into the couple's confidence and precipitate their Fall and expulsion – all in a single day of twenty-four hours, according to "the vulgar *Hypothesis*" of things! (*BA* 1:347, 343).¹⁸

"Now, tho' *God* Almighty can do all things in what Portions of *Time* Hee pleases," Mather readily concedes, "*Man* cannot. Hee must have *Time* allow'd him, in Proportion to the *Business*, that is to bee done. But behold here, Business enough allotted into the *Sixth Day*, to require no small Part of a *Year*, for the Dispatch of it!" (*BA* 1:347).¹⁹ Even if Adam were created in a state of maturity and with full knowledge and understanding of his assigned tasks, their sheer number would encompass a lifetime, not a day.²⁰ How, then, can a rational solution be devised if God's creation is constrained by his own physical laws? "It is an Indecent Thing to Recurr unto *Pure Miracle*, for the *Acceleration* of them, into the Space of *Twenty Four Hours*," Mather affirms with reference to Whiston, violates "the Lawes of *Motion*, [which] were now already Stated and Fixed in the World" (*BA* 1:347).²¹ In this Cartesian vortex, no elbow room seems left for God's special providence to arbitrate between inherent necessity and temporal exigency.

If Mather's digest of Whiston's *New Theory* is correct, Whiston did not wholly subscribe to Newton's theological voluntarism, which held that the Creator may contravene the course of nature at any time (though he rarely does).²² Although Whiston does not yet confine the omnipotent God or his

¹⁸ Whiston, *New Theory* (pt. 2, bk. 2, ch. 3, pp. 88, 89, 90).

¹⁹ Whiston, *New Theory* (pt. 2, bk. 2, ch. 3, p. 90). This rationalist explication was not original to Mather (or Whiston, his source) either. For Simon Patrick, bishop of Ely, in his introductory commentary on Gen. 3, raised the same issue: "All which could not be performed so speedily as some have imagined: for tho God can do as he pleases in an instant, yet man cannot; and God did not in one Day create the World. And, besides that some time was necessary for the transacting all these things; it is not likely the Devil would immediately set upon *Eve*, as soon as the Command was laid upon them; but rather let it be a little forgotten. And if the time be observed when he assaulted her, it will much confirm this Opinion, which was in the absence of her Husband; for that we cannot easily believe to have been upon the same Day they were created," in *Commentary upon the First Book of Moses, called Genesis* (London, 1695) 59.

²⁰ Whiston, *New Theory* (pt. 2, bk. 4, ch. 1, pp. 227–28).

²¹ Whiston, *New Theory* (pt. 2, bk. 2, ch. 3, pp. 89, 90).

²² In his classic *Adventures of Ideas* (140–59), A. N. Whitehead describes two contrasting views of nature's laws as they obtained in much of the seventeenth and eighteenth centuries: (1) *Theological voluntarism* is the metaphysical idea that an omnipotent God endowed matter and nature with principles of motion that are passive and therefore completely dependent on God's volition; that since the properties of matter (atoms) are extension, impenetrability, and

immutable will to the immanent laws of nature, as Descartes had been wont to do, the protoplast – the crown of God's creation – is ostensibly subject to the limitations of his humanity. Whiston's reasoning thus implies that matter or atoms (though indivisible and having extension) are *not* inert substances, as Isaac Newton insisted they were, but are instead endowed with active, self-sufficient principles (energy) that are inherent in nature and governed by mechanical laws whose sole constraint is that of their own constitution.²³ Immutable and mutually interdependent, these laws comprise reality to the seeming exclusion of any interference by an external agency that might suspend their integrity. Mather's illustration about God's omnipotence and Adam's impotence therefore identifies a fissure in the texture of Newtonianism, which in the works of such Enlightenment philosophers as Blount, Toland, Leibniz, Hume, Reid, Priestley, and Hutton widened into an unbridgeable gap.²⁴

The Abyss of Time and the Limits of Newtonianism

Quaint yet faintly modern as Whiston's conjecture may appear from the safe distance of hindsight, it caused havoc among theologians of all persuasions, for in it they witnessed the Mosaic Hexaemeron crumble before their very eyes. Granted, Whiston was not the first physico-theologian to take issue with the

inertia, the motion of matter originates in God, the prime mover; that an active principle sustains motion and activity in nature by counteracting resistance; that this active principle is the source of gravity; finally, that the causes or laws of nature are therefore superimposed from the outside and are completely dependent on an omnipotent deity, who can abrogate or suspend these natural laws at will (miracles) to modify their course. (2) *Immanence* is the view that activity and motion are inherent principles in matter and nature, that all movement in nature is governed by autonomous laws that constitute the interdependence of all activity in nature; that these immanent laws are so embedded in the structure of nature that they cannot be disrupted, that any disruption of the laws of nature (miracles) is impossible because it contradicts the principles of reason, order, and perfection – the attributes of God. Essentially voluntaristic, Newtonianism gave way in the eighteenth century to the view of immanent activity in nature that was essentially mechanistic, which is to say Cartesian. For according to René Descartes, the laws of nature were decreed by God and are – like his volition – immutable and universally efficient. That is why miracles contradicted God's immutable will – unless (perhaps) they were embedded in God's grand scheme from the beginning. Helpful analyses of these Enlightenment transformations appear in F. Oakley's "Christian Theology and the Newtonian Science" (433–57), J. E. McGuire's "Neoplatonism" (95–133), H. Guerlac's "Theological Voluntarism" (219–28), P. M. Heimann's "Voluntarism and Immanence" (271–83), and in E. B. Davis' "God, Man and Nature" (325–48).

²³ See n. 32.

²⁴ See J. D. Collins' *Descartes' Philosophy* (48–52), E. B. Davis ("God, Man" 332–34), and Heimann ("Voluntarism" 275–83). I agree with Force (*Whiston* 32–53), that Whiston's broadly defined principles of biblical exegesis are Newtonian in spirit; however, I argue that Whiston frequently bends or disregards his avowed principles to facilitate his own views of natural theology.

Bible's uneven distribution of activity during the six creative days, even if those days were (as they were for him) each a thousand years long. Many of the ancient and medieval Church Fathers and Protestant Reformers disputed the issue as well. They posited either an instantaneous creation or a creation occurring over six literal days. Among those who insisted on an instantaneous creation are Philo Judaeus (*De opificio mundi* 3.13–14), Origen (*Contra Celsum* 6.60–61), St. Athanasius (*Orationes tres contra Arianos* 2.19.48–49), St. Hilary (*De Trinitate* 12.40), and St. Thomas Aquinas (*Summa Theologica* 1:355–57, Q 74, A 1–2).²⁵

The views of St. Augustine (354–430), bishop of Hippo, seem to have been unsettled during his lifetime. For instance, in *De genesi contra Manichaeos* (1.10.16; 1.14.20–21), he appears to uphold a creation of six literal days (of twenty-four hours each), but in *De Genesi ad litteram* (4.33.52; 4.34.54; 5.3.6; 5.17.35) and in *Liber imperfectus de genesi ad litteram* (7.28; 9.31), referencing the apocryphal Sirach 18:1, he affirms a simultaneous creation of all things at once. “Creation,” Augustine explained in *The Literal Meaning of Genesis*, “did not take place slowly in order that a slow development be implanted in those things that are slow by nature; nor were the ages established at the plodding pace at which they now pass. Time brings about the development of these creatures according to the laws of their numbers, but there was no passage of time when they received these laws at creation” (4.33.52, 141–42). Besides, since all natural processes – germinating seeds, cultivating roots, hatching eggs, growing feathers, learning to fly – take considerably longer than a single day and are dependent each on the other, the hexaemeral division must be seen as merely a didactic structuring device: “Thus we might say that the creation of things took place all at once and also that there was a ‘before’ and ‘after,’ but it is more readily understood as happening all at once than in sequence” (4.34.54, 143). If St. Augustine’s muddled explication did not encourage one unified theory in the Christian Church, another, earlier variant seemed to have resolved the matter for many latter-day theologians. Perhaps drawing on the Talmudic tradition of Elias the Prophet, St. Irenaeus (c. 130–200), ancient bishop of Lyon, insists that the world was made in six days and will terminate (according to Ps. 90:4 and 2 Pet. 3:8) in as many thousand years (*Adversus haereses* 5.28.3). The latter supposition seemed particularly persuasive, for it not only confirmed the tradition of the Prophet Elias but also clearly circumscribed the time limit God had set for man’s history on earth from Creation to Judgment Day.²⁶

²⁵ The reference to the Alexandrian exegete Philo Judaeus (c. 20 BCE–c. 50 CE) appears in *Works of Philo* (4); the respective references to the Alexandrian Church Father Origen (c. 185–c. 254) appear in *Ante-Nicene Fathers* (4:600–01), hereafter *ANF*; and in J. P. Migne, *Patrologia Graecae* [PG 012]; to the bishop of Alexandria St. Athanasius (c. 296–373), in *Nicene and Post-Nicene Fathers* (4:374–75), hereafter *NPNFii*; to St. Hilary of Poitiers (c. 315–67), in *NPNFii* (9:228); and to St. Thomas Aquinas (c. 1225–74), in *Summa Theologica* (1:355–57).

²⁶ St. Augustine, *De Genesi contra Manichaeos* (*Fathers of the Church* [hereafter *FOC*] 84:45–141); *De Genesi ad litteram* [PL 34]. *The Literal Meaning of Genesis* (41:141–42, 143);

Controversy about the true nature of the Hexaemeron flared up periodically, notably during the Reformation. Perhaps to control excessive individualism among those now guided by faith alone, Protestant Reformers were given to greater literal-mindedness than St. Augustine. They insisted that God created the universe in six literal days. Martin Luther, in *Lectures on Genesis* (Gen. 1:27), avowed "six natural days," which his Swiss colleague John Calvin (*Institutes* 1.14.2, 22) confirmed, adding, "it would have been no more difficult for him [God] to have completed in one moment the whole work together in all its details than to arrive at its completion gradually by a progression of this sort." Calvin clearly wanted to have it both ways, for in his *Commentary on Genesis* (Gen. 1:5, 2:3), he called out the "error of those ... who maintain that the world was made in a moment" yet reminding himself that to God "one moment is as a thousand years." Speaking for the Reformed of Puritan New England, *The Westminster Confession of Faith* (1646) and its successor *The Savoy Declaration* (1658), opted for "the space of six days," presumably intending a literal period of twenty-four hours each.²⁷

In Mather's generation, even the great Sir Isaac Newton (1642–1727) struggled with the problem of creation chronometry. In an extant fragment dating back to 24 December 1680, he debated this issue with Thomas Burnet, his old friend in Cambridge, just months before Burnet published his divisive *Telluris Theoria Sacra* (1681). Though Mather had no way of knowing, Newton wrote to Burnet that the six days of creation were not each merely twenty-four hours in duration but considerably longer because the earth's diurnal revolution at that time could "have been very slow, soe yt ye first 6 revolutions or days might containe time enough for ye whole Creation."²⁸ Burnet had penetrated the underlying logic of his friend's self-serving argument but pretended to be puzzled by Newton's intriguing solution – introducing shifting concepts of time before time began. In his letter of 13 January 1680/81, Burnet rejoined, "I infer

Liber imperfectus de genesi ad litteram [PL 034], *On the Literal Interpretation of Genesis* (FOC 84:143–88). For St. Irenaeus (*Adversus haereses* 5.28.3), in *ANF* 1:557. For the Talmudic tradition of Elias the Prophet and its many proponents, see (Soncino) Babylonian Talmud, Sanhedrin 97a, Avodah Zarah 9a, and Rosh HaShana 31a. According to this ancient tradition, here expounded by Tanna debe Eliyyahu [Elias], "The world is to exist six thousand years. In the first two thousand there was desolation, two thousand years the Torah flourished, and the next two thousand years is the Messianic era." How widespread this belief had become in Mather's time can be seen in Archbishop James Ussher's famous *Annales Veteris Testamenti* (1). According to Ussher's calculations, God created the world on the night preceding Sunday "Octob. 23." 4004 (BCE) before the birth of Christ. Ussher's chronology was incorporated into most editions of the *King James Version* at least until the late nineteenth century. For Mather's six-thousand-year timetable, see my *Threefold Paradise* (60–78, 319–47).

27 Martin Luther, *Lectures on Genesis* (ch. 1, on Gen. 1:27), in *Luther's Works* (1:5, 69). For John Calvin, *Institutes of the Christian Religion* (1:161, 182); for *Commentary on Genesis*, see *Calvin's Commentaries* (1:78, 105). For *The Westminster Confession of Faith* and *The Savoy Declaration* (ch. 4), see W. Walker (*Creeds* 372).

28 Newton to Burnet, 24 December 1690, letter 244, in Newton (*Correspondence* 2:319, 322).

from this, yt as ye distinction of 6 dayes is noe physical reality soe neither is this draught of the creation [Moses' Hexaemeron] physical but Ideal, or if you will, morall. Seeing it is not physically true yt ye Sun Moon & Stars were made at yt time, viz. 5 or 6000 yeares since when ye Earth was form'd. And if it bee Ideal in one part, it may in some proportion bee ideal in every part."²⁹ Sir Isaac, Burnet was quick to underscore, had thereby allegorized the creation, thus snatching it out of the realm of scientific consideration.

Newton, however, could not concede that he had offered a wax-nosed interpretation. In responding to Burnet, he reclaimed his scientific credentials: "You may make ye first day as long as you please," he patiently explained, "& ye second day too if there was no diurnal motion till there was a terraqueous globe, that is till towards ye end of that days work. And then if you will suppose ye earth put in motion by an eaven force applied to it, & that ye first revolution was done in one of our years," the earth could have achieved 365 revolutions in "the 183d year." Despite his best attempts, however, Newton was clearly becoming mired in the quicksand of his own mechanistic conjecture and felt compelled to return to the safe ground of divine teleology. Natural causation alone could not sufficiently account for the earth's diurnal motion, he emphasized, for none but "God gave the earth it's [*sic*] motion by such degrees & at such times as was most suitable to ye creatures."³⁰ Paradoxically, by resorting to supernatural agency when the going got rough, Sir Isaac appears to be disavowing the Enlightenment cosmogony that dares to speak his name: Newtonianism, a concept that among his Deist disciples came to signify a rationalist and mechanistic universe devoid of miracles.³¹

Justifiably apprehensive of ecclesiastical backlash, Newton does not rush in where angels fear to tread. Deeply religious, he desperately clung to the Bible as God's revealed Word. But to resort to dogmatism was out of the question; to miracles, only in extraordinary cases. It was much easier for him to sacrifice the letter as long as the spirit of the Hexaemeron was preserved.³² Newton's response to Burnet's epistle is highly revealing and deserves to be quoted at length:

²⁹ Burnet to Newton, 13 January 1680/81, letter 246, in Newton (*Correspondence* 2:324). More than ten years after his correspondence with Newton, Burnet publicly recapitulated his objection to Newton in his *Archaeologiae Philosophicae* (1692) 277–329. Charles Blount was only too glad to oblige Burnet by translating into English those parts of Burnet's Latin work that were most serviceable to his Deist argument; see Blount's *The Oracles of Reason* (1693) 52–76.

³⁰ Newton to Burnet, January 1680/81, letter 247, in Newton (*Correspondence* 2:333–34).

³¹ In his article "Newton's Rejection of the 'Newtonian Worldview'" (3:89), Edward B. Davis perceptively argues that Sir Isaac's adherence to voluntarism and to miracles that "correct" the course of nature disqualifies him from being a "Newtonian" and relegates him to the status of a theist or precursor to the Enlightenment.

³² In his *Principia* (1686; 3rd ed. 1729), Newton asserts an omnipotent and omniscient God whose absolute freedom of will can contravene nature's laws at any moment (*Sir Isaac Newton's* 2:544–46). So, too, in his *Opticks* (1704; 4th ed. 1730), Newton outspokenly defends God's

As to Moses I do not think his description of ye creation either Philosophical or feigned, but that he described realities in a language artificially adapted to ye sense of ye vulgar. Thus where he speaks of two great lights [Gen. 1:16] I suppose he means their apparent, not real greatness. So when he tells us God placed those lights in ye firmament, he speaks I suppose of their apparent not of their real place. ... So when he tells us of two great lights & the stars made ye 4th day, I do not think their creation from beginning to end was done ye fourth day nor in any one day of ye creation nor that Moses mentions their creation as they were physcally bodies in themselves some of them greater then [*sic*] this earth & perhaps habitable worlds, but only as they were lights to this earth.³³

Newton thus ingeniously saves the day by distinguishing between the "real" (literal) creation outside time and ken of man, and its "apparent" (visible) manifestation as it might appear to an eyewitness on earth "if he had then lived & were now describing what he saw."³⁴ The formation of the two great lights spoken of in Gen. 1:16 therefore did *not* take place on the fourth day; instead, at that time, they simply became visible to the naked eye through the mist of the earth's hazy atmosphere. The Mosaic creation of the fourth day was thus no more than an optical illusion.

Newton's phenomenological solution thus amounts to a "middle way" between the grammatical and allegorical sense of Scripture, a didactic narrative of events that Moses adapted to the needs of the uneducated masses recently freed from Egyptian slavery. Newton explains,

Omit them he [Moses] could not without rendering his description of ye creation imperfect in ye judgment of ye vulgar. To describe them distinctly as they were in them selves would have made ye narration tedious & confused, amused ye vulgar & become a Philosopher more then a Prophet. He mentions them therefore only so far as ye vulgar had a notion of them, that is as they were phænomena in our firmament, & describes their making only so far & at such a time as they were made such phænomena."³⁵

Sir Isaac's strategy of accommodation, then, is at once philosophically plausible and theologically sound, yet it also discloses how he wrestled with angels to make the Mosaic Hexaemeron safe for the early Enlightenment's new science.

William Whiston sought his own way out of Newton's bind. He speculated that the earth had not set into its diurnal rotation until the conclusion of the

ability to "vary the Laws of Nature, and make Worlds of several sorts in several Parts of the Universe" (*Opticks*, bk. 3, part 1, Quest. 31, esp., p. 404). See also H. G. Alexander's *Leibniz-Clarke Correspondence* (xvi–xviii, 11–12, 17–19, 29–30, 42–43, 87–89). For discussions of Newton's theology, see F. E. Manuel, *Religion of Isaac Newton* (1974); Richard H. Popkin, "Newton as Bible Scholar" (103–18); E. B. Davis, "Rationalism" (3:135–54); and R. Smolinski, "Logic of Millennial Thought" (259–89).

35 Newton to Burnet, January 1680/81 (*Correspondence* 2:333).

sixth day: "That tho' the *Annual Motion* of the *Earth*, commenced at the Beginning of the *Mosaic Creation*; yett its *Diurnal Rotation* did not, until the *Fall* of Man" (BA 1:346). Whiston's scheme, then, does not begin the twenty-four-hour day until the end of the sixth day, and thus God had world enough and time to enact the foundation of the whole universe. Like Newton, Whiston lambastes the pious for allowing their blind zeal to outpace their reason. "Suppositions ten thousand times more disproportionate and unaccountable, when ascrib'd to God Almighty, are easily believ'd," he cautions. "So far can Ignorance, Prejudice, and a misunderstanding of the Sacred Volumes carry the Faith, nay, the Zeal of Men!" In sum, "The Vulgar Scheme of the *Mosaick Creation*, besides the disproportion as to time, represents all things from first to last so disorderly, confusedly, and unphilosophical, that 'tis intirely disagreeable to the Wisdom and Perfection of God."³⁶ Mather must have deemed such radical criticism grist for the mills of his Deist contemporaries, who championed purely mechanical laws, and therefore he silently passed over this part of Whiston's critique.

This, then, was the state of the debate in Mather's time when he synopsized Whiston in "Biblia Americana." A good deal of the discussion took place in private correspondence and among groups of adepts and did not emerge in the published treatises of the day; that is, until William Whiston, Newton's protégé and frequent confidant, stood exposed in the limelight of his *New Theory of the Earth*. No doubt, the Christian virtuoso in Mather felt attracted to Whiston's daring theory, even as his theological self felt alarmed and overwhelmed by the plethora of its dangerous implications. "As for a *Judgment* upon this Description of the *Creation*," Mather puns uneasily at the conclusion of his summary, "I will præsume to make *None*, at all; I leave it unto *Men of Judgment*." And yet, his better judgment as a Puritan theologian finally gains the upper hand as he pronounces his verdict: "The *Theories* of the *Creation*, (particularly what I last offered you), invented by our Modern Philosophers, do certainly make too bold with the *Mosaic*, and *Inspired History* thereof. It were a Noble, and a Worthy Work; to Illustrate that History, and rescue it from the præsumptuous Glosses, that many *Neotericks* have made upon it" (BA 1:357). Although Mather welcomes Whiston's theory insofar as it furnishes new methods of updating time-worn explanations, he cannot accept the end to which Whiston's logic finally carries him: the collapse of the Mosaic Hexaemeron as he knew it.³⁷

³⁶ Whiston, *New Theory* (pt. 2, bk. 2, ch. 3, pp. 79–104; pt. 1, sec. 5, pp. 56, 57; sec. 6, p. 64).

³⁷ Middlekauff (*The Mathers* 285–86, 298–304) aptly describes Mather's fascination with Whiston's *New Theory* but also shows how Mather's enthusiasm for "Reasonable Christianity" waned when he realized that the elevation of human reason was less productive of making disciples for Jesus Christ than for John Toland and his Deist disciples.

Atomism and Allegory in a Clockwork Universe

Two or three additional extracts in Mather's commentary on the first chapter of Genesis deserve brief mention; they bring to light how he tried to blunt the radical attacks on the Hexaemeron with more congenial assessments by likeminded physico-theologians. Richard Bentley's *A Confutation of Atheism From the Origin and Frame of the World* (London, 1693) is next in chronological appearance.³⁸ Mather condenses this Boylean lecture, delivered on December 5, 1692, into little more than seven tightly packed folio pages (*BA* 1:384–99). True to the spirit and intent of Robert Boyle's endowment, Bentley applies a design argument to a construct that could still arouse hostility among English and continental theologians, the Copernican universe.³⁹ According to Mather, Bentley's teleology had fully absorbed Sir Isaac Newton's voluntarist theory of the planets' gravitational rotation:

The concentric Revolutions of the Planets about the *Sun*, proceed from a *Compound Motion*; a *Gravitation* towards the *Sun*, which is a constant Energy infused into Matter, by the Author of all Things; and a Projected, Transverse Impulse, in *Tangents* to their several *Orbs*, that was also Imprinted at first by the Divine Arm upon them, & will carry them around, until the End of all Things. (*BA* 1:385)

For Newton and Bentley, as for Mather, God's invisible arm was most discernible in "the constant Property of *Gravitation*, That the *Weight* of all Bodies around the *Earth*, is ever proportional to the Quantity of their *Matter*." Newton's theory, Mather asserts, was now mathematically proven "beyond all Controversy," primarily because Newton did not enervate, but fortify Mather's teleology (*BA* 1:393). To Mather, Bentley's *Confutation* was perhaps the most valuable of the modern theses, for it reinterpreted Descartes' mechanistic principles of natural law in terms of gravitational properties inherent in matter (though Newton was loath to call it immanent) but explains this universal force in terms of active principles whose power to attract and repulse is necessarily sustained by God's volition, which upholds cosmic harmony through secondary causes.⁴⁰ Bentley did have it both ways.

That our planetary system could never have formed out of Chaos simply through blind chance or accidental concretions of atoms seems all too obvious to virtuosi of Mather's caste. Bentley's nautical trope, which Mather heaves on board of his "Biblia Americana," makes this supposition abundantly clear. Like

³⁸ Although Bentley's eight Boylean lectures were published separately (sermons 1–6, in 1692, and 7–8, in 1693), collected and revised editions appeared in 1699, 1724, and 1735.

³⁹ See G. McColey ("Ross-Wilkins" 153–89), D. Stimson (*Gradual Acceptance* 85–206), D. Fleming ("Judgment" 160–75); J. B. Rogers et al., *Authority and Interpretation of the Bible* (165–71); A. R. Hall, *From Galileo To Newton* (1963); A. D. White (*History* 1:134–209).

⁴⁰ For a helpful discussion of Newton's theist position on the properties of matter, see E. McMullin, *Newton on Matter and Activity* (1978).

widely dispersed atoms in limitless space, two ships placed at “opposite *Poles*” drift rudderless on the world’s oceans. How many “thousands of Years” would it take for these vessels to collide, for inert particles to coalesce? Besides, “the Atoms may not only fly side-ways, but over likewise, and under each other; which makes it many Million times more Improbable, that they should interfere, than the *Ships* in our Supposition ... so that the Concourse of our Atoms to produce a Regular World, is vainly expected, even in an endless Duration” (*BA* 1:397).⁴¹

Bentley’s Newtonian cosmogony, as digested by Mather, rests on divine volition, which directs and sustains a finely tuned system that could never have evolved by chance. Even if it had, Mather knowingly relates, the planets could never have attained their elliptic motion around the sun; even if they had, their orbit would have rapidly deteriorated if merely self-sustained.⁴² Contrary to what Ralph Cudworth and his fellow “Epicureans” opine about principles that are active and immanent in corporeal substances, “*Gravitation* is not Essential, and Inherent unto *Matter*.” For if gravity and “Reciprocal Attraction” were inherent properties, Mather continues, our planetary system could never have arisen, because the atoms dispersed the world over would have compacted into “one huge sphærical Mass, which would bee the only Body in the Universe” (*BA* 1:398).⁴³ Clearly, then, the old familiar story of an all-powerful God maintaining control at the center was infinitely more reasonable than the alternative, but now it could be retold in updated versions made fashionable in language acceptable to the Royal Society. Thus Mather took infinite satisfaction that “the Power of *Gravity* perpetually acting in the present Constitution of the System of the Universe, is an Invincible Argument for the Being of a *GOD*” (*BA* 1:398).⁴⁴

⁴¹ Bentley, *Confutation* (bk. 7, ch. 2, pp. 18, 22, 23).

⁴² In his *Christian Philosopher* (46), Mather cites William Molineux’s *Dioptrica Nova* (1709) 273, in affirmation that “*Chance*, or dull *Matter*, could never produce such an harmonious *Regularity* in the Motion of Bodies so vastly distant [as Jupiter is from the sun]: This shews a Design and Intention in the *First Mover*.”

⁴³ Bentley, *Confutation* (bk. 7, ch. 2, pp. 20, 21).

⁴⁴ Bentley, *Confutation* (bk. 7, ch. 2, pp. 29–31); Bentley himself relies on Newton’s “System of the World” (bk. 3) of *Principia Mathematica* (*Sir Isaac Newton’s* 2:397–626). The debate between the Newtonian voluntarists and Cartesian mechanists carried over into the eighteenth century and is the main focus of the famous Clarke-Leibniz correspondence, *A Collection of Papers* (1715). For instance, in his first letter (November 1715) to Caroline, Princess of Wales, the German philosopher Gottfried Wilhelm Leibniz charged the Newtonians with subverting the foundation of natural religion: “According to their doctrine, God Almighty wants to wind up his watch from time to time: otherwise it would cease to move. He [God] had not, it seems, sufficient foresight to make it a perpetual motion. Nay, the machine of God’s making, is so imperfect, according to these gentlemen; that he is obliged to clean it now and then by an extraordinary concourse, and even to mend it, as a clockmaker mends his work; who must consequently be so much the more unskilful a workman, as he is oftener obliged to mend his work and to set it right. ... [But] I hold, that when God works miracles, he does not do it in order to supply the wants of nature, but those of grace. Whoever thinks otherwise, must needs

But it is high time to move to Mather's next digest on the first chapter of Genesis. The oldest of his seventeenth-century cosmographies – though not the first – copied into Mather's folio manuscript is an excerpt from Lord Chief Justice Matthew Hale (1609–76), whose *The Primitive Origination of Mankind, considered and examined according to the Light of Nature* (London, 1677) supplied Mather with a witty allegory about the philosophical controversy of the time. A great artist hides an intricately designed clockwork mechanism that had been configured to show "the various Phases of the *Moon*, the motion & place of the Sun in the *Ecliptick*, and diverse other curious Indications of *Cœlestial Motions*" (BA 1:401). One by one, natural philosophers of various schools of thought come forward to theorize the origin of this marvelous automaton, the likes of which they had never seen before.

The Epicurean atomist predictably hypothesizes, "*That this was nothing but an accidental Concretion of Atoms, that happily fallen together, had made up the Index, the Wheels & the Ballance; and that being happily fallen into this Posture, they were put into Motion.*" A Cartesian, with his focus on vortices in motion, speaks next, charging his predecessor with having insufficiently accounted for the engine's self-propulsion: "*there is a certain Materia Subtilis,*" he insists, "*that pervades that Engine and the moveable Parts, consisting of certain globular Atoms apt for Motion; they are thereby, & by the Mobility of the globular Atoms put into Motion.*" The Stoic philosopher objects that the regular motions of the clockwork, which reflect the movement of time and of the celestial bodies "*was wrought by some admirable Conjunction of the Heavenly Bodies, which formed this Instrument and its Motions, in such an admirable Correspondency to its own Existence.*" The fourth, true to his Platonic philosophy, swears that "*the Universal Soul, or Spirit of Nature ... hath formed and set into Motion this Admirable Automaton, and regulated & ordered it with all these Congruities we see in it.*" Finally, an Aristotelian, who favors self-existence and eternity of the universe, dismisses the new-fangled theories of his fellow contestants as preconceived fancies: "*The Short of the Business is,*" he contends, "*this Machina is eternal, & so are all the Motions of it, & inasmuch as a Circular Motion hath no Beginning nor End, this Motion that you see both in the Wheels & Index, & the successive Indications of the Cœlestial Motions is eternal and without Beginning*" (BA 1:401).⁴⁵

When all is said and done, Mather's watchmaker comes forward, reveals to his skeptical philosophers the origin and intricate motions of his machine, and derides his "Philosophical *Enthusiasts*" for their "fancied Explications, & unintelligible *Hypotheses*." Sounding faintly like a seventeenth-century Deist, Mather's clockwork mechanist turned theist has the last laugh: He celebrates

have a very mean notion of the wisdom and power of God" (H. G. Alexander, *Leibniz-Clarke Correspondence* (11–12). Mather admired Leibniz as "*One of the greatest Wits of Europe*" (BA 1:596).

45 Matthew Hale, *Primitive Origination of Mankind* (bk. 4, ch. 6, pp. 340–42).

the congruity and reasonableness of the Mosaic narrative, which “renders all the Essays of the Generality of Heathen Philosophers to be vain, inevident, & indeed inexplicable Theories, the Creatures of Fancy & Imagination, & nothing else” (*BA* 1:402).⁴⁶ This popular story encapsulates for Mather the theoretical confusion of contemporary skeptics who are not satisfied with the literal and grammatical sense of Genesis 1. More significantly, the story discloses Mather’s conservative position, for when natural philosophy conflicts with theology and tradition, he clearly privileges divinity, the crown of all disciplines. But the final verdict is not in yet.

John Edwards’ three-volume *Discourse concerning the Authority, Stile, and Perfection of the Old and New Testament* (London, 1693–95), Nehemiah Grew’s *Cosmologia Sacra* (London, 1701), Edmund Dickinson’s atomist *Physica Vetus & Vera* (London, 1702), and Robert Hooke’s posthumous *Lectures and Discourses of Earthquakes and Subterraneous Eruptions*, in *Posthumous Works* (London, 1705), supply Mather with additional proof of how ancient and modern science was consistent with the Mosaic creation account. Mather distills Edwards into one (101r), Grew into two (67r–68v), Dickinson into eleven (77r–87v), and Hooke’s into two (105r–106v) manuscript pages – authors appearing in Mather’s annotations as their works fell into his hands. Mather treasured Edwards, Grew, Dickinson, and Hooke for their deft use of pagan lore and their defense of the authority of tradition even as René Descartes had dismissed the ancients for lacking empirical proof. Of the four mentioned here, Dickinson’s Latin treatise, closely argued and densely documented, is perhaps the most interesting. He adopts the popular Renaissance stance of attributing the atomic philosophy of the ancient Greeks to none other than Moses who, having inherited it from Adam through an uninterrupted line of oral tradition via Methuselah, Noah, Heber, and Abraham, taught it to the Egyptians and, via the later Democritus, to the Greeks. They added their own admixture, Dickinson argues, and thus gravely corrupted Moses’s original account (*BA* 1:357–83).

According to Dickinson’s curious *Physica Vetus & Vera*, the Creator instructed our protoplast in paradise in the principles of the corpuscular philosophy and taught him that miniscule corpuscles, or atoms, are the building blocks of all matter and the “keyes of Nature” (*BA* 1:362). Although invisible to the naked eye, these atoms are neither “*Absolutely Indivisible*” nor all of the same shape or size, for when God formed universal matter out of nothing, these particles were totally disordered, unformed, and separated by “empty Spaces” between them. God’s spirit imprinted on these particles a concourse of motion, “that *Force* which we call *Nature*” (*BA* 1:368), and directed atoms of the same agreeable size and figure “to join, and stick together, in *Bodies*” and gradually cohere into a vast mass of molecules. Through a centrifugal motion that sepa-

⁴⁶ Hale (*Primitive* 341, 342).

rated atoms of diverging shape from one another, God allowed these "*Pilulae*," "*Globuli*," "*Bracteolae*," and a forth element difficult to name, to form the elements of fire, water, air, and earth (perhaps even a fifth that became part of the vast firmament). Fire and light came into existence when the *Pilulae* (small, round, subtle, and swiftly flying) separated from the other molecules; water was formed when the *Globuli* (less subtle and larger in size) separated from the grosser molecules of different contours; air took shape when molecules shaped like sticks (*Bracteolae*) were allowed to move freely with plenty of space between them; finally, the element earth, by its very constitution denser, heavier, and amorphous, was different from all the others. From these elements compounding into different molecules, God shaped the whole universe.

But if atoms are the building blocks of the universe, Mather wondered with Dickinson's *Physica Vetus* at his side, how come they are not mentioned in the Hexaemeron? And if the Egyptians, Phoenicians, Babylonians, and Greeks received their philosophy directly from Moses, how come theirs differs from that in Genesis? Easy: The word *atom* was known by different names to different peoples, Mather argued. For what Democritus calls *atoms*, some called *waters*, *sand*, *dust*, or *particles*. What Thales called *water*, Pherecydes called *earth*; Pythagoras called *monads*; Aristotle *minute corpuscles*; Anaximander *hyle*. Adding to the confusion, these terms were not the only ones used by the ancients to describe the prima materia of the universe. For what some called *the many*, Anaximander also called *the infinite*, Heraclitus *smallest fragments*, *motes*, or *dusty particles*; Empedocles *fragments*, Asclepiades, *molecules*; Xenocrates *invisible magnitude*, and so on and so on – until the divine philosophy substantially preserved for the first thirty-five centuries was utterly garbled among the pagans. What about the original among the Hebrews?

If we should particularly instance in, *Hyle*, as the *Egyptians* called it, or, *Ile*, as the *Phoenicians*: Tis true, we don't plainly find the Original of it, in the Writings of *Moses*; but we must not imagine that the Sacred Writers have all the *Terms of Art* used among their Philosophers. And yett it is very probably, That *Hyle*, or *Ile*, may be found in the Hebrew חֵיל / *Hhiul*, which signifies, *The Sand*; and *Philo* countenances this Conjecture: which is confirmed by the *Hiule*, wherein *Hyle* is rendered in the *Arabic* Tongue, which is the Daughter of the Hebrew. How agreeably indeed, are *Atoms* called *Sands*, as well for their *Exility*, as for their *Fluidity*? And how agreeable is it, for the same to be called, *Waters*? The oldest of all the *Egyptian* Philosophers, namely *Taausus* (whom the *Greeks* called *Hermes*) affirmed all things to be formed, ἐκ τοῦ ἁμμου, *out of Sand*, which was as much as to say, out of *minute Particles*. ... The Ancient Hebrewes applied also, the Name of *Dust*, unto this *First Matter*. A Fitt Name for any *Multitude*! (BA 1:365)⁴⁷

47 For a useful summary of Dickinson's argument about Moses as an atomist, see Collier (149–65); D. B. Sailor, "Moses and Atomism" (3–16), supplies the historical background.

But here's enough to demonstrate the origin of all philosophy. This plethora of theories and explanations was still useful to defend the Mosaic creation account at the turn of the century. And Dickinson's *Physica Vetus & Vera* allowed Mather to demonstrate how the wisdom of God, preserved in various states of corruption, passed through the dispersal of Noah's sons to all the nations of the earth. Rightly understood, then, what were the wise men among the ancient Greeks? But Moses dressed in Attic garb.⁴⁸

If Mather the Christian virtuoso felt comfortable mentioning Thales, Anaximander, Pythagoras, Empedocles, Aristotle, Plato, Cicero, and Diodorus Siculus, in the same breath as Copernicus, Kepler, Galileo, Descartes, and Newton, he emerges as an early Enlightenment theologian who, like the Cambridge Platonists, stands with one foot in each camp, the ancients and moderns. But to call Mather a "transitional figure," worse, "unoriginal," as some Whiggish historians are prone to do, is to impose expectations that are clearly ours, not his. He was a pastor by vocation and, at best, a natural philosopher by avocation. He did not bow to romantic notions of originality but made novelty subservient to tradition. Yet in scanning the heavens, he manifestly struggled to maintain a theocentric orbit even as he gravitated toward the trajectory of new cosmogonies rising in the Northern hemisphere.

"How Did the Giant Find the Way Hither?"

Signs of storm and stress become visible all over "Biblia Americana" when Mather moves beyond the grand outline of the Mosaic creation story, which (he reluctantly admits) is not intended to be a scientifically accurate explanation in the first place, but merely an account of what an eyewitnesses might have seen or what Moses or any other prophet might have adapted to the simple understanding of an illiterate people (*BA* 1:344). If Burnet and Whiston could be trusted, Moses did not intend to impart a philosophically precise description but, rather, to instill awe and piety in a fractious people: "the *Mosaic Creation* is not a Nice and Philosophical Account of the *Origin of All Things*," Mather cites William Whiston's *New Theory* affirmatively, "but an Historical and True Repræsentation of the Formation of our single Earth, out of a confused *Chaos*, and of the successive & visible Changes thereof, each day, till it became the Habitation of Mankind" (*BA* 1:338, *see also* 340, 358).⁴⁹ In this and similar passages from

⁴⁸ Dickinson's excavations among the ancient Greeks are heavily indebted to Ralph Cudworth's *True Intellectual System of the Universe* (1678) and to Theophilus Gale's four-volume *Court of the Gentiles* (1669–78). *See also* J. R. Jacob, "Boyle's Atomism" (211–33); C. A. Patrides, "Introduction," *Cambridge Platonists* (1–42); and S. Hutton, "Decline of *Moses Atticus*" (68–84).

⁴⁹ Whiston, *New Theory*, pt. 1, p. 3.

Whiston, Mather more or less consciously echoes the much maligned Baruch Spinoza, whose *Tractatus Theologico-Politicus* (Amsterdam, 1670) postulated that the Bible "has nothing in common with philosophy [i.e., natural science], in fact, that Revelation and Philosophy stand on totally different footings."⁵⁰ Mather, differing from Spinoza and the Hobbsean materialists, is not yet ready to designate natural philosophy and theology as wholly autonomous disciplines. Still, like the rationalist theists, he concedes that attributing all natural phenomena – however awe-inspiring they might appear on the surface – to God testifies more to a writer's piousness than to his knowledge of natural philosophy. And for this reason, he gave scientific explications full consideration. His commentary on the Noachic Flood is a good case in point.

As mentioned above, Thomas Burnet's *Sacred Theory of the Earth* (London, 1686) was among the most controversial explanations of the flood in Mather's day. To account for the massive quantity of water necessary to inundate the entire globe, Burnet posited that the antediluvian earth was entirely "smooth, regular, and uniform; without Mountains, and without a Sea," for the entire body of water was kept in subterraneous caverns. There was nothing miraculous about the Noachic Flood, the Cartesian Burnet proudly pointed out, because the pillars supporting the earth's crust were eroded by the subterraneous oceans and thus caused the earth's surface to collapse into the great abyss of which Noah spoke. Our present mountains and islands are therefore nothing but the remnants of the antediluvian crust now jutting out of the deep.⁵¹ Mather and most of his colleagues on both sides of the watery abyss ridiculed this "Romance" for its lack of scriptural support. Burnet's "Abyssinian" hypothesis was not original either, Mather wittily puns, because Burnet had dug it up from the Italian Franciscus Patritius, whose *Della retorica dieci dialoghi* (Venice, 1562) had attributed the original version to "an Abyssinian Philosopher in Spain; who quoted the Annals of *Ethiopia* for it" (BA 1:625). The ancients still held sway over Mather and most of his peers – even if the modern Cartesians developed empirical proof to the contrary – and natural philosophers of his era were still relying on layers upon layers of source citations at second, third, or even forth remove.

Mather also rejects William Whiston's explanation of the Flood in *The New Theory of the Earth* (London, 1696), because Whiston's deus-ex-machina of a comet passing too close to the earth and thus causing the inundation described in Genesis 7 is, Mather insists, "altogether *Arbitrary*" and unsatisfactory (BA 1:626).⁵² Moreover, again with no scriptural support, Whiston had attributed

⁵⁰ Benedict Spinoza, *Theologico-Political Treatise* (1883) 9. For Mather's view of Spinoza, see Section 3 in the present introduction.

⁵¹ My citations are from the second edition (1691) of Burnet's *Sacred Theory* (bk. 1, ch. 5, p. 51, and ch. 6, pp. 66–77).

⁵² *New Theory* (1696), pt. 2, bk. 4, chs. 4–5, pp. 300–82, and "Appendix, Containing a New Theory of the Deluge," *New Theory* (1737) 459–78.

the cataclysmic flood of fire at the Second Coming (2 Peter 3) to the same comet. Dr. Robert St. Clair's alchemical theory, in *The Abyssinian Philosopher Confuted* (London, 1697), which sounds faintly like Burnet's, does not fully satisfy Mather either. Noah's deluge, St. Clair had hypothesized, was caused by "a Conflict of contrary Salts, *Acid* and *Alkali*, in the bowels of the Earth": tremendous volumes of acidic gases had forced out all the waters from Burnet's subterranean caverns and, reacting with the air, had precipitated the great rains that, before they ceased, had covered the "top of the Highest Mountains." Mather effortlessly extracts St. Clair's explanation but adds no comments of his own, perhaps because the vast amounts of water necessary to cover the highest mountains on earth by fifteen cubits (Gen. 7:19–20) were still left unaccounted for (*BA* 1:627).⁵³

John Ray's *Miscellaneous Discourses concerning the Dissolution and Changes of the World* (London, 1693) was much more serviceable in this respect. Written by a highly respected English botanist, the popular work went through at least three editions; its erudition supplied Mather with a good deal of information he would otherwise have had to dig up on his own. Citing at second hand Athanasius Kircher's famous *Arca Noë, in tres libros digesta* (Amstelodami, 1675), Mather wonders if a transmutation of one element into another, of air into water, might "make a Bulk of *Water*, of æqual Quantity" sufficient to inundate the entire globe.⁵⁴ This "Peripatetical Condensation and Rarefaction," however, was as old as Aristotle, had been resurrected by Descartes, and was then affirmed by the Jesuit Kircher, whose Latin citation Mather deliberately leaves untranslated to shield the untutored. "But the Sacred Scripture mentions not the *Conversion of the Air into Water*," and therefore, "we will rather consider the Causes of the *Flood*, which are there more expressly mentioned." Mather, however, does agree with Ray to disagree with Edmund Halley's hypothesis that all the water the rivers combined discharge into the seven seas amounts to "Half an *Ocean of Waters*" annually (*BA* 1:630, 631).⁵⁵ But this idea, previously postulated by the Italian mathematician Giovanni Battista Riccioli and disputed by Sir Isaac Newton, is considerably less satisfying than those put forward by Robert Hooke, John Ray, Thomas Burnet, and by the great Sir Isaac himself: that God might have displaced the gravitational center of the earth and moved

⁵³ Mather cites St. Clair's "To the Reader," *Abyssinian Philosopher Confuted* (C6r–C7r, pts. 2, 3, 5). Thomas Jefferson, too, rejected the idea that the Noachic Flood could have covered the highest mountains of the earth, in *Notes on the State of Virginia* (Query 6, p. 31). The Renaissance debate about the flood is aptly treated in D. C. Allen's distinguished *Legend of Noah* (1963) and in N. Cohn's *Noah's Flood* (1996).

⁵⁴ Ray's *Miscellaneous Discourses* (64–65); Ray had cited Athanasius Kircher's *Arca Noë* (1675), bk. 2, ch. 5, p. 132, on the air-into-water hypothesis.

⁵⁵ Edmund Halley's hypothesis is discussed in *A Discourse concerning Gravity, and its Properties*, in *Miscellanea Curiosa* (1705) 1:304–25.

it closer to the middle of the then populated hemisphere.⁵⁶ "And a Change of its Place, but the two Thousandth Part of the *Radius* of this *Globe*, were sufficient to bury the Tops of the Highest Hills under Water" (*BA* 1:633).

With such weighty proponents on its side, the theory of the earth's gravitational shift seemed so much more respectable than that of the Yorkshire antiquarian Abraham de la Pryme or that of the Dutch theologian Petrus Serarius, who had revived the Stoic notion of "a mighty *Flood* once foretold from a Conjunction of the *Planets* in *Pisces*," a speculation that was as unworthy as that of the heretic Isaac de la Peyrère, whose *Prae-Adamitae* (Amsterdam, 1655) claimed that Noah's Flood was not universal at all but merely local and confined "unto *Palestine*," that is, the horizon the patriarch then deemed the extent of the world (*BA* 1:638–40, 646–48, 651).⁵⁷ Still, this idea enjoyed considerable currency among such moderns as Isaac Vossius, Georg Kirchmaier, Edward Stillingfleet, Baruch Spinoza, Thomas Burnet, Erasmus Warren, John Ray, and William Whiston, while the famous Father Marin Mersenne and Johann Adam Osiander, his Lutheran colleague in Germany, would allow the waters to rise no more than 150 feet or just enough to set the ark afloat.⁵⁸ Not even the traditions

56 See Giovanni Battista Riccioli, *Geographiae et hydrographiae reformatae* (1661); Newton dismisses Halley's theory in *A Treatise* (1728) 10–28; Hooke's discussion appears in his "Discourse V," in *Posthumous Works* (1705) 321–22, 346–50, 411–12; Burnet's appears in *Sacred Theory* (1691), bk. 2, ch. 3, p. 195; Ray's argument appears in *Miscellaneous Discourses* (98–99); and Newton's theory of the gravitational shift of the globe appears in *A Treatise* (10–28).

57 Mather here draws on Letter VI (14 September 1700) by Abraham de la Pryme (1671–1704), a Yorkshire antiquarian and minister at Hull, in "A Letter of the Reverend Mr. Abr. De la Pryme to the Publisher" (1700): 683–85. Isaac de la Peyrère, *Prae-Adamitae* (1655); my reference is to the English translation, *Men before Adam* (1656), bk. 4, chs. 7, pp. 239–44.

58 Among the seventeenth-century physico-theologians who excluded America from Noah's flood or rejected its universality are Isaac de La Peyrère, in *Men Before Adam* (bk. 4, chs. 7–9, pp. 239–58); Isaac Vossius, *Dissertatio de vera aetate mundi* (1659) 53; Georg C. Kirchmaier, *De diluvii universalitate* (1667) 3–60; Edward Stillingfleet, *Origines Sacrae*, 3rd ed. (1666), bk. 3, ch. 4, pp. 542–43; Spinoza, *Theologico-Political Treatise* (35), rejected the global Flood, because "Noah thought that beyond the limits of Palestine the world was not inhabited"; Thomas Burnet, *Sacred Theory* (bk. 2, ch. 8, pp. 272–73), argues "that there was a stock [of survivors] providentially reserv'd there [America], as well as here [Old World], out of which they [postdiluvians] sprung again." Erasmus Warren, in *Geologia* (1690) 292–96, and in his *A Defence of the Discourse* (1691) 165–69, 172–75, 190–97, 209, limits the Flood to the height of 15 cubits from the ground up but not surpassing the high mountains. John Ray, *Miscellaneous Discourses* (99–100), excludes America from the Noachic flood because it was "in all probability unpeopled at the time." Ray repeats this assertion in his *Three Physico-Theological Discourses* (1693) 122, but rephrases this paragraph in the third edition (1713) 118–19, where he argues that confining Noah's Flood to the Old World would be so much more reasonable "and delivers us from that great and insuperable Difficulty of finding eight, nay, twenty two Oceans of Water to effect it: For no less is requisite to cover the whole Terraqueous Globe with Water, to the Height of fifteen Cubits above the Tops of the highest Mountains." William Whiston, *New Theory of the Earth* (1737) 138, 405, argues that both China and America were excluded from Noah's flood because they were not part of the known world in Noah's day. Earlier in the seventeenth century, the French philosopher Marin Mersenne (1588–1648), in his *Les preliques* (1634) 1–135, 210–28, and in his *Quaestiones* (1623), pt. 1, cols. 799–920, 1007, 1013, 1513–72,

of the flood found among the Indians of North, South, and Central America, or those among the faraway Chinese, could entirely drown Noah's critics, who downgraded the deluge to a purely local event. "We attempt several Wayes to solve the *Phenomena of the Flood*," Mather confesses in his "Biblia Americana," "and provided our *Hypotheses* have no *unscriptural Extravagancies* in them, tis not amiss to produce them" (BA 1:658). After all, a bit of truth may lie at the bottom of each supposition. Thus armed with his selection criteria, Mather kept scouting for other discussions of the Noachic flood that might yet elucidate the mysterious origins of the massive amounts of water that were supposed to have covered the highest mountains the world over by more than fifteen cubits. Perhaps if the flood could be confined to the Old World, or if the Mosaic story merely intended an inundation of the lower parts but not of the tops of the mountains, the biblical account might yet be saved from the province of the miraculous and harmonized with the researches of the natural philosophers. Mather seemed to have found just the right sort of model in Erasmus Warren's *Geologia: Or, A Discourse concerning the Earth before the Deluge* (London, 1690).

Rector of Worlington, in Suffolk, England, Erasmus Warren (fl. 1680–1714) tried to rescue Noah's global Flood out of the hands of critics who sought to confine it to a merely local event in Palestine. Biblical commentators, Warren argued, are grossly mistaken in supposing the highest mountains on earth were covered by water upward of fifteen cubits (Gen. 7:19–20): "They were indeed but *Fifteen Cubits* high in all, above the Surface of the Earth," Warren insisted. "Not, that they were no where Higher, than just *Fifteen Cubits*, above the Ground; they might in most Places, be Thirty, Forty, Fifty Cubits High, or more." The mountains were indeed covered "*Fifteen Cubits upwards*," but only "on their *Sides*, not above their *Tops*: the Bottoms of them stood so deep in the Waters" (BA 1:659). Although disallowing any Mosaic hyperboles in this account, Warren asserted "that in the Holy Style, to *Cover*, does not always mean, To *Surmount*, and *Over-top*, and *Over-whelm*," but "Sometimes, it means, only to *Surround* the Object, or to be *About* it in great Abundance" (BA 1:690). Moreover, Warren posited that stores of water were hidden in the sides of the

1607–1712, and pt. 2, col. 3, clung to the old notion of supercelestial waters crashing in upon the earth. Mersenne still embraced Ptolemy's geocentric universe and asserted that vast quantities of waters – even to the edge of the universe – lay beyond the solid sphere of the firmament nearly 14,000 terrestrial semi-diameters distant from the earth. This ancient idea continued to enjoy a certain degree of popularity in updated fashion, for even John Ray maintains in his third edition of *Three Physico* (1713), Discourse 2, ch. 2, pp. 114–18, that the watery vapors in the lower parts of the air amounted to eight oceans of water. A displacement of the earth's center of gravity pressing on the subterraneous caverns filled with water could have easily triggered the biblical flood. Finally, Johann Adam Osiander (1626–97), distinguished German Lutheran theologian, explores whether Noah's flood was universal, whether it covered the mountains, and whether America was populated before the flood, in his highly respected *Commentarius* (1676–78) 1:186, 192–95, quaestio 2, 3–4. For much helpful background, see D. C. Allen, *Legend* (chs. 4–5) and N. Cohn, *Noah's Flood* (ch. 4).

mountains and would burst open to drown anyone trying to climb their peaks. "And in this Way," Warren congratulated himself, "we are supplied with *Waters* enough, without a Recourse, either to the *Burnettian Romance*; or, to a *New Creation of Waters*; or to *Super-Cæstrial Waters*; or to a Change of the greatest Part of the *Mass of Air* into *Water*; a Change, which it seems, is hardly yett justified by *Experiment*; tho' the Lord *Verulam* allowes of it; *Descartes* subscribes to it; and our Admirable *Boyl* himself, leaves it undetermined" (BA 1:663).⁵⁹

No matter what its merits, Warren's linguistic retrenchment did not entirely satisfy Mather as he hoped to find other theories more in harmony with the biblical account. Whether or not Mather fully subscribed to Warren's theory, along with that of Mersenne, that Noah's Flood did *not* cover the tops of mountains – some of which were higher than 15,000 feet – he decidedly shared his conviction that the inundation was universal in its extent. Too much irrefutable fossil evidence discovered almost daily – even in America – spoke in its favor. The bones of the antediluvian Nephilim, a race of giants who, the offspring of fallen angels, consorted with the daughters of men (Gen. 6:4), were found the world over, Mather insisted. These "Antediluvian Giants" were no mere political tyrants, thugs, or highwaymen – "*Giants for Quality* only, and not for *Quantity*" – as Becanus had argued in his *De Gigantomachia* (1569), Temporarius in his *Chronologicarum demonstrationum* (1596), and the ancient Alexandrian Philo Judaeus in his *De Gigantibus* (c. 30–50 CE) – but giants of tremendous size (BA 1:585).⁶⁰ David's Goliath was puny in comparison to the gargantua whose

⁵⁹ Mather's source is Warren's *Geologia* (300–301, 325–26, 332–33). Mather (via Warren) also brushed aside the old notion that the flood was caused by the transmutation of one element into another, of air into water, as the ancients had believed: Aristotle, *De mundo* (1.392b, lines 5–12; 5.396b, line 25–397a, line 5); Diogenes Laertius, *Vitae philosophorum* (1.11, lines 4–5); Plato, *Timaeus* (49c, lines 4–5); Philo Judaeus, *De Somniis* (1.20, lines 4–5) and *De aeternitate mundi* (19.103, lines 5–6), in *Works* (366, 718–19); and Heraclitus, *Allegoriae* (40.12–13). In the late Renaissance, Sir Francis Bacon, Lord Verulam (1561–1626), still maintained this ancient philosophical mainstay, that the element air can turn into water, as his experiments seemed to confirm several times over, in his oft-reprinted *Sylva Sylvarum* (1627), century 1, experiments 27, 76–82, pp. 8, 24–26. The great René Descartes (1596–1650) agreed with his colleague across the English Channel and affirmed that the particles of air can change into water, in his *Principia Philosophiae* (1644), pt. 4, art. 48, pp. 218–19. Finally, the admirable Robert Boyle (1627–91) felt his experiments were inconclusive, in *Nova Experimenta* (1661), experimentum 22, pp. 103–20, esp. pp. 108–10. Even our New England Muse, Anne Bradstreet (1612–72), weighed the question in her *Quaternions* (1650), whether the element air could be transmuted into water. See Bradstreet's "The Four Elements" (ll. 437–38), *The Works* (30–31).

⁶⁰ Mather was particularly incensed at his colleague, Jean LeClerc, who argued in his *Twelve Dissertations* (1696), diss. 2, p. 78, that the word "*Nephilim* seems to import Robbers They that after the Septuagint and vulgar Translation have translated it *Giants*, have indeed own'd themselves to be of their Opinion, but have brought no Arguments to prove it." Mather alludes to the well-known accounts of the Flemish physician and antiquarian Joannes Goropius Becanus (1519–72), who in his "De Gigantomachia" (lib. 2), in *Origines Antwerpianae* (1569) 207–12, describes several young men and a woman nine and ten feet tall. The work by Joannes Temporarius, also known as Jean du Temps (born c. 1535), French jurist, mathematician, and

bones were lately dug up near Albany, New York, Mather proudly announces in his "Biblia Americana." A "prodigious *Tooth*" weighing "*Four Pounds and Three Quarters*" and a thighbone "*Seventeen Foot long*," judged by anatomists to be of human origin, unmistakably corroborated the existence of these biblical giants no less than it testified to the inundation of the American hemisphere, which John Ray had excluded because no-one lived there: "For, I beseech you," Mather queried his doubting Thomases, "How did the *Giant* find the Way hither?" What Dutch settlers had unearthed at Claverack, New York, in 1705 were, we now know, the fossilized bones of a mastodon – a species of antediluvians nowhere mentioned in the Bible (*BA* 1:586, 590–94).⁶¹

That Mather and all the other eyewitnesses mistook the remains as proof of the biblical Nephilim is really not to the point – for virtually all authorities of his time agreed that the bones were of nonhuman origin and belonged to the giant race of the Emims, Anakims, Rephaims, or of Og. The Claverack bones were too big to be those of an elephant – well-known in Mather's time – and too far away from the Atlantic shore to be the bones of whales, so he argued.⁶² That Mather and his compeers interpreted fossil evidence through the prism of their biblical beliefs may strike modern readers as quaint, if not amusing; however, the "mistake" is not Mather's but ours. Not developed until the early nineteenth century, the science of paleontology had yet to classify such giant fossils of

geographer, is *Chronologicarum* (1596), in which the author traces the word "Nephilim" to Scythian origin. Finally, Philo Judaeus strips these giants of their tall stature and allegorizes them as "men ... born of the earth" – hedonists who hunt after carnal pleasure (*De gigantibus* 13.60), in *Works* (156).

⁶¹ Mather's transcribed Governor Joseph Dudley's letter (10 July 1706) and his own thoughts on the giant bones of Claverack into "Biblia Americana" (1:582–99) and mailed a copy of the missive, along with his disquisitions on giants in his first package of "*Curiosa Americana*" (1712), to Richard Waller, secretary of the Royal Society, who published a synopsis in *Philosophical Transactions of the Royal Society* 29 (1714–16) 62–63. D.E. Stanford reprints various contemporaneous accounts of the excavation of the mastodon bones in his "Giant Bones" (47–61); and D. Levin reprints Mather's commentary on Gen. 6:4, in "Giants in the Earth" (762–70).

⁶² For the race of giants, see Gen. 6:4, Num. 13:33, Deut. 2:10–11; 3:11; Josh. 12:4. Robert Plot (1640–96), keeper of the Ashmolean Museum, professor of chemistry at Oxford, and celebrated comparative anatomist, employs the same method that Mather would use thirty years later. When a large "*thigh-bone* (supposed to be of a *Woman*)" and several large molars were dug up in a London churchyard and elsewhere, he surmised that these fossils might be the remains of an elephant brought to London in Roman times. Yet providence decreed that while he was composing his *Natural History of Oxford-shire* (London, 1676), Plot had the opportunity to compare his fossils' anatomy with that of a young live elephant then publicly displayed in Oxford. Much to his surprise the elephant's bones were "not only of a different shape, but also incomparably bigger than *ours* [Nephilim fossils] ... If then they [fossils] are neither the bones of *Horses*, *Oxen*, nor *Elephants*, as I am strongly perswaded they are not, upon comparison, and from their like found in *Churches*: It remains, that (notwithstanding their extravagant magnitude) they must have been the bones of *Men* or *Women*" – like those of the "*Sons of Anak*" or of the "*Titans*, and of high *Giants*" as those mentioned in the apocryphal "Judith 16.v.7" and "Baruch 3.v.26" (*Natural History*, ch. 5, pp. 135–36, sec. 164, 167, 168).

extinct species or even coin the term *dinosaurus*, though their bones had been found since classical times.⁶³ Perhaps more revealing than lacking the benefit of our hindsight is Mather's strategy of employing empirical proof to validate the more perplexing phenomena of the Bible without resorting to supernatural causality. For when threatened by evidence to the contrary, he did not become dogmatic or abusive by dismissing his critics as blaspheming atheists, as some lesser lights were prone to do; nor did he resort to metaphor and allegory until clear evidence to the contrary ruled out any literal reading of the Bible.

Just how much science and religion made common cause during much of the seventeenth and eighteenth centuries is evident in the assiduousness with which Mather pursued a rational and natural explanation of these giant Nephilim. The discovery in the 1660s of microscopic organisms (*animalculae*) in a drop of water prompted Robert Hooke, Anton van Leeuwenhoek, Marcello Malpighi, Francesco Redi, William Harvey, and other natural philosophers of note to develop germ theory, that microorganisms in fluids are responsible for causing disease. This new theory dealt a mortal blow to the Platonic concept of the earth's plastic nature, that primitive life forms generated spontaneously from the putrefaction of organic matter or from an inherent spiritual power.⁶⁴ Mather, with his training in the medical arts, applied the new germ theory to his consideration of the Mosaic Hexameron. Speculating that the giant's tremendous size might be explained through natural causation, he formed a postulate akin to a rudimentary understanding of modern generation: "The *Microscopical Inquisitions*, have made it more than probable; That the *True Seeds of Animals*, floating in their *Suitable Vehicle* [seminal fluid], have, lying in a *Space* much less than the Naked Eye can discern, the whole *Bodies* of the *Animals*, even to all their *Nerves* and *Fibres*: which afterward *Grow* as aforesaid, until their original *Stamina* can be no further carried out" (BA 1:595). God may have implanted in the seed of our first protoplast an "original *Stamina* ... much larger than others, and capable of being drawn forth, to the most *Gigantic Extension*." Or God may have "some of these *Gigantaeae Stamina*" enter man's body through the food chain and there slumber until God ordered them to grow. Or God, from

63 Mather also drew on the accounts of his Hispanic and Dutch colleagues such as Agostin de Zárate's *Historia del descubrimiento y Conquista del Perú* (1555), bk. 1, ch. 5, that giants lived among the ancient Peruvians; José de Acosta's *Naturall & Morall Historie* (1604), bk. 1, ch. 19, pp. 62–63; bk. 7, ch. 3, pp. 501–02; and on Joannes de Laet's *Notae ad dissertationem* (1643) 83. How the ancients in the Old and New World interpreted giant fossils is explored in A. Mayor's *First Fossil Hunters* (2000) and in her *Fossil Legends* (2005). See also P. Semonin's *American Monster* (15–61, 362–91).

64 For the changing fortune of the concept of plastic nature in Mather's time, see Collier (428–47); W.B. Hunter, "Doctrine of Plastic Nature" (197–213); and R. Rappaport, *When Geologists were Historians* (105–35). Useful historical background on the evolution of germ theory is found in C. Dobell's *Anthony Leeuwenhoek* (1932) and in J. Farley's *Spontaneous Generation* (1977).

the beginning of the world, may have embedded in the seminal fluid of man microscopically small, yet fully formed, animalcules of these giants that upon penetration of the female ovum might grow to colossal proportions though fathered by parents of common size (*BA* 1:597).⁶⁵ Conjectures of this nature were indeed commonplace among the physico-theologians of the period, and Mather drew on the most respected authorities he could muster to harmonize biblical exegesis and scientific inquiry.⁶⁶

That he did not become complacent in his quest for collating the Book of Scripture with that of Nature becomes apparent just a few tightly packed, folio-sized columns later. Coming across a chapter on animal generation of hybrids in Dr. James Drake's *Anthropologia Nova* (London, 1707), Mather was forced to toss out what had seemed to be the key to unlocking the mystery of the giant Nephilim: "But, oh! the palpable *Darkness*, under which we are languishing!" Mather bewailed his losses. "After I have given you, so fair an *Hypothesis*, as at first I thought it, about the *Generations* carried on in the *Animal* World, I must now run the Hazard of destroying it all again." Leeuwenhoek's conjecture that fully formed yet microscopically small replicas of man or beast were lodged in the seminal fluids of every animal species somehow did not mesh with Drake's discussion of hybrids and their inability to procreate:

[T]he most common of all these Animals, of mix'd Breeds, is the *Mule*, begotten by an *Ass*, upon the *Mare*. If this *Hypothesis* be true, the *Sperm* of an *Ass*, is full of *little Asses*, and the being nurs'd by a *Mare* should never make *Mules* of them; because the Species is praedetermined, and the Creature is not only form'd, but living. ... I know some Endeavour, to get over this Objection, by fancying that the different *Matrix* may have so much Effect, as to alter the Figure of the Animal so far, as may account for these *Mixt Appearances*. But this is so poor, so unphilosophical a shift, that it is not worth an Answer; and they might with as good Authority perswade me, that an *Orange-tree* translated from *Sevil* to *England*, would bear *Apples*; and so vice versa. (*BA* 1:598, 599)⁶⁷

With such empirical evidence to the contrary, Mather and his peers had only two choices: suspend their judgment until new discoveries would set the record straight, or fall back on the outmoded notion that God had endowed

⁶⁵ See also *BA* 1:349–52. For information on how the seeds of plants and animals contain miniscule replicas of each species' complete body, Mather relies in part on Whiston's *New Theory* (1696), bk. 4, ch. 1, pp. 224–25, 228, which in itself is an extract from Richard Bentley's fourth Boylean lecture (June 6, 1692), published in *A Confutation of Atheism* (pt. 2, pp. 3–36).

⁶⁶ See also Mather's annotation on Gen. 3:15 (*BA* 1:485), where he digests George Garden's *Miscellanea Curiosa* (1705–07) 1:143–49, in affirmation of how the female ovum is inseminated. Garden's authorities include such noteworthy contemporaries as Harvey, Malpighi, Perrault, R. de Grael, Leeuwenhoek, Swammerdam, and others.

⁶⁷ Mather's extracts are from *Anthropologia Nova* (1707), vol. 1, bk. 1, ch. 25, pp. 334–36 (misnumbered 352), by James Drake, MD (1667–1707), fellow of the College of Physicians of the Royal Society, whose work explores (among other things) new theories of generation and hybridization.

matter with a generative plastic power that blindly formed various types of organisms.⁶⁸ "However old and exploded, the Opinion of a *Plastick Power* be," Mather laments with Drake at his elbow, "I must however embrace it; even tho' I know not exactly wherein it lies: at least, till I meet with somewhat more sufficient to Resolve my Doubts, than hitherto I have done" (BA 1:599).⁶⁹ Mather, it is clear, was not afraid to examine scripture in light of contemporary empirical evidence and, as necessary, to renegotiate his interpretative stance if time-rooted tradition did not square with the natural philosophy of his day. Those who went before him were his guides, not his masters. Yet if errors were uncovered, they must be attributed to his guides, not to the Bible or its holy prophets.

Biblical Miracles, Natural Phenomena, or Poetic Hyperbole?

Through a number of exemplary cases, we can gauge the extent to which Mather has crossed the threshold into the Enlightenment. He clearly vacillates between miraculous explanations and purely natural causation in treating wondrous biblical events, generally juxtaposing old and new paradigms in an effort to arrive at the most intellectually compelling opinion to present to the educated men he expected to form the core audience for his sustained scholarly effort. With few exceptions, however, his conservative affirmations of biblical miracles generally outnumber – though they do not necessarily outweigh – the critiques he excerpts from Cartesian materialists. Such is the case with his commentary on the confusion of tongues at Babel, the ten plagues of Egypt, and the parting of the Red Sea. Mather was well aware of the controversy these stories prompted, and he commonly alludes to, or names, the primary contestants in the contemporary debate about them. The principal target of his guarded defense of miracles appears to be Jean LeClerc's *Twelve Dissertations out of Monsieur Le Clerc's Genesis* (London, 1696), an English translation and synopsis of the most controversial revisionism of his colleague's Latin commentary on the Pentateuch (1693–95).

⁶⁸ The idea of the "*Plastick Power*" of nature is derived from Plato's concept of *anima mundi* (*Timaeus*), the theory that nature is endowed with a spiritual power that orders and shapes the size and growth of all biological life forms. Revived by the Cambridge Platonists to combat Cartesian materialism, the vitalist theory made a brief comeback but was largely discredited by the end of the seventeenth century. In Mather's time the English botanist John Ray (1627–1705) was one of its principal proponents in his popular *Wisdom of God Manifested in the Works of the Creation* (1691), esp. pp. 31–40; Mather employs Ray's vitalist argument at some length in his *Christian Philosopher* (essay 26). For a helpful sketch of the concept's short-lived resurgence in the seventeenth century, see W. Hunter (200–03) and R. Rappaport's "Geology and Orthodoxy" (1–18).

⁶⁹ Drake, *Anthropologia* (1:352).

Mather had long admired LeClerc's scholarship but was frequently put off by his denial of miracles and radical demythologizing of the Bible. Although not the first to do so, LeClerc had rejected the traditional reading that the confusion of tongues at Babel "was all transacted on the sudden." The Mosaic account does not detail the events, LeClerc argued, but conflates "the Occurrences of several Ages ... in a few lines." Interpreters therefore wrongly assume an instantaneous alteration of the original language. "Discord and Dissention" among the people – not the miracle of new languages – are here meant (Gen. 11:7); their disagreements led to their separation and isolation from one another and thus "their Languages came to be changed" over a long period of time.⁷⁰ Mather is clearly ill at ease with the spread of such trenchant rationalism among Europe's leading theologians who eschew miracles for measured changes over myriads of generations; yet his defense of this venerable miracle is tepid, or hollow, at best: "Father *Simon*, and *Leclerc*, have embraced this [new] opinion," Mather comments ruefully, "but ... tis better to own the *Miracle*." So, too, after condensing into two paragraphs another critic's rationalist dismissal of miracles, Mather halfheartedly remarks, "I don't acquiesce in [Compegius] *Vitringa's* Notion" (*BA* 1:808, 807).⁷¹ If Mather here speaks out of both sides of his mouth, he perhaps unwittingly finds himself in bed with such notorious Deists as Charles Blount and Thomas Browne, whose anonymously published *Miracles, No Violations of the Laws of Nature* (London, 1683) and, respectively, *Miracles, Work's* [sic] *Above and Contrary to Nature* (London, 1683) ostensibly defend biblical miracles, but do more to spread the ideas of Hobbes and Spinoza than to refute them.

Much the same unintended effect occurs in Mather's commentary on the ten plagues of Egypt and the parting of the seas in the Exodus saga. Again he appears to target the likes of Jean LeClerc, who bring to bear purely naturalist explanations on the Israelites' passing through the Red Sea.⁷² Sly Moses, LeClerc

⁷⁰ Jean LeClerc, *Twelve Dissertations*, diss. 6, sec. 5, pp. 177–79. Richard Simon offers much the same rationalist interpretations on this text in his *Critical History of the OT* (1682), bk. 1, chs. 14–15 pp. 97–107; however, Mather's trusted friend, Simon Patrick, bishop of Ely, is unwilling to go as far as his continental colleagues and offers a more conservative middle ground. God did not give the people new languages, Patrick maintained, but merely confused their memory of the "Original Language which they spake before, as made them speak it very differently: So that by the various Inflections, and Terminations, and Pronunciations of divers Dialects, they could no more understand one another, than they who understand *Latin*, *Italian*, or *Spanish*; tho these Languages arise out of it" (*Commentary upon ... Genesis* [1695] 227).

⁷¹ Mather draws on Compegius Vitringa (1659–1722), the famous Dutch Hebraist, professor of Oriental languages and theology at Franeker, who argues in *Observationum sacrarum* (1683–1708) that "one language" (Gen. 11:1) is a figure of speech suggesting "unison" or "harmony." In defense of God performing a miracle, Mather cites Louis Ellies Du Pin (1647–1719), the ecclesiastical historian and doctor at the Sorbonne, whose *Dissertationes Historiques* (1711), vol. 1, diss. 3, ch. 2, p. 240, asserts that nothing is impossible for God, who can (if he pleases) form new tongues in people's brains and extinguish all traces of their former one.

⁷² Jean LeClerc decries the fondness of the vulgar for prodigies as positively harmful to the Holy Scripture: "To believe often without any Reason, that God alter'd the ordinary Course

alleged, had carefully studied the ebb and tide of the Red Sea so that "he might easily go from one Shoar to another upon the dry ground; and that being a Cunning Man, he vented among the ignorant Multitude, as a Prodigy what happened according to the ordinary Laws of Nature."⁷³ To rebut such Deist claims, Mather draws on *Cosmologia Sacra: Or a Discourse of the Universe* (London, 1701), by Dr. Nehemiah Grew (1642–1712), an English botanist, physician, and member of the Royal Society with decidedly Cartesian leanings. He derives from Grew a definition of miracles broad enough, ironically, to accommodate Jean LeClerc: "Unto a *Miracle*, it is requisite, that the *Cause* be *unknown* to us, either in *itself*, or as to the Manner of its *Operation*. The *Effect* also must be extraordinary, for the Limitation of *Time*, and *Place*, and other Circumstances. And the Design of it, must be something that is *Good*, and *Great*, and *Necessary*."⁷⁴

In framing a construct broad enough to allow for the possibility that the parting of the seas was an ordinary side effect of seasonal or inter-tidal changes, Mather (via Grew) paradoxically demystifies his own definition of miracles, rendering it nearly null and void. God maintains the "perfect Order" of his great machine through the Laws of Nature ("Second Causes"), Mather concedes; it would therefore be "not becoming His Divine Wisdome and Majesty, to do any thing, [I will add, *Ordinarily*,] without some Use of these Causes."⁷⁵ Mather's bracketed insertion is revealing; he clearly feels the need to reinforce Grew's demarcation between extraordinary and ordinary events, between genuine miracles and mere environmental conditions whose causes (though perfectly natural) are not easily discernable to awestruck believers – especially to those in climes far different from that of ancient Egypt. But in dwelling on secondary causes, Mather rationalizes these miracle stories and deprives them of their power to inspire faith in the supernatural.

This much is evident as Mather goes on to discuss Grew's explanations for the ten plagues of Egypt. Aaron's rods "were not converted into *Real Serpents*" in his contest with Pharaoh's magicians but "only invested with the phantastic Image of a Serpent." God would not be so wasteful as to create an authentic snake, endow it with a brain and organs digestive and procreative, only to transmute it "into its former [wooden] State again." Likewise, the plagues that infected the land started in the water, struck all marine animals – including "the *Hippopotamus*, and *Crocodile*" and amphibians – "with a *Dysenteric Murrain*," and so contaminated the waters with their bloody excrements that all turned

of Nature" is detrimental "because it fills the Minds of Men with a superstitious Credulity, exposes the Sacred History to the Contempt and Laughter of Prophane Men, and makes them disbelieve true Miracles and Prodigies" (*Twelve Dissertations*, diss. 13, p. 320).

⁷³ Jean LeClerc, *Twelve Dissertations*, diss. 13, p. 321.

⁷⁴ BA 16r (on Ex. 7:1). Nehemiah Grew, *Cosmologia Sacra*, bk. 4, ch. 5, pp. 194, 195, 196. Mather is similarly intrigued by John Locke's definition of miracles in *A Discourse of Miracles* (1706) 217–29, which Mather excerpts for inclusion in his annotation on Matth. 4:25.

⁷⁵ BA 16r (on Ex. 7:1). Grew (194–95).

red. Likewise, tiny eggs of lice mixed with dust, swarms of pesky flies, locusts, hail, and darkness – not wanting “their Natural Causes” – were carried into Egypt by a “Hot *African Wind*” and accompanied by “a *Shower of Dust*, such as often happens in such Countreys,” during the hot season of the year. Finally, reproaching Josephus Flavius for daring to compare Moses’ crossing the Red Sea to Alexander’s wading through the Pamphylian Straits at Phaselis, Grew opts for a “strong *East-Wind*” dividing the Red Sea and freezing the waters “with so Thick an Ice, as to bound them like a Stone Wall on both sides of the Way” and a warm “*Western Wind*” miraculously melting the ice and drowning Pharaoh’s pursuing armies. Mather’s sole remark on Grew’s rationalist explication speaks volumes: “This brings too much Nature into the Matter.”⁷⁶ In spite of Grew’s loud plea for the admissibility of miracles (and of Mather’s effort to tone down Grew’s naturalist explications), the outer wall has been breached, the momentum toward a paradigm shift, toward the gradual demystification of the Bible, is clearly irreversible – even as Mather tries to recover the purity of miracles by supplying an array of annotations ranging from conventional miracles to time-honored typology in his subsequent commentary on Exodus (chs. 7–9). Clearly, like Newton before him, Mather navigates a safe middle passage between the Scylla and Charybdis of natural philosophy and conservative exegesis. Yet Mather’s halfhearted disapproval lays bare his ambidextrous approach, one that looks forward and backward but one that can never again admit of pure miracles without substantial qualification.

Perhaps one final example may be sufficient to gauge Mather’s commitment to the natural philosophy of his time and its impact on the miracles of the Bible. Could science and religion really be harmonized? A case in point is the hotly debated miracle that facilitates Joshua’s victory over the five kings of the Amorites in their clash with Joshua’s army near the Valley of Ajalon (Joshua 10:1–14). Though the Jehovah of Armies had already decimated many of the Amorite warriors by hurling great hailstones on them (so the story goes), survivors beat a hasty retreat as the sun began to set. At this moment, Joshua petitions God to arrest the progress of the sun and moon so that he might vanquish his foes. “And the sun stood still, and the moon stayed, until the people had avenged themselves upon their enemies. *Is not this written in the book of Jasher?* So the sun stood still in the midst of heaven, and hasted not to go down about a whole day. And there was no day like that before it or after it, that the Lord harkened unto the voice of a man: for the Lord fought for Israel” (Joshua 10:13–14 KJV). In Mather’s time, few scriptures elicited as much controversy as the miraculous arrest of the sun and moon in Joshua’s day. Both ancients and moderns were equally divided about this extraordinary phenomenon.

⁷⁶ BA 16r, 17v (on Exod. 7:1) and Grew (195); see also Josephus Flavius (*Antiquities* 2.16.4–5), in *Antiquities of the Jews*, trans. William Whiston (1733), *Complete Works* (64–65).

As an aid to appreciating Mather's views on the topic, a quick review of the controversy is in order. Significantly, there was no unanimity among Jewish interpreters, whom Mather could have consulted in his own copies of Daniel Bomberg's famous edition *Biblia Rabbinica* (Venitiae, 1516–17, 2nd ed., 1547), or Sebastian Münster's *Hebraica Biblia, Latina Planeq. Sebast. Munsteri Tralatione* (2nd ed., Basileae, 1546), or Matthew Poole's invaluable *Synopsis Criticorum Aliorumque S. Scripturae Interpretum* (Londini, 1669–76) – all of which Mather relied on extensively throughout "Biblia Americana." Whereas Rabbi Solomon Jarchi (Rashi), Rabbi David Kimchi, Rabbi Ibn Ezra, and the Babylonian Talmud (Avodah Zarah 25a) insisted on a miracle that testified as much to their Ptolemaic cosmogony as to God's power to suspend the laws of nature, the twelfth-century Rabbi Moses ben Maimon – highly esteemed by Jews and Christians alike – opted for a metaphoric explanation in his *Liber [More Nevochim] Doctor Perplexorum* (Basileae, 1629). The sun did *not* stand still, because the Hebrew expression *tamim* means *perfect* and signifies the "longest day in the summer" or the summer solstice. The supposed miracle in Joshua's day is therefore simply "*ka-jom tamim*," or what people perceived to be "the longest possible day."⁷⁷

Christian interpreters similarly divided into camps of literalists and metaphorists. John Calvin, for instance, acknowledged the debate in his commentary on Joshua yet upheld the literal miracle even in light of Maimonides's linguistic accommodation. In Mather's generation, Archbishop James Ussher, Matthew Poole, Matthew Henry, and Simon Patrick, and many others besides William Derham, insisted that nothing short of a miracle had taken place in Joshua's day.⁷⁸ Even though the universe was governed by natural laws, they argued, the creator was not bound by them and could suspend them at any time. The list of early Enlightenment authorities who spurned the letter of Joshua's purported miracle is significantly shorter and includes such famous authorities as the Dutch jurist Hugo Grotius, founder of historical-contextual criticism of the Bible, the philosopher Baruch Spinoza, and a few lesser lights.⁷⁹

⁷⁷ Those who upheld Joshua's miracle are digested in *Mikraoth Gedoloth: Joshua* (72–74); the Rabbinic apocrypha *Pirke de Rabbi Eliezer* (ch. 52, pp. 423–24), even proposes a duration of "thirty-six hours" for this miracle; Maimonides was available to Mather in Johannes Buxtorf's Latin translation, *Rabbi Mosi Majemonidis Liber מורה נבוכים Doctor Perplexorum* (1629), pt. 2, ch. 35, p. 292; *Guide for the Perplexed* (224).

⁷⁸ John Calvin, *Commentaries on Joshua* (152–55); James Ussher, *Annals of the World* (London, 1660) 28 [26]; Matthew Poole, *Synopsis Criticorum* (1669–76) 3:964–68, and his *Annotations* (1683–85) 2:428–29; Matthew Henry, *Commentary on the Bible* (1689) 2:47–48; Simon Patrick, *Commentary on the Historical Books of the OT* (1727) 2:36–37; William Derham, *Physico-Theology: Or, a Demonstration of the Being and Attributes of God* (1713), 4th ed. (1716), bk. 2, ch. 3, p. 43.

⁷⁹ Hugo Grotius, *Annotiones in Vetus Testamentum* (1646) 1:106, and Spinoza, *Theologico-Political Treatise* (33–34).

Mather's annotations on Joshua 10:12–14 testify to his philosophical torment: he is clearly torn between the letter and the spirit, the authority of tradition and Newtonian science. Among his earliest comments on the miracle of the sun's arrest is his dismissal of Hugo Grotius' linguistic accommodation in *Annotationes in Vetus Testamentum* (Paris, 1646), which Mather leaves untranslated from his Latin original. Halting the course of the sun and moon in mid-heaven is not a miraculous contravention of the natural order, Grotius insisted, echoing Maimonides, but a Hebrew metaphor for the longest day in summer. If Mather did not like this argument at first, he was intrigued by the solution offered by Stephen Nye, whose *Discourse concerning Natural and Revealed Religion* (London, 1696) distinguished between historical verity and poetic license: "The Criticks and Rabbins, take notice, that it is not said by the *Historian*, that *Joshua* commanded the *Sun* and *Moon* to *stand still*, but hee recites the Words of a certain Book (supposed to bee a *Poem*) written by one *Jasher*; in which the *Poet* ... introduces *Joshua*, as requiring the *Sun* & *Moon* to stand still, while hee destroy'd the Enemies of the Lord: which indeed was an elegant Fiction, & very proper in a *Poem*, that was written on such an Occasion." The poet's explanation, Mather agreed with Nye, "should not bee strained further than it will naturally bear; that is, not be Understood as a real matter of Fact."⁸⁰ And yet, perhaps to wrench this miracle out of the grip of modern atheists, Mather interpolates the testimony of pagan poets: for if the Greek poet Callimachus (285–246 BCE) allows the sun to stop its chariot to observe "a *Chorus* of Nymphs"; if Herodotus's *Euterpe* cites the ancient Egyptians as proof for the sun's changing her course; if the Rabbis in the Talmud, the Geneva-born diplomat and classical scholar Ezechiel Spanheim, the French Bishop of Avranches Pierre-Daniel Huet, and Dr. William Jackson, president of Corpus Christi College (Oxford), confirm its historicity, and if Archbishop James Ussher "thinks he can demonstrate, that this Remarkable *Phaenomenon* of the Sun, fell out in the Year, 2555" Anno Mundi (c. 1450 BCE), then these weighty authorities simply cannot be ignored.⁸¹

⁸⁰ BA 18r–20r (on Josh. 10:12). Stephen Nye, *A Discourse concerning Natural and Revealed Religion* (1696), pt. 2, sec. 12, pp. 202–03.

⁸¹ BA 18r–20r (on Josh. 10:12, 13). Mather here leans on Simon Patrick's commentary on Joshua 10:12–14 (*Commentary* [1727] 2:36–37). Callimachus, *In Dianam* (ll. 181–82), *Callimachus* (2:9–18); Herodotus (2.142) reports of the Egyptians that "there were four times when the sun rose out of his wonted place – twice rising where now he sets, and twice setting where now he rises – and, say the priests, nothing became different among the Egyptians" (*History* 193–94); Ezechiel Spanheim's commentary on his edition of Callimachus, *In Callimachi Hymnos observationes* (1697); Pierre-Daniel Huet's anti-Cartesian *Alnetanae Quaestiones de Concordia Rationis et Fidei* (1690), bk. 2, ch. 12, sec. 27; Thomas Jackson's *Collection of the Works* (1653), vol. 1, bk. 1, ch. 15, p. 48; Ussher's *Annals* (1660) 28 [26]. The page number in brackets is a misnumbering for p. 28.

Mather wrestled with this miracle for quite some time. If the author of Joshua cites the heroic book of Jasher as evidence for Joshua's miracle, then the celestial event is not a history of what had actually happened but a poetic celebration of Joshua's military victory, not a philosophic account, but poetic hyperbole. "The Scriptures were not written with a Design to teach us Natural Philosophy," Mather concedes, "but to shew us the way how to Live and Dy well. They might therefore use popular Forms of Speech, neither affirming nor denying the philosophical Truth of them To have rectified the vulgar Conceptions of Men, concerning all the *Phænomena*, which upon Occasion are mentioned in the Scriptures, would have required a large System of Philosophy, & have rendred the Scriptures a Book unfitt for common Capacities. And the New Theory of Nature [Copernicus, Kepler], would have seemed as incredible to most men, as Miracles themselves. How Incredible does the Rest of the *Sun*, with the Motion of the *Earth*, seem to all Men but Philosophers?" Mather's final concession – here cribbed from Robert Jenkin's third edition of his popular *Reasonableness and Certainty of the Christian Religion* (London, 1708) – echoes the dicta of Galileo, Hobbes, Spinoza, Burnet, Whiston, and Newton and illustrates that Enlightenment science and the inerrancy of the Bible were increasingly difficult to reconcile.⁸²

Although Mather is supremely unwilling to sever the ties between natural philosophy and theology, as Spinoza recommended in 1670, his commentary in "Biblia Americana" not infrequently moves in that direction. For Mather, the debate is not about whether the Bible is right or wrong but whether the biblical message and linguistic vehicle are in agreement. The Hebrew prophets used the language and concepts of the vulgar to instruct the people – or as Galileo has it, the Bible teaches people how to go to heaven, not how heaven goes.⁸³ Theologians of Mather's time therefore had to learn the art of distinguishing between intended meaning and the ancients' prejudices, between language and scientific verity, between the form in which a truth was expressed and the intended truth itself. In this manner, then, Mather is able to reconcile the venerable tradition of the Bible with Newtonianism, yet he does so frequently at the cost of separating the letter of the Word from its spirit. If Mather's interest in science inevitably affects the way he interprets Scripture, his theological purview determines even more so how he marshals his empirical evidence. Conservative in his theology yet welcoming of all manner of new learning, he is – perhaps not surprisingly – more audacious in employing the new sciences as an exegetical

⁸² BA 18r–19v (on Josh. 10:12); Robert Jenkin's *Reasonableness and Certainty of the Christian Religion*. (1708) 2:211–12.

⁸³ In his "Letter to the Grand Duchess Christina" (1615), Galileo Galilei defends his own orthodoxy by attributing this radical accommodationism to Cardinal Baronius, whom he quotes as saying "that the intention of the Holy Spirit is to teach us how one goes to heaven and not how heaven goes" (*Galileo Affair* 96).

tool than most of his peers who supplied American pulpits until the Revolution. So, too, few (if any) traces can here be found in “Biblia Americana” to validate the popular caricature of Mather as an old witch doctor and diehard bigot; instead, his grand project allows him to reclaim his rightful place in the early Enlightenment in America and in the transference of European scholarship to the colonies.

Section 3

Cotton Mather: Theologian, Exegete, Controversialist

During the early modern era, the cosmological and philosophical revolutions precipitated by Copernicus, Kepler, Galileo, Descartes, Hobbes, and Spinoza not only challenged the traditional biblical cosmology, but also called into question the integrity of the scriptural texts and the harmony of the two testaments. Of course, for the majority of ordinary believers, the Good Book remained the Word of God. In the Protestant camp, the scientific revolution caused many academic theologians to reappraise the Bible in terms of a new hyper-literalism, as a quasi-scientific source of knowledge and storehouse of literal facts that could be held to the new standards of empiricism. The more radical minds of the period, however, began to push for a separation of science and religion as two distinct fields of human inquiry, because the Bible seemed to address moral, not mathematical truths. For them, Galileo's famous observation that the Bible taught believers about divine redemption, not about the laws of physics, rang all too true. This dramatic qualification of the Bible's mandate, however, could not but impact other claims that were equally invested in the authenticity of the Bible, in textual transmission, and verbal inspiration.

To those who believed that every word in the Holy Scriptures was divinely dictated, the very idea of research into such matters was shocking. If the seal of God's imprimatur were broken, how was Truth to be certified? If the Word turned out to be more human than divine, what was to become of faith in a transcendent God? The rise of biblical criticism in the seventeenth century thus contributed to eroding the authority of the Bible. In turn, the subversion of divine authority went hand in hand with the elevation of human reason, with confidence in man's judgment, and with his emancipation from dependence on tradition. Biblical criticism therefore lies at the root of what is called the Enlightenment and the evolution of modernity in Western culture. It is still widely believed that modern biblical criticism was an invention of radical German theologians of the late eighteenth and early nineteenth centuries. Johann David Michaelis (1717–91), Johann Salomo Semler (1725–91), Johann Gottfried Eichhorn (1752–1827), Friedrich Schleiermacher (1768–1834), Ferdinand Christian Baur (1792–1860), David Friedrich Strauss (1808–74), and Julius Wellhausen (1844–1918) are generally cited as the main representatives of German "Higher

Criticism" which, in the second half of the nineteenth century, would seep into English and American seminaries and lead to the great division between theological liberalism and a programmatically anti-modernist literalism. While German Higher Criticism certainly took the philosophical and historical analysis of the Bible to a whole new level of sophistication and radicalism, the origins of this method lie in seventeenth-century England, France, and the Netherlands – long before the German rationalists began to dominate the discipline.¹

When James I acceded to the throne of England in 1603, no one seriously doubted (or dared to question) the authority of the Bible as the Word of God, the divine inspiration of its prophets, their supernatural visions, dreams, and voices. When the last of the reigning Stuarts was laid to rest in 1714, the Good Book, in the eyes of a growing number of fair-minded scholars, had irrevocably lost its epistemological infallibility. Textual variants, lacunae, repetitions, interpolations, and anachronisms signified to the foremost scholars of the age that textual origin and transmission was anything but certain or trustworthy, that the Bible's verbatim inspiration and divine dictation were simply pious myth, that revelation's exclusive object was obedience to God, not disclosure of rational knowledge about nature. The Mosaic Hexameron, once believed to be a scientifically unassailable account of what had happened a mere six thousand years ago, by the beginning of the eighteenth century seemed little more than an abridged allegory adapted to the needs of an ignorant audience best managed by tales of wonder and miracles that aimed at enforcing law and order on a fractious people. If at the beginning of the seventeenth century, Moses was still held to be the author of the Pentateuch, by century's end, the Mosaic authorship could no longer be maintained without serious qualification. The followers of Spinoza now argued that the Hebrew lawgiver wrote little more than the tables of the law and ordinances; remainder of the Pentateuch was of considerably later origin.² The credibility of the New Testament fared hardly better. At the beginning of James I's reign, theologians were still convinced that the Holy Spirit had dictated every word of the New Testament to the Apostles and Evangelists. By the time Queen Anne was laid to rest, radical Deists claimed that the New Testament texts had been manipulated by competing sects and that the canon was the result of factional strife, which by the time of the Council of Nicaea (325 AD) had barred from canonization more books than it actually retained.³

¹ See especially K. Scholder's *Birth of Modern Critical Theology* (17–85), H. Frei's *The Eclipse of Biblical Narrative* (17–154), H. G. Reventlow's *Authority of the Bible* (194–334), G. Reedy, S. J., *The Bible and Reason* (1985), R. E. Brown's *Jonathan Edwards and the Bible* (esp. chs. 2, 4–5), J. Sheehan's *The Enlightenment Bible* (27–117), and D. Sorkin's *Religious Enlightenment* (1–22).

² The scribe Ezra (5th-c. BCE) either rewrote the lost books from memory after the Babylonian captivity (2 Esdras 14:21–22) or compiled and adapted the surviving fragments to be edited and updated by later generations of public writers.

³ Among the principal seventeenth-century skeptics are the English philosopher Thomas Hobbes, (*Leviathan* [London, 1651], part III, chs. 33, 37); the French critic Isaac La Peyrère

It is safe to say that the hermeneutical revolution in the wake of Thomas Hobbes' *Leviathan* (1651), of Isaac La Peyrère's *Prae-Adamitae* (1655), and especially of Benedict Spinoza's *Tractatus Philosophico-Politicus* (1670) seriously ruptured the Bible's hitherto impregnable status as the Divine Oracle of God.⁴ Theologians on both sides of the English Channel lashed out in pious rage at these latest manifestations of atheism; yet try as they might, no individual or concerted effort could impede the subversive critique of the scriptures once the followers of Hobbes, of La Peyrère, and of Spinoza had begun to infiltrate the marketplace of ideas. Terms of derision became the favorite smear by which orthodox clergymen tried to rein in their colleagues who followed Hobbes, Spinoza, and Deism. Even the French Oratorian priest Richard Simon (1638–1712), best known for his classic *Histoire critique du Vieux Testament* (1678), and the Dutch Arminian professor of ecclesiastical history Jean LeClerc (1657–1736), notorious for his assault on the divine inspiration of the Holy Scriptures in his *Sentimens de quelques Théologiens de Hollande* (1685), branded each other “Spinozists.” Through this mutual defamation, both clergymen tried to render themselves immune to the charge of heresy. In debating these unprecedented challenges to the authority of the Bible, physico-theologians and natural philosophers re-examined their evidence, pored over timeworn dogmas, and launched in the process the beginnings of modern biblical criticism.⁵ What

(*Prae-Adamitae* [n.p. 1655], translated as *A Theological Systeme* [London, 1655] and *Men before Adam* [London, 1656], bk. III, chs. 1–5, pp. 129–163; bk. IV, chs. 1–2, pp. 200–18); the English Quaker Samuel Fisher (*The Rustick's Alarm to the Rabbies* [London, 1660], esp. Exercitation II, chs. 2–3, pp. 11–105); the Jewish philosopher Benedict Baruch Spinoza (*Tractatus Theologico-Politicus* [1670], esp. chs. 1–2, 6–8); the French Oratorian Richard Simon (*Histoire critique du Vieux Testament* [Paris, 1678], English transl. *A Critical History of the Old Testament, in Three Books* [London, 1682], esp. bk. I, chs. 1–8, 16–23); the Dutch Arminian Jean LeClerc (*Sentimens de quelques Théologiens de Hollande sur l'Histoire du Vieux Testament* [Amsterdam, 1685], partially translated as *Five Letters Concerning the Inspiration of the Holy Scriptures* [n.p. 1690], esp. Letters 1–2, pp. 9–150; and LeClerc's more moderate *Genesis, sive, Mosis prophetae liber primus* [Amstelodami, 1693], excerpted and translated as *Twelve Dissertations Out of LeClerc's* [sic] *Genesis* [London, 1696], Dissert. 3, pp. 105–141); and the English Deist John Toland (*Amyntor: Or, A Defence of Milton's Life* [London, 1699], esp. pp. 18–81). See also R. H. Popkin's *Third Force* (1992), *Scepticism and Irreligion* (1993), and *The History of Scepticism* (2003), and L. M. McDonald and J. A. Sanders, eds. *The Canon Debate* (2002), esp. part 3.

⁴ To be sure, neither Hobbes, nor La Peyrère, nor Spinoza was the first to challenge the Bible's sacrosanct status. Their textual criticism and rejection of Moses as author of the Pentateuch, and their argument that most of the Pentateuch and many of the other OT texts were compilations and redactions of older (but lost) manuscripts rested on the daring investigations of such predecessors as the German theologian Andreas Karlstadt (1486–1541), the Flemish Priest Andreas Masius (1514–73), the Portuguese Jesuit Bento Pereira (1535–1610), the Flemish Jesuit Jacques Bonfrère (1673–1642), the Dutch Oratorian Johannes Morinus (1591–1659), the Huguenot scholar Louis Cappellus (1585–1658), and the Dutch Jurist Hugo Grotius (1583–1645). See H.-J. Kraus, *Geschichte der historisch-kritischen Erforschung* (28–53).

⁵ See Jean LeClerc's anonymous *Sentimens de quelque Théologiens Hollande* (1685). Unless otherwise noted, my references are to the translated abstract *Five Letters Concerning the Inspiration of the Holy Scriptures* (1690). LeClerc's charges against Simon's Spinozism appear in *Five Letters*

is less understood is how the historical-contextual critique of the Bible as generated by Hobbes, Spinoza, Simon, and LeClerc quickly caught on – even among their greatest detractors. Ironically, the seeds of Spinozism germinated especially in the theological treatises and commentaries of those who most sought to uproot them. In fact, many ostensible refutations did more to proliferate Spinoza's views than to impede their spread.⁶

Even faraway New England was not immune to Spinozist influence; Cotton Mather had synthesized the hermeneutical and philological critique in his "Biblia Americana" manuscript long before anyone else would grapple with it in the North American colonies.⁷ The purpose of this chapter is to sketch some of these transatlantic connections that hitherto have escaped critical attention. Mather is intellectually situated between the Reformed dogmatism of the Post-Reformation era and the higher critics of the late eighteenth century. He confronted head-on some of the most important hermeneutic and philological controversies during the early Enlightenment: the authorship of the Pentateuch, anachronistic interpolations, the problem of textual transmission, divine communication, and verbal inspiration. This confrontation led to a surprising rapprochement, an accommodation which demonstrates that once the heat of passion had subsided, the intellectual roots of the Enlightenment began to sprout in late seventeenth-century Boston.⁸

(Third Letter, esp. pp. 124–27). Richard Simon's countercharges appeared in hot pursuit in his *Réponse au Livre intitulé Sentimens* (1685). The mudslinging and mutual incrimination between Simon and LeClerc are examined in J. D. Woodbridge, "Richard Simon's Reaction to Spinoza's 'Tractatus'" (201–26). The single most important studies on Jean LeClerc's significance as a biblical critic are Friedrich Stummer's inaugural dissertation *Die Bedeutung Richard Simons für die Pentateuchkritik* (esp. 1–6, 22–105); and more recently Sascha Müller's magnificent *Kritik und Theologie* (2004).

⁶ W. van Bunge and W. Klever (eds.), *Disguised and Overt Spinozism* (1996). Spinozism never formed a school, they argue, but "traces appear of loosely organised groups in which Spinoza's works were studied and discussed." Moreover, "several of the so-called 'refutations' of Spinozism that were published 'around 1700', were actually highly skillful efforts at propagating Spinoza's views." Supporters of his ideas were forced "to resort to silence, secrecy, or the use of 'double language'" (p. viii). See also, R. L. Colie's "Spinoza in England" (183–219). Among the most useful studies of Spinoza's impact on the authority of the Bible are L. Strauss's *Spinoza's Critique of Religion* (1930, 1965, 1997); J. S. Preuss's *Spinoza and the Irrelevance of Biblical Authority* (2001); S. Hampshire's *Spinoza and Spinozism* (2005); G. Hunter's *Radical-Protestantism in Spinoza's Thought* (2005); T. L. Frampton's *Spinoza And the Rise of Historical Criticism* (2006). Useful background information on the history of biblical criticism can be found in N. Sykes, "The Religion of the Protestants" (175–98); W. Neil, "The Criticism and Theological Use of the Bible" (238–93); and A. Richardson, "The Rise of Modern Biblical Scholarship and Recent Discussion of the Authority of the Bible" (294–338).

⁷ R. E. Brown's fine study *Jonathan Edwards and the Bible* (2002) shows that Jonathan Edwards wrestled with many of the same issues of the critical historical debate in the middle of the eighteenth century.

⁸ Traditionally, historians have dated the beginning of the Enlightenment in British North America from the middle of the eighteenth century and pointed to Benjamin Franklin as the first representative figure, before turning to the Founding Fathers and the ideology of the

The Integrity of the Bible's Histories: Who was the Author of the Five Books of Moses?

Long before the French physician Jean Astruc (1684–1766) published his *Conjectures sur les Mémoires Originaux* (1753) and surprised the Republic of Letters with the idea that Genesis was compiled of two major and nine minor parallel memoirs distinguishable through their use of God's appellation "Élohim" and "Jéhovah" (131–48), Hobbes, La Peyrère, Samuel Fisher, Spinoza, Simon, LeClerc, John Toland, William Whiston, Sir Isaac Newton – and Cotton Mather – debated how much if any of the Pentateuch had actually been composed by Moses.⁹ In examining the textual evidence, they were guided by essentially the same principles of philological research that Renaissance scholars had put to good use in freeing Greek and Roman classics from layers upon layers of textual accretions, interpolations, and outright forgeries, which centuries of copyists and emendators had injected into their editions.¹⁰ The Holy Scriptures – according to one famous critic – had to be subjected to the same philological principles of investigation as any other book, for only then could it be liberated from the fetters of dogmatic assumptions, credulity, and tradition that glossed over distinctions between universal truths and principles of purely temporal significance. In the best Cartesian manner of his age, the Dutch philosopher Spinoza laid bare his ground-rule of interpretation: "I determined to examine the bible afresh in a careful, impartial, and unfettered spirit, making no assumptions concerning it, and attributing to it no doctrines, which I do

American Revolution. *Enlightenment* in America primarily signified a political phenomenon. Representative studies of this traditional approach include such mainstays as P. Gay's *The Enlightenment* (1969), H. F. May's *The Enlightenment in America* (1976), H. S. Commager's *The Empire of Reason* (1977), and R. A. Ferguson's *The American Enlightenment* (1997). More recently, scholars have begun to reexamine the American Enlightenment as a much more multifaceted transatlantic phenomenon. See, for instance, J. G. West, Jr.'s *The Politics of Revelation & Reason* (1996); J. E. Smith's "Puritanism and Enlightenment: Edwards and Franklin" (195–227); Frank Kelleter's *Amerikanische Aufklärung* (2002); C. Beneke, *Beyond Toleration* (2006); S. Manning, et al. eds. *The Atlantic Enlightenment* (2008); R. M. Calhoun's *Political Moderation in America* (2009).

⁹ Jean Astruc, *Conjectures sur les Mémoires Originaux dont il paraît que Moïse s'est servi pour composer le Livre de la Genèse* (Buxelles, 1753), edited, introduced, and annotated by P. Gibert (1999). Citation references are to Gibert's edition. For the significance of Astruc's documentary hypothesis (Quellen), see F. Stummer's *Bedeutung* (105–10) and H.-J. Kraus' *Geschichte* (96–98, 140–43, 152–55). A recent discussions is A. M. Acosta's "Conjectures and Speculations: Jean Astruc, Obstetrics, and Biblical Criticism in Eighteenth-Century France" (256–66).

¹⁰ See, for instance, the philological innovations of the French scholar Joseph Justus Scaliger (1540–1609), whose restored editions of Catullus, Tibullus, and Propertius (1577) were followed by his superb reconstruction of ancient chronology, in *Opus de emendatione Temporum* (1583), and of Eusebius Pamphili's chronicle, in *Thesaurus Temporum* (1606). For Scaliger's contributions to textual criticism and biblical chronology, see A. Grafton's magnificent *Joseph Scaliger* (1983–93).

not find clearly set down."¹¹ Doing so was no easy task. It involved evaluating the integrity of the biblical texts according to their time, place, and circumstances of composition; it entailed establishing the texts' literary forms, didactic purposes, contradictory opinions, and intertextual citations to determine their authenticity; it required scrutinizing the texts as an organic whole, their original languages, their stylistic consistency, and anachronistic interpolations to discern if one or more authors or compilers had been at work during different time periods.¹² For Spinoza and those who followed in his steps, the methods and principles of scriptural interpretation were not unlike those employed in the study of nature. Clear definitions must be derived from empirical data, just as much as these data must be deduced from clearly established axioms. The history of each book of the Bible should therefore be established on the basis of all available information, for the identity, conduct, occasion, and purpose of the author determine the meaning of his book just as much as the time period in which he lived, the language and metaphors he used, and the demands of his benefactors for whom the book was written. To determine its authenticity, Spinoza demanded, we must uncover "the fate of each book: how it was first received, into whose hands it fell, how many different versions there were of it, by whose advice was it received into the Bible, and lastly, how all the books now universally accepted as sacred, were united into a single whole." Most of all, we must ascertain if it has been "tampered with by sacrilegious hands, or whether errors can have crept in, and, if so, whether they have been corrected by men sufficiently skilled and worthy of credence" (*TTP* 103).

Given these tools, what specific evidence did textual critics muster to substantiate the claim that the Pentateuch was *not* authentic and Moses *not* its author or, at best, authored no more than the laws, statutes, and ordinances of the Torah? Among the most conspicuous types of evidence cited by seventeenth-century commentators (and their many latter-day emulators) are anachronistic interpolations and lacunae, narrative repetitions, stylistic variance, and shifts in point of view.¹³ It is worth recalling the principal points of departure from the orthodox claim that the Holy Spirit dictated every word to his amanuenses

11 The first English translation of the entire *Tractatus Theologico-Politicus* (1670) appeared as *A Treatise Partly Theological, And Partly Political, Containing some few Discourses, To prove the Liberty of Philosophizing* (1689). My citations are from Spinoza's "The Preface," in *A Theological-Political Treatise*, translated by R. H. M. Elwes (8). All references are to the Elwes edition; hereafter *TTP*.

12 The most detailed description of these philological guidelines appears in chapter 7 of Spinoza's *TTP*. They are more or less tacitly maintained or implied in Hobbes' *Leviathan* (1651), edited by R. Tuck (261–68); Samuel Fisher's *Rusticus Ad Academicos* (esp. Exercitation I and II); in Richard Simon's *Critical History of the OT* (1682), bk. I, chs. 2–4 (esp. pp. 20–22, 24–28, 29–34); and in LeClerc's *Five Letters* (Letter 1, esp. pp. 15–20, 33–40 and Letter 2, pp. 57–93).

13 Hobbes presented his most trenchant evidence in *Leviathan* (ch. 33); Spinoza, in *TTP* (chs. 8–10); Simon, in *Critical History of the OT* (chs. 2–5); LeClerc, in *Twelve Dissertations* (Dissert. 3), and in *Five Letters* (esp. Letter 1–2).

Moses, the prophets, and apostles, who faithfully and accurately wrote them down and shaped the various books of the Holy Scriptures. The degree to which Cotton Mather's exegesis was informed by this critical debate and – more significantly – how much of it he embraced and integrated in his “Biblia Americana” can then be determined. Internal evidence suggests that many passages in the books of Moses are of considerably later origin than the purported period in which the divine Lawgiver is to have lived. For instance, the third-person narrator in the Pentateuch frequently recounts historical events that did not take place till long after Moses' death. Since the narrator does not earmark them as prophetic utterances or fulfillments, some other explanation needed to be found.¹⁴ The selection of the following passages is almost always cited by those who refused to toe the dogmatic line of verbal inspiration:

- Gen. 12:6: And Abram passed through the land, unto the place of Sichem, unto the plaine of Moreh. And the Canaanite *was* then in the land.¹⁵
- Gen. 14:14: And when Abram heard that his brother was taken captive, he armed his trained *servants* ... and pursued *them* [Chedorlaomer and Tidal] unto Dan.
- Gen. 36:31: And these *are* the kings that reigned in the land of Edom, before there reigned any king over the children of Israel.
- Numb. 12:3: (Now the man Moses was very meeke, above all the men which were upon the face of the earth.)
- Numb. 21:14: Wherefore it is said in the booke of the warres of the Lord, what he did in the Red sea, and in the brookes of Arnon.
- Deut. 34:6: And hee buried him [Moses] in a valley in the land of Moab, over against Beth-Peor: but no man knoweth of his Sepulchre unto this day.¹⁶

Mather's comments on these controversial passages are highly revealing; he wrestled with each of the underlying issues to rescue the scriptures out of

¹⁴ Spinoza introduced this significant distinction: The writers of the Bible rarely if ever mention any secondary causes, because the religious zeal and pious habit of the ancients attributed every action, blessing, inclination, or thought as coming from God. “Hence we must not suppose that everything is prophecy or revelation which is described in scripture as told by God to anyone, but only such things as are expressly announced as prophecy or revelation, or are plainly pointed to as such by the context” (*TTP* 15).

¹⁵ All biblical citations from and references to the King James Version of the Bible (KJV) are to the first edition (1611) of the Authorized Version. Though consulting several different translations of the Bible, Mather generally quoted from the KJV or furnished his own translation from one of the many Latin versions he owned.

¹⁶ This list is far from comprehensive. In the second half of the 17th century, questions about Moses's authorship of the Pentateuch were also raised about Gen. 20:7 (1 Sam. 9:9); 22:14; 35:21; 40:15, Exod. 6: 26–27; 16:35, 36; Deut. 1:1, 2:12, 3:11, 34:10. For a forceful defense of Moses's authorship of these passages, see esp. Richard Kidder's *Commentary on the Five Books of Moses: With a Dissertation Concerning the Author or Writer of the said Books* (Diss. xxi–lxxx).

the hands of their historicist detractors. The process of restoring harmony was not always easy. Over a period of thirty years, he excerpted, anthologized, and digested for his "Biblia Americana" hundreds of commentaries, reference works, theological monographs, polemical tracts, sermons, medical handbooks, geographies, and cosmographies he had inherited from his father and grandfathers, purchased from book dealers fresh upon arrival in Boston harbor, borrowed from colleagues, accessed at nearby Harvard across the Charles River, or received as personal gifts to add to his prized library.¹⁷ If nothing else, his passionate bibliolatriy is apparent most of all in his magnum opus, which amounts to a clearing house for all the ongoing controversies of his day. Such is the case of the vexed verse in Gen. 12:6, which Mather tried to wrest from of the clutches of the Hobbists and Spinozists and those who followed in their steps.

Anachronistic references to historical events, persons, and occurrences in the five books of Moses were particularly troubling to conservative interpreters to whom divine dictation and the infallibility of the Bible were religion. Anyone who questioned the integrity of the biblical texts was met with uniform condemnation and opposition. This resistance is not at all surprising; even the ancient rabbis of the Talmud bestowed their anathemas on those who cast doubt on the Torah's supernatural origin or its less-than-flawless preservation. The Babylonian Talmud warns the faithful that "HE WHO MAINTAINS THAT THE TORAH WAS NOT DIVINELY REVEALED ... hath despised the word of the Lord" and broken his Law. "[T]hat soul shall utterly be cut off" (Numb. 15:31). In fact, "even if he asserts that the whole Torah is from Heaven, excepting a particular verse, which [he maintains] was not uttered by God but by Moses himself, he is included in 'because he hath despised the word of the Lord.' And even if he admits that the whole Torah is from Heaven, excepting a single point, a particular ad majus deduction or a certain gezerah shawah, – he is still included in 'because he hath despised the word of the Lord'" (Sanhedrin 99a; see also Avodah Zarah 18a).¹⁸ The codifiers of *The Westminster Confession* (1647) and the *Declaration of the Faith and Order Owned and practised in the Congregational Churches in England* (1658) were not far behind the Talmudists'

¹⁷ The following resources list the works owned by and accessible to the Mathers in the first decades of the eighteenth century: "Catalogue of Dr. Cotton Mather's Library." J. H. Tuttle's list of extant books, in "The Libraries of the Mathers" (269–356), is far from complete. According to K. Arbour, AAS's former Head of Readers' Services, more than 500 titles were accidentally deleted from Tuttle's list during the alphabetizing process. For a substantially complete list of works accessible to Mather at Harvard, consult *Catalogus Librorum Bibliothecae* (1723) and *Supplementum* (1725), both listed in *Short-Title Evans* [2432 and 2641]. Significantly, a multitude of books Mather excerpts or refers to in his "Biblia Americana" are not listed in any of these collections. For book collections received as gifts or books borrowed from others, see *Diary* 1:368, 532; 2:2, 339; *Diary* 3:49, 111. See also H. J. Cadbury, "Harvard College Library" (20–48).

¹⁸ *The Babylonian Talmud* (Soncino). Brooklyn, NY: Judaica Press, Inc., 1973.

condemnation of the unfaithful – even if Calvinists did not spell out the punishment awaiting skeptics: “the authority of the holy Scripture, for which it ought to be believed and obeyed, dependeth not upon the Testimony of any man or Church; but wholly upon God (who is Truth it self) the Author thereof; and therefore it is to be received, because it is the Word of God.” Both the Old and New Testaments “being immediately inspired by God, and by his singular care and providence kept pure in all Ages, are therefore Authentical.”¹⁹ This orthodox position was not confined to the perimeter of the British Isles. Geneva’s own Francis Turretin (1623–87), magisterial expounder of Reformed theology and author of *Institutio Theologiae Elencticae* (Genevae, 1688–90), made it a point of orthodoxy that the Bible cannot, must not, contain textual blemishes of any kind either in the original manuscripts or any of their copies. “If God suffered either the sacred writers to err and to slip in memory, or incurable blemishes to creep into” the Holy Scriptures, Turretin contended, skepticism and mistrust would soon overwhelm all:

Unless unimpaired integrity characterize the Scriptures, they could not be regarded as the sole rule of Faith and practice, and the door would be thrown wide open to atheists, libertines, enthusiasts and other profane persons like them for destroying its authenticity (*authentican*) and overthrowing the foundation of salvation. For since nothing false can be an object of Faith, how could the Scriptures be held as authentic and reckoned divine if liable to contradictions and corruptions? Nor can it be said that these corruptions are only in smaller things which do not affect the foundation of Faith. For if once the authenticity (*authenticia*) of the Scriptures is taken away (which would result even from the incurable corruption of one passage), how could our Faith rest on what remains? And if corruption is admitted in those of lesser importance, why not in others of greater? Who could assure me that no error or blemish had crept into fundamental passages? (Turretin 2.5.6.1, 2.5.7.2)²⁰

The vehemence and urgency of Turretin’s queries are not exceptional. They underscore in not-so-subtle ways the fear, doubt, and suspicion with which the likes of Hobbes and Spinoza were received when they dared to question the Bible’s authenticity or trustworthiness. Far too much was at stake. But what were commentators to do with nagging problems that were too obvious and well known to be ignored?

Moses’s odd comment in Genesis that the Canaanites still inhabited their native soil when Abram prospected the Promised Land was particularly aggravating. When this Patriarch sojourned through Canaan – Moses recounted the ancient chronology – “the Canaanite was then in the land” (Gen. 12:6, *emphasis added*). The knotty Hebrew adverb *az* [‘az], i.e., “then,” quite obviously implies

19 W. Walker, *Creeds* (368, 369).

20 The Mathers owned a copy of Francis Turretin’s *Institutio Theologiae Elencticae* (1688–90), a conservative defense of Calvinist doctrine. My citation is from the G. M. Giber translation of Turretin’s *Institutes of Elenctic Theology* (1992).

that when Moses wrote the Pentateuch the Canaanites no longer occupied their homeland. But this temporal reference flatly contradicts the historical situation and context in which Moses wrote; the realm of the Canaanites was neither conquered nor the archenemy overthrown until several centuries after the Hebrew Lawgiver's death. Such radical anachronisms seemed grist for the mills of Hobbes' disciplines. The sage of Malmsbury firmly dismissed the Mosaic authorship of this passage (and for that matter, of most of the Pentateuch), because it "must needs bee the words of one that wrote when the *Canaanite* was not in the land; and consequently, not of *Moses*, who dyed before he came into it" (*Leviathan* 33.262).²¹ Following in his steps, the French Marrano Isaac La Peyrère – now best known for his Pre-Adamite thesis – was not to be eclipsed by his English contemporary and argued, "the difficulty is, to know what are the words of the Copier, and which are the real words of the Original" (*Theological Systeme*, lib. 4, cap. 2, p. 212). Spinoza was not far behind his predecessors and avowed – against Rabbi Ibn Ezra's explicit injunction to "remain silent" – "that this passage must have been written after the death of Moses, when the Canaanites had been driven out, and no longer possessed the land." For this reason, "it cannot be the work of Moses, in whose time the Canaanites still possessed those territories" (*TTP* 122).²² So, too, the Roman Catholic Richard Simon, whose *Histoire critique du Vieux Testament* (1678) – placed on the *Index Librorum Prohibitorum* and barely escaped complete destruction – was ostensibly written to refute Spinoza's radical *Tractatus*, insisted that "If *Moses* was the Authour of the *Pentateuch* ... this [verse] could not be writ but after they had been driven out." Like countless others, this passage corroborated the fact that many additions and changes had been introduced in the Torah throughout its long provenance and that the divine Lawgiver therefore "*cannot be the Authour of the Books which are attributed to him*" (*Critical History* 36–37).²³

21 Unless otherwise noted, all italicized passages appear in the original sources.

22 Perhaps to diminish the danger of novelty, Spinoza added an authoritative citation from Rabbi Abraham Ibn Ezra's *Commentary*: "It is possible that the Canaanites seized the land of Canaan from some other tribe at that time," Ibn Ezra (1089-c. 1164) speculated. "Should this interpretation be incorrect, then there is a secret meaning to the text. Let the one who understands it remain silent," in *Ibn Ezra's Commentary on the Pentateuch: Genesis*. (1:151). Quite obviously, Ibn Ezra was more audacious than his famous colleagues were prepared to be. Rabbi Solomon ben Jarchi (1040–1105), known by the acronym Rashi, and Rabbi Moses ben Nachman (1194–1270), also called Ramban, were much more circumspect than to allow for any tampering with the Torah; they both maintained the integrity of the Torah by interpreting the passage prophetically as divine assurance of God's promise to Abram, in *Mikraoth Gedoloth* (1:153–55), and in Nachmanides's *Commentary on the Torah* (1:170–71).

23 Simon was expelled from the Oratorian order and all copies (except for a few that escaped) were confiscated and destroyed. His English translator was all too conscious of the inflammatory nature of the work and prefaced his translation with the following caveat: "If notwithstanding what I have already said, there shall be any who, at the first sight, shall be scandaliz'd with this Authour's free way of handling the Holy Scriptures, I give this caution to all such persons, either to let it alone and not concern themselves with it, or else to read it

It is one of those ironies of exegetical history that Richard Simon's adversary in the Netherlands outstripped Simon's radical criticism by approaching textual problems from a different perspective. In his anonymously published *Sentimens de quelques théologiens de Hollande* (1685), Jean LeClerc insisted that anachronisms were only problematic because interpreters erroneously believed in verbal inspiration. They regarded every word in the scripture as divinely inspired, timeless, and preserved in its original state: "They believe, first, that the sacred Historians were inspir'd with the Things themselves: And next, that they were inspir'd also with the Terms in which they have express'd them. In a word, that the holy History was dictated word for word by the holy Spirit, and that the Authors, whose Names it bears, were no other than Secretaries of that Spirit, who writ exactly as it dictated" (*Five Letters* 30). This misconception gave rise to all sorts of textual anachronisms and exegetical puzzles that could be solved if the doctrine of the Bible's verbal inspiration were abandoned once and for all. The Holy Spirit, LeClerc postulated, only inspired his prophets with divine ideas, but left the choice of words, metaphors, and syntax to the dexterity of his amanuenses. Later interpolations therefore posed no challenge because they updated subsequent generations on the historical changes that had occurred since the Bible's first composition. Still feeling the sting of his vociferous critics nearly a decade later, LeClerc tried to offer a more conciliatory solution in his *Genesis, sive, Mosis Prophetæ liber primus* (Amsterdam, 1693). In this work he argued that the reference to the Canaanites' disappearance from the Holy Land (Gen. 12:6) might have been "added by a later hand, after the Expulsion of the *Canaanites*." In fact, this anachronism in the Mosaic text is, perhaps, "one of those superfluous Observations which frequently occur in the Sacred Volumes, which might have been omitted, without any Injury done to the History" (*Twelve Dissertations* 117–18).²⁴

Skepticism in the "Garden of Criticism"

In the late summer of 1693, when Mather began to work in earnest on his "Biblia Americana," the issue of biblical certainty was at the forefront of the controversy. He considered his Bible commentary "one of the greatest Works,

clear through, by which time I doubt not but they will be satisfy'd of their too nice scruples" ("To the Reader," in *Critical History* A2v). If that didn't fetch'em, I don't know my Arkansas! See also P. Gibert's recent French edition *Histoire Critique Du Vieux Testament suivi de Lettre sur l'inspiration* (2008). For the significance of Simon's of historical scholarship on the OT, see F. Stummer's *Bedeutung* (36–105), R. A. Muller's *Post-Reformation Reformed Dogmatics* (3:119–48); and especially S. Müller's *Kritik und Theologie* (183–205).

²⁴ LeClerc's *Genesis, sive, Mosis prophetæ liber primus* (Amstelodami, 1693) was quickly translated into English and published as *Twelve Dissertations out of Monsieur Le Clerc's Genesis* (London, 1696). All references are to this translation.

that ever I undertook in my Life" (*Diary* 1:169–71). And rightly so. Whether the rise of historical criticism, the discoveries in the natural sciences, the insufficiency of up-to-date biblical commentaries, or his sincere devotion to defend Reformed theology – in short, whatever compelled him to launch this huge work is subject to debate. And Mather did as only Mather knew how: Careful reading of his commentary reveals he was thoroughly familiar with the historical and philological criticism which his European colleagues dredged out in the open. To exacerbate the matter, they were doing so in the vernacular (rather than in Latin), as if to ensure that the debate did not get buried in ponderous tomes of academic wrangling. Significantly, Mather rarely invokes the names of these radical critics, in part because his target audience would know who the bêtes noires were, or because he did not want to raise a memorial in their name and divert attention from the issues at hand. In fact, in his commentary on the Pentateuch, Mather mentions the names of Simon and LeClerc only six times, Spinoza's name only once, Hobbes' never:

Spinosa, and after him, the Author of the Five Letters, [One for Immoralities, a Monster of Mankind,] urge, That *Moses* could not bee the Author of the Book of *Genesis*, or, as *F. Simon* saies, of any more than Part of it. For the *Canaanite* was not in the Land when it was written, *The Canaanite was then in the Land*; It implying, that the *Canaanite* was driven out of the *Land*, when this Book was written. (*BA* 1:709)²⁵

Hoping to find a more elegant solution than relinquishing the Mosaic authorship, Mather lit upon a work by Walter Cross, M. A., an obscure London preacher, whose *The Thagmical Art: Or, The Art of Expounding Scripture By the Points* (1698) offered a system of reconfiguring the Hebrew accentuation points of the Tiberian Masorites that allowed him to harmonize anachronistic verses with the time-honored authorship of the Hebrew Lawgiver. "Scepticism hath grown up in the Garden of Criticism," Mather noted as he mulled over the exegetical dilemma of his age. But with Cross's demonstration, the controversial passage in Gen. 12:6 might yet be rescued and its authenticity preserved. It should really read, "For that *Canaanite* was then in the Land; And that *Moreh* was a *Man*, and not a *Place*. The Text only saies, That *Moreh*, even that *Canaanite*, was in the Land, in the Time of *Abraham*, & the Owner of it; but in *Jacobs* Time, *Sechem* the *Hivite* possessed it" (*BA* 1:491, 497; Cross 273–74). Decoding the phrase "that *Canaanite*" as an individual, rather than as an entire people, and "*Moreh*" and "*Sechem*" as names of individual persons, not of cities that were

²⁵ The anonymous "Author of the Five Letters" is no other than Jean LeClerc, whose *Sentimens de quelques Théologiens de Hollande* (1685) was translated into English and anonymously published as *Five Letters Concerning the Inspiration of the Holy Scriptures Translated out of French* (1690). Mather's citations are from his commentary in manuscript "Biblia Americana." He does not paginate his commentary, but generally follows the divisions of the Bible into book, chapter, and verse. The citation appears in his commentary on Gen. 10:21 in the present edition.

founded only after the Israelite conquest centuries after Moses's death, Cross believed he had refuted the skeptics who argued for an anachronistic interpolation of this passage. This seemingly effortless solution was not entirely original to Cross either, for more than half a millennium earlier it had been offered by Rashi and Ibn Ezra and could be found in the marginalia of Daniel Bomberg's famous Venice edition of *Biblia Rabbinica* (1516–17).²⁶ Mather's satisfaction with this solution, however, seemed short-lived. Even before he digested Cross's *Thagmical Art* into a few choice paragraphs, he acknowledged his discomfort with retrenching such an important issue through a mere reconfiguration of the Masoretic vowel points (*BA* 1:709–10).²⁷ After all, Mather had learned his lesson from a youthful error in his 1681 Harvard master's thesis "*Puncta Hebraica sunt originis divinae*" (*Diary* 1:26). Here, he had joined the controversy by affirming the hypothesis of the two Buxtorfs against the two Cappels, that the Hebrew vowel points of the Masoretic texts were not only divinely inspired but original to Moses. Older and wiser, Mather ascended the scaffold of ignominy to take his shame upon himself: "I confess That when I took my Degree of *Master of Arts*," he owned up in "*Biblia Americana*," "I did publickly maintain the *Antiquity & Authority* of the *Points*, now used in our *Hebrew Bible*: and wholly went into the *Buxtorfian* Apprehension; But I now find myself, compelled unto the Sentiments of Dr. *Prideaux*, upon this Controversy" that the vowel points of the Masorah are interpretive keys invented and inserted by 6th–c. CE Tiberian Masorites. No, Mather was not afraid to admit error when necessary, neither did he rush in where angels fear to tread. The authority of the Bible and the certainty of its inspiration were not to be treated lightly.²⁸

26 *Biblia Rabbinica* (Lech Lecha, p. 20). All page references to Bomberg's *Biblia Rabbinica* are to the second edition (Venice, 1524–25). See also Rashi's commentary in *Mikraoth Gedoloth: Genesis* (1:153–55) and Ibn Ezra's in his *Commentary* (1:151).

27 Perhaps he also remembered with embarrassment his 1681 Harvard A. M. thesis "*Puncta Hebraica sunt Originis Divinae*," in which the young prodigy defended the divine origin of the Masoretic vowel points (*Diary* 1:26). In his juvenile excitement, Mather had followed Johannes Buxtorf, Jr., who defended the divine-origin thesis. The biblical scribe Ezra was inspired by the Holy Spirit, when he introduced the vowel points to render the Hebrew Scriptures intelligible to the post-exilic Jews who had forgotten the language of Moses during the Babylonian captivity. The controversy about the origin of the Hebrew vowel points is ably discussed in R. A. Muller's "The debate over the vowel points and the crisis in orthodox hermeneutics" (53–72).

28 *BA*, "Essay IV: *Ezra*; or, The Things done by *Ezra*, for the Restoring & Preserving of the SACRED SCRIPTURES" (37r). This confession is revealing in several ways. It shows that Mather had come a long way in embracing the historical critique of the Bible as text. Yet he did not need the approval of the Dean of Norwich, Dr. Humphrey Prideaux (1648–1724), to change his mind, either on the source of the Masoretic points or on textual interpolations. D. Levin has noted that Mather changed his mind, but takes his explanation from Samuel Mather's biography of his father, *The Life of the Very Reverend and Learned Cotton Mather* (5–6, second series of pagination). See Levin's *Cotton Mather* (83). For a subject listing of Harvard theses for the years 1655–1791, see *Proceedings of the Massachusetts Historical Society* 18 (1880–81): 140.

By the second decade of the eighteenth century, the novel and subversive critiques developed by Hobbes, Spinoza, Simon, and LeClerc had become, if not quite conventional, an open secret tacitly acknowledged by all but the staunchest defenders of biblical inerrancy. However, increased acceptance of historicist scholarship and secularization do not fully account for Mather's change of intellectual position. Certainly, his mature knowledge of philological criticism had rendered him less inclined to ascribe all manner of paradoxes to God's impenetrable mysteries. But his adaptation of the biblical criticism of Simon and LeClerc and of what they meant by the "divine inspiration" of the Bible had taken a decisive turn toward the rationalism of his peers. Mather's early annotations in his "Biblia Americana" exemplify how he struggled to balance the sacrosanct status of the Bible's inerrancy against the compelling evidence of invasive interpolations. Gen. 14:14 illustrates this case in point. Here, Abram is said to have pursued Lot's captors as far as the city of "Dan," a designation, however, it did not acquire until centuries after Moses' death. A later copyist ostensibly felt the need to update the name of the Canaanite city "Laish" (Judg.18:29) and gave it the name "Dan" by which the Danites now called this former Canaanite stronghold. "By which we may gather, that the Books of *Moses*, had here and there a Word inserted into them, after the *Israelites* were possessed of *Canaan*," Mather squarely conceded (*BA* 1:850).²⁹ Yet the baffling anachronism in Gen. 36:31, in which Moses enumerated "the kings that reigned in the land of Edom, before there reigned any king over the children of Israel," might somehow be defended as prophetic foreshadowing – even though Saul, first king of Israel, did not ascend his throne until roughly four hundred years after Moses's death. The passage was certainly not "too late for *Moses's* Time," – and here Mather contradicted Hobbes, Spinoza, Simon, and LeClerc – simply because Moses had previously recorded God's promise to Jacob that "*Kings should come out of his Loins*" (*BA* 1:1074).³⁰ But prophecy did not work as well in all cases of anachronism. For instance, the third-person narrator's parenthetical praise for the Hebrew Lawgiver in Numb. 12:3, "(Now the man Moses was very meeke, above all the men which were upon the face of the earth.)," did also raise eyebrows among those who defended the Mosaic authorship of the Pentateuch. For if Moses did author this panegyric, his self-praise was anything but consistent with his avowed meekness. "I know no Damage that would ensue," Mather again conceded, "if wee should suppose the *Parenthesis* here, in Commendation of *Moses*, added by some other Prophet, in the Transcription." But before entirely relinquishing this passage to his opponents, Mather reminded his readers that the use of a third-person narrator and the accompanying self-praise was a rhe-

²⁹ On Gen. 12:1, see Spinoza's *TTP* (8.124), Simon's *Critical History* (37), and LeClerc's *Twelve Dissertations* (118–19).

³⁰ Mather quotes Gen. 35:11 but discusses this issue in his annotations on Gen. 36:31. See also Spinoza (*TTP* 8.124), Simon (37), and LeClerc, *Twelve Dissertations* (122–23).

torical device common enough among ancient (and modern) historians. Why not Moses? (*BA*, Numb. 12:3). Again we see how Mather positions himself as a rational mediator, who seeks after truth – no matter where his quest leads him. Although he was not beyond name-calling, he did not stoop so low as to admit defeat by bestowing anathemas on critics of the Bible.³¹

The Lost Books of the Bible

A related area of contention will help us gauge Mather's response to the Spinozist critique of the scriptures' textual coherence: the problem of the lost books of the Bible. For example, the Hebrew scriptures cite several books of which we have no surviving record: the Book of Jasher (Josh. 10:13, 2 Sam. 1:18), the Books of the Prophet Shemaiah and of Iddo the Seer (2 Chron. 12:15), the Book of Uzziah (Ozias) (2 Chron. 26:23), the Acts of Solomon (1 Kings 11:41), the Prophecies of Jonas (2 Kings 14:25), and the Book of the Wars of the Lord (Numb. 21:14) – to mention just a few.³² The writer of Numbers cites the latter book as a record of the acts of Moses at the Red Sea and the Brooks of Arnon. The apparent loss of this scroll (besides many other problems) convinced Hobbes that "the five Books of *Moses* were written after his time, though how long after it be not so manifest" (*Leviathan* 33.262). To La Peyrère, the compiler of the Pentateuch copied his material from a lost "Diarie" of Moses, "from which collections the books of the wars of the Lord might afterwards be taken; Which for that cause was neither the Original, nor the Original of the Original: but indeed a Copy from a Copy" (*Theological Systeme* 205–06). To Spinoza, such textual lacunae and adaptations revealed "clearer than the sun at noonday that the Pentateuch was not written by Moses, but by someone who lived long after Moses" (*TTP* 8.124, 125). Ironically, Richard Simon followed in Spinoza's steps when he countered that Moses – schooled in the wisdom of the Egyptians – only wrote "all that which belongs to the Laws and Ordinances," but employed "écrivains publics" ("public Writers") to interpret and record "the historical part of these Books."³³ Only in this sense, then, was it true that Moses wrote "the

31 See, for instance, Mather's outburst in his commentary on Deut. 8:15: "We shall have a Detestable *Toland* come, and make Nothing of the Great Works done by the Glorious GOD" (*BA*: Deut. 29r).

32 See Simon (*Critical History* 20–21, 27), Mather's commentary on 1 Chron. 1:1, and John Toland's *Amyntor* (18–80). Isaac La Peyrère (*Theological Systeme* 204) also mentions several other lost books of the Bible, which served later writers of the Pentateuch as source material.

33 Richard Simon's controversial "Public Scribes" hypothesis ostensibly intended to mitigate the radical conclusions of Hobbes and Spinoza to offer a rational explanation for the many passages that suggested an authorship of the Pentateuch much later than that of Moses. For his detailed explanation of his "public Writers" hypothesis, see Simon's *Critical History*, bk. I, chs. 1–3, pp. 1–28. Simon references Flavius Josephus's *Contra Apion* (1.7) and Eusebius

whole *Pentateuch*" because the scribes and chroniclers who collected it "did not do it but by his order." After Moses' death, "these Prophets or publick Writers, were not onely charg'd with the collection of the Acts [records], which fell out in their time, and the reducing them to Registeries, but they gave sometimes a new Form to the Acts themselves which had been collected by their Predecessors, by adding or diminishing according as they thought fit" (*Critical History* 3, 4; see also "Preface a1v-a3r). In short, when they compiled the Pentateuch and the other books of the Hebrew Scriptures, these appointed historians revised, abridged, updated, and otherwise recast the scriptures as needed, "fitting them to their own times and design; which is usual with those who abridge the Books of others." For these reasons, "what we have at present is but an abridgment of the ancient Records, which were much larger, and that those who made the abridgments had particular reasons which we cannot understand" (*Critical History* 27).³⁴ That is why the Bible refers to books no longer extant, mentions events anachronistically, and contains narrative repetitions, chronological errors, and textual disagreements without number between the Hebrew-Aramaic, Samaritan, Arabic, Syriac, Septuagint, and Vulgate versions – all the outcome of disparate redactions. These disparities became all the more detectable in such polyglot Bibles as Brian Walton's magisterial *Biblia Sacra Polyglotta* (1653–57), perhaps better known as the *London Polyglot*. Unlike its predecessors such as Cardinal Ximenes's *Complutensian Polyglot* (1522), the *Antwerp Polyglot* (1569–72), and the *Paris*, or *La Jay's Polyglot* (1629–45), Walton's polyglot arranged the ancient versions not in sequential order, but side by side in parallel columns.³⁵ In this way, scholars could readily discover any and all textual deviations at one glance and consult the Chaldean Onkelos, the Jerusalem Targum, and Targum Ben Uzziel to adjudicate the matter. Those not at home in the ancient Oriental languages could make do with the Targums' parallel translations into Latin or with Richard Simon's *Critical Enquiries into the Various Editions of the Bible: Printed In Diverse Places and at several Times* (London, 1684) to keep abreast of the principal translations and how they measured up.

Rational explanations of textual variants like those offered by Hobbes, La Peyrère, Spinoza, Simon, and LeClerc, certainly appealed to theologians with a philological bent. As long as the authenticity of biblical books remained inviolable, they liked to believe, textual emendations and interpolations might

Pamphilus's *Praeparatio evangelica* (12.1) for evidence of "public writers" as official interpreters and record keepers of chronologies and genealogies.

³⁴ Like Simon, Hobbes (*Leviathan* 33.262), Spinoza (*TTP* 8.124, 125), and LeClerc (*Twelve Dissertations* 112–13) present a similar argument. Nehemiah Grew, one of Mather's sources for "Biblia Americana," further demonstrates how far the new criticism had proliferated among his contemporaries. Grew adopted Simon's "Publick Scribe" hypothesis in his *Cosmographia Sacra* (1701), bk. IV, ch. 3, pp. 166–68.

³⁵ See J. Pelikan's *The Reformation of the Bible* (109–13); and P.N. Miller's "'Antiquarianization' of Biblical Scholarship and the London Polyglot Bible" (463–82).

not jeopardize the Bible's trustworthiness. How did Cotton Mather respond to such alluringly rational explanations? Again he offered several solutions in his annotations on Numb. 21:14:

Q. Wee read here, concerning, *The Book of the Wars of the Lord*, mentioning what was done at the *Red-Sea*, & at the *Brooks of Arnon*. What *Book* was that? v. 14.

A. Why may it not bee, *The Book of Judges*? A *Book*, which recounts the *warly* Enterprizes, of those, whom the Spirit of the *Lord*, Raised & Moved thereunto.

Compare the Twenty sixth Verse of this Chapter, and then you'll say, that in Judg. 11.15, 16, 17. you find the very Passage, unto which this Text refers.

But how could this bee written then by *Moses*, who was Dead long before, this *Book of the Wars of the Lord*, was written? It may bee answered, That the *Pentateuch*, long after the Death of *Moses*, underwent Interpolations from the Pens of Inspired Persons. *Ezra*, Revising this Book, might add this, of what was done at the *Red-Sea*, & at the *Brooks of Arnon*.

Yea, In the Original it runs in the future Tense; *It shall bee said*. How if it should bee a Prophecy of *Moses*, that afterwards this Matter should bee commemorated among the People of God; and that when there should bee a Rehearsal of the Jewish Wars, this Matter should bee inserted in it? (*BA*, Numb. 21:14)

Mather speculated that "*The Book of the Wars of the Lord*" might not have been lost altogether, but the substance of it was incorporated into the book of Judges by inspired scribes who revised the books of the Bible long after Moses's death. Ironically, in cutting through this Gordian knot, Mather implicitly offered a version of Richard Simon's "publick Writers" hypothesis to accommodate his own conjecture. Mather, then, at least partially agrees that "Inspired Persons" collected the Acts of Moses in public annals and then extracted, rewrote, updated, and refitted sections from these no-longer-extant records to shape the Five Books of Moses and other OT books – all under the guidance of the Holy Spirit.

However, still not happy with these explanations, Mather consulted his trusty handbook, *A Commentary upon the Historical Books of the Old Testament*, 10 vols. (1695–1710), by Dr. Simon Patrick (1625–1707), the celebrated Bishop of Ely. Patrick himself had paraphrased the deliberations of the two medieval scholars R. Abarbanel (1437–1508) and R. Nachmanides (1194–1270) as well as consulted *The Harmony, Chronicle and the Order of the Old Testament* (London, 1647) 72–73, by John Lightfoot (1602–75), the Rabbinic scholar of Cambridge, and *Pentateuchi auctor* (1625), by the Walloon Jesuit Jacques Bonfrère (1573–1642), professor of Hebrew at Douai.³⁶ Following Patrick's example,

³⁶ According to R. Nachmanides, this book was written by "wise men in those generations who used to write down the history of great wars, for such was [the custom] in all generations. These authors were called *moshlim* (they that speak in parables), because they wrote in them [their books] by means of proverbs and figures of speech, and when there were victories which they considered wonderful, they ascribed those to G-d, to Whom they are in truth [to be attributed]" (*Commentary on the Torah* 4:237). John Lightfoot is not far behind when he argues that the *Book of the War of the Lord* (Numb. 21:14) may have been "some Booke of remembrances and directions written by *Moses* for *Joshua's* private instructions in the managing of the wars

Mather concluded that *The Wars of the Lord* was really a collection of Amorite victory songs composed “by some of the Wise Men of those Nations,” who commemorated their triumphs over the Moabites in a poem and “inserted it in their *Annals*” (Numb. 21:14). Upon defeating the Amorites at the brook of Arnon and thus taking Heshbon (the Amorite capital formerly belonging to the Moabites), Moses then excerpted one of these Amorite epics, inserted useful portions into the Pentateuch (Numb. 21:27–30), and “justifies what he writes, concerning this Conquest, out of their own Books; which he quotes, as the Apostle does one of the Greek Poets.”³⁷ According to this ancient example of intertextuality, then, the divine Lawgiver was not above cribbing his material from the annals of his vanquished enemies whom he did the honor of incorporating their songs into the everlasting Pentateuch. Perhaps here was good precedent for St. Paul to paraphrase the aphorisms of the Greek poet Tyrtaeus (7th–c. BCE), whom the apostle thus immortalized in his First Epistle to the Corinthians (ch 13).

If this hypothesis is true, how much of the Pentateuch, then, did Moses actually write? Most of those whom orthodox theologians branded Spinozists agreed that tradition – no matter how time-honored – was insufficient proof of the Mosaic authorship.³⁸ The eponymous designation *The Five Books of Moses* verified his authorship as little as *The Odyssey* or *The Aeneid* vouched for Odysseus or Aeneas to be the authors of the epics whose name they bear. The titles were merely derived from the subjects of the books or from the protagonists whose actions are central to the stories. And the original Hebrew titles – Bereshith, Shemoth, Vayikra, Bamidbar, Devarim – did not help here either, because they were simply the beginning words of each of the five Hebrew books of the Torah, whose subdivisions or Parasha derived their titles from the opening words of the various scrolls. No matter what their original designation, strict rules of textual criticism suggested to Hobbes and Spinoza that Moses wrote only those portions of the Pentateuch he explicitly declared to be his. There was a vast disproportion between what he was believed to have written and what he actually did write. This is certainly true for the venerable tradition among the Jews who use the terms “Torah” and “the Law” interchangeably to signify all of the five books of Moses. Hobbes begged to differ. The designation “the Law”

after him; see *Exod.* 17.14, 16. It may be this Booke was also called *Sepher Iasher, liber rectus*, or a directory for *Joshua* from *Moses*, what to doe and what to expect in his wars; and in it, *Moses* directs the setting up of Archery, 2. *Sam* 1.18. and warrants him to command the Sunne, and to expect its obedience, *Josh* 10.13” (*Harmony* 72–73).

37 “Biblia Americana” on Numb. 21:14 (*BA* 76r–77v). Simon Patrick’s *Commentary* (1727) 1:652. R. Shlomo Yitzchaki (Rashi [1040–1105]) insisted that the Canaanite poet whose victory song Moses excerpted (Numb. 21:27–30) was Balaam, son of Beor, who cursed Heshbon – then the Amorite capital – before it fell into the hands of the Israelites.

38 Spinoza deplores the credulity of his contemporaries: “... the light of reason is not only despised, but by many even execrated as a source of impiety, that human commentaries are accepted as divine records, and that credulity is extolled as faith” (*TTP*, “The Preface” 8).

does not denote the whole Pentateuch, but merely a number of statutes that the divine Lawgiver commanded the Israelites to keep. Hobbes limited Moses's contribution to "the Volume of the Law, which is contained ... in the 11 of *Deuteronomie*, and the following Chapters to the 27, which was commanded to be written on stones" (Deut. 27:2–3, 31:9; Josh. 8:32), and further to the Law of the Covenant, which Moses commanded the Levites to place inside the Ark of the Covenant (Deut. 31:26). But the historical portions of the Pentateuch, most of the histories, and of the prophetic books were compiled in the form we have them by the scribe Ezra (2 Esdras 14:21–22) after the Babylonian Captivity, but before they were translated into Greek – a thousand years after Moses (*Leviathan* 33.262, 265). Spinoza's rationale was even more trenchant. Accepting no proof but that which could be clearly demonstrated, he drove his Cartesian principles to their inevitable conclusion: "We must make no assertions in such matters which we do not gather from scripture, or which do not flow as legitimate consequences from its fundamental principles." Consequently, "we have no proof that Moses wrote any book save this of the covenant" (Deut. 1:5, 29:14; 31:9). Spinoza, too, pointed toward the fifth-century BCE Ezra as the likely candidate by whom all the historical books were written (*TTP* 8.127–30), but he did so with far less certainty than Hobbes.

Did Moses write the whole Pentateuch?

Richard Simon, at that time the leading textual critic in the Roman Catholic Church, was not far behind his predecessors when he took exception to the orthodox tradition that Moses wrote the whole Chumash or Pentateuch. Evaluating the internal evidence on either side of the argument, Simon concluded that Moses only wrote "the Tables, the Law, the Ordinances and Commandments." And as far as "*all the words of this Law*" that Moses commanded them to "*write upon the Stones*" on the other side of the Jordan River, they were merely the twelve maledictions (Deut. 27:8, 15–26) to enforce conformity to his laws and ordinances. Though Ezra (Esdras) and his committee of "publick Writers" may have collected and loosely joined the surviving scrolls, the process of revising, abridging, and adding continued long after Esdras, who was "not the last composer of the sacred Scriptures" (Simon, *Critical History* 48, 49, 63). The loss of the originals and the many alterations introduced into the copies at "*the pleasure of the Transcribers*" therefore "*utterly destroy the Protestants and Socinians Principle*" of insisting on the Bible's sole authority in matters of religion. If this stab at the Reformation dogma of *Sola Scriptura* reminded his readers that to Roman Catholics like Simon the tradition of the Church Fathers was second only to the Bible (*Critical History*, "Preface" 1br-1bv), Jean LeClerc solved the conundrum of the Pentateuch's authenticity in a more underhanded fashion.

In his anonymously published *Sentimens de quelques Théologiens de Hollande sur L'Histoire Critique du Vieux Testament* (1685), LeClerc ruthlessly attacked the belief in "the divine inspiration" of the Holy Scriptures. He sidestepped the issue of individual biblical authorship but cast doubt on the prophets' trustworthiness and on the original communication of God's revelation in the first place. Eight years after the controversy over *Sentimens* had somewhat abated, LeClerc published under his name *Genesis sive Mosis prophetae* (1693), a more conventional commentary through which he tried to shore up the damage he had done to scriptural infallibility by assaulting Simon for discrediting the authority of the Bible. Obviously, Moses must have extracted the history of the Creation down to his own time from some ancient "Memoirs" transmitted by his forebears, LeClerc readily conceded in his commentary, but "the four last Books of the *Pentateuch*, at least, were written by *Moses*" (*Twelve Dissertations* 107–08, 113). To Simon the disordered state of the *Pentateuch* proved that the redactors were working independently from one another in abridging and emending the biblical manuscripts; to LeClerc, however, the same evidence signified the opposite: Moses's *Pentateuch* had survived in its original, unedited form as the Hebrew Lawgiver composed it during his journey of forty years through the Sinai Desert. If public writers had extracted the *Pentateuch* from the annals or "memoirs" of Moses as Richard Simon opined, they would certainly have smoothed out its rough spots and edited out the frequent repetitions and contradictions. Thus to LeClerc, Simon's evidence just did not add up. The idiosyncrasies noted by critics were to LeClerc the telltale signs not only of Moses's authorship but also of the original annals in their unedited form. Besides, the many laws and commandments enumerated especially in the "four last Books of the *Pentateuch*" made plain that none but Moses was the author: "for if he writ all the Laws, and the whole History of *Israel*, he is certainly the Author of these Books, wherein nothing else is contain'd; for who, after *Moses* had once written, would attempt to write and model them anew?" Altogether, there are only "eighteen places, which are commonly brought to prove the *Pentateuch* to be of a later date." The most efficient way to resolve these difficulties, LeClerc proposed, is therefore to own up and to admit that either Joshua or Esdras or some later scribes might have interpolated these anachronistic verses. But since we cannot know, "we can have no surer or safer Sanctuary here, than prudently to suspend our Judgments; by which conduct, if we do not discover the Truth, yet at least it is not excluded from the Mind" (*Twelve Dissertations* 112, 113, 128, 130).

Cotton Mather was evidently much pleased with LeClerc's solution, but was reluctant to praise him on other occasions. "I wish, *Leclerc* had never published any worse Thoughts, than those few, which I shall on this Occasion fetch from his *Criticisms*," Mather commented ambivalently. Nevertheless, he readily embraced the arguments of Simon and LeClerc that Moses left behind only an "Abridgment of the ancient History" and "a Naked Chronology of the

First Times” even as Mather defended Moses’s rationale for doing so (BA 1:410). His “Biblia Americana” then demonstrates like no other writing of Mather’s, published or unpublished, how far he had absorbed the critical debate among his European peers. He could pick and choose what seemed rational and what furthered his own goals; yet he could also rise to the challenge and denounce heterodoxy if the occasion required. A case in point is his commentary on the Chronicles (1 Chron. 29:29), where Mather used LeClerc to rebut Simon, and Simon to confute LeClerc. Mather scoffed at the views of Jean LeClerc and those who thought like him. Alluding to one critic only identified by the initials “M. N,” Mather jeered: “It is of late become a Quæstion among the Criticks, whether Moses was the Writer of the Pentateuch. And one of them ha’s proceeded unto such a Degree of learned Nonsense, as to make the Writer thereof to be one of the little *Samaritan Priests*, which came to teach the New Inhabitants of *Palæstine*, the Rites of worshipping the God of the Land, after the *Ten Tribes* were carried into [Babylonian] Captivity” (BA 72r; 1 Chron. 29:29). According to this fanciful conjecture, a Samaritan priest had cobbled together the Mosaic Law with some ancient memoirs and turned the whole thing into the Pentateuch. Little did Mather suspect that Jean LeClerc was the one who had sponsored this intriguing thesis in his anonymously published *Sentimens de quelque Théologiens* (lettre 6, pp. 129ff), a fictitious debate between several Dutch theologians ostensibly involved in refuting Simon’s “publick Writers” hypothesis. Richard Simon (under the nom de plume Prieur de Bolleville) was only too happy to sneer at LeClerc, in *Réponse au Livre intitulé Defense des Sentimens de quelques Théologiens de Hollande sur l’Histoire Critique du Vieux Testament par le Prieur de Boll[e]ville* (Rotterdam, 1687) 129.³⁹ Mather, too, loved a good fight, when he joined the spat by appropriating one disputant’s argument against that of the other:

But it is most certain, first, That the *Mosaic Lawes* were by *Moses* himself left behind him in Writing. [Josh. 1.7, 8.] Now those *Lawes* make no little Part of the *Pentateuch*; especially, the *Cæremonials*. It is most certain also, that there are several Chapters of Prophecy in the *Pentateuch*, whereof, *Moses* was the Writer. [Deut. 28. & 29. & 30. & 31.] And some of *History* [Exod. 17:14. with Psal. 78.5, 6, 7. And Num. 33.2.] It is likewise very certain, That these Matters were so founded in the *Covenant* which the Lord made with the *Israelites*; & with their Ancestors that the Relation thereof would be very lame, if that also were not Related. And a good Part of the Book of *Genesis* must therefore then be written. Yea, our Lord JESUS CHRIST Himself, expressly ascribes these Writings unto *Moses*. [Joh. 5.46, 47]. ... Yea, both *James* and *Paul*, declare *Moses* to be the Writer of the whole *Pentateuch*. [Act. 15.21. and 2. Cor. 3.14.]. (BA 71r; 1 Chron. 29:29)

The Pentateuch had to be authentic, Mather insisted, because both Christ Jesus and several of his apostles specifically refer to (and quote from) the writings of Moses to validate the truth of the Christian religion. Surely, the Messiah

³⁹ See S. Müller’s *Kritik und Theologie* (62).

and his disciples would not have cited Moses if his books were spurious!⁴⁰ This self-evident logic clinched the argument for many who were similarly engaged in defending the authenticity of the Pentateuch. Yet once all was said and done, the troubling textual issues just would not go away. "It is true," Mather was willing to negotiate,

there may be certain lesser Passages, or Sentences, added in later Ages to the *Pentateuch*, by some Inspired Hand. The last Chapter of *Deuteronomy* was evidently so. But of all the Instances, which *LeClerc*, and other bold Criticks have collected, there will be found but *Four* in the whole *Pentateuch*, about which there is any need of acknowledging a *Later Interpolation*; and this too so very small, & but on such manifest Occasion, that there is no Manner of Reason from thence, to Deny, that the Books were first written by *Moses*, to whom our Lord Himself, & His Apostles, have ascribed them. Yea, *LeClerc* himself at length comes to write a Dissertation, *De Scriptore Pentateuchi Mose*. (*BA* 73v; 1 Chron. 29:29)

Mather's triumph over these "bold Criticks," then, is based on LeClerc's introductory essay "*III. Dissertatio de Scriptore Pentateuchi Mose, ejusque in scribendo consilio*" (sign. e-e4v), with which LeClerc prefaces his commentary *Genesis sive Mosis prophetae* (1693). In pointing at the disagreements among textual critics, Mather employs LeClerc's retrenched position in *De Scriptore Pentateuchi* to rebut not only LeClerc's anonymously published *Sentimens de quelques Théologiens de Hollande*, but also Richard Simon's *Histoire Critique du Vieux Testament*, in which Simon who had argued all along that in the centuries after Moses' death, "Publick Writers" had rewritten and updated the Pentateuch as needed. Mather's efforts thus illustrate his informed response to the crisis of certitude in the late seventeenth and early eighteenth centuries.⁴¹ This fundamental threat to the Bible's divine origin may well be one major reason why he

⁴⁰ The renowned William Whiston, whose works Mather greatly admired, tried to solve similar issues in his *Essay Towards Restoring the True Text of the Old Testament* (London, 1722). In this controversial treatise Whiston examines the frequent disparities between the apostles' Christological OT citations in the NT and their actual occurrence in the OT. Christ and his apostles are not likely to have misquoted the Hebrew Bible, Whiston hypothesized. Somebody must therefore have deliberately falsified those passages in the OT that relate to Jesus Christ as the NT Messiah. Whiston therefore postulated in Proposition XII, that "*The Jews, about the Beginning of the Second Century of the Gospel, greatly alter'd and corrupted their Hebrew and Greek Copies of the Old Testament; and that, in many Places, on purpose, out of Opposition to Christianity*" (220; see especially 220–87). Whiston's hypothesis resounds with the kind of anti-Semitic claims all too common in Christian apologetic discourse; he proposes to fix the alleged corruptions of the OT by offering an even more radical solution: to restore these NT citations to their original place in the OT and thus re-establish their authenticity (281–335). Whiston's Deist antagonist Anthony Collins was only too happy to counter in his *Discourse of the Grounds and Reasons of the Christian Religion* (London, 1724) that "*a bible restor'd, according to Mr. W's Theory, will be a mere WHISTONIAN BIBLE; a BIBLE confounding, and not containing the true text of the Old Testament*" (225). For context and background, see J. E. Force's *William Whiston* (77–89) and J. O'Higgins, S. J. Anthony Collins (155–99).

⁴¹ Useful historical background appears in R. H. Popkin's *Problem of Certainty* (13–48).

felt the need to lay the foundation for his “Biblia Americana” in 1693 (*Diary* 1: 169–71), the same year in which he began composing his *Magnalia Christi Americana* (1702) and published his apologia of the Salem debacle *The Wonders of the Invisible World* (1693). Arriving at rational explanations was an ongoing process, and no reputable theologian on either side of the Atlantic could shroud himself in silence or brush aside with impunity the hermeneutical revolution that left the biblical scrolls in tatters and the clergy in need of reassurance.

These critical debates – though increasingly published in the vernacular – largely remained in the domain of the community of scholars. The common parishioners of the day generally did not have to face such issues, mainly because matters of historicist criticism were not integral to the clergy’s primary function of promoting salvation. Compositors of Bible commentaries for families on the whole stayed clear of controversies not intended for consumption by lay readers. This type of bowdlerization was all too common in Mather’s day (as indeed it is in ours). Thomas Pyle’s *Paraphrase with Short and Useful Notes on the Books of the Old Testament* (London, 1717) is a good case in point. One of Mather’s sources in “Biblia Americana” (BA 1:302–06), Pyle was determined to keep the Battle of the Books out of his commentary targeting uncritical readers: “I have had all just Regard to those Modern Discoveries, and vast Improvements in Philosophical Knowledge,” he confessed in the Preface, “yet have I endeavoured so to express every Circumstance, as not (directly and explicitly) to clash with any one particular Hypothesis or Opinion” (*Paraphrase* 1:A6v). A student of William Whiston and fellow Arian, Pyle (1674–1756) had particular reasons to be cautious before the Salters’ Hall Synod (1719) failed to enforce subscription to the Thirty-Nine Articles, but his principles of selection clearly demonstrate how clergymen of all stripes were concerned with shielding the faithful from attacks on the inerrancy of the Bible even as they had enlisted under the banner of truth. To be sure, not all truths are fit to be told; for he who scandalizes the weak in faith, the Apostle Luke reminds us, “It were better for him that a millstone were hanged about his necke, and he cast into the Sea, then that he should offend one of these little ones” (Luke 17:2).

How did Cotton Mather solve this predicament? In his final segment of the “Biblia Americana,” with the title “An Essay for a further COMMENTARY on the Sacred Scriptures,” Mather added a series of thirteen essays that may well function as his key to the historical context and physical provenance of the scriptures. Once again he returned to the question of the Mosaic authorship and summed up his final position. He now willingly accepted the contention that many passages in the Hebrew Bible are of considerably later origin than most of his peers were willing to admit. He agreed with Hobbes and Spinoza that Ezra was the most likely redactor of the Pentateuch and much of the Hebrew Scriptures besides. Henceforth, he conceded that the last eight verses of Deuteronomy (34: 5–12) could not have been authored by the divine Lawgiver himself, because

Moses could not communicate from beyond the grave and record his own death, burial, and loss of his sepulcher “unto this day.” For such obvious reasons, “The Last Chapter of *Deuteronomy* might be his [Ezra’s],” Mather allowed, “and so might be several other Passages, which are Plain Interpolations.” Mather further granted that the reference in Gen. 12:6 (“the Canaanite was then in the land”) had to be a later insertion. Similarly, Mt. Moriah (Gen. 22:14) “was not called, *The Mount of the Lord*, until the Temple was built on it” nearly 900 years after Abraham’s arrival in the Promised Land. Its modern name must therefore have been a later addition. The reference to the kings of Edom long “before there reigned any king over the children of Israel” (Gen. 36:31) could not have been made by Moses either, simply because Israel did not have a king until more than 350 years after his death. In short, Mather did not brush aside such obvious textual interpolations nor did he muddle his way through by endowing each with prophetic significance to explain away these anachronisms. Instead, he allowed that the scribal prophet Ezra interpolated such passages after the return from Babylonian captivity to “render the Scriptures, as intelligible as possible unto the People” when the passage of time had made old place names, conditions, and customs incomprehensible to post-exilic Jews. Likewise, Mather argued, Ezra had to transcribe the ancient Hebrew texts “into the *Chaldee* Character” (Aramaic), by “dropping the old *Samaritan* Character, wherein *Moses* & the Prophets had recorded the Oracles of GOD,” because the Jews returning from Babylon no longer understood the ancient script. Such drastic alterations did not disturb Mather, because God’s timeless Word needed to be accommodated to the Israelites’ changing needs and therefore required periodic updating.⁴²

Cotton Mather addresses many more textual problems in “*Biblia Americana*” than the small sampling from his commentary on the Pentateuch demonstrates. The history books of the Hebrew Bible were particularly prone to scribal error, and Mather spent considerable time and effort to guide his readers through the philological maelstrom of textual criticism. The New Testament fared no better.⁴³ The vigor of his response varies as much as the nature of the problem and the ruthlessness of the bold critics he singles out for reproach. Two or three examples may suffice to illustrate his procedure. In his annotations on 1 Samuel (chs. 6 and 7) and on 1 Chronicles, Mather allows clear rational thinking to prevail against scribal error. In the first instance (1 Sam. 6:19), he takes exception to the literal reading of the Hebrew original and its rendition in the King James Version, because God’s disproportionate response to the Israelites’

⁴² Mather, “IV. *Ezra*, or, The Things done by *Ezra*, for the Restoring & Preserving of the SACRED SCRIPTURES” (77r–78v), appended to Mather’s commentary on *Revelation*, at the end of *BA*.

⁴³ For Mather’s endeavor to reconcile the discrepancies in the accounts of the four gospels, see his “Prolegomena to the Harmony of the Gospels” (*BA* 18r–28v, *Matth.*, ch. 1). This issue will be discussed in the introduction to Volume 7 of our edition.

offense of looking into the Ark of the Covenant bespeaks anything but divine justice:

Q. Can you imagine, That there were *fifty thousand & threescore & ten Men slain at Bethshemesh*, for looking into the Ark? v. 19.

A. No, Truly. But I read the Text so, *Hee smote of the People which were fifty thousand*, [I say, Hee smote] *threescore & ten Men*. So there were but Seventy Men kill'd in all. ... So small a Town as *Bethshemesh* could never loose Fifty thousand Men, and leave any Survivors to bewayl the Lost. ... (BA, 1 Sam. 6:19)

Mather's characteristic Q-&-A format allows him to settle the issue quickly and efficiently. The dialogue between a curious interlocutor and a rational interpreter permits him to simulate an objective distance between author, discussants, and subject. Through this rhetorical device, Mather tried to sway his target audience to receive him as a disinterested and trustworthy annotator whose commentary transcends partisan appeal. The rational basis for his judgment is all the more apparent in his subsequent explanation that Bethshemesh was too inconsiderable a settlement to forfeit so many of its inhabitants and leave survivors to bury its dead. However, this solution could not be put forward without additional proof. A quick glance at the Syriac and Arabic versions of 1 Samuel in Brian Walton's *Biblia Sacra Polyglotta* (1:213) assures Mather that the number of lawbreakers given here was only about five thousand, not fifty thousand men in all. This number still seemed too large to justify God's wrath to man. A much more balanced reading, which Mather derives at second hand from Rashi's commentary (*Mikraoth Gedoloth: Samuel* 1:54–55), seemed to offer the most elegant solution yet: "If any will further suppose, that the *Seventy Men*, who were slain, were for their Dignity & Quality æqual to *Fifty Thousand* of the Plebeian People; I shan't oppose; it may bee so" (BA 1 Sam. 6:19). Through a transposition of modifiers in verse 19, then, the syntactical problem in the Hebrew copy is solved, and Mather can offer a metaphoric explication, whose truth, perhaps, lies most of all in the power of its simplicity. But if some ultra-conservative literalist was still not satisfied with this solution, Mather enlists for support Josephus Flavius's *Antiquities* (6.1.4), Samuel Bochart's *Hieroicoicon Sive bipertitum opus De Animalibus Sacrae Scripturae* (pars 1, lib. 2, cap. 36, cols. 369–70), John Selden's *De Synedriis* (lib. 2, cap. 16, sec. 3, p. 664), and Johannes Wagenseil's *Sota* (Annot. on Gemara, cap. 7, sec. 15) – all mentioned in Simon Patrick's vademecum (2: 204–05), but derived in due course from Bochart.⁴⁴

⁴⁴ Mather did not have to rely on Simon Patrick's *Commentary* (1695–1710) for this information. Mather owned copies of, or had access to, the several editions of Flavius Josephus, *The Works of Josephus* (London, 1699); to Samuel Bochart, *Hieroicoicon Sive bipertitum opus De Animalibus Sacrae Scripturae. Pars Prior. De Animalibus in genere. Et de Quadrupedibus viviparis et oviparis. Pars Posterior. De Avibus, Serpentibus, Insectis, Aquaticis, et Fabulosis Animalibus*, 2 vols. 1646 (London, 1663); to John Selden, *De Synedriis Praefecturis Juridicis Veterum Ebraeorum* (London, 1650); and to Johann Christoph Wagenseil, *Sota. Hoc est liber mischnicus de uxore*

Much more outspoken and vituperative was Mather's response to Spinoza's dismissive critique of the Old Testament's disordered state. Did not the author of the apocryphal 2 Esdras 14:21–48 report that when Nebuchadnezzar sacked the Temple and burnt all the books of the Law, Esdras summoned five scribes (v. 24) to help him write down the lost Torah scrolls and books from memory? Surely, the Holy Spirit assisted Esdras in recovering the lost books. After all, the Almighty was a God of order, and he would not suffer his soteriological directives to be compromised – let alone lost! Spinoza was not satisfied. He contended that the Pentateuch and the other OT books down to the destruction of Jerusalem are “set down promiscuously and without order, with no regard for dates.” The repetitive nature of the historical narratives in different and often contradictory versions demonstrates that “all the materials were promiscuously collected and heaped together, in order that they might at some subsequent time be more readily examined and reduced to order” (*TTP* 9.135). In this argument as in many others Spinoza probably leaned on Isaac La Peyrère's *Prae-Adamitae* (1655) where the latter argues that the Pentateuch was “not written by *Moses*, as is thought,” but consists of imperfect copies of abstracts and abridgments that are as reliable as they are defective: “Nor need any one wonder after this, when he reads many things confus'd and out of order, obscure, deficient, many things omitted and misplaced, when they shall consider with themselves that they are a heap of Copie confusedly taken” (*Theological Systeme* 208).⁴⁵ Mather was more than displeased with such a legerdemain denigration of the Bible by the likes of La Peyrère or a Spinoza. Mather's annotation on 1 Sam. 7:13 illustrates his impatience when vile enemies of God grasp at straws to cast aspersions on the Holy Scriptures. Mather lashes out against “That infamous Atheist *Spinosa*,” that “wicked and scoffing *Jew*,” who juxtaposes passages from different biblical books to highlight apparent contradictions. Spinoza's “Objections are but his own *profane Blunders*, and as *Heedless as Profane*,” as can be seen in his handling of Ezekiel's perplexing prophecy that King Zedekiah would not “see” Nebuchadnezzar's Babylon but die there (Ezek. 12:13; 17:16): “Would any man think now that this fine Caviller at the *Bible*, had *Read* the Bible?” Mather fumed at Spinoza's impudence. “If he had, he might, without going to *Josephus* [*Antiquities* 10.9], have known, That tho' *Zedekiah* was carried unto *Babylon*, as *Ezekiel* had foretold, [ch. 17.16] yett he *Saw* it not, because his Eyes were putt out before he came thither, [Jer. 52:11] according to the wonderful Prædiction of the same

adulterii suspecta (Altdorf, 1675). Unless otherwise noted, all references to Bochart's *Hierozaicon* are to the 1663 London edition.

⁴⁵ In his commentary on Genesis alone, Mather refers to the title of La Peyrère's *Prae-adamitae* (1655) or to his name several times in Gen. 3:24; 4:16; 11:9. The significance of La Peyrère's influence on his contemporaries is discussed in F. Stummer's *Bedeutung* (27–30), in K. Scholder's *Birth* (82–91), and especially in R. H. Popkin's *La Peyrère, 1596–1676* (chs. 3 and 9); and Popkin's *History of Scepticism* (1979) 214–28, and Popkin's revised version *History of Scepticism* (2003) 197–246; and T. L. Frampton's *Spinoza* (199–235).

Ezekiel. [ch. 12.13].”⁴⁶ Evidently, Mather was not above demanding an eye for an eye by citing a passage from Spinoza’s *Theological Political Tractate*, where the Dutch philosopher “finds himself at last compell’d” to eat his own words:

Totam Legem Divinam quam Scriptura docet, incorruptam ad nostras manus pervenisse: Adding, præter hæc, alia sunt, de quibus non possumus dubitare, quin bona Fide, nobis sint tradita; nempe, summa Historiarum Scripturæ; quia notissima omnibus fuerunt. (BA 1 Sam. 7:13)⁴⁷

Ironically, if Mather thought he had at last put Spinoza in his place, he erred. Mather here interprets Spinoza’s “*Totam Legem Divinam quam Scriptura docet*” in the broad sense to mean the Torah, the whole Pentateuch (as Jews generally do); Spinoza, however, only spoke of the Law in the narrow sense: the Decalogue and those mandates in Deuteronomy to attain salvation. The ancient Jews used “to chant the history of their nation in psalms” (*TTP* 173). The historical narrative, the plot, and songs – the main facts of scripture history – are therefore little more than the heroic trappings of the divine epic designed to ignite the auditors’ devotion.

Passionate outbursts aside, Mather was not opposed to philological-textual studies of the Bible; in fact, he welcomed appraisals that aimed at rectifying and harmonizing seeming contradictions in the Old or New Testament.⁴⁸ He was well aware of the large number of inconsistencies in the various genealogical registers, kings lists, their reign, their names and that of their many descendants, along with their acts, the narrative sequence of events, or their chronological order. No, the Bible was inspired – perhaps even dictated – by God, but the preservation, transmission, and order of the original manuscripts or its copies was another matter; it was not directly controlled by God but left in the hands of holy prophets, no doubt human and (alas) all too fallible. Several instances might here be mentioned to gauge Mather’s deft handling of textual problems beyond those discussed above. His disquisition on the inconsistencies of the Synoptic Gospels appears at great length in his “Prolegomena to the Harmony of the Gospels,” preceding his commentary on Matthew, but for our introductory purposes here, a brief illustration of Mather’s comparison of the pre- and post-exilic books of the OT must suffice.

⁴⁶ See Spinoza (*TTP* 10.148).

⁴⁷ R. H. W. Elwes’s translation reads, “The whole Divine law, as taught by Scripture, has come down to us uncorrupted. Besides this there are certain facts which we may be sure have been transmitted in good faith. For instance, the main facts of [Hebrew] scripture history, which were perfectly well known to everyone” (*TTP* 173).

⁴⁸ See, for instance, Mather’s endeavor to reconcile the difference in various OT books (BA 1 Chron. 1:1) and his lengthy discussion of the “Harmony of the Gospels,” preceding his commentary on Matthew (ch. 1). In both cases, Mather relies primarily on William Whiston’s research.

Again, his characteristic Q-&-A approach allows him to concentrate on the particular issues at hand without having to abide by the chronological and narrative sequence dictated by conventional commentaries. This dialogic method ideally suits his purpose, for he can add link upon link to his discursive chain of annotations without having to rewrite and edit his earlier comments. All he needs to do is to have his interlocutor pose a new question to send off his respondent on a new errand. The pre-exilic books of the Chronicles evince a particularly egregious number of textual variants especially when compared to post-exilic books such as Ezra, Nehemiah, or Ezekiel. Mather, however, does not silently bypass such conflicts in “Biblia Americana” as many lesser lights chose to do in their commentaries, but he attacks the problem head-on. A case in point is his long introductory commentary on the Chronicles:

Q. What shall be thought of the apparent Inconsistencies, in the Historical Books of the Old Testament written after the Captivity, with several Things in the Books written before? v. 1.

A. Suppose we should grant, That there are some circumstantial *Mistakes* in our *present Copies*. This would not at all affect, the Truth of our *Holy Religion*. For, first, the Mistakes lie in *Little things*, wherein the Articles of our Holy Religion are not at all involved. And Secondly, in *Other Parts* of the Sacred Volumns, we are furnished with sufficient Instructions and Remedies, to rectify these Materials. ... (BA 1 Chron. 1:1)

Mather is more than confident that the vital parts of God’s revelation to mankind – those necessary articles of the Judeo-Christian *ordo salutis* to be believed and practiced for salvation – are not impacted by any textual errors or problems of transmission, no matter how grave. These articles of salvation are woven into the fabric of the whole Bible and can therefore never be lost. “It is Rationally impossible, That the Great *Matters of Fact*, relating to *Moses*, and to JESUS, and the *Mysteries*, and *Commandments*, of Christianity, should be mis-recited” (BA 1 Chron. 1:1). In fact, the essential terms of our salvation are with us now just as much as they were on the day when God first revealed them to man. Does the Word become invalid simply because careless errors have crept into our copies? As the English physician Dr. Nehemiah Grew (1641–1721) put it in his oft-quoted *Cosmologia Sacra* (1701):

God may as well permitt *Errata* in the *Bible*, as in *Nature*. He is as much the Author of the One, as of the Other. Is it then impossible to Distinguish the Divineness of this Book, from that which is Humane? Is the Design or Model of a good Peece of Architecture, to be undervalued, because in the Work there is a Brick or two broken, by the Workmen, or misplaced? If God for sundry Reasons had made Nature capable of producing now and then a Monster, or of making some other Default, shall we disown the Divine Strokes apparent in every Beauty, yea, in every well-shaped Animal? [*italics inverted*] (BA 1r; 1 Chron. 1:1; Grew, *Cosmologia Sacra*, bk. 4, ch. 1, p. 143).

The case is plain. Almighty God is the author of the Book of Nature just as much as he is of the Book of Scripture, and rough drafts and occasional erasures or ellipses in either book diminish neither their grandeur nor do they challenge the belief in their divine origin. No, the Bible is divine “only so far forth, as the Contents hereof were given by God, or transacted in some extraordinary way,” Grew emphasized with LeClerc’s *Sentimens de quelque théologiens* in the back of his mind. “But as it [Bible] was written, and hath been copied, it is, and must be called Humane. So that instead of any ground we have to expect the Copies of a Divine Book, without *Errata*: it’s a great Wonder, there are no more in it, than those we find” (*Cosmologia* 143). Indeed, God permits such challenges to occupy philologists and physico-theologians alike to study the mysteries of scripture and nature more closely than ever before.

Thus reassured, Mather’s readers are prepared to face what comes next. What follows in his commentary on 1 Chronicles, ch. 1, are several leaves in double columns filled with detailed catalogues and tables of textual idiosyncrasies, genealogical errors in numbers, names, lifespan, and sequence of offspring (“begat”), enemies annihilated, fiefdoms conquered, and talents in gold and silver levied on the vanquished as tribute to the victors. He uncovered these problems by collating passages in Genesis with their parallels in the Chronicles, and Chronicles with Ezra, Nehemiah, and Ezekiel. In this process Mather weighs William Whiston (his principal source) against Matthew Poole, Nehemiah Grew, Richard Jenkin, Hugo Grotius, Pierre-Daniel Huet, and August Calmet.⁴⁹ Mather’s position with regard to these issues? “It is an unshaken Principle of our *Faith*, and *Reason* itself teaches us to *Beleeve* it” that God is the author of the Holy Scriptures, for it is here that we can read “his mind and will” in matters of salvation. However, “Tis not a Principle of æqual Assurance; That the Providence of God hath so watched over the Scriptures, as that the *Copies* are præserted, from lesser *Errors* of the Transcribers in Points which do not affect our Salvation, or the Great Articles of Religion; and facts especially, if the Errors are such, as we have means left us to correct, from other Scriptures, that are incontestable” (*BA* 1 Chron. ch. 1). Cotton Mather’s willingness to face facts, then, demonstrates the astounding ways Enlightenment criticism of the Bible had crossed the Atlantic and infiltrated New England’s pulpits long before Jonathan Edwards left his mark on American theology or gathered similar thoughts for his private use in his various “Miscellanies,” “Notes on Scripture,” or “The Blank Bible.”⁵⁰ Mather’s response is all the more remarkable because

⁴⁹ Among Mather’s principal sources here are Whiston’s *A Short View of the Chronology of the Old Testament, and of the Harmony of the Four Evangelists* (Cambridge, 1702), and *Commentaire littéral sur tous les livres de l’Ancien et du Nouveau Testament*. 8 vols (Paris: 1707–16), troisième édition (Paris, 1724–26), by the French Benedictine Dom Augustin Calmet (1672–1757).

"Biblia Americana" was intended for publication as a Bible commentary, a digest of the best discoveries, learning, and hermeneutic challenges of his day not commonly found in works of this genre until well into the eighteenth century. To be sure, matters of biblical provenance, philology, and revelation mentioned above were fiercely debated in tracts, pamphlets, monographs, and the polemic literature of the day. However, these controversies had not yet reached the point at which theologians felt confident enough to address them in their vernacular commentaries on the Bible and thus to legitimize their open debate in the congregations and homes of their flocks.

Real or imagined, attacks on the inspiration and certainty of the Bible were deeply unsettling to believers of all stripes. How disquieting such challenges were can be gathered from a variety of contemporary responses. For instance, the philosopher John Locke (1632–1704) shared his alarm with Philipp van Limborch (1633–1712), professor of theology at Amsterdam, and go-between for many English and continental intellectuals. Locke agreed with van Limborch that Jean LeClerc's subversive attack on the Bible's inspiration posed a grave threat to people of faith: "I can readily believe what you say about the Critic's Critic [LeClerc's *Sentimens*]; the moment I came upon that passage in the eleventh letter I seemed to myself to hear cries of protest as if it meant the end of all religion." As Locke saw the epistemological problem, "If everything in holy writ is to be considered without distinction as equally inspired by God, then this surely provides philosophers with a great opportunity for casting doubt on our faith and sincerity. If, on the contrary, certain parts are to be considered as purely human writings, then where in the Scriptures will there be found the certainty of divine authority, without which the Christian religion will fall to the ground?"⁵¹ Richard Kidder (1633–1703), Lord Bishop of Bath and Wells, knew only too well what was at stake when he rose in defense of the Pentateuch's Mosaic authorship in his *Commentary on the Five Books of Moses* (London, 1694): "

Mr. *Hobs* in his *Leviathan*, the Author [La Peyrère] of the Book called the *Præadamite*, and *Spinosa* in his *Tractatus Theologico-Politicus* [profess that] the Five Books, commonly believed to be his [Moses], were never written by him. This matter is of great moment, and that wherein our Common Religion is greatly concerned. It strikes at the very root of it, and calls its Antiquity in question, and leaves the pious Reader at a great loss. For whereas we all own that God spake by *Moses*, yet still

Stein's fine editions of *Notes on Scripture* (vol. 15) and *The "Blank Bible"* (vol. 24), T. A. Schafer's edition of "*The Miscellanies*" a-500 (vol. 13), A. Chamberlain's *The "Miscellanies"* 500–832 (vol. 18), A. Plantinga's *The "Miscellanies"* 833–1152 (vol. 20), D. A. Sweeney's *The "Miscellanies"* 1153–1360 (vol. 23) – all part of *The Works of Jonathan Edwards*, 26 vols.

⁵¹ Locke's missive to Phillip van Limborch (26 Sept. 1685, # 834), *The Correspondence of John Locke* (2:746–51); the quotation appears on 748–49. See also Locke's strong reservations about "Immediate Inspiration," in *John Locke: Writings on Religion* (37–41).

(if these Men be in the right) we shall be perfectly at a loss for the Author of these Books, and not know whether he were a Servant of God or not. Besides, when the Authors of the New Testament quote *Moses*, and our Saviour appeals to his Writings, we shall however be very uncertain where to find these Writings, if he be not allowed to be the Author of the *Pentateuch*, and so will the Christian Religion suffer at the same time. ("Dissertation," in *Commentary*, p. xxiv).

Far from being a slippery-slope argument to horrify his readers, or an excuse to justify the publication of yet another English commentary, Kidder engages this unholy trinity of critics full force. His balanced refutation is a model for its time.

Kidder's colleague Richard Bentley (1662–1742), master of Trinity College (Cambridge), was no less condemnatory in his commencement address on July 5, 1696. In this age of infidelity and Deist libertinism, Bentley knew first hand, "There are a sort of persons baptized indeed into the Christian Faith, and educated in the profession of it: but in secret ... they oppose it and blaspheme it, repudiating at once the whole authority of Revelation, and debasing the sacred Volumes to the rank of ordinary Books and Ethics."⁵² Philosophers, theologians, and Anglican bishops were not the only ones to express their alarm. Mather's much admired Sir Richard Blackmore, M.D. (1654–1729), member of the Royal College of Physicians and poet extraordinaire (*Diary* 2:105, 141), ably read the writing on the wall, when he lambasted "*Hobbs* and *Spinoza*" for spreading their "contagious Influence" throughout the land. Since the Restoration of the monarchy, Blackmore knew only too well, their "impious Maxims" spread far and wide into every "Coffee-house," where their atheistic principles are "the ordinary Subjects of Conversation." This perversion, Blackmore felt, was to be expected, given the "loose Court" (of Queen Anne) and the people's "Aversion to the former Fanatical Strictness" of the Puritan party during Cromwell's Interregnum.⁵³

Condemnations of this type are legion in the homiletic literature of the period, and much has been written about them. Whether or not they are merely the vociferous denunciations by ecclesiastics (or by an occasional physician-poet) of a real or imagined threat to the survival of religion, they demonstrate a widespread perception of Christianity under siege. Nothing short of the very foundation of the Judeo-Christian religion appeared to be crumbling away, for its superstructure had been reared on the dogma of the Bible as God's authentic revelation to man.⁵⁴ Thus while clergymen invoked divine wrath against the infi-

⁵⁴ Of the many fine studies that have addressed this topic in recent years, see Peter Harrison's *'Religion' and the Religions in the English Enlightenment* (Cambridge: Cambridge UP, 1990) 61–98; J.A.I. Champion's *Pillars of Priestcraft Shaken* (1992) and his *Republican Learning*

delity of the age and while the storm gathered polemic strength in the pamphlet warfare against a real or imagined Deist menace,⁵⁵ compilers of commentaries stood aloof as they stuck to their proven (albeit predictable) formulas in controversial matters: they ignored them. If that proved impossible, anachronisms were explained away as foreshadowing or prophecy; and if that did not accomplish the task, textual corruptions were presented as deliberate snags to test one's faith.

"Biblia Americana" and its Competitors

How then does Cotton Mather's American commentary on the Bible measure up to those of his European peers? A comparison of "Biblia Americana" with the most popular commentaries, published in the wake of Thomas Hobbes's *Leviathan* (1651) to the end of Mather's life (in 1728), suggests that Mather did not exaggerate when he promoted his grand book with the teaser, "Men of *every Religion*, yea, and some of *no Religion* at all, have had *Spoils* taken from them, for the Enriching of this Work." In fact, "Biblia Americana" is indeed a storehouse of "some Hundreds of the *Latest* as well as the *Oldest Writers*" collected from scattered volumes and pamphlets and gathered into "a sort of a *Library*."⁵⁶ The following biblical commentaries (in order of appearance) are the most relevant for the purpose of gauging Mather's place in a distinguished group of commentators: (1) *Synopsis Criticorum Aliorumque S. Scripturae Interpretum* (London, 1669–76), by Matthew Poole (1624–79), an ejected nonconformist and biblical scholar; (2) Matthew Poole's *Annotations upon the Holy Bible* (London, 1683–85); (3) *The Holy Bible ... with Annotations and Parallel Scriptures* (London, 1690), by Samuel Clark (1626–1701), a Puritan clergyman and editor of Poole's *Annotations*; (4) *A Commentary on the First ... [and] Fifth Book of Moses* (London, 1695–1710), by Simon Patrick (1626–1707), Lord Bishop of Ely; (5) Jean LeClerc's *Genesis, sive Mosis Prophetarum liber primus* and *Mosis Prophetarum libri quatuor* (Amsterdam, 1693–96); (6) *A Commentary on the Five Books of Moses* (London, 1694), by Richard Kidder (1633–1703), bishop of Bath and Wells; (7) the deservedly popular *An Exposition of all the Books of the Old and New Testament* (London, 1708–10), by the Presbyterian clergyman Matthew Henry (1662–1714); (8) *Commentaire littéral sur tous les livres de l'Ancien et du Nouveau Testament* (1707–1716), by the French Dominican Priest Antoine Augustin Calmet (1672–1757); and finally, (9) *A Paraphrase with Short and Useful Notes on the Books of the Old Testament* (London, 1717), by Thomas

(69–116); J. I. Israel's *Radical Enlightenment* (2001) and its companion *Enlightenment Contested* (2006); and S. J. Barnett's *Enlightenment and Religion* (45–80).

⁵⁵ In *The Enlightenment and Religion* (11–44), Barnett argues convincingly that the deist menace was really a bugbear devised by clerics to rein in their aberrant colleagues.

⁵⁶ Mather, *A New Offer To the Lovers of Religion and Learning* (1714), 8, 4.

Pyle, lecturer at King's Lynn (Norfolk) and Arian disciple of William Whiston. Mather quotes from all of these works at one time or other.⁵⁷

The following table identifies the hermeneutic positions of Mather's colleagues on the philological interpolations in the Pentateuch discussed above (see table on page 146).

These nine most important Bible commentaries written in the wake of Hobbes and Spinoza but before Mather's death in 1728 demonstrate the extent to which Spinozist criticism of the Holy Scriptures as text had proliferated into the farthest corners of the British Empire and across Western Europe. In all fairness, there were other learned and popular (and often reprinted) Bible commentaries during Mather's lifetime such as *Pious Annotations Upon the Holy Bible* (1607; London, 1648; 4th ed. 1664), by the Italian Reformed theologian Giovanni Diodati (1576–1649) of Geneva; or *Annotations on the Pentateuch* (London, 1616–19, 1627, 1639), by Henry Ainsworth (1571–1622), an English Brownist scholar who died in his Dutch exile; or Theodore Haak's *The Dutch Annotations Upon the Old and New Testament* (1637; London, 1657), an English translation of the commentary approved by the Synod of Dort (1618) and first published in 1637; or, most important, *Annotationes in Vetus Testamentum* (1642), by the celebrated Dutch Jurist and theologian Hugo Grotius (1583–1645), who is considered one of the fathers of modern historical criticism of the Bible. Composed well before mid-century, they remain silent on the issues at hand. The nine-volume edition (folio) of the mighty *Critici Sacri, sive doctissimorum virorum in SS. Biblia annotationes, et tractus* (London, 1660), edited by John Pearson et al. and collected by an army of learned doctors of theology, must be mentioned here as well. However, Matthew Poole, whose *Synopsis Criticorum* distills this massive work and appeared almost simultaneously – at less than half the cost of *Critici Sacri* – can speak for both commentaries.⁵⁸ Mather had access to both of these massive collections at Harvard library (*Catalogus Librorum* [1723], pp. 8, 25).

The tabulation of these commentaries thus demonstrates that except for Poole's *Synopsis*, LeClerc's *Mosis*, Calmet's *Commentaire*, and Pyle's *Paraphrase*, virtually all others (re)published during Mather's lifetime either ignored the textual problems altogether, glossed them as prophetic foreshadowing of later events, resorted to supernatural agency, or outright denied later interpolations. Pearson's *Critici Sacri*, Poole's *Synopsis*, LeClerc's *Mosis*, and Calmet's *Com-*

57 Basil Hall's "Biblical Scholarship" (3:38–93) and "Appendix II to the Study of the Bible Commentaries" (3:531–35). Although dated by our standards, the entry on "Commentaries," in *Cyclopedia of Biblical, Theological, and Ecclesiastical Literature*, is still a very useful tool and is now easily accessible through Ages Software, Inc. www.ageslibrary.com (2000).

58 On the expense of printing Matthew Poole's *Synopsis Criticorum*, see S. A. Allibone's *Critical Dictionary* (2:1622). The Rev. Dr. Steven Dilday deserves tremendous praise for currently translating and publishing Poole's *Synopsis*, in *The Exegetical Labors of the Reverend Matthew Poole* (Culpeper, VA: Master Poole Publishing, 2007–).

mentaire were virtually inaccessible to all but the learned (requiring Latin or French) or the well-heeled with personal copies of these multivolume folios or access to college libraries. Commentaries in English by Matthew Poole, Samuel Clark, Simon Patrick, Richard Kidder, Matthew Henry, and Thomas Pyle differ from their Latin and French companions in interesting ways. Unlike his *Synopsis Criticorum*, Poole's *Annotations* in English disallows interpolations – if he acknowledges them as such in the first place. Perhaps following Poole's example, Samuel Clark either ignores the problem altogether or resorts to supernatural agency. Simon Patrick's *Commentary*, perhaps the most scholarly of the English language commentaries of the period, denies the presence of interpolations except in the case of Moses's burial and lost tomb, which (so Patrick) was probably effected by angels to keep the Israelites from idolizing Moses's relics – if the episode was not a redactor's post-factum insertion in the first place. Only Jean LeClerc's commentary on *Genesis* was available in an English translation as a summary or excerpt, but *The Twelve Dissertations out of Monsieur Le Clerc's Genesis* (London, 1696) were all the more powerfully subversive. Significantly, LeClerc's *Genesis* is Mather's principal source for textual interpolations. Richard Kidder's *Commentary on the Five Books of Moses* (1694) denies outright any interpolations, in his annotations on the Pentateuch. Much to his credit, however, the Lord Bishop of Bath and Wells prefaces his commentary with a full-scale refutation of the twenty-two most egregious textual problems raised by Hobbes, La Peyrère, Fisher, and Spinoza. Kidder does so ably and effectively with the least amount of invective or name-calling when compared to tracts and pamphlets that were devoted to the same task. Matthew Henry's all-time favorite *Exposition of all the Books of the Old and New Testament* (London, 1708–10) is exemplary for its warmth, detail, and lucid annotations, yet not for addressing historical-philological problems – let alone interpolations.⁵⁹ In all fairness to Henry as a thorough commentator, it must be acknowledged that he does briefly touch upon the subject in his introduction to Joshua and to 1 Samuel. In both places Henry appears to concede to Richard Simon that the historical books of the OT were probably “*Collections of the Authentick Records of the Nation*” put together by some unspecified prophets and by much later hands yet under divine guidance.⁶⁰ Dom Antoine August Calmet's *Commentaire littéral* (French: 1707–16; Latin, 1734) became the basis for his celebrated *Dictionnaire historique et critique de la Bible* (1730), but this magnificent compendium is known for its emphasis on the literal sense and its conservative approach to biblical criticism. Finally, Thomas Pyle's *Paraphrase* is an intriguing hybrid. An outspoken anti-

59 As H. O. Old acknowledges, “Critical concerns interested him [Matthew Henry] little. Problems of the historical reliability of Scripture, the harmony of the different documents and the authors to which they were to be attributed were beyond his scope of interest” (“Matthew Henry” 198).

60 Matthew Henry, *An Exposition Of the Historical Books of the OT* (London, 1708), sign. B.

trinitarian like William Whiston (Pyle's teacher), Pyle lists LeClerc as his source in all cases of interpolations, but does not follow him slavishly. Pyle supplies his readers with a paraphrase of the biblical text and succinct discussions of critical issues in footnotes. These commentaries, then, were the major competitors with which Mather's "Biblia Americana" had to contend in the publishing market of the time. As time progressed toward the middle of the eighteenth century, the historical-textual criticism sponsored by Hobbes, La Peyrère, and Spinoza became a more or less ordinary (if necessary) point of annotation in all but the most pious commentaries that emulated the example of Matthew Henry. Based on this fair sampling alone, it is safe to conclude that "Biblia Americana" not only kept abreast of the latest intellectual developments in Europe, but also adopted and adapted the avant-garde scholarship of the early Enlightenment whenever and wherever it had to be reconciled with his Reformed, but progressively interdenominational, position under the auspices of Halle Pietism.⁶¹ He clearly spurned the narrow partisanship of "the Mean, Little, Narrow Souls, that know no *Religion*, but that of a *Party*, and their *Secular Interest*" (*Manuductio* 129).⁶² More important issues were involved than could be solved by gazing at one's own navel.

Modern students of theology may smile at such pedestrian debates of a bygone era. Measured by what are now widely considered hermeneutic commonplaces culminating long ago in Johann Gottfried Eichorn's *Einleitung in das Alte Testament* (1780–83), or in Julius Wellhausen's *Die Composition des Hexateuchs* (1876–78) and *Prolegomena zur Geschichte Israels* (1878), the historical-textual disputes about the Bible's inerrancy and verbal inspiration in the early Enlightenment seem little more than tempests in a teapot. But that is not the point. After all, we must guard against our Whiggish inclinations to judge the standards of the past by the hindsight afforded to a much later age. When umpired by the contemporaneous benchmark of its European competitors, "Biblia Americana" delivers much more than what Mather promised in his handbill *New Offer to the Lovers of Religion and Learning* (Boston, 1714). The revised advertisement appearing at the end of Samuel Mather's biography *The Life of the Very Reverend and Learned Cotton Mather* (Boston, 1729) reflects the significant changes Cotton had undertaken in the last fifteen years of his life.⁶³

61 See R. F. Lovelace, *American Pietism* (32–72); O. Scheiding's important corrective in his forthcoming essay "The World as Parish"; and W. Splitter's "Fact and Fiction" (102–22).

62 Mather's handbook for ministers *Manuductio ad Ministerium* (Boston, 1726) was a much prized and oft-reprinted resource for American clergymen until the early 19th century.

63 See my discussion in Section 1 of this introduction.

Were the Ancient Prophets Divinely Inspired?

Closely related to the debate on biblical authorship is the controversy about the nature and function of inspiration as they are described in the Bible. God's divine communication with man is central to all creeds founded on supernatural revelation. The Judeo-Christian religion is no exception. If God spoke to man through dreams, voices, visions, and angelic visitations, and if holy men and women were particularly apt to be the medium for such communications in moments of religious ecstasy, why were some prophets, seers, and soothsayers more prone than others to be conduits of God's revelation to man? Why did God's oracles speak more frequently and fully in ancient than in modern times? Did divine revelation suddenly cease in the third or fourth century of the Common Era because the Bible was now completed as is generally claimed, or does God still converse with man today?⁶⁴ Questions of this nature were particularly rife in mid-seventeenth-century England when the authority, inspiration, and interpretation of scripture prophecies seemed much on the minds of the faithful. Fifth Monarchists, Ranters, Quakers, Levelers, Muggletonians, the French Prophets – the whole lunatic fringe – seemed unleashed upon the Puritan Commonwealth in the turmoil of the 1640s and 50s. Many tried single-handedly to usher in the Second Coming through spiritual transformation, the conversion of the Jews, or an all-out war on the Roman Antichrist in Ireland, France, or Rome itself.⁶⁵

The decapitated corpse of Charles I was barely cold when royalist Thomas Hobbes thrust his *Leviathan, or The Matter, Forme, & Power of a Common-Wealth Ecclesiasticall and Civill* (London, 1651) into this hotbed of anarchy, when England was on the verge of plunging into the abyss. The only way out of this pandemonium was to return political and ecclesiastical power into the firm hands of the crown. As Hobbes saw it, chaos could only be averted if monarchy was restored to rule the commonwealth. After all it is through the king's power and authority that social order is safeguarded.⁶⁶ The alternative? A Christian commonwealth whose nature and rights "dependeth much upon Supernaturall Revelations of

⁶⁴ Mather does believe that divine revelation ceased in the 4th c. CE when the Bible was closed, in Mather's first essay "I. Vates. Or, Some Remarks upon the Spirit of Prophecy" (27), appended to *BA* (following Revelation).

⁶⁵ See such mainstays as L. R. Froom, *Prophetic Faith of Our Fathers* (1946–54); N. Cohn, *Pursuit of the Millennium* (1970); P. Toon, *Puritans, The Millennium and the Future of Israel* (1970); B. S. Capp, *The Fifth Monarchy Men* (1972); C. Hill, *The World Turned Upside down* (1975); J. F. Maclear, "New England and the Fifth Monarchy" (223–60); H. Schwartz, *The French Prophets* (1980); J. C. Davis, *Fear, Myth and History* (1986); J. Holstun, *A Rational Millennium* (1987); D. S. Katz and R. H. Popkin, *Messianic Revolution* (1999); R. Smolinski, "Apocalypticism in Colonial North America" (36–71).

⁶⁶ S. Mintz's *The Hunting of the Leviathan* (1962) is still eminently useful to gauge the reactions of Hobbes contemporaries. Unless otherwise noted, all references to Hobbes's *Leviathan* (1651) are to Richard Tuck's edition (see note 13, above).

the Will of God," which in turn depends on the fallible interpretations of man (*Leviathan* 3.32.255). The best way to reestablish balance and reason, therefore, was to return miter and scepter into the hands of the king as God's representative on earth. Not at all surprisingly, then, Hobbes tried to accomplish the restoration of royal authority by casting aspersions on the integrity of the Bible, on the specific means through which God communicated his will to man. If problems of textual corruption and transmission were not enough to breach the walls of the Bible's mighty fortress, Hobbes cunningly set up his Trojan horse to pry the gates open from within. Frequently omitted from modern editions of *Leviathan*, parts 3 and 4 of this work are central to Hobbes's agenda to destabilize the Bible's claim to divine origin. "Why wee beleieve the Bible to be the Word of God, is much disputed," the sage of Malmsbury knowingly pointed at the core issue. Faith in the Bible is God's gift and affects each believer differently (*Leviathan* 3.43.405). It is likely that Hobbes had the *Westminster Confession* (1647), ch. 1, art. V, in mind when he pointed at the subjective nature of the Bible's authority. This consensus document between Presbyterians and Independents had made faith and assurance in the Bible's "infallible Truth and Divine Authority" a function of Grace: "the inward work of the holy Spirit, bearing witness by and with the Word in our hearts" (Walker, *Creeds* 368). The scriptures therefore must be read with an inner eye of faith, which in itself is opened through saving Grace in the heart of God's elect. Grace, in turn, predisposes the chosen to read the Bible spiritually – not with cold calculating reason searching for contradictions! But the question is not "*Why we Beleeve*" in the scriptures' infallible truth, Hobbes continued to probe this issue, "but, *How we Know it*" to be the Word of God. We must not act "as if *Beleeving* and *Knowing* were all one" (*Leviathan* 3.43.405–06). This was the touchstone upon which all depended.⁶⁷

⁶⁷ Hobbes was not alone in his efforts to dismantle the Bible's authority. For ends quite different from each other, he found himself in bed with Samuel Fisher (1605–66), an English Baptist turned radical Quaker, whose nine-hundred page *Rusticus Ad Academicos* (1660) was the most sophisticated work yet to identify and itemize problems with the Bible's authenticity, textual redaction, transmission, and canonicity; it has much in common with Spinoza's *Tractatus Theologico-Politicus* (1670) published a decade later. In his *Rusticus*, Fisher dismisses the Bible's textual authenticity on much the same grounds as Hobbes does: It is absurd to argue, as the *Westminster Confession* does (ch. 1, art. VIII), that "the *Letter* is immediately come to us from God without interveniency of any Medium obnoxious to fallibility, the *Text* is not capable to be altered, nor is altered in one Tittle so, but that its intirely the same that it was in every *Point*, *Syllable* and *Jota*." The Bible as we have it today is "a *Bulk of Heterogeneous* Writings, compiled together by men, taking what they could find of the several sorts of Writings, that are therein, and trussing them all up into one *Touch-stone*, crowding them into a *Canon*, or *Standard* for the trial of all *Spirits*, *Doctrines*, *Truths*, and by them alone" (*Rusticus*, "The Second Apologetical and Expository Exercitation," ch. 5, p. 143; "The Third Apologetical and Expostulatory Exercitation," ch. 2, p. 25 [separate pagination]); Fisher refers to the Westminster Confession (W. Walker, *Creeds* 369). For discussions of Fisher's contributions to the debate about the historical criticism of the Bible, see C. Hill, *World Turned Upside Down* (259–68); R. H. Popkin, "Spinoza and Samuel Fisher" (219–36); and N. McDowell, *The English Radical Imagination* (137–70).

The modes of God's communication with man as related in scriptures are well known, and few openly dared to question the certainty of his revelations before *Leviathan*. Hobbes's fresh discussion of faculty psychology and its epistemological connection with supra-rational occurrences is a milestone in the study of human perception (*Leviathan*, "Of Man"). How does man perceive his surroundings, construct his reality, and distinguish between internal and external stimuli – let alone their natural or supernatural origin? How do existential crises, creeds, and the malleable ideas of God's nature shape man's response to inexplicable phenomena in a world he believes to be populated with spirits, demons, angels, and powerful forces locked in combat for the heart and soul of man? To be sure, Hobbes did not question divine revelation as such, but distrusted man's ability to distinguish between external impulse and wishful thinking. Hobbes's misgivings are grounded in part in the Cartesian mechanism of corpuscular motion and the untrustworthiness of our senses. Paraphrasing René Descartes, Hobbes claims that external objects make impressions on our senses, and by pressing on the inward nerves and membranes leading to the brain and heart cause resistance, which motion we attribute to the innate qualities of external objects. These qualities, however, are nothing else but motions of matter pressing on our senses, producing counter-motions and appearing to our fancy as light, sound, odor, savor, or feeling. Moreover, since rubbing our eyes makes us imagine a light, and pressing our ears makes us fancy a din in the same manner as external objects do when they act upon our senses through unobserved motion, Hobbes found proof that the observer's imagination forms an image of the external object, like a reflection in a mirror or an echo of a sound. "Yet still the object is one thing, the image or fancy is another. So that Sense in all cases, is nothing els but originall fancy, caused ... by the pressure, that is, by the motion, of externall things upon our Eyes, Eares, and other organs thereunto ordained" (*Leviathan* 1.1.14). Hobbes used the terms *imagination* and *fancy* interchangeably. They denote to him the formation of mental images of something neither perceived as real nor present to the senses. Over time, he argues, these mental images are obscured by stronger or more recent sensory impressions, by the weakness of the imagination, or by the distempers of the body, and thus fade into memory. The faculty of memory is therefore but the storehouse of our decaying sensory impressions and degenerating images that are most untrustworthy when compounded in dreams and distorted by such passions as love, hate, fear, and desire. Properly considered, dreams and visions are but "a Fiction of the Mind" and "the reverse of our waking Imaginations" (*Leviathan* 1.1.16, 17–18).⁶⁸

With this epistemological matrix in place in the opening chapters of *Leviathan*, Hobbes sets out to critique God's communication with his prophets, seers, and holy men as related in the Bible:

⁶⁸ See also *Leviathan* (1.1.15–17 and 1.8.54).

To say he [God] hath spoken to him [the prophet] in a Dream, is no more then [sic] to say he hath dreamt that God spake to him; which is not of force to win beleef from any man, that knows dreams are for the most part naturall, and may proceed from former thoughts; and such dreams as that, from self conceit, and foolish arrogance, and false opinion of mans own godliness, or other vertue, by which he thinks he hath merited the favour of extraordinary Revelation. To say that he hath seen a Vision, or heard a Voice, is to say that he hath dreamed between sleeping and waking: for in such manner a man doth many times naturally take his dream for a vision, as not having well observed his own slumbering. To say he speaks by supernatural Inspiration, is to say he finds an ardent desire to speak, or some strong opinion of himself, for which he can alledge no naturall and sufficient reason. So that though God Almighty can speak to a man, by Dreams, Visions, Voice, and Inspiration; yet he obliges no man to beleieve he hath done to him that pretends it; who (being a man) may erre, and (which is more) may lie. (*Leviathan* 3.32.257)

This rationalist approach, so disarmingly logical and yet so frighteningly subversive, clearly indicates how Hobbes downgraded the means of God's revelation to a natural function of man's hyperactive imagination, delusion, or worse, conniving ambition. This is not to say that Hobbes questioned outright God's ability or will to communicate with man in dreams, visions, voices, or through supernatural inspiration. Rather, Hobbes emphasized the uncertainty and irrational nature of such occurrences, which, because rooted in man's sensory experience, are problematic and therefore inadmissible proof of "absolute knowledge of Fact, past, or to come," because "knowledge of Fact . . . is originally, Sense; and ever after, Memory" (*Leviathan* 1.7.47). For Hobbes, then, faith unless grounded on demonstrable evidence, on clear and certain knowledge that God had indeed communicated with his prophets, is too erratic to be trustworthy. Rather, for Hobbes, belief in the certainty of revelation is a function of *unverifiable* Grace, of subjective conviction, ecclesiastical dogma and tradition, and little more than dependence on the character and credibility of the prophet with whom God is to have spoken thousands of years ago. If we take for truth the utterances of a purported prophet whose character we deem trustworthy, we merely have "an opinion of the veracity of the man," of the honesty and piety of the speaker. But that in itself is neither empirical proof of fact, nor of the truth of the utterance, nor of its divine origin – let alone its epistemological signification. Absolute certainty therefore remains unattainable and indelibly linked with the credibility of the prophet who is the only one who truly knows if God did speak to him (*Leviathan* 1.7.48, 49). In this way, then, the authority of the Bible's inspiration and God's revelation to man are subject to man's fallible reason, his passions, worse to the whims of reputation.⁶⁹

⁶⁹ If anachronistic references be allowed in this context, Thomas Paine's subversive *The Age of Reason* (1794, 1796) illustrates the danger to which Hobbes's argument could lead: "Revelation, when applied to religion, means something communicated *immediately* from God to man. No one will deny or dispute the power of the Almighty to make such a communication, if he

The ancient prophets were apparently well aware of this inherent danger and therefore did *not* accept purported revelations on faith alone. So, too, the subjective nature of prophetic dreams and visions and the danger of mistaking them for divine revelations are all the more apparent, because the Bible requires would-be prophets to attest their illumination through external means such as conformity to the law of Moses as well as signs and miracles testifying to supernatural agency (Deut. 13:1–5).⁷⁰ Such empirical tests for establishing certainty, however, were not foolproof either as it turns out. The Hebrew and Christian Bibles abound with tales of false prophets performing miracles and of true prophets failing to carry out God's mission. The case of the prophet Micaiah is particularly telling. Micaiah was the only true prophet out of 400 whom the King of Israel consulted in the war against Ramoth Gilead (1 Kings 22). Yet on returning from his mission to prophesy against Jeroboam's bovine altar, Micaiah fell prey to the lies of an older prophet (1 Kings 13). "If one Prophet deceive another," chafed Hobbes, "what certainty is there of knowing the will of God, by [any] other way than that of Reason?" (*Leviathan* 3.32.257). Therefore, *believing* that the Bible is the Word of God and *knowing* that it is indeed so are two entirely different issues, especially when ecclesiastical dogma puts a premium on accepting its teachings on faith (*Leviathan* 3.43.405, 406). Caveats of this nature abound in *Leviathan* and had the potential of turning shaken believers into outright skeptics. Hobbes succeeded in dismantling biblical authority by subjecting it to the standard of human reason, and yet, ironically, he also rehabilitated the Bible by making its authority dependent on the decrees of the civil ruler. After all, he did not want to pour out the baby with the bathwater. If the king orders that the Bible be the Word of God, Hobbes declared, all subjects are bound to observe its strictures in accordance with the laws of the land. Hobbes's remarkable U-turn is perhaps not all that surprising if we remember that his *Leviathan* appeared just two years after the Puritan regicides seemed to have put an end to the English monarchy once and for all. Perhaps he simply tried to restore order by discrediting fanatics who justified their political agendas in terms of end-time visions and prophetic foreshadowing and abrogation – by violence, if necessary.

Benedict Spinoza, Hobbes's Dutch contemporary, was even more sweeping in his critique of the Bible, for Spinoza did not wrest biblical authority out of the hands of the Church only to deliver it into the hands of the civil ruler.

pleases. But admitting, for the sake of a case, that something has been revealed to a certain person, and not revealed to any other person, it is revelation to that person only. When he tells it to a second person, a second to a third, a third to a fourth, and so on, it ceases to be a revelation to all those persons. It is revelation to the first person only, and *hearsay* to every other person, and consequently they are not obliged to believe it." In P.S. Foner, *The Life and Major Writings of Thomas Paine* (465–66). For a useful discussion of Paine's views on religion, see E. H. Davidson and W. J. Scheick's *Paine, Scripture, and Authority* (1994).

70 See also *Leviathan* (3.36.298–302); Spinoza (*TTP* 2.29).

Rather, he reduced its venerable authority to a function of morality and personal choice. "What is prophecy?" Spinoza asked at the opening of his *Theological-Political Tractate*, and like Hobbes he immediately struck at the foundation of the Bible's claim to authority (*TTP*, "The Preface" 8). At home in classical Hebrew like few of his contemporaries and versed in the customs and superstitions of ancient Israel, Spinoza assailed the common misconception of his time that every "yod and tittle" in the Bible had been dictated by God. The ancient writers were not endowed with "superhuman minds." They were completely ignorant about secondary causes (*TTP* 1.14). In ascribing even the most natural phenomena to the mystery of God, they were doing no more than their pagan neighbors who were worshipping other gods. We must therefore not assume that everything in the Bible is a divine revelation merely because pious writers ignorantly refer all things to God. The hyperbolic language and tumid metaphors of the ancient prophets are indicative of their "unusually vivid imagination," not, however, of their "unusually perfect minds" (*TTP* 2.27). Quite to the contrary, Solomon, universally regarded as the wisest of men, had no special aptitude for prophecy. In fact, the more educated a person, the less likely he is given to prophesying. "Men of great imaginative power are less fitted for abstract reasoning." This proved the case because learned men "who excel in intellect and its use keep their imagination more restrained and controlled, holding it in subjection, so to speak, lest it should usurp the place of reason" (*TTP* 2.27). Spinoza suggested that education is actually detrimental to receiving divine revelation: Pious devotion, a hyperactive imagination, and a volatile temperament are the prophets' chief qualifications for their office. They neither possess rare insight into natural or spiritual phenomena, nor do they become more learned by supernatural inspiration, nor do they ever relinquish any of their former prejudices. "We are, therefore, not at all bound to trust them in matters of intellect" and should not turn to them for knowledge about natural causality, because their certitude "was not mathematical ... but only moral" (*TTP* 2.33, 38).

Far from validating the prophets' sacred office, Spinoza challenged his contemporaries' deep hankering for prophecies and revelations. To Spinoza, supernatural revelation is the least trustworthy of all forms of human knowledge. Even the Bible demands confirmation by signs. Yet these signs and wonders were not uniformly accepted either, Spinoza pointed out, because they varied greatly and depended on the opinions and capacity of each prophet and, except in the case of Moses, were witnessed only by a few individuals. Besides, whatever the ancients could not explain, they esteemed a prodigy and a miracle, when in truth such signs were little more than natural phenomena of which the secondary causes were not easily understood (*TTP* 2.28–29, 6.84). Even the tenor of divine revelation was subject to the prophet's personal disposition and temperament and varied according to his mood, cultivation of mind, and background: "If a prophet was cheerful, victories, peace, and events which make

men glad, were revealed to him; in that he was naturally more likely to imagine such things. If, on the contrary, he was more melancholy, wars, massacres, and calamities were revealed; and so according as the prophet was merciful, gentle, quick to anger, or severe, he was more fitted for one kind of revelation than another" (*TTP* 2.30). We must therefore not mistake the prophet's personal prejudices or mood for universal truths. His own bodily humors are responsible for the attributes of his visions; his choice of metaphors and images is shaped by his rusticity, and the style of his language (rude or refined, courtly or plebeian), is informed by his upbringing rather than divine dictation. Spinoza did not neglect any opportunity to explain away the mysteries of the Bible in terms of the peculiarity of ancient Jewish customs, personal idiosyncrasies, and historical context – rational modes of explication that he incorporated in his universal rules of interpreting scripture (*TTP* 2.31, 7.99–104). In demystifying scripture, he invested human reason with the kind of power that his contemporaries ascribed to God alone (*TTP* 15.190–99).

Counterattacks on the Hobbists and Spinozists of the day were not long in coming, but the pros and cons of the debate are well known and need not here be rehearsed in great detail.⁷¹ For our purposes, it is sufficient to illustrate briefly how the defenders of the Faith responded to this form of heterodoxy, especially when real or imagined sacrilege masqueraded in defense of true religion. These wolves in sheep's clothing – ostensibly opposed to the pandemic of irreligion – were now spreading the contagion wherever they could. Charles Blount's anonymously published *Miracles, No Violations of the Laws of Nature* (London, 1683) is a case in point. The title of this tract easily catches the unsuspecting reader off guard in more ways than one: It poses as an attack against Deism by promising evidence that miracles *can* be reconciled with the immutable laws of nature, but supplies the reader with little more than an anthology of translated excerpts from Thomas Burnet, Hobbes, and Spinoza – without the least hint that the reader is actually perusing extracts from known heretics. Thomas Brown's *Miracles Work's Above and Contrary to Nature* (London, 1683) and Matthias Earbery's *An Answer to a Book Intituled Tractatus Theologico Politicus* (London, 1697) pursue similar aims. Although a typical apologetic dialogue between an orthodox divine and a Spinozist, Earbery allows the latter more space to air his convictions than to the former whose predictable answers are lukewarm. Claude Groteste de La Mothe (1647–1713), Reformed minister and refugee in England after the Revocation of the Edict of Nantes (1685), perhaps best summarizes the dilemma in his *Inspiration of the New Testament Asserted and Explain'd in Answer to some Modern Writers* (London, 1694): "I know no body that has more formally assail'd the Inspiration of the Sacred Books of the New Testament," he protested against the anonymous author of *Sentimens de quelques*

71 See S. Mintz, *Hunting*, and R. L. Colie, "Spinoza in England"

Théologiens de Hollande sur L'Histoire Critique du Vieux Testament (Amsterdam, 1685).⁷² “*Spinos*a led the way of the same Undertaking; but there was little heed given to that Author, because all Men knew he had no Religion. . . . But *M. N.* has given a more subtle and more dangerous Air to *Spinos*a's Notions and has digested them into a System” (La Mothe 9–10). The danger, as La Mothe saw it, lay in the systematic way in which this Monsieur “*N.*” went about his business. Jean LeClerc's anonymously published epistolary discourse – as mentioned above – posed as a repudiation of Richard Simon's heretical *Histoire critique du Vieux Testament* (1678), but did more damage than it proposed to repair. As is often the case in fictional dialogues between opponents, LeClerc furnished his ministerial colleague Monsieur *N.* with arguments more trenchant and volatile *against* the trustworthiness of biblical inspiration than LeClerc's own tepid and hollow response to his Dutch friend mustered in the Bible's defense. There were many who immediately recognized LeClerc's distinct hand in the matter and accused him of heresy, but he never admitted to any wrongdoing.⁷³ What is important to recognize here is that the critics of LeClerc's *Sentimens* were outraged by his cunning, yet in engaging his line of reasoning on his own grounds they did more to spread LeClerc's ideas than to curb them. As will be demonstrated below, Cotton Mather in faraway America condemned the anonymous *Sentimens* for its author's irreligion, but adapted and embedded many of LeClerc's thoughts in his own “*Biblia Americana*.” If nothing else, Mather's response illustrates that he moved away from rigid orthodoxy by embracing an ameliorated position on the crucial issue of verbal inspiration. But more of this later.

In *Sentimens*, Monsieur *N.* (who denies being a Deist) does not doubt that the biblical prophets dreamed dreams, saw visions, and heard voices, but argues that we cannot be sure if they wrote down (by dictation) exactly what they dreamed, heard, and saw; or if the prophets merely wrote down from memory and in their own idiom the sense or ideas of what they heard and saw or, indeed, if they only related their supernatural experience to their disciples

72 Many who watched from the sidelines were eager to join the fray. Most notable among them were the Anglican theologian William Lowth (1661–1732), whose *A Vindication of the Divine Authority and Inspiration of the Old and New Testament* (London, 1692, 1699) became the principal parapet against LeClerc's denigration of verbal inspiration; and Bishop John Williams (1626–1709) of Chichester delivered the prestigious Boyle lecture series for 1695–96 as a defense of the divine inspiration of the Holy Scripture. See his *Divine Authority of the Scriptures* (1695), *The Possibility, Expediency, and Necessity of Divine Revelation* (1695), *The Certainty of Divine Revelation* (1696), *The Characters of Divine Revelation* (1696). In this debate must be included Mather's oft-quoted Robert Jenkin's *Reasonableness and Certainty of the Christian Religion* (1698), *A Brief Confutation of the Pretences Against Natural & Revealed Religion* (1702), and John Lacy's *The General Delusion of Christians, Touching the Ways of God's revealing Himself, To, and By the Prophets* (1713). Justin A. I. Champion sheds much light on this controversy in his fine essay “‘Acceptance to inquisitive men’: Some Simonian Contexts for Newton's Biblical Criticism, 1680–1692” (77–96).

73 See F. Stummer, *Bedeutung* (69–85) and S. Müller, *Kritik und Theologie* (62–79).

who recorded their masters' own words upon recollection. How else are we to explain the stylistic diversity among the different prophets? "There is, for example, much difference between the Stiles of *Isaiah* and *Amos*." M. N. echoes Spinoza's identical argument (*TTP* 2:31). "*Isaiah's* manner of writing is high and lofty. On the contrary, that of *Amos* is low and vulgar; and we find in it diverse popular Expressions, and many Proverbs, which sufficiently testify that this Prophet, who was a Shepherd, expressed after his own way what God had said to him" (LeClerc, *Five Letters* 16). Surely, God would not speak to one of his prophets as a king does, and to another like an uncouth peasant? Lest this argument sounded blasphemous, or at least dangerously novel, M. N. cited St. Jerome and Dutch legal scholar Hugo Grotius in support of their similar claims.⁷⁴ According to this evidence, then, God only inspires prophets with his *general ideas* but allows his messengers to relay the information in their own native idiom. If this is true, exegetes must refrain from subjecting peculiar phrases and linguistic mannerisms to their hermeneutical spirals or fourfold method – literal, allegorical, tropological, anagogical. Even the much preferred literal or grammatical sense is then liable to happenstance if the signified is no longer rooted in the divine origin of the signifier.

Two Decalogues

Perhaps more puzzling than the differences in elevated and colloquial diction in Isaiah and Amos are the perplexing disagreement in the two versions of the Decalogue given in Exodus (20:8–11) and in Deuteronomy (5:12–15). Since God is identified as the speaker in both instances, should we not expect him to use the same phrases and the same rationale for giving his commandments? For instance, in Exod. 20:8, God decrees, "Remember the Sabbath day, to keepe it holy," but in Deut. 5:12, we are told to "Keepe the Sabbath day to sanctifie it, as the LORD thy God hath commanded thee." Likewise, Exod. 20:10 differs from the same commandment in Deut. 5:14 in that in the former none is allowed to do any work: neither "thou, nor thy sonne, nor thy daughter, thy man servant, nor thy mayd servant, nor thy cattell, nor thy stranger that *is* within thy gates." But in the latter book, the list is much different. Here it reads, none should work, neither "thou, nor thy sonne, nor thy daughter, nor thy man servant, nor thy maid servant, nor thine oxe, nor thine asse, nor any of thy cattell, nor thy stranger that *is* within thy gates, that thy man servant and thy maid servant may rest as well as thou." Most perplexing of all, we learn in Exodus that God

⁷⁴ See Jerome's *Commentariorum in Amos Prophetam Libri tres*, "Prologus" and Cap. 3:12, 13 [PL 025. 0990; 1020A-B]. Hugo Grotius, *Annotationes* (1642) on Matthew 1:22, in *Opera Omnia Theologica* (1679), tom. 2, vol. 1 p. 14. (lines 46–54).

instituted the Sabbath, because he created the world in six days and rested on the seventh (Exod. 20:11), but in Deuteronomy we are told to keep the Sabbath in remembrance of the Israelites' delivery from Egyptian slavery: "And remember that thou wast a servant in the land of Egypt, and that the LORD thy God brought thee out thence, through a mightie hand, and by a stretched out arme: Therefore the LORD thy God commaunded thee to keepe the Sabbath day" (Deut. 5:15). In light of this discrepancy, M. N. opines (according to LeClerc) that "either *Moses* in *Deuteronomy*, or the Author of the Book of *Exodus*, did not tie themselves scrupulously to exact words, as the Jews now a-days do; altho both these Authors bring in God speaking personally" (*Five Letters* 17, 18). It therefore seems clearer than the sun at noonday that "the Holy Spirit never tied it self up to words, as many of our Divines do now a-days. He only promoted the Holy Pen-men to give us the true sense of the Words that God made use of to make the Prophets understand his Will; and it is only in respect to the sense, and to the things, that the Apostles [in the NT] assure us that they were inspired by God" (*Five Letters* 20). And if we add to these difficulties tangible proof that even the four Evangelists frequently disagree amongst themselves about what they saw and heard or what Christ meant (*Five Letters* 33–34), we cannot but conclude that their inspiration was neither habitual nor permanent, but merely occasional and temporary. From all of these many instances, M. N. argues, it is patently obvious that divine providence "has preserv'd inviolably nothing but the Sense" of the Holy Scriptures. Yet "it has suffer'd Men to put in Synonymous Words one for another; and not hinder'd the slipping in of a great many Varieties, little considerable as to the Sense, but remarkable as to the Words and Order." In Matthew, for instance, there are "more than a thousand diverse Readings in less than eleven hundred Verses; but whereof there is not perhaps fifty, that can make any changes in the Sense; and that change too is but in things of little importance to piety." Had God deemed it essential to dictate every word to the writers of the Holy Scriptures, "he would undoubtedly have taken more care to preserve them." Evidence of this nature therefore demonstrates that "neither the Words, nor the things, have been inspir'd into those who have given us the Sacred History; although in the main that History is very true in the principal Facts" (*Five Letters* 38–39). Quite obviously, Jean LeClerc was satisfied with nothing less than total demolition of the belief in verbal inspiration, a widespread superstition (his supporters argued) that caused untold quarrels and sectarian strife in the Christian Church.⁷⁵

This demolition, then, appears to be the principal aim of Jean LeClerc's anonymous *Sentimens*, which created considerable uproar among the faithful

⁷⁵ See note 67 above. The Irish clergyman William Carroll invokes the specter of Spinozism in his vitriolic attack on their Dutch colleague Jean LeClerc, in *Spinoza Reviv'd* (1709) and *Spinoza Reviv'd. Part the Second* (1711).

even before the work was abridged and translated into English and appeared as *Five Letters Concerning the Inspiration of the Holy Scriptures* (1690). It may be compelling to fault human error, inept copyists, deficient transmission, or the wear and tear of time, for the many problems of textual variants and lacunae, yet it is quite another to impugn the Holy Spirit for caring little about the words, but only about the ideas. The debate about the epistemological certainty of revelation was sufficiently volatile to draw in more and more participants. In the American hemisphere, Cotton Mather adjusted to this crisis of confidence by working out the details of his response in his “Biblia Americana.” Even if he did not always acknowledge his sources, Mather extracted from friend and foe whatever seemed serviceable in defense of the Bible. He had internalized the different arguments on stylistic variations, syntactical disagreements, and diverging repetitions in parallel texts as developed by Richard Simon and Jean LeClerc. As to matters of the style and language of the divine original, Mather had no problems accommodating the ideas of his European peers. Robert Boyle, for one, defended the divine origin of the Bible in *Some Considerations Touching the Style of the Holy Scriptures* (London, 1661) by lambasting incompetent and literalist translators for the texts’ uneven style and loss of poetic elegance (7–16). Mather, however, followed LeClerc and did not blame the translators, but quite comfortably admitted that the Holy Spirit inspired the biblical writers only with the ideas, not with their choice of diction or manner of presentation. This reductionistic approach to matters of biblical inspiration seems to have caught on quickly even among conservative defenders of the Bible’s inerrancy. A case in point is *The Reasonableness and Certainty of the Christian Religion* (London, 1698), a huge apologetic work of more than a thousand pages in two volumes, which had gone through at least six editions by 1734. Mather thinks highly of its author, Robert Jenkin, D.D. (c. 1656–1727), a nonjuring controversialist and master of St. John’s College (Cambridge), whose work Mather synthesizes in “Biblia Americana.” In his “Essay, for a further Commentary, on the Sacred Scriptures” (BA, “Essay” 7r–8v), Mather grants (with Jenkin’s at his elbow) that God’s prophets were not merely passive conduits of the Holy Spirit engaged in automatic writing, but active participants; they relied on their own reason and sensory experience, on testimonials from eyewitnesses, and plain factual knowledge, sometimes even on quotations from other writers in composing the Bible: “In things which only fell under *Humane Prudence*, the Holy Spirit seems not immediately to have Dictated unto the Men of God; but only to have used a *Directive* or *Conductive* Power upon them; to supply them with suitable Apprehensions, & keep them in the Use of their own Rational Judgment, within the Bounds of Infallible Truth, & of Expediency for the present Occasion.” God only inspired his prophets and apostles with his divine “Doctrine,” but left “Indifferent Matters” entirely to their own discretion as long as they were useful “in the Propagation of the Gospel.” Indeed, God allowed his prophets the “Use

of their *own Words*, and of the *Style* that was most natural to them” because the Prophetic Spirit was “not Permanent or Habitual” but merely occasional as the need arose (*BA*, “Essay” 7r).⁷⁶ Inconsistency of style, word choice, and syntax did not necessarily signify to Mather textual corruption or editorial manipulation, but the prophets’ liberty to express supernaturally inspired precepts in their own words. The doctrine, not the letter of the text, is vouchsafed by the Holy Spirit. Of course, this is precisely the point that LeClerc’s propounded all along in his *Sentimens*, and Cotton Mather here seems perfectly happy to settle for this solution when he extracts his own material from Jenkin’s *Reasonableness* (London, 1698). Perhaps, the “contagion” was so subtle and pervasive that it ceased to be a threat to those most involved in studying its implications. Else would they have appropriated LeClerc’s thesis for their own task of surmounting sectarian hairsplitting rooted in verbal inspiration?⁷⁷

Be that as it may, “Biblia Americana” again illustrates the manner and extent to which the philosophic debates in the early Enlightenment quickly caught on even in Puritan New England. How does Mather respond to the conflicting versions of the two Decalogues, by which LeClerc supported his postulate? A glance at the principal commentaries published in Mather’s lifetime is indicative of the way he compares to his peers – if they acknowledged the issue in the first place. Matthew Poole’s *Synopsis Criticorum* identifies Hugo Grotius (the father of international law) as the linchpin in holding the two Decalogues together. If in the first version (Exod. 20:11) God instructs the faithful to keep his Sabbath because he rested on the seventh day upon completion of the world’s creation, but if in the second (Deut. 5:15) God commands the Israelites to consecrate the Sabbath in remembrance of their slavery in Egypt, then, says Grotius, “illud ad genus humanum pertinet, hoc ad Hebræos solos” (Grotius’s *Annotationes (Opera* 1:44), Poole’s *Synopsis* 1:405, on Exod. 20:8), “the former pertains unto the human race; the latter unto the Hebrews alone” (Poole, *Exegetical Labors* 5:50). There is no contradiction at all, so they argued. God did not institute a new law at all, but merely revived an antediluvian commandment that the Israelites had forgotten while they served their Egyptian masters (Matthew Henry, Simon Patrick, Samuel Clark, Richard Kidder, Thomas Pyle). God did not sanctify the Sabbath because he himself rested on the seventh day (Gen. 2:3), Matthew Poole objected in the English version of his *Annotations* (Exod. 20:11), but because that

⁷⁶ My references to Robert Jenkin’s *Reasonableness of the Christian Religion* are to the two-volume fifth edition (1721), vol. 2, book 2, ch. 2, “Of Inspiration” (2:22–40). Mather’s citation is from 2:36, 37.

⁷⁷ In his “A Note on the MANUDUCTIO AD MINISTERIUM,” Perry Miller registers his surprise about Mather’s open-mindedness toward new ideas: “Perhaps the most arresting moral underscored by the *Manuductio* is that Cotton Mather, the Old North conservative, the guardian of orthodoxy, the enemy of the Leveretts and the Brattles, was moving with his times and had come to share many insights of the ‘Age of Reason,’” in T.J. Holmes, *Cotton Mather* (2:631).

day was set aside for devotions and spiritual blessings after their return from Egypt. The law of the Sabbath was revived “not for the *quotum* of one day of seven” as was the case in Exod. 20:11, the renowned Joseph Mede (1586–1638) also insisted in his oft-cited *Works* (1664), but because (after the Israelites’ release from slavery) the seventh day was set aside to acknowledge that Jehovah is their Redeemer and that they serve no other god but God.⁷⁸ And here, Mede echoes *More Nebuchim* (part 2, ch. 31), where the great Maimonides supplies the same justification as a guide for the perplexed (*Guide* 2.31.218–19).⁷⁹

Cotton Mather’s commentary on Deut. 5:6 is exceptional for solving a semantic and philological dilemma that had vexed many of his contemporaries. Always eager to tell a good anecdote, he entertains his audience with the narrative of Ludovicus Carretus (fl. 1530s–50s), also known as Todros Cohen, a Jewish physician and native of France, whose conversion to Christianity in Genoa (Italy) is the subject of his spiritual autobiography *Mar’ot Elohim* (Paris, 1553). Whether Mather relied on the Florentine edition of Angelo Canini’s *Epistola Ludovici Carreti ad Judæos, Quæ Inscriptor Liber Visorum Divinorum* (Florentiæ, 1554), or on Hermann Germberg’s Latin translation appended to Johannes Buxtorf’s *Synagoga Judaica, Hoec est Schola Judæorum in Qua Nativitas* (Hanoviæ, 1604), or one of its many seventeenth-century reincarnations, is subject to debate but does not concern us here.⁸⁰ Either way, Carretus’s account supplies Mather with tangible evidence that reason and revelation still maintain a symbiotic relationship. What makes the narrative all the more attractive to Mather is his lifelong preoccupation with Jewish conversion, which until the last decade of his life was a pillar of his eschatology.⁸¹ His synopsis of Carretus’s conversion account occupies nearly two whole manuscript pages in “Biblia Americana” (BA, Deut. 5:6 [13r–14v]). Mather’s summary focuses on how Carretus’s spiritual peregrination was triggered by a visionary dream that led him to understand the difference between the two versions of the Decalogue and ultimately precipitated Carretus’s conversion – to Roman Catholicism no less.

The specific cabbalistic details of Carretus’s dream are less important to our purposes here than the didactic import that Mather draws from the narrative. The short of it is that the eminent Jewish physician encountered in his dream

⁷⁸ *The Works of the Pious and Profoundly-Learned Joseph Mede, B. D. sometime fellow of Christ’s College Cambridge* (1664), “Discourse XV. Ezekiel 20:20” (73–75); quotation is on p. 74.

⁷⁹ All citations and references are to *The Guide for the Perplexed*. By Moses Maimonides, translated from the original Arabic text by M. Friedländer.

⁸⁰ See “Carretus, Ludovicus,” by R. Gottheil and I. Broydé (3:593). See also Joanna Weinberg, “A Sixteenth-Century Hebraic Approach to the New Testament” (240–41).

⁸¹ See Mather’s *The Faith of the Fathers* (1699), a catechism of sorts through which Mather sought to convert Jews. By returning to the faith of their fathers from which modern Jews are to have strayed, Mather argued, they would inevitably embrace the religion of Jesus Christ. See also R. Smolinski’s “*Israel Redivivus*” (357–95) and R. Smolinski’s “Introduction,” *Threefold Paradise* (21–38).

several “Aged and Shining Persons” crowned with “Illustrious Diadems.” One of these angelic beings – perhaps following similar precedent in the Torah, Daniel, the Zohar, and countless others – offers to interpret the vision and invites the perplexed Carretus to come to his house the next morning. Bewildered about his dream of the preceding night, Carretus is horrified to discover the next day that a Florentine “Fortune-teller” (whose “Shape” is identical to that of the angelic creature in the dream vision) foretells Carretus’s conversion to Christianity. Carretus, however, flies into a rage at this all-too-common form for “Jew-bating,” leaves the man’s house, and turns to God in prayer: “That if these things did proceed from the Lord Himself, hee might have his *Eyes, Ears, Heart opened*, so as to understand, but, That if they were *Vain Things*, hee might not bee *led into Temptation*.” Shortly thereafter, Carretus turns for answers to the Pauline Epistles and the New Testament, which he compares with the Talmud and Rabbinic writings, and discovers to his amazement that his principal objections to Christianity – the Trinity, Christ’s divinity, the Messiah’s first and second coming, dietary laws, and circumcision – are all removed to his satisfaction, save that of the Sabbath, about which he is in great agony. But providence in the shape of “a little Child” accosting Carretus in the streets of Florence should change all that: “*My Father, my Father!*” cried a ragamuffin one day as he stopped the physician on his way home from a patient. “*I pray, Syr,*” the child inquired mysteriously, “*why are the Ten Commandments Twice Recited in the Bible, and Recited with so much Difference?*” “*Difference?*” Carretus wondered, puzzled by the child’s strange question. “*Pray, my Child, what is the Difference?*” But let’s hear Mather tell the rest of the story in his own words:

The Child returned; *Why, in one Place tis said, REMEMBER THE SABBATH-DAY, TO KEEP IT HOLY – FOR THE LORD RESTED THE SEVENTH DAY; In another Place, tis said, KEEP THE SABBATH-DAY TO SANCTIFY IT, – AND REMEMBER THAT THOU WAST A SERVANT IN EGYPT.* Our *Carret*, astonished, now cried out, *Out of the Mouths of Babes, and Sucklings, O Lord!* Hee now saw, hee sais, that *Moses* considered the two Things, in the *Sabbath*; A *Commemoration*, and an *Observation*. The *Commemoration*, referr’d unto the Creation of *the World*; the *Observation* referr’d unto the Deliverance from *Egypt*. The former is an *unalterable Duty*, the latter is *Altered* upon the Coming of our Lord. (*BA*, Deut. 5:6 [14v])⁸²

The uncanny turns and twists of Carretus’s conversion account are paradigmatic of their didactic intent. They are an integral part of the apologetic literature of the period and were particularly treasured by those whose

⁸² The Christological significance of the Israelites’ exodus from Egypt is by Irenaeus (*Against Heresies* 4.30.4) explained as follows: “For the whole exodus of the people out of Egypt, which took place under divine guidance, was a type and image of the exodus of the Church which should take place from among the Gentiles; and for this cause He leads it out at last from this world into His own inheritance, which Moses the servant of God did not [bestow], but which Jesus the Son of God shall give for an inheritance” (*ANF* 1:504).

eschatological expectations centered on the national conversion of the Jews and their return to the Holy Land just prior to the Second Coming of Christ.⁸³ No doubt, Mather's primary interest in Carretus's personal narrative, *Liber Visorum Divinorum* (1554), is borne out by Mather's expectations of this longed-for event to occur in his own lifetime – in 1697, 1716, or 1736 – as he variously conjectured in his “Problema Theologicum” (c. 1703) and especially in “Trip paradisu” (c. 1720), his last word on millennialism.⁸⁴ Perhaps more telling in the exegetical context of the Sabbath is that Mather insists on the fidelity of Carretus's motives and the verity of the story. Neither personal profit nor visionary delusions were responsible for his conversion, Mather assures us. The convert's dream merely served “to *Quicken* his Diligent Enquires, and Researches, into the *Word* of God.” The Florentine astrologer who prophesied his conversion (as well as the street urchin) was nothing but an instrument of God, who “made Use of him, as Hee did, of *Balaams* Ass; for the Man did not know what hee said, *Himself*” (*BA*, Deut. 5:6, [13r]). Mather's creative use of Carretus's narrative to explicate the contradictory justifications for observing the Sabbath reveals multiple strategies. It confirms his belief in the harmony of the Bible, that alleged incongruities are more apparent than real. It emphasizes his concern with the nature of evidence, the narrative's verifiable title, author's name, trustworthy character, historical context, eyewitness accounts, and apparent motives for publishing the account. It validates Christianity as the legitimate heir to Judaism and that Christ is Lord. Most of all, it leaves the reader with a sense of mystery and awe of God's inexplicable ways: reason can penetrate the motions of providence only so far, but once reason has ascertained that a dream or revelation is of divine origin, it has to step back, for the Spirit operates above the ken of man.

Given his ratiocinations on the various issues at hand, Mather, the guardian of the New England Way, is much more amenable to the bold ideas of Hobbes, Spinoza, Simon, and LeClerc than anyone has ever noticed or understood.

⁸³ See, for instance, Mather's interest in the popular conversion account of R. Samuel Marochitanus (fl. 11th c.), a Moroccan Jew of Fez, who allegedly converted to Christianity in Toledo (Spain). Originally composed in the 11th c. and characteristically anti-Semitic, *Veri Messiae Parastasin continens* (1536) and *Epistola contra Judaeorum errores* (1475) were translated from Arabic into Latin and subsequently into various European languages until the 18th c. *The Blessed Jew of Morocco, or, A Blackmoore made white being a demonstration of the true Messiah* (1648), translated by Thomas Calvert, includes Marochitanus's “A Demonstration of the True Messiah” (*Blessed Jew* 59–144). Mather also took much stock in the conversion account of three Jewish Children of Berlin, which he alluded to in his *An Advice, to the Churches of the Faithful* (1702), 4–6; in *Things to be More Thought Upon* (1713) 27; in *Menachem* (1716) 39–40, and in *Faith Encouraged* (1718) 16. A decade before his death, he abandoned his belief in the national conversion of European Jewry, in *Threefold Paradise* (1995) 295–318.

⁸⁴ See J. S. Mares, “Cotton Mather's ‘Problema Theologicum’” (333–440), and R. Smolinski, *Threefold Paradise* (319–49). His eschatological calculations are discussed in the “Introduction” to this work (60–78).

His agile mind is open to valid criticism of the Bible; he is prepared to test, absorb, synthesize, and internalize their critique as appropriate, and harmonize new philosophical models with his Reformed theology even as he relaxes the hermeneutical reins of his Puritan forebears to accommodate the needs of a new age. Mather's rationalist defense of God's method of communicating with man is another case in point. Both Hobbes and Spinoza had argued that only those to whom God had truly spoken could know if they received a divine revelation. Everyone else could only have recourse to the Bible for evidence of the prophets' trustworthiness. Mather responds to this charge with an intriguing set of empiricist inferences and inverse logic. First of all, he reminds his readers that, contrary to popular opinion, a prophet is not someone whose sole function is to predict the future, but rather "*One to whom God revealeth Secrets*," as Spinoza interprets the Hebrew term *Nabi* (BA, "I. Vates" 13r; BA 1 Chron. 29:29 [67–68vr]).⁸⁵ Prophets were principally interpreters of God's message, teachers of holy doctrine, and scourges to those who transgressed the Mosaic Laws; yet the signs of their divine possessions were anything but flattering and earned them frequent ridicule, scorn, even persecution and death (BA, "I. Vates" 13r; BA, 1 Chron. 29:29 [68v–69r]). The signs of their possessions are "so ridiculous, as [to] give a just Evidence, that there was a Supernatural Coercive *Power of the Spirit*, which forced the *Prophet*, against his natural Will, to submit unto them" (BA, "I. Vates" 13r). The cases of Isaiah, Jeremiah, and Ezekiel are particularly notorious. Isaiah was forced to "call his Two Sons by uncouth Names; and walk Naked, without so much as a *Shoe*, for Three Years together" when God wanted him to demonstrate the manner in which the Egyptian captives must be enslaved (BA, "I. Vates" 13r; 1 Chron. 29:29 [71v]). Isaiah's affliction with such symptoms of divine favor lasted nearly forty years and earned him anything but honor among his contemporaries. The signs of Jeremiah's divine possession were no less ludicrous, "when he hung half a dozen wooden *Yokes* about his Neck, & made an uneasy Compliment of them unto the foreign Embassadors" in token of their impending submission (BA, "I. Vates" 14v). Ezekiel's "Lying on his *Left Side Three hundred and Ninety Dayes*, and on his *Right Side Forty Dayes*; and his *baking his Barley-Cakes*, with *Dung that cometh out of Man*" (BA, 1 Chron. 29:29; [71r]) David's mad dancing before the Ark of the Covenant, leaping "*after the Manner of a Goat, or a Lamb*"; Saul's odd behavior "when that *Spirit leaped upon him*"; St. John's epileptic seizures, when overcome by the Holy Spirit – all these strange manifestations indicate that when a prophet is inebriated with the Holy Spirit, his "*Outward Actions* . . . were sometimes indeed like those of a *Madman*" (BA, "I. Vates" 14v; 2 Chron. 29:29 [70v]). Pretenders to divine revelation and false prophets striving after prestige and honor would

⁸⁵ See Mather's comments, in "I. Vates, Or, Some Remarks upon the Spirit of Prophecy." See also Spinoza's *TTP* (1.13).

not have adopted such ignominious tokens of sacred possession. “Certainly, no Deist could be impudent enough, to pretend a *Priest-craft* in such a Case” (BA, “I. Vates” 14v). Besides, the Mosaic Law was an efficient deterrent, for it demanded that false prophets be put to death. Mather’s empirical analysis of the signs of divine possession described in the Bible demonstrates that he was fully aware of the European debate. He was prepared to examine the only evidence available – even signs of holy madness – to assert that reason alone could not account for what was happening to the prophets.

The Assent of Reason

Mather’s English colleague, Edward Stillingfleet (1635–99), latitudinarian bishop of Worcester, may help us appreciate how threats to the authority of prophetic inspiration elicited a variety of responses to this epistemological dilemma. In his oft-reprinted *Origines Sacrae, Or a Rational Account of the Grounds of Christian Faith, as to the Truth and Divine Authority of the Scriptures* (1662), Stillingfleet tried to downplay the irrational qualities of divine possession by emphasizing the rational side of the prophets’ preparation for their sacred office. Prophets were no lunatics or madmen, as Hobbes and Spinoza made them out to be, but learned graduates of colleges and seminaries that existed all over the Holy Land in ancient times: “The most noted *Prophets* to the time of *David* were the *Presidents* of these *Colledges*” and God ordinarily selected from these “*Schools of Prophets*” those “*whom he did employ in the discharge of the propheticall office.*”⁸⁶ Stillingfleet’s emphasis on the prophets’ learning and preparation betrays his fear of irrationality and madness at a time when English elites had had their fill of mad Fifth Monarchists, Ranters, Quakers, counter-culturalism, and rampant claims to immediate inspiration. His insistence on reason and balance in the training and selection of the ancient prophets speaks as loudly to the aims of the Restoration (and his anxiety about the Bible’s loss of status) as does the ambivalent lament of the Rev. Thomas Sprat (1635–1713), in his *History of the Royal-Society* (London, 1667). Historian of the Royal Society of London, Sprat appears to regret the hankering of his age for “a *rational Religion*” even as he vindicates his colleagues for neglecting their duty to God:

If we compare the changes to which *Religion* has bin always subject, with the present face of things, we may safely conclude, that whatever vicissitude shall happen about

⁸⁶ My citations are from Stillingfleet’s *Origines Sacrae*, 3rd ed. (1666), bk. 2, ch. 4, pp. 156, 157. The teachers in these colleges for young prophets, Mather knowingly added (perhaps thinking of his father’s burdensome double-duties as Harvard’s president and teacher of the largest congregation in British North America), instructed their young charges every day of the week, but had no rest on holidays, because they bestowed public lectures on the common people (BA, 1 Chron. 29:29; [69v]).

it in our time it will probably neither be to the advantage of *implicit Faith*, nor of *Enthusiasm*, but of *Reason*. The fierceness of *violent Inspirations* is in good measure departed: the remains of it will be soon chac'd out of the World, by the remembrance of the terrible footsteps it has every where left behind it. ... [M]any *Modern Naturalists* have bin negligent in the *Worship of God*: yet perhaps they have bin driven on this prophaness by the late extravagant excesses of *Enthusiasm*. The infinit pretences to *Inspiration*, and *immediat Communion with God*, that have abounded in this *Age*, have carry'd several men of wit so far, as to reject the whole matter.⁸⁷

Whether or not Sprat's *History* is a true indication of why many ecclesiastics welcomed the Restoration for ushering in a new "Age of Reason," Cotton Mather on the other side of the Atlantic could afford to be ambidextrous about Reason and the Divine Afflatus appearing in God's chosen vessels. To Mather, the symptoms of the OT prophet's epileptic convulsions, mad ravings, and obscene actions were in themselves empirical proof that the prophet was indeed possessed by the Holy Spirit. No matter how irrational, these signs of possession indicated that Reason alone could not determine true possession or sit in judgment of divine revelation, which runs counter to all forms of empirical verification: "*Reason* is to Judge, whether the *Revelation* do indeed come from GOD," Mather insisted. "But this Point being once determined by *Reason*, it is now humbly to sitt down, & own its Inability to go any further, or to determine upon the Matter & the Manner of *Revelation*" (*BA*, "I. Vates" 10v).⁸⁸ Mather's seemingly half-hearted embrace of reason must not be misread as running counter to the pursuits of his age. Neither should his oft-cited homilies *Reasonable Religion* (Boston, 1700; 2nd ed. London, 1713), *Reason Satisfied* (Boston, 1712), and *A Man of Reason. A Brief Essay to demonstrate, That all MEN should hearken to Reason* (Boston, 1718) be misinterpreted as evidence that he had succumbed to Deist rationalism.⁸⁹ No matter how vital a human faculty, reason must never be idolized or placed above Revelation, Mather warned in his *Iconoclastes* (Boston, 1717). The faculty of reason is, indeed, an excellent instrument,

⁸⁷ Thomas Sprat, *The History of the Royal-Society* (1667), part 3, sec. 23, pp. 366, 367–68 [374, 375–76].

⁸⁸ Mather here appears to distill the essence of Justin Martyr's fragment *On the Resurrection* (ch. 1) [*ANF* 1:294].

⁸⁹ See, for instance, the oft-quoted passage from Mather's diary entry on Dec. 7, 1711: "There is a Thought which I have often had in my mind ... that the Light of *Reason*, is the Work of God; the Law of *Reason* is the Law of God, the Voice of *Reason* is the Voice of God; We never have to do with *Reason*, but at the same time we have to do with God; Our submission to the Rules of *Reason* is an Obedience of God. ... Lett me as often as I have evident *Reason* sett before me, think upon it; the great God now speaks unto me! And lett me from this Principle yeeld a present Compliance with it; always *hearken to Reason*, from this Consideration" (*Diary* 2:144). For much the same see his "Essay 32. Of Man," *The Christian Philosopher* (297). Before we mistake this confession as evidence for Mather's embrace of a Deist position on reason, we must temper the statements in light of his warning against idolizing our "miserably Wounded" faculty of reason, which we inherited through Adam's fall. See esp. *The Man of God furnished* (1708) 72, and *Iconoclastes* (1717) 15–19.

through which we compare the relation between competing interests, separate truth from falsehood, and establish right from wrong. It is the faculty that distinguishes man from beast, makes him prudent, inventive, wise, and strong (16). But when reason becomes our sole guide, when reason is set above revelation, when we reject divine revelation because we cannot penetrate its mysteries, then reason, “a Faculty miserably *Wounded* in us by our Fall from God” (*Man of God furnished* [1708] 72), becomes an idol that precipitates man’s fall: “*Reason is Idolized, When Men will set Reason above Revelation; When Men will Receive nothing that is Reveal’d from GOD, Except they can fathom it by Reason; When Man must Comprehend the Mysteries of Revealed Religion, or else they will Reject the Counsel of GOD. Such Free-Thinkers, are one Tribe of Idolaters. The Men that Writes, Christianity not Misterious, have set up an Idol, that proves a Stumbling-block of Iniquity unto them. ... Tho’ we do not Accept any Thing that is against Reason, we must Confess That there are many Things, Above Reason*” (*Icono-clastes* 18, 19). Mather’s stab at John Toland’s notorious *Christianity not Misterious* (London, 1691) is a case in point. Mather’s response to the disciples of Thomas Chubb, John Locke, Toland, Anthony Collins, demonstrates that he values the rationalist pursuits of his age and the use of empirical data in the natural science, in philosophy, yes, even in theology and its philological critique of the Bible – yet Mather vehemently resists when human reason takes center stage. When man presumes to penetrate the mystery of salvation, when he reduces justifying faith to a function of the mind’s rational assent to a proffered Good, when, in short, man confounds justifying faith with reason, Mather draws the line. He never allows his Reformed position to be compromised – not even by the great English philosopher John Locke, whose *The Reasonableness of Christianity, As delivered in the Scriptures* (London, 1695) was widely admired and imitated.

In Mather’s view, there is a vast gulf between his Augustinian position on man’s fallen reason and the insistent rationalism advocated by John Locke (1632–1704) and his erstwhile disciples John Toland (1670–1722) and Anthony Collins (1676–1729).⁹⁰ Broadly speaking, their disagreements on the nature of reason, revelation, and faith are intricately enmeshed with their disparate positions on what is popularly called the Five Points of Calvinism: total depravity (original sin), unconditional election, limited atonement, irresistible Grace, and perseverance of the saints (Westminster Confession). For our purposes, a brief summary of Locke’s rationalism must here suffice to pinpoint the principal differences between the Reformed theology of Mather on the nature and function

⁹⁰ See, for instance, Perry Miller’s useful chapters “The Uses of Reason,” in his *The New England Mind: The Seventeenth Century* (181–206); as well as his discussion of Reason, in *The New England Mind: From Colony to Province* (417–36); J. W. Yolton, *John Locke and the Way of Ideas* (1968); J. C. Weinsheimer, *Eighteenth-Century Hermeneutics* (1993); J. A. Herrick, *The Radical Rhetoric of English Deists* (1997); J. A. I. Champion, *Republican Learning* (2003).

of Grace and Faith, and Locke's position on these tenets. In his *Reasonableness of Christianity* Locke adamantly rejects the Augustinian Calvinist dogma of man's total depravity and imputation of Adam's sin as utterly inconsistent "with the Justice or Goodness of the Great and Infinite God." To be eternally doomed to torture in hell for the sins of one man, "whom Millions had never heard of, and no one had authorized to transact for him, or be his Representative," Locke felt, is incompatible with divine justice (*Reasonableness* 91).⁹¹ Adam's punishment in Paradise was the removal of the gift of immortality, which our protoplasts enjoyed only as long as they continued to obey the Creator. Adam's postlapsarian descendants, however, were neither proffered immortality as an intrinsic right, nor did they inherit Adam's sin that put them "under a necessity of sinning continually" (93), nor was their human nature corrupted from birth: "If by *Death* threatned to *Adam* were meant the Corruption of Humane Nature in his Posterity," Locke countered, "tis strange that the New Testament should not any where take notice of it, and tell us, that Corruption seized on all because of *Adam's* Transgression, as well as it tells us so of *Death*. But as I remember every one's sin is charged upon himself only" (93). Although "*all die in Adam*, yet none are truly *punished* but for their own deeds" (Rom. 2:6, 9; 2 Cor. 5:10; Matth. 16:27; John 5:29), for "here is no Condemnation of any one, for what his forefather *Adam* had done" (94). For Locke, then, Calvin's dogma of original and imputed sin is unscriptural. Man dies for his own sins – not those he inherited from his forebears.

But if Adam's progeny is *not* sullied from birth by their parents' transgression, how come their offspring is liable to violate God's Law and be condemned to die? (Rom. 3:23; Gal. 3:10, 21–22). In this point, Locke's answer to this reasonable question is in full accord with Reformed theology: "It was such a Law as the Purity of God's Nature required, and must be the Law of such a Creature as Man, unless God would have made him a Rational Creature, and not required him to have lived by the Law of Reason, but would have countenanced in him Irregularity and Disobedience to that Light which he [man] had; and that Rule, which was suitable to his Nature" (96). God's Law is "*holy, just, and good*," Locke invoked the Epistle to the Romans (7:12), "and such as it ought, and could not otherwise be" (96). But God's Law is so absolute (Jam. 2:10–11) that no one could live up to it with perfect obedience and attain righteousness through works: "So that by that Law [Works] a man cannot be Just, or justified without an exact performance of every tittle" (98). For this reason, God instituted another, the Law of Faith (Rom 3:27), that through faith in Christ's propitiatory sacrifice and atonement for man's sin, mankind can attain life eter-

⁹¹ My references are to the edition of Locke's *Reasonableness of Christianity* (1695), in *John Locke: Writings on Religion* (87–210). For Mather's interest in Locke's *A Discourse of Miracles*, in *Posthumous Works of John Locke* (217–29), see Mather's commentary on Matth. 4:25.

nal: “By the *Law of Faith*,” Locke argued, “Faith is allowed to supply the defect of full Obedience; and so the Believers are admitted to Life and Immortality as if they were Righteous.” Thus, through faith in Christ as the son of God and the Redeemer of mankind, “God Justifies a man for Believing” (100). Although Locke’s position on the Covenant of Grace here seemingly conforms to that in Mather’s Reformed theology, they would inevitably part company on how this redeeming faith is attained. Creed makers can devise whatever distinctions and systems they please; Locke objected to the prevailing Calvinist notions: “But I cannot allow to them, or to any man, an Authority to make a Religion for me, or to alter that which God hath revealed. And if they please to call the believing that which our Saviour and his Apostles preached and proposed alone to be believed, an *Historical Faith*; they have their liberty. But they must have a care how they deny it to be a Justifying or Saving Faith, when our Saviour and his Apostles have declared it so to be ... and whereby they should be made Believers unto Eternal Life. ... This was the only Gospel-Article of Faith which was preached to them” (166, 167). Significantly, Locke here conflates historical with justifying faith – that crucial hallmark of Calvin upon which the Synod of Dort (1618–19) and the Westminster Assembly (1643–49) dwelt at length to define their positions. While for Mather and his Calvinist peers the elect can only attain justifying faith through an infusion of Grace that by necessity enables God’s elect to attain saving faith (Walker, *Creeds* 377–82), Locke insists salvation was offered to all mankind: “God dealt so favorably with the Posterity of Adam, that if they would believe Jesus to be the *Messiah*, the promised King and Saviour; And perform what other Conditions [‘an hearty sorrow for our past misdeed’] are required of them by the Covenant of Grace; God would Justifie them, because of this Belief” (167, 169). No more, no less.

In essence, Locke’s Arminian-Universalism rejects the Reformed standards of the Westminster Confession (1647, 1658). The distinction between an historical faith (Jesus of Nazareth is mankind’s redeemer) and justifying faith (imputation of grace, remission of sins, active obedience) are for Locke little more than niceties of doctrinal hairsplitting not to be found in the gospels. For Locke, faith – even saving faith – is subject to man’s volition, a rational assent of the mind to a revealed promise whose certainty is as assured as the evidence is rationally verifiable. If, therefore, faith is based on evidence, it cannot be opposed to reason. Ah, there’s the rub. Locke’s position on the interconnectedness of faith, revelation, and reason is apparent in his *Essay concerning Human Understanding* (London, 1689) – the magna charta of the sensationalist philosophy of his time. God has endowed man with the power of the senses and the faculty of reason to test our ideas of a thing against the evidence of its conformity to those ideas. Clear evidence commands reason to assent. Knowledge thus acquired will always be more certain than divine revelation communicated to men in biblical times, because our rational agreement can be no firmer than the verifiable

evidence that the supernatural disclosure came indeed from God and that its meaning is accurately transmitted down to our times. However, if our evidence is corroborated by probable proofs only, Locke insists, our assurance can only be as strong as the probability of these proofs can give mathematical certainty:

For the knowledge we have that this revelation came at first from God, can never be so sure as the knowledge we have from the clear and distinct perception of the agreement or disagreement of our own ideas: v.g. if it were revealed some ages since, that the three angles of a triangle were equal to two right ones, I might assent to the truth of that proposition, upon the credit of the tradition, that it was revealed: but that would never amount to so great a certainty as the knowledge of it, upon the comparing and measuring my own ideas of two right angles, and the three angles of a triangle. The like holds in matter of fact knowable by our senses; v.g. the history of the deluges is conveyed to us by writings which had their original from revelation: and yet nobody, I think, will say he has as certain and clear a knowledge of the flood as Noah, that saw it; or that he himself would have had, had he then been alive and seen it. For he has no greater an assurance than that of his senses, that it is writ in the book supposed writ by Moses inspired: but he has not so great an assurance that Moses wrote that book as if he had seen Moses write it. So that the assurance of its being a revelation is less still than the assurance of his senses."⁹²

No matter his insistence on the absolute trustworthiness of divine revelation, Locke contends that rational proof and the experience of the five senses carries more weight than tradition, the authority of the Church, or blind faith in the authenticity of the biblical record ever amounts to.

In one way or the other, Cotton Mather appears to address these specific issues in his homily *The Everlasting Gospel* (1700) and elsewhere. Here he spends much time distinguishing between man's assent to mathematical proof and his assent to supernatural evidence. In the latter case, the allocation of evidence does not solely depend on human reason, Mather avows. The two are subject to different rules and different provinces of human inquiry. Reason alone can never penetrate the mystery of salvation: "Meer *Natural Reason*, without *Revelation*, both External, and Internal *Revelation*, would never *understand* the *Mystery* of a Sinners being made *Righteous*, by the *Righteousness* of the Lord Jesus Christ." Reason alone can never assent to the mystery of justifying faith, because "nothing will satisfy the Heart of a Sinner in it, until the *Spirit* of God, which *Dictated the Gospel*, assure him of it, with a *Supernatural* way upon him" (17, 18). A natural man may indeed comprehend that he can be made righteous by casting himself upon the Lord, Mather knew only too well. But when on his deathbed the sinner apprehends with horror of soul the gulf between his own wickedness and Christ's righteousness, natural reason alone will never convince his heart that God could pardon him for the sake of Christ's sacrifice. Multitudes

⁹² John Locke, *An Essay Concerning Humane Understanding* (London, 1690), bk. IV, ch. 18. My citations are from the edition by A. C. Fraser (2:418–19).

have gone to hell thinking that it is an easy thing to cast one's faith on Christ's righteousness and go to heaven. Little did they realize that

we are not made *Righteous* by the *Righteousness* of our Lord Jesus Christ, *before*, or *without*, but *upon* our *Faith* Apprehending of it. By *Faith* and on our part only by *Faith* we come to be made partakers of the *Righteousness*, which our Lord Jesus Christ hath provided for us. It is therefore called, *The Righteousness of faith*. Why, God never gives the *Righteousness* of the Lord Jesus Christ unto any man, without giving him *Faith* to *Take* the Gifts of *Righteousness*. The *Righteousness* is indeed got ready for us, without and before any Act of ours, but we are not actually Invested with a *Power* to claim the *Righteousness* of our Lord Jesus Christ for us, until with the *Heart man Believe unto Righteousness*. We are told in Rom . 4.24. *It shall be Imputed, if we Believe*. ... Rom. 5.1. *Being Justified by Faith*. (22–23)⁹³

Clearly, then, the building blocks of reason and faith occupy vastly different positions in the *ordo salutis* of Mather than in that of John Locke. Their fundamental difference on how to attain heaven is ultimately rooted in their disagreement on the nature and function of historical and justifying faith. Perhaps this is why Mather told his students preparing for the ministry that “for some Reasons, I would be excused from Recommending an *Essay of Humane Understanding*, which is much in Vogue” (*Manuductio* 36). Still, if Lockean epistemology allocated considerably more independence to the faculty of human reason than Mather was ever prepared to do, they both were deeply concerned with man's quest for salvation and how it could be accomplished. If Locke's road to the Celestial City had fewer stumbling blocks, pitfalls, or dead ends than the straight and narrow upon which Mather's Christian was sent on his errand, they each in their own way would insist that a merciful God would pardon most where he seems most to punish.

Mather was clearly sensitive to the changing winds of his time, and he knew that the best way to deal with a challenge was to face it head-on. As Richard Lovelace has shown, Mather always kept the larger picture and the ultimate goal in mind even as he was prepared to compromise on matters that were

⁹³ In his commentary on James 2:24, Mather also insists that justifying faith is not acquired by a man's autonomous volitional assent, but rather by an infusion of grace that enables the will to attain faith: “The Doctrine of *Paul* is, That a *Justifying Faith*, is a Receiving of, and Relying on the *Gift of Righteousness* from God, by the Lord Jesus Christ; or, the Consent of a Distressed Soul, to bee Justified by Gods graciously Imputing unto him, the Obedience, which the Lord Jesus Christ, as our *Surety*, yielded unto God, on the behalf of His Elect. This *Faith*, does justify a Sinner, not as it is a *Work*, but only Relatively, & Instrumentally; in asmuch as it is, the Instrument, by which a Man apprehends the Righteousness of the Lord Jesus Christ, as freely tendred unto the Sinner in the Gospel; Tis only in this Regard, that Faith, and no Grace but This Faith, ha's the Honour to Justify us.

But every *Jewel* has a *Counterfeit*. And how shall a Man know, That his *Faith* in the Righteousness of the Lord Jesus Christ, for his Justification, is not a Counterfeit?

To answer that Case, the Apostle *James* declares unto us, the *Marks of a Justifying Faith*, and those are the *Works*, which it perpetually disposes the Beleever unto” (*BA*, Jas. 2:24).

subject to debate. There's nothing worse than the hairsplitting of party men who refuse to look beyond the tips of their noses; Mather warned his young charges in his handbook for ministers (*Manuductio* 129).⁹⁴ His interest in world missions and his Pietist endeavor to overcome sectarian strife and narrow partisanship by uniting all Protestant denominations under the banner of his Three Maxims of Piety are well known aspects of Mather's Calling in the last decades of his life. Perhaps much less known is the degree to which he was willing to act on his faith in God and the teachings of the Bible. No matter what modern rationalists admitted as tangible proof, there was yet another way to ascertain the authority of the Bible and its salutary effects. It was experimental proof of a different sort (but empirical no less) and only required careful observation of how the promises of the Bible could be experienced on a daily basis. "We have call'd in the Help of all *Sciences*, and *Histories*, to Illustrate the *Oracles* of God," Mather concluded, admitting that the traditional tools of empirical inquiry alone could not accomplish the task: "If Prudent and Pious Men, would carefully *observe* what they meet withal in their own *Experience*, and *Record* what they *observe*, to *confirm* the Truth of the *Sacred Scriptures*, we should often see them *Expound* what they *Confirm*."⁹⁵ Turning to Matthew 17:27 ("Take up the Fish, that first cometh up, and when thou hast opened his Mouth, thou shalt find a Peece of Money"), Mather verified the truth of this scripture through his own experience. "This I have often taken notice of, in the Providence of God towards me. A Thing of a small Value hath been handed to me, by one unexpected Method and another; Yett it hath answered a *present Necessity*: At the next Pinch, another Method ha's been taken for my Supply; And in great Emergencies there hath been Suitable Provision." God looks after those who turn to him in Faith. Mather testified to his practical experience over and over again. God helps me "that I may be trained up to a *Life of Faith*; that I may glorify Him by Beleaving" (*BA*, "An Essay" 4v).⁹⁶ Admittedly, subjective experiences of this nature might not satisfy a Hobbes, Spinoza, or even a Locke, yet to Mather, inwardly committed to an objective uncertainty, such experiences were of supreme value. They confirmed the supernatural inspiration of the Bible, the truth of its teachings, and the practical value of committing oneself to God, even if natural philosophy in Mather's day began to reject phenomena that could not be verified in mathematical terms. The Promises of God "are meer *Fancies*, & *Whimseys*, unto the foolish

94 P. Miller's assessment of Mather's handbook for the ministry *Manuductio ad Ministerium* (1626) is still as perceptive as ever ("Note" 2:630–36). Unfortunately, Miller cannot help himself but to read whatever orthodoxy Mather defended or innovation he introduced as a means by which "the ministerial generations might regain their hegemony," which the winds of change had forced them to relinquish (*New England Mind: From Colony to Province* 417).

95 "An Essay, for a further Commentary on the Sacred Scriptures" (*BA*, "An Essay" 1r) is appended to Mather's commentary on Revelation.

96 Mather provides dozens of similar examples from his own experience and from that of his Presbyterian colleague in Boston, Thomas Bridge.

Unbeliever,” Mather lamented, “but the perpetual *Experience* of *Multitudes* who Beleeve them, ha’s demonstrated them to be *Faithful Sayings and worthy of all Acceptation*” (BA, “An Essay” 3). By developing a conceptual framework of experiential theology (tested on a daily basis and in hundreds of occurrences), Mather could attain “practical certainty” even if all confidence in the Bible’s philological soundness was shaken to its core. This conceptual framework is neither certain nor uncertain; it simply expresses a way of acting and perceiving that has proven supremely valuable to those who have internalized its principles. It hardly comprised a matter of calm theoretical certainty, nor was it an issue of mere intellectual assent to authority – of something like Blaise Pascal’s wager with its rational commitment to a practice of rituals for a chance at eternal life just in case God does exist and demand obeisance.⁹⁷ Rather, it was a “faith in the substance of things hoped for, the evidence of things not seen” (Heb. 11:1), a settled faith beyond doubt or hesitation about the benefit of believing in the revealed truth of the Bible. Mather’s practical certainty might be called, in the words of Keith Ward, “a matter of loyalty to a liberating disclosure, aimed at a great good.”⁹⁸ His commitment to experiencing a hoped-for, yet invisible, reality assured him of God’s love. It quieted his heart most serenely when Mather was most resigned unto providence even contrary to the rules of common prudence. It demanded of him a readiness to surrender to God’s inscrutable will no matter what the outcome of a hoped-for event. It presupposed an emptying of Self, a disinterested benevolence akin to the stage of humiliation in the Puritan *ordo salutis*, trusting all along that God knew best. Mather’s practical certainty, then, was a way of life that, in spite of the iconoclastic tendencies of the age, supplanted doubt with experimental Faith in the infallible promise of his God.

The seventeenth century witnessed the foundation of modern biblical scholarship, which began to separate natural philosophy from theology and the individual believer from the control of the Church. In rising to the defense of the Holy Scriptures, physico-theologians launched new methods of philological scholarship, historical-contextual exegesis, comparative religion, and experimental piety that contributed their share to the early Enlightenment of the late Stuart period. Cotton Mather’s “Biblia Americana” demonstrates that Puritan New England did not lag far behind the new modes of thinking that emerged in Europe. Far from remaining unaffected by the challenges to the authority of the Bible, New England’s leading intellectual accommodated this intellectual revolu-

⁹⁷ Blaise Pascal, *Les Pensées de M. Pascal sur la religion, et sur quelques autres sujets* (1670). Pascal’s “wager” is generally identified in modern editions as fragment 233. Ewald Wasmuth, *Über die Religion* (199–26). The first English translation was that of Joseph Walker, *Monsieur Pascall’s Thoughts* (London, 1688). What is now called “wager” appears in this edition in § VII: *That there is more advantageous to believe, than not believe what is taught by the Christian Religion*” (73–78). That Mather had read Pascal’s meditations is apparent from Mather’s long excerpt in his commentary on Psalms (BA, Ps. 2:12 [113r]).

⁹⁸ K. Ward, *Religion & Revelation* (26).

tion by synthesizing its ideas and popularizing them in his sermons. In doing so, he paved the way for the Enlightenment in America. Yet while embracing what he regarded as the more salutary aspects of Enlightenment thought, Mather drew sustenance from a mode of perceiving reality that by nature of its subjectivity ran counter to the quest for certainty through scientific verification. As if maintaining a double-consciousness, he could comfortably employ Newtonian Science to celebrate the perfection of Nature's Laws even as he tacitly submitted to the existence of an invisible, moral entity that accomplished its grand purpose through secondary causes.

Section 4

Note on the Text and Editorial Principles

Cotton Mather's "Biblia Americana," an enormous holograph manuscript in six folio volumes, is owned by the Massachusetts Historical Society, Boston. The manuscript's provenance is somewhat obscured by the fact that Mather did not leave behind an inventory of his library at his death on Feb. 13, 1728/29. Neither did his heirs establish an inventory, perhaps to protect this valuable family heirloom from falling into the hands of Mather's creditors. The Suffolk Probate Record contains no itemization of Mather's library. The best available evidence of how the "Biblia" came into the possession of the MHS is given in Julius H. Tuttle's "The Libraries of the Mathers" (1910). From Tuttle's article we learn that Cotton Mather's son, the Rev. Dr. Samuel Mather (1706–85), inherited the largest part of his father's library, even though Cotton's nephew, the Rev. Mather Byles (1706–88), pastor of the Hollis Street Church, may also have received a share of his uncle's library as indeed he did from his grandfather Increase Mather in 1723, who "bequeathed one-quarter of his library" to the promising young Byles. The inventory of the Byles estate (Aug. 2, 1790), though itemizing many personal possessions, does not list the titles of the nearly 2,800 volumes in the Byles library, which his daughters Louisa and Catherine inherited at their father's death in 1788 (Tuttle 297). It is doubtful whether the "Biblia" was part of the Byles Collection, which was apparently sold and dispersed in November 1790.

Cotton's son and principal heir was the most likely recipient of the Mather papers, including the "Biblia Americana" manuscript, which would have been more useful to Samuel, heir to his father's pulpit in Boston's North Church, than to anyone else in the family. Besides, Samuel advertised the "Bibla," which he hoped to publish through subscription (*The Life* 183–86), a fact which suggests that the bulky manuscript probably remained in his possession until his death in 1785. Although Samuel's inventory does not identify the "Biblia" manuscript by title, his will stipulated that his "Library should abide where it is now" until one of his descendents would become a minister of the gospel and then "have my Library given to him with all the Manuscripts and Appurtenances belonging to it" (Tuttle 299–300). Meanwhile, Samuel's daughters Elizabeth and Hannah were to be the custodians of the library and "receive the profits" in case the

library were sold. After Elizabeth's death (1788), Samuel Mather's daughter, Hannah Mather Crocker (1752–1829), an accomplished authoress in her own right, sold a large portion of the Mather library to the Worcester printer and antiquarian Isaiah Thomas, but the "Biblia" was not part of this sale. According to Julius Tuttle, Hannah Mather Crocker donated part of her father's and grandfather's libraries to the newly founded Massachusetts Historical Society, for which unspecified gift, the members of the MHS voted to give their thanks to Mrs. Crocker in 1794 and likewise for another gift in 1798 (Tuttle 300, 301). Whether or not the "Biblia" was part of Crocker's donation at that stage is hard to determine, because no itemized record of her bequest is extant.

According to Peter Drummey, Stephen T. Riley Librarian and guardian of manuscripts at the MHS, the records of the Society do not contain any information about the date when the set was acquired or about the identity of the donor. However, some physical evidence on the cardboard binder of the holograph manuscript may establish the approximate date of acquisition. Two small labels or bookplates on the inside of the grayish-brownish cardboard cover provide useful information. One of the bookplates, a rectangular label affixed to the inside cardboard cover of the "Biblia" (vol. 1) bears the following ornate imprint:

Given to the
Massachusetts
Historical Society
By
before Oct. 1809

The label bears the imprint D. KUSSETT in the lower right-hand frame of the bookplate and may refer to an as yet unidentified designer or printer of the label. The date – here given in cursive – is a handwritten notation written in pencil, most likely that of a former MHS librarian. The space for the donor's name is left blank. The vague reference "before Oct. 1809" may well indicate that neither the record of the transaction nor the donor's name was available when the bookplate was affixed. At that time, the MHS was located on Franklin Place, Boston, as a second sticker with an extract of the laws, regulating the library's lending practices, indicates. However, a watermark on two loose leaves, which originally served as a cover page and attached the cardboard covers of volume 1 to the spine of the bound manuscript, may yield an important clue about the approximate year when the manuscript was given to the Society and was rebound. The watermark on the loose leaves measuring 310 mm by 194 mm resembles the coat of arms of the state of Massachusetts. On the double-framed shield, a Native American holds a bow and arrow in his right and left hands (respectively) and faces the beholder. A small five-pointed star is visible near the right-hand side of his head. Outside the shield, above the head of the Indian, a human arm swings a scimitar. A capital M is visible below the shield's pointy

bottom. The loose leaf, originally attached to the inside of the back cover of the same volume, bears the following countersign

C BURBANK
1804

This countersign measures 115 mm by 34 mm. The watermark and countersign are identical with the ones reproduced in Thomas L. Gravell's *A Catalogue of American Watermarks 1690–1835* (48, items 122 and 123).¹ According to Gravel, the watermarks are those of Caleb Burbank, son of Abijah Burbank who had established a paper mill at Sutton, MA, Worcester County, in 1775. Caleb and his brother Elijah operated the Sutton mill of their father until 1836 (Gravell 165, item 30) and supplied Isaiah Thomas and many other New England printers with paper of high quality. The 1804 date on Caleb Burbank's watermark and the handwritten date "before Oct. 1809" on the bookplate are important in several respects. While these dates do not identify the precise year in which the MHS acquired the "Biblia," they limit the span of time during which the transaction probably occurred. It is likely that the newly established Society had the volumes bound sometime after the bequest was received. Furthermore, the dates (1804 and 1809) help us specify the approximate period when the fascicles of the six folio volumes were stitched together with coarse twine and bound up with a grey cardboard cover and back, each measuring 310 mm by 195 mm. The paper from the mill of C Burbank also covers the spine of the six bound volumes and is glued to the covers, front and back, to stabilize the manuscript. On the spine of each of the six volumes appears the following handwritten inscription in printed letters:

MATHER's/ Illustrations/ of the/ SCRIPTURES/M.S./ GENESIS – LEVIT./ I/; / NUMBERS – ESTHER/II/; / JOB – CANTICLES/III/; / ISAIAH – MALACHI/IV/; / MATTHEW – MARK/V/; / ROMANS – REVELATION/VI/

¹ Thomas L. Gravell and George Miller, *A Catalogue of American Watermarks, 1690–1835* (New York: Garland Publishing, Inc. 1979). In addition to this volume by Gravell and Miller, I also consulted a second volume by the same authors, *A Catalogue of Foreign Watermarks Found on Paper used in America, 1700–1835* (New York: Garland Publishing, Inc. 1983). Furthermore, William Algernon Churchill, *Watermarks in Paper in Holland, England, and France, etc. in the XVII and XVIII centuries and their interconnection* (Amsterdam: M. Hertzberger, 1935; Rpt. Nieuwkoop: B. De Graff, 1990); C. M. Briquet, *Le Filigranes Dictionnaire Historique Des Marques Du Papier Des Leur Apparition vers 1282 Jus qu'en 1600*. 4 vols. Deuxième Edition (Rpt. New York: Hacker Art Books, 1966); and Edward Heawood, *Watermarks, mainly of the 17th and 18th centuries* (Hilversum: Paper Publications Society, 1981) provided useful insight into the variety of watermarks employed during Mather's lifetime. Of the five, the works by Gravell and Miller, and by Churchill were the most helpful in identifying and dating the paper Mather used for his commentary. Unfortunately, the wide variety of watermarks and countersigns used by North American and European paper mills – although they allow us to trace at least some of the paper manufacturers who exported their products to New England – tremendously burdens this identification process. Only a fraction of the sheets of paper Mather used can be clearly linked to identifiable paper mills.

Except for the volume-specific identification, the handwritten inscription on the spine is the same for all of the six volumes. The ornate title on the spine, "Mather's Illustrations of the Scriptures," does not appear to have been Cotton Mather's choice, because he always referred to his commentary as "Biblia Americana." The handwritten title which appears on the spine of the holograph manuscript evidently originated in Samuel Mather's biography *The Life of the Very Reverend and Learned Cotton Mather* (1729), in which Samuel refers to his father's commentary as "his *Illustrations of the sacred Scripture*" (73). This descriptive title may well have informed the penman's choice.

Each of the six bound volumes rests in a strong folderlike cardboard box of a greenish, clothbound vinyllike exterior, which completely enfolds each of the six manuscript gatherings. In turn, each boxed volume is protected by a handsome slipcase, made from the same sturdy cardboard (measuring 315 mm by 200 by 65 mm), and covered by the same clothbound vinyllike material. A leather-bound spine, grayish-brownish in color, gives the set a smart, booklike appearance, which is accentuated with the following inscription embossed in gilded letters:

COTTON MATHER
BIBLIA
AMERICANA
I

Each slipcase box carries the same inscription on the spine, except for the roman numerals I–VI, which identify the respective volumes.

Manuscript Condition

Of the six bound folios, the first, consisting of Mather's commentary on Genesis through Leviticus, is in the poorest state of preservation. This condition probably resulted from excessive handling by scholars and curious observers who were likely to turn to this volume first if they desired to inspect the holograph manuscript. The tightly sewn gatherings of the first volume consist of four fascicles that once formed a single, bound folio. The stitching of the bound fascicles has disintegrated by and large and now forms four separate fascicles. Unfortunate as this condition may be, it allows us to examine how the fascicles were sewn together. As I mentioned in section 1 of my introduction, Mather, or an amanuensis, stitched the contiguous leaves of his manuscripts into fascicles of coherent gatherings or bundles to safeguard their orderly arrangement. Holding the fascicles in place in this manner seemed reasonable because Mather expected to send them off to his London publisher shortly after 1706. This first stitching process was done rather haphazardly. As mentioned in Section

1 of my introduction, the fascicles and bundles were intended to stay in place only until the London typesetter would take them apart during the typesetting process. Remnants of the fine thread that held the sheets and fascicles in place and most stitching perforations are still visible in the gutter and manuscript spine. Unfortunately, a second (or rebinding) process – occurring in the early nineteenth century – obliterated many of the ordinal numbers in the gutter. The coarse twine and thick needle used during this second occasion perforated many figures and rendered many more indecipherable. This second stitching process of the fascicles very likely occurred after the holograph manuscript had been donated to the MHS, but before the fascicles were bound between the sturdy cardboard covers held in place with chain-lined paper made in the Sutton paper mill of Caleb Burbank – sometime between 1804 (see the countermark above) and 1836, when the mill ceased to operate.

The first of the four fascicles [1r–96v] includes the MS page of Mather's first and most heavily damaged leaf – "The OLD TESTAMENT, in the Order of the History" – and all conjugate leaves up to Gen. 1:31 "A Remark yett further to be made" (BA 1:213–401). Since several additional annotations on Gen. 1:31 appear in the second fascicle, the gatherings in this and the three other fascicles were, perhaps, arbitrarily governed by concerns of thickness (roughly 200 to 400 pages) and contiguity of leaves rather than the chapter division of Genesis. The same holds true for the second fascicle [97r–244v], which comprises Mather's commentary on Gen. 1:31 to Gen. 10:21 (BA 1:401–711). The leaves of this second fascicle are still tightly sown together with a thin thread from Mather's day, considerably finer than the coarse twine used for the rebinding in the early nineteenth century. The third fascicle [245r–398v], containing annotations on Gen. 10:32 to Gen. 30:11 (BA 1:711–1036), is considerably bulkier than the preceding two and is still held in place by a thickly applied translucent glue on the spine of the fascicle. The fourth and last fascicle of volume 1 comprises MS pages [399r–475v], which consists of the remainder of Gen. 30:11 to 50:25, all of Exodus [1r–188v], and all of Leviticus [1r–164v]. Consisting of approximately 430 MS pages, the fourth fascicle is the largest gathering and the most stable in terms of stitching and gluing of the fascicle's spine. The four individually sewn fascicles were bundled up as one unit and stitched together with thick twine, which held the four fascicles in place as a single volume. Its measurements are 313 mm by 195 mm by 60 mm.

Heavy foxing, stains from watermarks, bumping of the manuscript leaves at the top and bottom, loose conjugate (but smaller) leaves interpolated between the pages, paper cutouts pasted into the margin with red sealing wax (now extremely brittle and disintegrating upon touch) – these conditions describe the general state of the three-hundred-year-old manuscript. This state of disintegration is especially noticeable in the first folio volume (Genesis through Leviticus), most likely because it lionized the attention of readers examining the holograph

manuscript. In spite of the compromised condition of the grey cardboard cover and its fragile binding, the manuscript in itself is remarkably well preserved, even though some lines or words of text are either obscured through occasional heavy foxing or completely lost through wear and tear along the edges or sewn up in the MS's gutter. The majority of the folio pages in the first volume consists of conjugate leaves still connected, but the MS also holds many individual sheets interleaved during the long composition and revision process. Mather also tore out many MS leaves (their stubs generally remaining visible in the gutter of the binding) and inserted, pasted, or otherwise held in place hundreds of smaller MS quarto, octavo, or duodecimo leaves, paper cutouts as well as snippet of paper. These inserts generally range in size from 86 mm to 315 mm (length) by 63 mm to 185 mm (width), but also contain many clippings as small as 30 mm by 20 mm, pasted into the margins, bottom, or center with red sealing wax. Notwithstanding these insertions and alterations, Mather did not fill each column of his recto and verso pages with his commentary; in fact, he left blank many columns, half or quarter pages – even whole pages – to be filled with later additions or to allow for corrections as he went along.

Watermarks and Countersigns: Paper Use in the “Biblia” on Genesis

As previously mentioned, Mather spent more than 35 years gathering material for his Bible commentary. From its slender beginnings in the fall of 1693 to the huge bulk in the winter of 1727/28, the manuscript underwent considerable excisions and interpolations reflected in the table below.

CM: <i>PD</i>	CM: —	CM: —	CM: ‡	CM: —	CM: —

As can be gathered from the above table, Mather introduced a large number of changes in the “*Biblia*” – alterations which involved not only substantive changes of the text but also the removal of whole leaves and the interpolation of others. These changes are visible in the varying sizes of individual leaves [H] and [W] measured here, but also in the breadth of the [G] gutter (or margin) on the right and left-hand side of each page. The four stages of growth and the approximate dates for the revisions of the Genesis MS are discussed in Section 1 of my introduction. Mather rarely makes references to the date of composition of specific sections of his commentary. For this reason, circumstantial evidence such as the publication date of a digested work provides at least some clue about the approximate time period when an addition was made. The watermarks [WM:] and countermarks [CM:] on the manuscript paper constitute an additional source of information about this process.

For reasons of economy, I have identified the design of the WM with alphabetical letters in parentheses which are keyed to depictions of these WM in the standard catalogues listed in footnote 1 (above). With some notable exceptions, virtually all CMs represent the initials of the names of paper-mill owners – foreign or domestic – but are extremely difficult to identify because of the scarcity of information on the paper mills of the period. Even if the faded or broken design of the WMs or of the initials of the CMs can be reconstructed from the sheets of paper used in the “*Biblia*,” linking them to known paper manufacturers is often subject to guesswork. Virtually all of the paper used in Mather’s commentary on Genesis appears to have been imported from English and Dutch paper mills. However, the identification of their names and location is fraught with difficulty.

The watermark references listed in the Table (above) are given in the following alphabetical order: (A), (AA), (B), (BA), (C), (D), (F), (G), (I), (K), (L) (N), (Q), (QA), (W), (X), (Z), (ZA). Furthermore, countermarks (mostly consisting of initials) are given in italics. They all are keyed to designs reprinted in the catalogues mentioned in footnote 1.

(A), (AA), (Z) and (ZA): **London Coat-of-Arms**

The field of a double-framed, pointed shield is intersected by a triple-lined cross. A small dagger in the upper left or right-hand segment embellishes the design of this popular watermark. The top (or crown) of the shield is ornamented with a small fleur-de-lis or cloverleaf in the center, and crescent moons (or scythes) on both sides facing the flower ornament at the crown of the shield. A sharply pointed horn (or thorn) jutting outward at the upper right- and left-hand corners of the shield accentuates the shield's crown. This watermark appears to have been extremely popular in the seventeenth and eighteenth centuries because it occurs in several sizes, with slight variations in the ornamentations at the top and pointed bottoms of the shield. W. A. Churchill identifies this watermark and several of its variants as belonging to the "London Coat-of-Arms" (76). It is closest in appearance to figure 243 in the center (Churchill CCXIV), except that its geometric design of the shield's lower part is identical with the lower part of figure 244. Churchill identifies design 243 as belonging to the Dutch paper maker Pieter van der Ley (with the date 1707), who made his paper for the English Market. Gravell's *Catalogue of Foreign Watermarks* (p. 38 item 55) lists a variant of this design. Reams of paper bearing this design originated in London and were sold in Boston in 1703.

(B) **Arms of England**

In the center of an elongated shield appear the bodies of three lions (one above the other) facing left. The shield is topped with an ornate double-lined crown with a fleur-de-lis in the center and cloverleaves on both sides of the flower. The countermark bears the initials HD. Churchill (75 and CLXXXVII, figure 212) dates this elaborate design to 1690. This watermark appears only four times in all of Mather's commentary on Genesis; its countermark HD – if it is identical with the one listed in Churchill (CLXXXVII) – also appears four times but only once in tandem with the Arms of England here described. The initials HD remain unidentified.

(BA) This watermark is as yet unidentified in part because it is partially lost in the gutter of Mather's manuscript and therefore difficult to reconstruct. It has the appearance of a shield with a rounded bottom and is divided in the middle with a horizontal band or belt, and three circular designs on its top or crown. Several faintly discernible garlands hang from the top on both sides of the shield and accentuate this design.

(C), (F), (W) **Lilies**

This group of watermarks also exists in several variants, some of which are depicted in Churchill (CCLXXXIX, figure 389; and CCXCI, figure 395). The three watermarks (C), (F), and (W) share the following design patterns: In the center of a shield (of differing sizes) is an elaborate fleur-de-lis with a counter-image of similar design giving the flower the appearance of a mirror image. The oblong, almost bell-shaped, petals of the fleur-de-lis has the appearance of a diamond-shaped design in

its mirror-image. Watermark (C) is the simplest version of this depiction, because it lacks the mirror- or counter-image. The crown of the shield in (C) is also relatively unornamented with a diamond-shaped design in the center, inward turning moon-shaped circular figures on both sides of the diamond, and horns on both corners. (F) and (W) are the two most elaborate versions of this design. They muster the fleur-de-lis design and mirror-image and are closest in appearance to figure 389 in Churchill's catalogue. The double-rimmed crown (like a bowl turned upside down) sits on top of the shield. The crown's flowery ornament is closest to that in figure 389, except for the cloverleaves that are absent in (F) but present in (W). The crown of watermark (W) also has the appearance of a whelmed down bowl (as in F), but its flowery ornamentation is virtually identical with that of figure 389.

(D) **Cross and Lions**

This design, which Churchill (90, CDXIV) identifies as Genoese in origin, appears only once in all of Mather's Genesis. A cross in the center of an oval is supported on both sides by what appear to be lions. The oval rests on two globes (one on top of the other) with the initials P in the first and I in the second globe. A crown with a diamond shaped design on its top garnishes the whole. This watermark is virtually identical with the depiction in Churchill (CDXIV), except for the initials in the two globes.

(G), (Gx). **Cornucopia**

This popular design occurs as a smaller element in many watermarks, but rarely as a larger, single ornament (50 mm by 20 mm) without any trimmings as in (G). This design and its more ornate version (Gx) appear in Mather's Genesis only twice. The name and origin of the paper maker remain unidentified.

(I) **Globes**

Three globes resting one upon the other are ornamented with the design of a potent cross on the topmost globe. This unidentified watermark appears only once in Mather's Genesis.

(K) **London Coat-of-Arms**

In the center of a shield is a large cross of a bladelike appearance. This bladelike design gives the cross a somewhat three-dimensional appearance because the left and lower sides of the crossing blades are darkened as if to accentuate a third dimension. The shield comes to rest on an upside-down bulbous fleur-de-lis; the shield is surrounded with curly garlands on the sides and top. This design is virtually identical with the one in Churchill (CCXIII), figure 240, except that the watermark in Mather's Genesis lacks the cross-shaped dagger and the other ornaments and initials given in Churchill's depiction. Churchill (76) identifies this design as that of Abraham Janssen (1635–1710) and of François Jardel, a factor at the Puymoyen mill at Angoulême (Churchill 23).

(L), (X) **Horn**

A horn attached to a strap in the shape of a crossing loop is in the center of this popular design. The highly stylized shield gives way at the top to an elevated unlike or diamond-shaped design resting like a crown on a heartlike shape (top, center) of the shield. The heartlike shape is embraced by crescent circles facing the centerpiece at the top. The countersign of this shield reads COMPANY and is framed in a

rectangle, measuring 57 by 10 mm. This design, which occurs in two variants in Mather's Genesis, is closest in appearance to figure 315 in Churchill's catalogue (CCXLIX). According to Churchill (79), this specific design can be found on paper made from 1623 to 1695. A close variant of this design, yet with the countermark initials HG, is listed in Gravell's *Catalogue of Foreign Watermarks* (106, figure 338) and associated with paper used in Kent County, Delaware, in 1693.

(N) **Horn**

The watermark here identified by (N) represents the bottom half of a shield, whose top is lost in the gutter of Mather's Genesis. The curved shape of the shield's lower part including its joined initials WR, pending below a design in the shape of the numeral 4, appears only once in Mather's Genesis. The design of this watermark is closest to the one in Churchill (CCL, figure 317). The initials WR identify the paper maker as Wendelin Riehel, whose design (including initials) "were imitated in several countries at least until 1770" (Churchill 79).

(Q), (QA) **Lilies**

As previously mentioned, the fleur-de-lis motif (representing the Trinity, as well as the House of Bourbon) was highly popular among Dutch and English paper makers in the seventeenth and eighteenth centuries. Very many variants of this design can be found. In the two variant versions in the paper used in Mather's Genesis, it appears nine times. It is closest in appearance to the design in Churchill (CCLXXXIX, figure 390), including its highly ornate crown. The top of the crown resting on the shield is ornamented with a centered lily and a diamond shape on an elevated point on both sides of the lily. The doubled rim of the crown is finished with a halved lily embracing the crown's center ornamentation.

Countersigns: CC, CS, EB, G, GG, GL, IV, H, HD, PC, PD, R, TM, VH, D/W, COMPANY, and ELLISTON & BASKET.

Most of these countersigns are the initials of generally unidentified paper makers and mill owners. The countersign here rendered D/W is arranged in such a fashion that the initial D rests on top of the initial W. The double-symbol ‡ in the Table here signifies the paper-makers' last names ELLISTON & BASKET rather than initials. Finally, the number sign # in the above Table signifies a rather unusual countersign. It has the appearance of the letter O to which a bootlike design is attached. This countersign measures 16 mm by 10 mm. Most of these countersigns appear as frequently in the paper used for Mather's Genesis as the watermarks described above, but rarely in combination with their corresponding watermark. Countersigns generally appear on opposite leaves. The initials CS – like most other initials measuring no more than 10 by 20 mm – are in Gravell's *Catalogue of Foreign Watermarks* (57, figure 136) associated with paper used in Dorchester, Massachusetts, in 1707 (*Catalogue* 7). The countersign ELLISTON & BASKET is by Edward Heawood (466–98) and A. H. Shorter associated with Dutch and French paper makers.³

3 Edward Heawood, "Papers used in England After 1600," *The Library: The Transactions of the Bibliographical Society* 10.4 (2009): 466–98. See also A. H. Shorter, *Paper Mills and Paper Makers in England, 1495–1800* (Hilversum: Paper Publications Society, 1957).

Editorial Principles

In establishing a critical edition of Mather’s magnum opus, I have followed G. Thomas Tanselle’s recommendations in *Textual Criticism and Scholarly Editing*. (Charlottesville and London: UP of Virginia, for the Bibliographical Society of the University of Virginia, 1990). Subsequent editorial guidelines are informed by Tanselle’s perceptive criticism and have been rigorously enforced in the transcription and vetting processes.⁴ The typescript for Genesis (established by myself) has been collated six times: four times by collating the typescript and the microfilm copyflow with the help of several graduate students (including Merit Kaschig, Jan Saathoff, Florian Schwieger, Ellen Kubica, and Damien Schlarb), and twice by on-site collations of typescript and holograph manuscript at the MHS (summer 2001 and fall 2007).

The following guidelines, based on Tanselle’s recommendations, are adapted to suit the specific qualities of the “Biblia Americana” holograph manuscript and of Cotton Mather’s handwriting:

1. To facilitate a permanent pagination for the entire holograph manuscript, I have introduced in brackets a continuous foliation for each leaf and interpolated cutout (no matter its size); the recto and verso of each are indicated by r or v appended to the page number. Thus Mather’s commentary on the book of Genesis begins with [1r] and ends with [472v]. However, in those cases where Mather interpolates several layers of inserts within inserts, I have marked these layers as [Insert Ar] and [Insert Bv]. Furthermore, the triangular shapes ∇ $\triangle$ given in the margin of the edition respectively mark the beginning and end of a longer textual interpolation. Bracketed page numbers in the edition always signal the beginning of a new MS page.

2. I have inserted in the typescript in the location specified by Mather all of his marginal and interlinear interpolations, which he designates with single, double, or triple carets (^^), with pound signs (##) or other distinguishing marks (aa, oo, **, etc.). However, to establish a clean text unencumbered with literally thousands (!) of editorial symbols, cancellations, and intrusions, I have chosen to make the corrections in the text as Mather intended them for the press – without recording his symbols, false starts, or his corrected misspellings in a separate appendix. A footnote will draw attention to all ambiguous cases; the projected online edition will juxtapose transcription and holograph manuscript pages in parallel columns.

3. Since Mather incorporated new material or excised superseded entries over a period of more than three decades, he frequently ran out of space and was forced to add new chapter-and-verse annotations at the end of the chapter or

⁴ I wish to thank Professors Tanselle (Columbia) and Lisa Gordis (Barnard) for their trenchant review of these guidelines.

interpolate separate quarto, octavo, or duodecimo leaves and paste them in the gutter of a MS page with sealing wax. For these reasons, a number of verse annotations are out of sequence. For instance, a commentary on verse 17 may thus be followed by one on verses 4, 13, or 8, which he added during a later revision process. It seems obvious that Mather did not intend to present his annotations in this disordered fashion. If he had succeeded in interesting a London publisher in his huge folio commentary, Mather most likely would have engaged a copyist to establish a clean, orderly copy text for the typesetter. To avoid confusion, I have therefore elected to present Mather's verse annotations in the appropriate sequential order.

4. Mather cancels punctuation marks, letters, words, sentences, paragraphs, and entire pages for a number of reasons: to search for a more precise word during his rapid composing or copying process; to replace one quotation with another; to excise names, titles, places, dates, and figures about whose accuracy he is in doubt, or whose anonymity he decides to preserve, or whose hermeneutic relevance is superseded by new material; to correct spelling and capitalization; to cancel false starts; to revise punctuation and upper- and lower-casing of letters or words as necessitated by interpolations or cancellations; to emphasize or de-emphasize specific words; and to restore matter obliterated or otherwise obscured by ink spots, smudges, or unevenness of paper quality. All told, Mather's cancellations, emendations, and interlineal interpolations are so numerous that recording them in a genetic text would seriously impede readability and comprehension of Mather's argument. Similar reasons lead me to believe that little is to be gained by chronicling these emendations in a separate appendix. Such an appendix would unnecessarily bloat the size (and expense) of each volume. However, if Mather cancels existing matter because his hermeneutic or theological position changed, I have commented on his cancellations in discussion footnotes and recorded cancelled matter in Appendix A. For all other cancellations not reproduced in footnotes, readers should consult Mather's holograph MS at the Massachusetts Historical Society, turn to the readily available microfilm copies of the Mather Family Papers, or postpone their quest until the searchable online edition becomes available.

Generally, Mather cancels matter by drawing a thick wavy line through the passage or corrects his spelling or syntax by writing over (i.e., in the same place as) existing words. Deciphering and reconstructing these excisions or corrections proved fairly easy. But when he wants to be sure that a passage cannot be deciphered, he obliterates it by repeatedly drawing a wavy line through the excision, by erasing or even smudging it.

I have used the following symbols wherever words have been permanently lost through defacement, illegibility, or mutilation:

- [*], [**] to indicate the loss of, one or more words by Mather’s defacement.
 [* illeg.], [** illeg.] to indicate the loss of one or more words through illegibility of Mather’s paleography.
 [* torn], [** torn] to indicate the loss of one or more words by mutilation.

If a lost or missing word can be inferred with reasonable certainty, the inferred reconstruction is rendered in braces { }. If subject to conjecture, however, the reconstruction is followed by a question mark and rendered in braces { ? }.

5. Mather’s use of abbreviations and contractions provides no hardship for scholars of the period. Even general readers unfamiliar with the conventions of the late seventeenth and early eighteenth centuries should experience few problems in that respect. But since Mather intended “Biblia Americana” for the press, I have silently expanded all those contractions and abbreviations that an early eighteenth-century typesetter would generally have spelled out. I have here reconstructed the principles used by Thomas Parkhurst, printer and publisher of Cotton Mather’s 1702 London edition of *Magnalia Christi Americana*, available in a facsimile imprint by Arno Press (1972) as well as through Chadwyck Healey’s Eighteenth-Century Collection Online (ECCO):

y ^t	= that	y ^e	= the	y ^m	= them
y ^r	= their	o ^r	= our	w th	= with
w ^{ch}	= which	wherew th	= wherewith	aforesd.	= aforesaid

However, all of Mather’s abbreviations that coincide with modern conventions such as *Cap^t* (Captain), *M^r* (Master / Mister), *M* (French: Monsieur), *D^r* (Doctor), *comēcing*, *&* (ampersand), *&c.* (etc.), and *tho’* (though), have been rendered *Capt.*, *Mr.*, *M.*, *Dr.*, *commencing*, or retained as *&*; *&c.* or *tho’* as evidenced in Parkhurst’s 1702 London imprint.

6. While Mather generally distinguishes between the minuscules *i* and *j* in his quotations from Latin sources (Latin not discriminating between *i* and *j*, *I* and *J*, and *u* and *v*), he did not do so for the majuscules *I* and *J*, which Mather renders *J* with very few exceptions. Since no misreading is really possible here, I have retained Mather’s archaic conventions wherever applicable. His long-tailed minuscule *f*, commonly rendered as a lowercase *s*, is somewhat more problematic, for Mather uses both *f* and *s* interchangeably. Thus both *should* and *should* or *possession* and *possession* can be found; I have silently adopted modern conventions and uniformly rendered the long-tailed *f* as lowercase *s* throughout the text.

7. Following homiletic tradition for oral delivery, Mather underscores an unusual number of words and phrases with single or double underlining to emphasize key terms and concepts, and to signal Latin quotations. Again, I have followed the conventions of Mather’s eighteenth-century publisher (still applicable today) and rendered a passage underscored by a single line in *italics* and that by a double line in SMALL CAPITALS.

8. Even though Mather's spelling is remarkably consistent and, by the standard of his peers, remarkably modern, occasional inconsistencies do occur when he copies from his primary sources. If his particular spelling does not give rise to any confusion, I have retained his variant. For instance, he renders *foretell* as either *foretel* or *fortell*, and consistently spells *carcass* as *carcase*, or *thoroughly* as *throughly*. Since no misunderstanding seems possible, I have retained Mather's exact spelling throughout. If, on the other hand, Mather adopts a variant spelling of the names of such authors as *Camden*, *Peutinger*, *White*, or *Clarke* by rendering them *Cambden*, *Pentinger*, *Wite*, or *Clark*, wrongful identification is possible. In such cases, I have corrected the variant spelling in the text and noted the correction in a footnote. Such obvious slips as *fthe heavens*, often the result of Mather's inaccurate copying from another source, of inaccurate cancellations of earlier passages, of interlineations of words and phrases, have been silently emended. His characteristic (though inconsistent) mixes of numerals such as *ii* for *11*, *i2* for *12*, or *3i* for *31*, have been silently modernized. However, in following Parkhurst's eighteenth-century conventions, I have retained Mather's use of such ligatures as *æ* and *Æ* and for *œ* and *Œ*. Hence "æqual" and "Ægypt," and "Phœnicians" and "Œconomy." These conventions generally reflect Mather's Latin sources.

9. Capitalization in "Biblia Americana" is rather problematic throughout. Anybody who has ever seen a sample of Mather's handwriting will be aware of the difficulty. His indiscriminate and indeterminate use of upper and lower cases of the letters *c*, *e*, *g*, *l*, *m*, *o*, *p*, *s*, *u*, *v*, *w*, *x*, *y*, and *z* is confusing to modern expectations, especially when the first letter of a name or the initial letter of a word following a period appears to be lowercased. Generally, a seemingly lowercased word at the beginning of a sentence is not problematic. But since there is no evidence to suggest that Mather intentionally uses minuscules after sentence-terminal marks, the initial letter of a word at the beginning of a new sentence, as well as of a proper name, is silently capitalized.

A final capitalization usage deserves brief attention. Mather commonly capitalizes word-initial letters of nouns or a sequence of nouns, of adjectives modifying nouns, of a sequence of predicate adjectives, or even of sequential adverbs and verbs to emphasize particular concepts or themes, or to signal to the orator a change of intonation to effect a different meaning. Hence we find "their Thoughts and their Pens," "Beloved City and Celestial Abode," "Considerable Alterations and Divine Offerings," "more Copiously and more Accurately." Such conventions are typical of the contemporary homiletic tradition for oral delivery, and Mather's practice requires no elucidating. It is more problematic, however, when his capitalization lacks any apparent rationale. His use of upper and lower cases in such passages as "GoD the Father, The son, and The Holy ghost" seemingly follows no recognizable logic – unless we remember Mather's interchangeable use of such upper and lowercase letters as *o*, *s*, *g*. Since prob-

lems of this nature are a distinctive feature of Mather's hand, I have elected to regularize his practice throughout: Thus, "GOD the Father, The Son, and The Holy Ghost." However, when Mather's intention could not be inferred from the context or prior evidence, I have silently capitalized nouns and gerunds if they began with the letters *c, e, g, l, m, o, p, s, u, v, w, x, y*, or *z*. Imposing consistency in these instances solved the problem of making literally thousands of individual and subjective judgments. Along the same lines, adjectival clusters preceding nouns and sequential adverbial modifiers have been silently rendered in upper or lower cases when the first letter of an adjective or adverb cluster in the sequence clearly indicate Mather's intention. Hence such phrases as "the **I**llustrious and **p**ious Master **c**artwright" or "he **B**arely touched yet **s**acrilegiously despoiled" are rendered "the *Illustrious* and *Pious* Master *Cartwright*" and "he *Barely* touched yet *Sacrilegiously* despoiled." Unfortunately, this system is not completely foolproof; in some cases arbitrary decisions were necessary when no precedent patterns were available. At any rate, I have taken pains to rule out any unintentional shift in meaning.

10. Punctuation marks in "*Biblia Americana*" are a frequent source of problems. Mather's innumerable excisions and interpolations necessitated frequent re-punctuation. Unfortunately, he does not always excise the existing punctuation mark when he inserts a new one. As a result, two different marks often exist side by side. But deciphering Mather's final choice proved relatively easy when I consulted the holograph manuscript at the MHS. The use of different types of ink (generally indistinguishable on the microfilm copy) clearly signals Mather's intention.

I have retained Mather's final choices in virtually all cases just as they occur in "*Biblia*." Only when his punctuation mark renders the meaning of his sentences ambiguous did I intrude into the text. Such intrusions, however rare, are indicated by brackets [] or identified in a footnote.

11. To allow for later additions, Mather leaves many blank spaces and blank pages in the holograph manuscript. Frequently, an entire MS page consists of only two or three brief paragraphs of commentary on different biblical verses, with blank spaces of varying lengths between them. In such cases, I have regularized the blank spaces between such paragraphs by uniformly introducing two blank lines between them.

Most of the time, Mather signals the beginning of new paragraphs with indentations of irregular lengths. Here I have used a standard indentation for each new paragraph unless Mather's pattern suggests otherwise. Any extra spaces between words or sentences, possibly serving Mather as reminders for later insertions, have been silently omitted. When Mather skips one or more lines between paragraphs to signal a new subdivision or to break up long passages into visually recognizable units, I have regularized his practice by dropping two lines. Similarly, when he uses one or more slashes // to indicate that a passage is to be

centered or to be blocked, I have carried out his intent but silently omitted his slash or slashes. However, since Mather uniformly sets off his Hebrew citations with slashes at the beginning and end, I have retained his practice. Thus, “The Terms, /נחש/ and /שרף/ are synonymous.”

12. Mather frequently uses dashes – of varying lengths. Such a dash often signifies the end of a quotation, an omission of words (especially in conflated quotations), or some other unspecified alteration to a quotation. However, dashes occur not only within quotations but also at the ends of lines, here generally indicating pauses. I have retained Mather’s practice in the text of the present edition but uniformly standardized their length.

13. Single, and infrequently double, quotation marks serve Mather to highlight lengthy citations from his contemporaries’ sources. These markers appear at the opening (but not at the closing) of each citation and in front of each word (along the left-hand margin) beginning a new line. Little seems to be gained, however, by retaining this archaic practice: (1) Mather’s line breaks (except for those in his poetry) are different from the line breaks in the present edition. (2) If these lines were run to the same measure as the surrounding copy, Mather’s quotation marks would appear midline. (3) And to move the quotation marks back to the left-hand margin would be to impose an archaic convention on this modern setting. For these reasons, modern conventions have been adopted here, and double quotation marks are placed only at the opening and closing of Mather’s citations.

14. I have retained Mather’s hyphenations of compound names, verbs, nouns, adjectives, and adverbs as they appear in the manuscript. Distinguishing compound hyphenation from end-of-the-line divisions proved easy enough, since the context clearly signals his intention. In those cases where an end-of-the-line division mark coincides with the hyphen of a hyphenated compound word, I have tried to rule out any misinterpretation. No separate record of Mather’s divisions of hyphenated compounds is therefore necessary, except in those cases when Mather’s hyphenated words coincide with the end-of-the-line word division in the printed text. These rare instances are explained in a footnote.

15. Mather’s Latin, Greek, and Hebrew citations are a constant source of problems because he virtually always quotes them at second, even third and fourth, hand depending on which authors and sources he is epitomizing. Modern readers must not forget that Mather and his contemporaries by and large did not have the benefit of our modern classical editions, whose philological reliability, textual accuracy, and variant orthography are a result of the philological research begun during the Renaissance and achieving prominence in Mather’s own time. In virtually all cases Mather reliably copies his sources and their classical citations. In cases where Mather makes mistakes, the error generally occurs in

Mather's source as well. Whenever such a problem occurs, I have commented on this issue in a footnote and corrected the error in the text.

His transcription of the Greek diacritical marks, however, seems sloppy at first glance. Mather frequently adds accent marks in his Latin citations even though they do not appear in his source. Significantly, in nearly every instance, he omits the accent or aspiration marks from his Greek and Hebrew citations – even if they are supplied in his source texts. In his *Manuductio ad Ministerium* (1726), Mather addressed the issue of Greek accent marks and his rationale for omitting them. Advising his candidates for the ministry, he argued,

I can't encourage you, to throw away much Time, upon an Accurate Skill in the *Greek Accents*: But rather wholly to drop them, when your Quill comes to convey any *Greek* into your Pages. For, as the Writing of *Greek* otherwise than in *Capitals*, was introduced in later Ages by the Monks of *Egypt*, who borrowed the smaller Letters now used from the *Coptic*; So, One shall hardly find any *Accents* on the *Greek*, in any Manuscripts written above Eight Ages ago: Nor was the Invention of the *Accents*, with which our *Greek* is now encumbered, of any other than a *Musical Intention*. And, *Vossius*, with *Henninius* after him, are not the only Gentlemen, who have declared earnestly against pronouncing the *Greek* according to the *Accents*: I pray, how would a Verse of *Homer* sound, if it were so pronounced? (*Manuductio* 29–30)

A similar intent seems to govern Mather's numerous, though brief, Hebrew citations, whether derived from secondary sources or from the Masoretic texts themselves. Some scholars faulted him for his imperfect knowledge of Hebrew (see L. H. Feldman 125, 152n15; and S. Goldman, *God's Sacred Tongue* 31–51). However cogent this critique may be, Mather sided in his 1681 Harvard M. A. thesis with Johann Buxtorf the Younger, who in 1648 attacked Louis Cappellus' *Arcanum punctationis revelatum* (1624) for rejecting the belief that the Hebrew vowel points were coterminous with the origin of the Hebrew language. Mather's academic endeavor was perhaps more indicative of his faith and wishful thinking than the state-of-the art knowledge of the Tiberian Masoretes (sixth c. CE), whose contribution to the Hebrew texts was not fully understood until Louis Cappellus published his refutation. In "Biblia Americana," Mather admits his error and, perhaps for this reason, elects to omit the Hebrew cantillation marks in virtually all instances.

Similar problems occur in Mather's copying of Greek phrases and sentence, which (as usual) are at second, third, even fourth, hand. What complicates matters is that Mather and his peers frequently employ shorthand abbreviations such as *os* for "os," the terminal "ς" (in opening or medial positions) for "στ," or *ta* for "tai," *o* for *o*, or *J* for *o*. In all cases I have elected to expand his abbreviations silently and follow modern conventions. However, I retain all accent marks in his Greek and Hebrew citations if they are supplied in the holograph manuscript.

Annotations

Cotton Mather's commentary "Biblia Americana" (in itself one gigantic sequence of annotations on biblical archaisms, doctrinal concepts, philological peculiarities, and scientific innovations) requires a running commentary on issues important to Mather and his Reformed peers. Among his target audience are theologians, preachers, informed laypersons, and fellow virtuosi, whose demand for answers to the burning scientific and philosophical questions of the age were frequently ignored by such conservative commentators as Henry Ainsworth, Matthew Henry, Matthew Poole, and Simon Patrick.

Modern readers unfamiliar with the philosophical debates of the period, with the radical changes in biblical hermeneutics of the seventeenth and eighteenth centuries, and with the tools of seventeenth-century exegesis (tools that Mather took for granted), might easily require three different sets of annotations to meet their own needs. To satisfy these demands would surely require volumes of running commentary and become an editorial odyssey that would founder on the Scylla and Charybdis of scholarly perfectionism and editorial exigencies. Careful examination of Mather's approach to and use of his sources leads me to believe that specific parameters have to be established in guiding readers (and fellow editors) through the maelstrom and quicksand of the "Mather bog":

- (1) A working knowledge of the Bible, its major figures, and main historical events is taken for granted. Any number of modern biblical dictionaries and encyclopedias will quickly yield answers not provided here.
- (2) Annotations are to clarify Mather's own exegetical positions in the context of his own time period, not to pass judgment on, or to provide a partisan defense of his denominational or ideological concerns.
- (3) Mather's sources are identified by author, place of publication, and first edition if known.
- (4) Biographical information of Mather's authors is kept to a minimum and provided only when crucial to the immediate context.
- (5) Biblical allusions and citation references not provided in Mather's text are supplied in footnotes and recorded in the Index of Biblical Passages.
- (6) Standard reference tools such as the *Patrologiae Latinae* (PL), *Graecae* (PG), and *Thesaurus Linguae Graecae* (www.tlg.uci.edu), or such indispensable online resources as www.perseus.tufts.edu/Texts/latin_TOC.html and "thelatinlibrary.com" are used throughout to identify the sources for Mather's citations. Furthermore, the standard editions of classical Greek and Roman literature, available in multiple modern reprints (Teubner, Loeb, Oxford), are used to identify book, chapter, section, or paragraph numbers – unless otherwise noted.
- (7) Translations of Hebrew, Greek, Latin, French, or German citations are furnished only if Mather does not do so himself or if his translations are seriously flawed.

PART 2

THE TEXT

Courtesy of the Massachusetts Historical Society

The OLD TESTAMEN{T,}

[1r]

in the Order of the Hist{ory}¹

The whole Book of *Genesis*, is very {***torn} be received, inserted, and considered, as the {**torn} Glorious BIBLE.

[The Book of *Genesis*.]

As a *Supplement* unto the Book of *Genesis*, {***torn} of the *Genealogies* in it, we may very agree{ably *torn}{start at} the Beginning of the *Chronicles*.

1. Chron. 1. All.

*Adam, Sheth, Enosh, – These are the Du{kes of Edom.}*²

Now comes in the Book of *Job*. While *Israel* is in *Egy{pt}* and under horrible Degeneracy and Calamity, there is a glor{iou}s Exemple of Piety in *Arabia*. It seems as if *Elihu* were {the} Writer of the History; for in the Thirty Second Chapter, he spe{aks} of himself as the Historian. Or exiled *Moses* might make this P{art?} unto his Friends in Egypt.

[The Book of *Job*.]

We proceed now to the Book of *Exodus*; and we first {*torn} down, the Seventeen first Chapters of it.

[*Exodus*, from chap. 1. to chap. 17. All.]

Now these are the Names – from Generation to Ge{ne}ration.

We reserve the Eighteenth Chapter of *Exodus*, to another Place {torn} and go on with the rest of the Book.

¹ In this first section of his “Biblia Americana” (hereafter “BA”), Cotton Mather outlines a unique chronology of the events mentioned in the OT and NT. Since the biblical authors frequently do not narrate the historical episodes in their chronological order, Mather hopes to furnish his readers with a basic key to the sequence of unfolding events, to recognize parallel events occurring during the same period yet related sequentially, and to supplement the incomplete detail given by one author with the fuller (or alternate) version given by another. Unlike James Ussher’s *Annales Veteris et Novi Testamenti* (1650), Thomas Allen’s *A Chain of Scripture Chronology* (1659), William Howell’s *An Institution of General History* (1661), or Robert Cary’s *Palaeologia Chronica* (1676), Mather rearranges the sequence of books, chapters, and verses of the Bible in the order in which they address the chronology of biblical events.

² See Appendix A.

[*Exodus*, from chap. 19. to chap. 40. All.]

In the third Month – all their Journeys.

The Tabernacle being erected, there are Ordinances prescribed for it. The Book of *Leviticus* contains those Ordinances. There is the Story of but one Month in this Book; namely, the First Month of the Second Year of the Deliverance of *Israel*. Only, we may do well, first of all, to insert the repeated Account of the wonderful thing that happened on the Day when the *Tabernacle* was reared.

Num. 9.15–23.

And, on the Day that – by the Hand of Moses.

It may not be amiss here also, to insert, a further Order, about the *Passeeover*, which had been formerly ordered.

Num. 9.1–14.

And the Lord spake – born in the Land.

The Silver Trumpets were also made in this Time.

Num. 10.1–10.

And the Lord spake – the Lord your God.

Now come in very agreeably, the Rules for Sacrifices, [*torn] from the Tabernacle; and the ensuing Consecration of [the] Priests; and some further Institutions, & Denunciations.

[The Book of *Leviticus*.]

[2v] | [T]he Camp of *Israel* is now to be put in Order, and great and good Things to be done in it. Behold, how the History of the next Month is carried on.

[The Book of *Numbers*, from chap. 1. to chap. 8. All.]

And the Lord spake unto Moses, – touching their Charge.

Here is the true Place for the Story of *Jethro*.

Exod. 18. All.

When Jethro the Priest – into his own Land.

The History in the Book of *Numbers*, is now again to sett forward.

Num. 10.11 – as far as to Num. 14. All.

And it came to pass – even unto Hormah.

Upon the dreadful Decree of God, against the People, comes in a remarkable *Prayer of Moses, the Man of God*.

Psal. 90. All.

A Prayer of Moses, – establish thou it.

The Book of *Numbers*, now receives no further *Parentheses*.

[The Book of *Numbers*, – from chap. 15. to chap. 36. All.]

And the Lord spake – near Jericho.

There now ensues the Book of *Deuteronomy*; which is a Rehearsal of the Divine Dispensations and Institutions, wherein the People of *Israel* had been concerned. The last Month of *Moses*'s his Life, and the following Month of *Israel*'s Mourning for that admirable Man, take up this Book.

[The Book of *Deuteronomy*.]

The whole Book of *Joshua*, goes on with an undisturbed Order. The Seventeen Years of his Administration are the Time that belongs unto it.

[The Book of *Joshua*.]

As an Appendix to the Book of *Joshua*, and a Supplement unto the Division of the Land of *Canaan*, & the Settlement of the Tribes in their several Possessions, it may not be improper or unprofitable, to bring in those Chapters in the First Book of *Chronicles*, that mention the Fathers & the chief Men of the *Tribes*, who were the Planters and Raisers of the Families in their several Possessions.

1. Chron. 2. All.

These are the Sons of Israel. – house of Rechab.

1. Chron. 4. All. and ch. 5. All. and ch. 6. All. and ch. 7. All.

and, ch. 8. All. and ch. 9. All.

The Sons of Judah – the Sons of Azel.

The Book of *Judges*, does now follow; & it carries on the Sacred History, from the Death of *Joshua*, to *Jephthah* (with his Succession) and *Sampson*, which two (*Jephthah* and *Sampson*) were contemporary.

[The Book of *Judges*; ch. 1. All. And ch. 2.1–10.]

Now after the Death of Joshua, – done for Israel.

Here comes in the horrid Story of *Micahs* Idolatry, and the Impiety & the Desolation of the *Benjamites*.

Judges. ch. 17. All. Ch. 18. All. Ch. 19. All. Ch. 20. All. Ch. 21. {All.}

And there was a Man – right in his own.

| The History of the *Judges*, is now to proceed.

[3r]

Judg. 2.11–23. And, ch. 3. All.

And the Children of Israel, – delivered Israel.

Here seems to be the most agreeable Place to bring in the Book of *Ruth*. *Boaz's* Marriage to *Ruth*, seems to fall much about the Time of the Death of *Ehud*.

[The Book of *Ruth*.]

The History of the *Judges* is to have no further Interruption.

Judges, – from chap. 4. All. to chap. 16. All.

And the Children of Israel again, – Judged Israel twenty Years.

From hence we travel into the First Book of *Samuel*; which carries us, from the Death of *Sampson*, who died by his own hand gloriously, to the Death of *Saul*, who died by his own hand miserably.

1. Samuel. ch. 1. – as far as chap. 19. All.

Now there was a certain Man – Saul among the Prophets.

Here comes in the *Psalms*; which was composed on the Occasion of *Sauls* watching the House, to take and kill *David*.

Psal. 59. All.

To the chief Musician – God of my Mercy.

The History goes on.

1. Sam. ch. 20. All.

And David fled – into the City.

Here seems to be a proper Lodging, for the Seventeenth Psalm; the Enemies of *David* in the Court of *Saul*, are at Work, sufficiently to produce, all the Petitions in us.

[Psal. 17. All.]

A Prayer of David – with thy Likeness.

Another Psalm there is, that may come in here well enough.

[Psal. 140. All.]

To the chief Musician – dwell in thy Presence.

1. Sam. ch. 21. All.

Then came David – come into my House!

Here is the Place for the *Thirty fourth* Psalm, as the Title of it ha's determined it.

[Psal. 34. All.]

A Psalm of David, when – shall be desolate.

And while *David* was thus among the *Philistines*, he was *A Dumb One, under Oppression, among Men afar off*. Accordingly the Psalm, *Gnal Jonath-Elem rechokim*, is to be referr'd unto this Occurrence and Occasion.³

[Psal. 56. All.]

To the chief Musician – Light of the Living.

Resume now the History; as far as one short Clause ha's given it; a Peece of One Verse.

1. Sam. 22.1. –

David therefore departed thence, and escaped to the Cave of Adullam.

Here comes in the Hundred & forty second Psalm.

[Psal. 142. All.]

Maschil of David – bountifully with me.

The Lord hears his Prayer, and sends his Friends to surround & comfort him. Here lett the History proceed.

1. Sam. 22.1, 2.

And when his Brethren – four hundred Men.

1. Chron. 12.8–19.

And of the Gadites – Jeopardy of our Heads.

[4v] | Now again we are to pursue the History.

1. Sam. 22.3. – 23.

And David went thence – be in Safeguard.

The horrid Action of *Doeg*, and of *Saul* murdering the Priests on the Accusation of *Doeg*, produced, what we are now to attend unto.

³ The Hebrew phrase “Gnal Jonath-Elem rechokim” is an instruction to the “chief musician” to intone Ps. 56 “*after* (the melody): ‘the mute dove among strangers’” (Delitzsch and Keil 5:12).

[Psal. 52. All.]

To the chief Musician – good before thy Saints.

There is also another Psalm, that from diverse Passages in it, may seem calculated, for this Occasion.

[Psal. 12. All.]

To the chief Musician – vilest Men are exalted.

Wee return to the Holy History.

1. Sam. 23.1–23.

Then they told David – all the Thousands of Judah.

This Distress produced a Psalm, which is now to be considered.

[Psal. 54. All.]

To the chief Musician – upon mine Enemies.

Lett the History now proceed.

1. Sam. 23.24–29.

And they arose – Strongholds at Engedi.

Several and glorious Composures are by the Spirit of God produced about this time, in the Heart of His Afflicted Servant.

[Psal. 63. All.]

A Psalm of David, when – shall be stopped.

[Psal. 143. All.]

A Psalm of David. Hear – I am thy Servant.

We are now to entertain more of the Sacred History.

1. Sam. 24. All.

And it came to pass – gatt them up unto the Hold.

More of the Divine Psalms, do seem to claim a Right of being introduced here. Particularly; There is one called, *Altaschith*, or, *Destroy not*. Probably, in Commemoration of this, That tho' *David* was moved by his Followers, to *destroy Saul*, yett he would not.

[Psal. 57. All.]

To the chief Musician – above all the Earth.

[Psal. 141. All.]

A Psalm of David. Lord – I withal escape.⁴

The Process of the Sacred History, is now to be attended.

1. Sam. ch. 25. All.

And Samuel died – which was of Gallim.

At the History of *Nabal*, why should not the *Fifty Eighth* Psalm come in? Tis an, *Al-taschith*, or, *Destroy not*; perhaps it refers to *Dauids* not destroying of *Nabal*; altho' he had threatned it.

⁴ See Appendix A.

[Psal. 58. All.]

To the chief Musician. Altaschith – Judgeth in the Earth.

[5r] | About this Time, the Molestations of *David*, from *Saul* and his Courtiers, afford Opportunities, for several Psalms, to be brought in, for the Church of God.

[Psal. 26. All.]

A Psalm of David. Judge – bless the Lord.

[Psal. 64. All.]

To the chief Musician – upright in heart shall glory.

[Psal. 131. All.]

A Song of Degrees – from henceforth & forever.

The History again demands our Attention.

1. Sam. ch. 26. All.

And the Ziphites came – returned to his Place.

The Complaint which we have newly read, of *David*, hunted as a *Partridge in the Mountains*, invites us here to insert a Psalm, which may seem to have an Eye to that Passage.

[Psal. 11. All.]

To the chief Musician – behold the Upright.

The History is now to be minded.

1. Sam. 27.1.

And David said, – escape out of his Hand.

Why should not the *Thirteenth* Psalm appear very proper here?

[Psal. 13. All.]

To the chief Musician – bountifully with me.

The History returns.

1. Sam. 27.2–12.

And David arose – my Servant forever.

1. Chron. 12.1–7.

Now these are they that came – Jeroham of Gedor.

Why should not the Psalm that complains of *David's* banishment, come in at this Place?

[Psal. 120. All.]

A Song of Degrees – they are for War.

The History is to take place again.

1. Sam. ch. 28. All. And, ch. 29. All.

And it came to pass – went up to Jezreel.

1. Chron. 12.19–22.

And there fell some of Menasseh – like the Host of God.

1. Sam. ch. 30. All. Ch. 31. All.

And it came to pass, when David – fasted Seven dayes.

1. Chron. ch. 10. All.

Now the Philistines – unto David the Son of Jesse.

2. Sam. ch. 1. All. Ch. 2. All. Ch. 3. All. Ch. 4. All. Ch. 5. to v. 10. –

Now it came to pass – Lord God of Hosts was with him.

1. Chron. ch. 11. All.

Then all Israel – the Mesobaite.

1. Chron. 12.23–40.

*And these are the Numbers – Joy in Israel.*⁵

At this Time of *Davids* Accession to the Throne, there are several Psalms, to come in, and entertain the People of God.

[Psal. 75. All.]

To the chief Musician – Righteous shall be exalt{ed.}

| [Psal. 101. All.]

[6v]

A Psalm of David. I will sing – City of the Lord.

The Union of the Tribes, under the Government of *David*, thus happily accomplished, seems to have been the Occasion of another Psalm, or two.

[Psal. 133. All.]

A Song of Degrees of David. Behold – Life forevermore.

[Psal. 21. All.]

To the chief Musician – praise thy Power.

The History is again in Motion.

2. Sam. 5.11–25.

And Hiram, King of Tyre – come to Gazer.

1. Chron. ch. 14. All.

Now Hiram King of Tyre – upon all Nations.

Is there not a Psalm to come in at this Place? We scarce can find a fitter for it?

[Psal. 118. All.]

O give thanks unto the Lord – Mercy endureth forever.

What if the *First Edition* of the Eighteenth Psalm should be here?

[Psal. 18. All.]

To the chief Musician – his Seed forevermore.

Lett the acceptable History now return unto us.

1. Chron. 13.1–4.

And David consulted – Eyes of all the People.

2. Sam. 6.1–11.

Again David gathered together – all his Household.

1. Chron. 13.5–14.

So David gathered – all that he had.

The Removal of the *Ark*, leads us to the Psalm, which begins with the Words, to be used, when the *Ark* Removed.

⁵ See Appendix A.

[Psal. 68. All.]

To the chief Musician, A Psalm or Song – blessed be God.

We are again dismissed unto the proceeding History.

2. Sam. 6.12. the former Part of the Verse.

And it was told King David, saying, The Lord hath blessed the House of Obed-Edom, and all that pertaineth to him, because of the Ark of God.

1. Chron. 15.1–14.

And David made him Houses – Ark of the Lord God of Israel.

It should seem that the Hundred and thirty-second Psalm was now composed; in which there is a Prayer, that the Priests being sanctified and accepted, there may be no more such a Breach, as the late one upon *Uzzah*, made upon them.

[Psal. 132. All.]

A Song of Degrees. Lord – his Crown flourish.

The History is again in its Progress.

2. Sam. 6. – 12–19.

So David went and – every one to his house.

1. Chron. 15.15–29. And, ch. 16. All.

And the Children of the Levites – bless his House.

Several Psalms were provided, as it should seem, for this great Occasion.

[Psal. 67. All.]

To the chief Musician. – shall Fear Him.

[Psal. 105. All.]

O give Thanks unto the Lord. – Lawes. Praise yee the Lord.

[Psal. 106. All.]

Praise yee the Lord. O give thanks – Amen. Praise yee the Lord.

[Psal. 96. All.]

O sing unto the Lord – with His Truth.

[Psal. 24. All.]

A Psalm of David. – King of Glory. Selah.

[7r] | The History is now to flow on.

2. Sam. 6.20–23.

Then David returned – the Day of her Death.

It may not be amiss, hereabouts to enjoy the Melody of the Hundred & twenty second Psalm.

[Psal. 122. All.]

A Song of Degrees, of David. – I will seek thy Good.

The History is again in its Course.

2. Sam. ch. 7. All. Ch. 8. All.

And it came to pass – Sons were cheef Rulers.

1. Chron. ch. 17. All. Ch. 18. All.

Now it came to pass – chief about the King.

We are directed here to bring in Two of the Inspired Psalms.

[Psal. 60. All.]

To the chief Musician, upon Shushan Eduth – our Enemies.

[Psal. 108. All.]

A Song or Psalm of David – our Enemies.

A Third may be added.

[Psal. 98. All.]

A Psalm. O sing – People with Equity.

The History again addresses us.

2. Sam. ch. 9. All. And ch. 10. All.

And David said – Ammon any more.

May there not a Psalm demand a Station here?

[Psal. 20. All.]

To the chief Musician – hear us when we call.

Now to the History again.

1. Chron. ch. 19. All.

Now it came to pass – Ammon any more.

2. Sam. ch. 11. All. And ch. 12.1–14.

And it came to pass – shall surely Dy.

The Repentance of David is the next Entertainment for us.

[Psal. 51. All.]

To the chief Musician. – upon thine Altar.

[Psal. 32. All.]

A Psalm of David, Maschil. – upright in heart.

The History does again feed us.

2. Sam. 12.15–23.

And Nathan departed – not return to me.

2. Sam. 12.26–31.

And Joab fought – unto Jerusalem.

1. Chron. 20.1–3.

And it came to pass – to Jerusalem.

2. Sam. ch. 13. All.

And it came to pass – he was dead.

2. Sam. 12.24, 25.

And David comforted – because of the Lord.

2. Sam. ch. 14. All.

Now Joab, the Son of – kissed Absalom.

2. Sam. ch. 15. All.

And it came to pass – came into Jerusalem.

We have just now seen *David* worshipping of God on the Top of Mount *Olivet*. Behold, the Psalm, which expresses the Frame of his Heart at that wonderful time.

[Psal. 3. All.]

A Psalm of David, when – upon thy People. Selah.

[8v] | Lett us observe how the Distress of *David* from the Rebellion of *Absalom* goes on in the History.

2. Sam. ch. 16. All.

And when David – and with Absalom.

We have seen *Shimei* cursing of *David*. Probably *David* chuses to turn the Name of *Kish*, (of whose Family *Shimei* was, as well as *Saul*,) into *Cush*, because he look'd upon *Shimei*, for his black and base Conditions, as an *Ethiopian*. If so, behold, now a Psalm upon him.

[Psal. 7. All.]

Shiggajon, of David – Most High.

We again take up the History.

2. Samuel. chap. 17.

Moreover, Achitophel said – in the Wilderness.

David is now near the Banks of *Jordan*, and there he composes diverse most agreeable Psalms.

[Psal. 42. All.]

To the chief Musician, Maschil – and my God.

[Psal. 43. All.]

Judge me, O God, – and my God.

[Psal. 5. All.]

To the chief Musician, – as with a Shield.

And here, he shoots the Darts of his Prayers against *Achitophel*, & the rest of the Conspirators.

[Psal. 55. All.]

To the chief Musician – I will trust in thee.

At some Time, while the Distress from the Rebellion of *Absalom*, was yett upon him, several other Psalms will fall in. Particularly.

[Psal. 31. All.]

To the chief Musician – hope in the Lord.

[Psal. 35. All.]

A Psalm of David. Plead – all the day long.

[Psal. 71. All.]

In thee, O Lord, – that seek my Hurt.

The History is now waiting for us.

2. Sam. ch. 18. All. Ch. 19. All. Ch. 20. All.

And David numbred – chief Ruler about David.

We have seen *David* returning to his House. There was a Psalm on that Occasion.

[Psal. 30. All.]

A Psalm & Song – thanks unto thee forever.

We have seen *Sheba* rebelling. Here comes in a Psalm, checking the People, for hearkening and hankering after a Kingdome that was but *Vanity*.

[Psal. 4. All.]

To the chief Musician – dwell in Safety.

The History now expects our further Attention.

2. Sam. 21.1–14.

Then there was a Famine – for the Land.

There is a Psalm, that seems to belong unto this Occasion.

[Psal. 65. All.]

To the chief Musician – they also sing.⁶

| Three Years of a *Famine* had passed; there was horrible Danger of their being [9r] made *Seven*, by a new Miscarriage, which is now to be related.

2. Sam. ch. 24. All.

And again the Anger of the Lord – from Israel.

1. Chron. ch. 21. All.

And Satan stood up, – Angel of the Lord.

There seems to have been a Psalm written on this Occasion.

[Psal. 91. All.]

He that dwelleth – my Salvation.

The History is again to be laid before us.

2. Sam. 21.15–22.

Moreover the Philistines – hand of his Servants.

1. Chron. 20.4–8.

And it came to pass – of his Servants.

2. Sam. ch. 22. All. And, ch. 23. All.

And David spake – thirty & seven in all.

1. Chron. 22.1, – 5.

Then David said – before his Death.

1. King. ch. 1. All.

Now, King David – go to thine house.

1. Chron. 22.6–19. & ch. 23.1.

Then he called for Solomon – King over Israel.

David having emergent Occasion by *Adonijahs* Conspiracy, first had *Solomon* anointed more hastily & privately. But then he intends a more public Solemnity

⁶ See Appendix A.

of Coronation, and calls together the Heads of the People. And, as at the first framing of *Israel* into a Commonwealth, in the Wilderness, the *Levites* were numbred for the Divine Service; there is now done something like it. Wonder not, that at the first Uncion of *Solomon*, we have *David* Bedrid, but at the second we have him Standing on his feet among his Princes. *Davids* Infirmitie was not proper Sickness, to ly by; tho' his Couch was the most common and proper Place for him; he might come forth upon Occasion.

1. Chron. 23.2–32. And, ch. 24. All. Ch. 25. All. Ch. 26. All.

Ch. 27. All. Ch. 28. All. Ch. 29.1. – 25.

And he gathered together – before him in Israel.

Would not here be the Place for some of our Psalms?

[Psal. 127. All.]

A Song of Degrees for Solomon. – Enemies in the Gate.

[Psal. 72. All.]

A Psalm for Solomon. Give – are ended.

And now the History brings us, to the End of the wonderful Reign of one of the bravest Men that ever lived in the World.

1. King. 2.1–11.

Now the Dayes – reigned he in Jerusalem.

1. Chron. 29.26–30.

Thus David the Son of Jesse – of the Countreyes.

1. Chron. 3. All.

Now these were the Sons of David. – and Anani, Seven.

[10v] | We may not yett have done with the *Sweet Psalmist of Israel*. The *Psalms* written by that excellent Man, are some of the best Composures, that ever our dark World was irradiated withal. We have had Opportunity to insert many of the *Psalms*, at those Joints of the Sacred History, to which they most properly belonged. There are many more *Psalms*, of which we either certainly know, or at least have a very fair and strong Presumption, that they were composed by *David*. But the Occasion thereof is not so fully known; our Conjectures thereabout are more various and uncertain. Wherefore here seems the fittest Place to insert those Heavenly Raptures.

The First Psalm.

The Second Psalm.

The Sixth Psalm.

The Eighth Psalm.

The Ninth Psalm.

The Tenth Psalm.

The Fourteenth Psalm.

The Fifty third Psalm.

The Fifteenth Psalm.

The Sixteenth Psalm.

The Nineteenth Psalm.
The Twenty Second Psalm.

The Ninety Fifth Psalm.
The Ninety Seventh Psalm.
The Ninety Ninth Psalm.
The Hundredth Psalm.
The Hundred & third Psalm.
The Hundred & Fourth Psalm.
The Hundred & Ninth Psalm.
The Hundred & Tenth Psalm.
The Hundred & Eleventh Psalm.
The Hundred & Twelfth Psalm.
The Hundred & Nineteenth Psalm.
The Hundred & twenty first Psalm.
| The Hundred & twenty fourth Psalm.
The Hundred & twenty fifth Psalm.
The Hundred & thirty fourth Psalm.
The Hundred & thirty fifth Psalm.

[11r]

⁷ See Appendix A.

The Hundred & thirty Eighth Psalm.

The Hundred & thirty Ninth Psalm.

The Hundred & forty fourth Psalm.

The Hundred & forty fifth Psalm.

There are moreover, some other *Psalms*, whereof it is more uncertain, whether *David* were the Writer of them; yea, for some of them, tis rather certain, that he was not the Writer of them. The *Date* of them, is also unknown. And therefore this may seem the Place most adapted for them.

The Forty ninth Psalm.

The Fiftieth Psalm.

The Sixty Sixth Psalm.

The Seventy third Psalm.

The Seventy Seventh Psalm.

The Seventy Eighth Psalm.

The Eighty first Psalm.

The Eighty Seventh Psalm.

The Eighty Eighth Psalm.

The Hundred & Thirteenth Psalm.

The Hundred & Fourteenth Psalm.

The Hundred & Fifteenth Psalm.

The Hundred & Seventeenth Psalm.

The Hundred & Twenty Eighth Psalm.

The Hundred & Thirtieth Psalm.

The Hundred & Thirty Sixth Psalm.

The Hundred & Forty Eighth Psalm.

The Hundred & Forty Ninth Psalm.

The Hundred & Fiftieth Psalm.

Some other Psalms yett remain, to be introduced at the proper Seasons & Places of them.

So we go on with the History.

1. King. 2.12–38.

Then satt Solomon – many dayes.

2. Chron. 1.1–13.

And Solomon – reigned over Israel.

1. King. 3.3–28.

And Solomon loved – to do Judgment.

1. King. ch. 4. All. And, ch. 5. All.

So King Solomon was – build the House.

2. Chron. 1.14–17. And ch. 2. All.

And Solomon gathered – sett the People awork.

1. King. 2.39–46. And, ch. 3.1, 2.

And it came to pass, – until those dayes.

Is there not a Psalm, to come in here?

[Psal. 45. All.]

To the chief Musician – praise thee forever & ever.

We are again in the History.

1. King. ch. 6. All.

And it came to pass – in building it.

1. King. 7.13–51.

And King Solomon sent – house of the Lord.

2. Chron. ch. 3. All. And, ch. 4. All.

Then Solomon began – were of Gold.

1. King. ch. 8. All.

Then Solomon assembled – Israel, His People.

| 2. Chron. ch. 5. All. And, ch. 6. All. And ch. 7.1–10.

[12v]

Thus all the Work – Israel His People.

Was not the *forty seventh Psalm*, employ'd at the bringing of the *Ark* unto its Place in the *Holy of Holies*; which was one Part of the Solemnity, just now related?

[Psal. 47. All.]

To the chief – greatly exalted.

The Temple is now finished. What follows?

1. King. 7.1–12.

But Solomon was building – Porch of the House.

1. King. 9.1–9.

And it came to pass – all this Evil.

2. Chron. 7.11–22.

Thus Solomon finished – all this Evil upon them.

1. King. 9.10–28.

And it came to pass – to King Solomon.

2. Chron. ch. 8. All.

And it came to pass – to King Solomon.

1. King. ch. 10. All.

And when the Queen of Sheba – by their Means.

2. Chron. 9.1–28.

And when the Queen – out of all Lands.

1. King. 11.1–40.

But King Solomon loved – death of Solomon.

Before we arrive to the Death of *Solomon*, it is fitt we should Receive the Three excellent Books, more precious than all the Gold which he fetch'd from *Ophir*, which he brought into the Churches Treasury.

[The Book of *Proverbs*.]

[The *Song of Solomon*.]

[The Book of *Ecclesiastes*.]

We now go on, unto the Death of *Solomon*. But we observe, That the *Chronicles*, make no more mention of his Fall, than of his Father *Davids*.

1. King. 11.41–43.

And the rest of the Acts – reigned in his stead.

2. Chron. 9.29–31.

Now the rest of the acts – in his stead.

1. King. 12.1–24.

And Rehoboam went – Word of the Lord.

2. Chron. ch. 10. All. And, ch. 11.1–4.

And Rehoboam went – against Jeroboam.

The History of the Kingdome of *Judah*.

2. Chron. 11.5–23. And, ch. 12. All. And, ch. 13. All.

And Rehoboam dwelt – Prophet Iddo.

1. King. 14.21–31. And, ch. 15.1–8.

And Rehoboam the Son – in his stead.

The Lamentations upon the Confusions befalling the House of *David*, seem to belong unto this Place.

[Psal. 89. All.]

Maschil, of Ethan – Amen and Amen.

There is another Psalm, that some do bring in hereabouts.

[Psal. 80. All.]

To the chief Musician – we shall be saved.

The History of the Kingdome of *Israel*.

1. King. 12.25–33. And ch. 13. All.

And ch. 14.1–20.

Then Jeroboam built Shechem – reigned in his stead.

The Kingdome of *Judah*.

1. King. 15.9–24.

And in the Twentieth Year – reigned in his stead.

2. Chron. ch. 14. All. Ch. 15. All. Ch. 16. All.

So Abijah slept – burning for him.

[13r] | The Kingdome of *Israel*.

1. King. 15.25–34. And, ch. 16.1–28.

And Nadab the Son of – in his stead.

The Kingdome of *Judah*.

1. King. 22.41–49.

And Jehoshaphat the Son – Jehoshaphat would not.

2. Chron. ch. 17. All. Ch. 18. All. Ch. 19. All. Ch. 20. All.

And Jehoshaphat his Son – to go to Tarshish.

Here comes in a Psalm, that seems fitted for the Dayes of *Jehoshaphat*.

[Psal. 83. All.]

A Song, or Psalm – over all the Earth.

The Kingdome of *Israel*.

1. King. 16.29–34. And, ch. 17. All. And, ch. 18. All.

And, ch. 19. All. And, ch. 20. All. And ch. 21. All.

And, ch. 22.1–40.

And in the thirty & eighth Year – reigned in his stead.

1. King. 22.51–53. And, 2. King. ch. 1. All. And, ch. 2. All. And ch. 3. All.

And, ch. 4. All. And ch. 5. All. And, ch. 6. All. And ch. 7. All. And, ch. 8.1–15.

Ahaziah the Son of Ahab began – reigned in his stead.

The Kingdome of *Judah*.

2. King. 8.16–29.

And, in the fifth Year of Joram – he was sick.

2. Chron. ch. 21. All. And, ch. 22.1–9.

Now Jehoshaphat – keep still the Kingdome.

The Kingdome of *Israel*.

2. King. ch. 9. All. And, ch. 10. All.

And Elisha the Prophet – twenty & eight Years.

The Kingdome of *Judah*.

2. King. ch. 11. All. And, ch. 12. All.

And when Athaliah – reigned in his stead.

2. Chron. 22.10–12. And, ch. 23. All. And, ch. 24. All.

But when Athaliah – reigned in his stead.

The Kingdome of *Israel*.

2. King. ch. 13. All.

In the Three & twentieth Year – Cities of Israel.

The Kingdome of *Judah*.

2. King. 14.1–7.

In the second Year – unto this Day.

2. King. 14.17–20.

And Amaziah the Son – the City of David.

2. Chron. ch. 25. All.

Amaziah was twenty & five – City of Judah.

The Kingdome of *Israel*.

2. King. 14.8–16.

The{n} Amaziah sent Messengers – reigned in his stead.

2. King. 14.23–29.

In the Fifteenth Year – reigned in his stead.

The Kingdome of *Judah*.

2. King. 15.1–7.

In the twenty & seventh Year – reigned in his stead.

2. Chron. ch. 26. All.

Then all the People – reigned in his stead.

The Kingdome of *Israel*, after the Death of *Jeroboam* II. suffered an *Interregnum* of above Twenty Years; contemporary with *Uzziah*, or, *Azariah*. And then;

2. King. 15.8–26.

In the thirty & eighth Year – Kings of Israel.

[14v] | It is Time for us now to call in the Writings of the Prophets. About this Time, we shall find several of the Prophets appearing, whose wonderful Sermons have been præsaved for the Use of the Church in the following Ages.

Hosæa is the First of the Prophets; He does himself tell us, ch. 1.2. *The Lord spake first by Hosæa*. As under an *Hosæa* did *Israel* first enter into the Land of *Canaan*, and under an *Hosæa* they were carried out. So an *Hosæa* is the *first* of the Prophets raised up, to upbraid their Unthankfulness for the former, and foretell their Calamity in the latter. He began in the Dayes of *Uzziah*; & somewhat before *Joel* and *Amos*. His Two first Chapters were in the Beginning of his Preaching. In the *Fourth* he seems to be parallel with *Joel* and *Amos*, and, [v. 3.] to foretel the *Locusts* as well as they. The rest of the Book will come in afterwards. For he continued until *Hezekiah's* Time; he was a Preacher Seventy Years; he saw the Fulfilments of his Prophecies on captived *Israel*.

[The Four first Chapters of *Hosæa*.]

The Word of the Lord, – their Sacrifices.

Next *Joel* appears; who foretels a *Northern Army of Locusts*, which entred indeed, at the *North* Part of the Land & carried all before them. A Type of those in the *Apocalypse*. He foretels also the Destruction of the Army of *Sennacherib*; against which the Lord caused His *Mighty Ones* come down, even His *Angels*, to destroy them in the Valley of *Jehoshaphat*. [Compare, Hos. 1.7.]

[The Book of *Joel*.]

At the Time that *Joel* entertains *Judah*, *Amos* addresses *Israel*; neither a *Tutor*, nor a *Scholar*, in the Schools of the Prophets, but a Shepherd of *Tekoah*, rudely bred, like the Fishers of *Galilee*; and yett a glorious Teacher in the Congregation of *Israel*.

[The Book of *Amos*.]

Contemporary with these doubtless, was *Obadiah*. The malicious Carriage of the *Edomites* against the *Jewes* mentioned by him, was either when *Jerusalem* was insulted by *Shishak*: [1. King. 14.25.] or, by the *Philistines* and *Arabians*; [2. Chron. 21.16, 7.] or, by *Joash* King of *Israel*. [2. Chron. 25.21.]

[The Book of *Obadiah*.]

It was now seasonable, to send out *Jonah*, to fetch in the *Gentiles*. He lived in the Time of *Jeroboam* II. Knowing, that the Coming in of the *Gentiles* would be the Casting off of the *Jewes*, he was lothe to be the Instrument of it. At *Joppa* he diverts from his Errand. [Compare the Temper of *Simon Bar-Jona* there, at the Tenth Chapter of the *Acts*.]

[The Book of *Jonah*.]

In the Reign of *Uzziah* does *Isaiah* also begin to prophecy.

[The Six first Chapters of *Isaiah*.]

The Vision of Isaiah – the Substance thereof.

We may now go on, with the Annals of the Two Kingdomes.
The Kingdome of *Judah*.

2. Chron. ch. 27. All.

Jotham was twenty five – reigned in his stead.

| 2. King. 15.32–38.

[15r]

In the Second Year of – reigned in his stead.

The Kingdome of *Israel*.

2. King. 15.27–31.⁸

In the two and fiftieth Year – Kings of Israel.

About this Time appears the Prophet *Micah*; who begins his Prophecy, with the Words, wherewith *Micajah* concluded his; and uses also the very Words of *Isaiah*, his Contemporary.

[The Two first Chapters of *Micah*.]

The Word of the Lord – the Head of them.

The Kingdome of *Judah*.

2. King. ch. 16. All.

In the Seventeenth Year – reigned in his stead.

2. Chron. ch. 28. All.

Ahaz was twenty Years old – reigned in his stead.

The Kingdome of *Israel*.

2. King. 17.1, 2.

In the twelfth Year – were before him.

In the Time of *Ahaz*, are the Abortive Attempts of *Rezin* and *Pekah* against *Jerusalem*; and several other things, which produced some {of} *Isaiah*'s Prophecies.

Isaiah. ch. 7. All. Ch. 8. All. Ch. 9. All.

And it came to pass, – stretched out still.

Isaiah. ch. 17. All.

The Burden of Damascus, – that rob us.

⁸ See Appendix A.

Isaiah. ch. 28. All.

Wo to the Crown of Pride – excellent in working.

And some of *Hosæa's* Prophecies were inspired about the Time of this Reign.

Hosæa. ch. 5. All. Ch. 6. All.

Hear yee this – of my People.

The Vexation suffered by *Ahaz* from the hired *Assyrian*, brought forth more of *Isaiah's* Prophecies.

Isaiah. ch. 10. All. Ch. 11. All. Ch. 12. All. Ch. 13. All.

And, ch. 14.1–27.

Wo unto them that – who shall turn it back?

We return to the Annals.

The Kingdome of *Judah*.

2. King. 18.1–8.

Now it came to pass – the fenced City.

2. Chron. ch. 29. All. Ch. 30. All. Ch. 31. All.

Hezekiah began to reign – and prospered.

Ahaz died some time after *Hezekiah* was upon the Throne. And in that Year, we have one of *Isaiah's* famous Prophecies; about *Hezekiah's* being a greater Plague to the *Philistines* (who despised *Ahaz*) than ever *Uzziah* had been before him; and about the Answer that should be given to the Terrible *Messengers* of the *Assyrians*, who were to come against *Jerusalem*.

Isaiah. 14.28–32.

In the Year that – shall trust in it.

About this Time several Chapters of *Hosæa* were uttered; even, while the *Ten Tribes* were not yett captived; but after that King *Hosæa* had entertained Amity with *Egypt*; and after the Expedition of *Shalman* wherein *Betharbel* was destroy'd, but before the second Expedition, wherein *Bethel* was to be destroy'd.⁹

Hosæa. ch. 7. All. Ch. 8. All. Ch. 9. All. Ch. 10. All. Ch. 11. All.

Ch. 12. All. Ch. 13. All. Ch. 14. All.

When I would have Healed. – fall therein.

[16v] | We go on with the Annals.

The Kingdome of *Israel*.

2. King. 18.9–12.

And it came to pass – nor do them.

2. King. 17.3–41.

Against him came up – unto this day.

Thus we are come to the Period of that unhappy Kingdome. It is probable, that while we are yett in the first Thirteen Years of King *Hezekiah*, there were uttered

⁹ *Shalman* may either refer to the Assyrian kings Shalmaneser IV or V or to Shalmanu, a Moabite ruler, who invaded Gilead (late 8th c. BCE), and to whom Hosea alludes in Hos. 10:14 (HBD).

the Prophecies of *Isaiah* against *Moab*; to be accomplished within Three Years, it is likely, either by *Salmanassar*, or by *Sennacherib*.¹⁰

Isaiah. chap. 15. All. Ch. 16. All.

The Burden of Moab – small and feeble.

Now also come in these other Prophecies of that admirable Prophet.

Isaiah. ch. 18. All. Ch. 19. All. Ch. 20. All. Ch. 21. All. Ch. 22. All.

Wo to the Land – Lord hath spoken it.

Isaiah. ch. 24. All. Ch. 25. All. Ch. 26. All. Ch. 27. All.

Behold, the Lord maketh – at Jerusalem.

Isaiah. ch. 29. All. Ch. 30. All. Ch. 31. All. Ch. 32. All. Ch. 33. All.

Ch. 34. All. Ch. 35. All.

Wo to Ariel – shall flee away.

It was owned, by the Men of *Jeremiahs* time, that the last Verse in the Third of *Micah*, was uttered in *Hezekiahs* Time. And here may come in probably all the rest of his Prophecies; even before *Sennacheribs* besieging of *Jerusalem*.¹¹ As the Birth of Christ, of a *Virgin*, was the *Sign* in *Ahaz's* Time, the Birth of Christ at *Bethlehem* is the *Sign* in *Hezekiahs*.

Micah. ch. 3. All. Ch. 4. All. Ch. 5. All. Ch. 6. All. Ch. 7. All.

And I said, – dayes of old.

In these Dayes also was *Nahum*, one of the Comforters of *Jerusalem*.

[The Book of *Nahum*.]

Now comes the famous Invasion, about the Circumstances whereof, there had been so many Prædictions.

2. King. 18.13–37. And, ch. 19. All.

Now in the fourteenth Year – reigned in his stead.

2. Chron. 32.1–23.

After these things – from thenceforth.

Isaiah. ch. 36. All. And, ch. 37. All.

Now it came to pass – reigned in his stead.

There seem to have been Three Psalms, calculated for the wonderful Occasion, which we have thus had before us.

[Psal. 46. All.]

To the chief Musician. – our refuge. Selah.

¹⁰ Mather refers to Shalmaneser V, king of Assyria (727–722 BCE), who sent his troops to the Mediterranean (726–722 BCE) to squash the uprising of Israel, Phoenicia, and an Egyptian satrapy in the Nile Delta; the fate of the city of Samaria, however, was not sealed until Sargon II (722–705 BCE), Shalmaneser V's successor, vanquished Samaria in 720 BCE. King Sennacherib (705–681 BCE) succeeded his father to the throne of Assyria and sent his armies against Hezekiah, king of Judah (727–698 BCE), whose rebellion against his Assyrian overlord led to Hezekiah's surrender and heavy fine (2 Kings 18:14–16) (*HBD*).

¹¹ During Sennacherib's punitive campaign against King Hezekiah, the Assyrian troops besieged Jerusalem (c. 701–700 BCE), but did not raze the city because Hezekiah capitulated.

[Psal. 48. All.]

A Song and Psalm – even unto Death.

[Psal. 76. All.]

To the chief Musician – Kings of the Earth.

[17r] | The Sickness of *Hezekiah* seems to have been, in the Time of the Invasion of *Jerusalem*.

2. King. 20.1–11.

In those dayes – dial of Ahaz.

Isaiah. ch. 8. All.

In those Dayes – house of the Lord.

Merodach sends Embassadors to *Hezekiah*. *Eser-haddon*, who succeed{s} *Sennacherib*, is offended at *Merodachs* Intimacy with *Hezekiah*, and thereupon takes *Babel* out of his hands; which had been already tributary to the Crown of *Assyria*. [Consider, Isa. 23.13.]

But see what occurs on this Occasion.¹²

2. Chron. 32.24, 25, 26.

In those Dayes – dayes of Hezekiah.

2. King. 20.12–19.

At that time – in my dayes!

Isaiah. ch. 39. All.

At that time – in my dayes.

The Annals are to be proceeded in.

2. King. 20.20, 21.

And the rest – in his stead.

2. Chron. 32.27–33.

And Hezekiah had – in his stead.

Towards the End of *Hezekiahs* Time, falls in a Chapter of *Isaiah*; after the King of *Assyria* had taken *Babel*.¹³

Isaiah. ch. 23.

The Burden of Tyre – durable Clothing.

And here will succeed, (we know not where better!) all the rest of his Incomparable Prophecies.

¹² According to 2 Kings 20:12–19 and Isa. 39:1–8, King Merodach-baladan of Babylonia (721–710, 703 BCE) sent his ambassadors to King Hezekiah in an effort to coordinate their uprising against their Assyrian overlord. This embassy, however, is more likely to have taken place sometime between 714–713 or 705–701 BCE, during Hezekiah's insurgency against Sargon II, or against Sennacherib, rather than during the reign of King Esarhaddon (681–669 BCE), who succeeded to the throne of Assyria when his father Sennacherib was murdered by Sennacherib's two other sons.

¹³ Mather here refers to Sennacherib's ouster of King Merodach-baladan of Babylonia, who had briefly regained control over Babylon in 703 BCE (*HBD*).

Isaiah. ch. 40. And, all the rest, unto the End of the Book.

Comfort yee – unto all flesh.

The Annals must again be look'd upon.

2. King. ch. 21. All.

Manasseh was – reigned in his stead.

2. Chron. ch. 33. All.

Manasseh was – King in his stead.

In these wicked Times, did *Habakkuk* prophecy. [Compare, 2. King. 21.10 with Hab. 1.5.]

[The Book of *Habakkuk*.]

We again take up the Annals.

2. King. 22.1, 2.

Josiah was Eight – or to the Left.

2. Chron. 34.1–7.

Josiah was Eight – returned to Jerusalem.

Now *Jeremiah* began to prophesy; A young Priest, and Prophet, for a young King. He was, like *Moses*, a Prophet unto the Church, for *Forty Years*.

Jeremiah. ch. 1.

The Words of Jeremiah – to deliver thee.

The Annals again call for our Perusal.

2. King. 22.3–20. And, ch. 23.1–28.

And it came to pass – Kings of Judah.

2. Chron. 34.8–33. And, ch. 35.1–19.

Now in the Eighteenth – Passeeover kept.

Many Chapters of *Jeremiahs* Prophecies come in here.

Jeremiah. ch. 2. All. – And so on to the End of ch. 12.

Moreover, the Word – saith the Lord.

In the latter times of King *Josiah*, did *Zephaniah* also appear.

| [The Book of *Zephaniah*.]

[18v]

The Annals come on again.

2. King. 23.29, 30.

In his dayes – fathers stead.

2. Chron. 35.20–27.

After all this – and Judah.

2. King. 23.31–37.

Jehoahaz was – his Fathers had done.

2. Chron. 36.1–5.

Then the People of the Land – Lord his God.

To the Time of *Jehoiakims* Reign, and about the Beginning of it, are to be assigned, certain Chapters in the Prophecies of *Jeremiah*.

Jeremiah. ch. 13. All. Ch. 14. All. Ch. 15. All. Ch. 16. All.
Ch. 17. All. Ch. 18. All. Ch. 19. All. Ch. 20. All.

Thus saith the Lord unto me – consumed with shame.

Jeremiah. ch. 22.1–23.

Thus saith the Lord – a Woman in travail.

Jeremiah. ch. 26. All. And, ch. 27.1–11.

In the Beginning – dwell therein.

The Annals.

2. King. 24.1. – In his dayes – *three Years.*

2. Chron. 36.6, 7.

Against him came up – temple at Babylon.

Jehoiakim, is first Fettered, and then Restored, by the King of *Babylon*; and so, begins the Captivity.

Dan. 1.1–17.

In the third Year of – Visions & Dreams.

Here several Portions of *Jeremiah* fall in.

Jeremiah. ch. 25. All.

The Word that came – His fierce Anger.

Jeremiah. ch. 46. All.

The Word of the Lord which came – wholly unpunished.

Jeremiah. ch. 48. All. And, ch. 49.1–33.

Against Moab – Man dwell in it.

Jeremiah. ch. 36.1–8.

And it came to pass – Lords house.

Jeremiah. ch. 45. All.

The Word that Jeremiah – whither thou goest.

Jeremiah. ch. 36.9–32.

And it came to pass – many like Words.

The Annals.

2. King. 24.1–4.

– *Then he turned, & rebelled against him, – not pardon.*

Daniel. 1.18–21.

Now at the End – King Cyrus.

Now the Prophecies.

Jeremiah. ch. 35. All.

The Word which came to – before me forever.

The Annals.

2. King. 24.5–7.

Now the rest of the Acts – King of Egypt.

2. Chron. 36.8.

Now the rest – in his stead.

| 2. King. 24.8, 9.

[19r]

Jehojachin was – had done.

2. Chron. 36.9.

Jehojachin was – Sight of the Lord.

The Prophecies again.

Jeremiah. ch. 22.24–30. And, ch. 23. All.

As I live saith the Lord – not be forgotten.

The Annals.

2. King. 24.10–26.

At that time – King of Babylon.

2. Chron. 36.10, – 13.

And when the Year – God of Israel.

Jeremiah. 52.1–3.

Zedekiah was – King of Babylon.

The Prophecies.

Jeremiah. ch. 24. All.

The Lord shewed me – to their fathers.

Jeremiah. 27.12–22. And, ch. 28. All. Ch. 29. All.

Ch. 30. All. Ch. 31. All.

I spake also to Zedekiah – any more forever.

Jeremiah. ch. 49.34–39. And, ch. 50. All. Ch. 51. All.

The Word of the Lord – Words of Jeremiah.

In the Fifth Year of *Jehojachins* Captivity, the Lord raises up *Ezekiel*, to be a Prophet unto His People at *Babylon*, as *Jeremiah* was unto His People at *Jerusalem*. He dates his Prophesy, from the *Thirtieth Year*, probably of his own Age. He was a Priest, and at that Age the Priesthood entred on their function; and at the same Age the Spirit of Prophecy comes upon him. A Type of our Saviour. [See Luk. 3.21, 22, 23.]

[The Twenty three first Chapters of *Ezekiel*.]

Now it came to pass – I am the Lord God.

The Annals.¹⁴

2. King. 25.1, 2.

And it came to pass – King Zedekiah.

Jeremiah. 39.1 and, ch. 52.4, 5.

In the ninth Year – besieged it. – K Zedekiah.

The Prophecies; [for *Ezekiel* in *Chaldea*, is told of the thing by the Lord, on the very day when it happened.]

Ezekiel. ch. 24. All. And, ch. 25. All.

Again in the Ninth Year – Vengeance upon them.

¹⁴ See Appendix A.

Jeremiah. ch. 21. All.
The Word which came – round about it.
 Jeremiah. ch. 47. All.
The Word of the Lord – hath He appointed it.
 Jeremiah. ch. 37. All.
And King Zedekiah – Court of the Prison.
 Jeremiah. ch. 32. All. Ch. 33. All. Ch. 34. All.
The Word that came – without an Inhabitant.
 Ezekiel. ch. 29.1–16.
In the tenth Year – the Lord God.
 Ezekiel. ch. 26. All. Ch. 27. All. Ch. 28. All.
And it came to pass – the Lord their God.
 Ezekiel. ch. 30.20–26. And, ch. 31. All.
And it came to pass – saith the Lord God.
 Jeremiah. ch. 38. All.
Then Shephatiah – Jerusalem was taken.
 Jeremiah. 39.15–18.
Now the Word – saith the Lord.

[20v] | The Annals.

2. King. 25.3–21.
And on the ninth day – out of their Land.
 2. Chron. 36.14–21.
Moreover, all the Chief – threescore & ten Years.
 Jeremiah. 39.2–14.
And in the eleventh – among the People.
 Jeremiah. 52.6–30.
And in the fourth – six hundred.

Upon the Misery thus befalling of *Jerusalem*, a whole Book is to be introduced.

[The Book of Lamentations.]

But lett the History proceed.

Jeremiah. 40. All. And, ch. 41. All.
The Word which came – in the Land.
 2. King. 25.22–26.
And as for the People – afraid of the Chaldees.
 Jeremiah. ch. 42. All. And, ch. 43. All. And, ch. 44. All.
Then all the Captains – sought his Life.
 Ezekiel. ch. 33. All.
Again, the Word of the Lord – among them.
 Ezekiel. ch. 32. All.
And it came to pass – saith the Lord God.

Ezekiel. ch. 34. All. Ch. 35. All. Ch. 36. All. Ch. 37. All. Ch. 38. All.
 Ch. 39. All. Ch. 40. All. Ch. 41. All. Ch. 42. All. Ch. 43. All.
 Ch. 44. All. Ch. 45. All. Ch. 46. All. Ch. 47. All.
 Ch. 48. All.

And the Word of the Lord came to me – Lord is there.

Ezekiel. ch. 29.17–21. And, ch. 30.1–19.

And it came to pass – that I am the Lord.

Daniel. ch. 2. All. Ch. 3. All. Ch. 4. All.

And in the second Year – able to abase.

2. King. 25.27. – 30.

And it came to pass – all the dayes of his Life.

Jeremiah. 52.31–34.

And it came to pass – all the dayes of his Life.

E're we have done with the Prophecies of *Jeremiah*, it will not be amiss, to enter an Observation, which a Passage in the Gospel of *Matthew* [Matt. 27.9.] will more than a little countenance. It is extremely probable, That the Six last Chapters of *Zechariah*, were indeed written by *Jeremiah*. It is there foretold, That the *Pride of Assyria shall be brought down*, and the *Sceptre of Egypt depart*. This was fulfill'd before *Zechariah's* time. It was very proper for *Jeremiah* to foretell it; but *Zechariah* could not. What is foretold about the Cities of the *Philistines*, agrees mightily with *Jeremiah's* Prædictions; but they will not suit *Zechariah's* time; in *Gaza* and *Askalon* here spoken of, were cutt off before *Zechariah's* Time, not before *Jeremiah's*. Moreover, *Zechariah* speaks of the Earthquake in *Uzziah's* Time, as a Matter, which his Hearers might remember they heard their Fathers tell of. *Jeremiah* might do so; *Zechariah* could not.

Zechariah. ch. 9. All. Ch. 10. All. Ch. 11. All. Ch. 12. All. Ch. 13. All. Ch. 14.
 All.

The burden of the Word – Lord of Hosts.

| Lett *History* and *Prophecy* united, now proceed.

[21r]

Daniel. ch. 7. All.

In the first Year – in my Heart.

Daniel. ch. 5. All.

Belshazzar the King – Years old.

Daniel. ch. 8. All. And, ch. 9. All.

In the third Year – upon the desolate.

There did belong a Psalm unto this Period.

[Psal. 137. All.]

By the rivers of Babylon – against the Stones.

We are now arriving to the Return from the Captivity.

2. Chron. 36.22, 23.

Now in the first Year – Lett him go up.

Ezra. ch. 1. All. Ch. 2. All. Ch. 3. All. Ch. 4. All.

Now in the first Year – King of Persia.

While *Daniel* was mourning for the Hindrance of the Temple, he is visited, (like *John* afterwards in *Patmos*,) with wonderful Revelations from heaven.

Daniel. ch. 10. All. Ch. 11. All. Ch. 12. All.

*In the third Year of Cyrus – the End of the Dayes.*¹⁵

We return to *Ezra*.

Ezra. 5.1.

Then the Prophets – unto them.

Behold, New Prophets appearing.

Haggai. ch. 1. All. And, ch. 2.9.

In the second Year – Lord of Hosts.

Zechariah. 1.1–6.

In the eighth Month – dealt with us.

Haggai. 2.10–23.

In the four & twentieth – Lord of Hosts.

Zechariah. 1.7–21. And, ch. 2. All. Ch. 3. All.

Ch. 4. All. Ch. 5. All. Ch. 6. All.

Upon the four & twentieth – Lord your God.

Ezra. 5.2–17. And, ch. 6.1–13.

Then rose up Zerubbabel – did speedily.

Zechariah. ch. 7. All. Ch. 8. All.

And it came to pass – God is with you.

Ezra. ch. 6.14–22. Ch. 7. All. Ch. 8. All.

Ch. 9. All. Ch. 10. All.

And the Elders of the Jewes – they had Children.

[The Book of *Nehemiah*.]

[22v] | In the Time of the Captivity, or after the Return from it, there seems to be the Time for several of the *Psalms*, in our Psalter, which have not yett had their Places assign'd unto them. Some of them seem to be as late as the Persecution from *Antiochus*.¹⁶

The Fourty-fourth Psalm.

The Seventy fourth Psalm.

The Seventy ninth Psalm.

The Eighty fifth Psalm.

The Hundred & second Psalm.

The Hundred & seventh Psalm.

The Hundred & sixteenth Psalm.

The Hundred & twenty third Psalm.

¹⁵ See Appendix A.

¹⁶ Mather refers to the Maccabean revolt (167–164 BCE) against the Seleucid King Antiochus IV Epiphanes (175–164 BCE), who tried to Hellenize Israel and set up Greek deities in the Temple of Jerusalem (*HBD*).

The Hundred & twenty sixth Psalm.

The Hundred & twenty ninth Psalm.

The Hundred & forty sixth Psalm.

The Hundred & forty seventh Psalm.

There does yett remain of the Old Testament, the Prophecy of *Malachi*; the Time whereof is a little uncertain; tho' it appears to have been a Time of Corruption; and of that Corruption whereof we read the beginning in the Book of *Nehemiah*.

[The Book of *Malachi*.]

It ha's been commonly thought, that *Malachi* was the last of the Writers, Inspired for composing the Books of our *Old Testament*. But there not being in his Prophecies, the least Remembrance of, or the least Reference to, the Illustrious Deliverance under Queen *Esther*, this renders it probable that it happened after his Time. We are now sure, That it happened in the Reign of *Artaxerxes* (who was the *Ahashuerus* mentioned in the Book of *Esther*;) and, the *Mordecai* concerned in it, was not (as it has been sometimes mistaken) one who bore a Part in *Jeconiah's* Captivity. *Epiphanius* and *Seder Olam*, and others therefore observe, that the Book of *Esther*, is the last canonical Book of the *Old Testament*. Yea, tis probable, the Book was written by a *Gentile* proselyted unto the Church of *Israel*; and in this regard, it is not at all the less agreeable Transition towards the *New Testament*.¹⁷

[The Book of *Esther*.]

¹⁷ The Book of Malachi is here dated to the period of Xerxes I, king of Persia (486–465 BCE), also referred to as Ahasuerus (Esth. 1:1; Ezra 4:6); Esther's uncle Mordecai is not the same as the one who returned with Zerubbabel to Jerusalem (Ezra 2:2; Neh. 7:7; 1 Esd. 5:8) upon their release by the Persian kings Cyrus II and his son Cambyses II, who ruled Babylonia from 539–530 BCE (2 Chron. 36:2; Ezra 1:1). Jeconiah, aka. Jehoiachin, king of Judah (597 BCE), was taken into Babylonian captivity when he surrendered to Nebuchadnezzar's forces (2 Kings 24:12; Jer. 22:24–30). The Book of Esther is now dated to the late Persian period (400–322 BCE) (*HBD*). In his *Panarion* (8.6.2–3), St. Epiphanius (c. 315–403), bishop of Salamis, lists the book of Esther as a canonical work, and so do Flavius Josephus (*Contra Apion* 1.8, *Antiquities* 11.6), Eusebius (*Historia ecclesiastica* 6.25.2, but cf. 4.26.14, in *NPNFii* 1:272, cf. 1:206), and the midrashic chronology *Seder Olam Rabbah* (part 3, ch. 29), the latter work being attributed to R. Yose ben Halafta (mid-2nd c. CE) of Sepphoris (*EJ*).

The NEW TESTAMENT,

in the true Order of
the History.

We begin with an Accurate *Harmony* of the *Gospels*.

A. M. I. *Lukes* Præface. The Angel foretels the Birth of *John Baptist*, unto
3999. his Father *Zacharias*; who is accordingly conceived.
September. Luk. 1.1–25.

Forasmuch – Reproach among Men.

Matth. 2.1–12.

Now when Jesus, – another Way.

X. The Life of the Holy Child saved, by a Flight into *Egypt*; while *Herod* murders the Infants of *Bethlehem*. Recalled *Joseph*, then retires for *Galilee*.

Matth. 2.13–22.

And when they were departed, – Parts of Galilee.

A. M. 4001. XI. *Joseph* stops at the Temple on the Road; and there meets with *Simeon*, and *Anna*. But then he settles at *Nazareth*.

December.

Luk. 2.22, – 39.

And when the Dayes, – their own City, Nazareth.

Matth. 2.23.

And He came, – a Nazarene.

A. M. 4013. XII. Our Saviour, at twelve Years of Age, disputes with the Doctors, at the Temple, and Returns to *Nazareth*.

April.

Luk. 2.40–52.

And the Child grew – with God and Man.

| A. M. 4032. XIII. *John* the Baptist, begins to Preach and Baptize; and our Saviour soon after begins His more private Ministry. [24v]

October.

Matth. 3.1–12.

In those Dayes, – unquenchable Fire.

Mar. 1.1–8.

The Beginning of – Holy Ghost.

Luk. 3.1–20.

Now in the Fifteenth Year, – John in Prison.

XIV. The Genealogy of our Saviour, by the Virgin *Mary*.

Luk. 3.23–38.

And Jesus Himself, – Son of God.

XV. The Evangelist *John* describes the glorious *Person* of our Saviour.

Joh. 1.1–14.

In the Beginning, – Grace & Truth.

A. M. 4032. XVI. The Testimony of *John* the Baptist, unto our Saviour.

December.

Joh. 1.15. – 28.

John bare Witness, – was Baptizing.

XVII. Our Saviour comes to *Bethabara*, where *John* was Baptizing; and *John* seeing the Descent and Mansion of the Spirit on Him, does firmly attest *Him* now to be the *Messias*.

Joh. 1.29–34.

The next Day, – Son of God.

A. M. XVIII. *John* points two of his Disciples to our Saviour; who fol-
4032. low Jesus; *Peter* also is now brought unto Him; and *Philip* and
February. *Nathanael*.

Joh. 1.35–51.

Again the next Day, – Son of Man.

XIX. A Marriage-Feast, in *Cana* of *Galilee*; where our Saviour turns *Water* into *Wine*: After which our Lord abides a while, at *Capernaum*.

Joh. 2.1–12.

And the Third day, – many days.

A. M. XX. Our Saviour goes up to the *Passeover*; & works Miracles there.
4032. Joh. 2.13–25.

April. *And the Jewes Passeover, – what was in Man.*

XXI. *Nicodemus* instructed by our Saviour, and amazed.

Joh. 3.1, – 21.

There was a Man, – wrought in God.

XXII. Our Saviour goes into *Judea*, and there Baptizes by His Disciples, whereof *John* being informed, rejoices.

Joh. 3.22–36.

After these things, – abideth on him.

A. M. XXIII. Our Saviour leaves *Judea*, & passing thro' *Samaria*, dis-
4032. courses with a Woman there.

August. Joh. 4.1, – 27.

When therefore, – talkest thou with her.

XXIV. The Woman brings a Multitude from the City to our Saviour; who now staies two Dayes at *Sychar*.

Joh. 4.28–42.

The Woman then, – Saviour of the World.

A. M. XXV. Our Saviour now returns into *Galilee*; and He heals the Sick
4033. Son of a Nobleman at *Capernaum*.

October. Joh. 4.43–54.

Now after two Dayes, – into Galilee.

A. M. XXVI. Our Saviour is Baptized of *John* the Baptist.
4033. Matth. 3.13–17.

January. *Then cometh Jesus, – am well-pleased.*

Mar. 1.9–11.

And it came to pass, – am well-pleased.

Luk. 3.21, 22.

Now when all, – am well-pleased.

[XXVII. The Temptation of our Saviour in the Wilderness.

[25r]

Matth. 4.1–11.

Then was Jesus, – ministred unto Him.

Mar. 1.12, 13.

And immediately, – ministred unto Him.

Luk. 4.1–13.

And Jesus being – for a Season.

A. M. XXVIII. *John* being in Prison, our Saviour goes to the Passeeover,
4033. and heals the Creeple at the Pool of *Bethesda*; upon which, the Jewes
April. charging Him with Profaneness & Blasphemy, seek His Life.

Joh. 5.1–47.

After this, – beleeve my Words.

XXIX. Our Saviour hearing of *Johns* Imprisonment, goes into *Galilee*, & begins His public Ministry there: expounds in the Synagogue at *Nazareth*, & being expelled from thence, goes to *Capernaum*.

Matth. 4.12, – 17.

Now when Jesus, – is at hand.

Mar. 1.14, 15.

Now after that, – the Gospel.

And Jesus went; – beyond Jordan.

Mar. 3.1–12.

And He entred again, – not make Him known.

Luk. 6.6–11.

And it came to pass, – do to Jesus.

A. M. XXXVIII. Our Saviour ascending the Mount, staves all night in a
4034. Chappel there. In the Morning He calls to Him several Disciples,
June. and chooses Twelve Apostles. He descends into the Plain, where
vast Multitudes waited for Him; to whom He dispenses His Healing
Miracles.

Matth. 5.1.

And seeing the Multitudes, – came unto Him.

Matth. 8.1.

When He was come down, – follow'd Him.

Mar. 3.13–19.

And he goeth, – betray'd Him.

Luk. 6.12–19.

And it came to pass, – healed them all.

XXXIX. The SERMON by the Mount.

Matth. 5.2–48.

and, 6. All.

and, 7. All.

And He opened His Mouth, – not as the Scribes.

Luk. 6.20–49.

And He lifted up His Eyes, – House was great.

XL. Our Saviour entring an House at *Capernaum*, heals the sick
Servant of a Centurion, whose Faith He wonders at.

Matth. 8.5–13.

And when Jesus was entred, – self-same hour.

Mar. 3. – 19–21.

And they went into – beside Himself.

Luk. 7.1–10.

Now when He had, – had been sick.

XLI. The next Day, at *Nain*, our Lord Raises the Dead Son of a
Widow on which His Fame increases mightily.

Luk. 7.11–17.

And it came to pass, – region round about.

A. M. XLII. *John* still in Prison, sends two Disciples to our Saviour, who
4034. does Miracles before them, and magnifies the Baptist.

Matth. 11.2–19.

Now when John, – of her Children.

Luk. 7.18–35.

And the Disciples of John – all her Children.

XLIII. Our Saviour makes Reflections on the Cities; where He had
wrought His Miracles.

August.

Matth. 11.20, – 30.

Then began He, – burden is light.

XLIV. *Simon* the Pharisee invites our Saviour to a treat; where a Woman who had been a Sinner, washes His Feet with her Tears.

Luk. 7.36–50.

And one of the Pharisees, – go in Peace.

A. M. XLV. Our Saviour preaches all about. He does cast out a Divil, and
4035. vindicates Himself against them, who accuse Him of doing it by
October. *Belzebub.*

Luk. 8.1–3.

And it came to pass, – their Substance.

Matth. 12.22–37.

Then was brought – be condemned.

Mar. 3.22–30.

And the Scribes, – an Unclean Spirit.

[27r] [XLVI. Our Lord answers them who desired, *A Sign.* His Mother and His Brethren, at the same Time are seeking to come at Him.

Matth. 12.38–50.

Then certain of the Scribes, – Sister & Mother.

Mar. 3.31–35.

There came then, – my Sister & Mother.

Luk. 8.19–21.

Then came to Him, – and do it.

A. M. XLVII. Our Saviour, preaches to Multitudes, from on board a
4035. Vessel, the Parable of the *Sower*; which He explains, & some other
November. Parables.

Matth. 13.1–35.

The same Day, – foundation of the World.

Mar. 4.1–34.

And He began, – to His Disciples.

Luk. 8.4–18.

And when much People, – seemeth to have.

XLVIII. Our Saviour now retires into an House; where He explains the Parable of the *Tares*; and adds diverse other Parables.

Matth. 13.36–53.

Then Jesus sent, – He departed thence.

XLIX. At the Evening, our Saviour takes a Vessel, to go over unto the other Side; and allayes an horrible Storm; at which the Passengers are amazed.

Matth. 8.18.

Now when, – other side.

Matth. 8.23, – 27.

And when He – obey Him.

Mar. 4.35–41.

And the same Day, – obey Him.

Luk. 8.22–25.

Now it came to pass, – obey Him.

L. Our Saviour arrives among the *Gadarens*; where He delivers two *Dæmoniacks*, from *Divels* which enter their Swine.

Matth. 8.28–34.

And when He was come, – out of their Coasts.

Mar. 5.1, – 20.

And they came over, – all Men did marvel.

Luk. 8.26. – 39.

And they arrived, – had done unto him.

LI. Our Saviour coming back to *Capernaum*, complains unto one who professed to follow Him, that He had not where to lay His Head; & He bids another to follow Him immediately.

While He spake, – into all the Land.

Mar. 5.21–43.

And when Jesus, – given her to eat.

Luk. 8.40–56.

And it came to pass, – what was done.

LIII. Two Blind Men are healed, and a Divil is cast out, by our Saviour; which yett is by the Pharisees ascribed unto *Belzebub*.

Matth. 9.27–34.

And when Jesus departed, – Prince of the Divels.

A. M. LIV. Our Saviour comes again to *Nazareth*, where they wonder at
4035. His Ministry & His Miracles; yett they Despise Him, for His being
December. Related unto mean People among them.

Matth. 13.54–58.

And when He was come, – their Unbeleef.

Mar. 6.1–6.

And He went out, – their Unbeleef.

LV. Our Saviour preaching about the Countrey, bids His Disciples pray for Labourers in the Harvest of God; and then sends out His Apostles with their Instructions.

[28v]

- Matth. 9.35–38. Matth. 10. All. Matth. 11.1.
And Jesus went about, – preach in their Cities.
 Mar. 6.6–13.
And He went round, – healed them.
 | Luk. 9.1–6.
Then He called, – healing every where.
- A. M. LVI. The Disciples of *John*, tell our Saviour of their Masters Death,
 4035. which was not long before. And there follow various Conjectures
 March. in the Court of *Herod*, concerning our Saviour.
 Matth. 14.1–12.
At that time, – told Jesus.
 Mar. 6.14–29.
And King Herod, – in a Tomb.
 Luk. 9.7–9.
Now Herod – desired to see Him.
- A. M. LVII. The Twelve Apostles return, with an Account of their Suc-
 4035. cesses. They retire, with our Saviour by Sea, to the Desert of *Beth-*
 April. *saida*. The Multitudes follow Him, and He Releevs them.
 Matth. 14.13, 44.
When Jesus, – healed their Sick.
 Mar. 6.30–34.
And the Apostles, – teach them many things.
 Luk. 9.10, 11.
And the Apostles, – need of Healing.
- LVIII. Towards Night, our Saviour feeds 5000 with 5 Loaves and
 2 Fishes. The Multitude would make Him a King; but He sends
 His Disciples away, & retires to a Mountain, where He spends the
 Night in Devotions.
 Matth. 14.15–23.
And when it was Evening, – He was there alone.
 Mar. 6.35–46.
And when the Day, – a Mountain, to pray.
 Luk. 9.12–17.
And when the Day – twelve basketts.
 Joh. 6.1–16.
After these things, – down unto the Sea.
- LIX. The Disciples are taken in a Storm at Sea; when our Saviour
 comes unto them, walking on the Water.
 Matth. 14.24–36.
But the Ship was now – perfectly whole.
 Mar. 6.47–56.
And when Even was come, – made whole.

Joh. 6.17–21.

And they entred into a – whither they went.

LX. The next day, the Multitude find our Saviour; who discourses to them, of Eating His *Flesh*, and of Drinking His *Blood*, by Faith in Him. At this, many Disciples leave Him; tho' the Twelve stay, whereof yett one was a Divel.

Joh. 6.22–71.

The Day following, – one of the Twelve.

LXI. Scribes and Pharisees come down from *Jerusalem*, who accuse the Disciples, of breaking the Traditions of the Elders: but our Saviour severely Rebukes the Scribes and Pharisees, for their pernicious Traditions.

Matth. 15.1–20.

Then came to Jesus, – defileth not a Man.

Mar. 7.1–23.

Then came together – defile the Man.

A. M.
4035.
May.

LXII. Our Saviour comes privately to the borders of *Tyre & Sidon*; and there He helps the *Dæmoniac* Daughter of an importunate *Canaanitess*.

Matth. 15.21–28.

Then Jesus went thence, – that very Hour.

Mar. 7.24–30.

And from thence He arose, – upon the Bed.

A. M.
4035.
June.

LXIII. Our Saviour passes along the Coast of *Decapolis*, to the Coast of the Sea of *Galilee*; where He retires, unto a Mountain, & heals a deaf Person; and then Multitudes more.

Matth. 15.29–31.

And Jesus departed, – God of Israel.

Mar. 7.31–37.

And again, – dumb to speak.

Then the Eleven Disciples – End of the World. Amen.

May. 14. CXLII. Our Lord appears to the Eleven Apostles at *Bethany*; and
as He is Blessing of them, He is carried up from them into the
Heavens.

Luk. 24.50–53.

And He led them out – blessing God. Amen.

Mar. 16.19, 20.

So then, after the Lord – Signs following. Amen.

| The *Harmony of the Gospels* is finished.

[37r]

The History of the *New Testament*, is to be carried on, with the *Acts
of the Apostles*. And we have no Occasion to make any Stop, till we
come to the *Eleventh* Verse of the *Eighteenth* Chapter.

Act. 1.1 – as far as to, Act. 18.11.

THE FORMER TREATISE, – GOD AMONG THEM.

A.M. 4055. While the Apostle *Paul* was thus at *Corinth*, he writes his first

A.D. 52. Epistle to the *Thessalonians*.

[The first Epistle to the *Thessalonians*.]

Lett us now resume the History of the *New Testament*. We find the
Apostle here going on with his Ministry.

Act. 18.12–17.

And when Gallio – none of those things.

A.D. 53. The Apostle *Paul* having Opportunity to continue still a while
at *Corinth*, proceeds to address the *Thessalonians* with a Second
Epistle.

[The Second Epistle to the *Thessalonians*.]

Lett us go on with the History of the *New Testament*. The Apostle
goes away for *Ephesus*, and thence to *Jerusalem*, & so to *Antioch*; &
thence thro’ *Phrygia*, and *Galatia*, & so again to *Ephesus*.

Act. 18.18–28.

And Paul after this – Jesus was Christ.

Act. 19.1–20.

And it came to pass, – and prevailed.

- A. D. 57. Now comes in the Epistle to the *Galatians*, of whom the Apostle, since his departure from them, understood some things that were very uncomfortable.

[The Epistle to the *Galatians*.]

Here we again take up the History of the *New Testament*.

Act. 19.21, 22.

After these things – for a Season.

About this Time, arose a Schism in the Church of *Corinth*; which produced an excellent Epistle unto them.

[The First Epistle to the *Corinthians*.]

- A. D. 57. *Apollos* being at this time lothe to go unto *Corinth*, but choosing to go unto *Crete*, our Apostle takes this Opportunity, to write unto *Titus*.

[The Epistle to *Titus*.]

The History of the *New Testament* goes on. *Demetrius* makes a Disturbance at *Ephesus*.

Act. 19.23–41.

And the same time – dismissed the Assembly.

Act. 20.1.

And after – into Macedonia.

- A. D. 58. The Apostle now has Occasion and Opportunity, to write again unto the *Corinthians*, who wondred, that he had not yett come unto them.

[The Second Epistle to the *Corinthians*.]

The Apostle after this comes from *Macedonia*, into *Greece*, and there staves Three Months.

Act. 20.2, 3.

And when he had gone – thro' Macedonia.

- [38v] | A. D. 58. About this Time the Apostle writes his first Epistle to *Timothy*, who was then at *Ephesus*.

[The First Epistle to *Timothy*.]

- A. D. 58. The Apostle, in the Time of these three Months, visits *Athens* and *Corinth*. And from *Corinth* he writes his excellent Epistle to the *Romans*; where he had been by one thing or another, hindred from visiting, as he intended.

[The Epistle to the *Romans*.]

The History of the *New Testament* proceeds. The Apostle, in his Journey, for *Syria*, to carry the Alms of the *Gentiles* to the Christian *Jewes* in *Judea*, stops a while at *Troas*, and afterwards makes another Stop at *Miletus*; at last he comes to *Jerusalem*.

Act. 20.4–38.

And there accompanied him – unto the Ship.

Act. 21. All.
 Act. 22. All.
 Act. 23. All.
 Act. 24. All.
 Act. 25. All.
 Act. 26. All.
 Act. 27. All.
 Act. 28. All.

It is not unlikely, that about this Time, the Epistle of *James*,¹⁹ might be written. The High-Priesthood being by means of King *Agrippa*, brought into the hands of *Ananias*, a Sadducee; this New High Priest, before the Arrival of *Albinus*, whom *Nero* sent to succeed *Festus*, the *Roman* Procurator, caused our *James* to be martyred. And it is probable, that *James* wrote his Epistle, not long before his Martyrdome.²⁰

[The Epistle of *James*.]

A. D. 62. *Paul* is now a Prisoner at *Rome*, where he converts *Onesimus*, and sends by him an Epistle, to his Master *Philemon*, at *Colosse*.

[The Epistle to *Philemon*.]

Ephphroditus returning to the *Philippians*, who had sent by his hand unto *Paul* at *Rome*, some Effects of their Kindness, he now writes by him an Epistle to them.²¹

A. D. 62. [The Epistle to the *Philippians*.]

About the same time, the Apostle writes to the *Colossians*.

A. D. 62. [The Epistle to the *Colossians*.]

Near of the same Date, is the Admirable Epistle of our Apostle to the *Ephesians*.

[The Epistle to the *Ephesians*.]

A. D. 62. Much about the same time we may suppose written that Incomparable Epistle to the *Hebrewes*.

[The Epistle to the *Hebrewes*.]

¹⁹ See Appendix A.

²⁰ If Flavius Josephus (*Antiquities* 20.9) is reliable, King Herod Agrippa II (44–93 CE) was instrumental in installing Ananias (47–58 CE), son of Nedebaeus, as high priest of Jerusalem (*HBD*). According to Josephus (*Antiquities* 20.9) and Eusebius (*Historia ecclesiastica* 2.23.1–25, in *NPNFii* 1:125–28), James, brother of Jesus, was put to death by the priests of Jerusalem several years before Roman Emperor Nero (37–68 CE) sent Albinus to succeed Porcius Festus as Roman procurator of Judea (c. CE 62).

²¹ Ephphroditus (Epaphroditus), an early Christian, came to Paul with gifts from the Philippians (Phil. 2:25–30, 4:18, 23).

The Apostle *Peter* now being at *Babylon*, it seems to be about this Time, that he wrote his Two Epistles.

A. D. 65. [The First Epistle of *Peter*.]

[The Second Epistle of *Peter*.]

Not long after this, we may date the Epistle of *Jude*, which agrees very much with the Second Epistle of *Peter*.

[The Epistle of *Jude*.]

And soon after this time seems to have been the Second Epistle of *Paul* to *Timothy*; from *Rome*, to which he had made a second Visit, and was now in close Imprisonment here.²²

A. D. 67. [The Second Epistle of *Timothy*.]

The Epistolary Works of Paul, the Servant of Christ, are ended.

There now remain but Four Books of the Bible more.

A. D. 96. [The Three Epistles of *John*.]

[The *Revelation*.]

²² See Appendix A.

2369.

Q. In the *Introduction* of our *Illustrations*, there are several Points well worthy to be enquired after.

And first of all; The *Division* of the *Bible* into *Chapters* and *Verses*, *whence* was it, and *when*, and *what*?

A. First, for the *Old Testament*.

The *Pentateuch* in Hebrew, was Divided into Fifty Four Parts, called, *Parasha's*, or *Sections*, and, *Seders*, or *Orders*.²

¹ Mather's synoptic history [39r–42v] of the chapter-and-verse divisions of the Bible is cribbed from the Anglican divine Samuel Clark (1626–1701), rector of Grendon-Underwood, in the County of Bucks, and author of several works on biblical philology. Clark's *Divine Authority of the Holy Scriptures* (1699) was highly esteemed, and Mather here excerpts discourse II, appearing under a separate title *An Exercitation concerning the Original of the Chapters and Verses in the Bible*, which also has a 1698 imprimatur and a separate pagination. A note of caution may here be in order lest we judge Mather's use of sources as intellectual dishonesty and plagiarism – conventions that were not as narrowly defined in his day as they are today. In his efforts to reconcile the flood of new, if not dangerous, discoveries in the natural sciences and philosophy, with conservative standards of interpretations, Mather is less concerned with the identity of the authors of his sources than with the significance of their discoveries: not *who*, but *what*. In this respect, Mather follows the centuries-old tradition of compiling catenae, florilegia, or anthologies of biblical commentaries much prized by the schoolmen throughout the ages. A good case in point is *Synopsis Criticorum Aliorumque S. Scriptura Interpretum*, 5 vols. (1669–76), a massive digest of biblical interpretations by the English nonconformist minister Matthew Poole (1624–79), whose commentary is as useful today as the print is taxing to the eyes. Like Poole and many others before him, Mather distills the essence of his sources, but identifies his authors or titles, if at all, in abbreviated form in marginal annotations. In a letter to his London Pietist friend Anthony William Boehm (Aug. 6, 1716), Mather freely confesses that “BA” represents the glory of other men's achievements but here made serviceable to the Church: “There being so little of my own in that Work [“Biblia Americana”], I may use the more Freedome, in giving you some Account of it. Yea, I may venture to say this: I can without Vanity assure you, that the Church of God, has never yet had so rich an Amassment of the most valuable Things together tendered unto it” (*Diary* 2:413). In his *Christian Philosopher* (1721/22), composed during the second decade of the 18th century, Mather also acknowledges his debt: “’Tis true, some Scores of other *Philosophers* have been consulted on this Occasion; but an *Industry* so applied, has in it very little to bespeak any *Praises* for him that has used it: He [Mather] earnestly renounces them, and sollicit, that not only *he*, but the *Greater Men*, who have been his *Teachers*, may disappear before the Glorious GOD, whom these *Essays* are all written to represent as *worthy to be praised*, and by whose *Grace we are what we are*; nor have we *any thing but what we have received* from Him Most certainly there can be very little Pretence to an I, or ME, for what is done in these *Essays*, ’*Tis done*, and entirely, *by the Help of God*: This is all that can be pretended to” (*Christian Philosopher*, “Introduction” 10). All citations from Mather's *Christian Philosopher* are from W. U. Solberg's excellent 1995 edition. See also Solberg's “Science and Religion.”

² This passage appears in Clark's *Divine Authority*, Discourse II, chapter ii, page 2, paragraph 2. Hereafter Clark II.ii.2.2. Samuel Mather, Cotton Mather's brother, says much the

One of these *Portions* was Read *Every Sabbath Day*, in their Synagogues. Thus they dispatch'd the Reading thereof, in a Year; for they twice joined, a Couple of the lesser Parts, in that Exercise. And when they had Read the *Last*, they began with the *First* again, that they might not seem to be glad, when they had ended it.³

Compare, Act. 15.21. and you will date this Custome, at least as high as the dayes of *Ezra*.⁴

But when *Antiochus* had committed his Barbarous Outrages, & Forbidden the Reading of the *Law*, either publicly or privately, on Pain of Death, here-upon they betook themselves, to Reading the *Prophets*; and they made Choice of such Portions from them, as had some kind of Affinity with, or Correspondence to, those of the *Law*, in the room of which they were substituted. E.g. Instead of that *Section* in the *Law*, concerning the *Creation of Heaven & Earth*, they chose, Isa. 42.5. which begins thus; *Thus saith the Lord God, Hee that created the Heavens*.⁵

These Portions of the *Prophets*, they called, *Haphtaroth*, or, *Dismissions*; because, when they were ended, the congregation was *Dismissed*. Now, when once they had begun thus to Read the *Prophets*, they continued the Exercise ever afterwards, together with the Reading of the *Law* tho' the Occasion ceased.⁶

None of these *Divisions* were distinguished by *Numbers* and *Figures*; but they were called by the Name of the first Word, or first Remarkable Word, in each Division. The first Section of *Genesis*, they called, *Parashah Bereschith*, the second, *Parashah Noach*. Thus *Kimchi*, on Joel. 3.19. *So did Isaiah*, saith hee, *in the Parashah Kirbu*; that is in the Section, which, (Isa. 24.1.) begins with *Kirbu*.⁷

same in his *Vindication of the Holy Bible* (1723), bk. 1, ch. 7, §§ 10–11. pp. 61–63, and may have relied on “BA” for many aspects of his own book.

3 Clark II.ii.2–3.2–3. See also Richard Simon, *Critical History of the Old Testament* (1682), bk. 1, ch. 26, p. 162.

4 Clark II.ii.3.2. Clark's own source is *Tiberias, sive, commentarius masorethicus triplex* (1618/19), a commentary on the Masorah, by Johannes Buxtorf, the elder (1564–1629), eminent professor of Hebrew at Basel. Ezra lived in the mid 5th–4th centuries BCE.

5 Clark II.ii.4.5. Antiochus IV (Epiphanes), brother of Seleucus and king of Syria (175–164 BCE) forbade Jewish customs in 167 BCE and tried to suppress Judaism by advocating Hellenist deities, culture, and language. (*EJ*)

6 Clark II.ii.5.5. The customs regarding the *Haphtaroth* or *dismissions* read among the Ashkenazic and Sephardic Jews differ in several places, yet are the same for Genesis. The Haphtarah Bereishis is Isa. 42:5–43:10; Haphtarah Noach, Isa. 54:1–55:5; Lech Lecha, Isa. 40:27–41:16; Vayeira, 2 Kings 4:1–37; Chayei Sarah, 1 Kings 1:1–31; Toldos, Mal. 1:1–2:7; Vayeitzei, Hosea 11:7; Vayishlach, Obad. 1:1–21; Vayeishev, Amos 2:6–3:8; Mikeitz, 1 Kings 3:15–4:1; Vayigash, Ezek. 37:15–28; Vayechi, 1 Kings 2:1–12.

7 Clark II.ii.5–6.6. The first section begins with Gen. 1:1–5:28; the second, Gen. 5:29–9:29. See also *EJ*: “Masorah” (1.2.1.2). Rabbi David Kimchi, also Kimhi (*Radak*) (c. 1160–c. 1235) was a renowned Hebrew grammarian and exegete of Narbonne, France. Clark refers to Kimchi's commentary on the later prophets, reprinted in the Rabbinic Bible, edited by Jacob ben-Chajim, in Venice (1525, 1548). Clark here relies on Johannes Buxtorf's famous edition *Biblia Hebraica* (1618–19). For Radak's commentary (Gen. 4:19, Isa 24:1), see *Mikraoth Ged-*

The Division of the Bible, into *Chapters*, is a late Invention, and not more than four or five hundred Years old. *Genebrard*, in his *Chronology*, saies, It was about the Year 1240. and it seems to bee the Invention of the *Schoolmen*, hee saies, *Qui cum Hugone Cardinali, concordantiarum fuere Authores*. And *Sixtus Senensis* agrees with him. Hee saies, *Till within these Five Hundred Years*, there was no Place of Scripture quoted by Number, but only the *Psalms*, which from the Infancy of the Church were so quoted, as appears by the *Acts* of the Apostles. The Numbers of *Chapters*, hee saies, which now appear, as well in the *Greek*, as in the *Hebrew* Copies, are taken out of our Latin Books. *Austin* saies, Hee wrote, from the Beginning of *Genesis*, to the Expulsion of our First Parents, out of Paradise. And *Gregory*, saies, Hee expounded, from the Beginning of the Book of *Kings*, to the Anointing of *David*, to be King. Instead of which, wee should thus express it; *On the three First Chapters of Genesis*; And, *On the Fifteen first Chapters of the First Book of Kings*.⁸

Now, tho' these Writers, do seem Ignorant of the *Author* of the Invention, *Bale* tells us, That *Stephen Langton*, A. B. C. was the Person, *Qui omnes Bibliorum Libros per capita distinxit, quibus adhuc Ecclesia utitur*. And the like is affirmed, by *Weever* in his *Funeral Monuments*. This *Langton* died, A. C. 1228. We shall elsewhere bring you another *Author*.⁹

oloth: Twelve Prophets (1:112–13) and *Isaiah* (1:190). There are twelve *Parashioth* or sections in *Genesis*: *Parashas Bereishis* begins at Gen. 1:1; *Parashas Noach* at Gen. 6:9; *Parashas Lech Lecha* at Gen. 12:1; *Parashas Vayeira* at Gen. 18:1; *Parashas Chayei Sarah* at Gen. 23:1; *Parashas Toldos* at Gen. 25:19; *Parashas Vayeitzei* at Gen. 28:10; *Parashas Vayishlach* at Gen. 32:4; *Parashas Vayeishev* at Gen. 37:1; *Parashas Mikeitz* at Gen. 41:1; *Parashas Vayigash* at Gen. 44:18; and *Parashas Vayechi* at Gen. 47:28.

⁸ This paragraph is a representative example of the classical and biblical scholarship of the period, in which layer upon layer of paraphrases and citations at second, third, even fourth hand are integrated into the biblical commentaries of the time. Mather's immediate source is Clark (II.iii.7–8). Next, Clark's primary source is Gilbert G  nebrard (1535–97), a French Benedictine exegete and Hebrew scholar at the Coll  ge Royal, later archbishop of Aix-en-Provence, whose *Chronologia Hebraeorum quae Seder Olam Rabba inscribitur* (1578), lib. 4, p. 644, Clark cites paraphrastically. On the next layer, G  nebrard refers to Philibert Hugonet (Hugo) (d. 1484), French Benedictine, Cardinal of Ma  on; and to Sixtus Senensis (1520–69), an Italian converso of Sienna, Franciscan, and later, Dominican preacher, Hebrew scholar, and exegete. Clark identifies in his margin book 3 of Sixtus Senensis's *Bibliotheca Sancta* (1566), a compendium to the Bible in 8 books. Clark's references to Austin and Gregory (via G  nebrard) are to St. Augustine of Hippo (354–430) and either to the Cappadocian Father St. Gregory of Nazianzus (329–89) or to the Cappadocian Bishop St. Gregory of Nyssa (c. 330–95). At any rate, Mather's point is to illustrate the Fathers' cumbersome method of identifying biblical references before the numerical chapter-and-verse-divisions of the Bible were established. Clark's Latin citation from G  nebrard's *Chronologia* (lib. 4, p. 644) is also translated by Clark: "those who, together with Hugo Cardinalis, were the Authors of the Concordance" (*Divine Authority* II.iii.8). However, Mather merely excerpts a single line, which he leaves untranslated. See also Johannes Leusden, *Philologus Hebraeus* (1657), Diss. 3,    4, pp. 20–21. For a similar account, see Richard Simon, *Critical History of the Old Testament* (London, 1682), bk. 1, ch. 28, p. 183.

⁹ Clark, *Divine Authority* (II.iii.8–9). John Bale (1495–1563), bishop of Ossory, credits Stephen Langton (d. 1228), archbishop of Canterbury, for having introduced the division of

From the *Chapters*, Lett us come to the *Verses*, of the Old Testament. Now, of these, the latest Original, that can be assigned, is, the Time and Work of the *Tiberiensian Masorites*, about 500 Years after our Saviour. The *Masoretical Notes*, at the End of every Book in the Bible, recite the *Numbers* of the *Verses* in every Book. Tho' indeed, they can be presently convicted of gross Mistakes in their Computations; yea, sometimes their *Total Summs*, are not such as their own *Particulars*, would produce, in the *Arithmetic* of Children. And the Mistakes cannot be in the Transcribers, or Copiers, because the Accounts are express'd, as well by Words at length, as by a *Siman*, [σημείον] or, Character. Tis plain the *Verses* were then in Use: yea, a Passage of the *Mishna*, written, A. D. 100, plainly mentions them. But indeed, the *Verses* of the *Old Testament*, are as old as the Testament itself, & of the same Date, with the Books themselves, that compose it.¹⁰

For, first, it is evident, that the *Accents* depend on the *Verses*; [for Instance, every one of them ending with a *Silluk*;) The *Accents* could not be before the *Verses*, nor the *Verses* before the *Accents*.¹¹

And wee may add, That certain Parts of the Scripture, do plainly distinguish themselves into *Verses*, if there were no *Accents* to do it; as, the most of the *Proverbs*, & the *Canticles*, and the most of the Book of *Job*, also, with other Characteristicks; And the *Alphabetical Parts* of Scripture, namely, Psal. 25, 34, 37, 111, 112, 119, 145. And Prov. 31.10–31. And all the Book of the *Lamentations*, except the last Chapter.¹²

biblical books into chapters and verses. The Latin citation from Bale's *Illustrium Maioris Britanniae Scriptorum* (1548) appears in the second section, "Centuria Secunda" (folio 102v). Clark's translation reads, "who distinguish all the Books of the Bible into Chapters, as they are now used in the Church" (Clark II.iii.9.). See also the anonymous work *Stephen Langt(h)on, Arch-bishop of Canterbury, who died in the reign of Henry III. Ann Dom. 1228. was the first that distinguisht the chapters of the Bible into that order and number as we now use them* (London, 1655). John Weever (1576–1632) confirms this statement in his *Ancient funerall monuments* (1631) 220. Samuel Mather says much the same in his *Vindication* (bk. 1, ch. 7, § 9, pp. 61–62).

¹⁰ Clark II.iv.10–16.1–4. Clark's primary source is Johannes Buxtorf's commentary on the Masorah, *Tiberias* (1618/19) and the Masoretic notes in "the last edition of Athias's Bible, printed A.D. 1667" (II.iv.15.4.), the famous Hebrew Bible *Biblia Sacra Hebraica correctata* (Amsterdam, 1661), printed by the Dutch printer Rabbi Joseph ben Abraham Athias (d. 1700). Clark refers to the second edition *Biblia Sacra Hebraica correctata* (Amsterdam, 1667), whose printing was supervised by the renowned Hebrew scholar Johannes Leusden. The Tiberian Masorites of the post-Talmudic period (6th c. CE) contain a system of vocalization and accentuation of the Hebrew language in the form of notations to facilitate pronunciation and meaning of Hebrew words (EJ: *Masorah*). See also Jacques Basnage's *History of the Jews* (1708), bk. 3, ch. 9, pp. 181–84. And the Mishnah, redacted by Rabbi Judah ha-Nasi (c. 135–c. 220), is a collection of rabbinic laws (Oral Torah) arranged in 66 tractates gathered in 6 divisions under the headings of agriculture, appointed times, women and marriage laws, injuries and damages, ritual laws, and purification.

¹¹ Clark II.vi.21.1. A "*silluk*" is a "period" or "pause." See also Richard Simon's *Critical History of the OT* (bk. 1, ch. 28, p. 175).

¹² Clark II.vi.26–27.6.

Secondly, The *Vowels*, depend on the *Accents*. The *Accents* make a Change in the *Vowels*, on Multitudes of Occasions. Every *Hebrew Grammar*, gives you the Rules of this *Permutation*.¹³

Yea, Thirdly; The *Consonants* depend on both the *Vowels*, and the *Accents*. On the *Vowels* they depend, both in Point of *Pronunciation*, & of *Signification*.¹⁴

| Now, the *Verses*, in all our Translations of the Bible, are exactly the same with those in the *Hebrew*. Only, the Titles of the *Psalms*, are counted *Verses* in some, & not in others. And all our *English Bibles*, (as well as the *French*, & the *Dutch*,) begin the Sixty fourth Chapter of *Isaiah*, in that which according to the *Hebrew*, is the Middle of the last *Verse* of the Sixty third Chapter. And our *English*, in I. Sam. 20.42. join those Words, [*And hee arose*, etc] unto the forty second *Verse*; whereas in all the *Hebrew Bibles*, they are a distinct *Verse* of themselves; & so they should be in our *English*.¹⁵ [40v]

The Number of the *Verses*, was not express'd in any *ancient Bibles*, any otherwise, than that every *Fifth Verse* had the *Hebrew Letter* standing for it. The first Bible printed with *Verses*, was that of *Pagnines*, printed at *Lions*, A. D. 1528. The *New Testament* was also then divided into *Verses*; but much longer ones, than those that are now used among us. E.g. The first of *Mark*, which according to our Division, ha's *Forty five Verses*, ha's there but *Fifteen*. The second of *Mark* there, had but *Nine*; whereas with us, it ha's *Twenty eight*.¹⁶

As for the *New Testament*, it was in the elder Times, divided with larger TITAOI, and lesser, κεφαλαια [tho' sometimes these Divisions were promiscuously called by that latter Name.] But the least of the Divisions then used, was that of στίχοι, i.e. *Rowes*; *Ranks*, or *Files*; which do seem to be no other than the *Lines* of the Writing; which contained commonly about Six Words, more or less.¹⁷

The *modern Division* of the *New Testament*, was made, as H. *Stephens*, in his Preface to his *Greek Concordance* tells us, by his Father, *Robert Stephens*; and that hee did it in a Journey, from *Paris* to *Lions*. Hee adds, That most People said, Hee was unadvised to bestow his Time & Pains about that which was altogether

13 Clark II.ix.30–31. Clark refers to the rules outlined in Johannes Buxtorf's *Thesaurus Grammaticus* (1603), lib. 1. c. 5. John Davis, headmaster, published *A Short Introduction to the Hebrew Tongue* (1656), a translation and epitome of Buxtorf's *Hebrew Grammar*. The best recent analysis of Buxtorf's contribution to Christian Hebraism is S. Burnett's *From Christian Hebraism* (1996).

14 Clark II.x.31.

15 Clark II.vii.27–29.1–2.

16 Clark II.vii.28.2. Sanctes Pagninus (1466–1541) was an Italian Dominican, a renowned Hebraist, and a professor of oriental literature at the Pontifical College in Rome. His *Veteris et novi Testamenti nova translatio* (1528) was the first Latin Bible printed that inserted numbers for chapters and verses in the text. See J. S. Penkower, "Verse Divisions."

17 Clark II.xiii.41–45.1–3. The Greek word TITAOI [titloi] signifies "titles" or "superscriptions"; i.e., large capital letters for headings. The Greek word κεφαλαια (kephalaia) signifies "capitals" or "heads"; i.e., small capital letters in this context.

useless, whereby hee should gett no Credit, but expose himself to Derision. *At, Ecce, contrā eorum Damnatricem instituti Patris mei opinionem, inventum illud, simul in lucem simul in omnium, gratiam venit: simulque in tantam auctoritatem, ut quasi exauctorarentur aliæ Testamenti Novi, sive Græcæ, sive Latine, sive Gallicæ, sive Germanicæ, sive in alia Vernaculâ Linguâ Editiones, quæ inventum illud secutæ non essent.* The *Invention* was entertained, it seems, with universal Approbation; and all Editions of the New Testament, that had it not, were laid aside, & out of request. It first appeared in an Edition, printed at *Paris*, A. D. 1551. in a large, 12°, containing the *Greek Text* in the Middle, the *Vulgar Version* on one side, and *Erasmus's* Translation on the other.¹⁸

T'was an useful Invention; but as the Honourable Mr. *Boyl* saies, *It will be no Slander to that industrious Promoter of heavenly Learning, to say, Hee hath sometimes severed Matters that should have been left united, and united others, that more conveniently hee might have severed; & that his lucky Attempt ought not to lay any Restraint upon other learned Men, from making Use of the same Liberty hee took, in altering the former Partitions of the New Testament, in altering his Alterations, to the best advantage of the sense or method.* [Style of Script: p. 60, 61.]¹⁹

These Remarks have Mr. *Clark* for their Author.

But in the Appendix to this *Opus Ecclesiæ*, we shall have a more perfect and exact Account of these Matters given unto us.²⁰

18 Robert Stephens (1503–59) is a notable French printer, classical scholar, and editor. His son Henry printed the NT in Paris (1551), in parallel columns, juxtaposing the Greek and Latin versions with a new Latin translation by the renowned Dutch humanist Desiderus Erasmus (1467–1536). Stephens's innovative edition was the first to divide the NT text into verses and verse numbers, thus facilitating the compilation of concordances. Clark's Latin citation is not from Stephens's 1551 original, but at second hand from Johann Leusden's *Philologus Hebræo-Græcus Generalis* (1670) 166. Clark translates Leusden's Latin citation from Stephens's 1551 preface, but Mather merely copies a fragment here: "But, behold, it fell out quite contrary to this their opinion of my Father's performance; for as soon as ever this Invention appear'd abroad publicly, it was entertain'd with universal Approbation and Applause; and came into so great request, that all Editions of the New Testament, whether in Greek, Latin, French, Dutch, or any other Vulgar Tongue which wanted this Division, were laid aside, and grew out of date and request" (Clark, *Divine Authority* II.xiii.43.3). See also Samuel Mather's *Vindication* (bk. 1, ch. 8, §§ 3–4, pp. 65–66).

19 Clark II.xiii.44–45.3. Clark's citation is from *Some Considerations Touching the Style of the Holy Scriptures* (1661) 60–61, by Robert Boyle (1627–91), the celebrated physico-theologian and founding member of the Royal Society in 1662. Even though he owned the 3^d edition (1668) of Boyle's work, Mather chose to transcribe this passage from Clark's text with minor alterations in spelling, punctuation, and capitalization. See J. H. Tuttle, "Libraries" (318).

20 Mather here acknowledges Samuel Clark as his source, but not the title of Clark's work, which is *The Divine Authority of the Holy Scriptures*. This is the "*Opus Ecclesiæ*," or "ecclesiastical work," from which Mather here excerpts the two subsequent appendices on the number of the verses in the OT and NT. While Clark also lists the number of verses according to the Masoretic notes in Athias's 1667 edition of the *Biblia Sacra Hebraica correctæ*, Mather only copies the number of verses in the English Bible (KJV).

The Old Testament.

[43r]

4849.

Q. It may prove a Good Præparatory unto our Illustrations upon the Bible, to have the CHRONOLOGY of the *Old Testament*, briefly secured and explained, and exposed unto us?

A. To be admired and Adored, is that Providence, of God, that ha's præserted, such a *Chronology* for us. A learned Man, whose Name is Mr. *William Whiston*, ha's lately given us, *A short View of the Chronology of the Old Testament*; and, acknowledging the Favour of Heaven, in my being accommodated with such a Treasure of Good Thoughts, as there are in that Composure, I will endeavour in this Place, to produce many of them. How well had it been for him, & for the Church if no worse Thoughts, had since proceeded from the Author of these!²³

The *Mathematical Canon* composed by *Ptolomy*, the most learned Astronomer of all the Ancients, who ha's all along apply'd his Accounts unto the uncontested *Æra* of *Nabonassar*, and confirm'd them still from the *Eclipses* mention'd by the Ancient Astronomers before him; this is the surest Guide wee have, where the Sacred Historians are silent.²⁴ This *Canon* computes the Beginning of any

²³ Mather refers to *A Short View of the Chronology of the Old Testament, and of the Harmony of the Four Evangelists* (1702), by William Whiston (1669–1752), a controversial English clergyman, millenarian, and Sir Isaac Newton's successor to the Lucasian chair of mathematics at Cambridge. When Whiston published *Athanasius Convicted of Forgery* (1712), attacking the doctrine of the Trinity as a pious fraud perpetrated by St. Athanasius and his anti-Arian party, Mather composed in 1713 *Goliathus Detruncatus* (*Diary* 2:230), an epistolary refutation, but the manuscript sent off for publication was unhappily lost when his contact in London died (Samuel Mather, *Life of Cotton Mather* 73). Whiston's anti-Trinitarian Arianism rendered him obnoxious to Mather and his peers, even though Mather retained an unmitigated admiration for the philological, scientific, and hermeneutical works of his life-long friend and correspondent (*Diary* 2:106–07, 182, 186, 191). Mather excerpts Whiston's *Short View* at great length (as he had done previously with Samuel Clark's *Divine Authority*) and incorporates Whiston's harmony of the OT chronology in the subsequent manuscript pages of "BA" [43r–54v]. See also, K. Silverman's *Life and Times* (328–30), J. E. Force's *Whiston* (105–13), J. H. Tuttle's "William Whiston" (197–204), and M. F. Wiles's *Archetypal Heresy* (62–133).

²⁴ This compound sentence is a paraphrastic citation from Whiston's *Short View* 12 (prop. I). Whiston reprints Ptolemy's chronological table, "The Astronomical Canon of Ptolemy" (or "Kings Table") at the end of his *Short View* (544–45). The "*Mathematical Canon*" refers to *Ptolemy's Almagest* (CE 138–161), a highly influential astronomical work in thirteen books, in which the Alexandrian geographer and astronomer Claudius Ptolemaeus (c. 100–c. 175 CE) develops mathematical tables that locate the positions of the five major planets, the sun, and

of the Years of each Kings Reign, from the First Day of the First Month (called, *Thoth*,) of the *Nabonassarean* Year, which falls out in that Respective Year of his Reign. And tho' any King should Dy immediately after the First of *Thoth*, yett all the rest of that Year, till the next first of *Thoth*, is attributed unto his Reign in the Canon. And if any King, whose Reign was less than a Year, had never a first of *Thoth* within the Compass of his Reign, that King was omitted in the *Canon*, and his Reign added unto the Reign of his Predecessors. Now the *Nabonassarean* Year, was just 365 Dayes long, without the Intercalation of a Day every *Fourth* Year. So that after every *Four* Years, the first of *Thoth* would run back in the *Julian* Year, in such a Manner, as that 1461 *Nabonassarean* Years would be equal to 1460 *Julian* ones: The first of *Thoth* in that time coming to its old Place in the *Julian* Years.²⁵

This *Canon* begins a considerable While before the *Old Testament* ends, and it reaches beyond the Times of the New Testament. It contains an uninterrupted Chronology of the whole Interval, between the Histories of the Old and New Testament. It contains the Kings of those Four Monarchies, and no others, which are so famous in the Prophecies of the Sacred Scripture. By the Comparison of this *Canon*, with *Xenophon*, and with the Sacred Writers, we have an exact Account of the Space during the 70 Years Captivity of the Jewes in *Babylon*, and of the Time of its Solution under the Crown of *Persia*; which otherwise we had been but very imperfectly acquainted withal. This *Canon* does exactly agree in every thing with the *Chronology* of the *Old Testament*. It is an Authentic Record alwayes to be relied upon. And, as *Marshall* observes *Sanè canon iste multis compaginibus cum Sacro Textu aptissimè connectitur*.²⁶

the moon in his geocentric universe. By using the beginning of King Nabonassar's reign in Babylonia as his fixed date (year 1; i.e., c. 3980 in the Julian Calendar; i.e., c. 746 BCE in the Gregorian Calendar), Ptolemy provides a fixed point by which the position of the celestial bodies can be aligned with the astronomical dates of the reigns of Assyrian, Babylonian, Persian, Macedonian, and Roman kings. Sir John Marshall (1602–85), the renowned English historian and chronologer, acknowledges that without Ptolemy's Mathematical Canon, historians would not be able to align the various calendars of ancient Babylon, Egypt, Greece, and Rome with that of the Hebrews. See Marshall's *Chronicus Canon Aegyptiacus Ebraicus Græcus* (1672), lib. 4, seculum XVII, pp. 473–76. See also *Ptolemy's Amalgest* (11). Very little is known about the era of the Babylonian King Nabonassar, whose reign dates from February 26, 747/46 BCE to February 23, 733/32 BCE according to the Gregorian Calendar (KP). For a very helpful discussion of how late Renaissance scholars tried to reconcile the chronologies of the Egyptians, Babylonians, Persians, and Greeks with that of the Bible, see A. T. Grafton's "Joseph Scaliger" as well as volume 2 of Grafton's daunting *Joseph Scaliger* (1993).

²⁵ Beginning with "This *Canon*" and ending with "*Julian* Year," Mather excerpts this paragraph from Whiston's *Short View*. Whiston's own source is a manuscript of "Mr. Allin, Fellow of *Sidney College* MS. Chronology" (Whiston 14, scholium).

²⁶ This paragraph is cribbed from Whiston, *Short View* (12–13). The *Four Monarchies* are those listed in Ptolemy's Canon or table but here prophetically combined into the Babylonian, Medo-Persian, Greek, and Roman empires of Nebuchadnezzar's prophetic dream vision (Dan. 2:31–45). See also Mather's exegesis of this prophecy in *Threefold Paradise* (319–20). Xenophon (c. 430–c. 355 BCE), the Athenian historian and military leader, relates the semi-fictional life of the Persian King Cyrus the Great, in *Cyropaedia* (c. 362 BCE), whose troops occupied Babylon

It is not amiss to introduce this Observation, as early as might be; because of the Use, which we shall have Occasion to make of it, in the Discourses that are now coming on.

It is Remarkable, That the Intire Summ of Years, from the *Creation*, till the *Christian Æra*, is not concerned in the greatest Number of the chronological Difficulties of the Old Testament. Most of the Disputes about the Chronology of the Old Testament, arise from the Particulars of Three Famous Periods. I. From the Ingress to the *Exodus* out of *Egypt*; II. From the *Exodus* to the Foundation of the *Temple*. III. From the Foundation of the *Temple* to the *Captivity*. But it ha's pleased the Divine Providence, most happily to prevent the Ill Consequences of any Mistake, & to secure the entire Summs unto us, by Three express Texts of Scripture. The First Period, is punctually, 430 Years. [Exod. 12.40, 41.] The Second Period, is punctually, 480 Years. [1. King. 6.1.] The Third Period, is adjusted thus; From the Beginning of *Jeroboams* Idolatry, to the last Captivity of the Reliques of the Ten Tribes, in the 23^d Year of *Nebuchadnezzar*, is expressly, 390 Years. [Ezek. 4.4, 5.] These Three Remarkable Texts, are the great Measures and Standards of the Chronology of these Periods.²⁷

Another thing that appears very Remarkable is; That the *Chinese Chronology* when rightly understood, is exactly agreeable, to what we draw from the *Hebrew Text* of the Old Testament. *Fohi*, the founder of the *Chinese* Monarchy, was the same with *Noah*. The *Chinois* tell us, he had no Father; no doubt the Memory of his Father was lost in the Deluge. They tell us, his Mother | conceived him, as she was encompassed with a *Rain-bow*; which seems a cloudy Remembrance of the *Rain-bow* first appearing after the Flood. The *Character* of *Fohi* among the *Chinois*, agrees mighty well, with what the Scriptures relate of *Noah*. *Fohi* (they say) *carefully bred up seven sorts of Creatures, which he used to sacrifice, to the Supreme Spirit of Heaven & Earth. For this reason some called him, Paohi, that is, Oblation*. Compare, Gen. 7.2, 3, 9. and, 8.20.²⁸

[44v]

(539 BCE) and ushered in the return of the Jews from Babylonian captivity (c. 538 BCE). See Jer. 25:11–12, 29:10–14; Dan. 9:1–2; 2 Chron. 36:20, 32; Ezra 1:1–4. The dates for the beginning and end of the prophetic seventy-year captivity in Babylon vary considerably and range from 608–539 BCE, or even from 588–517 BCE, depending on whether Nebuchadnezzar's captivity of a first group of Jews is taken as the starting date or the destruction of the first temple. Whiston's Latin citation is extracted from Marsham's *Chronicus Canon* (seculum XVII, p. 475) and tries to reconcile the chronology of ancient Egypt with that of the OT. Mather shortens his second-hand quotation from Marsham (475), which is given at length in Whiston (13n), and translates, "Indeed, that canon is most aptly connected with the sacred text in many combinations." Helpful information on the views on astronomy at Harvard in the seventeenth century is provided in S. E. Morison's "Astronomy."

²⁷ Mather's excerpts render Whiston's argument much more certain than Whiston's many qualifiers intend to make it (*Short View* 30–31). See Appendix A.

²⁸ Whiston, *Short View* (60–61). Whiston's source is *Sinice Historia Decas Prima* (1659), cap. 1, pp. 12–13, by Martino Martini (1614–61), an Italian Jesuit missionary of Trent, who visited China. Martini argues that the Chinese chronology *disagrees* with that of the Europeans: "*Chronologia Sinica nova Europæorum repugnat*" (13). The mythical Fohi (Fu Hsi), who is to

The *Chinese Histories* affirm, that *Fohi* settled in the Province of *Xensi*; which is the most *North-West* Province of *China*, and very near to Mount *Caucasus*, upon which the *Ark* rested, & from which *Noah* must descend, to go thence into *China*. Indeed, the entire Series of the Annals of *China*, taken together as they stand at present, are false, & reach too high from our Times. They relate a Remarkable Conjunction of the *Five Planets*, in one of the Signs, the same Day that the Conjunction of the *Sun* and the *Moon* also happened, in the Reign of their Fifth Monarch, *Chuenhio*. Now this Astronomical Character ha's been examined by the famous *Cassini*, and found to have happened about 500 Years later, than the present Series of their Years does suppose. They relate, that in the Reign of their Seventh Monarch, *Yao*, the *Winter-Solstice* was observed to be about 50 Degrees distant from the Place where it is at present. This also, if the Observation were exact, must be 500 Years later than the Time which they have assigned for it. The Duration of the Reigns and Lives of the First Monarchs of *China*, likewise do not answer to the Standard of Humane Life in those Ages, to which the present Series of their Years do affix them. It is likely, That the Years of the First Family of their ancient Kings, were not *Successive*, but *Collateral*.²⁹ Other Nations as well as the *Chinese*, have carried their Antiquities too high, by erroneously setting ancient *Collateral* Families, in *Succession* one

have reigned for 115 years (c. 2952 BCE), is to have taught his people how to fish (Martini, *Sinica Historia*, cap. 1, pp. 21–24). The italicized passage in Mather's paragraph attributed to Fohi is cited from Louis LeCompte (LeCompte) (1655–1728), a French Jesuit missionary of Bordeaux, whose 2-volume *Nouveaux mémoires sur l'état présent de la Chine* (1696) appeared in an English translation as *Memoirs and Observations* (1697) 313. Among many others, the London architect John Webb (1611–72) explores Chinese chronology, the Chinese version of the Flood, and the possibility that Chinese was the primitive language of Noah and his descendants, in his *Historical Essay* (1669) and *Antiquity of China* (1678). See R. Ramsey, "China." The German philosopher Gottfried Wilhelm Leibniz (1646–1716) was similarly engaged in reconciling Chinese chronology, creationism, and science with Western tradition, in his *Discourse on the Natural Theology of the Chinese* (1716), chs. 2 and 4. Finally, A. D. White (*History of Warfare* 1:249–65) and, more recently, P. Rossi (*Dark Abyss* 137–82) have ably reviewed the heated debates about biblical chronologies and the beginning of time.

²⁹ Whiston, *Short View* (61–62). Among Whiston's sources are Martini's *Sinica Historia*; Philippe Coupler's *Tabula Chronologica Monarchiae Sinicae* (1686), by the Flemish Jesuit missionary to China Father Philippe Couplet (1623–93); and *A New Historical Relation of the Kingdom of Siam* (1693) 2:252–58, an English translation of *Du Royaume de Siam* (1691), by Simon de la Loubère (1642–1729), a French linguist, diplomat, historian, and poet. Whiston's table (65) aligns the lives and reigns of the ancient Chinese rulers with those of the OT patriarchs. Whiston's source for Giovanni Domenico Cassini (1625–1712), the renowned Italian mathematician and astronomer in the employ of the French King Louis XIV, is Loubère (2:252). Significantly, Cassini shortens the astronomical calendar of the Chinese by 500 years, ostensibly to align their chronology with that of the Hebrews. Sir Isaac Newton, Whiston's friend and supporter, did much the same when he abridges the chronology of the Greeks by several hundred years in his *Chronology of the Ancient Kingdoms Amended* (1728), pp. 86–95. See also F. E. Manuel (*Confronts the Gods*, ch. 3, pp. 93–102). Martini describes the Fifth Monarch *Chuenhio* (c. 2513 BCE), emperor for 78 years, in *Sinica Historia* (cap. 1, pp. 33–35). For Emperor Yao (c. 2357 BCE), who ruled for 90 years, see Martini (cap. 1, pp. 36–43).

to another. This made the Ancient *Egyptian* Chronology so extravagant, until Sir *John Marsham* found out the Mistake.³⁰ And *Martinius* himself allows it in the *Chinese* History. Suppose then, that *Noah*, 235 Years after the Deluge, A. P. J. 2601. descended from the *higher* Regions at *Caucasus*, to the *lower* of *China*, and governed such of his Posterity as he found planted there; and that he Transmitted the Government unto the Successors we find mention'd in the *Chinese* Annals; That a considerable while before the Period of the First Nine Emperours, Yu, the Founder of the First Great Family, began a Succession of Kings in a different Province; and that also about the Time that *Chim tam* the Head of the Second Great Family succeeded unto the First, *Vu Vam* the Head of the Third, began a Succession of Kings in a Different Province, which Third therefore, was not *Successive* to, but *Collateral with*, the Second; and accordingly, their several Founders were about the same Number of Descents from *Hoam ti*, as they appear to have been by their Respective Genealogies. But what is here chiefly Remarkable, is, That if the *Chinese Annals* be thus adjusted, the Length of the Reigns and the Lives of their Monarchs, will very exactly agree, with the Duration of the Lives of Men, in the same Ages recorded in the Sacred Scripture. You may at your Liesure compare the Tables. And this is a principal Character, whereby pretended Antiquities are distinguished from genuine.³¹

³⁰ John Marsham (*Chronicus Canon*) unraveled the mystery of the diverging chronologies when he came across *Aegyptiaca* (*Epitome*) by the Egyptian priest Manetho (3rd c. BCE), who wrote his invaluable history in Greek. In fragments that survive in Eusebius Pamphilus's *Chronici Canones* (bk. 1), in *Praeparatio evangelica* (9.13, 2.1, 3.3, 4.16, 10.13), and in George Syncellus's Byzantine *Chronica* (fl. c. 800), Manetho's chronology links the names of Egyptian gods and rulers with those of the Hebrew patriarchs and thereby harmonizes conflicting reports on chronological calendars, lengths of rulership, and longevity of Egyptian god-kings (Manetho, *Aegyptiaca: Epitome*, fragments 1–6).

³¹ Whiston, *Short View* (62–64). Modern accounts on the mythical Chinese rulers and their dynasties disagree widely. Whiston's attempt (here followed by Mather) to identify the mythical Fohi with Noah was widely accepted at the time as can be seen in *Chronologia Sacra* (1660) 3, by Archbishop James Ussher of Armagh (1581–1656). Ussher dates the First Day of Creation to 4004 BCE and Noah's Flood to 2348/2349 BCE or Anno Mundi (AM) 1656/57 (or APJ 2365 in the Julian Calendar). Whiston's date APJ 2601 (*Anno Periodi Julianae*) refers to the Julian Calendar, according to which Christ was born in the year 4714 (APJ). Martini has the founder of the Yu dynasty (c. 2207 BCE) rule only for 10 years (*Sinica Historia*, cap. 2, pp. 47–54). The first nine emperors are (1) Fohius (c. 2952 BCE), who ruled for 115 years; (2) Xinnungus (c. 2837 BCE), for 140 years; (3) Hoangtius (c. 2697 BCE), for 10 years; (4) Xaohauus (c. 2597 BCE), for 84 years; (5) Chuenhious (c. 2513 BCE), for 78 years; (6) Cous (c. 2435 BCE), for 70 years; (7) Yaus (c. 2357 BCE), for 90 years; (8) Xunus (c. 2258 BCE), for 33 years; and (9) Yuus (c. 2207 BCE), who ruled for 10 years. Emperor Chim Tam (probably Emperor Tangus), ruled for 13 years (c. 1766 BCE), and was head of the Xanga family (Martini, cap. 3, pp. 71–75); Vu Vam (or Faus), head of the third family of Cheva (c. 1122 BCE), ruled for only 7 years (cap. 4, pp. 101–03). Emperor Hoam ti (perhaps Hoaius) (c. 2040 BCE), reigned for 26 years (cap. 2, p. 62). By adjusting the Chinese calendar according to Ptolemy's system, Martini demonstrates that the lives of the Chinese patriarchs were comparable to those of the Hebrew Bible and that the Chinese chronology does not exceed that of our postdiluvian Noah. See also G. W. Trompf's "Newtonian History" (216–17).

We will now proceed with our *Chronological Canon*, and having stated *Six* Great Articles of it, we may proceed unto the Consideration of the several Difficulties, under each of those Articles.

	Years	Months	Days
I. From the Autumnal Equinox next after the Creation of <i>Adam</i> , to that at the End of the Deluge.	1656.	00.	00.

There are no considerable Difficulties in this Period.

	Years	Months	Days
II. From the Autumnal Equinox, at the End of the Deluge to the Departure of <i>Abraham</i> out of <i>Haran</i> .	426.	6.	00. ³²

It appears from the plain Words of *Moses*, [Gen. 11.32. with, 12.1–4.] confirmed by those of *Stephen*; [Act. 7.4.] That *Abraham* was born, when his Father *Terah* was 130 Years of Age. We read indeed; Gen. 11.26. *Terah lived Seventy Years, and begat Abraham, Nahor and Haran*. But the Priority of *Abraham's* Name, does not imply, that he was the *Eldest Son*; as it is plain, that *Shem* was not the *Eldest Son* of *Noah*, tho' he be First mentioned. *Haran* was undoubtedly here the *Eldest Son*. For he was the Father-in-Law of *Nahor*, | and probably of *Abraham* also. [45r] *Sarai* is taken to be the same with *Ischah*, the Daughter of *Haran*; else we cannot easily conceive, how she should be styled, *The Sister of Abraham, the Daughter* [or, Grand-daughter] *of his Father*. And yett *Sarai* was but Ten Years younger than her Husband. Besides, we find, that *Lot*, the Son of *Haran*, was very near as old as *Abraham*. About the Time that *Abraham* begat *Isaac*, at the Age of 100, (which was then but the Beginning of old Age,) the Daughters of *Lot* could say, *Our Father is old*. The Reason why *Abraham* is first mentioned, is not only, The Dignity of his Person, *The Friend of God*; but also the Continuation of the *Chronology* by him. There seems to be an Objection against this; That it is improbable *Terah* should have a Son so late as at 130 Years of Age; especially since in so small a Time afterwards as at the Promise of *Isaac*, it seems a mighty Surprize unto *Abraham*, to have Thoughts of Issue at 100 Years of Age. But since *Terah* lived 205 Years, it cannot be more unsuitable, to suppose that he begets a Son, at 130; than that now, Men who may reach 80, begett at 50. Besides, *Abraham* himself had Children by *Keturah*, long after *Isaac*. And the Lives of Men for many Generations after *Abraham*, were long enough, to admitt of their having Issue at 100 Years old. *Jacob* was 104 Years old, at the Birth of *Benjamin*. Several of the Progenitors of *David* appear to have had Children, some a little

³² Whiston, *Short View* (69–70), tables I and II. Mather and Whiston follow Ussher's Latin edition of *Chronologia Sacra* (cap. 2, p. 44; cap. 10, pp. 160–71) for this and all other calculation; they assign 1656 years to the antediluvian period (from Adam's creation to Noah's Flood) and 426 years to the postdiluvian period (from Noah's exiting the ark to Abraham's departure from Haran).

before, some a little after this Age; and at a much longer Distance from the Dayes of *Abraham*. But the Surprize of *Abraham* and *Sarah*, seems to have been This. *Abraham* had now been married unto *Sarah* a great while, without any Appearance of Issue. And *since it ceased to be with Sarah after the Manner of Women*, there was not left now the least Hope of Children by her.³³ Nay, it was Fourteen Years also, since the more Fruitful *Hagar* conceived by him. It is also probable, that his Change of his Countrey, and wandring & weary Way of Living in a strange Land, brought early Infirmities on his Constitution, which he observed; he found himself Decaying sooner than else he would have done; & his Body *Dead* as to Generation, especially with regard unto *Sarah*. And yett his Contemporaries might have Children at a greater Age; yea, he himself had so, upon the Restoration of his Health, and this no less than 40 Years afterward.³⁴

	Years.	Months.	Dayes
III. From the Departure of <i>Abraham</i> out of } <i>Haran</i> , to the <i>Exodus</i> out of <i>Egypt</i> . }	430.	00.	00. ³⁵

Indeed we read, Exod. 12.40. *The Sojourning of the Children of Israel, who sojourned in the Land of Egypt, was 430 Years*. But these 430 Years include all the *Sojourning* of the *Israelites*, and their Ancestors, in a *Strange Land*. The Translations of the *Samaritan* and of the *Septuagint*, are therefore so paraphrastical, as to read it thus. *The Sojourning of the Children of Israel, which they sojourned in the Land of Egypt, and in the Land of Canaan, they and their Fathers, was 430 Years*.³⁶ And the small Number of Generations, between the *Entrance* into *Egypt*, and the *Going* out of it, are a Demonstration of this Matter. *Jochebed* was the immediate Daughter of *Levi*, (who was 50 Years old at the Descent into *Egypt*,) and the immediate Mother of *Moses* (who was 80 Years old, at the Ascent out of *Egypt*.) *Hezron*, one of those who went down with *Jacob* into *Egypt*, had a Grandson *Jair*, an Active Man, about Forty Years after the Coming up out of *Egypt*, for he siezed on the *Villages and Countrey of Basan* at that time. *Sheerah* the Daughter,

³³ Gen. 18:11.

³⁴ Mather here agrees with Whiston and others who argue that the ability to procreate and to bear children at an advanced age was directly related to the long lifespan of the patriarchs and their spouses (Whiston, *Short View* 72).

³⁵ Whiston, *Short View* (69 and 71), here relies on Ussher's *Chronologia Sacra* (cap. 2, p. 44, and cap. 9, pp. 136–59).

³⁶ Though differing in nearly 6,000 places from the Masoretic text of the Hebrew Bible, the Samaritan Bible is not a version of the Torah, but a text written in Samaritan characters, dating back to the fifth century BCE. The Samaritan text agrees in more than 1,600 places (of the 6,000) with the Septuagint (LXX), the Greek translation of the Hebrew Scriptures, dating back to the first half of the 3rd c. BCE. For the state-of-the-art debate of this issue in Mather's time, see Richard Simon's *Critical History of the Old Testament* (bk. 2, chs. 1–18). The Samaritan Bible was accessible in various seventeenth-century polyglots, especially in the "London Polyglot" of Brian Walton, *Biblia Sacra Polyglotta* (1653–57), in 6 vols. See also P.N. Miller's "Antiquarianization."

or perhaps the grand daughter of *Ephraim*, was alive at the Division of the Land of *Canaan* by *Joshua*. *Corah*, *Dathan*, and *Abiram*, the Ringleaders of the Sedition against *Moses* in the Wilderness, were Grandsons to some of these Persons, who were among the Descendents into *Egypt*. And yett the general Period of Humane Life, was now no more than 140 Years of Age. Moreover, the Ancestors of *Moses*, whose particular Ages are mentioned, will further demonstrate it. *Levi*, his great Grandfather, was 50 Years old, at the Descent into *Egypt*, & lived but 137 Years in all. *Kohath*, his Grandfather, liv'd but 133 Years; and his Father *Amram* but 137 Years, and *Moses* himself was no more than 80 Years old at the Exodus. If we allow every succeeding Person to be born as late in the Fathers Life as the Time for Generation would permitt, yett there will want many Years of the 430 which belong to this Period. Finally; The Apostle *Paul* clears it up, when he reckons these 430 Years, from a solemn Promise of the *Messiah*, the *Seed of Abraham*, in whom *all the Families of the Earth* should be *Blessed*. [Gal. 3.17.] But we Read not of any such Promise, to *Jacob*, at his going into *Egypt*.

[46v] | Well; The 430 Years take their Date, from the Dayes of *Abraham*. We will now see, what Year in the Life of *Abraham*, will be that whereon we are to fix our *Epocha*. It falls exactly, when *Abraham* was 75 Years old, and at his Departure out of *Haran*. It ha's its Date, from the primary *Sojourning* of the Progenitors of the Children of *Israel* in a *Strange Land*. The Departure of *Terah* and *Abraham*, from *Ur* to *Haran* was not into a *Strange Land*. It was in the same Countrey of *Mesopotamia*, with *Ur* itself. It was the Habitation of his Brother *Nabor* and his Posterity. Yea, *Abraham* himself calls it, in so many Words; [Gen. 24.4.] *His own Countrey*. And all along in the Scripture, it is not *Mesopotamia*, but *Canaan*, that is called, *The Countrey of their Sojourning*; and, *A Strange Land*; and where *Abraham* and his Posterity, were for a long Time said to be *Strangers* and *Pilgrims*. And to render all, the more incontestable; The famous Promise of the *Messiah*, was made unto *Abraham*, at this his Departure out of *Haran*.³⁷

Wherefore, since *Isaac* was born 25 Years after *Abrahams* Departure out of *Haran*, and from thence, to the Deliverance out of *Egypt*, was at the utmost no more than 405 Years, tis no Wonder, if in a Place, where the *Chronology* is not so much concerned, that Space be stated only by the Round Number, 400 Years. Thus tis, in the Promise of a Son, unto *Abraham*. [Gen. 15.13.] Such a *Round Number* is very common with all Writers; & not to be wondred at, in the Sacred Ones.

The Subdivisions of this Period, are all found in express Texts of Scripture; except only the Interval of 64 Years, which falls between the Death of *Joseph*, and the Birth of *Moses*.³⁸

But in this Period, we meet with Two Remarkable Difficulties.

³⁷ Gen. 12:1–4.

³⁸ Whiston, *Short View* (71).

The First is, The Number of *Ten Children* assign'd unto *Benjamin*, the Youngest of the Patriarchs, at the Descent into *Egypt*.

The Second is, The Grandchildren of *Judah*, namely *Hezron* and *Hamul*, reckon'd among them who descended into *Egypt*, when, according to the Circumstances of the History, as usually understood, they could not be Born at this Time.³⁹

Now, first, it is not unreasonable to suppose, that when the Vigor of Mankind was much greater than it is at present, of which the great Length of their Lives is a sufficient Argument, the Ripeness for Procreation might commence earlier, than in our Times. 'Tis also plain from the Sacred History, that in those Times Men were extremely desirous of having Children; a Numerous Offspring, especially among the Posterity of *Abraham*, was counted the greatest of Blessings; they had Recourse to Polygamy, and Concubinage, and Incest itself, to supply the Want of it. And yett we may add; There is nothing in either of these Instances, but what might happen in *our Age*.⁴⁰

Benjamin might have his *Ten Children* by several *Wives*; yea, he might have them all by *one Wife*; since he was now, according to Dr. *Usher*, about 27 Years of Age.⁴¹

The Case of *Judah* calls for more Examination. 'Tis commonly taken, that at the Time of the Selling of *Joseph* to the *Midianites*, that is to say, 22 Years before the Descent into *Egypt*, he took *Shuah* to Wife; who successively bare him *Three Sons*, *Er*, and *Onan*, and *Shelah*. His eldest Son *Er*, is grown up; he marries *Tamar*; he Dies by a Divine Stroke. *Onan* then marries *Tamar*; and is killed by the Judgments of Heaven. *Tamar* is to stay, till *Shelah* come to Ripeness of Years. At this time, her Impatience of having Children putts her on a Method of Imprægnation by *Judah* her Father-in-Law. She bears him *Pharez* and *Zara*; and lastly, *Pharez* begetts *Hezron* and *Hamul*; and all this before the Descent into *Egypt*. Now it must be confess'd, if we can allow no more than 22 Years for these Occurrences, tis to no Purpose to seek for a Solution; and if the Time of the Selling of *Joseph*, be the same with the First Marriage of *Judah*, it is really inexplicable.⁴²

But we must Remember, That tho' the Words, *At that Time*, seem to refer unto the foregoing History of *Joseph*, yett the Expression is of a much larger Extent in the Language of the Scripture; and includes a great Space of Time. Some have observed, the Phrase used *Seventeen* times in the Bible, *Sine determinatâ*

39 Whiston, *Short View* (71–72).

40 Whiston, *Short View* (72). Whiston's source is *Reflexions Upon the Books of the Holy Scriptures* (1688), vol. 1, part 1, ch. 15, pp. 71–72, by Pierre Allix (1641–1717), a learned Huguenot divine, translator of the Bible into the French vernacular, and refugee in England after the Revocation of the Edict of Nantes.

41 Whiston, *Short View* (73). James Ussher's *Chronologia Sacra* (cap. 10, pp. 160–62).

42 Whiston, *Short View* (73). Gen. 37:36; 38:1–30.

aliquâ temporis notatione. It seems to be little more than a Particle of Transition, or a common Way of introducing a New Branch of an History, like the English Particle, *Now*. I may add; It is enough, that a Part of the Occurrences in this History, (the latter Part of them,) fell out, after the Selling of *Joseph*, and while he was in *Egypt*.⁴³

[47r] Well; we will now connect *Judah's* Marriage, with *Jacobs* Return to | *Canaan*, after his 20 Years Service to *Laban*; which according to Dr. *Usher* was 33 Years before the Descent into *Egypt*. Now suppose *Judah* at 17 Years of Age, to have his First-born *Er*, at 18 *Onan*, at 19 *Shelah*. Then, when *Judah* was 32 Years of Age, *Er* and *Onan* successively take *Tamar* to Wife, & perish by the sudden Stroke of Heaven. When *Judah*, was 33, and *Shelah* at Years of Puberty, but not married unto *Tamar*, *Judah* stumbles into his Incest with her. The next Year, when he was 34, he ha's Twins by her, *Pharez* and *Zarah*; when he was 48, *Pharez* begets *Hezron*, and when he was 49, *Hamul*; who therefore are then reckoned among the rest of the Infants, who came out of *Jacobs* Loins, and descended with him into *Egypt*. Here is nothing, but what might have happened in our Age. As to *Judah* himself, his Inclinations appear, in that his Wife was no sooner Dead, but he must visit an Harlot. And for *Er* and *Onan*, the Words of *Judah* to *Tamar* seem to intimate, what they were: saies he, *Remain a Widow, till Shelah my Son be grown; for he said, lest peradventure he Dy also as his Brethren did*. q.d. "My Sons *Er* and *Onan*, seem to have been the Occasion of their own Ruine, by some indecent Behaviour, upon their over-hasty Marriages, while they were so young. I'l therefore send *Tamar*, to her Fathers House, till my remaining Son *Shelah*, arrive at a riper Age before he marries her." This appears to have been the Reason of *Judah's* Delaying the Marriage of *Shelah*, upon his First Arrival, at the Age of Puberty; which small Delay was yett born with such Impatience by *Tamar*, (who suspected perhaps, he was afraid of ever venturing his Son with her,) that she immediately procures herself to be with Child, by a wilful *Incest* with her Father-in-Law.⁴⁴

	Years.	Months	Days
IV. From the <i>Exodus</i> out of <i>Egypt</i> , to the } Foundation of <i>Solomons</i> Temple. }	480.	1.	00. ⁴⁵

The Book of *Judges* ha's occasion'd wonderful Difficulties in this Period, which were inexplicable, till Sir *John Marsham* cleared them. He does it, by stating,

⁴³ Whiston, *Short View* (73–74). The phrase *At that Time* appears in Gen. 38:1. The Latin citation translates "without any specific reference of time" and is taken from Ussher's *Chronologia Sacra* (cap. 9, p. 186).

⁴⁴ Whiston, *Short View* (74–75). *Judah's* speech to *Tamar* appears in Gen. 38:11. The passage in quotation marks is Whiston's own heuristic invention (75).

⁴⁵ Whiston, *Short View* (75) only assigns 479 years and 1 month to this period; his source is again Ussher's *Chronologia Sacra* (cap. 2, p. 44; cap. 12, pp. 189–202; cap. 13, pp. 203–13).

which Numbers are *Collateral*, and which are *Successive*. And so he finds Room for *Joshua's* Government to continue 25 Years after the Death of *Moses*; and 34 Years more for the Idolatrous Generation, before *Cushan*, the King of *Mesopotamia* Tyrannized over them.⁴⁶

We read upon the Death of *Eglon*, [Judg. 3.30.] *The Land had Rest 80 Years*. By *the Land*, understand the *Eastern* Part of it, (which had newly been discoursed of, & which had now shaken off the Yoke of *Moab*;) and not the whole *Land of Israel*. For IN THE MEAN TIME, not only the *Philistines*, invaded the Western Parts, and had a Repulse by *Shamgar*, but also, [Judg. 4.1.] *The Children of Israel again did Evil in the Sight of the Lord, when Ehud was dead, and the Lord sold them into the Hand of Jabin King of Canaan, that Reigned in Hazor*; [in the Tribe of *Naphthali*] for Twenty Years; tho' at the same Time there was Peace enjoy'd in the Eastern Regions. At length, the Northern *Israelites* beat *Sisera*, and the Peace thereby becomes universal; until 40 Years afterward, the *Midianites*, and their Allies from the *East*, conquer all before them. How long *Ehud* lived, is no where said; and it is not probable, that he lived 80 Years after the Death of *Eglon*. All that we certainly know, is, that the Servitude to the *Canaanites* did not commence, till after his Death. We may suppose, that *Jabin* enslaved *Israel*, when *Ehud* was Dead, about 20 Years after the Victory over the *Moabites*; for the Tyranny of *Jabin* lasted 20 Years, and the *Land had Rest* 40 Years afterward. By this Computation, we gain 60 intire Years; whereof 25 must be allow'd unto *Joshua*, (according to *Josephus*,) and the remaining 35, to the Idolatrous Generation that succeeded; much such a Space of Time, as was allotted unto the Generation in the Wilderness. In this Part of the Period it was, that *every one did what was Right in his own Eyes*. And here we are to place the Histories of *Micha*, and the *Danites*, and of the War against *Benjamin*. There are therefore 185 Years, from the *Exodus*, till *Jabins* Invasion; and 300 Years from the Death of *Moses*, to the Incursion of the *Ammonites*.⁴⁷

Now, that there should be Different *Judges* in Different Parts of the Land, and War in one Part, while there was *Peace* in another, was not a thing Inconsistent with the Civil State of the *Israelites* at this Time.⁴⁸

The hasty Distribution of the Land by *Lott*, before it was thoroughly subdued, scattered the People and weakened the Government. After this Division, there was no *General Assembly* of the whole Body. The *Aristocracy*, which was

⁴⁶ Whiston, *Short View* (75–77). Marsham's *Chronicus Canon* (95). Gen. 3:8–11.

⁴⁷ Whiston, *Short View* (78–79). This and all subsequent paragraphs to the end of Mather's section IV [47r–49r] are cited at second hand from Marsham's *Chronicus Canon* (29 ff.), in Whiston (78–83). The story of Sisera's decapitation at the hands of Jael is related in Judg. 4:17–11. The Jewish historian Josephus Flavius (CE c. 37–c. 100) argues that Joshua succeeded Moses and served as the commander of the Israelites for 25 years (*Antiquities* 5.1.29 and 5.5.4; Whiston's translation).

⁴⁸ Whiston, *Short View* (79).

the Security of the Nation was laid aside.⁴⁹ In *Extraordinary Cases*, there were Judges raised up. If *Prophecy* at any time were wanting, *Anarchy* succeeded. Scarce any of the *Judges* had Authority over the whole Body of the Nation; [48v] They | were the Leaders of such Tribes, as were willing to submit themselves, unto their Conduct, as they were disposed unto it by Dangers from their Neighbourhood. We have plain Instances of this, in the Armies of *Barak*, and of *Gideon*; and in the Double Invasion which happened afterwards, from the *Ammonites* on the one Quarter, and the *Philistines* on the other. The War with the *Ammonites* was managed entirely by *Jephtah* and his People, that is to say, the Tribes beyond *Jordan*. The War with the *Philistines* was managed wholly by the Tribe of *Judah*. When *Judah*, by Divine Appointment was *præferr'd before his Brethren*, (on which account, the Tribe obtained a larger Portion, & in a more secure Province,) Ambition and Jealousy & Emulation prevailed on both Sides. The Tribes never well united their Forces, or joined in *Confœderacies*, to Resist a common Enemy. Indeed, in the *Dayes of Saul*, an Army was levied out of the whole Nation; but even *then*, they were Two Bodies, *Israel* was one, and *Judah* another. Upon the Death of *Saul*, they ran into *Factions*; the one for *Ishbosheth*, the other for *David*; and this Division became fixed and incurable after the Death of *Solomon*. Very *Different Conditions* must thus befall the Tribes, while they had their *Separate Interests*.⁵⁰

Well; There yett remain 140 Years to be accounted for. Of these Years, the last 84 belong to Three of the Kings, just before the Foundation of the Temple. There are then 56 Years, left in the Period of the *Judges*. In that Space, we meet with a Double Servitude of the *Israelites*; the one to the *Ammonites*, the other to the *Philistines*. These two Servitudes were contemporary. They *commenced* at once, tho' they did not *conclude* so. The *Idolatries* of the *Israelites* multiplied; The Almighty Doubled their Punishment, and Sent Enemies upon them, both from the *East*, and from the *West*. [Judg. 10.6, 7.] The *Ammonites* Tyrannized indeed, but 18 Years; but the *Philistines* no less than 40. The Sacred Historian, first præmises a short Mention of both Invasions, because they began in the same Year; and then he proceeds to Relate them distinctly, beginning first with that which would be dispatched soonest. Thus, the Number of Years, which would else increase too much upon us, is brought within Compass, and the Chronology is cleared from all its Difficulties.⁵¹

⁴⁹ See Josephus, *Antiquities* (5.1.21–24).

⁵⁰ Whiston, *Short View* (79–80).

⁵¹ Whiston, *Short View* (80–81). The identity of “The Sacred Historian” mentioned in Marsham (Whiston’s source) is perhaps deliberately left unclear, for at least since Thomas Hobbes (1651) and Baruch Spinoza (1670) theologians could no longer attribute the authorship of the Pentateuch, of the Books of Joshua and Judges, and of most of the other OT books, to the purported authors whose name they generally bear. Both Hobbes and Spinoza argue that, based on the apocryphal 2 Esdras 14:20–47, the ancient scriptures and the law had been burned in the first Temple in 588 BCE. The fifth-century BCE Jewish priest, prophet, and leader Ezra dictated

On the one side, after the Eighteen Years Tyranny of {the} *Ammonites*, there are Four *Judges*, namely, *Jephtah*, and *Ibzan*, and *Elon*, and *Abdon*. All the Years ascribed unto them, (including the 18 Years of Servitude also) are no more than 49. That Part of the Land, with which these were concerned, was in Peace, after the Tyranny of *Ammon* was over. In the Times that succeeded, [1. Sam. 7.14.] *There was Peace between Israel and the Ammonites.*⁵²

In the mean time, (during this Rest of the *Eastern Parts*,) the Violence of the *Philistines* extended itself in the *West*, and continued 40 Years. Nor do we find any Mention of a Deliverer from it, before the Time of *Samuel*, who by gaining that famous Victory at *Ebenezer*, putt an End unto their Tyranny. [1. Sam. 7.13, 14.] *The Hand of the Lord was against the Philistines all the Dayes of Samuel.* Those *Dayes of Samuel*, are the Sixteen Years of his Government, before *Sauls* Inauguration. These were {the} only Years interposed, between the End of the *Philistines* 40, and the Beginning of the 84 of the *Kings*. But soon after *Sauls* Accession to the Crown, (the *Second Year of his Reign*,) the War began again with the *Philistines*, & held all the Dayes of *Saul*. Wherefore, *Samuel* began to Judge (in *Judah*, and the Parts adjacent,) in the last Year of *Elon*, of the Tribe of *Zebulon*; and was contemporary with *Abdon*, of the Tribe of *Ephraim*.⁵³

We read of *Sampson*, [Judg. 15.20.] That he *Judged Israel Twenty Years in the Dayes of the Philistines*; that is to say, within the Space of those 40 Years, wherein they had the *Philistines* Rulers over them. However, he had not the supreme Power; nor did he deliver the *Israelites*, but was by his own People delivered into the hands of the *Philistines*.

Nor ought we to look on *Eli* as a Deliverer. He lost the *Ark*; and he died in the Twentieth Year of the Servitude unto the *Philistines*; Twenty Years before the Victory at *Ebenezer*. His Power of a *Judge*, was no other than that of an *High-Priest*; and like that of *Deborah*, when she *Judged Israel* under the Palm-tree; or like that of the Successors to *Gideon* and *Jephtah* in times of Peace; or, like that of the Sons of *Samuel*, whom he made *Judges over Israel*; or, lastly, like that of *Samuel* himself, after the anointing of *Saul*, who still *Judged Israel all the Dayes of his Life*; and *Josephus* tells us, that was Eighteen Years; but indeed it was many more.⁵⁴

We find among the *Tyrians*, That *Judges* were constituted over them, after the old City on the Continent, was destroy'd by *Nebuchadnezzar*. | They were confined unto an Island; and these *Judges* were successively their *Governours*. Among the *Carthaginians*, (a Colony of the *Tyrians*) the Order of *Judges* had

[49r]

from memory the ninety-four books of the Hebrew Bible that had been lost in Exile (Hobbes, *Leviathan*, bk. 3, ch. 33; Spinoza, *Tractatus Theologico-Politicus*, ch. 8–10, pp. 120–56). See G. Reedy, *Bible and Reason* (chs. 2–3).

⁵² Whiston, *Short View* (81).

⁵³ Whiston, *Short View* (81–82).

⁵⁴ Whiston, *Short View* (82). *Josephus*, *Antiquities* (6.5.4; 13.5; 14.9).

the Dominion, & chiefly præserv'd it in their own Hands, because they were *during Life*. These *Judges* are called *Suffetes*, by *Livy*; *Cum suffetes ad jus dicendum consedisent*. Thus our *Judges* are called, *Sophetim*, i.e. *Suffetes*. The Word signifies, one who *Avenges* the Cause of a People, or *Delivers* them out of the hand of their Enemies.⁵⁵

Hence, the Apostle *Paul*, [Act. 13.20.] mentioning 450 Years, for the Time of the *Judges*, only used a Number then commonly ascribed unto this Time among the *Jews*; (which we also find in *Josephus's* Account of this Period:) But he uses a Particle, *As it were*, or, *As it commonly seems*, which intimates, that an Accurate Chronology was not intended in this Account of it.⁵⁶

	Years	Months	Days
V. From the Foundation of <i>Solomons</i> Temple, } to the Conflagration. }	424.	3.	00. ⁵⁷

The Chronology of the Kingdoms of *Israel* and *Judah*, is abundantly established, by the famous Prophecies of *Ezekiel*, touching the utmost Extent of the Divine Patience to *Israel* and *Judah*. [Ezek. 4.4, 5, 6.] *Ezekiel* is to *bear the Iniquity of Israel*, lying on his *Left Side*, 390 Days; & *to bear the Iniquity of Judah*, lying on his *Right Side*, 40 Days; and the Lord saies, *I have appointed thee Each Day for a Year*. The plain Meaning is this; That the longest Time of the uninterrupted Idolatry of the *Israelites*, and of Gods Patience with them, from the First Idolatrous Feast of *Jeroboam*, till the Final Captivity of the *Ten Tribes* by *Nebuchadnezzar*, should be 390 Years. And that the longest Time of the uninterrupted Idolatry of *Judah*, and of Gods Patience with them; till the Final Captivity of the last Remains of the *Two Tribes*, by the same *Nebuchadnezzar*, should be 40 Years. All that can here be quæstion'd, is, whether the Captivity of the Remnant, which happened in the twenty third Year of *Nebuchadnezzar*, which we have here assign'd, as the Conclusion of the 390 Years of the House of *Israel*, was of the Remainder of the *Ten*, and not rather of the *Two Tribes*. If it belong to the *Ten Tribes*, we have what we desire. If it be only of the *Two*, we are at a mighty Loss. The Reason of the Doubt is; The Historian ha's call'd

⁵⁵ Whiston, *Short View* (82–83). The Tyrians were an ancient Phoenician people, whose stronghold was Tyre (near the modern Lebanese city Beirut), located on a promontory off the shore of the old city of Tyre. This city fell to the Babylonian Nebuchadnezzar (586–573 BCE) while judges ruled over Tyre (626–539 BCE). (*HBD*). Josephus relates the fall of Tyre in his book *Against Apion* (1.21), and the story of the judges governing the ancient N. African city of Carthage, in *Against Apion* (1.17–18). The Roman historian Livy (Titus Livius) (59 BCE–CE 17) calls the judges and chief magistrates “*suffetes*” in his famous *Ab urbe condita libri*, a history of Rome from its foundation to the year 9 BCE. Livy’s Latin quotation (34.61.15) translates, “when the chief magistrates (*suffetes*) took their seats to administer justice.” With this paragraph ends Whiston’s lengthy citation from Marsham, which Mather copies at second hand.

⁵⁶ Josephus reads, “for more than five hundred years” (*Antiquities* 11.4.8).

⁵⁷ Whiston, *Short View* (83). His source is Ussher’s *Chronologia Sacra* (cap. 2, p. 44 and cap. 13, pp. 203–13).

them *Jewes*; Jer. 52.30. *In the Twenty third Year of Nebuchadnezzar, Nebuzaradan Captain of the Guard, carried away captive of the Jewes, Seven hundred and forty five Persons.* But we must observe, that all the Remainders of the *Twelve Tribes*, have been styled *Jewes* in common, ever since the *Babylonish Captivity*, and are so styled at this Day. These *Jewes* were *Israelites*; remaining in those Parts of the Land, which belonged unto the *Ten Tribes*. They are styled Ezek. 33.24. *The Inhabitants of the Wasts of the Land of Israel.* And their Mountains are called, Vers. 28. *The Mountains of Israel.* This Captivity happened, at the Time that *Nebuchadnezzar* was besieging of *Tyrus*; now, t'was the Land of *Israel*, and not of *Judah*, that adjoined unto *Tyrus*, and so was the likeliest to afford him an Opportunity of carrying its Inhabitants into Captivity.⁵⁸ Yea, we are certain, that all the Reliques of the *Two Tribes*, were not now in the Land of *Judah*, but in the Land of *Egypt*, and so could not possibly be led into Captivity until the Conquest of *Egypt* afterwards. [Consider, Jer. 43.4, 5, 6, 7.]⁵⁹

We will proceed now to consider the Difficulties, which occur in the several Intervals of this Period.

1. From the Foundation of the Temple, to the Beginning of the Reign of *Rehoboam*, was, 36 Years, & 5 Months. How many *odd Months* are to be allow'd here, and in other parallel Cases, is not for the most Part expressly noted in the Sacred Scripture: But it is to be collected from the exact Adjustment and Connection of the Reigns of one King with another, & to be fetched from the Tables of their Reigns.⁶⁰ And indeed, it highly deserves, not only our Observation, but our Admiration, that those many Texts of the Scripture, where the Reigns of the Kings of one Kingdome are adjusted unto those of the other, and which have generally for Want of due Attention been look'd upon as the Causes of Abundance of *Difficulties*, in the Sacred Chronology, are in themselves really so far from being so, that they generally help us to state the Accounts of each Reign much more *accurately*, and that commonly even to a *Single Month*. The *Seeming Contradictions* of the Scripture-Accounts do at last appear, but so many Proofs of their *greater Accuracy*. In that which looks like a *Carelessness* in the *Chronology* of the Bible, there ly Helps to state it more Nicely and more *Accurately*, than the most Accurate Monuments of other Antiquity can enable us to do in any profane History whatsoever.⁶¹

⁵⁸ Nebuchadnezzar besieged Tyre for thirteen years (586–573 BCE). According to James Ussher's *Annales Veteris et Novi Testamenti* (1650–54) 93, a third group of Jews was taken into Babylonian captivity in AM 3420, APJ 4130 (c. 584 BCE), the approximate date of the destruction of the first Temple.

⁵⁹ This paragraph is excerpted from Whiston, *Short View*, prop. XIV (52–54).

⁶⁰ The tables of the reigns of the Israelite and Judean kings are given by Whiston (*Short View* 85, 86, 88, 89, 94) and juxtapose the round figures given in the Bible with the exact number of years and months in Whiston's chronology.

⁶¹ Whiston, *Short View* (83, 84, 85).

2. From the Beginning of the Reign of *Rehoboam*, to the Beginning of the Reigns of *Athaliah* and *Jehu*, was 90 Years, and 6 Months.⁶²

[50v] There is a New *Hypothesis* to be considered, for the Reconciling of the Years of the Two Kingdoms, in this Interval. And that is | This. The Year used by the People of God, was either a True *Solar Year*, or a *Lunar* one so adjusted by proper Intercalations, as to be æquivalent unto it. The *Julian Year* is so near to it, as to leave little Difference. But when *Jeroboam* drew the *Ten Tribes* to Idolatry, he took the *Year*, which was used by all the *Idolatrous Nations* of the Neighbourhood; a Year, which was a Month shorter than that of *Judah*, and contained but *Eleven Months*. The Annals of the *Ten Tribes* were carried on by such a *vagrant Year*, until *Jehu's* Revolution. This one Observation being applied, will produce a most perfect Accord, between the *Annals* of *Judah*, and of *Israel*, for this Interval; which else will be clog'd with horrid Encumbrances.⁶³

We will pass on to certain particular Difficulties.

First; The Sacred Historian makes *Jehoshaphat* Reign 25 Years; But the same Historian assures us, That his Son *Jehoram* did begin to Reign during his Fathers Life-time; and we shall find, it was 3 Years before his Fathers Death. Accordingly, we reckon only 22 Years to *Jehoshaphat*, in our *Successive Chronology*.⁶⁴

⁶² Whiston, *Short View* (85).

⁶³ Mather condenses into a single paragraph the headings of Whiston's propositions II and III, as well as phrases from Whiston's elucidations (*Short View* 15, 16, 17). To establish an exact timeline in biblical chronology is notoriously difficult because the ancient Hebrews used both solar and lunar calendars for various secular and religious dates – the solar calendar generally being tied to agricultural seasons of the year, and the lunar to religious observances. Even though the lunar month consisted of 30 days, the actual duration was only about 29 ½ days per month. Over a period of a lunar year, the 354 ½ lunar days (365 in the solar calendar) necessitated an intercalation of the missing days. Hence every 3rd, 6th, 8th, 11th, 14th, 17th, and 19th year of a 19-year cycle, the Hebrews (adopting Chaldean precedent) added one full month to their calendar to correct the shortfall. Hence a second month of Adar was added to the year. Given this intercalation, the Hebrew lunar calendar nearly coincided with the Julian Calendar instituted by Julius Caesar (46/45 BCE), who intercalated 90 additional days to bring in line the calendar dates with the natural and seasonal events. From then on, each year was fixed at 365 days per year, one day being added (29th of February) every 4 years. However, since the Julian Calendar amounts to 365 days and 6 hours and exceeds the true solar year by 11 minutes and 14 seconds, an increasing disparity between the dates of the physical phenomenon and seasonal dates occurred over the centuries. To rectify this discrepancy and to establish a uniform date for Easter in the Christian churches, Pope Gregory XIII disbanded the Julian calendar on Feb. 24, 1582, by dropping 10 days from the calendar and thus restored the date for the vernal equinox to March 21. This Gregorian or New Style calendar was not adopted in Protestant Great Britain until 1752. Hence the dates used by Whiston and Mather are based on the Julian or Old Style calendar. For a helpful discussion, see Grafton, "Joseph Scaliger," pp. 181–85 ("Appendix").

Mather's reference to "*Jehu's* Revolution" (2 Kings, chs. 9–10) alludes to the war of *Jehu*, who became king of Israel (843–816 BCE) after killing *Jehoram*, king of Judah (849–843 BCE), and King *Ahaziah* of Israel (843 BCE), in *Jehu's* war on Baal worship in Israel. The daughter of Ahab and Jezebel, Queen *Athaliah* ruled over Judah for six years (c. 843–837 BCE) after her husband, King *Jehoram*, had been assassinated by *Jehu*.

⁶⁴ Whiston, *Short View* (86). 1 Kings 22:42, 2 Kings 8:16. The *Successive Chronology* men-

Secondly; *Ahaziah* King of *Judah*, in one Text, begins his Reign in the *Eleventh* Year of *Jehoram* King of *Israel*; in another Text, not until the *Twelfth*. Now consider the Circumstances of his Father a little before his Death, & you will see this *Epocha*, most highly agreeable to the History. We read; [2. Chron. 21.18, 19.] *The Lord smote him in his Bowels, with an Incureable Disease. And after, (or rather, about) the End of two Years, his Bowels fell out by reason of his Sickness; so he died of Sore Diseases.* From this *Incureable Disease* in his *Bowels*, there would naturally arise, the making of his Son a Partner in the Kingdome, & the committing of the public Administration unto him, some time before his Death. And the *Different Phrases* used on the *Different Beginnings* of the *Sons Reign*, lead us to acknowledge this Observation.⁶⁵

Thirdly; *Omri* King of *Israel*, in one Place, begins his Reign, in the 27th of *Asa*; in another Place, not until the 31st of *Asa*. And his Reign is 12 Years in all; but no more than 6 in *Tirzah*.⁶⁶ The Case was plainly thus. In the 27th of *Asa*, *Omri* is made King over *Israel*, upon the Conspiracy of *Zimri*; and being accompanied by the Body of the People, he besieges *Tirzah*, where *Zimri* then was; and in *Seven Dayes* takes the City, and putts an End unto *Zimris* Power and Life at once. Upon the Death of *Zimri*, the People of *Israel* were *Divided into Two Parts*; *Half of the People followed Tibni, to make him King, and Half of them followed Omri.* After a Four Years War for the Crown, *the People that follow'd Omri prevailed, and Tibni died, & Omri reigned* without Molestation.⁶⁷ So, tis no Wonder, we have a double *Epocha*, for the Reign of *Omri*, and of the Twelve Years he Reign'd in all, only Six were in *Tirzah*. Four were spent, before he gott the Royal City of *Tirzah*, from his Rival; Two were spent after his leaving *Tirzah*, and making *Samaria* the Royal Seat of his Kingdome. The *Thirty first Year* of *Asa*, was the Year of his taking *Tirzah*.⁶⁸

3. From the Beginning of the Reigns of *Athaliah* and *Jehu*, to the Captivity of the *Ten Tribes*, is, 163. Years, and, 2. Months.⁶⁹

We will address ourselves, to solve the chronological Difficulties of this Interval.

Tho' *Jehoahaz* of *Israel* died not until the 39th Year of *Joash* of *Judah*, yett the same Historian, makes the Successor, namely *Joash* of *Israel*, to begin his Reign at the 37th of *Joash* of *Judah*.⁷⁰ We must therefore suppose, that *Joash* began to Reign Two Years before the Death of his Father. But is there in the Sacred History, any Hint of this Matter? Yes. We read, [2. King. 13.3 &c] That *the Kings of*

tioned here refers to Whiston's tables of the reigns of the Israelite and Judean kings (85, 86, 88, 89, 94).

⁶⁵ Whiston, *Short View* (87). 2 Kings 8:25, 9:29.

⁶⁶ 1 Kings 16:8, 15–16, 23.

⁶⁷ 1 Kings 16:21–22.

⁶⁸ Whiston, *Short View* (87–88).

⁶⁹ Whiston, *Short View* (88).

⁷⁰ 2 Kings 13:10.

Syria oppressed Israel all the Dayes of Jehoahaz; And yett, we find, that upon his Petition for Deliverance, *God heard his Prayer*, and *gave Israel a Saviour*. This was *Joash*, the Son of *Jehoahaz*, a mighty and a valiant Man, who during his Fathers Life-time, recovered the Cities which his Father had lost, & restored Peace to the Nation. These Different Affirmations are best Reconciled, by supposing, That his Father, upon his constant Ill Success against the *Syrians*, resign'd Part of the Royal Authority to him, and made him the General of his Army. After which beginning of the Sons Administration, affayrs were altered, & those Enemies, who during the Fathers Government were alwayes Conquerors, were now conquered by the Son, and at last were driven out of the Land.⁷¹

[51r] Secondly. *Amaziah* King of *Judah*, is said, to Reign in the Second of *Joash*; that is, in the Seventeenth of *Jehoahaz*, of *Israel*. And yett his Father died not, until above a Year after the Death of *Jehoahaz*. In this Case again, we must suppose, that *Amaziah*, began to Reign, above a Year, before the Death of his Father. But we will admitt no such Supposition, without a Foundation for it, in some Expression of the Sacred Scripture. Behold, a notable one on this Occasion! What is the Importance of that Phrase, [2. King. 14.5.] of, *The Kingdomes being confirmed in his Hand*? But that, upon the Death of his Father, he was *again Inaugurated* into his Kingdom?⁷² He undertook the *Sole* Administration of Affairs, which he had before administred *Jointly* with his Father. The Phrase is of this Importance, in two other Instances. [Compare, 2. Chron. 1.1. and, 21.4.]⁷³

Thirdly. The Beginning of the Reign of *Uzziah*, (or *Azariah*) of *Judah*, must needs fall into the 16th Year of *Jeroboam* II. if his Reign be accounted from his Fathers Death; and yett it is said to begin in the 27th Year of *Jeroboam*. This drives us, to seek a Double *Epocha*, for the Reign of *Jeroboam*; and the Sacred History gives us a shrewd Intimation of such a Thing! Upon the Death of *Jehoahaz*, we find his Son *Joash*, paying a Visit unto the Prophet *Elisha*; and the Prophet then discoursing on the affairs of the War with *Syria*, wherein *Joash* had already been very successful, foretels, That he should be successful in but *Three Campaigns* more against them. Accordingly *Joash* governs alone, and prosecutes the War, for the *Three Years* ensuing. When those *Three Years* expired, because he could no longer expect Success himself, & because his Father had so done before him, he does entrust the Command of the Army and a Share in the Government, with his Son *Jeroboam*, who was doubtless a Prince of great Hopes, and proved afterwards the most potent and glorious of the Kings of *Israel*. Accordingly the *First Date* of his Reign, appears *Eleven* Years before the Death of his Father.⁷⁴

71 Whiston's tables (*Short View* 88, 89) juxtapose the scriptural years with the actual years of the kings' reigns. For Mather's excerpt, see Whiston (89–90).

72 2 Chron. 25:3.

73 Whiston, *Short View* (90, 91).

74 Whiston, *Short View* (91).

Fourthly. We suppose an *Interregnum*, in the Kingdome of *Israel*, after the Death of *Jeroboam* II. and another, after the Death of *Pekah*. Answering to 163 Years, and 2 Months, of the Kingdome of *Judah*, we find but 143 Years & some odd Months in the Kingdome of *Israel*.⁷⁵ It must therefore be observed, That *Hoshæa* began his First Imperfect Reign, upon his Murder of his Predecessor *Pekah*, Eight or Nine Years before his real Dominion, and the true Date of his Reign, in the Royal City, commenced. We read, 2. King. 15.30. *Hoshæa made a Conspiracy against Pekah, and Smote him, & Slew him, & Reign'd in his Stead, in the Twentieth Year of Jotham the Son of Uzziâh*. That is to say, In the Fourth of *Ahaz*. For *Jotham* himself Reign'd but *Sixteen Years* in all. But because there had yett no mention been made of *Ahaz's* Reign, therefore the old *Epocha* of his Predecessor *Jotham* is still made use of. But we also read, 2. King. 17.1. *In the Twelfth Year of Ahaz King of Judah, began Hoshæa to Reign in Samaria, over Israel, Nine Years*. Again; After the Death of *Jeroboam* II. we also find a Deficiency of several Years. And the two very short Reigns afterwards, which were over in *Seven Months*, and both the Kings came to untimely Deaths, are sufficient Indications of a very unsettled State of Affayrs. But that which renders an *Interregnum* here very little short of certain, is, the Divine Threatning in the Words of *Hosæa* the Prophet, who prophecied in the Reign of *Jeroboam* II. Hos. 10.3. *Now (or, e're long) they shall say, we have no King, because we feared not the Lord. What then should a King do unto us?* This propheticall Intimation of an *Interregnum*, is very observable!⁷⁶

Nevertheless, there are some Texts, which do not seem to favour the *Interregna* mentioned. We read, 2. King. 14.29. *Jeroboam slept with his Fathers, & Zachariah his Son Reign'd in his Stead*. And, 2. King. 15.30. *Hoshæa made a Conspiracy against Pekah, & Smote him & Slew him, and Reign'd in his Stead*. But it is no Wonder, that upon the Death of a King, he, who during the Interval fought for the Kingdome, and at last obtained it, is in some Sence said to *Reign in his Stead*, all that time; as Reigning over Part of the People; tho' his full Reign in the *Royal City* receive not its Date, until his peaceable Possession of the Crown, and his Dominion in the *Royal City* did commence afterwards. Tis enough, that during these Confusions, they had a greater Share of the Royal Authority, than any others; and when they obtained the *Royal City*, the Scripture takes notice of it, and the true Dates of their Reigns are derived from it.⁷⁷

In this Interval, we have an unusual Instance of *Early Ripeness*. | *Ahaz* is [52v] no more than *Twenty Years* old, when he began to Reign. He Reigns not quite *Fifteen Years* before his Son *Hezekiah* begins to Reign. Yett *Hezekiah* himself was then *Twenty Five Years* old. Whence it will follow, that *Hezekiah* was born,

⁷⁵ See Whiston's table, in *Short View* (89).

⁷⁶ Whiston, proposition XI, in *Short View* (47–48 and 91–92).

⁷⁷ Whiston, *Short View* (92).

when his Father was hardly *Eleven* Years old. This would be thought strange in our Age and Climate. And no doubt, it was an unusual Instance in *Judea* itself, seeing we have not in the whole Bible such another. Possibly the Inhabitants of those hotter Countreyes, come to Maturity sooner than in ours. Tis very certain, that *Mahomet*, in *Arabia*, a Region bordering on *Judea*, married one of his Wives, when she was but *Six* Years old, and bedded her in *Two* afterwards.⁷⁸ But there have not been wanting Exemples in the more Northern Regions, of as early Ability for Procreation, as that in *Ahaz*; which therefore ought not to seem Incredible. My Author will give me Leave to add, That the modern Travellers assure us, The People of *Java* at this day commonly marry & have Children at Nine or Ten Years of age; and generally leave Childbearing at or before Thirty.⁷⁹

It is also to be noted, That Chronology obliges us, to place the Reign of *Hezekiah*, a little before the Death of his Father *Ahaz*; But it was a very little while; so little an one as to afford very little Occasion for any Historical Relations. And this is the only Instance of a Double *Epocha* for a Reign, without some Intimation of it, in Sacred History.⁸⁰

4. From the Captivity of the *Ten* Tribes, to the Conflagration of the Temple, is, 134 Years &, 2 Months. This Account, will arise from the plain Summ of the Years of the Kings of *Judah*. And the 23 Years allow'd therein, from the 13th of *Josiah*, to the Great Captivity of the Jewes, in the 4th of *Jehojakim*, have in the Scripture, a very express Remark upon them. [See Jer. 25.1, 3.]⁸¹

But it is from that 4th of *Jehojakim*, and from the Beginning of the Reign of *Nebuchadnezzar*, that we are to date the 70 Years of the Captivity of the Jewes.⁸² This was the *Main Captivity*; tis that, whereof we read, 2. King. 24.3. *This came upon Judah, to remove them out of the Sight of God*. Tho' the Number of the Captives, is no where declared in the Scripture, yett it is evident, the *Main Body* of the *Two Tribes*, were now captivated. The Number of the Captives under *Jehojachin* is recorded, and it is plainly no more than a *Remnant* of the whole People; no more than 10000, the Reliques of the ancient Inhabitants. The last Captivity under *Zedekiah*, when the Temple was burnt, was chiefly confined unto *Three Strong Holds*; as being the only Places of Note and of Strength, which

⁷⁸ Whiston's source is *The True Nature of Imposture Fully Displayed in the Life of Mahomet* (1697) 52, by Humphrey Prideaux, D.D. (1648–1724), a notable English theologian and historian, whose popular *Life of Mahomet* went through three editions in the first year. A useful discussion of British attitudes toward Muhammad and Islam in the 17th and 18th centuries appears in D.A. Pailin's *Attitudes* (81–104).

⁷⁹ Whiston, *Short View* (92–93). Mather's "Author" is, of course, Whiston. Any number of seventeenth-century travel accounts could have been the source for Mather's information about the Javanese. See for instance, Christoph Frick (b. 1659), *A Relation of Two Several Voyages made into the East-Indies* (1700).

⁸⁰ Whiston, *Short View* (93, scholium).

⁸¹ Whiston, *Short View* (93–94).

⁸² Ussher's *Annals of the World* (1658) 83, 102, dates the Babylonian Captivity from 606–536 BCE, when a first group of Jews was taken into captivity in AM 3398–AM 3468.

were then remaining; so that the Body of the Nation was already removed unto *Babylon*.⁸³ And it was also in this *Fourth Year of Jehojakim*, that the Prophet *Jeremiah*, received and uttered, the Prophecy of the *Seventy Years*. See Jer. 25.1, 11, 12. Moreover, The Subjection to the King of *Babylon for Seventy Years*, was not peculiar to the *Jewes* only, but common to them with all the other Nations about them, as the Prophecy of *Jeremiah* intimates. Now, tis evident from a known Fragment of *Berosus*, that the famous Expedition of *Nebuchadnezzar*, in which he conquered all these Nations, was before his Fathers Death, in the Beginning of his Reign; and not at either of the following Captivities. By *Ptolomies Canon*, compared with *Xenophon*, there are from this Captivity, to the Beginning of *Cyrus's* Monarchy, when the Solution of the Captivity happened, just 70 Years. And certainly all these things together, place the Matter beyond all Disputation. —⁸⁴

This hinders not, but that the other Captivities, may be *Epocha's*, from which those who then went into *Babylon*, or others, upon proper Occasions, might reckon. *Daniel* was carried away in the *First Captivity*, and he mentions no other. *Ezekiel* was carried away in the *Second*; (with *Jehojachin*;) and he reckons from that.⁸⁵

And this is no Prejudice to a like Number of 70 Years, from the Beginning of the Siege of *Jerusalem* under *Zedekias*, till the Second Year of *Darius*; [Zech. 1.7–13.] nor to the Duration of the Two famous Annual Fasts of the *Jewes*. [Zech. 7.1, 5.] These Periods, were not those intended in the Prophecy of *Jeremiah*; nor should they create us any Difficulties about it.⁸⁶

We may here also observe the Importance of the *Three Lesser Captivities* of the *Jewes*, mention'd by the Prophet *Jeremiah*, which have been by some unreasonably expounded of the *Three Greater*, under *Jehojakim*, and *Jehojachin*, and *Zedekiah*. The Words are these. [Jer. 52.27–30.] *This is the People whom Nebuchadnezzar carried captive. In the Seventh Year, 3023 Jewes. In the Eighteenth Year of Nebuchadnezzar, he carried away captive from Jerusalem 832 Persons. In the Twenty third Year of Nebuchadnezzar, Nebuzaradan Captain of the Guard, carried*

⁸³ The burning of the Temple, which Ussher dates to 588 BCE, resulted in the deportation of a third group of Jews (2 Kings 24:10–25:21).

⁸⁴ Whiston's proposition XIII, in *Short View* (48–50). Ptolemy's *Astronomical Canon* (Whiston 544–45) lists the number of years and periods of reigns of the Babylonian, Medo-Persian, Greek, and Roman emperors according to the Julian Calendar. Nabopolassar (626–605 BCE) is considered to be the founder of the Babylonian dynasty (626–539 BCE), whose son, Nebuchadnezzar II, defeated the Egyptians before his father's death, destroyed the Temple of Jerusalem in 588 BCE, and captured the Tyrians in 586 BCE (*HBD*). The Medo-Persian King Cyrus the Great (c. 557–c. 530 BCE) conquered Babylon in c. 539 BCE. Xenophon relates Cyrus's conquest in his semi-fictional biography *Cyropedia* (c. 362 BCE). Whiston's source is Josephus (*Antiquities* 10.11.1), who excerpts a fragment of *Babylonika* (2), the famous history of Beros(s)us (fl. 290 BCE), a Babylonian scholar and historian of Egypt.

⁸⁵ Whiston, Corollary 1, in *Short View* (50). Dan. 1:1, 9:1–2; Ezek. 1:2, 8:1.

⁸⁶ Whiston, Corollary 3, in *Short View* (51).

[53r] away captive of the Jewes 745 Persons. All the Persons were 4600. Now the *Three Greater Captivities* were in the *First*, the *Eighth*, and the *Nineteenth* of *Nebuchadnezzar*; and therefore we may be sure, they were wholly | different from those which were in the *Seventh*, the *Eighteenth*, and the *Twenty Third*. The *Smalness* of the Numbers in the *Three Lesser Captivities* is also enough to distinguish them from the *Three Greater* ones. The *First* of these *Captivities*, in the *Seventh Year* of *Nebuchadnezzar*, was of 3023 Persons. It was *Three Years* after *Jehojakim*, by breaking the League he had made with him, had exposed himself unto his Fury, and Bands of *Chaldeans*, & *Syrians*, and *Moabites* and *Ammonites*, came upon him; and it was out of the whole Body of the *Jewes*, not confined unto the Inhabitants of *Jerusalem*. The *Second*, which was of 832 Persons, was during the Siege of *Jerusalem*, which happened in the *Eighteenth Year* of *Nebuchadnezzar*; And this was made up of the Inhabitants of *Jerusalem* only, or of such as fell away to the *Chaldeans* according to the Counsel of God, and so had their Lives given unto them. The *Third* was of 745 *Jewes*; that is to say, of such Reliques of the *Ten Tribes*, as at this time remained in their own Land. These were carried away captive, by an Officer of *Nebuchadnezzar*, while he himself was besieging of *Tyre*, in their Neighbourhood.⁸⁷

	Years	Months	Dayes
VI. From the Conflagration of the <i>Temple</i> , } to the Beginning of the <i>Christian Æra</i> . }	587.	4.	00. ⁸⁸

Nebuchadnezzar began to Reign in his Fathers Life-time; near two Years and an half, before his First *Thoth* in the Canon of *Ptolomy*; And his Reign is Dated in the Scripture accordingly, That *Nebuchadnezzar* was made Partner in the Kingdome, with his Father *Nabopolassar*, upon his coming General of his Army into *Syria*, is justly collected from several Passages in *Berosus*, which are extant at this Day in our Hands. But the Bible ha's rendred it yett more unquæstionable.⁸⁹

The Two First Years ascribed unto *Cyrus* in the Canon of *Ptolomy*, are by the Scriptures ascribed unto *Darius the Mede*; and this agrees exactly with the Account given by *Xenophon*. It is well-known, from the Book of *Daniel*, that after the Conquest of *Belshazzar*, or *Nabonadius*, King of the *Chaldeans*, and the taking of *Babylon* by *Cyaxares*, or *Darius the Mede*, and *Cyrus the Persian*, this *Darius took the Kingdome* for some Time before his Death, and the Succession of *Cyrus*.⁹⁰ But the *Canon*, taking no Notice of *Darius*, ascribes all the Space after

⁸⁷ Whiston, Corollary 3, in *Short View* (51–52).

⁸⁸ Whiston. *Short View* (95). His source is Ussher, *Chronologia Sacra* (ch. 2, p. 44).

⁸⁹ Whiston, Lemma 1, *Short View* (55). The fragments of Berosus appear in Josephus's *Antiquities* (10.11.1) and *Against Apion* (1.19–20).

⁹⁰ The confusion of names occurs because the Greek mathematician Ptolemy assigns to the Medo-Persian ruler Cyrus II (the Great), who conquered Babylonia in 539/538 BCE, what the Bible ascribes to Darius the Mede, the son of Ahasuerus (Dan. 5:30–31, 9:1). According to the Greek historian Xenophon, Cyrus diverted the Euphrates, surprised the palace guards of King

the taking of *Babylon*, or the Death of *Nabonadius*, to the Monarchy of *Cyrus*, & accordingly gives him *Nine Years*.⁹¹ Nevertheless, *Xenophon* who was perfectly acquainted with the History of *Cyrus*, assigns but *Seven Years* unto his Monarchy. The Year therefore, when *Cyrus* made his Decree for the Return of the Jewes, was the *Third Year* of his Reign in the *Canon*; and its first *Thoth* was, Jan. 5. 4178.⁹²

Jehojakims Captivity happened near the Middle of A. M. 3398. which was the First of *Nebuchadnezzar*. *Jehojachins* Captivity happened near the Beginning of *July*; A. M. 3405. and towards the Conclusion of the Eighth of *Nebuchadnezzar*, in the Scripture-Account.⁹³

Zedekiahs Captivity, and the Conflagration of the Temple, happened about *August*; A. M. 3416; at the End of the Nineteenth Year of *Nebuchadnezzar* in the Scripture-Account.⁹⁴

The Beginning of *Ezekiels* 390 Years of Gods Patience with the *Ten Tribes*, was at *Jeroboams* Idolatrous Feast, about the Middle of *November*, towards the Beginning of A. M. 3030. And so their Conclusion was towards the Beginning of A. M. 3420. Now that Captivity, of the Remnant of the *Israelites*, which putt a Period unto these 390 Years, was in the 23^d of *Nebuchadnezzar*.⁹⁵

The Beginning of *Ezekiels* 40 Years of Gods Patience with the *Two Tribes*, was at the Death of King *Josiah*, towards the latter Part of A. M. 3394. And so their Conclusion was towards the latter Part of A. M. 3434. Now it appears by the profane Chronology, that *Nebuchadnezzar* then conquered *Egypt*, and carried away with him, the Remnants of the *Two Tribes*, which had Retired thither.⁹⁶

Belshazzar (Nabonadius), and took Babylon in one night (*Cyropedia* 1.2.1 and 7.5.7–34). See also Josephus (*Against Apion* 1.20). Cyrus II set up Darius the Mede as ruler in Belshazzar's stead. Further confusion arises because the prophet Daniel is said to prosper during the reigns of Darius and of Cyrus the Persian (Dan. 6:28), as if to suggest that Darius preceded Cyrus. According to another tradition, Cyaxares II, son of Astyages and last king of Media, entrusted his son-in-law Cyrus II (ruler of Persia) with the government of Media (Xenophon, *Cyropedia* 1.5.2) and ordered him to conquer Babylon. However, Josephus's account differs from Xenophon's in that Josephus identifies Darius as the son of Astyages, who is "known to the Greeks by a different name" (Josephus, *Antiquities* 10.11.1, 4). Whiston (whose *Short View* Mather excerpts here) therefore identifies Cyaxares II with Darius the Mede (*CBTEL*, *OCD*, *HBD*).

91 See the Astronomical Canon of Ptolemy appended to Whiston (544).

92 Whiston, *Short View* (56). See Xenophon (*Cyropaedia* 8); Dan. 9.1, 24; 2 Chron. 36:22; Ezra 1:1–2. The year APJ 4178 corresponds to 536 BCE in the Gregorian calendar. The source for Whiston's date is given in Ussher's *Annals* (102).

93 Whiston, *Short View* (57). The years Anno Mundi 3398 and 3405 correspond to 606 BCE and 599 BCE in Ussher's *Annals* (82–84).

94 Whiston, *Short View* (58). AM 3416 corresponds to 588 BCE, in Ussher's chronology.

95 Whiston, *Short View* (58). Ezekiel's 390 years are given in Ezek 4:4–6. AM 3030 and 3420 correspond to 975/74 and 584 BCE respectively.

96 Whiston, *Short View* (58). Ezek. 4:6. AM 3394 and 3434 respectively correspond to 610 and 570 BCE, in Ussher's *Annals* (81, 85).

Nebuchadnezzar's Death, and the Succession of his Son, *Evil-Merodach*, or *Ilvarodamus*, happened about *March*; A. M. 3442.

The Solution of the Captivity, in the Beginning of *Cyrus's* Monarchy, happened 70 Years after the main Captivity; and near the Middle of A. M. 3468.⁹⁷

The Beginning of the 70 Years current, of *Gods Indignation against Jerusalem & the Cities of Judah*, was at the Return of the *Chaldeans* to besiege those Places, after the Flight of the *Egyptians*; About the End of *May*; A. M. 3415. And so their Conclusion must be between the same Time of the Year; A. M. 3484, and, 3485. Now the Time of the mention of these 70 Years, was towards the End of *February*, in the Second Year of *Darius Hystaspis* in the *Canon*.⁹⁸

[54v] | The Commencing of the 70 Years current Duration, of two *Jewish Annual Fasts*, for the Destruction of the Temple in the *Fifth* Month, and the Murder of *Gedaliah* in the *Seventh*, was at the Time of those Disasters; in the last Month but one, of A. M. 3416. and the First of A. M. 3417. And so their Conclusion, must be; for the one, between A. M. 3485; and 3486: For the other, between A. M. 3486, and 3487.⁹⁹

In the famous Astronomical *Canon* which upon all the Experiments imaginable, we find to be Incontestable, the Year of the Conflagration of the Temple, namely, A. M. 3416. answers to the Year of the *Julian Period*, 4126. To this add, 587 Years, and 4 Months, and we come to the End of A. P. I. 4713. And it is well known to all Chronologers, That this was the very Year præceding the *Christian Æra*.¹⁰⁰

This may suffice for a short View of, *The Chronology of the Old Testament*. – The learned Gentleman from whose Labours I have extracted it, has in this one short View, so established every thing, as to putt an End unto Thou-

⁹⁷ Whiston, *Short View* (59). AM 3468 corresponds to 536 BCE, the year to which Ussher (*Annals* 102) assigns Cyrus's edict to allow the Jewish captives to return to the Holy Land (2 Chron. 36:22–23; Ezra 1:1–2).

⁹⁸ Whiston, *Short View* (59). Zech. 1:7, 12. Jer. 25:3. AM 3415, 3484, and 3485 respectively correspond to 589, 520, and 519 BCE. See Ussher's *Annals* (90, 110, 111).

⁹⁹ Whiston, *Short View* (59–60). A Jewish governor of Judah, Gedaliah was appointed by Nebuchadnezzar after the fall of Jerusalem (1 Kings 25:22). Gedaliah was assassinated by militants who resented his collaboration with Babylon. The destruction of the Temple and the murder of Gedaliah, resulting in another train of captives to Babylon, was commemorated by the two fasts here mentioned (Zech. 7:1, 5) (*HBD*). AM 3416, the year of the Temple's destruction; and AM 3417, the year of Gedaliah's assassination, correspond to 588 and 587 BCE respectively. Whiston (and Mather) therefore date the beginning of the 70-year captivity from this period, ending either between AM 3485 and 3486 (519 and 518 BCE) or between AM 3486 and 3487 (518 and 517 BCE) according to Ussher's *Annals* (109–113).

¹⁰⁰ Whiston, *Short View* (60). According to Ptolemy's *Astronomical Canon* (Whiston 544–45), the fall of the Temple occurred in 4126 (Julian Calendar), which date corresponds to AM 3416 (588 BCE) in Ussher's *Annals*. The birth of the Messiah was to be expected in APJ 4714.

sands of Disputations, and to render many and bulky Volumns, on these Points, altogether superfluous. For my Part, I have done with 'em!¹⁰¹

¹⁰¹ Mather's "learned Gentleman" is of course William Whiston, whose *Short View* Mather had here copied into his "BA" to reconcile the discrepancies between biblical chronology and the various calendars used in ancient history. In this manner, commentators tried to reassert biblical authority, which Hobbes and Spinoza had dared to dismiss by pointing at the many contradictions in biblical chronology.

102 Here begins Mather's commentary on Genesis, ch. 1 [55r–104v], which is his longest discussion of any single biblical chapter or issue in the entire "BA" manuscript. The length of this section does not come as a surprise: he recovers a cross-section of ancient cosmogony, early Enlightenment science, and philological and textual disputes about the authorship of the Pentateuch. In Mather's day, the Mosaic creation account underwent unprecedented scientific challenges, as Copernican heliocentrism replaced the ancient Ptolemaic geocentric cosmogony, Newtonian physics supplanted theological literalism, and the Peripatetics pitted their theory of the eternity of the universe against that of orthodox physico-theologians who sided with Moses that God had created the universe out of nothing. See Mather, *Christian Philosopher* (Essay I, pp. 18–19), A. D. White (vol. 1), I. B. Cohen, A. Rupert Hall, and P. Stearns (chs. 1, 5, 10), T. Hornberger, G. McColley, and R. Smolinski's "How to Go." Significantly, Mather is highly sensitized by the controversial debates of his time as he tries to reconcile both ancient and modern theories of creationism. He does not as yet see any contradiction between the two separate creation accounts (Gen. 1:1–2:3 and Gen. 2:4–25) or the many duplicate narratives in the OT as the next generation would do, because he writes more than twenty-five years before Jean Astruc (1684–1766), French physician and biblical philologist, posited in his *Conjectures sur les Mémoires originaux* (1753) that Genesis was compiled from two separate documentary traditions – the Elohist and the Yahwist traditions. Nevertheless, Mather does address some of the main philological issues raised by Maimonides, Hobbes, Spinoza, Richard Simon, and Jean LeClerc (See R. Smolinski, "Authority").

In a different hand than the remainder of the holograph manuscript of "BA," Mather's first excerpt [55r–57r] is from Thomas Pyle (1674–c. 1756), an Anglican clergyman and prebendary of Salisbury, whose 2-volume *Paraphrase with Short and Useful Notes* (1717) was accessible to Mather at Harvard (*Catalogus Librorum* [1725], supplement, p. 111). Pyle's paraphrase appeals to Mather because its distinctly Newtonian flavor never seriously compromises conservative exegesis of the Mosaic creation. In § (1.), which Mather excerpts from Pyle's commentary on Genesis in *Paraphrase* (1:1–2), Pyle rejects the ancient Peripatetic idea of the eternity of the universe (Aristotle, *De caelo* 1.10–12, 279b–283b20). Plato's argument about the cosmos created from the four elements of fire, air, water, and earth (*Timaeus* 28a–38b) posited an alternative theory, decidedly more in line with the Mosaic creation, but still open to speculation. It led not only Justin Martyr (*Apologia* 1.10, cf. *Hortatory Address to the Greeks* – all in *ANF* 1:165, 273–89), but also Clemens Alexandrinus (*Stromata* 5.14) to speculate about the creation of the universe from pre-existing, albeit formless, matter. Philo Judaeus, however, attacked this position as unscriptural (*De somniis* 1.13.76), because it conflicted with the concept of the creation out of nothing (2 Macc. 7:28; Genesis Rabbah 1.9). Similarly, Theophilus Antiochenus (*Apologia ad Autolyicum* 2.4, in *ANF* 2:95), Irenaeus (*Adversus haereses* 2.10.2–4, in *ANF* 1:370), Ambrose (*Hexameron* 1.1.1.1–2), and many others, eventually codified the dogma of *creatio ex nihilo*, the creation out of nothing. How hotly this issue was debated in the seventeenth century can be seen in Edward Stillingfleet's *Origines Sacrae* (bk. 3, ch. 2, pp. 421–69), John Milton's *De Doctrina Christiana* (1.7) and *Paradise Lost* (7.170–242), and in Joshua Sylvester's translation [1640] of Guillaume du Bartas's *Divine Weeks and Works* (1.1.219–97) – and even long before him in Moses Maimonides's *Guide for the Perplexed* (2.1–30) – who felt increasingly defensive about the tradition that God created the universe a little more than 5,600 years earlier. Mather, like Stillingfleet, rejected the Peripatetic heresy; frowned upon the Necessitarians such as Thales and Tully who conceded that an Efficient Cause had formed the universe out of preexisting, eternal matter (Material Cause), in Tully (*De natura deorum* 1.25); decried Epicureans (such as Lucretius and Democritus) who, though denying the eternity of the universe, insisted that it came about through blind chance and accidental coalescence of atoms (*De rerum natura*

Q. A Just Paraphrase on the First Chapter of *Genesis*, agreeable to the Modern Discoveries?

A. Take what Mr. *Pyles* has given us.

- (1.) The World did not exist from all Eternity, by Necessity of Nature, nor did it, or any Part of it, come into being by chance and Fortune, but all things whatever, whether Visible or Invisible, Material, or Immaterial were in the beginning created, by the Power of that infinitely Wise, Good, and Alsufficient being whom we call GOD.
- (2.) And being now by divine direction to give Such a Particular Account of the Creation of our Earth, and of those Parts, that have a Special Relation to it, as may be Sufficient toward our Religious Acknowledgment of the Great Creator; I observe in general, that its Materials were at first at the time when this Account begins, in a confus'd, and disorderly State, consisting of an Irregular Mixture of Solids and Fluids thrown together: and were reduced into the Beautifull order wherein we now behold them by the Powerfull Operation of the Divine Spirit in the following Manner, within the Space of Six Days.¹⁰³
- (3, 4, 5) Preparatory to which, the first thing done, was such a Separation of the gross and heavier, from the lighter, and more fine Parts of the Chaos, as might in a good measure prepare the Earth (as in like Manner the rest of the Planets) for the Reception of Light, from the Sun, and Stars, for the use and benefits of its inhabitants, and by its Warmth to nourish the Plants, and animals it was to be stored withal. And then by Means of regular, & proper Motions, to cause a Continual Succession of Light, and Darkness upon the Several Parts of the Earth. These Causes and Effects obey'd the Will of the Almighty Creator, who saw them most Perfectly to answer the Wise and Good Ends He designed them for: this was the Work of the first Day; and hence is dated the Beginning of our Day and Night.
- (6, 7, 8) Within the Space of one Natural Day more, this Separation was brought to Such a degree of Perfection that the Main bulk of the heavier Fluids were Sunk down toward a Center, while a Considerable Number of their lighter Parts remained Suspended above, at Some distance from the

1.146–249, 1008–52; Dionysius the Great [d. c. 264], bishop of Alexandria *Extant Fragments* 2.1–3, in *ANF* 6:84–88); and objected to the Cartesians who insisted that the universe came about through mere mechanical laws that determined the motion of matter. In his *Christian Philosopher* (Essay IV, p. 40), Mather argues that since the particles of light emanating from the sun diminish its volume (albeit ever so small), it is evident “that the Sun had a Beginning; it could not have been from *Eternity*; *Eternity* must have wasted it: It had long ere now been reduced unto less than the *Light of a Candle*.” Mather extracts this argument from George Cheyne, *Philosophical Principles of Natural Religion* (1705), ch. 1, pp. 95–98. A still useful discussion of the hexaemeral tradition among the Ante-Nicene and Post-Nicene Fathers is F.E. Robbins’s *The Hexaemeral Literature* (1912).

103 This and subsequent paragraphs (§§ 1–31) are taken from Pyle’s *Paraphrase* (1:1–9).

Earth, in Clouds or Vapours kept up there, and continually Supplied by Exhalations from the Waters of the Earth; So that there appeared between these Clouds above, and the great Collections of Waters below, a free, lightsome, and open Space, Strech't, as it were over the whole Surface, and this is what we call, the Firmament, or Air, or Atmosphære, or Heaven.

- (9, 10) These lower Waters thus collected and Spred over the Surface of the Earth, were in the Next Place, to be gathered closer together, and thrown into their Proper Receptacles to uncover, and leave dry the rest of the Earth, and form the whole into a Terraqueous Globe fitted for the Maintenance of Such Plants, and Animals, wherewith its Several Parts of Land, and Waters were to be Provided. Accordingly these Waters were, by divine Power made to Subside in the Caverns, and Channels provided for them making the distinction we now See between Sea, and Land, wisely Proportioned, and Exactly adapted to the Good Ends they were designed for.¹⁰⁴
- (11. 12. 13.) For Now those Parts of the Globes, that were drained of their Waters, and Exposed to the kind Influences of Increasing Light, were in a Condition to Nourish that Great Variety of Grass, Herbs, trees, & Plants wherewith GOD had Stored them, giving to Each of these Vegetables its proper Seed for the Propagation of its Kind, and accordingly, they now began to Shoot and Grow up for the Sustenance and Gratification of the Animals Providence intended them for, and for the benefit whereof they were most wisely contrived, and these two things took up the Work of the Third Day.
- [56v] (14. 15.) The Sun, and Stars which at the first Separation of the Earths Materials, began (but imperfectly) to Shed their Light, and Influences, on it were, by the End of the Fourth | Day, (the Air, or Atmosphære being compleat and Clear) come to their full Lustre; and appeared those Perfectly luminous and Splendid Globes we now See them to be, and came in all respects, to Serve the wise Purposes the Creator intended them for, with Relation to this our Earth, and its Inhabitants, Particularly those of Making the distinctions between Day, and Night; with that Gratefull Variety of Seasons, Spring & Summer, Autumn, & Winter of which the Year Consists; all which they most regularly Produce by their Revolutions to or from us, as their Motions are with respect to the Earth, or those of the Earth with respect to them, thus Successively and constantly to consist to the End of the World.
- (16.) Among these Glorious Luminaries The Wise Creator appointed two that by their Proportionate apparent bigness, distance, and Situation, should

¹⁰⁴ Mather's immediate source is Pyle's *Paraphrase* (1:3–4), but Pyle's ideas are borrowed from *Astro-Theology* (bk. 5, ch. 4, pp. 105, 119, 128, 130), by William Derham (1657–1735), the influential Anglican clergyman, physicist, and member of the Royal Society of London. First published in 1715, Derham's *Astro-Theology* was extremely popular and went through many editions until 1777. Mather corresponded with Derham and quoted him at length in his *CP* and elsewhere.

be of Special use, and Benefit to this our Earth, viz. the Sun, by his Presence in the Daytime, to give his comfortable and full Light, by Suitable turns to the Inhabitants of its Several Parts, and to Nourish its Plants, and animals: and the Moon along with the other Stars of greater distance, and less apparent light, to Supply in Some Measure the Suns Absence, and to allay the Darkness of the Night.

- (17. 18. 19.) All these bodies GOD placed, & ranged at Such convenient Distances with respect of their bigness and the Powers they have on other Bodies about them, & ordered the Revolutions between them and this our Earth with Such Perfect Wisdom and Proportion as compleatly answered these, and all other Good Purposes His Providences foresaw, and graciously intended them for. And thus concluded the Work of the Fourth Day.¹⁰⁵
- (20. 21.) The Waters being now fitted to relieve and nourish Such Creatures as were by divine Wisdom intended to inhabit them, were upon the fifth Day Stored with all the Various Kinds of Such fish as dwell only in that Element; and of Such Fowl as Swim upon and feed in the Water, or fly about in open Air; At the Same time were produced those vast, & bulky Creatures, Such as the whale, the Crocodile and others of the large and Uncommon Size together with every Species of Water Animals; fish, or fowl some whereof live wholly in the Sea, or rivers, while others of an Amphibious Nature, can Subsist either by land or waters.¹⁰⁶
- (22. 23.) To all these GOD was pleased to give a Power and inclination to Propagate their kind, and in Such degrees to Increase, and multiply as might best Serve the wise Purposes they were Created for. Causing the fishes to Spawn in Such Abundance, as is Proportionable to the vast compass of waters inhabited by them and the Fowls tho' in less Numbers, yett Sufficient to replenish the Places they were to live in. All and Each of them is so perfect, and exact a Measure as was suitable to the Natures, and might best answer the uses, and necessities of Mankind.
- (24. 25.) In like Manner the Dry land being now furnished with Grass, Herbs, and Plants, and all provision for the Maintenance of land animals, the Creation of these was the Next Work of the Divine Workmanship. On the Sixth day therefore were Produced all the Several kinds of Beasts wild, and tame; with all the Innumerable train of Reptile Species, whether Such as creep on their Belly as worms & Serpents, or Such as by the Shortness of their leg seem to Creep, or Such as creep, and fly, as flies, bees, Wasps these were by the almighty Power all framed out of the *Earth*, as the *fish*,

¹⁰⁵ Pyle (*Paraphrase* 1:5) alludes to Derham's discussion of the celestial bodies, in *Astro-Theology* (chs. 3, 6, 7).

¹⁰⁶ Mather here skips the following passage from Pyle's *Paraphrase* (1:6): "The Word *Tanim* signifies any Creature of extraordinary Strength and Bulk, and is used sometimes of the whale, sometimes of the Crocodile, as [Samuel] Bochart and Job Ludolphus have very clearly proved."

[57r] *fowl*, and all *Water Animals* were out of the Preexisting Matter of the Water; brought out in their full, and perfect Growth; endowed with the faculty of propagating, preserving and continuing their Several Species by generation, in Such numbers, and Methods, as were most agreeable | to the wise Purposes of their existence.

(26, 27,) Thus was our Earth compleatly finished in both its Parts of Sea and land: all this fair and plentiful Provision being designed for the Use and Enjoyment of a Race of Creatures noble and excellent. This was mankind; the first Pair whereof were created upon the Conclusion of this Sixth Day; consisting indeed of a Body made out of the Earth, but by almighty Power, and Wisdom wrought into a most lovely, and exquisite Frame; and of a Soul united to it, of Immaterial Spiritual, and Immortal Substance, endowed with the admirable Faculties of understanding will, and freedom of Choice for the government of all his Actions and Passions, and his Continual Improvement in Purity Wisdom, and Happiness. Thus qualified to be the Lord of this Earth, and in these respects made the faint Image, and Resemblance of his Creator, to whose glory he was to enjoy all the Furniture, and to have Dominion over the Creatures of the lower world.

(28.) In them therefore in common with other Animals, the Almighty implanted the inclination, and Power of propagating by generation in order to replenish the World with Men, & Women; under whose Subjection he putt all the Several Species of Creatures; giving them the Priviledge of cultivating and improving the Earth into a Pleasant habitation for themselves by Subduing the more Wild, and unruly Kinds of Animals, and (afterwards) granting them free use of Such of them as were proper for their Food, and Nourishment.

(29, 30.) For in the Primitive and Pure Condition of mankind after his first Creation, and when the Earth continued in its original State of fertility, The Fruits Herbs Plants and Trees afforded nourishment most Pleasant and Sufficient for Man, as well as for all other Creatures; and were accordingly, now at first, appointed them for their food.

(31.) And thus with Creation of Man was this our World compleately finish'd at the End of the Sixth Day: and all its Parts appeared in the most Perfect Manner to answer the excellent Purposes of the all Powerfull, and Wise GOD, by whose Good Providence it is continually Supported, governed and preserved.¹⁰⁷

[58v] [blank]

¹⁰⁷ Here ends the excerpt from Pyle's *Paraphrase* (1:1–9).

293.

Q. Wee must grant that a Divine *Inspiration*, directed the Pen of *Moses*, to single out what should bee *True* and *Fitt* in his Writing of his *Genesis*; but wee may suppose also, an Use of credible *Tradition*, in handing down unto him those famous Memorables: I pray, what was there in the Circumstances of this *Tradition*, to render it the more credible unto all Gain-Sayers? v. 1.

A. You know the Father of *Moses*, was *Amram*, the Son of *Levi*. Now, *Levi* lived *Thirty Three Years* with *Isaac*; *Isaac* lived *Fifty Years* with *Shem*; *Shem* lived *an Hundred Years* with *Methusela*; *Methusela* lived *Two Hundred and Threescore Years* with *Adam*. So that from *Adam* to *Moses*, the Course of Tradition, in the Families of the Faithful, ran so easily & certainly along, as to render the Truth of it unquestionable, tho' the greater Assurance of *Inspiration* had not been thereunto superadded.¹⁰⁹

692.

Q. The Antiquitie of the *Mosaic* Writings, in Comparison of others, What is it? v. 1.

A. That the Writings of *Moses*, were most Ancient and Long before all others, is proved by several of our *Ancients*. You may Date his Books about A. M. 2460. which was more than 400 Years before the *Trojan War*; but before that War, wee hear not of any Writers whatsoever; yea, it was not until above a 1000 Years after it, that the oldest Historian appeared, except you'l take those Fabulous Ones, *Dares Phrygius*, and *Dictys Cretensis*, to bee otherwise than what they are.¹¹⁰

¹⁰⁸ See Appendix A.

¹⁰⁹ The argument that the tradition of the creation was handed down from Adam to Moses without interruption was a popular one in Mather's time and beyond and can be found in many places, including Robert Jenkin's *Reasonableness and Certainty* (1700), bk. 2, ch. 1, pp. 49–56; and in Adam Clarke (c. 1760–1832), the distinguished antiquarian, Orientalist, and Wesleyan divine, whose *Commentary and Critical Notes* (1810–25) 1:26, is still consulted today. Mather here draws on *A Commentary upon the Historical Books of the Old Testament* (1727) 1:1, by Simon Patrick (1625–1707), bishop of Ely, whose *Commentary* on Genesis appeared as early as 1694. Patrick's work is one of Mather's principal (and frequently unacknowledged) sources for "BA."

¹¹⁰ In the seventeenth century, the antiquity of the Mosaic Pentateuch and the reliability of its chronology were questioned by many who pointed at the discrepancies between the Mosaic chronology and those of the Egyptian, Chaldean, and Greek historians. Edward Stillingfleet for one defended the Pentateuch by sneering at the fabulous origin of heathen histories and their notoriously exaggerated chronology (*Origines Sacrae*, bk. 1, chs. 1–6; bk. 2, chs. 1–2). Mather's defense in this and subsequent paragraphs [59r–61r] is extracted from John Edwards (1637–1716), a noted English Calvinist divine, minister of Trinity Church, and fellow of St.

There were some other Books of the Old Testament, which were also before the Writings of any Pagans whatsoever.¹¹¹ They¹¹² tell us, that *Zoroastres*, and *Mercurius Trismegistus*, flourished in the Dayes of *Moses*; but you'l find no less than four *Zoroastres*'s, unto which of whom, none can tell to ascribe the Composures that go under that Name: and about *Hermes Trismegistus*, there are so many Disputes, that wee can tell neither when hee lived, nor whether hee composed any Books at all.¹¹³

John's College, Cambridge, whose *Discourse Concerning the Authority, Stile, and Perfection of the Books of the Old and New Testament* (1693) 1:189–93, 269, 270, 271–73, supplies Mather with detailed information. Among the “Ancients” who “proved” that Moses (frequently associated with Taautus, Thoth, and Hermes) invented the art of writing are such early historians as the Phoenician Sanchoniathon, the Chaldean Berossus, the mythical Orpheus, and many others – if the enumerations in Eusebius's *Praeparatio evangelica* (1.9.31d–32a; 1.10.36a; 9.27b; 10.9–11) can be trusted. By and large, this pious notion is not supported by such of the ancients as Plato, Diodorus Siculus, Lucan, Cicero, or Tacitus, see Iversen's *Myth of Egypt* (41–48). Edwards adopts from Ussher's *Annals* (12–25) the approximate date A.M. 2460 (c. 1560 BCE) for the writing of the Pentateuch and for the Trojan War A.M. 2894–2884 (c. 1194–1184 BCE). The oldest Ionian prose historian – according to Herodotus (5.36, 125) – is Hecataeus of Miletus (c. 6th–5th c. BCE). The French Protestant divine Pierre Jurieu (among many others) disagrees with the pious claim of the Mosaic invention of the art of writing, in *A Critical History* (1705), bk. 1, ch. 4, pp. 30–32, for even the Greek historian Diodorus Siculus (1.9.2; 1.16.1; 1.68.5; 3.4.1–4), who bestows this honor on the Egyptians and Syrians, corrects himself by insisting that the Egyptians received this art from the hieroglyphics of the more ancient Ethiopians (3.4.1ff.). Mather dismisses both Dares Phrygius (Homer's *Iliad* 5.9) and Dictys Cretensis (*Scholia in Iliadem* [Erbse] 1.108–9b, scholion 11) as fabulous, because the former was believed to be a Trojan Priest of Hephaistos and the supposed author of a Phrygian *Iliad* (a Latin version of which survives as *Historia de excidio Troiae*) whereas the latter, a companion of Idomeneus and Meriones in the Trojan War, claimed to tell the true story of Troy, in his *Ephemeris Tou Troikon Polemon*. See also R. M. Frazer, Jr. (“Introduction” 3–15).

111 Perhaps Mather has in mind the *Book of the Wars of the Lord* (Num. 21:14–15) and the *Book of Jasher* (Josh. 10:13; 2 Sam. 1:18) – both mentioned in the Bible, but apparently lost.

112 “They” does not refer to these lost books, but to the “Writings of the Pagans.”

113 *Zoroastres* is the Greek name for *Zarathustra*, the ancient Persian founder of fire worship with the God Ahuramazda at its center (Xenophon, *Cyropedia* 8.3.11, 24; 8.7.3). In his *Natural History* (30.2.3), the Roman historian Pliny the Elder, aka. Gaius Plinius Secundus (CE 23/4–79), dates Zoroaster's book *Avesta* to 6,000 years before Plato, yet modern historians variously assign 1768 BCE, 630 BCE, or 599/98 BCE as dates for Zoroaster's writing (see P. Kriwaczek). In *Historia Religionis Veterum Persarum* (1700), cap. 8, pp. 150–61, the distinguished Orientalist Thomas Hyde (1636–1703) insists that Zoroaster was a contemporary of the Persian ruler Darius Hystaspes I (6th–5th c. BCE). Because of the vastly diverging time periods assigned to Zoroaster's life, Mather speaks of four different prophets by that name. Mercurius Trismegistus, also called Hermes Trismegistus (Hermes the thrice great) is the Hellenized Hermes, associated with the Egyptian god Thoth, and is described in his various incarnations and as author of the *Corpus Hermeticum* in Cicero's *De natura deorum* (3.22), in Lactantius's *Divinarum institutionum* (1.6; 4.6; 7.18), in Eusebius's *Praeparatio evangelica* (1.9.31d–32a; 1.10.36a–d), and in St. Augustine's *De Civitate Dei* (8.23–26). Since this Mercurius or Hermes appeared in so many guises, periods, and religions, Mather's legerdemain dismissal of the 42 books, which Hermes Trismegistus is to have written on all aspects of Egyptian religion (see Clemens Alexandrinus, *Stromata* 6.4 and 6.15.132), becomes evident. Mather's reservations about Hermes's *Corpus Hermeticum* are further informed by the Renaissance debate about their

Manetho, or, *Manethos*, who writ the *Egyptian History*, lived but in the Time of *Ptolomæus Philadelphus*. The *Phœnician Antiquities*, written in their Tongue, by *Sanchoniathon*, turned into Greek by *Philo Biblius*, in the Dayes of *Adrian* (of which Version, *Eusebius* ha's præserv'd us a famous Fragment) tho' *Scaliger* go to prove them suppositional; *Bochart* ha's prov'd them Genuine. But still this Phœnician Author, for his Date, must come far short of *Moses*.¹¹⁴

| If the Friar *Annius*, ha's imposed on the World, under the Name of *Berosus*, the Chaldæan; yett there was an old *Berosus*, of whom *Josephus* and *Eusebius* have præserv'd Fragments. However, hee lived not so early as *Moses*; nor any earlier than *Manetho*.¹¹⁵ [60v]

trustworthiness, especially after Isaac Casaubon's *De rebus sacris et ecclesiasticis exercitationes XVI* (1614), Exerc. I, sec. 10, pp. 70–87, dismissed them as early Christian forgeries. The *Corpus Hermeticum* was accessible at Harvard in Marsilio Ficino's Greek and Latin edition *Mercurii Trismegisti Poemander* (1554); see *Catalogus Librorum* (1723) 51. Mather also owned a copy of Hermann Conringius's *Hermetis, Ægyptiorum* (1674). For the Renaissance debate about the authenticity and significance of the *Corpus Hermeticum*, see F. Yates's *Giordano Bruno* (1–46, 433–70), F. Purnell's "Francesco Patrizi," and B. P.openhaver's *Hermetica* ("Introduction" xiii–lix).

¹¹⁴ The Egyptian priest Manetho of Heliopolis authored *Aigyptiaka*, a history of Egypt in Greek, for Ptolemy II Philadelphus (282–229 BCE), ruler of Egypt. Manetho's work covers Egypt's mythical history to 342 BCE, in 30 dynasties, but survives only in fragments in *Praeparatio evangelica*, by Eusebius Pamphilus (c. 260–c. 340), bishop of Caesarea, and in Josephus Flavius's *Antiquities*. Sanchoniathon (Σαγχουνιάθων, Sanghuniathon, Sanchuniathon) was a Phœnician historian, whose treatise on Phœnician cosmogony and civilization recorded the teachings of the Priest Hierombalos. According to the Greek scholar Philon of Byblos (c. 70–c. 160 CE), Sanchoniathon lived before the Trojan War and taught at Beirut. In the days of Adrian, i.e., Roman Emperor Publius Aelius Hadrianus (117–28 CE), Philon of Byblos translated Sanchoniathon's work and integrated it in his own *Phœnician History* of which only fragments survive in Eusebius's *Praeparatio evangelica* (1.9–10; 4.16; 10.9). The learned French scholar Joseph Justus Scaliger (1540–1609), professor of belles lettres at Leiden (also Leyden), dismisses the antiquity of Sanchoniathon as a contemporary of Moses, in his *Notitiae in fragmenta Graecæ*, in *Opus de emendatione temporum* (1598) 140, and in his *Thesaurus temporum* (1608). But the erudite French Huguenot scholar Samuel Bochart (1599–1667), whose popular *Hieroicoicon* (1646, 1663) and *Geographia Sacra* (1646, 1674, 1707) were quoted by all scholars of the period, identifies Sanchoniathon as a contemporary of the biblical Gideon, who lived c. 200 years after Moses; asserts Sanchoniathon's work as a reliable source, in *Geographia Sacra* (pars 2, lib. 2, cap. 17, col. 771–90); quotes Manetho affirmatively, in *Hieroicoicon* (pars 1, lib. 1, cap. 9, col. 61; lib. 2, cap. 14, col. 198; lib. 2, cap. 57, col. 699; lib. 3, cap. 1, col. 715); and describes the transmission of Manetho's history in *Geographia Sacra* (pars 2, lib. 1, cap. 4, col. 357). Unless otherwise specified, all references to Bochart's *Geographia Sacra* are to the 1707 (4th) edition; all references to Bochart's *Hieroicoicon* are to the 1663 London edition. Edward Stillingfleet also dismisses Manetho's account as unreliable, in *Origines Sacrae* (bk. 1, ch. 2, pp. 25–39). Pierre Jurieu, whose work Mather puts to good use throughout "BA," tells much the same story in his *Critical History* (1705), vol. 2, part 3, ch. 4, pp. 50 ff. Given this contradictory evidence, Mather's hesitation is justified. Henry Dodwell's *Discourse Concerning Sanchoniathon's Phœnician History* (1681) also debates the credibility of the ancient Phœnician historian. For Scaliger's significant contribution to the study of ancient chronology, see Grafton, "Joseph Scaliger."

¹¹⁵ Mather's source for this and the subsequent paragraphs is, of course, John Edwards's *Discourse* (1:271, 272, 273). Ludovicus Vives (1492–1540), Raphael Volateranus (1455–1522),

Orpheus and *Musæus*, the oldest of the Greek Poets, pretend for the Days of *Gideon*; but still this was 200 Years after *Moses*. *Dares Phrygius*, and *Dictys Cretensis*, who write the *Trojan War*, pretend not until 200 Years after them; and an 100 Years after this, is the oldest Pretence of *Homer*, and 150 Years after *David*, the better Poet.¹¹⁶

The Greeks had no sooner gott Letters, but they fell to Writing of meer Fables: for which Cause, *Eusebius* complains, That there was nothing but Fables in their Histories, before the Beginning of the *Olympiads*, or the *Epoch* from the Instauration of those famous Games by *Iphitus*. But Men can't agree, when to commence this Epoch; whether in the Time of *Uzziah* K. of Judah. A. M. 3173.

and Melchior Canus (1509–60) – the latter in *De Locis Theologicis* (1563), lib. 11, cap. 6, pp. 360–82 – charged the Dominican Friar Joannes Annius, aka. Giovanni Nanni of Viterbo (1432–1502), with having forged the books of several ancient historians and published them in his *Antiquitatum variarum volumina XVII cum commentaria* (1498), esp. sections “Berosi Babylonici dignitate Chaldaei ad emendandos Antitutum errores” (lib. 1), pp. f–ii(v) – i–ii(r), and “Manethonis Historici quod post Chaldaeos historicos probator,” pp. i–ii(r) – i–iii(r). Annius of Viterbo claimed he had found the lost volumes of Berosus, the Chaldean priest of Belus (Babylon) and contemporary of Alexander the Great, and that these volumes should be part of Berosus’s fragmentary history *Babyloniaca libri tres* (c. 290 BCE). The extant fragments of Berosus’s genuine history complement Manetho’s *Aegyptiaca* and cover the history of antediluvian times from the creation to Nabonassar’s reign (747–734 BCE) and down to the period of Alexander the Great (356–323 BCE). Fragments of Berosus’s history survive in the Jewish historian Josephus Flavius, *Antiquities* (1.3.6, 9; 1.7.2; 10.1.4–5, 2.2, 11.1) and in *Against Apion* (1.19–20), as well as in Eusebius’s *Praeparatio evangelica* (9.11, 12, 16, etc.). An English translation of Noah’s travels to Italy – as imagined by Nanni – appeared in Richard Lynche’s excerpt *An Historical Treatise of the Travels of Noah into Europe* (1601). Aware of Annius’s forgery, but like many who found his material too compelling, Mather could not resist incorporating some of it in “BA” (on Gen. 6:22). The brilliant English Hebraist John Selden (1584–1654) derides Friar Annius’s forgery, in his *Jani Anglorum Facies Altera* (1610), lib. 1, pp. 1–10. Helpful studies of Annius’s forgery and its detection are E. N. Tigerstedt’s “Ioannes Annius” (2:293–310) and C. R. Ligota’s “Annius of Viterbo.”

116 Orpheus is the famed son of Apollo and Calliope, best known for his unhappy affair with Eurydice, commemorated in Virgil (*Georgics* 4.453–525) and in Ovid (*Metamorphoses*, bks. 10–11). The Orpheus myth has been dated to the seventh and sixth-century BCE, and Orpheus is generally considered the first poet and singer to whom much pseudepigraphic poetry in hexameter verse is ascribed – all collected in *Orphica*. Likewise Musaeus, purported author of *Hero and Leander*, is a mythical bard, who is closely associated with Orpheus. According to Plato (*Respublica* 2.364e), Musaeus and Orpheus are the offspring of “Selene and the Muses,” but Diodorus Siculus (4.25.1) identifies Musaeus as the son of Orpheus. Both Orpheus and Musaeus are associated with Moses in Hellenistic Jewish writing (see Stillingfleet’s *Origines Sacrae*, bk. 1, ch. 4, pp. 56–62; cf. Ralph Cudworth’s *True Intellectual System* [1678], bk. 1, ch. 4, sec. 17, pp. 294–308). For Homer and David, Mather seems to follow Ussher’s *Annals*, which assigns the date of death for the Israelite Judge Gideon to 1236 BCE (*Annals* 29), or roughly 200 years after Moses (1571–1451 BCE), in Ussher’s *Annals* (12, 28). As mentioned above, Dares Phrygius and Dictys Cretensis (Homer, *Iliad* 5.9) were believed to have participated in the Trojan War (1194–1184 BCE), according to Ussher (*Annals* 29). Ussher places the Greek poet Homer roughly 200 years after the Trojan War and 150 years after King David (1085–1015 BCE), relegating the dates for the blind bard of Chios to the ninth century BCE (*Annals* 34, 38). For the Renaissance debate about Orpheus as a progenitor of the *prisca theologia*, see D. P. Walker’s *Ancient Theology* (22–41).

or A.M. 3189. Eight Years before the Birth of *Romulus & Remus*, & 407 Years after The Destruction of *Troy*, or, about A.M. 3228. or, A.M. 3256. about 750 Years before Christ. *Varro's* Division of Times, into *Unknown*, and *Fabulous*, and *Historical*, the last of which, hee begins at the *Olympiads*, does illustrate this Matter.¹¹⁷

The most ancient Greek Historians, *Archilochus*, *Aristaeas Proconnesius*, *Hecataeus Milesius*, &c have nothing of their Histories præserv'd. *Herodotus* is the oldest Greek Historian extant; & therefore called, *The Father of History*: But his Historical Relations, begin a little before the Histories of *Ezra*, *Nehemiah*, *Daniel* make an End.

Briefly, consult *Clemens Alexandrinus*, and you'll see this Argument largely prosecuted.¹¹⁸

117 Mather's source for this paragraph is John Edwards (*Discourse* 1:272), but Edwards himself cribs his material from Ussher (*Annals* 56). Eusebius (*Praeparatio evangelica* 10.1–2, 7–8) complains about the fabulous nature of Greek mythical history and its whole-sale borrowings from Egypt and Chaldea. The foundation of the Olympic Games as religious rites are by Pindar (*Olympian Odes* 10.56–59) attributed to Heracles and took place in Olympia every four years; Pausanias (5.4.5; 5.9.4) relates that following a long interruption, King Iphitus of Elis, the son of Ephitos and contemporary of Lycurgus, the lawgiver, restored the festival at Olympia with some changes. James Ussher dates the first Olympiad to July 776 BCE (*Annals* 56). In Mather's time this date functioned as a fixed point in ancient historiography, allowing historians to establish a timeline for all other events. Mather's dates, which are borrowed from Ussher (yet at second hand from Edwards) are as follows:

Issue	AM	APJ	CE / BCE	Source: Ussher
Fall of Troy	2820	3530	1184 BCE	<i>Annals</i> (31 [29])
Uzziah's birth	3178	3888	826 BCE	<i>Annals</i> (52)
Uzziah, king of Judah	3194	3904	811 BCE	<i>Annals</i> (53)
First Olympiad	3228	3938	776 BCE	<i>Annals</i> (56)
Romulus & Remus	3256	3966	748 BCE	<i>Annals</i> (60)

The discrepancies in the dates given for King Uzziah (Azariah) of Judah occur in Edwards (*Discourse* 1:271–75), which Mather copies here. The Roman soldier, statesman, and voluminous writer Marcus Terentius Varro (116–27 BCE) is best known for his history of the Roman people, *De gente populi Romani* in four books. Here, Varro establishes a chronology, which allows him to calculate ancient Roman history from the foundation of Rome by the mythical Romulus and Remus (754/753), the Varronic era. In his *Antiquitates rerum humanorum* (41 books), Varro describes the history of the Roman people from mythical times to his day (books 1–25). His division into “*Unknown*, and *Fabulous*, and *Historical*” times – the latter beginning with the Olympiad (776 BCE) – proved to be an useful tool for aligning fixed dates in different calendars, and is emulated by Ussher (*Annals* 56), by the Italian historian, philosopher, and mathematician Giambattista Vico (1668–1744), in *Principles of a New Science* (1725) 2, and by the English mathematician Robert Hooke (1635–1703), in *Posthumous Works* (1705).

118 Excerpted from Edwards (*Discourse* 1:272–73), this paragraph refers to the Greek elegiac poet Archilochus of Paros (late 7th c. BCE); to Aristaeas of Proconnesius, a legendary character and compiler of the *Arimaspeia*, mentioned in Herodotus (4.13–16); and to Hecataeus of Miletus (fl. 500–494 BCE), an important Greek historian and geographer, whose works survive in many fragments in Diodorus Siculus (10.25.4) and elsewhere. Eusebius (*Praeparatio evangelica* 10.3–4, esp. 10.10.487d), with Julius Africanus's *Chronography* (bk. 3) at his elbow, similarly impugns Greek history as unreliable: “Until the beginning of the Olympiads no accurate history has been written by the Greeks, the earlier accounts being all confused and

Q. Does Pagan Antiquitie, take any Notice, of *Moses*, the first Penman of the Sacred Scripture? v. 1.

A. Yes. This was hee, that is by *Orpheus* called, Ὑδογενής, alluding to his Name of *Mosheh*, [Exod. 2.10.] which was given him on the Score of his being Drawn out of the Water.

Besides this, *Alexander Polyhistor*, *Philochorus*, *Thallus*, *Appion* (cited by *Justin Martyr*) *Manethon* and *Numenius* (quoted by *Origen* and *Eusebius*) *Lysimachus* and *Molon* (alleged by *Josephus*), *Chalcidius*, *Sanchoniathon*, *Justin*, & *Pliny* (in *Porphyrus*) do all celebrate him.¹¹⁹

in no point agreeing among themselves.” The Greek historian Herodotus of Halicarnassus (c. 484/480–c. 420 BCE) mentions Hecataeus of Miletus in his famous *History* (2.143), which was written before 425 BCE. Mather refers to the earliest events mentioned in Herodotus (the conflict between Greeks and Parthians) which Herodotus traces to the period of Croesus, king of Lydia (c. 560–546 BCE). This event precedes slightly in time the restoration of Israel under Cyrus, described by the OT Priest Ezra (6th–5th c. BCE) and by Nehemiah, governor of Judah (c. 445–433 BCE); and foretold by the Prophet Daniel who, in Mather’s time, was believed to have lived during the Babylonian Captivity (c. 606–c. 536 BCE) – according to Ussher’s *Annals*. Lastly, St. Clemens Alexandrinus (CE c. 150–c. 215), a theologian in Apostolic times, warns Christians not to trust Greek historians who mix actual with fabulous events (*Stromata* 1.21, 28).

119 This section to the end of [60v] is extracted from Edwards (*Discourse* 1:189–92), and Mather cites these authors to defend the pious notion that Moses was the most ancient historian of all antiquity. For this reason, Mather refers to Justin Martyr (CE c. 100–c. 165), one of the earliest Christian Apologists, who argues in his *Hortatory Address to the Greeks* (ch. 14), in *ANF* (1:279), that the ancient Greek mythic poet Orpheus acknowledged Moses as his teacher. Orpheus called him Ydogenes (water-born or Nile-born), in *Pseudo-Auctores Hellenistae* (Fragment, p. d, 76) and in Eusebius (*Praeparatio evangelica* 13.12.5, 36; 13.12.666a). Likewise, in his *Hortatory Address* (ch. 9), in *ANF* (1:277), Justin Martyr cites as evidence of Moses’s antiquity Alexander Polyhistor (c. 105–c. 40 BCE), a Greek grammarian, historian, and geographer, whose works survive only in fragments; Philochorus (c. 340–c. 260 BCE), an Athenian scholar-historian best known for his *Atthis* (17 bks.), a history of Greece; Thallus (2nd c. BCE), a Greek chronographer, whose history covers the period between the fall of Troy to the 167th Olympiad (c. 1184–c. 112/109 BCE); and Ap(p)ion (fl. 1st c. CE), a Greek grammarian, son of Poseidonius, and author of a book of wonders *Aigyptiaka*. Numenius of Apamea (fl. 2nd c. CE), a Platonist and Pythagorean, here cited by Origen of Alexandria (CE c. 185–c. 254), acknowledges Moses and Pythagoras as the source of all wisdom (*Contra Celsum* 4.51), in *ANF* (4:521). Eusebius (*Praeparatio evangelica* 9.6.411a; 9.8.411d; 9.6.13.415d) cites Numenius’s praise, “What is Plato, but Moses speaking in Attic Greek,” and Manetho’s alleged esteem of the Jewish Lawgiver. The Greek grammarian, mythographer, and author of *Nostoi*, Lysimachus (fl. 3rd c. BCE), not to be mistaken for Lysimachus of Pella; and Molon (2nd–1st c. BCE), also called Apollonius Molon, the Greek rhetorician, grammarian, and author of a tract *Against the Jews*, are both cited by the Jewish historian Josephus Flavius (CE c. 37–c. 100) and charged with misrepresenting Moses and Jewish Law (*Contra Apionem* 1.34, 2.15). Finally, Porphyry (CE 234–c. 305), the Neoplatonist philosopher, refers to the Hebrew Lawgiver, in *Vita Plotini* (secs. 20.48; 22.16, 20, 22); Sanchoniathon is the Phoenician historian mentioned before; and C(h)alcidius, a 4th–5th-century Christian commentator and translator of Plato, was greatly influenced by Numenius and Porphyry; Justin [Marcus Iunian(i)us Iustinus], the second, third, or fourth century CE Roman epitomizer of Pompeius Trogus’s *Historia Philippicae*, refers to Moses in Justin’s *Epitome T. Pompeius Trogus* (36.2); and Pliny (30.2.11), in discussing various forms of ancient magic, argues that “another branch of magic, derived from Moses, Jannes,

And *Moses*, is by *Diodorus* the Sicilian, placed in the front, of his famous Law-givers; only a little disguised under the Name of Μνευης; who, hee sais, received his Lawes of *Mercury*.¹²⁰

But why, of *Mercury*? Chronologers tell us, that the great *Mercurius*, called also *Trismegistus*, was contemporary with *Moses*.

But *Austin* tells us, in his famous Book, *De Civitate Dei*, that this *Mercurius* was Nephew to another *Mercurius*, whose Uncle was *Atlas*, the Renowned Astrologer; and belike, t'was hee that flourished in the Time of *Moses*.¹²¹

Very fitly then, did the Poets relate, how *Atlas* bore up the Heavens; when in the mean time, they only meant, our *Moses*; who, giving us the Records of the Worlds *Creation*, keeps up Heaven and Earth too, from sinking into a *Chaos*.¹²²

Lotapes ['Totape,' i.e. 'Yahweh'], and the Jews, but living many thousand years after Zoroaster." Finally, Porphyry mentions most of these authors in his *De abstinentia* (2.55–56). The English nonconformist divine Theophilus Gale (1628–78) maintains in his celebrated *Court of the Gentiles*, in 4 parts (1669–72) that the Egyptians, Chaldeans, Phoenicians, and Greeks stole their philosophy and philology from the Hebrew Scriptures. For a recent discussion, see S. Hutton's "Decline of *Moses Atticus*" (68–84).

120 Diodorus Siculus (fl. 1st c. BCE) of Agyrium (Sicily) is the author of *Bibliotheca historica*, a universal history in 40 books, and covers the period from the creation of the world to roughly 60 BCE. Although Mather claims that Diodorus Siculus (1.94.1–2) identifies "Mneves" with Moses, our Sicilian author clearly distinguishes between the Egyptian "Mneves" (a variant of the ancient king Menas) and the Judean "Mousen," the latter worshipping the god Ιαω; ("Iao" or "Jah") from whom he received his laws. Diodorus Siculus (1.94.1, see also 1.43.5–6, 1.45.1) praises Mneves as a great man and "the most public-spirited of all lawgivers," who received the laws from deified Hermes. (Compare with Strabo's *Geographica* 16.2.34–37). According to John Toland's *Origines Judaicae sive Strabonis de Moysae et Religione Judaica Historia* (1709), §§ 2–5, 24, pp. 103–16, 193–97, the Bishop of Avranches, Pierre-Daniel Huet (1630–1721) deliberately glosses over this distinction to uphold Moses's primacy, in Huet's apologia *Demonstratio Evangelica* (1679; 1690), Prop. IV, cap. 2, §§ 37–42, pp. 62–64. (All references to Huet's work are to the authorized and expanded third edition [Paris 1690]). Justifiably, Toland charges Huet with committing pious fraud, because Huet argues that the Egyptian Μνευης (Mneves), who received his laws from Mercury, the god of trade and the circulation of things, is no other than the Hebrew lawgiver, Moses. Since Mather and many of his peers assert that the Hebrew lawgiver also figured prominently in pagan cultures yet under a different name, Mather readily embraces the story of Hermes Trismegistus, who (according to Clemens Alexandrinus) authored 42 books on Egyptian religion, culture, and history – knowledge he received from the Egyptian Thoth (see *Corpus Hermeticum* XIII, in Coperhaver 49–54).

121 In his *De Civitate Dei* (18.39) [PL 41.598], St. Augustine of Hippo (350–430), the great Father of the Latin Church, relates that Mercury, called Trismegistus, taught philosophy long before the Hellenic sages, but long after the Patriarchs "and even after Moses himself." Indeed, the astronomer Atlas, Prometheus's brother and Mercury's grandson, was Moses's contemporary (*NPNFi* 2:384).

122 Edwards (*Discourse* 1:190). St. Augustine, who maintains the superiority of the Judeo-Christian pantheon, rejects the authority of his opponents in *Reply to Faustus the Manichaeae* (15.5–6; 20.9, 11, 12; 32.19). Among the poets who describe how Atlas bore up heaven and how his daughter Maia gave birth to Hermes (by Zeus) are the ancient Greek poet Hesiod (8th c. BCE), in *Theogonia* (519–21, 938–40) and the Roman poets Virgil (*Aeneid* 8.138) and Ovid (*Ibis* 214). St. Augustine (*De Civitate Dei* 18.39) seconds Clemens Alexandrinus's argu-

Why might not *Moses* be the true *Hermes Trismegistus*? I am sure, Both of the Names, in their Signification, agree well unto him. *Iamblichus*, from his Master *Plato*, tells us, that *Letters* were invented by *Hermes*; and *Moses*, being the first *Writer* that wee have, might therefore be accounted, the first Invention of Writing. *Diodorus* likewise tells us, That *Moses* was the first, who gave the *Egyptians* (which they commonly mistake, for *Jewes*) written Lawes; and that hee was, Ἀνὴς Τῇ Ψυχῇ Μεγας καὶ, τῷ βίῳ ἱκανώτατος, *A Man of a great Soul, and very powerful in his Life*: And, that hee excelled, in Wisdome & Valour.¹²³

ment (*Stromata* 1.21) that the Jewish institutions and laws are of far higher antiquity than the philosophy of Greece.

¹²³ Both Edwards and Mather (or the printer's devil) take some liberties with the original Greek text of Diodorus Siculus (1.94.1.7–8), which reads in the modern edition as follows: ἄνδρα καὶ τῇ ψυχῇ μέγαν καὶ τῷ βίῳ κοινότατον. Whereas Edwards condenses the original, but retains the diacritical marks, Mather, who copies Edwards (1:190 n), generally omits them because (Mather argues) they were of a much later invention (*Manuductio ad Ministerium* 29–30). In his *De mysteriis* (1.1–2; 8.1–6), the Neoplatonist Iamblichus of Chalcis (c. 245–c. 325 CE) refers to Plato's *Cratylus* (407e–408b) as his source for the tradition of Hermes's divine power and his invention of the art of rhetoric, writing, and hermeneutics. However, a generation or two after Iamblichus's death, St. Augustine (*De Civitate Dei* 18.39) insists that Hebrew as a spoken and written language was neither invented by Moses, nor by his ancestor Heber (Gen. 10:24, 11:14); Heber only preserved and transmitted the art of writing through the biblical patriarchs down to Moses (*NPNFi* 2:383–84). Mather's contemporaries did not necessarily agree either with Hermes being Moses or with Moses being the inventor of the art of writing. For instance, Pierre Jurieu (1637–1713), Huguenot professor of theology and Hebrew at Sedan, discusses this time-honored tradition, but “find[s] not the least probability why the first Invention of them [letters] should be ascribed to *Moses*” (*Critical History*, bk. 1, ch. 4, pp. 30–34; quote is on 31). The Swiss-Dutch Arminian theologian Jean LeClerc (1657–1736) presents a similar argument in his controversial *Twelve Dissertations* (1696), Diss. I, 1–50, but Theophilus Gale upholds the conservative position in his *Court of the Gentiles* (1672), part 1, bk. 1, chs. 10–12, pp. 51–85. For the historical debate about Hebrew as man's original language, see A. D. White's *History of the Warfare* (2:168–208). The debate about Moses Aegytiacus, his association with Hermes Trismegistus, and Egyptian polytheism occupied some of the leading scholars of the seventeenth and eighteenth centuries. The dispute involved the *Corpus Hermeticum*, which many Renaissance scholars believed was composed by the ancient Egyptian King Hermes Trismegistus and antedated the Mosaic Pentateuch by hundreds of years. The *Corpus Hermeticum*, they alleged, served as a source text when Moses wrote his own. In his *De Rebus Sacris et Ecclesiasticis* (1614), Exerc. 1, sec. 10, pp. 70–87, Isaac Casaubon (1559–1614), the Genevan classical scholar and church historian, debunked this threatening speculation by demonstrating that the *Corpus Hermeticum* originated in late antiquity and was most likely a pious forgery. Casaubon's counterargument, however, did not still the gnawing doubt. Athanasius Kircher for one vehemently defended their trustworthiness in his *Oedipus Aegyptiacus* (1652–54), tomi secundi, pars altera, classis 12, cap. 3, pp. 506–10. In his *True Intellectual System* (1678), bk. 1, ch. 4, pp. 319–37, Ralph Cudworth (1617–88), the Cambridge Platonist, was not far behind in supporting his Jesuit colleague against Casaubon's wholesale rejection of the *Corpus Hermeticum* as a late forgery. The *Corpus* was frequently translated into the vernacular and reprinted in many editions. See for instance, *Hermes Mercurius Trismegistus, His Divine Pymander in Seventeen Books* (1657). The emerging debate shifted toward comparing the similarities between ancient Egyptian cultic rituals and those established by Moses. While the orthodox position upheld Moses's primacy in teaching true religion to the Egyptians, others, most notably the Cambridge Hebraist John Spencer (1630–93), master of Corpus Christi College, embarked on

Strabo, makes an Honourable Mention of this great Personage; yea, & of the Religion established by him. Hee Recites his Actions, and Sayings; and reports, that hee left *Egypt*, and came into *Syria*, because hee disliked the *Egyptians* for their Worshipping of corporeal Gods.

To conclude; *Philo* speaks truly, in the Life of *Moses*; “Tho’, (saith hee) some Pagan Historians speak of him, yett they say but little, and that not truly neither. Out of Envy, tis likely; or because of the great Disagreement between his, & the Lawes of other Law-givers, they vouchsafe not to Remember him.”¹²⁴

Wee may also gather, that the famous *Law-givers* among the *Græcians*, as *Lycurgus* and *Solon*, had many of their Politicks from the Lawes of *Moses*; whence afterwards the *Romans* took some of theirs. And in Imitation of *Moses*’s Receiving *his* Lawes immediately from God, the greatest Lawgivers did seem to have

a different direction. He posited that Moses (though an Israelite) was an Egyptian in culture and education. In his *Dissertatio de Urim & Thummim* (1669, 1670) and his massive *De Legibus Hebraeorum Ritualibus* (1685, 1727), Spencer contends that after four-hundred years of residence in Egypt, the Israelites were so thoroughly steeped in Egyptian culture, religion, and cultic practices that Moses could not have introduced his new religion without resistance from his people. (See, for example, the episode of Aaron’s Golden Calf as the Egyptian Apis Bull, in Exod. 32:4). To wean the illiterate masses from the heathen religious practices of the Egyptians, Moses instituted a monotheistic counter-religion and ritual laws as an inversion of their Egyptian original. The debate about such radical ideas took various forms and involved some of the greatest minds of the period: Gerard Joannes Vossius, *De Theologia Gentili* (1641), pars 1, lib. 1, cap. 10, 28, pp. 75, 206–12; John Selden, *De Diis Syris Syntagmata II* (1617) and *De Jure Naturali & Gentium* (1640); Athanasius Kircher, *Œdipus Ægyptiacus* (1652–54); John Marsham’s *Chronicon Canon Ægyptiacus* (1672) 231–37; Richard Simon, *Critical History of the Old Testament* (1682), bk. 1, ch. 2, pp. 17–22; Herman Witsius, *Ægyptiaca, et ΔΕΚΑΦΥΛΑΙΟΝ* (1683, 1739), lib. 2, cap. 14; lib. 2, cap. 5, sec. 6; lib. 3, cap. 1–12; Edward Stillingfleet, *Origines Sacrae* (1662), bk. 1, chs. 2–3, 5; bk. 2, chs. 1–21.i–ii); Ralph Cudworth, *True Intellectual System* (1678), esp. bk. 1, ch. 4, secs. 18–19, pp. 308–69; Isaac Vossius, *De Sibyllinis aliisque* (1679), cap. 7, pp. 39–40; John Edwards, *Πολυποικίλος Σοφία: A Compleat History ... of Religion* (1699), pp. 240–63; Pierre Jurieu, *Critical History of the Doctrines* (1705), esp. vol. 2; John Toland, *Letters to Serena* (1704), esp. Letters 1–3, and *Origines Judaicae*, in *Adeisidaemon* (1709), pars 2, pp. 99–199; Christoph Matthaeus Pfaff, “Dissertatio Praeliminaris”; and many others who joined one or the other side of the dispute. For a summary of the debate among the ancients and moderns, see Daniel Waterland’s *Charge Deliver’d to the Clergy* (1731) and John Woodward’s posthumous *Of the Wisdom of the Antient Egyptians* (1786). J. Assmann’s *Moses the Egyptian* (18–21, 35–38, 80–143) furnishes one of the best discussions of this historical debate. For a discussion of Isaac Casaubon’s debunking of the *Corpus Hermeticum*, see F. Yates’s *Giordano Bruno* (433–70), F. Purnell’s “Francesco Patrizi” and “Hermes,” and A. Grafton’s “Protestant” (78–93). For the emergence of comparative religion, see D. A. Pailin’s *Attitudes*, P. Harrison’s “Religion” and the *Religions* (99–172), H. Kippenberg’s *Discovering* (1–35), J. Gascoigne’s “Wisdom,” G. G. Stroumsa’s “John Spencer” (esp. 18–23), and Fausto Parente’s “Spencer.”

¹²⁴ The Graeco-Roman geographer Strabo of Amaseia (c. 64 BCE–c. CE 21) identifies Moses as an Egyptian priest who came to disown the Egyptian gods and led his followers to Jerusalem (*Geography* 16.2.35–36, 39), and the Jewish philosopher Philo Judaeus of Alexandria (c. 20 BCE–c. CE 50) defends Moses in his *De vita Mosis* (1.1.2–3). Mather’s second-hand quotation from Philo is a free translation and appears in Edwards (1:191).

Theirs from some Deity; As, *Numa*, from *Ægeria*; *Minos* from *Jupiter*; *Lycurgus* from *Apollo*; *Zaleucus* from *Minerva*.¹²⁵

[61r]

157.

Q. What is the Name, which the *Creator* of the World, chooses to wear, in the History of the Creation? v. 1.

A. The Jewes observe, That in the First of *Genesis*, throughout the whole Chapter, unto the Finishing of the six dayes Work, the Creator is called, אֱלֹהִים, *Elohim*, which is a Name that signifies, *Power*; and this, no less than Thirty Two Times over. An Intimation, That the *Power* of God, is eminently display'd, in the *Creation* of the World.¹²⁶

831.

Q. In the History of the Creation, wee find the *Great God who formed all Things*, Imposing of NAMES, upon, The *Day*, The *Night*, The *Heavens*, The *Earth*, The *Sea*; & several Parts of the *Creation*; But Hee Imposes no Name upon the *Whole Creation* itself; nor, ha's the Hebrew Language, that I remember, any *One Word*, by which the *Whole World* is expressed. What may bee the Intention of this Matter? v. 1.

A. I can at present give you none but a *Devout Answer* to this Quæstion. Wee should learn from hence, to distinguish well, between the *Heavens* & the *Earth*; Don't throw the whole *World* into one Conception; but lett Man who was made on the *Earth*, consider himself as made for the *Heavens*.¹²⁷

¹²⁵ Edwards and Mather may have in mind Philo Judæus, who asserts that many Mosaic laws were adopted by the barbarian nations and by the Greeks (*De vita Mosis* 1.1.2–3). Theophilus Gale's *Court of the Gentiles* (1669–78) upholds Moses's primacy throughout his huge book in four parts. Lycurgus is the progenitor of Sparta's ancient laws (*eunomia*) and received his codex from Apollo's oracle at Delphi (Herodotus 1.65–66; Diodorus Siculus 1.94.1; Plutarch, *Lycurgus* 5.2–3, 6.1–5; *Numa* 4.7–8; *Comparatio Lycurgi et Numæ* 1.1–2). Likewise, Solon (c. 600–c. 560/69 BCE), an Athenian poet, reformer, and lawgiver, is greatly admired by Herodotus (1.29–30, 2.177) and by Plutarch (*Solon* 26.1), and is to have traveled to Egypt where he studied with the priests of Heliopolis and Saïs. According to the Roman orator and historian Livy (1.21.3), Numa (Pompilius Numa), mythical king of Rome (c. 715–673 BCE), received the laws for Rome's religion and institutions from Egeria (Aegeria), a water goddess and consort of Numa (Quintus Ennius, *Annals* 113–19). Minos, legendary king of Crete, is to have lived before the Trojan War and received with his brother Rhadamanthys divine laws from Zeus, i.e., Jupiter (Plato's *De legibus* 1.624a–625b, *Minos* 318d–321c; Homer's *Odyssey* 19.179; Diodorus Siculus 1.94.1). Finally, Zaleucus (misspelled as Zabeucus, in Edwards 1:192) is the mythical lawgiver of a town in Southern Italy and the earliest lawgiver of Greece (c. 650 BCE). He received his laws from Minerva (Athena), goddess of craftsmen (Diodorus Siculus 12.19.3–21). Here ends Mather's excerpt from Edwards (*Discourse* 1:189–92, 270, 271–73).

¹²⁶ See Edwards (1:224–28). For a similar discussion, see the Soncino *Zohar*, Prologue to Bereshith Rabba (sec. 1.1a).

¹²⁷ In his "Note Book of Authors and Texts Throughout the Bible" (1720), vol. 1, Mather identifies the following two authors as his immediate sources for his commentary on Gen.

Q. A Remark on the very *First Words* in the *Mosaic Account* of the *Creation?* v. 1.

A. The Words are capable of being translated; *The GODs had created in the Beginning*. This Conjunction of a *Plural Noun*, with a *Singular Verb*, which is a Breach upon the Construction of all Languages, Monsr. *Saurin* observes, could not be done without *some Design*. The Jewish Doctors did observe it, without being able to explain it. R. *Simeon Ben Jochai* in the Book *Zohar*, sais, *Come, See the Mystery of the Word ELOHIM: See, There are Three Degrees; Each degree apart, is One; and yett Three together are but One; They are united in One, and are not separated.*

Philo acknowledges a Mystery, in this Way of Speaking; but he adds, *GOD only knows it.*¹²⁸

1704.

Q. But look back again to, *The Beginning*. Is there no special Sense couched in that Passage, *In the Beginning God created*, beyond what is commonly observed? v. 1.

A. Wee must by no means exclude, the Received Sense of this Passage; That the Creation had a *Beginning of Time*.¹²⁹

1:1–3, 15: *Christologias Mosaicæ* (1649) 1, by Salomon Glassius (1593–1656), German Lutheran theologian, jurist, Hebraist at Jena; and of *The Knowledge of God the Father and His Son Jesus Christ* (bk. 3, ch. 1), in *Works* (1680–1704) 4:454–55, by the English Puritan divine Thomas Goodwin (1600–80), sometime president of Magdalen College, Oxford. Mather's pious answer alludes to Whiston's radical hypothesis that the Mosaic creation account (Gen. 1) does *not* refer to the whole universe, but merely to the creation of the sublunary world – man's terrestrial globe (Whiston, "A Discourse Concerning the Nature, Style, and Extent of the Mosaic History of the Creation," secs. 3–5, pp. 9–66).

¹²⁸ The preceding two paragraphs are extracted from Jacques Saurin (1677–1730), Huguenot theologian and preacher to a French church in London (1701) and later minister to a Walloon Church in The Hague. Mather refers to Saurin's *Dissertations, Historical, Critical, Theological and Moral* (1:7–8), a 1723 revised English translation of a two-volume French original (1720). Mather draws on Saurin to prop up the embattled doctrine of the Trinity, which William Whiston (and other Arians) had vociferously denounced as a fourth-century forgery, in *Primitive Christianity Reviv'd* (1711) and in *Athanasius Convicted of Forgery* (1717). On Whiston, see Force (105–11). Mather tries to counter Whiston's antitrinitarianism by citing evidence from R. Simeon Ben Jochai (also Yohai and Bar Jochas), a mid-second-century rabbinic teacher, whose *Midrash de Simeon ben Yohai*, better known as the book *Zohar* (*Splendor*), is a collection of rabbinic literature, commentaries, and expositions, in 5 books. The Hebrew word "Elohim" (אֱלֹהִים) generally signifies (pl.) "gods." A variant translation of Mather's citation from R. Simeon appears in *Soncino Zohar*, "Shemoth, Raya Mehemna" (43b). See *Zohar*, Shemoth (secs. 2, 26b), Bereshith (secs. 1, 2b, 15b). Philo Judaeus acknowledges this mystery in his *De opificio mundi* (24.72) and in his commentary on Gen. 3:22, in *Quaestiones et solutiones in Genesin* (1.54).

¹²⁹ Mather's caveat is well taken because the age-old contention of the atomists that the world is eternal, without a beginning or end (Aristotle, *De coelo* 1.10–12; *De generatione et corruptione*), was hotly debated throughout the ages. Philo Judaeus (*De aeternitate mundi* 2.4–24.131; *De opificio mundi* 2.12–3.15ff) appears to side with the Stoics in his review of the

Nevertheless, I know no Damage in it, for us to entertain a further Advice as here offered unto us.

No less Persons than *Origen*, and *Basil*, and *Jerom*, and *Austin*, and *Bede*, and *Junilius*, look upon the Word /רֵאשִׁית/ here, which wee will translate, *The Beginning*, to bee a Name of the *Messiah*. Yea, the *Chaldee* Paraphrast had some such thing in his Eye, when hee renders it, /בְּרֵאשִׁית בְּרָא/. By *Wisdome*, *God* created. *Galatinus* well argues, That this must bee the *Messiah*, because *Wisdome* is called in Prov. 8.22. by the Name of /רֵאשִׁית/ *The Beginning*. And thus, our Lord Jesus Christ being asked, in Joh. 8.25. *Who art thou?* Answered, *The Beginning*. Compare Joh. 1.1. and Col. 1.16. Attentively. Thus our Lord is called, in Rev. 3.14. Ἀρχὴ τῆς κτίσεως, *The Beginning of the Creation*.¹³⁰

philosophical debate, but ultimately rejects Aristotle's assertion of the world's eternity (uncreated and indestructible) because it violated the Mosaic creation account; Maimonides felt the need to refute it in his *Guide for the Perplexed* (2.1 and 30); and Mather and his peers returned to this ancient debate when Cartesian mechanism seemed to jeopardize biblical creationism. See also Simon Patrick, *Commentary* (1:1–2) on Gen. 1:1, and D. B. Sailor, "Moses and Atomism."

¹³⁰ The Hebrew word "rashith," as well as the Greek word "Ἀρχή" (arche), is translated as "the beginning" (Gen. 1:1), a concept suggesting substance, which Origen associates with the Divine Logos, or the Word become flesh (John 1:1), in *Homilies in Genesis* (Hom. 1, p. 47), *Commentarii in evangelium Joannis* (1.4.22; 1.5.29; 1.9.58; 1.12.79, 81; 1.21.125–126, etc.), and in *De principiis* (1.2.1–3; 2.6.2–3; 2.9.4), in *ANF* (4:245–51, 281–82, 290–91). Similarly, Basilus Caesariensis, better known as Basil the Great (c. 330–79), the Cappadocian Father, has much to say on "the beginning" and on Christ as God's "Co-operator" through whom the world was made (*Hexaemeron* Hom. 1.1–11, and esp. Hom. 9.6) and in "Letter VIII: To the Caesareans" (*Letters* 8:52–58, 105–7, 115–22). St. Jerome (c. 331/345–c. 419/20), one of the most renowned Fathers of the Western Church and translator of the LXX into Latin (Vulgate), adds his thoughts in *Epistola CVIII. Ad Eustochium virginem*, § 10 [PL 22. 884], and in *Quaestiones Hebraicae in Genesin*, lib. 1 (on Gen. 1:1) [PL 23. 937C]. In the latter work, however, Jerome specifically warns against those who think that the Hebrew original (Gen. 1:1) "contained *In the Son*, *God made heaven and earth*, which the facts of the matter itself prove to be mistaken," because neither the LXX, nor Symmachus, nor Theodotion, nor Aquila renders the Hebrew *bereshith* ("In the beginning") as "*In the Son*." That is why Jerome contends that this phrase pertains to Christ only in "its intention," but not in "its literal translation." Nevertheless, Christ "is proved to be founder of heaven and earth both at the very front of Genesis, which is the head of all the books, and also at the beginning of John the Evangelist's work" (*Hebrew Questions*, p. 30). St. Augustine, however, disagrees with St. Jerome's conclusion and argues for Christ as "the beginning," in Augustine's *Sermones de Scripturis* 1.5 [PL 38. 25], in *Two Books on Genesis against the Manichees* (1.2.3, p. 49), and *On the Literal Interpretation of Genesis: An Unfinished Book* (1.2, p. 145); the same is true for the Venerable Bede (c. 673–735), a renowned Father of the early English Church, who is best known for his famous history of the English Church and its people, *Historia ecclesiae* (c. 734); Junilius, bishop of Africa (6th c.), also associates the Divine Logos with the Hebrew concept "bereshith," in his *De partibus divinae legis* (2.22) [PL 68. 37], a dialogue between a master and his student. Significantly, in his *Commentaries on the First Book of Moses* (Gen. 1:1), John Calvin vehemently rejects as "frivolous" the venerable tradition of identifying Christ with "In the Beginning." Moses merely suggested, Calvin argues, that God's creation as we know it now was not yet finished (*Commentaries* 1.1:69–70). Neither Simon Patrick nor Mather, who uses Patrick as a source throughout, agrees with Calvin in this point. Patrick insists in his *Commentary* (1:2–3) on Gen. 1:2: "By the *Spirit of God* some of the ancient Jews have understood the *Spirit of the Messiah*, (as [Theodor] *Hackspan* observes in his

2013:

Q. I am sensible, that the Jewish Rabbis lett their Fancies please themselves, with much Gayetie, upon the *First Word* in the Bible. And I know not whether t'wil bee worth the while to mention all their pretty Notions, upon that Word. However lett us have One or Two of them? v. 1.

A. What think you of that? [in *Baal Turim*, and *Tanch.* on Gen. 1.1.] *The History of the Creation, begins with the Letter [ב] because Two Worlds were created, this World, and the World to come.*¹³¹

[*Exercitatio*] *Cabala* [sic] *Judaica* [1660], n. lxvi. out of *Baal Hatturim*, the *Hierusalem Targum*, &c.) which explains the Evangelist St. *John*, who in the beginning of his Gospel says, all things were made by the Eternal ΛΟΓΟΣ [Logos] or *WORD of God*, (the same with Νόϋς [Nous] of the ancient Philosophers) whose Almighty Spirit agitated the vast confused Mass of Matter, and put it into Form." (See also Plato, *Phaedo* 97c–98b). Mather's Hebrew citation from the Chaldee Paraphrast, or Targum (interpretation), is actually from the Targum Hierosolymitanum (Gen. 1:1), a commentary and glossary written in Aramaic, reprinted in Brian Walton (c. 1600–61), "Triplex Targum, sive verso Pentateuchi," *Biblia Sacra Polyglotta* (1653–57) 4:2. Petrus Galatinus (1460–c. 1539), the Cistercian monk and confessor of Pope Leo X, authored the controversial *De arcanis catholicae veritatis* (1518). The Greek citation from Rev. 3:14 more literally reads "the head of the creation."

¹³¹ Traditional for his time and age, Mather's condescending and insulting remarks about rabbinic scholarship are found throughout "BA," as well as in much of Mather's body of published works. Given their preoccupation with literal and typological readings as a means to bracketing the potentially subversive nature of philological and textual challenges to the Bible, Renaissance and Reformation theologians until the early Enlightenment often felt threatened by Hebrew scholarship even while they were forced to come to terms with the wisdom of the Talmud, Midrash Rabbah, the Zohar, Mishnah, Cabbala, and many other collections of Jewish midrashim. The centuries-old traditions and allegorical interpretations of the Hebrew Scriptures became threatening for many reformed theologians precisely because the rise of Christian Hebraism since the late Renaissance proliferated printed editions and translations of Hebrew scholarship previously accessible only to a group of highly select scholars. (See H. Oberman, "Discovery"; L. Friedman, "Cotton Mather and the Jews"; I. Twersky and B. Septimus, *Jewish Thought*; S. Goldman, *Hebrew*; and P.T. van Rooden, *Theology*).

Mather's response is extracted at second hand from Simon Patrick (*Commentary* 1:3, on Gen. 1:2), whose own source is *Exercitatio de Cabbala Judaica* (1660), n. lxvi, a commentary by Theodor Hacksan (1607–59), an eminent Lutheran Orientalist and professor of theology at the University of Altdorf in Franconia (Germany). Mather's reference to "*Baal Turim*, and *Tanch.*" is to *Baal Hatturim* (*Baal HaTurim*), a commentary on the Pentateuch, by R. Yaakov ben Rabbeinu Asher ben R'Yechiel, aka. ROSH (c. 1269–c. 1349) of Cologne, Germany, first published in Constantinople in 1514; and to *Tanchuma* (*Tanhuma*), a homiletic midrash on the Torah generally attributed to R. Tanchuma bar Abba (c. 350 CE), a Palestinian scholar, whose commentary was first published in Constantinople in 1522. According to *Baal HaTurim* (Gen. 1:1); *Tanchuma* (Bereishis 5), in *Midrash Tanchuma* (1:25–26); and *Midrash Rabbah* (Gen. 1:10), the Hebrew letter ב [beth], which here has the numerical value 2 (Gematria), suggests that God created two worlds: this world and the one to come. *Baal HaTurim* adds that "the Torah begins with the letter ב, rather than with the letter א [aleph], because ב connotes ... blessing, while א connotes ... curse (*Baal HaTurim Chumash* 1:2). Mather and many of his peers take exception to such mystical interpretations, many of which appear in the above-mentioned commentaries. On the same issue of the two worlds suggested by the Hebrew letter beth, see also Jacques Basnage's *History of the Jews* (bk. 4, ch. 6, sec. 6, pp. 292–93).

[62v] |

Q. The *Spirit of God moving on the Face of the Waters?* v. 2.

A. The Hebrew Word, as you will often find it observed, signifies, the Action of a *Bird*, hatching her Eggs, or moving herself over her young ones. Perhaps, it was from the Encouragement of this Word, that some of the best Philosophers compared the *Fire* and *Air*, to the *Shell & White*, the *Water* and *Earth* to the *Yolk*, of an *Egg*.¹³²

3385.

Q. Entertain us, if you please, with a Jewish Curiosity, upon that Passage, *Lett there be Light?* v. 3.

A. *Abarbinel* (upon the XL of *Exodus*) takes this to be the SHECHINAH, the most excellent of all created Things, called in the Holy Scriptures, *The Glory of the Lord*; which God, saith he, sealed up in His Treasures, after the *Luminaries* were created, for to serve Him on special Occasions; (as, for instance, to lead the *Israelites* in the Wilderness, by a *Cloudy Pillar of Fire*.) when He would make Himself appear extraordinarily present. And because of the Perfection of this *Light*, he thinks, it is, that *Moses* adds in the next Verse, That *God saw the Light* (repeating the Word, *Light*.) *that it was good*: whereas in all the rest of the Six Dayes Work, He only saies, He *saw it was good*; without Naming again, the thing He had made.¹³³

There may be Fancy enough, in this Notion; yett it is not altogether to be despised. There is a certain *Bright Cloud of Heaven*, of quite another Consist-

¹³² For this paragraph, Mather's source is again Patrick (*Commentary* 1:3, on Gen. 1:2–3), but the ancient idea of the primeval ovum hatched by a fowl was a popular metaphor throughout the Renaissance. Sir Walter Raleigh mentions the same trope in his *History of the World* (pt. 1, bk. 1, ch. 1, § vi, p. 5) and refers to the Latin annotations of Francis Junius, in *Biblia Sacra* (1593) 1, on Gen. 1:1–2. Long before Junius, however, the Greek comic playwright Aristophanes (c. 460–c. 386 BCE) tells the creation story of the Cosmic Egg (*Aves* 693–700, *Birds* 3:117), in which Chaos and Night brought forth a wind egg, from which came forth Love. And Love mingling again with Chaos engendered heaven, earth, all living things, and all the gods. For Aristotle's account, see his *Metaphysica* (1.3.983a, 24–1.8.990a, 32). For an earlier version of this ancient creation story, see the Greek bard Orpheus, whose famous egg alludes to the Egyptian god KNEPH, or Knuphis, out of whose mouth the world egg issued – see Porphyry *Περὶ ἀγαλμάτων* (sec. 10.1), Eusebius Pamphilus (*Praeparatio evangelica* 3.11.115a–c), Proclus's *In Platonis Parmenidem commentarii* (7.168), *In Platonis Timaeum commentarii* (1.138, 3.160); as well as *Recognitions of Clement* (10.17, 30) and *Clementine Homilies* (6.3–4) – the latter two are in *ANF* (8:197, 200, 263). For a similar discussion, see Edwards (*Discourse* 1:263–64); Ralph Cudworth's *True Intellectual System* (1678), bk. 1, ch. 3, secs. 17–18, pp. 120–23; Poole's *Synopsis Criticorum* (1:4); and E. A. Wallis Budge (*Legends*, ch. 2; and *Gods*, vol. 1, chs. 7–8).

¹³³ Mather cribs the entire paragraph from Patrick (*Commentary* 1:3, on Gen. 1:3). Patrick himself relies on the commentary on Exodus, ch. 40, by Isaac ben Judah Abarbanel (also Abrabanel, Abravanel), the learned Jewish philosopher and biblical exegete of Lisbon (1437–1508), whose *Commentary on the Pentateuch* (Venice, 1579; Hanau, 1710) is highly prized by Jewish and Christian exegetes.

ence than that which drops our ordinary Rain upon us; That *Cloud* filled with the *Light* and *Fire*, wherein the Son of God chose to lodge, as in His Covering, from the Beginning, that so He might therein exhibit Himself with an Agreeable *Majesty* unto His People: Tis the same that was called, The *Shechinah*; and it was of old seen by the People of God, on several great Occasions. The Great God ha's chosen, to dwell in this *Light*, which no Man can approach unto; and a special Remark, may be putt upon the *Goodness* of the *Light* in general, because unto the general Head of *Light* belongs that Illustrious & Coelestial Matter, on which the God of Heaven ha's putt this peculiar Dignity.¹³⁴

Q. May there be any Mysteries {in} that Expression, GOD SAID, so often occurring in the History of the Creation? v. 3.¹³⁵

A. Monsr. Saurin, in his *Dissertations*, thus expresses himself.

"Several Divines among the Ancient & Modern, whose Knowledge we reverence, & whose Opinions we do not reject, have thought that *Moses* did understand in this Place, the Co-operation of the SON of GOD, in the Construction of the Universe. From the Writings of the New Testament, they fetch their Comments on this Part of the Old.

"*Philo* himself, seems to have had this Notion: He sais, *That placed His Real Word, which is His Eldest Son, in the Government of the World*. But nothing is more worthy the Attention of the Learned, than the Manner, in which so many Heathen Authors have express'd themselves on this Subject. You may find a rich Collection, upon this Matter, in the learned Work entituled, *Plan Theologique du Pythagorisme*."¹³⁶

[63r]

¹³⁴ The "*Shechinah*" (also *Shekinah*) of God signifies "God's visible presence" or "dwelling," as in the light in the camp of the Israelites in the Sinai desert (Exod. 29:45–46), in the Shechinah glow of Moses's face after he descends with the Tablets of the Law from Mt. Horeb (Exod. 35:30–35), or in the cloudy pillar in Moses's tabernacle (Exod. 33:30–35). "Shechinah" does not appear in the Hebrew or Christian Bibles, but is used in the Septuagint (LXX), Chaldee Paraphrase, Targum Onkelos, and Targum of Jonathan (Exod. 25:8; 29:45–46; 1 Kings 8:12, 13, and elsewhere), in Walton's *Biblia Sacra Polyglotta*. Mather again relies on Patrick's *Commentary* (1:299, 331), which also bears the influence of Abarbanel, Maimonides, and Nachmanides.

¹³⁵ Maimonides (*Guide* 1.65.97–98) insists that the anthropomorphisms "God said" or "the breath of his mouth" (all too common in the Bible) are figures of speech denoting, "He wished," "desired," "willed," and must never be taken "in its literal meaning," for it denotes that all the creation "exists through His will and desire" (98). See also Patrick, on Gen. 1:3 (*Commentary* 1:3).

¹³⁶ Mather's source for the two cribbed paragraphs is Saurin (Diss. I, 1:6–7). The quotation from Philo Judaeus, in turn, appears to be a paraphrastic Christological interpretation of certain themes in *De opificio mundi* (24.72–76) and in *Quaestiones et solutiones in Genesim* (1.4, 8), which Saurin (1:7, note 22) excerpts from *Plan théologique du Pythagorisme* (1712) 1:149, one of the most significant works of Michel Mourgues (c. 1642–1713), a French Jesuit and professor of rhetoric and mathematics at the Royal Academy of Toulouse.

4740.

Q. It may do well, if we begin betimes, in our Illustrations, to take notice of some *Jewish* Traditions, relating to the *Creation*, and some other Matters that ly every where throughout the Old Testament.

It is particularly Remarkable, That the *Scriptures*, and the *Ancients*, not only *Christian*, but *Jewish*, assert, that the *Logos* of God, (who is His CHRIST) made the World. Is there any thing in the *Mosaic* Writings, that looks this Way? v. 3.

A. We must consider, That the *Scriptures* contain more in them, than we commonly or easily suppose, who take our Measures from other Books, to which we are accustomed. We must not wonder at it, if the old *Jewes*, yea, our Saviour Himself, & His Apostles, interpret Scriptural Expressions, as referring much farther than we could have at first imagined; God had a *Latent Sense*, an *Hidden Scope* in them, which requires the greatest Attention of the Readers.¹³⁷

What shall we say, concerning the very first Word in the Book of *Genesis*? It is true, בְּרֵשִׁית / *Breshith*, most obviously signifies, *In the Beginning*; so as to denote some first *Epocha*, or Date of Time. And yett you shall find it also taken by famous Authors, for an *Agent*; an *Efficient* by whom any thing is made; as the Word Αρχη is likewise taken. *Hilary* on the Second Psalm, tells us, That *Breshith* was understood by the *Hebrewes*, not only for the *Beginning* of a thing, but also for the *Son of God*. Indeed, our Lord CHRIST is expressly called, Αρχη, which answers to the Hebrew רִשִׁית / *Reschith*. The *Jerusalem Targum* gives us the Meaning of this Word, to be *Wisdom*. Now, *Wisdom* is but another Name for the *Logos*. Hence the Christian Fathers, find our Glorious CHRIST in this Word. So *Tertullian*; *If by the Wisdom of God all things were made, then was Heaven & Earth made in that Beginning; that is to say in His own Wisdom, which is Christ*. Unto that Sense he interprets, the Eighth Chapter of the *Proverbs*, & the First

¹³⁷ In his "Note Book of Authors and Texts Throughout the Bible" (1720), vol. 1 (Gen. 1:3, 8, 9), Mather identifies as his source "Arndt. vol. 2. p. 317" and "vol. 2. p. '319'; i.e., *De Vero Christianismo* (London, 1708), a two-volume Latin translation of the illustrious *Wahres Christenthum* (1605), by the German Lutheran theologian and precursor of Pietism Johann Arndt (1555–1621). Arndt interprets the Light (Gen. 1:3–4, 14) as a spiritual representation of Sophia (Wisdom), i.e., the Logos as God's master-worker (Wisd. Sol. 7:26, Heb. 11:3), in *De Vero Christianismo* (tom. post., lib. 4, cap. 1, pp. 317–25). A copy of the 1708 Latin edition belonging to Increase Mather is listed in Tuttle ("Libraries" 315). Identifying Jesus of Nazareth as the Anointed of God was one of the principal endeavors of the early Church Fathers in their effort to link the Hebrew concept of "Bereshith" (the Beginning) with "Sophia" (Wisdom), and with the Greek concept of the Divine Logos (the "Word" itself having substance) (Gen. 1:1, Prov. 8:22, and John 1:1) – see for instance Origen's *De principiis* (1.2.1–3), in *ANF* (4:245–46); and *Homilies on Genesis* (Hom. 1, p. 47). Rabbinic tradition in Midrash Rabbah connects "bereshith" (Gen. 1:1) with Prov. 8:22–30 and identifies the speaker (Wisdom) as "amon" and "torah" ("nursling," "workman," or "working tool"), the divine agent who assisted God in the creation. Rashi's commentary (Gen. 1:1, Prov. 8:22) similarly associates the Divine Logos with the Torah and Wisdom, whereas Christian tradition identifies the Logos with Christ (John 1:1). For a more detailed discussion of this issue, see Jean Daniélou's "The Son of God" (ch. 5), in *Development of Christian Doctrine* (1:147–72).

Chapter of *John*. The Passages in *Tertullian*, and in *Origen*, and in *Theophilus Antiochenus*, this Way, insisting on CHRIST, as the Ἀρχή, of the Creation, are too many to be recited. And much more in *Clemens Alexandrinus*, in *Tatian*, in *Ambrose*, in *Basil*, in *Jerom*, in *Austin*, in *Cyprian*, and in the Fragments preserved by *Photius*.¹³⁸

There is one Mr. *Robert Fleming*, who on the Occasion of such Thoughts, [in his *Christology*] offers an Interpretation of that Passage; Psal. 40.7. *In the Volume of the Book, it is written of me*. Seeing it appears probable, That the very First Word in the Bible, denotes our Glorious CHRIST, why may it not be thought, that our Lord alludes to that Expression, as well as to other Passages in the *Volume* of the Old Testament, where mention is made of Him? And if the Reading of the LXX be considered, we may be further induced to think, that our Lord points at this very Thing. Τίς, ἐν κεφαλίδι βιβλίου, *In capite libri*; In the *Head*, or the *Beginning*, of the Bible; In the very *Title* of the Book of the Law. [Yea, which brings the Matter a little closer still; In the *Reschith* that is there.] The Hebrewes called the Five Books of *Moses*, by the *Initial Words*. What the *Greeks*, and others from them call, *The Book of Genesis*, the Hebrewes called, *Sepher Breshith*, or, *The Book of the Beginning*; The Book that Begins with *Breschith*. If then the Word, *Breschith*, denote our Glorious CHRIST; as the *Logos* of God, He might well say, That He was mentioned and written of, in the very *Title* of the *Book of God*. The *Title* of the Book of *Genesis*, may justly be look'd {at} as the Title of indeed all

138 Hilarius Pictaviensis (c. 315–67), better known as St. Hilary, bishop of Poitiers, identifies Christ with the Ἀρχή [Arche] (“head,” or “beginning”) in his commentary on Psalm 2 [PL 9. 263A–263B]; see also St. Hilary’s *On the Trinity* (7.2–3), in *NPNFii* (9:118–19). The Jerusalem Targum (Gen. 1:1) associates “Bereshith” with “Sapientia” (“Wisdom”), in Walton (4:1); Tertullian, the African Church Father Quintus Septimus Florens Tertullianus (c. 160–c. 225), develops his argument in (among many other places) *Adversus Hermogenem* (20) [PL 2. 215A–216B], and in *ANF* (3:488–89). Origen affirms the hotly debated issue in *Homilies on Genesis* (Hom. 1, p. 47), *De principiis* (1.2.1–3; 2.6.2–3; 2.9.4), in *ANF* (4:245–51, 281–82, 290–91), and in his *Commentarii in evangelium Joannis* (1.4.22; 1.5.29; 1.9.58; 1.12.79, 81; 1.21.125–26); Theophilus Antiochenus (d. 412), Patriarch of Alexandria, calls this “Arche” (Christ) God’s “governing principle” (*Ad Autolycom* 2.10, in *ANF* 2:97–98); St. Clemens Alexandrinus, in his *Protrepticus* (1.6, 7, et al.) and in *Paedagogus* (1.6); the Syrian apologist Tatian (c. 160), in his *Oratio ad Graecos* (cap. 5), in *ANF* (2:67); Ambrosius Mediolanensis (c. 340–97), bishop of Milan, in his *Expositio evangelii secundum Lucam* (3.23) [PL 15. 1598B, 1630A, 1823C]; St. Basil, in his *De spiritu sancto* 6.14 (*NPNFii* 8:8), *Homiliae in hexaemeron* (Hom. 1.1–2, 5–6; Hom. 2.8, et al.), and *Letters* (38.3–4, in *NPNFii* 8:137–39); St. Jerome, in his *Epistola LIII ad Paulinum* [PL 22. 543], in *Epistola CVIII ad Eustachium virginem* (§ 10) [PL 22. 884], and in *Quaestiones Hebraicae in Genesim*, lib. 1 (on Gen. 1:1) [PL 23. 937C]; Austin, in his *Sermones de Scripturis* (1.5) [PL 38. 25]; St. Cyprianus Cartaginensis, bishop of Carthage (d. 258), in *Testimonia adversus Judaeos* (2.2.1–30) [PL 4. 696–698C, 708], “Treatise 12.2” (*ANF* 5:515–28); and finally, Photius (c. 810–c. 895), patriarch of Constantinople, in his *Bibliotheca* (Codex 9.4a; Codex 35.7a; et al.), and in *Fragmenta in epistolam ad Romanos* (513.23–25; 522.9–12; 542.16–21).

the Bible.¹³⁹ As the *Ethiopic* and *Arabic* Versions, which follow the LXX, render this Passage the same Way, so does *Jerom*, whose Version was from the *Hebrew*. Others of the Ancients, tho' they used not the same Greek Word, yett seem to have had the same Thought in their Minds. *Aquila* and *Symmachus* render it, ἐν εἰληματι τοῦ βιβλίου. This comes yett nearer to Mr. *Flemings* Notion. Εἰλημα is properly, *Involucrum*, *Integumentum*, The *Cover* or Binding of a *Book*, or that which is wrapt about it. According to this, The Name of CHRIST was written upon the very *Cover*. The Ancient Books were Parchments Coiled and Rolled round, as a Scrol, (called, *Volumns à Volvendo*;) And if we suppose either the *Pentateuch*, or the Book of *Genesis*, wrapt up all together, the *Title* of *Breschith*, was written on the *Cover* of the *Volumn*.¹⁴⁰

Of these things, Mr. *Fleming*, adds, He will only say, *Valeant quantum valere possunt*. And Modesty will allow no more. But then, he leaves it unto the Reader to Judge; whether our Saviour Himself does not insinuate something of this, when He saies, unto the Jewes, who enquired of Him, who He was; Joh. 8.25. τὴν ἀρχὴν ὁ τι καὶ λαλῶ ὑμῖν. which may be rendred, [not, *Even the same that I said unto you from the Beginning*; but] *I am the* Ἀρχή, *Beginning*, as *I tell you*. Thus, the *Vulgar Latin*, the *Ethiopic*, and *Arias Montanus* render it. Our

¹³⁹ This and the subsequent paragraph are extracted verbatim from the 1725 edition of *Christology. A Discourse Concerning Christ* (vol. 1, bk. 2, ch. 6, pp. 279–82), in 2 vols. (1705–8, 1725), by Robert Fleming (c. 1660–1716), a Presbyterian minister, sometime pastor of a Scottish church in Rotterdam, and advisor to William of Orange. The Greek passage is from the LXX (Ps. 39 [40]:7–8), but Mather omits the diacritical marks (ἐν κεφαλίδι βιβλίου; i.e., “in the volume of the book”), which do appear in Fleming (vol. 1, bk. 2, ch. 6, p. 280). The Ethiopic and Arabic translations (c. 4th c. CE), whether based on the LXX or Syriac versions is still debated, were readily available in Mather’s time in Walton’s *Biblia Sacra Polyglotta* (the best edition at the time) and in the earlier Complutensian Polyglot *Biblia Polyglotta* (1514–17), edited by Cardinal Francisco Ximénez Cisneros (1436–1517). See J. Pelikan’s *The Reformation of the Bible* (esp. 17–20) and P.N. Miller’s “Antiquarianization.”

¹⁴⁰ Unlike the Old Latin Bible, a compilation of various Latin translations of the LXX, St. Jerome’s Vulgate translation (4th c.) brought coherence to the many Latin versions in use in the early Roman Catholic Church. Highly controversial at the time, Jerome largely used the Hebrew (rather than LXX) as his source-text for his Vulgate, which subsequently became the authorized version of the Bible for the Western Church. The Greek versions of Aquila and Symmachus, which survive in parallel columns in Origen’s famous *Hexapla* [PG 15–16 pt. 1–3], are frequently cited by Mather and his sources when Christological readings are at issue. Aquila of Sinope in Pontus (fl. CE 117–38) opted for a more literal translation in harmonizing the LXX with the official Hebrew text (c. 140) and thus became an invaluable reference source to later textual scholars. Likewise Symmachus of Samaria (fl. CE 150), a Jewish conversio, translated the Samaritan and Hebrew versions into stylistically sound Greek as an alternative to the Alexandrian LXX. The Greek citation from Ps. 39 (40):8 ἐν εἰληματι τοῦ βιβλίου [en eilemati tou bibliou], which means, “in the scroll of the book is written of me,” only appears in the column of Aquila, whereas Symmachus’s Greek translation renders it ἐν τῷ τεύχει τοῦ ὀρισμοῦ σου γέγραπται περὶ ἐμοῦ, which signifies “in the scroll of your law is written of me,” both appearing in Origen’s *Hexaplorum quae supersunt in librum Psalmorum monitum* [PG 16. Pt. 1. 760–761]. Mather’s “*Volumns à Volvendo*” are “rolled scrolls.” Nehemiah Grew makes much of the same argument in his *Cosmologia Sacra* (bk. 4, ch. 1, pp. 133–143).

Lord had a little before told them, That He was *not one that had His Original in this World*. A little after, He tells them, That *He had His Existence before Abraham*. It was proper for Him here to represent Himself as the *Reschith*, the Ἀρχή, the *Beginning* of all things.¹⁴¹

[64v]

Q. On that Passage, *The Evening & the Morning were the First Day*; and so, *the Second*, and, the rest? v. 5.

A. It is a Note of as much Ingenuity as Antiquity; That in all the *Six Days* of the Creation, there is an *Evening* and a *Morning*. There is a *Vicissitude* of Conditions. There is no *Morning* without an *Evening*. But when the *Seventh Day* arrives, we find not any of this *Vicissitude*. An Intimation, that when we come to the *Rest which remains for the People of GOD*, it will have no *Evening* in it; & No *Darkness* will belong unto it.¹⁴²

Q. We read concerning the *Plants*, That they have *their Seeds in themselves*? v. 11.

A. Our Inquisitive *Bradly* Observes & Reports.

“Every *Plant* contains in itself *Male* and *Female* Powers. *Plants* wanting local Motion, require this *Union of Sexes* in themselves. — There is in the *Plants*, a *Farina fecundans*, or *Male-Dust*, which has a *Magnetic* Virtue. This is what the *Bees* gather to make their *Wax* withal. But the Particles of this Powder, being to pass into the *Ovaries* of the *Plants*, and even into the several *Eggs* or *Seeds*, there contained, we may easily perceive, if we splitt the *Pistillum* of a *Flowre*, that Nature has provided a sufficient Passage for it, into the *Uterus*.

“A curious Person (*he says*) may by this Knowledge, produce rare kinds of *Plants*, which have not been heard of, by making Choice of Two *Plants*, that are near alike in their Parts. The *Farina* of the one will imprægnate the other; and the Seed so enlivened will produce a *Plant* differing from either. [Like *Mules*.]”¹⁴³

[65r]

Q. The Mosaic Distribution of *Plants*, what is to be thought of it? v. 11.

A. Tis accurate and admirable! Tis into *Tree* and *Herb*.

¹⁴¹ Mather shortens Fleming’s Latin comment, which translates “Let them go as far as they can” (*Christology*, bk. 1, ch. 2, sec. 6, p. 281). The Greek passage from John 8:25 lacks the diacritical marks and reads in the original τὴν ἀρχὴν ὃ τι καὶ λαλῶ ὑμῖν· and translates more accurately “Altogether, what I also say to you.” The Spanish Benedictine Orientalist Arias Montanus of Estremadura (1527–98) is one of the editors of the Antwerp Polyglot *Biblia Sacra, Hebraice, Chaldaice, Graece, et Latine*, in 8 vols. (Antwerp, 1571).

¹⁴² See Appendix A.

¹⁴³ The two cited paragraphs are extracts from the 1717 edition of *New Improvements of Planting and Gardening* (ch. 2, pp. 11–12, 14–15, 23–24), by Richard Bradley (1688–1732), professor of botany at Cambridge and Fellow of the Royal Society. For Mather’s interest in plant hybridization, see C. Zirkle’s “Forgotten Records” and “More Records.”

In *Theophrastus* and the modern Herbalists, the Division of *Plants*, is into, *Arbor, Frutex, Suffrutex, & Herba*. But the learned *Cæsalpinus*, concludes, *Clarius agemus, si alterâ Divisione neglectâ, duo tantum Plantarum Genera substituamus, Arborem &c. et Herbam; conjungentes cum Arbore Frutices, et cum Herbâ Suffrutices; Frutices* being the *Lesser Trees*, and *Suffrutices* the *Harder Herbs*.

This Division of *Plants* into *Tree* and *Herb*, admirably suits the Natural Ground of the Division of *Perfect Plants*. For, *Plants* in their first Production, do send forth Two Leaves, adjoining to the *Seed*; and then afterwards, do either produce two other Leaves, & so successively, before any *Stalk*; and such go under the Name of *Ποα, Βοτάνη*, or, *Herb*; or else, after the first Leaves that succeed unto the *Seed-leaves*, they send forth a *Stalk*, or a Rudiment of a *Stalk*, before any other Leaves; and such fall under the Classis of *Δενδρον*, or, *Tree*. In this natural Division, there are but those two grand Differences; *Tree*, and *Herb*. The *Frutices*, and *Suffrutices* have their Way of Production accordingly. 'Tis from Sir *Tho: Browne*, that I have this Observation.¹⁴⁴

Q. On the Influences of the *Stars*? v. 16.

A. *Hartsoeker* very truly & justly observes.

¹⁴⁴ The preceding paragraphs are extracted (verbatim) from Sir Thomas Browne (1605–82), renowned English physicist and essayist, whose “Observations Upon several Plants mention’d in Scripture,” in *Certain Miscellany Tracts* (1684), Tract I, § 41 (*Works* [1907] 3:263–64), is the work in question. Browne makes a similar argument in his *Hydriotaphia and The Garden of Cyrus* (1658; 1668), ch. 5, p. 66, but his original source is the Greek philosopher Theophrastus of Eressos (c. 372–287 BCE), whose contributions to botany can be found in his *De causis plantarum* (6 bks.) and *De historia plantarum* (9 bks.). Following Aristotle’s classifications, Theophrastus categorizes plants into “trees,” “bushes,” “shrubs,” and “herbs” (*Historia Plantarum* 1.3.1). Browne’s reference to *De plantis* (1583), by the learned Italian physician, physiologist, and botanist Andreas Caesalpinus (1519–1603) demonstrates that Theophrastus’s Aristotelian categories of plants no longer satisfied Renaissance scientists, for Caesalpinus (Cesalpino) introduces the modern pre-Linnaean categorization of plants according to their fruits, and concludes, “We shall treat [of this] more clearly if we were to omit the second division and name only two kinds of plants, tree[s] and plant[s], grouping lesser trees with tree[s] and harder herbs with stalk[s]” (B. Melton’s translation). The Greek terms *Ποα Βοτάνη* [*Poa Botanē*] “herb” and *Δενδρον* [*Dendron*] “tree” are from Theophrastus (*Historia Plantarum* 1.3.1). Suffice it to add that Mather seems to ignore some of the hotly debated issues raised in the Mosaic creation account – although he does offer a typological reading at a later point [102v]. According to Gen. 1:11, God created on the third day “grass, the herb yielding seed, and the fruit tree yielding fruit” (KJV), *before* he creates sunlight on the fourth day (Gen. 1:14). Simon Patrick on Gen. 1:12 (*Commentary* 1:5) is more careful when he refers to Theophilus Antiochenus (*Ad Autolyicum* 2.13, in *ANF* 2:99–100), Porphyrius (*De abstinence* 2.5.12), and Eusebius (*Praeparatio evangelica* 11.23–24.545d, 547d, 548a–b), who insist that God’s power brought forth plants even without sunlight to make them grow because a supercelestial light shone before the sun was formed. Patrick solves this philosophical conundrum by insisting that God created all vegetation in their fully mature state carrying their seeds within them, thus no sunlight was necessary in their first state. However, all subsequent generations of plants grew from their seeds and therefore required sunlight.

“All the Heavenly Bodies, except the *Sun* and *Moon*, can do us neither *Good* nor *Hurt*, except to communicate unto us some weak *Rays of Light*. They have no more Share in any thing that passes here upon Earth, than *Candles* lighted up & scattered here & there in the Countrey, can have upon any thing that is done in a City, which they surround, but from whence they can scarce be seen.”

I add, Away with the Idle Whimseys of *Dog-days*.¹⁴⁵

Q. Why is the *Moon* called, One of the *Two Great Lights*; whereas we know, tis in Bulk so much smaller than the other Coelestial Bodies? v. 16.

A. Tho’ it be less in *Bulk*, yett it is to us greater in *Light*; greater as a *Light*, than the other Heavenly Bodies; – *velut inter ignes Luna minores*. And greater in *Use*; in very many Benefits.¹⁴⁶

Mendoza; a learned Portuguese, in his *Flores*, ha’s a Discourse on this Problem.

He will have the *Moon* to be called, *A Greater Light*, because next unto the *Sun*, it is of the greatest Use in the *Distinction of Times* unto us. It was unto the Hebrews yett more eminently so.

He concludes a little wittily. *Hæc de Luna satis, ne Lunæ laboranti succurrere videamur*.¹⁴⁷

3427.

Q. A Remark on that, *Lett the Waters bring forth ABUNDANTLY*? v. 20.

A. For the most Part, among the *Fishes*, the *Females* discharge their Spawn, and the *Males* their Melt, in the Water near one another; and the Seminal Maters being so entrusted unto the *Waters*, the Propagation is carried on.

Dr. *Nieuentyt* remarks, That the Procreation of *Birds* here is not ascribed unto the *Air*, as that of the *Fishes* is to the *Waters*. But then, what is more obvious here, is the prodigious Multiplication & Fæcundity of the *Fishes*, here

¹⁴⁵ Mather cites from Nicholas Hartsoecker (1656–1725), a Dutch naturalist and physician, whose *Essai de Dioptrique* (1684), *Principes de Physique* (1696), and *Conjectures Physiques* (1706) were highly regarded. The text in question is most likely an early edition of *Cours de Physique* (1730), which contains a discussion of the nature and property of fire and the rays of light (book 2). Mather rejects the ancient belief in the malignant influence of the dog-stars Procyon and Sirius (c. July 3–c. Aug. 15), during which hot Dog-days (*dies caniculares*) dogs (as well as bipeds) are likely to go mad. See also his essay “Of the Light” (*Christian Philosopher*, Essay I, pp. 18–26) and W. U. Solberg, “Science and Religion.”

¹⁴⁶ For a more detailed discussion, see Mather’s *Christian Philosopher* (Essay XI, pp. 56–60). The Latin passage reads, “as if the moon sat between smaller stars.”

¹⁴⁷ Mather may have in mind Francisco Mendoza’s *De Flores Philosophica*, mentioned in Alexander Ross’s *Arcana Microcosmi* (1652), part 2, bk. 2, ch. 7, p. 133, and ch. 8, p. 138. Or, perhaps, a florilegium of “Mendoza,” cited in Josephus Angles’s *Flores theologicarum quaestionum* (1580), listed in Isaiah Thomas’s purchase of Cotton Mather’s library, in “Catalogue of Dr. Cotton Mather’s Library” (AAS copy), p. F. At any rate, Mendoza’s Latin witticism translates, “Here [is] enough about the moon, lest we appear to support the toils of the moon.”

intimated in the Expression of *Bringing forth ABUNDANTLY*. They are, Psal. CIV.25. *Innumerable*.

And yett, as Dr. *Nieuentyt* observes, even the *Fishes* also feel the Force of the *Curse* upon the Sin of Man; In that their Multiplication meets with strange Obstructions, that render them very much less Fruitful, than from the Number of Eggs in their Spawn might have been looked for.¹⁴⁸

Q. What are the Creatures intended in the Original, where our Translation reads, *Great Whales?* v. 21.

A. *Job Ludolphus* ha's demonstrated, That the Name, *Tanim*, signifies, *Crocodiles*. (Compare Ezek. 29.3. and 32.2. where, tis certain, there can be meant nothing else.) And we know, that *Crocodiles* are elsewhere singled out, as a most astonishing Work of God.¹⁴⁹

There seems to have been a special Reason, to prevent some false Opinions, (& perhaps, to suggest a Mystery touched elsewhere, in our *Illustrations*.) That so noxious & so terrible an *Animal* as the *Crocodile*, should be particularly recognized, as created by the Lord.¹⁵⁰

Q. On that Word, God said, *Lett us make Man in our Image; after our Likeness?* v. 26.

A. Sometimes we find, *Image*, alone; and sometimes, *Likeness*, alone.

Rivet looks on it, as an *Hendyadys*, and notes, *Mos est Hebraeis duo substantiva ità conjungere, ut diversæ res esse videantur, cum tamen alterum Adjunctivi et Epitheti significationem habeat*.¹⁵¹

¹⁴⁸ Mather evidently extracts the two paragraphs from *The Religious Philosopher* (1718–19), by the Dutch mathematician, physician, and anti-Cartesian Dr. Bernard Nieuwentyt (1654–1718). See Mather's commentary on Gen. 9:2 (below).

¹⁴⁹ Extracted from Simon Patrick's *Commentary* (1:7) on Gen. 1:21, Mather's passage refers to Hiob Ludolf [Leutholf] (1624–1704), a German polymath, jurist, Orientalist, and grammarian of the Ethiopian language (Amharic), whose *Iobi Ludolfi ... Ad suam Historiam Æthiopicam antehac editam Commentarius* (1691) demonstrates that the Hebrew word "tanim" (Ezek. 29:3, 32:2, etc.), generally translated as "whales," really signifies "crocodiles" (lib. 1, cap. 11, p. 86 n). Bochart also suggests multiple meanings of the term, in *Hierozoicon Sive bipertitum opus De Animalibus Sacrae Scripturae* (1663), pars 1, lib. 1, cap. 7, col. 45–52. Ludolf's *Historia Æthiopica* (1681 ed.) appeared in an English translation as *A New History of Ethiopia* (1682) and was of particular interest to Mather because it described the kingdom of Abyssinia, supposedly ruled by the legendary Prester John. For the legend of this fabled Christian priest, see J. Delumeau, *History of Paradise* (71–96).

¹⁵⁰ Nearly a century and a half after Mather's evasive comment here, Herman Melville has Queequeg agonize over the "horrible vultureism" [sic] of God's seemingly benign creation: "Queequeg no care what god made him shark ... wedder Fejee god or Nantucket god; but de god wat made shark must be one dam Ingin" (*Moby-Dick*, ch. 67, p. 396).

¹⁵¹ The River's "*Hendiadys*" ("one expressed by two") is a figure of speech expressing an idea by two nouns and a coordinating conjunction instead of a noun and an adjective). He suggests that "it is a custom of the Hebrews to join two nouns in such a way that they seem to be different things, when in fact the second signifies an adjective and epithet" (B. Melton's

But what I here most aim at, is an Elegancy of Dr. *Arrowsmiths*. “It is exceeding much for Mans Honour, that he is an Epitome of the World, an Abridgment of other Creatures; partaking with the Stones in Being, with the Stars in Motion, with the Plants in Growing, with the Beasts in Sense, and with Angels in Science. But his being made in *Gods Image* is far more. As great Men are wont; They often erect a stately Building; then cause their own Picture to be hung up in it, that Spectators may know who was the chief Founder of it, So when God had created the Fabric of this World, the last Thing He did, was the Setting up {of} His own Picture in it.”¹⁵²

[66v]

Q. What means the Repetition of the Terms, *Image*, and, *Likeness*? v. 26.

A. By these two Terms may be meant עֵינֵן אֶחָד, *Res Una*. It is as much as to say, *Imago Simillima*.¹⁵³ Thus we read, Rom. 1.23. About, *A Likeness of Image*. Hear *Austin*, speaking, *De Genesi ad Literam*.

*Omnis Imago similis est ei cuius est Imago; nec tamen omne quod simile est alicui, etiam Imago est ejus! Sicut in Speculo, vel Picturà, quia Imagines sunt, etiam similes sunt; tamen, si alter ex altero natus non est, nullus eorum Imago alterius dici potest. Imago enim tunc est, quum de alio exprimitur.*¹⁵⁴

1815:

Q. When God said, *Lett Us make Man, in Our Image, after Our Likeness*, what special Effect was there of it? v. 26.

translation). The Latin citation is quoted from *Andreae Riveti Theologicae & Scholasticae Exercitationes* (1633), Exerc. IV, p. 21, by André Rivet (1572–1651), Huguenot scholar, professor of theology at Leiden University, and rector of the College of Orange at Breda. Mather owned a copy of this work (AAS Mather Libraries # 0119). For the same interpretation, see also Simon Patrick’s *Commentary* (1:8) on Gen. 1:26. However, the original sources for all of them appear to be Tertullian (*Adversus Marcionem* 2.9.4), in *ANF* (3:304) and Gregory of Nyssa (*De Opificio Hominis* 16) [PG 44. 185.40–41].

152 The passage in quotation marks is not a verbatim citation but a pastiche of cited phrases cobbled together. Mather’s source is John Arrowsmith, D. D. (1602–59), professor of divinity, master of Trinity College, and member of the Westminster Assembly, whose ΘΕΑΝΘΡΩΠΙΟΣ [Theanthropos]; Or, *God-Man* (1660) 51 # 5 is the work in question. A copy of this work was part of the Mather libraries.

153 Mather’s Hebrew citation seems problematic (עֵינֵן אֶחָד), for the Hebrew word צֶלֶם [tselem] signifies “image” and “shadow,” whereas דְּמוּת [dmuwth] signifies “resemblance,” “similitude,” and “shape” [Strong’s # 6754 and 1823]. See also Patrick’s *Commentary* (1:8) on Gen. 1:26, 27.

154 In his *Liber imperfectus de genesi ad litteram* (16.57) [PL 34. 242], St. Augustine argues that “Every image is like that of which it is an image, but not everything which is like something is also an image. Thus, because in a mirror or in a picture there are images, they are also alike. But if the one does not have its origin from the other, it is not said to be the image of the other. For it is an image only if it is derived from the other thing” (*On the Literal Interpretation of Genesis*, p. 183).

A. Man is a Σῶον πολιτικὸν, a *Sociable Creature*. There is a Natural Disposition in Man, and Institution for Man, to unite with others, in *Society*.¹⁵⁵

And it seems a *Special Effect* of that Passage in his Creation; *Lett US make Man, in OUR Image, after OUR Likeness*. A *Plural Number* unites for the Making of Man, in some Agreeableness to His Maker. An *Union of Three in One*, is display'd, when Man comes to bee made. Hence tis, that Man, in the *Image* and *Likeness* of God, affects an *Union* with a *Plurality*.

Compare, Joh. 17.21, 22. till your Contemplations arise to some Astonishment.¹⁵⁶

2426:

Q. Give mee a notable Comment on that Place, *Lett us make Man?* v. 26.

A. *Philo* the Jew, is of Opinion, that the *Angels*, were Co-operators, in framing the Body of *Adam*, and this *Platonist* fetch'd this Notion, from his Master, who held, that Man was made by Inferiour and Created Gods, at the Command of the Supreme Deity.

But others deservedly explode this Opinion, and think, that these Words denote *God the Father*, conferring with the two other Persons in the Trinity, concerning the Making of Man. The Ancient Writers of the Church are generally of such a Sentiment, and usually alledge this Place, to prove the *Trinity*. But there were Cause enough to use this Manner of Speech, if it were only because Man is a Noble sort of Creature, and worthy to be consulted about. I will then, with a learned and worthy Author, offer you the Words of *Seneca*, for a notable Comment on this Place; *Scias non esse hominem tumultuarium et incogitatum opus*. [De Benef. L.6.] “Be it known to you, that *Man* is not a Work huddled over in Hast, and done without forethought; for Man is the most stupendous Work of God.”¹⁵⁷

155 Man is by nature a “political animal” or “social creature.” The Greek citation is from Aristotle’s *Politica* (3.6.1278b, 19).

156 The debate about God’s use of the personal pronoun (2nd person plural) is an ancient one, and Trinitarians like Mather use Gen. 1:26 and similar passages to support Christ’s existence before his incarnation (Prov. 8:22, John 1:1) and to reaffirm the embattled doctrine of the Trinity (John 10:30). Simon Patrick (Gen. 1:26) offers a well-known alternative by suggesting that instead of the Trinity, this verse may merely indicate that God spoke in “the manner of kings” (*Commentary* 1:7–8). For a review of the entire debate, see Matthew Poole, *Synopsis Criticorum* (1:11–12).

157 Mather is a bit unfair to Philo Judaeus, who expresses his uncertainty more so than his certainty about this issue and suggests that God took council with his angels, in *De opificio mundi* (24.72–76), *De confusione linguarum* (33.168–34.175), and *De fuga et inventione* (13.67–14.72). Maimonides similarly wrestles with this idea in his *Guide* (2.6–7.160–63) and resorts to the traditions of the *Bereshith Rabba* to argue that God took council with the Earth. Finally, John Calvin, in his commentary on Gen. 1:26, 3:22, argues that “Let us” and “one of us” refer to God’s own sublime council (not the Trinity) in contemplating the creation of Adam (*Commentaries* 1.1:91–93, 183). See also Patrick, *Commentary* (1:7–8). The worthy author who is Mather’s primary source is probably Dr. Nehemiah Grew (1641–1712), English physician,

Q. Those Words of the Deity, *Lett US make Man, in OUR Image, after OUR Likeness*; Do they clearly import a *Plurality* of Persons in the Godhead? v. 26.

A. Verily, They do! *Tertullian* therefore, and *Athanasius*, and *Cyril of Jerusalem*, and *Chrysostom*, and *Austin*, and others of the Ancients, understood these Words, concerning the *Trinity*.¹⁵⁸

The only thing that ever opposed such a Sentiment (setting aside the *Folly*, which they are to be *charged withal*, who bring in the *Angels* as here consulted with,) is an Imagination, That the Great GOD is here introduced as imitating the Style of *Princes*, who use to speak in the *Plural Number*. But there is much Ignorance and Vanity betray'd in this Imagination. For as there were no *Men* at all, and therefore no *Great Men*, when this Language was used about the Making of *Man*. So, tis very certain, there was no such Style among that Rank of Persons, for many Ages after *Moses*.

It was not until very late Ages, & in the *European* World, that when the Power of many Persons came into *One Mans* hand, this *One Man* had the Complement paid him, of being address'd in the *Plural Number*. Before the late Invention of this Complement, it was customary forever, *Tutoyer*, (as tis called by the French,) to, THOU, and, THEE, the Greatest of Men. And the Greatest of Men spoke still in the *First Person Singular*, as others address'd them in the *Second*. Before the Time of our King *John*, the Kings of *England* used the Singular Number. The King of *Spain* does it still.¹⁵⁹

[67r]

biologist, and FRS, on whose *Cosmologia Sacra* (1701) Mather relies throughout. The second-hand quotation from Lucius Annaeus Seneca, the Younger (c. BCE 4–65 CE), Roman statesman, historian, and philosopher, appears in *De beneficiis* (6.23.6) and suggests more accurately, “You will discover that man is not a hasty and purposeless creation.”

¹⁵⁸ Trinitarianism and the definition of its dogma are discussed by virtually all Church Fathers. Mather may have in mind Tertullian's *De anima* (cap. 21) [PL 2. 684A–B], in *ANF* (3:202), but more specifically *Against Praxeas* 11–13 (3:605–9); Athanasius (c. 296–373), bishop of Alexandria, who discusses and defends this dogma in *De sancta trinitate* (dialogi 1, 3, 5) [PG 28. 1228, 1232, 1241–42], *Quaestiones in scripturam sacram* [PG 28. 733], and *Orationes tres contra Arianos* [PG 26. 212, 272–73, 388, 452 etc.]; Cyrillus Hierosolymitanus (c. 315–87), bishop of Jerusalem, in *Catecheses ad illuminandos* (Catech. 10.6, 11.23, 12.5, 14.10) and *Catechetical Lectures* (NCPFi 7:58–59, 70, 73, 96); Cyrillus Alexandrinus (d. 444), patriarch of Alexandria, in *De sancta trinitate dialogi I–VII* (Aubert page 471, 516, 523), *Thesaurus de sancta consubstantiali trinitate* [PG 75. 25, 85, 89 etc.]; Joannes Chrysostom (c. 347–407), bishop of Constantinople, in *Genesim (homiliae 1–67)* [PG 53. 64–72, 84 etc.], *Homilies on Genesis* (8.3–8, 8.12, pp. 106–10, 112), *Adversus Judaeos* [PG 48. 919], *De sancta trinitate* [PG 48. 1087]; and St. Augustine's *De trinitate* (6.2–3, 7.6) [PL 42. 924, 943], *On the Trinity* (NPNFi 3:98–99, 111–14).

¹⁵⁹ Mather refers to John Lackland of the House of Plantagenet (c. 1167–1216), king of England (1199–1216), and signer of the Magna Charta. The Spanish kings during Mather's lifetime were Carlos II of Habsburg (who ruled from 1665–1700) and Philip V (who ruled Spain from 1700–46).

3241.

Q. The Sacred Oracles tell us, That *God made Man after His own Image*. May we not find that, and many other Passages of the Sacred Oracles, imitated in the Pagan Writers? v. 26.¹⁶⁰

A. Yes. *Phocylides* writes, πνεῦμα ἐστὶ θεοῦ εἰκὼν, *The Soul is the Image of God*. And the same *Phocylides* also writes, Μηδὲ τις ὄρνιθας καλῆς ἅμα πάντας ἐλεσθῶ, *Lett no Man destroy all the Birds of a Nest together*; which is the same that we read in *Moses*.¹⁶¹

Agur prays that God would give him neither *Poverty* nor *Riches*. *Horace*, (who it seems, had seen the Books of our *Psalms* and *Proverbs*,) writes, *Benè est, cui Deus obtulit parçà, quod satis est, manu*.¹⁶²

Solomon writes, That *no Man knowes what a Day may bring forth*. *Theognis* writes, That *no Man knowes*, ὃ τι νύξ καὶ ἡμέρα ἀνδρὶ τέλει. *What a Night & a Day, may bring to pass*.¹⁶³

Solomon writes, That *without Knowledge, the Mind is not good*. *Sophocles* writes, οὐκ ἂν γένοιτο νοῦς κακός, καλῶς φρονεῖν. *Wisdom is inconsistent with an ill Mind*.¹⁶⁴

¹⁶⁰ The following MS pp. [67r–68v] are extracted from Nehemiah Grew’s *Cosmologia Sacra* (bk. 4, ch. 2, pp. 152–55, 158). More than a century before German Higher Criticism posited that pagan literatures and the Hebrew Bible draw on the same sources (Quellen), Mather – like Grew, John Selden, Edmund Dickinson, and Pierre Jurieu before him – tries to explain why many ancient histories and pagan literatures relate stories, beliefs, and codes quite similar to those found in the Hebrew Bible. Orthodox defenders of biblical verity frequently resorted to the pious belief that pagan historians and philosophers by necessity inherited their philosophy and beliefs from Noah (the father of all post-diluvians) or stole it from Moses, that the Mosaic Pentateuch presents the oldest and truest account, and that similarities between biblical and pagan teachings therefore point to the verity of the Old Testament. See also Gerard Vossius’s *De Theologia Gentili* (1641), Theophilus Gale’s *Court of the Gentiles* (1669–78), R. S. Westfall’s “Isaac Newton’s *Theologiae Gentilis*” (15–34), and R. H. Popkin’s “Polytheism.”

¹⁶¹ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, p. 152). The Greek citations are from Pseudo-Phocylides, *Sententiae* (106 and 84), a poem in 230 hexameter lines, attributed to the Milesian Phocylides (c. 540 BCE), but most likely written by an Alexandrian Jew of the first to second centuries CE. For similarities between these maxims and the Bible, see Gen. 1:26 and Deut. 22:6.

¹⁶² The prayer of the Hebrew sage Agur, son of Jakeh, appears in Prov. 30:7. Mather here corrects Grew (152), who attributes this saying to the Levite Asaph, son of Berechiah, and supposed author of Ps. chs. 1, 73–83. Horace (Quintus Horatius Flaccus), the Roman poet and satirist of Apulia (c. 65–8 BCE), echoes the moral sayings of Agur, in *Carmina* (Ode 3.16.43–44), which here translate “All is well for the man to whom God with a frugal hand has given enough.”

¹⁶³ Mather here pairs Prov. 27:1 with *Elegiae* (1.160), a collection of nearly 1,400 verses by Theognis (c. 550 BCE), the elegiac poet of Megara.

¹⁶⁴ Solomon’s truism (Prov. 19:2) is paired with a line from *Oedipus tyrannus* (600), by the Athenian playwright Sophocles (c. 490–406 BCE), who has Creon reason that conspiring against Oedipus is illogical when Creon can have all the benefits of co-rulership without its burdens. Creon argues that conspiring “were sheer madness, and I am not mad.” Mather is generally careless about diacritical marks and frequently omits them altogether.

Solomon writes, *There is not a Just Man, that sinneth not.* One of the Minor Poets, writes,

Ἀνθρώπων δ' ἄψεκτος ἐπὶ χθονὶ γίγνεται οὐδείς·

*There is not a Man upon the Earth, that is undefiled.*¹⁶⁵

Solomon writes, *That God ha's made every thing beautiful in his Season.* Sophocles writes, πάντα καιρῷ καλὰ. *Every thing is good in its Season.* And in the Description of Old Age and of Death, Solomon writes, *The Dust shall Return to the Earth, as it was, and the Spirit shall return to God that gave it.* So Phocylides,

Σῶμα γὰρ ἐκ γαίης ἐχομεν, καὶ πάντες ἐκ αὐτῆς

Λυόμενοι κόνις ἐσμεν· ἀπὸ δ' ἀνα πνεῦμα δέδεκται·

*Our Bodies, which are made of the Dust of the Earth, shall be resolved into that again: But the Heavens receive the Spirit.*¹⁶⁶

Solomon praising his Queen, saies, *That upon her Temples, were Threescore Queens, & fourscore Concubines, and Virgins without Number.* Like to this, is the Strain of Musæus upon Hero;

Ὀφθαλμός γελοιῶν ἑκατὸν Χάριτεςσι τεθηλεῖ·

*That when he smiled, an hundred Graces were produced in one Eye.*¹⁶⁷

Jeremiah writes, *It is good for a Man, that he bear the Yoke in his Youth.* And Sophocles, τὸ φέρον ἐκ θεοῦ καλῶς χρὴ φερεῖν. *What God will have us to bear, Lett us bear it becomingly.*¹⁶⁸

But no Poet imitates the Scriptures more than Homer, who having been, as Pausanias tells us, an *Inquisitive Traveller into all Countreyes*, had no doubt, been among the Jewes.¹⁶⁹

¹⁶⁵ Solomon's sententious statement in Eccl. 7:20 is again paired with one from Theognis, *Elegiae* (1.799). Mather's Greek passage cribbed from Grew (152) is slightly inaccurate and should read Ἀνθρώπων δ' ἄψεκτος ἐπὶ χθονὶ γίγνεται οὐδείς.

¹⁶⁶ The preacher's proverb (Eccl. 3:11) is paired with the line from *Oedipus tyrannus* (1516): "Everything must have its day." Solomon's description of man's fate (Eccl. 12:7) is coupled with two lines from Pseudo-Phocylides, *Sententiae* (107–08). Again, Mather does not bother with diacritical marks even when supplied by his source (Grew 152). The passage differs slightly from that in Pseudo-Phocylides, which reads Σῶμα γὰρ ἐκ γαίης ἐχομεν καπεῖτα πρὸς αὐτὴν γῆν / λυόμενοι κόνις ἐσμεν· ἀπὸ δ' ἀνα πνεῦμα δέδεκται. "For we have a body out of earth, and when afterward we are resolved again into earth / we are but dust; and then the air has received our spirit" (*Pseudepigrapha* 2:578).

¹⁶⁷ Grew (bk. 4, ch. 2, p. 153). Solomon's celebration of his Shulamite (Cant. 6:8) is associated with a similar line of immortal love by Hero, priestess of Aphrodite at Sestus, for her beloved Leander of Abydos. The Greek citation from Musaeus's *Hero et Leander* (65) describes Hero's irresistible graces. The story of their tragic love survives in the version of the Christian Neoplatonist Musaeus Grammaticus (5th–6th c. CE) and in earlier versions, in Virgil's *Georgics* (3:258–63) and Ovid's *Heroides* (bks. 18–19). Mather omits the diacritical marks of his source text.

¹⁶⁸ Jeremiah's adage (Lam. 3:27) is compared to one from Sophocles's tragedy *Oedipus Coloneus* (1694), which survives in a variant form: τὸ φέρον καλῶς φερεῖν: "What Heaven brings ye needs must bear." Mather's version (Grew 153) is adapted to suit his Judeo-Christian tenor.

¹⁶⁹ The Greek writer Pausanias of Lydia (fl. c. 150–c. 180 CE) relates that unlike Hesiod, who was reluctant to travel, Homer had traveled "very far abroad" (*Graeciae descriptio* 1.2.3).

Ganymedes being taken into Heaven, is an Allusion to *Enoch's* Translation. In Allusion to the Story of *Balaam*, he will have *Xanthus*, the Horse of *Achilles*, upon his Carreer, to speak to him, and *Achilles* answer him. He makes an Interposal of the Gods, in almost every Part of the War, between the *Græcians*, and the *Trojans*. This highly imitates the Sacred Story. As he came after *David* (as *Herodotus* will have it, near two hundred Years, and near one hundred, according to *Philochorus*.) thus his Imitations of *David*, are Numberless.¹⁷⁰

Agamemnons Prayers, have many Strokes of the *Psalms* in them. *Homer* tells us, The Gods eat *Ambrosia*; *David* speaks of the *Manna*, which is *Angels Food*. From the Falling of *Manna* in the Wilderness, we have the *Ambrosia campi*. *David* saies, *Bread strengthens, & Wine makes glad the Heart of Man*. *Homer* saies, *Bread & Wine give Men both Strength & Heart*. The Psalmist saies, That God had given his People to be Meat for the Fowls of Heaven, & their Flesh to the Beasts of the Earth. The Poet makes *Achilles* tell *Hector*, Th[at] he should lye dead in the open fields, till Fowls & Dogs devoured him. The Psalmist saies, The Poor committeth himself to God, and, The Lord preserveth the Stranger. The Poet saies, That the Poor & the Stranger, are always in the Hands of God.¹⁷¹

¹⁷⁰ *Ganymedes*, the handsome Trojan youth kidnapped by Zeus and taken to heaven in a whirlwind or by an eagle (*Homer*, *Iliad* 20.231–35 and *Hymnus Homericus* 4.202–17), is here associated with the biblical Enoch, who is similarly elevated (*Gen.* 5:24 and *Liber Ecclesiasticus* 44:16). *Xanthus*, the trusted horse of *Achilles*, breaks his silence (at *Juno's* instigation) and addresses his dying master (*Homer*, *Iliad* 19.400–15). The biblical story of *Balaam's* loquacious ass is told in *Num.* 22:22–30 and *2 Pet.* 2:15–16. The dates of *Homer* are uncertain, but most scholars now agree that the epic bard of Chios flourished in the eighth century (c. 750 BCE). Since King *David* (11th c. BCE) lived nearly three centuries before *Homer*, Mather assumes that the writings of the former are the source for the latter and turns for the dates of the Greek bard to *Herodotus*, who argues that *Homer* lived four hundred years before *Herodotus's* own time (2.53). The Greek historian *Philochorus* (c. 340–260 BCE), best known for his *Atthis*, provides slightly different dates than those of his more famous fellow historian *Diogenes Laertius* (*Vitae philosophorum* 2.43–44). Interestingly, Mather is less inclined to assign precise dates than is *Nehemiah Grew* (bk. 4, ch. 2, p. 153), who argues that according to *Herodotus*, *David* lived “about 188” before *Homer*, and according to *Philochorus*, “about 87.” *James Ussher's* dates for King *David's* reign are 1055–1015 BCE, and for *Homer*, the tenth-century BCE, in *Ussher* (*Annals* 34–35, 39).

¹⁷¹ The prayer of *Agamemnon*, the Danean hero fighting in the Trojan War, is uttered in *Homer* (*Iliad* 2:412–18). The Greek deities indulge in ambrosia (immortality) and cups filled with nectar, in *Homer* (*Iliad* 1.595–600) and in *Ovid* (*Epistulae ex Ponto* 1.10.11), but *Cicero* (*Tusculanae disputationes* 1.26.65) is skeptical. King *David* celebrates the raining down of celestial manna in *Ps.* 78:24–25, from which celebration (Mather argues via *Grew* 153), we have the “Ambrosian fields” or the “Gardens of the Hesperides.” *David's* disquisition on bread and wine (*Ps.* 104:15; *Ecl.* 9:7) inspired, perhaps, *Homer's* description of the feasting *Argives* in *Iliad* (9:89–94). The desolation of *Jerusalem* likened to beasts feeding on human corpses (*Ps.* 79:2) is compared to *Achilles's* curse of *Hector*, in *Homer* (*Iliad* 22:331–36). And, finally, the Psalmist's lamentation and benediction (*Ps.* 10:14; 146:9) is to have been the source of inspiration for *Homer's* faithful swineherd *Eumaios*, who reminds disguised *Odysseus* that the rites of hospitality are sacred to the gods (*Odyssey* 14:55–71).

I will, from Dr. *Grew*, mention only Two more of this Poets Imitations; and they are pretty Remarkable ones. One of them is This.¹⁷²

He transfers the Circumstances of the Transactions between the *Israelites* & the *Egyptians*, to that between *Penelope* and her Wooers. *Penelope* takes Presents of them, & this by the Advice of *Pallas*, before they were all Destroyed, even by *Ulysses*, who answers to *Moses*. Nor were the Presents made unto *Penelope*, before they were asked; which was the Case of the *Israelites*. And, as the sudden Destruction of the *Egyptians*, was in the Night, so when the Time for the Wooers to be destroy'd was come, the House wherein they were, became Dark. And as the *Israelites* were ordered then to Sprinkle their Door-Posts with Blood, So, the Beams of *Penelopes* House now seemed all Bloody. The other of them is This.¹⁷³ His *Twentieth Iliad* is wonderfully taken out of our *Eighteenth Psalm*. *David* makes a Triumphant sort of Descant upon his Deliverance from all his | Enemies, & from *Saul*. Much of this the Poet borrowes, to express *Æneas's* Præserva-tion from *Achilles*. The Psalmist saies, *God Thundred with fiery Lightnings in the Heavens*. The Poet saies, *Jove Thundred terribly above*. The Psalmist saies, *Then the Earth Shook & Trembled*. The Poet saies, *Neptune shook the Earth on every Side*. The Psalmist saies, *The Foundations of the Hills moved & were shaken*. The Poet saies, the like, of the *Plains beneath, & the Tops of Ida*. The Psalmist saies, *The Channels of the Waters were seen & the Foundations of the World were discovered*. And in the Poet, *Pluto* bids *Neptune* hold his Hand, lest his dismal Dwelling should be discovered. In the Psalmist, *Thunders* and *Lightnings* præcede the *Sea-Storm*. The Poet brings *Phæbus* opposing himself to *Neptune*. The Psalmist expresses his Deliverance, by saying, *The Lord sent from above; He took me, He drew me, out from many Waters*. Thus in the Poet, *Neptune* carries *Æneas* from *Achilles*, over the Heads of the *Trojan Army*. *David* speaks of his Enemy, as *too strong* for him; And *Neptune* asks, who betray'd *Æneas* to *Achilles*, *much the stronger?* *David* saies, That *God delighted in him*. And *Æneas* is represented by *Homer*, as *Beloved of the Gods*.¹⁷⁴

[68v]

172 The following three paragraphs are extracted from Grew (bk. 4, ch. 2, pp. 153–55).

173 Mather (and Grew) believes that the Israelites' pocketing the jewelry of their Egyptian neighbors (Exod. 12:35–36) during their hasty departure from Egypt is embedded in Homer (*Odyssey* 18.280–303). Here, Penelope, faithful wife of Odysseus (Ulysses), acts on the behest of Pallas Athena and accepts her suitors' gifts even though she has no intention of honoring their marriage proposals. Likewise, the sacrificial blood on the Israelites' lintels and the death of all firstborn among the Egyptians (Exod. 12:22–23, 29–30) is paralleled with Odysseus's bloody revenge on his wife's suitors and on his own disloyal servants (*Odyssey* 22.305–520).

174 David's thanksgiving and description of how Jehovah of Armies vanquished David's enemies (Ps. 18) is compared to Homer's celebration of victory in the combat between Aeneas and Achilles (*Iliad* 20.156ff). The divine display of thunder, lightning, and earthquakes of Jehovah (Ps. 18:7, 13) is compared to similar displays of awesome power of the Greek deities (*Iliad* 20.57–60); David's superlative metaphors of the waters and foundations of the world (Ps. 18:7, 15) are associated with those of Homer's Pluto (Hades, Aidoneus), god of the underworld, who cautions the earth-shaker Neptune (Poseidon) not to expose the chambers of the deep (*Iliad*

The like Imitations of our Sacred Scriptures, are observed in the best *Philosophers* of all Ages and Countreys. But none discovers a greater Acquaintance with the Books of *Moses*, than the famous *Plato*; for which Cause by *Clemens Alexandrinus*, after *Numenius*, he is called, Μωσῆς Ἀττικίζων. *Moses in an Athenian Dress*.¹⁷⁵

The Passages that might be quoted, would make a Volumn. I will supersede all quotations, with a notable Saying of old *Minutius Felix*. *Disputant philosophi eadem quæ dicimus; non quòd nos simus eorum vestigia secuti, sed quòd illi de divinis prædicationibus prophetarum, umbram interpolate veritatis imitati sunt*.¹⁷⁶

Before I wholly dismiss this Illustration, I will invite you to read the *Sixth Eclog* among *Virgil's* Pastorals. On which his Translator observes, That his Description of the *Creation* has in it, not one of the Terms peculiar to the *Epicurean* Hypothesis, (and indeed how could he well introduce a *GOD*, oddly denying the *Power* and *Providence* of the *Deity*, and singing an Hymn to the *Atoms*, & *Blind Chance*?) But it agrees very well with that of *Moses*; And *M. Dacier*, who is confident that *Horace* had perused the Sacred History, might with more of Reason have affirmed the same concerning *Virgil*.¹⁷⁷ For besides the famous

20.61–65); the thunderstorm at sea (Ps. 18:11–15) weighs against the quarrel between Phœbus (Apollo) and Neptune (*Iliad* 20.54–69); the deliverance of the Psalmist from the waters (Ps. 18:16) is linked with Neptune's rescue of Aeneas (*Iliad* 20.318–29); David's strong enemies (Ps. 18:17) are related to those in Neptune's query (*Iliad* 20.332–39); and finally, Jehovah's delight in David (Ps. 18:19) is equated with the love of the immortal gods for Aeneas (*Iliad* 20.347–48).

175 Grew (bk. 4, ch. 2, p. 155). Plato (c. 429–347 BCE), the great Athenian philosopher, is here prized for his cosmogony, cosmology, and ethics (esp. *Timæus*, *Philebus*, *Symposium*, and *Leges*), which exhibit striking similarities to those of the Hebrew lawgiver. Clemens Alexandrinus (*Stromata* 1.22.150.4.2), evidently following the example of the Syrian Neoplatonist Numenius of Apamea (fl. 2nd c. CE), dubs Plato “Moses Attikizon”; i.e., “Athenian Moses” – a designation that Clemens derived from Numenius's *De bono* II, which survives in *Fragmenta* (fragm. 8.4). Mather's likely source (via Grew) is Eusebius's (*Praeparatio evangelica* 9.6.411a; 11.10.527a), where Numenius declares, “For what is Plato, but Moses speaking in Attic Greek?” See also *Heptaplus* (First Proem, p. 68), by the Italian Renaissance humanist Giovanni Pico della Mirandola (1463–94), who argues that Plato's philosophy is largely derived from that of the Israelite Lawgiver. See D.P. Walker's *Ancient Theology* (10–14) and S. Hutton's “*Moses Atticus*” (68–84).

176 The second-hand Latin citation (via Grew, bk. 4, ch. 2, p. 154) is from the Christian apologist Marcus Minucius Felix (fl. 200–240 CE). The passage from his Socratic dialogue between a Christian and pagan appears in his *Octavius* (34) and translates as follows: “Philosophers dispute of the same things that we are saying, not that we are following upon their tracks, but that they, from the divine announcements of the prophets, imitated the shadow of the corrupted truth” (*ANF* 4:194). Mather is not completely faithful to the Latin quotation derived from Grew (154).

177 Turning to the pastoral eclogues by the Roman epic bard of Mantua Publius Vergilius Maro (70–19 BCE), Mather is delighted that Virgil (*Eclogue* VI) seemingly rejects the Epicurean speculation that the universe resulted from an accidental accretion of atoms that fortuitously combined and formed this world, which therefore has neither a beginning nor an end. André Dacier (1651–1722), a French editor and translator of classical works, published an edition of

Passage in the Sixth *Aeneid*, where the Word, *Principio*, is used in the Front both by *Moses* and *Virgil*, and the *Seas* are first mentioned, and the, *Spiritus intus alit*, which might not improbably allude unto the *Spirit moving on the face of the Waters*; – Omitting this parallel Place, the successive Formation of the World, is evidently described in these Words;

– *Rerum paulatim sumere Formas*.¹⁷⁸

And it is hardly possible to render more literally that Verse of *Moses*; *Lett the Waters be gathered into one Place, and Lett the Dry Land appear*, than in this of our *Virgil*;

Tum durare solum, et discludere Nerea Ponto.¹⁷⁹

After this, the Formation of the *Sun* is described (exactly in the Mosaical Order;) and next the Production of the first living Creatures, but in a small Number; (all in the same Order still.)

Rara per ignaros errent Animalia montis.

Here also *Virgil* keeps more close to the *Mosaick* System, than the Writer, who will by no means allow *Mountains* to be coæval with the World.¹⁸⁰

[69r]

136.

Q. It cannot bee deny'd, That the common Glosses, wherein the *Mosaic* Account of the *Creation*, is dressed out unto our Understanding, are full of Difficulties. For this Cause, you know, learned Men have of late used several *Essayes*, all not with *æqual Success*, to rescue the Inspired Writings of *Moses*, from

Quinti Horatii Flacci Opera (1694), the collected works of Horace (68–8 BCE), Roman poet and satirist of Apulia. For the revival of the atomist philosophy, see R. B. Lindsay's "Pierre Gassendi," G. B. Stones's "Atomic View," and M. Gorman's "Gassendi."

¹⁷⁸ The famous passage appears in Virgil's *Aeneid* (6.724–55) and celebrates the creation of the heavens and the earth. Mather is particularly attracted to this passage because like Gen. 1.1 in Jerome's Vulgate, Virgil's passage begins with "*Principio*" (6.724), "Beginning" or "First." Likewise, Mather is charmed by the similarity between Virgil's "*Spiritus intus alit*" ["a spirit within supports"] (*Aeneid* 6.726) and Gen. 1:2. Mather also sees a parallel in the six successive days of the Mosaic creation account (Gen. 1:1–31) and the Latin passage from Virgil's *Eclogue* (6.36), which can be rendered "gradually to assume the shape of things."

¹⁷⁹ The divine command to separate the dry land from the waters (Gen. 1:9) is echoed in Virgil's Latin passage, which reads in translation, "Then the ground began to harden, to shut up Nereus in the abyss" (*Eclogue* 6.35). Upon confining the old sea god Nereus (son of Pontus) to the deep, Mather turns to the next parallel.

¹⁸⁰ The creation of the sun on the fourth day (Gen. 1:14) and the sequential creation of all living beings on earth (Gen. 1:20–26), Mather believes, are alluded to in Virgil's *Eclogue* (6.40), which translates, "living beings roam over the mountains that do not know them." With such Virgilian evidence to confirm the existence of mountains from the beginning of the creation, Mather pokes fun at the Cartesian *Telluris Theoria Sacra* (1681, 1689), revised and translated as *The Sacred Theory of the Earth* (1684, 1691), by the English latitudinarian divine Thomas Burnet (c. 1635–1715), Master of the Charterhouse and member of the Royal Society, who argues that the antediluvian earth had neither mountains nor seas, for the surface of the earth was completely level and the waters were confined in subterranean caverns (bk. 1, chs. 5–11, pp. 53–118).

the *Hardships* that have been putt upon them. Favour mee, with communicating at least One or Two of those *Essayes*. v. 31.

A. If I *do*, you must not expect, that I declare myself, how far I concur, with every Point, that shall bee offered. And I will also leave *you*, to the same Liberty that I take *myself*.¹⁸¹

The *Sentiments*, which I will first offer you, have Mr. *William Whiston*, for the Author of them: who in a Book published, 1696. under this Title, *A New Theory of the Earth*, ha's the Substance of the ensuing Passages.¹⁸²

Hee first laies down this Position: "*That the Mosaic Creation is not a Nice and Philosophical Account of the Origin of All Things; but an Historical and True Repre'sentation of the Formation of our single Earth, out of a confused Chaos, and of the successive & visible Changes thereof, each day, till it became the Habitation of Mankind.*"¹⁸³

Hee saies, The very first Words of *Moses* plainly imply, that the Production of *the World out of nothing*, which wee usually style *Creation*, was precedaneous to the *Six dayes Works*, given account of, in the same Chapter. *In the Beginning God created the Heaven & the Earth*. q. d. "Tho' the History of the *Origin of the World*, which shall now bee given you, do not extend any farther than that *Earth* wee live upon, and the *Bodies* that belong unto it; yett, to obviate any Ill Effects of a perfect Silence touching these things, I am obliged, by the Divine Command, to assure you, That the Original of *all Beings* whatsoever, was primarily

181 Mather's diffidence openly to declare his position is amusing albeit understandable because William Whiston's theories significantly challenged some of the time-honored explanations of the Mosaic creation account. When Whiston made public his Arian beliefs (which his friend and mentor Isaac Newton wisely kept to himself) and accused St. Athanasius, the ancient bishop of Alexandria, of forgery, Mather's friendly epistolary correspondence with Whiston cooled considerably, and the New England cleric edited out of "BA" the more amicable attributes he had bestowed on Whiston even while Mather continued to excerpt Whiston's publications wholesale (Silverman, *Life* 328–30; Force, *Whiston* 105–13).

182 Whiston's *A New Theory of the Earth, From its Original, to the Consummation of all Things* (1696) originated as a refutation of Thomas Burnet's *Sacred Theory of the Earth* (1691). The significance of Whiston's popular work – it had gone through five editions by 1737 – earned him the respect of Isaac Newton, whom Whiston succeeded as Lucasian Professor of mathematics at Cambridge (Force, *Whiston* 40–54). My page references to Mather's lengthy excerpt [69r–76v] are to the first edition of Whiston's *New Theory* (1696).

183 Excerpted from Whiston's "A Discourse Concerning the Nature, Style, and Extent of the *Mosaick History of the Creation*" (separate pagination), in *New Theory* (pt. 1, p. 3), Whiston posits that the creation account (Gen. chs. 1–2) does *not* intend to be scientifically accurate, but merely describes to a philosophically untrained audience the sequence of what an eyewitness might have seen at the time of creation. By introducing this distinction, Whiston (and Mather) can at once continue to defend the divine inspiration of the Mosaic narrative *and* acknowledge its contradiction to the scientific discoveries of Whiston's time. Whiston's subsequent argument is all the more innovative (and threatening) because he theorizes that the Mosaic story does *not* apply to the creation of the whole universe (as is uniformly assumed), but merely to the sublunary planet earth. All other planets in our solar system, the sun, and the rest of the universe were created in an antecedent event *not* included in the Mosaic hexaemeron.

owing to the same God of *Israel*, whose Works I am going to Relate; and that, not only this *Earth*, and all its *Bodies*, but the *Vast Frame of Universal Nature*, was by him at first created out of *Nothing*, and disposed into the several Systems that are now extant.” – It is clear, That as soon as the Holy Writer, descends to the Description of the *Chaos*, and the Commencing of the Six dayes Creation, hee mentions not a Word, of any Production out of *Nothing*; which was before Supposed and Asserted to have been past and done, *In the Beginning*. – The Words here used, of, *Creating*, or, *Making*, or, *Framing* of things, in the Style of the Scripture, do frequently signify no more, than the Ordering, Disposing, Changing, or *new-modelling* those Creatures which existed already, into a different, & sometimes perhaps a Better, & more Useful State, than they were in before. In the very History of the *Creation* itself, you find it so. – Moreover, Those Phrases, *The World*, or, *The Heavens & the Earth*, under which, the Object of the *Six Dayes Creation* is comprehended in Scripture, do not alwayes denote the *whole System of Beings*; but are in the Sacred Style, frequently, if not mostly, to bee re{strained to} the Terraqueous Globe with its Dependences.¹⁸⁴

The only considerable Objection, is, That neither the *Light*, by whose Revolution *Night* and *Day* are distinguished, nor the *Sun*, *Moon*, and *Stars*, which are sett in *our Firmament*, belong to our *Atmosphere*, and yett both of them do belong to the *Mosaic Creation*, and are the *First* and *Fourth Dayes* Works therein.¹⁸⁵

To give Satisfaction in this Point; The Original of the *Light*, were without Difficulty to bee accounted for, if the other Point, the Making of the *Heavenly Bodies* were once settled. And that would bee no Harder, if the Translation of the Words of *Moses*, were but thus amended: *And God said, Lett there bee Lights in the Firmament of the Heaven, to Divide the Day from the Night: – And God had (before) made Two Great Lights, the Greater to rule the Day, & the Lesser to rule the Night; and Hee had (before) made the Stars also, and God sett them in the Firmament*. The Hebrew Tongue, having no *Plusquam Perfectum*, it must and does express the Sense of it, by the *Perfectum*; and the particular Circumstances of each Place, must alone determine, when thereby the Time *Present*, and when the already *Past* and *Gone*, is to bee understood. How many *knotts* in the Scripture, the Omission of *this Observation* hath left unsolved, & which being

¹⁸⁴ Whiston (pt. 1, sec. 1, pp. 4–5; sec. 2, pp. 7, 9; sec. 3, pp. 9–10). The passage in quotation marks appears in Whiston and paraphrases the position of Simon Patrick (1625–1707), bishop of Ely, whose *Commentary* on Genesis (1694) represented the orthodox Anglican position on the Mosaic creation account. Whiston therefore acknowledges his consent in his revised fifth edition of 1737: “This Sense of the Words is allow’d by our late Excellent Commentator, the Right Reverend the late Lord Bishop of *Ely*; whose Sentiments cannot but be justly valued by all who are conversant in his Expositions of the Holy Scriptures” (*New Theory*, 5th ed., pt. 1, sec. 1, p. 5; and *New Theory* [1696], pt. 2, ch. 3, p. 90). The passage in braces – lost through defacement of Mather’s holograph MS – is here restored from Whiston’s text.

¹⁸⁵ Whiston (*New Theory*, pt. 1, sec. 3, p. 13).

observed, would immediately bee untied, wee shall not here enumerate. Lett it bee particularly considered, in the History of the *Creation* itself. Gen. 2.1. *On the Seventh day God had ended His Work, which Hee had made.* v. 3. *Hee had Rested from all His Work.* v. 5, 6. *The Lord God had not caused it to Rain on the Earth; and there had not been a Man to Till the Ground.* So, v. 7, 8, 9, 19. —¹⁸⁶

In the Holy Scriptures, the *Heavenly Bodies*, are no otherwise considered, than with Relation to *our Earth*, and as Appurtenances of *our Atmosphere*. Tho' the *Heavenly Bodies* are *universally useful*, yett here those Great and Noble, Main and Glorious Parts of the Universe, are not considered as under the many wise, vast, & *Comprehensive Ends* designed by the Divine Providence; but they are placed in the *Firmament of Heaven* (a Phrase used in this History, for *our Atmosphere*) to *Divide our Day from Night*, to bee to us for *Signs & Seasons*, for *Dayes & Years*; to bee for *Lights in the Firmament of Heaven*, to give *Light upon the Earth*; to *Rule over our Day & Night*; to *Divide our Light from Darkness*. And the *Order* of their Introduction here, is not that of their proper *Dignity*, but that of their *Respective Appearances* and *Uses* here below. Thus, the *Sun* and *Moon*, as if they were two Globes of *Fire* and *Light*, pendulous in *our Air*, and *hanging* over certain Places, are order'd to *stand still*, the one upon *Gibeon*, the other in *the Valley of Ajalon*.¹⁸⁷

Wee will attempt to find out, the True *Origin* and *Source*, of such Notions and Expressions. God hath so Framed the *Eyes* of Men, that when the Distance of Bodies, and their proper Magnitude is very great, they shall both
 [70v] bee *Imperceptible* to us. There is every Way from our *Eye*, a *Spherical Distance*, | or *Superficies*, which terminates our distinct Perception of Objects, and beyond which, all Distances and Magnitudes absolutely considered, are not by us distinguishable.¹⁸⁸ Until Geometrick and Philosophick Principles Rectify Mens

¹⁸⁶ The Latin "*Perfectum*" and "*Plusquam Perfectum*" are the "past" and "past-perfect" verb tenses, respectively. Whiston (*New Theory*, pt. 1, sec. 3, pp. 14–15).

¹⁸⁷ Whiston (*New Theory*, pt. 1, sec. 3, pp. 18, 19). The italicized passages are citations from and references to Gen. 1:14–17, and Josh. 10:12 – the latter referring to Joshua's arrest of the sun and moon.

¹⁸⁸ Whiston (*New Theory*, pt. 1, sec. 3, p. 21). Whiston begins his argument with a significant caveat (which Mather tellingly omits) that the Mosaic account does not aim at being an accurate or scientific record of what happened during the creation process, because "the Capacities of the People could not bear any such things; that the Prophets and Holy Penmen themselves, unless over-rul'd by that Spirit which spake by them, being seldom or never Philosophers, were not capable of representing these things otherwise than they, with the Vulgar, understood them: That even, still, those who believe the true System of the World, are forc'd among the Vulgar, and in common Conversation to speak as they do, and accommodate their Expression to the Notions and Apprehensions of the generality of Mankind" (Whiston, *New Theory*, pt. 1, sec. 3, p. 20). This ingenious distinction allowed Whiston and his compeers to uphold the divine inspiration of the Bible while blaming its unscientific descriptions on the ignorance of God's ancient messengers or on the prophets' need to accommodate their illiterate audience. This ancient form of accommodationism was not unique to Whiston and goes back at least as far as St. Augustine (*Confessions* 12.4.4). The bishop of Hippo also struggles with the multivalent

Notions, all Bodies whatsoever beyond the Clouds, such as the *Cælestial* are, must needs bee esteemed at the same æquidistant *Superficies* with the *Clouds*, and appear among them. The *Heavenly Bodies* consequently, *as to us*, are with them placed in our *own Air*; when their visible Magnitude, Scituation, Motion, and Habitues, are all one *with respect to us*, as if they really were *fiery Bodies*, rowling upon, or among the *Clouds*.¹⁸⁹

The Production of these *Heavenly Bodies* out of *Nothing*, was præcedaneous to the *Six Dayes Work*; and on the *Fourth day* of the Creation here, they are wholly considered as belonging to *our Earth*, and placed in *our Air*: Their *Original Appearance*, or their *First becoming visible in our Air*, is the only thing then referred unto. *Light* is then said to *Bee*, when the *Superior Regions* of the *Chaos*, were become so far Clear & Defæcate,¹⁹⁰ that the *Rays* of the *Sun*, in some Degree could penetrate the same, enough to render a sensible Distinction between *Night* and *Day*, or that Space the *Sun* was *above*, & that it was *beneath*, the *Horizon*. And agreeably, the *Sun*, *Moon*, and *Stars*, are said first to *Bee*, or, to *bee made*, when afterwards the *Air*, was rendred so very Clear and Transparent, that these *Luminaries* became conspicuous, and their Bodies distinctly *visible*, as in a clear *Day* or *Night*, they now appear to us.¹⁹¹

The Including of these Distant Bodies, thus in the *Mosaic History* of the *Creation*, might very well bee, to take away the very Foundation of that *Idolatry*,

meanings of the conventional words used in the Mosaic hexaemeron: Moses explains the creation in terms that "it might be conveyed to those of duller mind." Even Thomas Burnet and Isaac Newton embrace accommodationism. In an extant letter to the younger Isaac Newton (13 January 1681), Thomas Burnet argues that Moses (Gen. 1:1–31) does not describe the creation in scientific terms, but "gives a short ideal draught of a Terraqueous Earth rising from a Chaos, not according to ye order of Nature & natural causes, but in yt order wch was most conceivable to ye people, & wherein they could easily imagine an Omnipotent power might forme it." Ultimately, Burnet insists that the Mosaic creation account is not literal at all, but ideal or "morall" at best, which is to say fictional. Isaac Newton, however, was not willing to go as far as that: "Moses here sets down their creation as if he had then lived & were now describing what he saw. Omit them he could not without rendering his description of ye creation imperfect in ye judgment of ye vulgar. To describe them distinctly as they were in them selves would have made ye narration tedious & confused, amused ye vulgar & become a Philosopher more then a Prophet. He mentions them therefore only so far as ye vulgar had a notion of them, that is as they were phænomena in our firmament, & describes their making only so far & at such a time as they were made such phænomena" (*Correspondence of Newton* 2:323, 333). Newton's type of accommodationism therefore steers midway between the Skylla and Charybdis of allegory and literalism, revealing Sir Isaac's intrinsic need to hold fast to the Bible's divine inspiration even as he was at the forefront of the scientific discoveries of his age. Burnet fleshes out his side of the argument in his *Archæologie Philosophicæ* (1692), lib. 2, cap. 8–9, pp. 297–329; and in its English translation (1736), chs. 2–3, pp. 27–66. For helpful discussions of accommodationism, see S. Mandelbrote, "Isaac Newton"; S. Benin, *Footprints*; P. Harrison, *Rise* (129–38); and R. Smolinski, "How."

¹⁸⁹ Whiston (*New Theory*, pt. 1, sec. 3, p. 22).

¹⁹⁰ "Defæcate" here signifies "purified from dregs, clarified, clear and pure" (*OED*).

¹⁹¹ Whiston (*New Theory*, pt. 1, sec. 3, p. 23).

with which the *Jewes* were prone to adore the *Host of Heaven*. Tis hereby asserted, That they were *Created*, and *Dependent* Beings, which could have no Influence of *their own*, but what they derived from *God*, and were subject unto *His Government*, who placed them in the *Firmament*, and subjected them to such *Motions*, *Rules*, and *Lawes*, as rendred them serviceable unto this *Lesser World*.¹⁹²

Moreover, the *Mosaic History* of the *Creation*, being, A *Journal* of the *Mutations* of the *Chaos*, & of the *Visible Works* of each Day, such an one as an *Honest Spectator* on the *Earth* would have made, and *Recorded*, nay, and *Beleeved*, as in all Cases the *Reality* of the Things themselves: it is evident, that both the Appearance of the *Light*, and of the *Bodies* themselves, the *Sun*, *Moon*, and *Stars*, must come, within this *Journal*, & make as *Remarkable Changes* in the World, unto such a Spectator, as any other within the *Six dayes*, could possibly do.¹⁹³

To prove, that the *Mosaic History*, extends not beyond the *Earth*, & its Appendages, will bee easy; because all Men grant, that the *Confused Mass*, which wee call, The *Chaos*, whence all the several Parts of the *Creation* here described, were derived, extended *no farther*. The Ancient *Chaos*, was doubtless the single Source, or *Promptuary* of the *Six Dayes* Productions. Now the *Chaos* mentioned by *Moses*, is by him expressly called, *The Earth*, in Contradistin{ction to *The Heavens*, or} the other *Systems* of the *Universe*. And the *Chaos* of *Moses*, could not include the *Sun* and Fixed *Stars*, because just before the Extraction of *Light* from it, as tis usually explain'd, it was *Dark* & Caliginous. The Text saies, *Darkness was upon the Face of it*. This, on such a Supposition were Impossible. A strange Darkness! where more than *Ninety Nine* Parts of an *Hundred*, appear to bee *Fiery Corpuscles*, and the very same, from whence the *Sun* itself was constituted. And the now undoubted Property of the *Universal Gravitation* of *Matter*, contradicts and overthrowes this Fancy, of the *Heavenly Bodies* having been originally extracted from the *Chaos* of *Moses*. On this *Hypothesis*, when once they were mingled with the Parts of the *Earth*, and are since, at Immense Distances from it, they must have fled off every Way from their former Place, and in a small Space of Time, have thrown themselves to those vastly *Remote Seats*, which they have ever since possessed. Now, if instead of the, *Vis Centripeta*, a *Vis Centrifuga*; instead of *Mutual Attraction*, a *Mutual Repulsion* or *Avoidance* were found to bee, the standing unchang'd Law of *Nature*, and Property of *Matter*, this might have look'd like possible. But, when the contrary Force of *Gravitation* obtains, and that, as far as wee have any Means of knowing, *Universally*, there is now no *Room* for such an Imagination. Tis by no means Impossible, that all the *Bodies* in the Universe, should Approach to one another, and at last Unite in the common Center of *Gravity*, of the entire System: Nay, from the *Universality* of the Law of *Gravitation*, and the *Finiteness of the World*, in Length of Time,

¹⁹² Whiston (*New Theory*, pt. 1, sec. 3. p. 28).

¹⁹³ Whiston (*New Theory*, pt. 1, sec. 3, pp. 30, 31).

without a Miraculous Power Interpos[ing], it must really happen. But by what Law of *Nature*, or Property of *Matter*, they, when once conjoin'd, should bee separated, its hard to conceive. And the Difficulty is increased, by the prodigious *Velocity* of their Motions: when, according to the vulgar *Hypothesis*, but a *few Hours* can bee allow'd the *Heavenly Bodies*, to waft them into those Immensely, yett variously *distant Seats*, which they were ever after to possess. In fine, This Fancy, that the *Heavenly Bodies* proceeded originally from the *Terrestrial Chaos*, and cast themselves off from it every Way, supposes the *Earth* to bee the *Center* of the World, or of all that *System* of Bodies, and them to bee placed in a kind of Circumference every Way about it. But this *Ptolemaic* System of the World, must not hope, at this Time of Day, to bee entertained with considerate Men.¹⁹⁴

Our Author, proceeds to argue, That the *Mosaic* Creation is confined unto our *Earth*, with its Appurtenances, because otherwise the *Time* of the Creation of each Body was so extreemly *disproportionate* unto the Work itself, as is perfectly Irreconcilable to the *Divine Wisdome* of its Creator, and the Accounts of the Works themselves, as they are sett down by *Moses*. Hee freely confesses, Tis not necessary in all Cases, that wee should comprehend the Reasons of the *Divine Actions*, before {we can be under an Obligation} | {to Beleeeve them. They [71r] may be hid from us on several Accounts, tho' the things themselves be plain in Scripture.}¹⁹⁵ Nevertheless, hee thinks, tis one thing to bee *Above* Reason, and another thing to bee *Against* it. And hee thinks, the *Clearness*, or *Obscurity*, of the *Revelation*, may bee very considerable, in leaving us Room for the Exercise of *Reason* about it. Hee saies, with due Allowance every where made, for that *Infinite Distance*, and *Different State* of the *Supream Governour* of the

194 Whiston (*New Theory*, pt. 1, sec. 4, pp. 32, 33, 35, 36–38). The passage in braces – lost in Mather's manuscript through defacement – is restored from Whiston (p. 33). Whiston's argument about an ever expanding universe is surprisingly modern, for it contains the essence of the so-called "Big Bang" theory. Whiston, however, was not the first to theorize about gravity. This honor belongs to Aristotle, whose *De Coelo* (4.1) explains the falling of objects according to their specific weight. More than half a millennium after Aristotle (384–322 BCE), Claudius Ptolemaeus (c. 100–c. 175 CE) postulated in his famous *Almagest* that a centripetal force pulled bodies toward the earth's center. More than fifteen centuries later, the German astronomer Johannes Kepler (1571–1630) posited in his *Astronomia Nova* (1609) that gravitation is a universal force, which reciprocally attracts, and is attracted by, falling objects. The English mathematician Robert Hooke (1635–1703) tried to measure the gravitational force of falling objects and published his inconclusive experiments in *An Attempt to prove the Motion of the Earth* (1674). His contemporaries Sir Matthew Hale (1609–76), Lord Chief Justice of England, published his experiments in *An Essay touching the Gravitation* (1673) and in *Observations touching the Principles* (1677); John Wallis (1616–1703), Puritan divine and founding member of the Royal Society, presented his *A Discourse of Gravity* (1675) to his fellow members; and finally, Sir Isaac Newton (1642–1727) provided the mathematical proof of what his predecessors could only speculate about, in his *Philosophiae Naturalis Principia Mathematica* (1687). For a discussion of Newton's views on gravity and its source in God, see Westfall (*Never at Rest* 505–11), J. Henry, "Pray do not," and more generally, S. E. Morison's "Harvard School."

195 The passages in braces are lost at the bottom of [70v] and top of [71r] "BA," but here restored from Whiston's *New Theory* (pt. 1, sec. 5, p. 42).

World, from those of all *finite Beings*, depending on Him, & subject to Him; wee collect our *Idea*'s of the Divine Attributes, by considering what is *good, great, valued, & esteemed lovely & venerable* among *Men*. 'Tis a Dishonourable Reflection on God, *hee saies*, to ascribe those Things to *Him*, which to the *Free Faculties of Mankind*, would among us, bee look'd on as Marks of *Unskilfulness, Foolishness, & Imprudence*, in parallel Cases; & for which *Meer Men*, could not escape the most severe and Indecorous Imputations.¹⁹⁶ Hee saies then, putt the Case, that an *Husbandman*, who had *Two Plotts* of Ground, the one of a *score Feet* in Circumference, not very promising or capable of Cultivation above others; the other, of a *thousand Acres* of good Land, & very fitt for Tillage, or Improvement; should spend *four or five Dayes* in a *Week*, about his *Little Spott* of Indifferent Ground, and allott no more than the remaining *One* or *Two* for the Management of the other spacious Field, or, suppose, one should light upon an *Historian*, who undertook to give a compleat & full Account, of some large and spacious *Countrey*, with the many *Noble Kingdoms*, Principalities, Lordships, & Governments therein contained; and upon Perusal, nothing was to bee found mentioned in any particular Manner, but a certain Little & Remote *Island*, so inconsiderable, that the Generality of the *Inhabitants* of the *Main Land*, never heard so much as its Name, which indeed was described carefully, and its several Circumstances diligently accounted for; but as to the rest, there appeared no more, than at the Conclusion of a *Chapter*, two or three Names of its *Principal Divisions*, & some *Advantages* which one or two of their *Maritime Towns* afforded this *Small Island*; & then all was concluded. Hee affirms, the common Glosses on the *Mosaic History* of the *Creation*, to afford us, as gross *Idea*'s as these; and Notions, which an *Humane Soul*, ha's too quick a Sense of the *Decency* of things, and withal too deep a Veneration for the Adorable *Majesty of God*, to bee *easy under*, tho' it may bee *overborn* with them. Hee complains, that according to the vulgar *Hypothesis*, not only the Length of the *Day*, usually assign'd the *Mosaic Creation*, is disproportionate unto the *Business* done upon it, but also, that when the *Works* of each of the other *Dayes*, are *Single, Distinct* & of a Sort, the *Third Day* ha's two quite different, nay, Incompatible Works assign'd unto it; and that the *Earth*, with its Furniture, how inconsiderable a Body soever it is, takes up *Four entire Dayes*, at least, of those *Six*, which were allotted unto the *Whole Creation*, when the *Sun, Moon, and Stars*, those vastly greater, and more considerable Bodies, are crowded into *One single Day* together.¹⁹⁷

¹⁹⁶ Whiston and his compeers had learned their lesson well, for pious men were more inclined to attribute natural phenomena to God's divine power than to use their own reason to discover his natural laws. Benedict Spinoza says as much in his demystification of biblical miracles, in *Theological Political Tractate* (ch. 6, pp. 82–83). The cessation of miracles in post-biblical times and their inadmissibility in Enlightenment England are aptly discussed in J. Shaw's *Miracles* (2006), chs. 2 and 7.

¹⁹⁷ Mather extracts the entire paragraph from Whiston's *New Theory* (pt. 1, sec. 5, pp. 41–42, 46–47, 50–51). Whiston was not the first physico-theologian to take issue with the uneven

Hee goes on with many other Complaints, of the *Irregular*, and *Unbecoming* Proceedure, in the vulgar Scheme of the *Creation*; which for some Reasons, I choose to omit; and so I hasten, to give you, the Authors own, *Idea* of the whole Matter, as most conformable to the *Mosaic* History, and gloriously vindicating it from the Cavils of the *Deists*, and those that would bee thought *Socinians*: not omitting by the way, this one Passage, which is very pleasing. “I perswade myself, *saiés hee*, if there were a Collection made of the *Ancient Knotts* in several Parts of the *Bible*, and how very many of them, as *Preludes* and *Pledges* of the *rest*, are now entirely clear’d, or might easily bee so, it would contribute more, to the Recovery of the Ancient *Honour*, and due *Esteem* of the *Sacred Scriptures*,

distribution of activity during the six creative days, which (to him) could not have been literal periods of twenty-four hours each. In fact, many of the ancient and medieval Church Fathers and sixteenth-century Reformers did not see eye-to-eye on this issue and posited either an instantaneous creation or a creation during six literal days. Among those who insisted on an instantaneous creation are Philo Judaeus (*De opificio mundi* 3.13–14); Origen (*Contra Celsum*, 6.60–61), in *ANF* (4:600–1); Athanasius (*Orationes tres contra Arianos* 2.48–49); St. Hilary (*De Trinitate* 12.40) [PL 10. 458, 459], in *NPNFii* (9:228), St. Thomas Aquinas (*Summa Theologica* 1:355–57, Q 74, A 1–2). St. Augustine’s views seemed to have been unsettled over his lifetime: In *De genesi contra Manichaeos* (1.10.16; 1.14.20–21), he appears to maintain a literal six-day creation (of twenty-four hours each), but in *De Genesi ad litteram* (4.33.52; 4.34.54; 5.3.6; 5.17.35) and in *Liber imperfectus de genesi ad litteram* (7.28; 9.31), drawing on the apocryphal Sirach 18:1, he affirms a simultaneous creation of all things at once. “Creation,” Augustine explained in *The Literal Meaning of Genesis*, “did not take place slowly in order that a slow development be implanted in those things that are slow by nature; nor were the ages established at the plodding pace at which they now pass. Time brings about the development of these creatures according to the laws of their numbers, but there was no passage of time when they received these laws at creation” (4.33.52, 141–42). Besides, since all natural processes – growing roots, germinating seeds, hatching eggs, growing feathers, learning to fly – take considerably longer than a single day and are dependent each upon the other, the hexaemeral division must be seen as a mere structuring device: Thus “we might say that the creation of things took place all at once and also that there was a ‘before’ and ‘after,’ but it is more readily understood as happening all at once than in sequence” (*The Literal Meaning of Genesis* 4.34.54, 143). Another variant is presented by Irenaeus, who insists that the world was made in six days and will terminate (according to 2 Pet. 3:8) in as many thousand years (*Adversus haereses* 5.28.3), in *ANF* (1:557). The Protestant Reformers were given to greater literal-mindedness and insisted that God created the world in six literal days: Martin Luther, *Lectures on Genesis*, ch. 1, and Gen. 1:27 (*Luther’s Works* 1:5, 69); John Calvin (*Institutes* 1.14.2, 22), on Gen. 1:5, 2:1–3 (*Commentaries* 1:78, 100, 102–3, 105); and *The Westminster Confession of Faith* (1648) and *Savoy Declaration* (1658), ch. 4. Even the great Sir Isaac Newton struggled with this problem at least in his younger years. In an extant fragment dating back to 24 December 1680, Thomas Burnet objects to Newton’s argument that the duration of the six days was not a period of literal twenty-four hours each, but considerably longer because the earth’s diurnal revolution at that time could “have been very slow, soe yt ye first 6 revolutions or days might containe time enough for ye whole Creation” (*Correspondence of Newton* 2:319). For a historical survey of these exegetical issues, see White’s *History of the Warfare* (1:1–24). F. E. Robbins’s *Hexaemeral Literature* (chs. 1, 3) provides an eminently useful survey of these issues.

than all the most zealous & general *Harangues*, from some *Popular Topicks*, either for *them*, or against their *Contemners*.”¹⁹⁸

I shall pass by this Authors Conjectures about *Comets*, and the Relation which *They* might have to the several Mutations of this *Earth*.¹⁹⁹ The first Thing I shall Quote from him, is, A *Paradox*, which hee expects will appear a most *Extravagant Assertion* of all other, to not a Few of his Readers.

That tho’ the *Annual Motion* of the *Earth*, commenced at the Beginning of the *Mosaic Creation*; yett its *Diurnal Rotation* did not, until after the *Fall of Man*.²⁰⁰

Hee attempts to prove, in the first Place, That in the *Primitive State* of the World, *Dayes* and *Years* were all one. Hee shoves, That on this *Hypothesis*, the Letter of *Moses* is as exactly followed, as in the ordinary one. *Moses* calls by the Name of *Dayes*, the several Revolutions of the *Sun*, in which the *Creation* was perfected. A *Day*, is the Succession of Light and Darkness, *Once*: or, the Space *One Single* apparent Revolution of the *Sun*, from any certain *Semi-meridian*, above or below the *Horizon*, till its Return *thither* again: which is in the Case before us. And this *Hypothesis* gives a Rational Account of the *Scripture-Style*, wherein a *Day*, very frequently denotes a *Year*. Besides the Language of the *Genealogies* in the Fifth Chapter of *Genesis*, there are other Numberless Instances of that Style; especially in the *Prophetic Writings*. [Consider Deut. 14.28. with

198 The quoted passage is from Whiston’s *New Theory* (pt. 1, sec. 5, p. 62). Mather apparently dislikes Whiston’s dismissal of his contemporaries’ belief that the entire universe and its creatures were created for man as the crown and center of God’s creation. The disproportionate allotment of only *one* day to the creation of the entire universe (Gen. 1:3–5), but *five* days to the earth and all its creatures (Gen. 1:6–31), Whiston protested, reveals man’s ignorance: “Suppositions ten thousand times more disproportionate and unaccountable, when ascrib’d to God Almighty, are easily believ’d. So far can Ignorance, Prejudice, and a misunderstanding of the Sacred Volumes carry the Faith, nay, the Zeal of Men!” In fact, “The Vulgar Scheme of the *Mosaick* Creation, besides the disproportion as to time, represents all things from first to last so disorderly, confusedly, and unphilosophical, that ’tis intirely disagreeable to the Wisdom and Perfection of God (*New Theory*, pt. 1, sec. 5, pp. 56–57; sec. 6, p. 64). Such dangerous arguments are better left alone, Mather avers, for they would be grist for the mills of the Cartesians and Deists, who championed purely mechanical laws of the universe, and for Socinians, who espoused Unitarianism and rejected Christ’s divinity. Mather, then, cites Whiston in affirmation of the many dark passages of the Bible, which modern science has cleared up (*New Theory*, pt. 1, sec. 5, p. 62).

199 Mather is not happy either about Whiston’s conjecture that “a Comet, or more peculiarly the Atmosphere thereof, was the very Chaos from whence that World arose, whose Original is related in the *Mosaick History*” (*New Theory*, pt. 1, sec. 4, p. 33; pt. 2, bk. 2, Hypotheses, sec. 1, pp. 69–76, separate pagination). How recurring comets in their elliptical spheres retard or accelerate planetary revolutions Whiston details in his “Lemmata” (*New Theory*, pt. 2, bk. 1, sec. 42–82, pp. 36–67, separate pagination).

200 Whiston (*New Theory*, pt. 2, bk. 2, sec. 3, pp. 79–104). By postponing the diurnal rotation of the earth until after Adam’s Fall, Whiston (and Mather) ingeniously allows for a space of time before time began. In this manner, the six creative days in the Mosaic account amount to an indefinite period of time without being constraint by the limitations of a twenty-four-hour day.

Amos. 4.4. And consider, Num. 14.33, 34. Ezek. 4.4, 5, 6. and Dan. 8.13, 14. Chap. 12.11, 12, 13. and Rev. 11.3. and Chap. 12.6. and Dan. 9.24, 25, 26.] Why should a *Day*, and not rather an *Hour*, a *Week*, or *Month*, denote still a *Year*, in the Sacred Writings? The primitive *Years* of the World, once being *Dayes*, & call'd by *that Name* in the History of the *Creation*, the *Succeeding Style* of the Scripture, now appears, with much *Elegance*, to have been but a Continuation of the *Primitive*, & Fitted for to hint unto us, a Time wherein a *Day* and a *Year*, was really the same. Add hereto | That the *Six Dayes* of *Creation* and *Seventh* of *Rest*, [72v] were by Divine Command, in afterages to bee commemorated by *Years*, as well as by *Dayes*, and so in reason answered alike to both of these Denominations. The *Israelites* were *Six Years* to sow their Fields, & prune their Vines, and gather in the Fruits thereof; But in the *Seventh Year*, the Land was to keep a *Sabbath* unto the Lord. Finally, The Author argues from the Works done on some of the *Dayes*, that it is an Indecent Thing to Recurr unto *Pure Miracle*, for the *Acceleration* of them, into the Space of *Twenty Four Hours*, when the Lawes of *Motion*, were now already Stated and Fixed in the World. Especially, the Works of the *Sixth Day* appear too Numerous for so short a Space. e. g. The Production of the Terrestrial *Animals*. The Creation of *Adam*. The Donation of his *Dominion* over the Creatures. His *Exercise* of the Dominion in giving of *Names* unto them, which required some Consideration of the *Nature* of each *Species*. A *Deep Sleep* cast upon him, which probably must last more than a *Few Minutes* to deserve that Appellation. The Taking of his *Rib*, and Closing of the *Wound*, and Making of a *Woman*. The *Bringing* of the *Woman* to him, his *Owning* her, and *Naming* her, and *Receiving* the *Benediction* of God with her. The Appointing of a *Food* for them. And, in fine, according to the Tradition of the Jewes, The *Fall of Man*, on this Day. Now, tho' *God Almighty* can do all things in what Portions of *Time* Hee pleases, *Man* cannot. Hee must have *Time* allow'd him, in Proportion to the *Business*, that is to bee done. But behold here, Business enough allotted into the *Sixth Day*, to require no small Part of a *Year*, for the Dispatch of it!²⁰¹

Hence it followes, That in the *Primitive State* of the World, the *Sun* and *Planets*, Rose in the *West*, and Sett in the *East*, contrary to what they have done ever since. This may seem to have been the Foundation of that Story in *Herodotus*, who tells us, That the *Sun*, in the Space of 10340 Years, *four Times*, Inverted his Course, and *Rose in the West*. And *Plato* relating some very ancient Traditions, about the *Primitive State* of Things, and what a *Remarkable Change*

²⁰¹ Mather condenses Whiston's argument by extracting passages from *New Theory* (pt. 2, bk. 2, sec. 3, pp. 81, 82, 83–85, 86, 88, 89, 90; cf. pt. 2, bk. 4. ch. 1, pp. 227–30). That Adam and Eve needed more than a literal day of twenty-four hours to acquire all the knowledge of nature, name the animals, and accomplish their assigned tasks (Gen. 2:7–25) seemed all too obvious, even to Simon Patrick, bishop of Ely, whose acclaimed *Commentary* (1:16) argued that while nothing is impossible for God, man (no matter how perfect) needed more than a day to accomplish all that (see Patrick's introductory comments on Gen. chap. 3).

was effected by a certain mighty Alteration in the Heavenly Motions, hee ha's this Passage; *The Motion of the Universe sometimes Revolves the same Way, that it does Now, & sometimes the contrary Way*, [τοτὲ δ' ἐπὶ τὰναντία']²⁰²

Moreover, In the *Primitive State of Nature*, there was a perpetual *Equinox*, or æquality of *Day* and *Night* throughout the World. This *Phenomenon* is usually by the *Christian Fathers*, applied unto the *Paradisiacal State*; and by the *Ancient Heathens*; unto the *Golden Age*, or the Reign of *Saturn*. Hence *Anaxagoras* tells us, *That the Stars then Revolved* [θολοειδῶς] *in a Tholiform Manner, & the Pole appeared perpetually at the Vertex of the Earth*. It may bee supposed hee means, That the Motion of the Heavens, was originally about *one Center*, or *Axis*, that of the *Ecliptic*.²⁰³

In fine, To the *First Inhabitants* of the Earth, (dwelling at the *Intersection* of the Ancient *Ecliptic*, with the present Northern *Tropic*;) the *Poles* of the World, were neither Elevated nor Depressed, but at the *Horizon*. But some time after the Formation of Things, they suddenly chang'd their Scituation; the *Northern Pole* appear'd to bee Elevated above, and the *Southern* Depressed below the *Horizon*, or, in plain Words, there was a New *Diurnal Rotation* began, about the present *Axis* of the Earth. This Matter is much insisted on, by the Ancients. *Plutarch* hath a Chapter, περὶ ἐγκλίσεως γῆς, *Of the Inclination of the Earth*. To recite the Expressions of *Leucippus*, of *Democritus*, of *Empedocles*, and of *Anaxagoras*, to this Purpose, (namely, as the last mention'd ha's express'd it, Ὑστερον δὲ πόλον τὴν ἐγκλίσιν λαβεῖν, *Afterward the Pole received a Turn, or Inclination*.) would now take up too much of our Time. Tis enough to wind up all, in this Reflection; How should such surprizing *Paradoxes* run so universally thro' the *Eldest Antiquity*, if there were not *Some Foundation* in earnest for them?²⁰⁴

²⁰² The entire paragraph is from Whiston's *New Theory* (pt. 2, bk. 2, sec. 3, pp. 91–92). Whiston's own source is Thomas Burnet's *Archæologiae Philosophicae* (lib. 2, cap. 5, pp. 249–51). The change of the sun's movement is related in Herodotus (2.142) and in Plato's *Politicus* (270b, 8), the latter of which is also the source for the Greek passage “now contrariwise,” spoken by Socrates's interlocutor.

²⁰³ Mather's source is Whiston (*New Theory*, pt. 2, bk. 2, sec. 3, p. 93); Whiston again draws on Burnet's *Archæologiae* (lib. 2, cap. 5–6). The citation from *Testimonia* (fragm. 1.31), by the Athenian philosopher Anaxagoras of Clazomenae (c. 500–428 BCE), reads *tholoeidos* (tholiform, dome-shaped) and is taken at second hand from Diogenes Laertius (*Vitae Philosophorum* 2.9.1).

²⁰⁴ Whiston (*New Theory*, pt. 2, bk. 2, sec. 3, pp. 94, 95, 96) extracts his information again from Burnet's *Archæologiae* (lib. 2, cap. 6, pp. 260–62), including the reference to Plutarch's Greek title of ch. 12, in Pseudo-Plutarchus, *Placita philosophorum* (3.12.895a, sect. F, 1). Mather (via Whiston and Burnet) here refers to the atomistic theory of Leucippus (fl. 5th c. BCE), of Leucippus's disciple Democritus of Abdera (b. 460–457 BCE), and of the Greek philosopher Empedocles of Acragas, Sicily (c. 492–432 BCE) – all of whom are discussed in Pseudo-Plutarchus's *Placita philosophorum* (2.8 and 3.12). According to Aristotle (*Metaphysics* 1.4, 985a21–b3), Empedocles was the first to introduce the theory of cosmic cycles governed by the predominance of either love or strife – each initiating a new cycle of history. For Empedocles and Leucippus, see also Diogenes Laertius (*Vitae philosophorum* 8.77 and 9.33). The

If any object, that *Half a Year of Night*, would have been too disproportionate unto the Condition of *Mankind*, it may bee answered, That the State of *Mankind*, without Quæstion, and perhaps that of other *Animals*, was before the *Fall*, vastly different from the Present; And our Judging of *One Scheme* of Nature by another, is very Fallacious and Unreasonable. The Dayes in *Jupiter* are not *Ten Hours* long. Those in the *Moon*, are near Seventy Two Times as long as they, or, a *Month*. And yett wee may not conclude, That *no Creatures* do Inhabit them.²⁰⁵

Wee will proceed now, to some of the *Phænomena*, that occur, in our Authors Account of the *Creation*, inserting here and there, his Descants upon some of them.

I. All those particular small Bodies, of which our *Habitable Earth*, is now composed, were originally in a *Mixed, Confused, Fluid, & Uncertain Condition*; without any Order or Regularity. It was an *Earth without Form & Void*; It had *Darkness* spread over the Face of its *Abyss*; And in reality, it was what it hath been ever styled, *A Chaos*.²⁰⁶

II. The Formation of this *Earth*, or the Change of that *Chaos* into an *Habitable World*, was not a meer Result, from any Necessary Lawes of *Mechanism*, independently on the *Divine Power*; but it was the *Proper Effect* of the Influence and Interposition, and all along under the peculiar Care, & Providence of *God*.²⁰⁷ | Indeed, it is not very easy to determine, how far a supernatural or miraculous Interposition of the *Divine Power*, is concerned in such Things as these; and how far, the *Lawes of Nature*, or *Mechanical Powers*, ought to bee extended. It is now evident, That *Gravity*, the most *Mechanical Affection* of Bodies, & which seems most Natural, depends entirely, on the constant, and efficacious, and, if you will, the supernatural and miraculous Influence of Almighty *God*. There is more of *God*, in the Falling of a *Stone* to the *Earth*, than there would bee in that which, with greatest Surprize wee should call, *A Miracle*, its remaining *Pendulous* in the open *Air*: since to the former is required a more *Active Influence* of the *First Cause*. It is not unreasonable, that the most common Effects of *Nature*, or usual Accidents of *Humane Affairs*, bee ascribed unto the *Supream Being*. Tis from *Him* every Thing is ultimately derived. *Hee* conserves the Na-

[73r]

Greek passage from Anaxagoras's *Testimonia* (Fragm. 1.32) survives in Diogenes Laertius's *Vitæ philosophorum* (2.9.3) and is here translated by Whiston (*New Theory*, pt. 2, bk. 2, sec. 3, p. 95).
²⁰⁵ Whiston (*New Theory*, pt. 2, bk. 2, sec. 3, pp. 100, 101–02).
²⁰⁶ Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, p. 157). In support of his argument, Whiston refers in the margin to *De Veritate Religionis Christianæ* (lib. 1, cap. 16, pp. 9–28), a highly popular missionary work by the Dutch jurist and theologian Hugo Grotius (1583–1645), and to Burnet's *Theory* (bk. 1, sec. 4; bk. 2, secs. 7–8) and *Archæologiae* (lib. 2, cap. 1).

²⁰⁷ Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, pp. 157–58). Mather skips the next sixty pages of Whiston's work and continues his excerpt of *New Theory* (pt. 2, bk. 4, ch. 1).

tures, & continues the Powers of all Creatures. *Hee* not only at first *produced*, but perpetually *disposes*, and makes Use of the whole *Creation*, and every Part thereof, as the Instruments of His *Providence*. *Hee* foresaw, and fore-adapted the *Entire Frame*. *Hee* determined His *Co-operation*, or *Permission* to every *Action*. *Hee* so Ordered & Appointed the *whole System*, with every *Individual Branch* of it, as to Time Place, Proportion, & all other Circumstances, that nothing should happen any otherwise, than the *wise Intentions* of His *Providence* did require. Wherefore, wee need not fear, the most *mechanical*, and *philosophic*, Account of the *Creation*, as if thereby the *Holy Scripture* were superseded, or the *Divine Power* and *Providence* excluded. Nevertheless, a *Supernatural Efficiency* is more eminently to bee expected in the first *Origin* of Things; and the *Dayes* of the *Creation* are signally distinguished from those following, wherein tis said, *God Rested*, altho' His *Ordinary Concurrence*, & *Course of Nature*, was continued without Interruption. Wherefore, wee must allow, a *Peculiar Power* exercised, by the *Great Creator* of all, in the *first Formation* of our World; and particularly, in the Following Instances.²⁰⁸

First, The Creation of the *Matter* of the *Universe*, and particularly of that of the *Earth*, was originally the Alone and Immediate Work of *God Almighty*. Tho' our Imagination, a poor finite, Limited & Imperfect Faculty, bee unable to have a positive *Idea*, of the Manner of a Production of a *Real Being* at first, yett, seeing the *Infinite Absurdities* following the Eternity, and Self-subsistence of *Matter*, are so enormous, wee cannot but rest satisfied in this Assertion.

Secondly, The *Placing* of the *Earth*, in its primitive circular *Orbit*, at its proper Distance, therein to Revolve about the *Sun*, was either an Instance of the Immediate *Power*, or, at least, of the *Peculiar Providence* of God.²⁰⁹

Thirdly; The Formation of the *Seeds* of all *Animals* and *Vegetables*, was originally, {I suppose the immediate Workmanship} of God. As far as our *Micrometers* can help us to discern the Constitution of *Seeds*, those of *Plants* evidently, and by what hitherto appears, of *Animals* too, are no other than the *Entire Bodies* themselves *in parvo*, and contain every one of the same *Parts* and *Members* with the *Compleat Bodies* themselves, when grown to Maturity. When therefore, consequently, all *Generation*, is with us, nothing, as far as wee can find, but *Nutrition*, or *Augmentation of Parts*; and that agreeably thereto, no *Seed* hath been by any Creature produced since the *Beginning* of things; tis very philosophical to conclude them, to have been *Originally* every one created

²⁰⁸ Whiston (*New Theory*, pt. 2, bk. 4, ch. 1, pp. 218, 219, 221). For his discussion of gravity as proof of God's sustained, supernatural influence on nature, Whiston relies on *Confutation of Atheism from the Origin and Frame of the World* (1693), part II, lect. 7, Nov. 7, 1692 (pp. 26–40), by Richard Bentley, D. D. (1662–1742), English classical scholar and chaplain to Edward Stillingfleet, Lord Bishop of Worcester. Bentley was the first to deliver the distinguished Boylean Lectureship for 1692 and delivered eight separate lectures, which were published in 1692–1693. Mather puts the final two of Bentley's lectures to good use (below).

²⁰⁹ Whiston (*New Theory*, pt. 2, bk. 4, ch. 1, pp. 222–23, 223–24).

by God, either out of *Nothing* in the primary Existence of Things, or, out of the pre-existing *Matter*, in the *Mosaic Creation*. For indeed, the Origin of *Seeds* appears to bee hitherto unaccountable, by the mechanic Lawes of *Matter* and *Motion*.²¹⁰

Fourthly; The *Natures, Conditions, Rules & Quantities*, of those several *Motions* and *Powers*, according to which all *Bodies* (of the same general Nature in themselves,) are Specified, Distinguished, and fitted for their several Uses, were no otherwise determined, than by the Immediate *Fiat*, Command, Power, and Efficiency of *Almighty God*. The Power of mutual Attraction, or *Gravitation* of Bodies, appears to bee *constant*, & *universal*, nay, almost *essential* to *Matter*, in the present Constitution of the World; yett, the other *Lawes of Nature*, on which the particular Qualities of *Bodies* depend, seem not to bee so; but *changeable* in themselves, and actually *changed* according to the *Changes* in the *Figure, Bigness, Texture*, or other *Conditions* of the Bodies, in which they are contained. Thus, the *Cohesion* of the Parts of *Matter*, with more or less Firmness; the *Fermentation* of several *Heterogeneous Particles*, when mixed together; the *Magnetism* of the *Loadstone*; the *Elasticity* of certain *Fluids* and *Solids*; the obstinate *Inflexibility* of others; the Different *Density* of several Collections or Masses of *Fluids*, (while yett the greatest Part of their contained Space is *Vacuity*) not to bee considerably Increased or Diminished, without the Destruction of the *Species*. Now the Rules of *Matter*, and *Motion*, shown by such *Phenomena*, were Impress'd and Ordered at first, by the *Spirit of God moving on the Face of the Waters*; and by His *Concurrence* they are still preserved.²¹¹

Fifthly; The Ordering of all things so, that in the Space of Six successive *Solar Revolutions*, the whole *Creation* should bee finished, and each *distinct Dayes Work*, should bee confined to, and compleated in, its own distinct and proper Period, it is also to bee ascribed unto the particular Providence and Interposition of *God*.²¹²

Lastly, But principally; The Creation of our *First Parents*, is to bee esteemed, the *Peculiar Operation* of the Almighty; and that, whether wee consider the {Creation} of their *Bodies*, or {the Forepast Creation and After-Infusion} | of their *Souls*. Our *First Parents* were, on the very same Day in which they were made, in a State of *Maturity* and *Perfection*, and capable of all *Humane Actions*. As for the other *Animals*, their *Seeds* were here and there scattered by their Great

[74v]

²¹⁰ The passage in braces {} was lost through wear and tear of Mather's holograph manuscript, but are here restored from Whiston (*New Theory*, pt. 2, bk. 4, ch. 1, pp. 224–25, 228). For information on how the seeds of plants and animals contain miniscule replicas of each species' complete body Whiston draws on Bentley's fourth of eight Boylean lectures (June 6, 1692) *A Confutation of Atheism* (1693), part 2, pp. 3–36.

²¹¹ Whiston (*New Theory*, pt. 2, bk. 4, ch. 1, pp. 225–26). Whiston also draws attention to Sir Isaac Newton's discussion of gravity, elasticity, levity, force, and the resistance of fluids in the Latin preface (xvii–xviii) to Newton's *Philosophiae Naturalis Principia Mathematica* (1687).

²¹² Whiston (*New Theory*, pt. 2, bk. 4, ch. 1, p. 227).

Creator, and their *Growth* might bee, with a more *Mechanical Proceedure*; but there is a signal Distinction, in the Sacred History between the *Formation* of all other *Animals*, and the *Creation* of *Man*. In the former Case, tis only said, *Lett the Waters bring forth the moving Creature, that hath Life, Lett the Earth bring forth the living Creature after his Kind*. But of the latter, the entire *Trinity* consult; *God said, Lett us make Man*.²¹³

III. At the Time Immediately preceding the *Six Dayes* Creation, the Face of the *Abyss*, or superior Regions of the *Chaos*, were Involved in a *Thick Darkness*. All things Beginning then to take their Places, according to the Law of *Gravity*, the Mass of *Dense Fluids*, being heavier than the Masses of *Earth, Water, and Air*, would sink *downwards*, with the greatest Force & Velocity; & *elevate* the Masses enclosed among them upwards. Those *Opake* and *Earthy* Corpuscles, which before did Rove about the vast Regions of the *Atmosphere*, were now crouded nearer together; and by Consequence excluded the Rayes of the *Sun*, from the *Central Solid*, in another guise Manner than before.²¹⁴

IV. The visible Part of the *First Dayes Work*, was the Production of *Light*, or its *Successive Appearance* to all the Parts of the *Earth*; with, the consequent Distinction of Darkness and Light, *Night* and *Day*, upon the face of it. The *Subsidence* of the *Earthy* and *Opake* Masses, that were before this, in the upper Regions of the *Chaos*, did in some Degree admitt the Rayes of the *Sun*. As the *Mass* of the upper *Chaos* was separated from the heavier *Abyss* beneath, so it again divided itself into *diverse Orbs*, which gave the *Light* some Access to our *Earth*.²¹⁵

V. The visible Part of the *Second Dayes Work*, was, The Elevation of the *Air*, with all its contained *Vapours*; the Spreading it for an *Expansum* above the *Earth*, and the Distinction thence arising of *Superior* and *Inferior* Waters: The former consisting of those *Vapours*, Rais'd and Sustain'd by the *Air*; the latter, of such as either were inclosed in the Pores, Interstices, and Bowels of the *Earth*, or lay upon the Surface thereof. The lower *Earthy Strata*, now would bee *settling* somewhat closer together; the Watry Parts would subside, and saturate their Inward Pores and Vacuities; and the *Atmosphere* would Free itself more and more from the *heaviest* and *opakest* Corpuscles, and thereby become in a greater Degree Tenuious, Pure and Clear than before. By that Time the first Half-Year of this Day was over, {and the Sun arose, The Light and Heat of that Luminary would} more deeply penetrate the *Atmosphere*: and the proper Effect of this

213 The passage in braces {} was lost through wear and tear, but is here restored from Whiston. The entire paragraph is extracted from *New Theory* (pt. 2, bk. 4, ch. 1, pp. 227, 229).

214 The first sentence in this paragraph is extracted from Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, p. 158) and the remainder from pt. 2, bk. 4, ch. 1, pp. 232–33.

215 Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, p. 158; bk. 4, ch. 1, p. 236).

would bee, that vast Quantities of *Vapours* would bee elevated into, and there sustained by, the now better *Purified Air*; while the *Earthy Corpuscles*, which were incapable of, *Rarefaction*, & with them, all such *Watry Particles* as were so near the Earth, that the *Suns* Power could not sufficiently reach them, were still *sinking downwards*, and increasing the Bulk of the *Solid Earth*, & of its *Included Waters*. The *Expansum*, or Firmament which was this day spread out above the *Earth*, was plainly the *Air*, now truly so call'd, as being Freed, from the most of its *Earthy Mixtures*. The *Superior Waters*, were all those, which in the form of a *Vapour*, an Half Years Heat of the *Sun*, with the continual Assistance of the *Central Heat*, could elevate, & the *Air* sustain. The *Inferior Waters*, were those which remain'd below, all that fell down with, were enclos'd in, were sunk into, or lay upon, the Orb of *Earth* beneath. The *Air*, which is the Means of such a Separation, (still somewhat continued, in the serviceable *Clouds*,) is here said, to make this *Division*.²¹⁶

VI. The visible Parts of the *Third Dayes Work* were Two: The Former, the Collection of the *Inferiour Waters*, or such as were now under the Heaven, into the *Sea's*, with the consequent Appearance of the *Dry Land*: The Latter, the Production of *Vegetables*, out of the Ground so lately become *Dry*. In the *Half Year* of *Night*, the *Vapours* must not only descend upon the *Earth*, but by Reason of the Inæquality of the *Surface*, and therewithal the Solidity of the *Earth*, [*Mountains* being the *Lighter Sort of Earth*, tis likely enough, that in the very Course of Nature, enow of these were produced in the Formation of our *Earth*,] have run down into Declivities, and Hollowes, into the Lowest *Valleyes*, and most Depressed Regions of all; and must in these Places have composed *Sea's* and *Lakes* every where, throughout the Surface of the *Earth*. And so, by that Time the *Light* appeared, and the *Suns* Rising began the latter Part of the *Half-Year*, the entire Face of the Globe, was distinguished into *Sea* and *Dry Land*. Now was, of all other, the most convenient Season, for the *Germination* of the Seeds of *Vegetables*, and the Growth of *Plants* out of the *Earth*. The Soyl, fatned by the foregoing *Half-Years* descent of *Vapours*, was now, like the ἰλλὺς, that Fruitful *Seminary* of the *Vegetable* and *Animal* Productions of Primitive Nature, so much celebrated by all Antiquity. However, Tho' the Influencing *Heat* of the *Sun*, was on this Day very great, yett his *Body* was not hitherto become visible. The *Earth* and lowest Regions of the *Air*, were very Full of *Moisture*; a *Thick Mist* must thence needs hinder the *Air* of its Transparency, But,²¹⁷

²¹⁶ The passage in braces {} is restored from Whiston's text (pt. 2, bk. 4, ch. 1, p. 241), and the entire paragraph is excerpted from *New Theory* (pt. 2, bk. 3, ch. 1, p. 159; bk. 4, ch. 1, pp. 241–42).

²¹⁷ Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, p. 159; bk. 4, ch. 1, pp. 245, 246). The celebrated ἰλλὺς [Ilys] is the fruitful "mud" or "slime" so vital to ancient agriculture.

VII. The *Fourth Dayes Work*, was, the Placing of the Heavenly Bodies, the *Sun, Moon, & Stars*, in the *Expansum*, or Firma[ment, i.e. the rendring them
 [75r] visible} | and conspicuous on the *Face of the Earth*; Together with their several Assignations to their Respective Offices there. Tho' the *Light* of the *Sun* had, ever since the First Day, penetrated the *Atmosphere*, in some Sort, yett his *Body* must not bee supposed visible all this while. Wee see, how much & how long, a few *Clouds*, in our *Dayes*, will hinder our Prospect of the *Sun*. How much Time, then might it well take, to clear the *Atmosphere*, for a distinct View of the Body of the *Sun*, by a Spectator on the Surface of the *Earth*? But before the Morning of the *Fourth Day*, the *Air* might well bee left in the greatest Purenness, & Clearness imaginable; and first the *Moon*, then the *Stars*, and afterwards the *Sun* himself, might most plainly appear, unto our *Little World*? They now were so placed in the *Firmament of Heaven*, as to *give Light upon the Earth*; & begin to *Rule* plainly *over the Day & over the Night*, and to *Divide the Light from the Darkness*. Thus the *Inanimate World* is compleated; and there appears more Truth, than one thought, in the *Tradition* of the *Chineses*, who Inhabit *Formosa*; That the World, when first created, was without Form and Shape; but God in *Four Years* brought it unto its full Perfection.²¹⁸

VIII. The *Fifth Dayes Work*, was the Production of the *Fish* and *Fowl* out of the *Waters*; with the Benediction bestow'd on them, in order to their *Propagation*. The *Seeds*, or little Bodies of *Fish* and *Fowl*, contained in the Water, were now exposed unto the kindly *Warmth* of the *Sun*, and the constant Supply of a most gentle and equal *Heat* from beneath. The Agitations of the *Tide*, in the small Sea's, by the Absence of the *Diurnal Rotation*, were Imperceptibly Easy, Gentle, and Gradual. And the *Seeds*, being Invigorated with the Divine Benediction, became now prolifick; and in this *Fifth Dayes* Time, a Numerous Offspring, of the *Swimming* and *Flying* Sorts arose; whereby the Two Fluid Elements, *Water* and *Air*, became Replenished with those *First Pairs*, which, by the *Benediction* they straightway Received, were Enabled to become the *Original* of all of the same Kinds, which were ever to bee the Inhabitants of those Regions afterwards.²¹⁹

²¹⁸ The passage in braces is restored from Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, p. 160) and the remainder of the paragraph is extracted from *New Theory* (pt. 2, bk. 4, ch. 1, pp. 248, 249, 250). For the tradition of the Flood among the Taiwanese (Formosa), Whiston draws on *Geologia: Or, A Discourse Concerning the Earth before the Deluge* (ch. 2, p. 58), by the learned Erasmus Warren (fl. 1680–1714), Rector of Worlington, Suffolk. Evidently, Warren himself relies on Arnoldus Montanus's *Atlas Chinensis* (1671) for this Taiwanese creation story of Pankun, the sixty-second demigod, who created the world in four years (pt. 2, p. 46).

²¹⁹ The opening sentence is from Whiston (*New Theory*, pt. 2, bk. 3, ch. 1, pp. 160–61) and the remainder of the paragraph from bk. 4, ch. 1, pp. 251–52.

IX. The *Sixth Dayes Work*, was the Production of all the *Terrestrial*, or *Dry-land Animals*; and that in a different Manner. For the *Brute Beasts*, were produced out of the *Earth*, as the *Fish* and *Fowl* had been before, out of the *Waters*; but after that, the Body of *Adam* was form'd of the *Dust of the Ground*, who, by the *Breath of Life*, breath'd into him in a peculiar Manner, became a *Living Soul*. Some time after which, on the same Day, hee was cast into a *Deep Sleep*, and *Eve* was form'd out of a *Rib*, taken from his Side. And several other Things were done on This Day. The *Earth* was now grown more Solid, Compact, and Dry; the *Air* was fully clear, and fitt for Respiration: the other Dispositions of *External Nature* were become *Subservient*. Now was a proper Season, for the Generation of the *Dry-land Animals*, and the Introduction of, *Man*, the Noblest of them all. But tho' the other Works mentioned by *Moses*, were brought to pass, with a *Mechanical Process*, yett an *Immediate* and *Miraculous Power*, was exercised in the Formation of the *Body*, and Infusion of the *Soul*, of *Man*. Our Author takes it, That the same Λόγος Θεάνθρωπος, our Blessed *Mediator*, who was afterward, very frequently conversant on *Earth*, and appear'd in an *Humane Form* to the Patriarchs, & gave the *Law* in a *visible Glory*, and with an *audible Voice* on Mount *Sinai*, and guided the *Israelites* personally in a *Pillar of Fire & Cloud*, thro' the Wilderness, and inhabited between the *Cherubins* in the *Holy of Holies*, & took the peculiar Style, Titles, Attributes, Adoration, and Incommunicable Name of the God of *Israel*, and at last, was *Incarnate*, *Lived* a True Man among us, *Died* for us, and *Ascended* into Heaven, and still makes *Intercession* for us with the Father, and will come to *Judge the World in Righteousness* at the Last Day: That this very same Divine Person, was Actually & Visibly in an *Humane Shape*, conversant on *Earth*, and was really employ'd in this *Creation* of the World, (& particularly, in this peculiar Formation of *Man*), so frequently ascribed unto him in the Holy Scriptures. *Man* was now made, in the *Likeness* of this Divine Person, and constituted His *Deputy* and *Vice-gerent*, among the Creatures here below; and there was a peculiar Interposition of *God*, for his Original. So, upon the *Sixth Period*, when every thing that could bee subservient unto him, and advance his Fælicity, was compleated; *hee*, who was to bee the *Lord of All*, and for whose sake the *Whole* was framed, was brought into the World.²²⁰

This is a short *Idæa*, of that Illustration, which this Author, ha's given to the History of the *Creation*, left us by the Inspired *Moses*. The Author, ha's very many other *Strokes*, upon the *State* of the Primitive World, & the *Changes* that *have* come, or *must* come, upon this World, which are not here to bee Repeted.

²²⁰ The entire paragraph is extracted from Whiston (*New Theory*, pt. 2, bks. 3, ch. 1, p. 161 and bk. 4, ch. 1, pp. 252, 253–54, 255). Whiston's Greek "ΛΟΓΟΣ ΘΕΑΝΘΡΩΠΟΣ" or "Logos God-Man" refers to the incarnation of God in Christ as described in the Gospel of John (1:1–5, 14, 18) and elsewhere.

All that I shall further Transcribe from him is, a *Mathematical and Incontestable Demonstration*, of one Point, relating to the *System* of the World, which hath hitherto been undetermined. You shall have it, in his own Words.

[76v] | 'Tis certain, *saith hee*, That the Annual Motion belongs to the *Earth* about the *Sun*, and not to the *Sun* about the *Earth*. For when, from the *Moons* Orbit, and the *Planets* Orbits, and periodical Times, tis certain, That the *Law* of *Gravitation*, towards the *Earth*, and towards the *Sun*, is the same; and by Consequence, all the periodical Times, of Bodies Revolving about each of them, in the same Proportion to one another, compared with their several Distances from each other. On which *Hypothesis*, the Proportion that suits the *Phænomena* of Nature, & the same must bee the True one, and to bee fully acquiesc'd in. Now, tis known, That on the *Hypothesis* of the *Earths* Annual Motion, her periodical Time, exactly suits, and is so between that of *Venus* and *Mars*, as the Proportion observ'd thro' the whole System, and demonstrable *à priori*, withal, exactly requires: but on the other *Hypothesis*, tis enormously different. For, when the *Moon*, undoubtedly, and on this *Hypothesis*, the *Sun* also, Revolves about the *Earth*, and when the Distance of the *Sun* is to that of the *Moon*, as about 10000 to 46; and the *Moons* periodical Time less than 28 dayes: the periodical Time of the *Sun*, is by the *Rule of Three* discoverable thus: As the Cube of the *Moons* Distance, 46 *equal* to 97336; to the Cube of the *Suns* 10000 *equal* to 1000000000000: (or almost as 1 to 100000000,) so must the Square of the *Moons* periodical Time, 28 dayes, *æqual* to 784, bee to the Square of the *Suns* periodical Time, 7840000000; whose Square Root, 88204, are dayes also, *æqual* to 242 Years. So that on the *Hypothesis* of the *Suns* Revolution about the *Earth*, its periodical Time, must undoubtedly bee 242 Years; which all Experience attests to bee but a single one. Thus at length, the Controversy between the *Ptolemaic* and *Pythagorean* Systems of the World, is to a Demonstration determined; and the *Earths* Annual Motion, forever unquæstionably established."²²¹

²²¹ The paragraph in citation marks is extracted from Whiston (*New Theory*, pt. 2, bk. 1, ch. 1, sec. 23, pp. 26–27). Although Mather, the “Christian Philosopher,” did not hesitate to accept the mathematical underpinnings of the Copernican heliocentric system (hotly debated at the time), Mather, the theologian, kept wrestling with the implications of this philosophic revolution as it impacted biblical interpretations. His commentary on Joshua 10:12–14, the controversial miracle of the sun’s arrest in the midst of heaven, is a good case in point. Although accepted in NE’s almanacs and at Harvard, the Copernican system was still far from uncontroversial when promoted in the pulpit. For instance, when Mather delivered his Thursday Lecture, in which he praised the new heliocentrism, his friend Samuel Sewall murmured [Dec. 23, 1714]: “I think it inconvenient to assert such Problems” (*Diary* 2:779). (I am grateful to Kenneth Minkema for drawing my attention to Sewall’s remonstrance.) Significantly, Mather must have thought better than to expose himself to the pious censure of parishioners when he published his lecture as *Pascentius* (1714), for the printed sermon contains no reference to Copernicus or any heliocentrism. For an assessment of the new astronomy at Harvard, see S.E. Morison, “Harvard School” and *Harvard College* (1:216–19); R. Lockwood, “Scientific Revolution”; R.P. Stearns, *Science* (160ff); D. Fleming, “Judgment” (2:160–75); W. U. Solberg, “Introduction” (xxxiii); Solberg, “Science and Religion.”

What our Author further observes, That the *Year* before the Flood, was *Ten Dayes, One Hour, & Thirty Minutes*, shorter than the present, is very curious. But, I have already produced as much from his *Theory*, as may serve our present Purpose, for the *Illustration* of the *Divine Oracles*.²²²

As for a *Judgment* upon this Description of the *Creation*, I will præsume to make *None*, at all; I leave it unto *Men of Judgment*; All that I will add of my own is, That if wee apprehend the more peculiar Prærogative of *our World*, or this Terraqueous Globe, with its Appendages, to bee, That the Sovereignty of Heaven, has pitch'd upon *This*, as the *Peculiar Field* for the Glorious Actions of the *Messiah*, which the Gospel of God ha's Reported unto us, and that from hence the *Son of God*, would with Sovereign Grace choose the Creature, that Hee would have to subsist forever in One Person with Himself, I beleeve, wee shall entertain a Right *Idæa* of it. This is, on some singular Accounts, the *Messiah's* World, tho' *all Worlds* are *His*, and were made by Him and for Him. And, before wee read any further, the Bible, which begins with the Creation of this World, Lett us take up this Thought: for to bee carried all along with us, in our Minds, *That our Bible is the Book of the Messiah*.

[77r]

3347.

Q. The *Theories* of the *Creation*, (particularly what I last offered you,) invented by our Modern Philosophers, do certainly make too bold with the *Mosaic*, and *Inspired* History thereof. It were a Noble, and a Worthy Work; to Illustrate that History, and rescue it from the præsumptuous Glosses, that many *Neotericks* have made upon it. v. 31.²²³

A. It is notably done, by the most ingenious Dr. *Dickinson* in his, *Physica Vetus et Vera*. That Gentleman who near Fifty Years ago, obliged the World with the Curiosities of his *Delphi Phœnicissantes*, ha's now in this present Year, 1702. presented us, with a curious Treatise of above three hundred Pages in *Quarto*, in which he proves, *In Historia Creationis, tum generationis universæ methodum*

²²² Whiston (*New Theory*, pt. 2, bk. 1, sec. 56, p. 46).

²²³ Mather's ambidextrous, if not ambivalent, approach to the theories of Whiston and his peers is indicative of his internal conflict between his fascination with Newtonian science and his conviction that the Mosaic creation account must be defended against any threats from Latitudinarians. For these reasons, Mather incorporates excerpts from more conservative physico-theologians to balance his lengthy extract from such "*Neotericks*" as Whiston and Burnet, who espouse novel ideas. Given that lesser lights frequently ignored challenges to the Bible altogether, Mather's mediation reveals how far he had progressed in embracing Enlightenment ideas. Mather's argument that the earth is the "*Messiah's*, tho' *all the Worlds* are *His*" may allude to the popular seventeenth-century idea of the plurality of worlds. See *The Discovery of a World in the Moone* (1638), by John Wilkins, Lord Bishop of Chester; and *A Discourse of the Plurality of Worlds* (1687), an English translation of Bernard le Bovier de Fontenelle's popular *Entretiens sur la Pluralité des Mondes* (1686). M. J. Crowe examines this conjecture in *Extraterrestrial Life Debate*.

atque modum, tum veræ philosophiæ principia, strictim atque breviter à Mose tradi. To this Treatise I shall now be beholden, for the Illustration upon the *Mosaic Hexaemeron*, with which I am now going to entertain you. And upon this Entertainment perhaps we shall be more able than ever, to say with *Nazianzen*; *ὅταν τὴν ἑξαήμερον αὐτοῦ μεταχειρίζομαι κλ.* *As often as I take that Hexaemeron into my Hands, I am with my Creator immediately, and I see the Methods and Reasons of His Creation.*²²⁴

The main Design of *Moses*, being to inculcate Piety upon his Nation, & Mankind, it was wonderfully agreeable for him, to begin with a Display of the Divine Power, & Wisdome & Goodness, in the Creation of the World. It is, probable, That *Moses* wrote this History, while he was an Exile in the Land of *Midian*, and sent it unto his Brethren in *Egypt*, that he might comfort them under their Bondage, and confirm them in their Beleef & Worship of that one God, who is the Creator of all things. Tis not likely, that he wrote *Ænigmatically*; but the *Mosaic Philosophy* was well understood in those first Ages; and tho' afterwards vain Men, like *Celsus*, and *Simplicius*, have reflected on him, as if he wrote *ἀτέχως καὶ ἀθεωρῆτως*, *Inartificially & Inconsiderately*, tis only because the true Notions of the *Mosaic Philosophy* are lost, and Men, like *Harpaste* in *Seneca*, cry out upon the House as *Dark*, only because they themselves are *Blind*, or have used none but *Peripatetical Spectacles*.²²⁵

²²⁴ The following MS pp. [77r–87v] are highly condensed excerpts from *Physica Vetus & Vera* (1702), an arcane atomist defense of Genesis, chs. 1–2, authored by Edmund Dickinson, M.D. (1624–1707), an English alchemist and Physician in Ordinary to King Charles II and James II. Dickinson's earlier work to which Mather alludes is *Delphi Phoenicizantes* (1655). The Latin passage from the title page of *Physica Vetus & Vera* suggests that "in the history of creation, at one time the method and manner of every generation, at another time the principles of the true philosophy, are precisely and concisely taught by Moses" (B. Melton's translation). Mather adorns his commentary on the Mosaic hexaemeron with a Greek citation from *Funebris oratio in laudem Basilii Magni Caesarea in Cappadocia episcopi* (67.1.1–2), by the Cappadocian Father Gregorius Nazianzenus. Mather's translation is much longer than his Greek excerpt, which ends with *μεταχειρίζομαι* "I take into my Hands." A helpful summary discussion of Dickinson's atomist *Physica Vetus et Vera* appears in K. B. Collier's *Cosmogonies of our Fathers* (1934) 149–65. Useful discussions of the return of the atomist philosophy in the seventeenth century are provided by R. B. Lindsay, "Pierre Gassendi"; G. B. Stones, "Atomic View"; and M. Gorman, "Gassendi."

²²⁵ This paragraph is extracted from Dickinson (*Physica* 3) and agrees in its opening sentence with Spinoza's argument that miracle stories in the Pentateuch are not scientific accounts of what happened, but rhetorical devices to instill awe and wonder in the minds of an illiterate people. See Spinoza, *Theological-Political Treatise* (vi. 90–92) and Whiston, "Of the Mosaick Creation" (*New Theory*, pt. 1, p. 25). The Platonic philosopher Celsus (Kelsos) of Alexandria and author of *Ἀληθὴς λόγος* [Alethes logos], *The True Doctrine* (c. 175–181 CE), a defense of Hellenic philosophy against the incursions of Christianity, is now best remembered through Origen's apologia *Contra Celsum*, which provides summaries of Celsus's argument along with Origen's repudiations. Celsus disparages Moses for having derived his smattering of philosophy from Egypt (*On The True Doctrine*, ch. 2). Simplicius (6th c. CE), the Neoplatonist philosopher of Athens who settled in Harran (Carrhae) to escape persecution under the Christian Emperor Justinian, wrote commentaries on Aristotle, Epictetus, Hermogenes, and Iamblichus. Simpli-

Lett it not surprize you now, if I tell you, That the *Mosaic Philosophy*, was no other than the *Corpuscularian*.²²⁶ Aristotle himself, as great an Enemy as he was, unto the Doctrine of *Atoms*, yett confessed concerning *Democritus* a great Asserter of the *Atomic Philosophy*; *Omnia prævidisse, et principiâ supposuisse, quibus omnia possunt explicari*. Hippocrates that great Philosopher, called this *Democritus*, Ἀριστὸν φύσεως ἑρμενεύτην καὶ κόσμου, *The best Interpreter of Nature, & of the World*; and Seneca calls him, *The Tongue of Nature*. So far is this Philosophy, from the *Atheism*, which is ignorantly & injuriously charg'd upon it, that no Man more explicitly than this Corpuscularian *Democritus*, called all Things, Θεοῦ ἔργα, *The Works of God*. Could we enjoy those Books of his, which either Time, or the Envy of *Plato* and *Aristotle*, ha's destroy'd, we should no doubt, find them full of Praises to *God the Creator*, & see what a Perswasion he had of a *Future State in an Heavenly Countrey*; for which *Pliny* maliciously derides him, as a *Chymist* who boasted of a Medicine, by which he should *Rise from the Dead*.²²⁷ The *Jonians*, who were the principal Followers of the *Atomic Philosophy* in *Greece*, were the most honest Sect of them all; And *Empedocles*, a great Man among them, as *Plutarch* informs us, asserted an *Intellectual World*, as well as a *Sensible*, and a *Righteous, an Holy, an Happy, Life* in that World, with the *Immortal Dæmons*; from which World some of those *Dæmons* were banished, [τους θεηλάτους καὶ οὐρανοπετεδὺς δαίμονας. *A Deo depulso, atque à Cælo delapsos Dæmones*;] and pursued by the *Nemesis* of Heaven. *Anaxagoras* was another great Man among them; and with him, Νοῦς, or, *Mind*, was the *Creator of the World*; and he talk'd of *Returning after Death to Heaven as his own Countrey*. *Pythagoras* was another, (who putt the Name of *Monads*, upon *Atoms*,) but so fine a Man, that the Title of Θεόσοφος, ha's been thought proper for him. Indeed, we read of a famous Phœnician *Moschus*, or *Mochus*, who long before the *Trojan War*, did at *Sidon* maintain the *Atomic Philosophy*. But no smaller Men, than *Theodoret* of old, and *Selden* of late, assert this *Moschus* to be no other than our very *Moses*;

cuius critique of Moses appears in *In Aristotelis physicorum libros commentaria* (10:1166–67). Mather (like Dickinson) likens the blindness of such Neoplatonists to that of Harpaste (servant maid of Seneca's wife), who mistook her dimming eyesight for the house being dark. The oft-repeated story is told in Lucius Annaeus Seneca (the Younger), *Epistulae* (50.2–3).

²²⁶ The entire paragraph (below) is a extracted from Dickinson's *Physica* (9, 10, 11, 13, 14–15). The "*Corpuscularian*" philosophy is an archaic designation for "atomism."

²²⁷ Aristotle analyzes the atomic philosophy of Democritus at great length in *De anima* (1.2.405a ff), *De Caelo* (303ff), *Fragments* (208 R). Aristotle's praise for Democritus reads that "he had foreseen all things and supposed principles by which all things can be explained" (B. Melton's translation). Hippocrates of Cos is the famous physician of classical times (5th c. BCE), who praises Democritus in *Epistulae* 20 (14–15). Mather's second-hand citation of Hippocrates appears in Dickinson (*Physica* 9). Seneca speaks highly of Democritus and discusses his theory of nature in *Naturales quaestiones* (4.9.15.2–4, 7.3.2) and elsewhere. Democritus's reverential view of nature as "The Works of God" appears in Hippocrates's *Epistulae* 17 (80). Whereas Mather's irritation is borne out by the fact that none but second-hand fragments survive of Democritus's philosophical writings, Pliny (7.55.189–90) derides Democritus for promising that the dead would come "to life again – who did not come to life again himself!"

who, tis not unlikely, might, while an Exile in *Midian*, take a short Journey into *Phœnicia*. It was from a vile Degeneracy and Corruption in Manners, that the Scholars of *Thales*, in *Greece*, came at length, to deny a *God*; tho' *Thales* himself owned Him, & called the World, *ποίημα Θεου*, *The Work of God*. *Anaximander* was the Wretch, who first run into the *Atomic Atheism*; *quia talem vitam degebat, ut suâ maximè interesse putaret, | nullam in universo providentiam existere*. The *Epicureans* are well-known.²²⁸

228 Among the Ionian “sect” to which Mather here wittily refers are the atomist disciples of the Milesian philosophers Thales, Anaximander, Anaximenes, and Xenophanes of Colophon (all 7th–6th c. BCE). Their works survive only in fragments in Aristotle and Simplicius. The Greek biographer and moralist Plutarch (c. 46–c. 120 CE) celebrates Empedocles, whom he cites in Plutarch’s *De vitando aere alieno* (*Moralia* 10.830, sec. F, 2–3). Mather’s second-hand Greek-Latin citations appear in their adapted form in Dickinson (*Physica* 10) and translate, “expelled by the gods and thrown out from heaven.” According to a fragment surviving in Simplicius (*In Aristotelis physicorum* 156.13–157.7), the Athenian philosopher Anaxagoras taught that an unlimited and independent “Mind” (Thought) caused and ordered everything in the universe (Diels-Kranz, *Fragmente* 59 B 12), but Plato (*Phaedo* 97c–98c) was disappointed to discover that Anaxagoras’s works only mentioned such conventional causes as “air and ether and water and many other strange things.” Likewise Aristotle (*De generatione et corruptione* 1.1.314a, 10ff) and Lucretius (*De rerum natura* 1.830–920) seem less pleased with Anaxagoras. Dickinson (*Physica* 11). The Greek philosopher Pythagoras of Samos (mid-6th c. BCE), here honored with the title *Theosophos* (theosopher), discusses his concept of the monads in *Fragmenta* (165.2; 186.8–11). The elusive Mo(s)chus [Moxos] of Sidon, the alleged originator of the atomistic theory, is to have lived before the Trojan War (c. 1194–1184 BCE), as Strabo tells us in his *Geography* (16.2.24). In Mochus’s theogony, the intelligible god (*ulom* or *noetos*) is hatched from the cosmic egg (visible universe), which arose from cosmic space (aether) and cosmic spirit (air); see *Recognitions of Clement* (10.17, 30) and *Clementine Homilies* (6.3–4). Iamblichus tells his version of the cosmic ovum in *De Vita Pythagorica* (3.14). Mather’s reference to “*Theodoret* of old” is a bit misleading, because not Theodoret (c. 393–c. 466), bishop of Cyrrhus, is here intended but Johannes Arcerius Theodoretus, the Elder (1538–1604), Fresian professor of Greek at Franeker and Douai, whose Greek and Latin edition of *Iamblichi Chalcidensis ex Syria coele de Vita Pythagorae et Protrepicae orationes* (1598) was published at Franeker. Arcerius Theodoretus was one of the first to identify Mochus with Moses in his annotations. Like Iamblichus (*De vita Pythagorica* 3.14.2), Posidonius (*Fragmenta* 57a, 11 ff, 57b, 3 ff) and Democritus (*Testimonia*, fragm. 55.1–7) identify Mochus as the inventor of the atomist philosophy. The English philosopher Ralph Cudworth (1617–88), prebendary of Gloucester, follows these authorities and identifies this Sidonian Mochus with the lawgiver Moses, in his *True Intellectual System of the Universe* (1678), bk. 1, ch. 1, secs. 9–10, pp. 12–13, as does John Selden (1584–1654), English Orientalist, antiquarian, and jurist, to whose *De Jure Naturali* (1640), lib. 1, cap. 2, pp. 22–23, Mather (via Dickinson) here refers. Although Thales of Miletus, held that the universe is made by the great First Cause (*Testimonia*, fragm. 1.128), Aristotle relates that according to Thales, water is the first principle or beginning of all things (*Metaphysica* 1.3.983b, 20–984a, 4). And Thales’s disciple Anaximander of Miletus (c. 610–c. 540 BCE) postulated in his natural history (*Peri phuseôs*) that the ungenerated, eternal, and infinite “apeiron” generated the cosmos through an eternal process of separating and ordering opposites such as the four elements. This process, however, is an ongoing one, and natural laws subject the cosmos to eternal cycles of generation and dissolution (*OCD*). For Mather, this theory smacked too much of the mechanistic universe of the latter-day Cartesian Deists turned Peripatetics, or faintly sounded like the teachings of Epicurus of Samos (341–270 BCE), who believed in an infinite universe formed of randomly colliding elements

But, *Stultè arrogat sibi, qui mentem et rationem in se putat in esse, in cælo mundoque non putat.* And lett the Doctrine of *Atoms* be supposed, what can more necessarily infer a GOD? Will any Man be so sottish, as to imagine, That *Solomons Temple*, was but a casual Jumble of the Materials that composed it? And what is the *World*, but the most beautiful *Temple of GOD*? We may as well imagine a Parcel of Blind Men, to stumble upon one another, and form themselves into a Regular Army without a Leader, and in well-ordered Regiments perform a great Action, as that the floating *Atoms* of the World, should come together in that Order, wherein we now see Heaven & Earth, and the Hosts thereof, but excluding, τὸν νοῦν διακοσμοῦντα, *mentem omnia digerentem ac dirigentem.*²²⁹

Adam was, no doubt, thoroughly instructed by his Maker, in the History of the Worlds, & his own Creation. And since *Methusela* was above two hundred & forty Years old before the Death of *Adam*, how easily might there be from him, received and preserved among the Antediluvian Patriarchs, who were ἐνφυεῖς καὶ μακρόβιοι, as *Ingenious* as *Long-lived*, the *Tradition* of that History? *Noah* was the Heir of those Patriarchs; and the Sons of *Noah*, reckoned this *Philosophy* of the *Creation*, to be no little Part of the *Religion*, wherein they instructed their Posterity; tho' for their Wickedness, God at length left them to be swallowed up in Ignorance. However, the Offspring of *Heber*, descended from *Shem*, seems longer to have retained that *Philosophy*, which acknowledged the True God, as the Creator of the World; whereof the *Philosophical Flights* in the Discourses between *Job* and his Friends, are a notable Instance. But especially favoured in this Matter, was the Family of *Abraham*; whom the Writings of the *Gentiles* themselves have cried up, as a great *Philosopher*; & whom God Himself commends for his *Teaching* of his Children. *Moses* had the Advantage of knowing all

of imperishable matter (atoms) that would eventually dissolve again into their components from which they arose only to regroup to form other objects yet again (Lucretius, *De rerum natura* 1.146–634; 2.333–581, 1023–1074; 5.91–770). Dickinson (*Physica* 13) casts aspersions on Anaximander, “because he [Anaximander] was leading such a life that (he thought) no providence existed in the universe that was especially concerned with him” (B. Melton’s translation). Dickinson’s source is the Latin original of Daniel Sennert’s *Thirteen Books of Natural Philosophy* (1659), “The Third Discourse. Of Atomes and Mixture” (ch. 1, pp. 455 [445]–454), translated by Peter Cole. The reference to the Phoenician Mochus (Moses) appears on p. 446. See also Cudworth’s *True Intellectual System* (1678), bk. 1, ch. 3, sec. 21, pp. 124–26). For the rise and fall of this Renaissance belief in Moses (Mochus) as the originator of the atomist theory, see D. B. Saylor, “Moses and Atomism.” For a fresh discussion of John Selden’s *De Jure Naturali*, see Rosenblatt’s *England’s Chief Rabbi* (esp. 135–58).

229 The entire paragraph is extracted from Dickinson (*Physica* 14–15), who declares (14) that “he is foolishly presumptuous who believes that understanding and reason is in him and does not believe it is in heaven and earth” (B. Melton’s translation). The Greek passage (which Dickinson expands in his Latin translation) signifies “the Mind who ordered and directs all things” and is probably adapted from St. Athanasius (*Contra Gentes* 45.3), in *NPNFii* (4:28).

that was thus handed down unto his Time, and had the Direction of a Divine Inspiration too, for his committing to Writing so much of it, as he did.²³⁰

Now, before we can well interpret the *Mosaic History* of the *Creation*, it is necessary, that we should a little apprehend the *Principles* of that *Philosophy*, which *Moses* had always in his Eye, while writing of it. And that we may come at the more clear & sure Apprehensions hereof, it is necessary that we should know what *Philosophy* prevailed in the First Ages; which was, in truth, no other than the *Corpuscularian*. But then the *Atoms*, whereof they supposed all *Bodies* to be compounded, must not be supposed Absolutely and Physically *Indivisible*, (whereof nothing ever could be produced,) only so very small, that it should be beyond our Power any further to *Divide* them. These *Atoms*, are the very *keyes* of Nature; and all the Philosophers in the World, whether *Egyptian*, or *Phœnician*, or *Arabian*, or *Hebrew*, or, *Syrian*, or *Indian*, or *Græcian*, repaired unto them, in their *Philosophising*, until the World was above *Three Thousand and Five Hundred Years* old.²³¹ However they did not all putt the same Name upon these *First Principles*; for what some called *Atoms*, others called, *Waters*, others called, *Sand*, others *Dust*, & others *Particles*. Our *Moses* particularly here, first calls that *First Matter*, by the Name of *Heaven & Earth*; presently, he calls it only *Earth*; Anon, he calls it, *The Deep*; and then, *The Waters*. The *Brachmans* of *India*, and the *Dru-ids* of *Europe*, held, *Aquas esse rerum principia*. And it may be, *Waters*, was used as the Name for *Atoms*, even before the *Dayes of Moses*; for there were Colledges of those Philosophers in *Germany*, as *Aventinus* tells us, in the *Dayes of Hermion*, which was, when *Isaac* was yett scarce forty Years old.²³² *Thales*, one of the most

230 Dickinson (*Physica* 17–18, 19–20). The proximity of Adam's death and Methuselah's birth is a mainstay in Mather's time, for his peers still believed that Adam's creation took place just 4004 years before Christ. Adam's death occurred Anno Mundi 930 and overlapped with the life of Methuselah (eighth generation after Adam) for about 243 years. The ancient patriarchs' longevity therefore allowed for an uninterrupted transmission of ancient wisdom from Adam to Moses (James Ussher, *Annals* 1–3). The Greek passage "eupheis kai makrobioi" signifies "well-grown and long-lived."

231 The entire paragraph is extracted from Dickinson (*Physica* 28–36, 42–49). Relying on Ussher's chronology, Dickinson here refers to the flowering of Greek philosophy in the fifth century (BCE).

232 For the Indian "Brachmans" (Brahmins) and the Celtic Druids who (according to Dickinson) held that "water is the principle element," see Strabo (*Geography* 15.1.59 and, respectively, 4.4.4); for the same belief among the Egyptians as well as among the Stoics, Philo Judæus (*De vita Mosis* 1.17.98.2–4) and *De aeternitate mundi* (5.18). The humanist and historian Johannes Thurmair (1477–1534), better known as Joannes Aventinus, composed his history of Bavaria *Annales ducum Boioariae*, in 1517–21, and published an expanded version as *Annalium Boiorum libri septem*, in Ingolstadt (1554). For "Hermion," see *Annalium* (1554), lib. 1, pp. 41–42. Whatever German schools of atomistic philosophy may have existed in the days of Hermione, daughter of mythical Menelaus and Helen (Homer, *Odyssey* 4.14), when Abraham's son Isaac was nearly forty and married Rebecca, Mather extracts his information from Dickinson (*Physica* 31) without verifying his dates. According to Ussher's *Annals* (6–7, 29), Isaac was nearly forty years old (Gen. 25:20) in c. 1856 BCE, whereas Hermione would have been born nearly seven-hundred years later, after the Trojan War (1194–1184 BCE).

ancient Fathers of the *Greek* Philosophers, held, That *Water* was the Origin of the World; by which *Water* was meant the same that was also called, *The Many*. And *Thales* was conversant not only among the *Egyptians*, and the *Phœnicians*, but also among the *Babylonians*, among whom the *Mosaic Writings* were in such Credit, that it is affirm'd, They were translated into the *Caldee* Tongue, long before the Translation of the *Septuagint*, about the *Fiftieth Olympiad*, which was the very Age of *Thales*.²³³ But the same that *Thales* called *Water*, *Pherecydes* the *Syrian*, his Contemporary called, *Earth*; following therein also the Authority of *Moses*; & putting the Name of *Χθονία*, upon that whereupon *Moses* putts, the Name of *Tohu*. Whereas *Pythagoras*, the Scholar of *Thales*, gave to the very same, the Name of, *Particles*, and of *Monads*. *Ecphantus* the *Pythagorean*, we find in *Sto-beus*, affirming, the *Monads* to be *Corporeal*; and *Aristotle* affirms the *Monads* to be *σωμάτια μικρά*, *minuta corpuscula*. At last *Anaximander* brought in the Name of *ὕλη*, *Hyle*; which *Aristotle* himself took up, tho' in another Signification.²³⁴ And what others had called by the Title of *τὰ πολλὰ*, *The Many*, the more Athe-

²³³ Aristotle reports in his *Metaphysica* (1.3.983b, 20 ff) that Thales of Miletus (c. 640–546 BCE) took water to be the principle source of all matter – so Cicero reports in *De natura deorum* (1.10.25). Since Thales's atomistic theory echoes the creation myths of Egypt (Manetho, *Epitome of Physical Doctrine*, fragm. 83) and of Babylonia (Berosus, *Babylonika*, fragm. 1, 52), and since the Mosaic Pentateuch had been translated into the Chaldaic language of Babylon during the Babylonian Captivity, which according to Ussher's dates took place in c. 606–c. 536 BCE about the year of the fiftieth Olympiad (c. 576 BCE), Dickinson argues that Thales could easily have had first-hand knowledge of the Mosaic creation account without knowing ancient Hebrew and long before the Alexandrian LXX (c. 280 BCE) became available in Greek. The substance of Dickinson's argument here is extracted from Cudworth's *True Intellectual System* (bk. 1, ch. 1, sec. 12, pp. 13), but echoes from Stillingfleet's *Origines Sacrae* (bk. 1, chs. 2–3; bk. 2, ch. 2; bk. 3, ch. 2), Richard Simon's *Critical History of the OT* (bk. 1, chs. 10–13), and Theophilus Gale's *Court* (1676), part 2, bk. 1, chs. 2–3, pp. 23–64, can be found throughout.

²³⁴ The Greek cosmographer Pherecydes of Syros (fl. 544 BCE), believed to be a rival of Thales, wrote *Ἑπτάμυχος* [Heptamychos], a cosmogony that only survives in fragments (Cicero, *Tusculanae disputationes* 1.16.38; Diogenes Laertius, *Vitae philosophorum* 1.43). The Greek "Chthonia" or "Earth" survives in Damascius's *De principiis* (124b), in *Testimonia* (fragm. 8.2). Dickinson identifies "chthonia" with the Hebrew term *תהו* [tohu] "without form" (Gen. 1:2). Pythagoras's discussion of monads is extant in fragments by Iamblichus, *In Nicomachi arithmetica introductionem* (p. 10.12–20) and in Pseudo-Justinus Martyr's *Cohortatio ad gentiles* (5a 4–7, 18b 1–7, 18c 1–2). The Pythagorean Ecphantus of Syracuse (4th c. BCE) affirms his corporeal monads, in a fragment extant in Aëtius's *De placitis reliquiae* (1st c. CE), excerpted in *Anthologium* (1.10.16a, 2–3; and 1.25), an anthology of ancient writers by Joannes Stobaeus (5th c. CE). Aristotle describes monads as miniscule particles (atoms) in his *De anima* (1.4.409a, 8–16) and in *Metaphysica* (13.6.1080b, 20). Anaximander of Miletus uses the word "hyle" or "matter" to denote "atoms," in a fragment that survives in *De placitis reliquiae*, a work of comparative philosophy by Aëtius (1st c. CE), in Anaximander's *Testimonia* (fragm. 14.6–9, 11, 13; fragm. 30.13). Similarly, Aristotle's "hyle" denotes "matter," "material," "body," or "essence," in many places including *De anima* (1.1.403b, 1, 3, 7, 10, 12; 410b, 11; 412a, 7 etc.), but also the "chaos" of the four elements before the demiurge imposed order on the *prima materia* (*Timaieus* 30a, 52d–53b). For the substance of what appears here, Dickinson relies on Cudworth's *True Intellectual System* (1678), bk. 1, ch. 1, sec. 11–15, pp. 13–17.

istical *Anaximander* would have to be το Ἄπειρον, *The Infinite*. This *First Matter* had yett other Denominations among other Philosophers; *Heraclitus* called it, ψέγματα ἐλαχιστὰ, | *Ramenta Minutissima*; *Empedocles* called it, θραύσματα, *Fragmenta*; *Asclepiades* called it, ὄγκους, *Moleculars*; *Xenocrates* called it, Μεγαθὺ ἀδιαίρετὰ, *Magnitudines indivisibiles*; and others, mention'd by *Aristotle*, called it, Χήματα, *Figuras*. But it was *Leucippus*, and *Democritus* at last, who brought in the Name of *Atoms*. There is no need now of mentioning any other Term or Phrase, used for this *Matter* among the Ancients. Only one would not pass by, what *Plato* saies, That the Name of, τὰ Πολλὰ, *multa*, was used, à *vetustissimis ac optimis, Dijsque proximis philosophis*; And that the most ancient Wise Men, beleaved all things to be made at first, ἐξ ἑνος καὶ πολλῶν, of *one*, and, *many*; By *one*, they meant *God*; By *many*, they meant our *Atoms*, or, *immensam particularum multitudinem*. This was the very Name, that *Pythagoras* too putt upon that which *Moses* calls, *The Waters*.²³⁵ No doubt, the most ancient among the Sons of *Noah*, were the *Dijs proximi philosophi*, which according to the Concession of *Plato*, cultivated the *Corpuscularian Philosophy*. And the Jewes continued in it, until the *Peripatetic Philosophy* was introduced by *Aristotle*, who, as his Pupil *Clearchus* affirms, conversed with a Reverend Jew, that better Instructed him in *Divinity*, and others report, he was instructed at the Feet of *Simeon the Just*. But, if he received their *Divinity*, he made them a Return of his *Philosophy*; upon which they ran as mad, as *Maimonides* of later time did, and the true

²³⁵ Anaximander's definition of *atoms* as *the infinite* survives in fragments by Aëtius (*De placitis reliquiae* 1.3.3 ff), by Simplicius (*In Aristotelis de Physica commentarii* 24.13 ff), and by Aristotle (*Physica* 3.4.203a, 23–203b, 17) – most of which Dickinson extracts from Joannes Stobaeus (*Anthologium* 1.10.12.11–19, etc.) and from Cudworth (*True Intellectual System*, bk. 1, ch. 1, sec. 21–22, pp. 20–22). The phrase from Heraclitus of Ephesus (fl. 500 BCE), which translates “smallest fragments,” or “motes,” “dusty particles,” appears in Aristotle's *De anima* (1.2.404a, 1–2), but also in a longer version in Pseudo-Plutarch's *Placita philosophorum* (1.13.883b, 7). The same meaning is suggested in a composite passage in Heraclitus, the Platonist Xenocrates of Chalcedon (fl. 339–314 BCE), and in Empedocles's “thraysmata” (“fragments”) – all in Stobaeus (*Anthologium* 1.14.1k). The physician Asclepiades of Prusias, Bithynia (1st c. BCE), called his molecules “ogkous” or “lumps,” in Stobaeus (*Anthologium* 1.49.41–44) and in Sextus Empiricus (*Adversus mathematicos* 10.318.7–8). The phrase from Xenocrates should read Μεγέθη ἀδιαίρετα [Megethe adiaireta] or “indivisible in the highest degree,” and appears in Xenocrates (*Testimonia, doctrina et fragmenta*, fragm. 144.7, 10). Mather misspells Aristotle's σχήματα [skemata], which signifies “figures,” “shapes,” or “body” (*De sensu et sensibilibus* 4.442b, 10–12; *Metaphysica* 1.4.985b, 6–10; 6.2.1026a, 36, etc.); Aristotle here mentions Democritus as his principal source. Leucippus and his disciple Democritus (both 5th c. BCE) are generally credited with originating the atomistic theory (Aristotle, *Metaphysica* 1.4.985b, 4–20; Diogenes Laertius, *Vitae philosophorum* 9.30). Fragments of the works of Leucippus and Democritus survive in many sources including Leucippus (*Testimonia*, Fragm. 1, 6–7, 13–15) and Pseudo-Plutarchus (*Placita philosophorum* 2.8, 3.12). Plato says that the name of “the many” was used “from the oldest and the best, the philosophers nearest to the gods” and that the most ancient wise men believed all things to be made at first “out of one and many” (Philebus 17d), by which they meant our atoms, or “the immense multitude of particles.” See Galenus (*De placitis Hippocratis et Platonis* 9.5.15, 28). See also G. B. Stones, “Atomic View.”

Understanding of the *Mosaic Philosophy* was lost among them.²³⁶ Since therefore, the ancient Philosophy, was derived unto other Nations from the *Hebrewes*, it is proper to look for the Original of their *Philosophic Terms* among the *Hebrewes*. If we should particularly instance in, *Hyle*, as the *Egyptians* called it, or, *Ile*, as the *Phenicians*: Tis true, we don't plainly find the Original of it, in the Writings of *Moses*; but we must not imagine that the Sacred Writers have all the *Terms of Art* used among their Philosophers. And yett it is very probable, That *Hyle*, or *Ile*, may be found in the Hebrew חִיל / חִיל / *Hhiul*, which signifies, *The Sand*; And *Philo* countenances this Conjecture: which is confirmed by the *Hiule*, wherein *Hyle* is rendred in the *Arabic Tongue*, which is a Daughter of the Hebrew. How agreeably indeed, are *Atoms* called *Sands*, as well for their *Exility*, as for their *Fluidity*? And how agreeable is it, for the same to be called, *Waters*? The oldest of all the *Egyptian* Philosophers, namely *Taautus* (whom the *Greeks* called *Hermes*) affirmed all things to be formed, ἐκ τοῦ ἁμμοῦ, *out of Sand*, which was as much as to say, out of *minute Particles*. And the *Egyptian* Philosophers affirmed the same of *Water*; by which they meant, *Pusillissimarum commotarumque particularum multitudinem*.²³⁷ The Ancient *Hebrewes* applied also, the Name of *Dust*, unto this *First Matter*. A Fitt Name for any *Multitude*! Other Nations used that Name for, *A Multitude*, as early as the *Dayes of Moses*. [Compare, Num. 23.10.] And

²³⁶ Noah's three sons are here identified as "the philosophers closest to the gods." Aristotle's disciple Clearchus of Soli tells of Aristotle's philosophic discussions with Jews during his travels, in Josephus Flavius (*Against Apion* 1.22), in Clemens Alexandrinus (*Stromata* 1.15.70, *ANF* 2:316), and in Eusebius (*Praeparatio evangelica* 9.5–6.409b–410c). Dickinson (*Physica* 36) refers to Simeon the Just (Simeon ben Johanan), high priest in the times of Alexander the Great (Josephus, *Antiquities* 12.2.5). If this apocryphal story were true, Aristotle could have met with Simeon I (son of Onias I), but the story sounds too much like that of St. Paul, who was instructed at the feet of Gamaliel, son of Simeon, the president of the Sanhedrin in c. 13 CE (Acts 22:3). Arguably the greatest Jewish philosopher of the Middle Ages, Rabbi Moses ben Maimon (Maimonides), aka. Rambam (1135–1204), reconciled Jewish philosophy with Aristotelianism, and is best known for his huge commentary *Mishneh Torah* and his *Moreh Nebuchim* (*Guide for the Perplexed*). In Mather's time, Latin translations of individual tracts of *Mishneh Torah* and of *Rabbi Mosis Majemonidis Liber* מורה נבוכים *Doctor Perplexorum* (1629), translated by Johannes Buxtorf, the younger (1599–1664), were accessible at Harvard library (*Catalogus* [1723], pp. 52, 53).

²³⁷ Dickinson, *Physica* (42–44). "Hyle" signifies "matter" (Anaximander's *Testimonia*, fragm. 14.6 ff, fragm. 30.13 ff) and "prima material" or "chaos," in Aristotle (*De anima* 1.1.403b, 410b, 412a; *Timaeus* 30a, 52d–53b). The Hebrew term חִיל [hhiul] or [chuwl] designates "sand" (as whirling particles) [Strong's # 2344]. Philo Judaeus affirms this conjecture in *De opificio mundi* (13.42.2; 47.136.8; 47.137.4), in *Legum Allegoriae* (3.72.203), and in *De somniis* (1.1.3; 1.18.175), but uses the Greek term *hyle* much more loosely to signify "earth," "clay," or "sand." Eusebius (*Praeparatio evangelica* 1.9.31d–32a) identifies the Egyptian Ταυτος [Taautus] with the Egyptian and Alexandrian Thoth, and with the Greek Hermes. The Greek passage, which translates "out of sand" may be the one in Athenaeus of Naucratis of Egypt (fl. c. 200 CE), *Deipnosophistae* (7.22.14; 7.77.20). For the ancient idea that all things are made from water, see Aristotle (*Metaphysica* 1.3.983b 19–33); the Egyptian philosophers meant by water "the multitude of the tiniest and unsteadiest particles" (B. Melton's translation).

that it was a Name for the *First Matter*, is intimated, where it is said, first of *Heaven*; Isa. 40.22. *He stretches out the Heaven as Dust*; The Term *Dok*, to which the Matter of Heaven is there compared, according to *Jerom* signifies, *Pulverem minutissimum, qui vento raptante sepius in oculos mittitur, et tam tenuis est, ut non videatur, etiamsi sentiatur*. And then of *Earth*; Prov. 8.26. *He made its Beginning, even the Dust of the World*; as much as to say, That the *Dust*, was the *Beginning*, or Principle of the *Habitable Earth*. Compare Eccl. 3.20. *All are of the Dust, and all turn to Dust again*. And, Job. 4.19. *whose Foundation, (or, Origin,) is in the Dust*. Tho' *Moses* do elegantly enough use the Name of *Haphar*, or *Dust*, for the *First Matter*, yett he rather chooses the Name of *Water*; because in his Time, *Water*, was an usual Phrase for an *Immense Multitude*. Yea, and it hath since been so: [Compare, Psal. 124.4.] And when *many People* are compared unto *Waters*, it seems originally to be a Comparison unto *Atoms*, for the *Multitude* of them. This was the *Philosophy*, derived from those whom *Aristotle* calls, *παμπάλαιους*, *The most ancient of all*; and whereof a Renowned Philosopher of *Idumæa*, saies, Job. 15.18, 19. *It is that which Wise Men have told from their Fathers, and have not hid it; unto whom alone the Earth was given*; By which he means, the *Patriarchs* that were the more immediate Sons of *Noah*.²³⁸

We will begin, with the *Amplitude* of the *Creation* described by *Moses*.

There are *Five Words* used by *Moses* in the Entrance of his History, upon the Knowledge whereof, depends the Knowledge of all.²³⁹

First, we have *Samajim* and *Aretz*, that is, *Heaven* and *Earth*. *Moses* uses these *Two Words* together, in one, the more significantly to express *Universal Matter*; and not *Heaven* and *Earth* as distinctly formed, but as Jumbled together in *one Unformed Mass*. *Hesiod*, instructed with Hebrew Traditions, uses the like Expression. *Moses* in the next Place, calls the same *Universal Matter* only [80v] *Aretz*, that is *Earth*. This was that so the *Corporeity* of it, may be | more plainly intimated. He proceeds then to call it, *Tohu* and *Bohu*, that is, *Formless*, and *Empty*. This is to Declare unto us, the *Void Spaces* every where interspersed in it.

²³⁸ Both the Geneva Version (1599) and King James Version (1611) render Dickinson's translation "dust" (Isa. 40:22) as "curtain" (*Physica* 44). The Hebrew term דֹּק [doq] or [dok] is commonly translated as "curtain," but also signifies "something crumbling," "to crumble," or "to make dust" [Strong's # 1852, 1854]. According to the Latin adaptation from Jerome's *Commentaria in Isaiam lib. XI* (on Is. 40:12) [PL 24. 407B], the term *dok* signifies "a very fine dust, which, when the wind carries it away, is rather often dispatched into the eyes, and it is so fine that it is not seen, even if it is felt" (B. Melton's translation). The Hebrew term הַפָּר [haphar] (Gen. 2:7) denotes "dust" or "powdered mud" [Strong's # 6083], and Dickinson uses it as a synonym for the creative concept of water (Gen. 1:2, 6–7) [Strong's # 4325]. Aristotle calls the ancients who lived long before his generation "pampalaious" (*Metaphysica* 1.3.983b, 28–29). And the renowned philosopher of Idumæa is none less than the biblical Job himself, who (so Dickinson, *Physica* 48–49) refers to Shem, Ham, and Japheth (Noah's sons), as heirs to the antediluvian knowledge handed down from Adam.

²³⁹ Mather extracts the subsequent paragraph from Dickinson (*Physica* 52–58).

The old Greek Philosophers called this *Universal Matter*, οὐδεν καὶ κενόν, *Nihil et Vacuum*: which *Theodotian* and *Aquila* will tell you, is the Translation of *Tohu* and *Bohu*; And others, for the *Turbid State* of it, called it, χθονίαν Meaning the *Chaotic Earth*, & not the *Habitable*.²⁴⁰ He passes to call it then *Tehom*, or, *The Deep*; to note the Immense Profundity of it. There is a Notable Hint unto this Purpose, in *Aretas* on the Tenth of the *Revelations*; Ἀβυσσων καλοῦσιν, τὸ πολὺβαθος τοῦ πρώτου στοιχείου, *Abyssum vocant immensam profunditatem primi principij*. But the Particles of this *Universal Matter*, so wonderfully Diffused and Confused, could avail nothing, until putt into regular *Motion*. Wherefore *Moses*, to point out the *Multitude* and the *Motion* thereof, comes in the fifth Place, to call them, *The Waters*. He does not mean, the Body which we now call *Waters*, for they were not yett produced; but such *Atomical* and *Chaotical* ones, as the *Brachmans* in *Strabo*, make to be Ἀρχὰς τῆς κοσμοποιΐας *The Principles of the World*. This is that *Universal Matter*, which the Greeks called, *Chaos*; a Name, not of such a Notation as *Philo Judeus* assigns for it, but coming from the Hebrew *Chauth*, which signifies, *Darkness*; in which Sense, *Orpheus* called it, νυκτὰ Σοφερὰν, *A Dark Night*; and the *Phœnicians*, as *Philo Biblius* made ἀέρα Σοφώδη, *A Dark Air*, to be the *Origin* of all things.²⁴¹

Now, inasmuch as all the *Ancient Philosophy*, which was the Daughter of the *Mosaic*, pretended unto an Account of nothing less, than the *whole Creation*, tis highly probable that *Moses* would give no less in his *Cosmology*. But being

²⁴⁰ Dickinson here may think of Leucippus and Democritus, who philosophize about the “void and nothing,” as Aristotle tells us in his *Metaphysica* (1.4.985b, 5–10). Hesiod (*Theogonia* 115–38) relates how Chaos and “wide-bosomed Earth” came to be. The Greek translation for the Hebrew “tohu” and “bohu” (Gen. 1:2) is rendered “chenon kai outhen” (“vacuum and nothing”), by Theodotian (2nd c. CE), and “chenoma kai outhen” (“empty and nothing”), by Aquila of Sinope (early 2nd c. CE), whose more literal Greek translations of the Hebrew Bible survive in Origen’s famous *Hexaplorum quae supersunt* [PG 15. 144, 146]. As mentioned above, the Greek noun “Chthonian” (“Earth”) appears in many places including in Damascius’s *De principiis* (1.321.4); Pausanias (2.35.4–5) for one relates that Chthonia, daughter of Colontas, received the goddess Demeter hospitably, for which kindness Demeter took her to Hermion to build Demeter’s temple. In a related version of the story, Chthonia is a goddess, whose festival the Hermionians celebrate every summer.

²⁴¹ Aret(h)as (c. 6th c. CE), bishop of Caesarea in Cappadocia, is to have written a commentary on Revelation, in which he collected different interpretations from different authors. Aretas’s “Notable Hint” reads, “The immense depth of the first origin is called abyss.” And Strabo describes the Indian Brahmin’s principles of the world in *Geography* (15.1.59). Dickinson may have in mind Philo Judeus’s *De opificio mundi* (6.24), which asserts the creation of the world in terms of God’s *Reason* being occupied in its creation, but see also his *De aeternitate mundi* (5.18–20). Mather’s Hebrew transliteration of חֹשֶׁק [choshek] “darkness” (Gen. 1:2, 5), derived from “withholding of light,” seems questionable (see Strong’s # 2821–2822), but the problem occurs in Mather’s source as well (Dickinson, *Physica* 58). The mythical poet Orpheus sings of the dark night νυκτος ζοφερήν [nuktos zopheren], in *Orphica* (*Hymni* 78:4), and the Phoenician grammarian and historian Philon of Byblos relates the Phoenician philosophy of the original chaos or dark air, in *Fragmenta* (F 3c, 790; F 2.5). See also Cudworth’s *True Intellectual System* (1678), lib. 1, ch. 4, sec. 17, pp. 299–300.

thus præpared, Lett us view the *Six Dayes* of the *Creation*, and what was done in each of them.

The First Day.

In the Beginning was *Universal Matter* by God first created of nothing; a wondrous *Congeries* of all sorts of *Particles*, unform'd, and unmov'd, and every where separated from one another with empty Spaces. This *Universal Matter* was putt into *Motion*, by the *Spirit of God*, and not left unto a fortuitous *Motion* and *Concure*. Thus was there given unto *Matter*, that *Force* which we call *Nature*; for, *Nature* is nothing but that *Motion* which the *Spirit of God* ha's imprinted upon *Matter*, and which He perpetually governs with His infinite Wisdome. The *Atoms* of this *Universal Matter*, must not be supposed *Absolutely Indivisible*; tis enough, that they were very *Minute Particles*. And the *Motion* at first given to the *Atoms* we may suppose to have been *Twofold*. The *first Motion*, may be called, *A Motion of Preparation*. This might be *Transverse*, or, *Across*; in which the various Meetings of the *Atoms* one with another, gave an Opportunity for such whose Figures were agreeable unto one another, to join, and stick together, in *Bodies*, that from this *First Concretion*, would soon grow into *Elements*. The *Second Motion* may be called, *A Motion of Separation*. This might be *circular*. And the first Essay of it, might be the Producing of *Fire* or *Light*. The *Atoms* are of diverse Figures; according to which they may be some of them called, *Pilulæ*, others, *Globuli*, others, *Bracteolæ*, and a Fourth sort, of a grosser Consistence, and of so many Forms, that it is not easy to assign a fitt Name for them.²⁴² It may be, the *Fire* is composed of the First Sort, the *Water* of the Second, the *Air* of the Third, and the *Earth*, of the Last. And there may be a *Fifth Sort*, smaller than any of these; broken off perhaps from the rest in their Circumgyration; and subservient especially to Matters in the *Firmament*. The *Motion* where into the *Universal Matter* was now putt, no doubt carried off the *Pilulæ*, into that vast Collection of them, which we call the *Empyraan Heaven*, (or the *Sphere*, whereof see Prov. 8.22, and Job. 22.14.) And this *Fire*, is implied in that *Light*, whereof we find it so early spoken, *Lett there be Light*; and whereof *Hippocrates* takes Notice, That the ancients called it, *Æther*. Had the Word, *Ur*, been so translated, some Scoffers at *Moses* had been silenced. But when *Fire* was produced, *Light* was also produced; which is no other than *Ignis Effluxio*. It was not amiss in *Empedocles*, to call this *Light*, ἥλιον ἀρχέτυπον, *Solem Originalem et Primigenium*.²⁴³ The *First Day* and *Night* were distinguished, by the Rotation of

²⁴² The entire paragraph on "The First Day" is extracted from Dickinson (*Physica* 65–80, esp. 76–77, 78, 79). The Latin terms "*pilulæ*," "*globuli*," and "*bracteolæ*" signify, respectively, "little balls," "globules," and "thin leaves of gold."

²⁴³ By "Empyraean Heaven," Dickinson means the hemisphere from which God and Sophia (Christ) created the universe. Hippocrates of Cos (5th c. BCE), the famous physician

that *Matter*, so elevated and congregated, and carryed about with such a Glare, that if there had then been a *Præ-adamite*, he might by the Shine of it, have seen the rest of the *Abyss*. The *Lucid Particles* of that *Matter*, may be the *Morning Stars*, that *sang together*, when the *Angels shouted for Joy*, at the Laying of *Foundations of the Earth*. But it must be remembred, that the *Motion* which thus carried off the *Pilule*, did carry off, & carry up, vast Numbers of the *Globuli* too: by which Means | we find Real and Natural *Waters*, as well as *Fire*, in the Highest *Heavens*: [81r] As in a Distillation we see, that in a Pound of *Spirit of Wine*, so inflammable a thing! there are carried over, several Ounces of *Water* with it. The very Name /שַׁמַיִם/ *Shamayim*, seems composed of /אֵשׁ/ *Fire*, and /מַיִם/ *Water*. This was the Philosophy of the Ancient *Hebrewes*. [Compare Psal. 148.4. and Psal. 104.3.] These *Waters* may be of unknown Uses, in those Heavens; To Temper the *Heat*, of the Heavenly Bodies; and Augment their *Light*, as Chrystals about them; and convey subtile Influences from thence to the *Inferior Orbs*.²⁴⁴

The Second Day.

The whirling Motion of the *Abyss*, or *Universal Matter* yett continuing, the *Atoms* of a more *Bracteal* Figure, now possessed themselves of that vast Space, which *Moses* calls, *The Firmament*. But probably, the Mixture of them, near the Surface of our Globe, was yett so thick and so dark, that the *Light* could hardly yett make its Passage hither; And this may be the Cause, why God would not call it, *Good*:²⁴⁵ The Figure of these *Atoms*, would not allow them so swift a Flight, towards the Selvidge of the World, as those which gott the Start of them. The *Atoms*, of the whole *Expanse*, and of the *Air*, may be the same; except, that near the Surface of our Globe, there are added such Vapours, as to distinguish that Region, which we call *Our Atmosphere*. The Name /רַקִּיעַ/ *Rakiah*, used by *Moses*, (*cui semper placuere compendia*) for this *Expanse*, is admirably suited, to express the Nature of the Particles that compose it; It signifying, both to *Expand*,

of antiquity, is associated with a body of writings on medicine that bears his name. The "*Ignis Effluxio*" is none other than the "out-flowing fire." "Aether" suggests the pure air and the abode of the gods in heaven. Dickinson (*Physica* 77) may probably have in mind Hippocrates's doctrines collected by Galenus (*De placitis Hippocratis et Platonis* 3.8.13; 7.5.48; 7.7.25). The Greek / Latin variant passage from Empedocles's *Fragmenta* (Fragm. 38.3) signifies, "the sun, the first principle [archetype] of all things" and survives in a corrupted fragment in Aëtius's *De placitis reliquiae*, in Joannes Stobaeus (*Anthologium* 1.25.3e, 3), and in Clemens Alexandrinus (*Stromata* 5.8.48.4, ANF 2:455).

²⁴⁴ Mather again omits the diacritical marks of the Masoretic שַׁמַיִם [shamayim] [Strong's # 8064], which signifies "aether" or "heavens," i.e., where the celestial bodies revolve. In the philosophy of the ancients, the elements "fire" אֵשׁ [aysh] [Strong's # 784] and "water" מַיִם [mayim] [Strong's # 4325] were two of the constituting parts of the aether. The pre-Socratic philosopher Heraclitus argued that everything consists of fire (Lucretius, *De rerum natura* 1.635–704).

²⁴⁵ Unlike the five other creative days recorded in Gen. ch. 1, God does *not* pronounce the second day "good."

and also to *Constringe*, or *Compress*. They spread themselves, and chase away all others from themselves, and at the same time, they do firmly as far {as} they can compel together, those that are within their Embraces. Tis by the Efficacy of these, that God, [Job. 26.7.] *hangs our Globe upon nothing*; and [Psal. 104.5.] He *layes Foundations*, not only for the *Earth*, but for the *Stars* too, that *shall not be removed forever*.²⁴⁶

The Third Day.

The *Conatus Dispansivus*, of those *Atoms*, to whom the Creator ha's assign'd so large a Province in His Creation, now accomplished, *That the Waters under the Heaven, were gathered together into one Place, and the Dry Land appeared*. It protruded the Particles of Grosser Matter, down toward the Center; where they need no other *Cement*, than their *Agreement in Figure*, to produce their firm *Cohærence*. But from their various Distribution, and perhaps from some other Varieties, arose the *Inæquality* of the Surface of the *Earth*. And a considerable Portion of the *Globular Atoms* being left here, behold, the *Waters*, whose Figure disposes them to run and fill all the Cavities provided for them. Nor is it amiss to repræsent all the *Seas*, as *one*, in this Collection of *Waters*, inasmuch as they have (like the *Caspian* with the *Mediterranean*,) their *Subterraneous* Communications with one another. And tho' the *Earth* have the Name of *Dry Land* given unto it, yett it is not so Dried, as to be left wholly destitute of that *Humour*, which must accompany all *Seeds*, to carry on the several Generations in the World. But the *Vapour* and *Humour* so sent forth continually, supposes a *Central Fire* in the Bowels of the *Earth*; which probably is a vast Congregation of *Pilular Atoms*, by the Wisdome of God, so placed at first in the Center of the *Abyss*, that being hedged about with such a Number of Gross Particles, when God gave to *Matter* its first *Motion*, they could not make their Way thorough, with their Companions, up unto the *Æther*; and they putt on the more *Fiery Appearance*, because they are cramm'd so close together. The *Mist* whereof we read, *That it watered the whole Face of the Earth, before God had caused it yett to Rain upon the Earth*, seems to have been a *Vapour* of *Watry Particles* boil'd forth, by that *Central Fire*. We may add, That the unæqual Descent of the *Terrestrial Particles*, at the first Settlement, produced not only the vast Basons, wherein the *Sea's* are lodged, but also the *Channels*, wherein the *Rivers* flow about the World, like the *Veins*

²⁴⁶ The entire paragraph is extracted from Dickinson (*Physica* 81–89). The Hebrew term רָקִיעַ [raqiya] [Strong's # 7549] used by Moses ("to whom the abbreviations always please") signifies "expanse" or "firmament" (Gen. 1:6). Put in another way, Mather (via Dickinson) argues that the language of the Mosaic creation account contains cryptic terminology (like the Egyptian hieroglyphics) that embodies philosophic concepts in abbreviated form, and it is incumbent upon physico-theologians of Mather's time to unlock these hermetic signifiers and to reconcile them with modern pre-Newtonian and Newtonian science.

and *Arteries*, in an Humane Body. But, that the *Central Fire*, may not be, thro' Length of Time, and long Evaporation, wasted, it seems, that Heaven affords it a Nourishment, in a continual Descent of *Sulphureous Particles*, which being absorb'd by the Sea, sink to the bottom, until they find their Way in proper Channels, to that awful Receptacle. By the warm Aspirations of the *Central Fire*, the Generation of *Plants*, on the *Third Day*, was forwarded; of *Seed* made by the Immediate Hand of God. There might be something peculiar in the Season, for a vigorous Effort of Nature, as well as a Display of the Divine Power & Energy, in the Acceleration of such a Generation. The *Succus Nutritius* requisite unto this Generation, is not *Water*, but a certain, special, *Viscous Matter*, which lies in *Water*, | and which cannot well permeate the Pores of the *Vegetables*, unless there be *Water* to attenuate it.²⁴⁷ [82v]

The Fourth Day.

A vast Multitude of *Igneous Particles* were left all this while scattered throughout the whole *Expanse*. The Great Creator of the World therefore, collected them into that one Globe, which we call, *The Sun*, & which *Empedocles* call'd, *πυρὸς ἄθροισμα μέγα*, *A Great Heap of Fire*.²⁴⁸ The *Solar Matter* thus collected, keeps continually whirling about, with great *Inæqualities* in the *Surface* of it; and is more *changeable* than the very *Moon* itself: which alone, might be enough to lead Reasonable Men, from the Worship of *That*, unto the Worship of that glorious *Father of Lights*, who is *without Variableness or Shadow of Turning*. The *Sun* being alwayes upon a vast Expanse of itself, God ha's both encompass'd it, with a Transparent Sort of a *Covering Shell*, or *Hedge*; and the *Atoms* of the *Expanse* are also of such a Figure, as to leave Channels, thro' which there is a continual Recourse of a Nourishment unto it, and unto that *Covering* from all Parts of the Creation. But yett such is the Contexture of that *Covering* upon the *Sun*, that sometimes tis thick enough, to check the Passage of the *Sun-beams*; from whence arise the *Maculae Solares*; yea, the Countenance of the *Sun* sometimes is paler than ordinary, for a whole Month together; and *Pliny* tells the Time, when the *Sun*, *Totius Anni ferè Spacio palluit*.²⁴⁹ Thus hath the Almighty sett *Bars* about the *Sun*, (as well as about the *Sea*) and said, *Here, shall thy Fiery Waves be*

²⁴⁷ Mather condenses into a single paragraph Dickinson's *Physica* (90–119). The "*Conatus Dispansivus*" of atoms is the "impulse to expand," and the "*Succus Nutritius*" is the "nutritious sap" necessary for the growth of plants.

²⁴⁸ The paragraph on the fourth creative day is extracted from Dickinson (*Physica* 120–43, esp. 121, 125, 126–27, 136, 141). Empedocles (*Testimonia*, Fragm. 1.186) calls the sun a "great mass of fire," in an extant fragment by Diogenes Laertius (*Vitae philosophorum* 8.77.1).

²⁴⁹ The "sun spots," according to Pliny, "palled [the sun] for the space of almost a year." Most likely, Dickinson has in mind Pliny (2.30.89–90), where the Roman historian reports that at Caesar's murder "and during the Antonine war," an eclipse of the sun "caused almost a whole year's continuous gloom."

staid! This Heavenly *Carbuncle*, thus formed by God, seems designed, not only to impart *Light* and *Heat* unto the rest of the Creation, but also to have in it the most subtil *Sulphur of Nature*, by the Steams whereof it produces most eximious Effects in the other Creatures, and particularly in the *Bodies*, (and by Consequence, in the *Spirits*,) of *Men*. That rich *Sulphur of Nature*, (which *Moses* may mean, by, *The precious Things putt forth by the Sun & Moon, the precious Things of the lasting Hills*,) may have certain fine Particles of the *Cælestial Waters*, as well as *Fires*, to constitute it. An agreeable *Motion* is therefore ordered for the *Sun*; which Motion, we find celebrated by *Abraham*, the most Renowned Astronomer of the Ancients, of whom the old Writer of the *Orphicks* thus expresses himself,

Οὐ γὰρ τις ἰδοί· κλ·

Nemo illum novit mortalia cuncta regentem

Unicus ille nisi Chaldaeo sanguine cretus;

Norat enim solis qua se astrum lege rotaret

et circum terram magnus se volveret orbis,

Æqualisque teresque, intus sita complectens.

So far from Unlikelihood, by the way, is the Tradition of *Abrahams* being an *Astronomer*, that it is likely, his Father *Terah* from the very Foresight of his being one, gave him the Name of *Abram*; wherein the *Heighths* of the *Heavens*, and the *Stars* of the *High Heavens*, to be *consydered* by him, are perhaps, referr'd unto.²⁵⁰ But then, that the scalding Influences of the *Sun* might be conveniently Tempered, God created, that other *Planet*, the *Moon*; of a wat'ry and moister Texture, to dispense unto the *Earth*, which cannot bear to be scorch'd, a certain

250 The apocryphal story that the Patriarch Abraham was a renowned Chaldean astronomer, who established the philosophic tradition of the creation of the universe out of nothing (*creatio ex nihilo*), is alluded to in Maimonides's *Guide* (2.13.171–72; 2.19.188). Medieval Jewish tradition also ascribes to the biblical patriarch *The Book of Creation* (Sefer Yezirah), popular among mystics of the period (*EJ*). Mather's claim that the name "Abram" or "Abraham" means "height" or "high heavens" is problematic, for on the one hand the root meaning of "Abram" is unknown, and on the other his name popularly signifies "high father" or "to be populous" (Gen. 17:3–5) [Strong's # 85, 87]. However, Clemens Alexandrinus similarly reports that Abraham was called "sublime father" because he studied the stars and the movement of the heavens (*Stromata* 5.1, *ANF* 2:446), a tradition which Clemens evidently derived from Philo Judæus (*De Abrahamo* 15.69–71, esp. 18.81–82). The "old Writer of the *Orphicks*" is the mythical singer Orpheus, Apollo's son, to whom many hymns, theogonies, and cosmogonies are attributed. The Greek passage is a variant of "Οὐ γὰρ κέν τις ἰδοί" and appears in Eusebius (*Praeparatio evangelica* 13.12.5.22; 13.12.665c). Similarly, a variant of the Latin passage appears in the same location and reads as follows: "The king in His power no mortal could behold, / Save one, a scion of Chaldean race; / For he was skilled to mark the sun's bright path, / And how in even circle round the earth / The starry sphere on its axis turns." But Dickinson's actual source (127) appears to be Clemens Alexandrinus's *Stromata* (5.14.123), where Orpheus says of Abraham, "But one a scion of Chaldean race; / For he the sun's path knew right well, / And how the motion of the sphere about / The earth proceeds, in circle moving / Equally around its axis" (*ANF* 2:472).

Fatt Liquor, which is wondrously agreeable to the *Humidum Radicale* of things generated on this *Terraqueous Globe*. I Judge it not worth while, to recite the Conjectures of my *Dickinson*, about the Production, and Consistence of the other *Planets*, or of the *Fixed Stars*; For, tho' the Lord ha's *call'd them all by their Names*, (whereof a few are instanced in the Book of *Job*.) until we know those *Names*, and the Signification of them, tis but little that can be conjectured concerning them. Tis possible, that if we understood those *Four*, namely, *Ghas*, and *Chimah*, and *Chesil*, and *Mazzaroth*, which are all that are Named in the Book of God, we might guess a little more about the rest; which perhaps may have their Varieties much comprized under *those Four*; but concerning these also, we are much in the *Dark*. All we will add, shall be, That probably the *Moon* shone before the *Sun*, on that *Hæmisphere* where *Moses* lived; and this may be a Reason for his putting the *Evening* before the *Morning*, in his History of the Creation. The *Expanse* was now *Good*; that is to say, *Perfect*; nor was it called *Good*, until it was thus admirably furnished.²⁵¹

The Fifth Day.

Moses proceeds now, to the *Animated Parts* of the Creation. The *Water* and the *Earth* were the *Elements*, (and the fittest ones,) to be employ'd in producing of them. And yett, all that they could pretend, was, to carry the *Seeds* thereof in their Bowels, and afford that warm and moist Matter unto them, which might be their Nourishment. God immediately creating the *Souls* of *Animals*, probably lodg'd them in a *Seminal Matter*, which carried the Figure of an *Egg*. For which Cause, the Ancient Philosophy, both *Egyptian* and *Græcian*, discoursed much of the *Egg*, at the Mouth of God, and the ὄν πρωτόγονον, *Ovum Primigenium*, from whence all things had their Original. In that *Egg*, with the *Souls* of the *Animals*, there were also the *Shapes* | of them, formed by the Finger of God; or the *Pores* of them so disposed, as to entertain the *Nutritious Juice*, which does increase their *Bodies*, into what at last they come to. For these *Corporeal Ideas*, our sacred Philosopher uses the Word, מין/ *Min*, which we render, *Their Kind*. God gave to the *Seeds* of *Animals*, the faculty of admitting from the circumambient Slime, a *Nutritious Juice*, into all the Parts of them; and so to dispose thereof, as to augment, & perfect, and specificate the *Animals*. The *Souls* of *Animals*, which God produced indeed from the *Earth*, (but no Doubt sublimed into a

[83r]

²⁵¹ Dickinson (135, 136, 139, 141) argues that to counterbalance the scorching heat of the sun, God endowed the earth with "*Humidum Radicale*" or "fundamental moisture." And the writer of Job (9:9, 38:32) mentions "Arcturus, Orion, and Pleiades, and the chambers of the south" and "Mazzaroth." Mather's transliteration of the Hebrew terms should read: Ash, Chimah, Chesil, and Teyman (Mazzoroth); i.e., the Great Bear (Hesperus), Orion, Pleiades, and the chambers of the South wind; and Job 38:32, Mazzaroth (also: Mazzoroth) signifies the 12 signs, or the Zodiac collectively. See Strong's # 5906 (5789), 3598, 3685, 8486 (4216).

very fine *Essence*, by His own Omnipotent Hand,) were of a most *Subtil*, and *Active* Nature; and the *Seeds*, whereto God united them, were admirably suited, for their *Animal*-Functions; and that *Fatt Clay*, wherein the Almighty *Potter*, putt them, yeelded *Liquors* very agreeable for their Concretion and Accretion; and the *Vapour* which ascended, before the Lord had caused it as yett to *Rain upon the Earth*, was doubtless a very *Digesting* sort of a Thing. Old *Archelaus* was not altogether ignorant of this Proceeding, when he said, γεν{ν}ᾶσθαι τὰ ζῶα ἐκ θερμῆς τῆς γῆς, καὶ ἰλὸν παραπλησίαν γάλακτι, οἷον τροφήν ἀνείσης; *Genita fuisse Animalia Terræ calore, limum lacti similem in alimentum liquante*. And the Generation of the *Aquatils*, was carried on like that of the *Terrestrials*. But after this Day, (such is the Order of God,) the Generation must be carried on, by a Conjunction of *Male* and *Female*; in the *Seed* whereof lies hid, that fine *Spirit*, much more fine than the *Æther* itself, which is the *Soul* of the *Animal*; and yett that *Soul* being but *Sublimed Earth*, is *Corporeal*, and at length returns to the *Earth*: but that fine *Spirit*, when enkindled, finds in the *Seed*, the *Idea* of an *Organic* Body, of a most wonderful Structure, which it manages accordingly.²⁵²

The Sixth Day.

At last, MAN, the Lord and King, of the other Creatures is introduced, into the Palace, thus Erected and Furnished for him. The *Soul* of Man is a most Noble Thing; and called, Gen. 2.7. *A Breath of Lives*, in the Plural Number; because by it a Man does not only *live* the present *Life*, which is Frail, and Earthly and Mortal, but also *breathe* after, & at length come to live, a *Life Eternal* in the Heavens, *equal to the Angels*. It is said to be *Breathed* by God *into his Nostrils*, (or Hebr. *Into his Face*,) because, God both made his *Body*, [see Job. 10.8. and Psal. 119.73. and Isa. 64.8.] and then so infused the *Soul*, that from the action of *Breathing* and other *Senses* appearing in the *Face*, it appear'd, that he was indeed *Alive*. The Lodging provided for this Noble Thing, the *Soul*, was not immediately made of the *Common Earth*, (tho' it had before been such *Dust*)

²⁵² The entire paragraph is a translated extract from Dickinson (*Physica* 144–58, esp. 145, 148, 149, 150–51). The story of the cosmic egg is told in Aristophanes (*Aves* 693–700). The “Oon protogonon” or “*ovum primigenium*” is the “Ur-egg” or “First Egg” at the mouth of the Egyptian god KNEPH (Knuphis) from which all else sprang (*CBTEL*). Dickinson may have in mind *De principiis* (1.286.15–17; 1.319.2–6), by the Neoplatonist philosopher Damascius (c. 458–533 CE), or rather Porphyry’s *Περὶ ἀγαλμάτων* (10.1) extant in Eusebius Pamphilus (*Praeparatio evangelica* 3.11.115a/c). The Hebrew word מִיִּין [miyn] [Strong’s # 4327] appears in Gen. 1:21 and signifies “their kind.” A student of Anaxagoras, the philosopher Archelaus (fl. 5th c. BCE) describes this generative process, in a fragment surviving in Diogenes Laertius (*Vita philosophorum* 2.17.4–6). Dickinson’s second-hand Greek citation (*Physica* 150) from Archelaus, here copied by Mather, addresses the ancient concept of spontaneous generation and explains that “the animals had been brought forth through the warmth of the earth, liquefying mud [serving] as a nourishment similar to milk” (B. Melton’s translation). Mather also rejects the ancient belief in spontaneous generation in his commentary on Exod. 16:33.

but of *Adamah*, a Red, Rich, Rosie, and *Shining* Sort of Earth, by an unknown Fermentation, advanced now into a Sort of a *Quintessence*; and, no doubt, the *Body* of *Adam*, did by his Fall, unhappily lose much of the *Primitive Glory*, wherein it shone like the *Ruby*.²⁵³ The *Body* of Man was perhaps, the most Illustrious Thing in the whole Visible Creation, and the most precious Treasures of the *Stars* themselves, not excepting the very *Sun*, were in the Composition of it. The fitter Habitation it was, for the Heavenly *Soul*, which *Moses* chooses to call by the Name of /נֶשְׁמָה/ *Neshamah*, wherein he alludes to the Word, /שָׁמַיִם/ *Shamajim*, for this Cause, because it came from thence. My *Dickinson*, adds, *Nec abhorret à fide nostrâ, doctissimorum virorum sententia, qui credunt Deum ad fingendum corpus primi hominis verè manus suas adhibuisse, assumptâ nimirum formâ Humanâ, in quâ postea apparuit Adamo facto, non secus ac posteris etiam sæculis visus est.* A *Seed*, formed by the exquisite Workmanship of Heaven, was now putt into the *Body* of Man, a fitt Instrument for the *Soul*, in carrying on the succeeding Generations. It is the *Soul*, that Begins and Perfects every *Generation*: and Excites the united *Seed* of the Parents, and cherishes that purer *Seed*, the *Bullula*, and digests that thicker *Seed*, in the *Χόριον*, and by its *æthereal* and *plastick* Warmth manages the whole affair, except the first Delineation of the Parts, which it finds lodged there by the peculiar Work of God. The *Seed* would be altogether Torpid, & and not bring anything to Effect, if it were not for the *Formative Power*, which God, the great *γενεσιουργος*, hath implanted in the *Soul*. *Harvey's* History of *Generation* makes it evident, that the *Soul* in the *Seed*, carries on all, without any Assistance from the Mother, for at least the First *Three Months*, in all which Time, the *Embryo* remains, not fastned unto the Mother, by any *Ligaments*.²⁵⁴ In what Part of the *Body* soever, the *Soul* may have its principal Seat, which is variously disputed, it is most certainly no other than a *Foreigner* and a *Sojourner* here, and placed by God in this earthly Tabernacle, for a certain *Term*; upon the Expiration | of which Term, it should [84v]

253 Dickinson (*Physica* 159–94, esp. 162, 164, 166, 168–71, 174–75, 192). Mather presents a similar argument about the color of Adam's prelapsarian body, in his *Threefold Paradise* (135–36) and *Diary* (2:113), where he describes Adam as wearing a luminous garment, or "*Vestis Onychia*," resembling the color of onyx.

254 The Mosaic נֶשְׁמָה [neshamah] [Strong's # 5397] suggests "a puff" (of wind), "vital breath," hence "breath of life" (Gen. 2:7); whereas שָׁמַיִם [shamayim] [Strong's # 8064] signifies "heavens" or "aether," the abode of the celestial bodies (Gen. 1:2). Mather's untranslated Latin quotation from Dickinson (*Physica* 166) reads, "Nor is the opinion of very learned men inconsistent with our faith that God truly used his hands in forming the body of the first men, since the human form had undoubtedly been borrowed, in which He [Christ] later appeared, after Adam had been made, not otherwise than He was seen in subsequent centuries" (B. Melton's translation). The nouns "*bullula*" (Aulus Cornelius Celsus's *De medicina* 2.5.3) and "*chorion*" respectively mean "watery vesicle" ("bubble") and "sac enclosing the fetus" (placenta). The great "*genesiorgos*" is none other than the great "maker" (Wisdom of Solomon 13:5, LXX Apocrypha). The English physician William Harvey (1578–1657), professor at the Royal College and discoverer of the body's blood circulation, describes mammalian generation and the stages of embryonic development in *Exercitationes de Generatione Animalium* (1651).

go back, to its *heavenly Countrey*; even the Countrey, which *Plato* acknowledged, when he called it, ὑπερουράνιον τόπον, *The Super-Cælestial Place*; and *Pythagoras*, when he called it, ἐλεύθερον αἰθέρα, *Liberum Æthera*, where he taught that the *Souls of Hero's*, after they left their *Bodies*, remained, ἀθανάτους καὶ ἀμβρότους, *Immortales et Incorruptibiles*. But since the *Souls* of Men come from Heaven, and are not generated by our Parents, it may justly be enquired, How it could be said unto Mankind, *Increase and Multiply*. 'Tis very sure, That the *Souls* of Men, are in our Sacred Bible, repræsentèd as, the *Sons of God*. And the ancient Philosophy of the Gentiles called them, *The Offspring of God*, and called God, *Their Father*. Whereas our *Bodies* are called, *Branches*; which intimates their Derivation from the *Seed* of our *First Parents*; wherein there is yett also, a very Divine Workmanship. The Wisdome of the Ancients, looks upon the *Humane Seed*, as of a very sublime Nature; and not only akin, τῷ τῶν ἄστρον στοιχείῳ, *To the Element of the Stars*, (as *Aristotle* expresses it,) but also peculiarly stamp'd with a very Divine Character. This little Portion of the *Humane Body*, whereby a thing of so vast Consequence, as the Propagation of Mankind, was to be carried on, was framed with a most astonishing Artifice, & made capable of being multiplied; but the True & Pure *Seed*, which is but a little Portion of that Mass, which we call so, is a most *refined Essence*, capable of an inexpressible *Mixture* (as one may call it,) with the very *Soul* itself, so that the Affections of the very *Soul* of the Parents, may by it, as by an agreeable Vehicle, be transferr'd unto their Children. *Placuit autem Deo, ut speciei multiplicatio, non masculi solius, aut Feminae, sed utriusque virtus existat. Nec dubitandum est, quin mulier eâ ratione præsertim facta sit adjutrix viro, ut ad multiplicandam speciem symbola sua mittat. Quod Moses honestâ quidem, modestâque locutione satis apertâ docet, quando ait Deum fecisse Evam ut Adamo fieret adjutorium* |כִּנְדָּה| *Chenegdo, tale nimirum, quale fiat ei coram, vel Anteriori parte conjuncta.*²⁵⁵

Briefly, The united *Seed* of the *Parents*, producing a sort of *Æthereal Flame*, and by a secret *Magnetism* drawing unknown Influences from the very *Æther*, itself, affords a most congruous Receptacle for a *Soul*, which the Great God

²⁵⁵ Plato's "uperouranion topon" (*Phaedrus* 247c) signifies "the place beyond heaven," which (Socrates instructs his interlocutor) has never been praised enough by the poets. And the influential Greek philosopher Pythagoras (fl. 6th c. BCE) called this heavenly country "eleutheron aithera," i.e., "unrestricted heavens," where the heroic souls remained "athanatous kai ambrotous," i.e., "immortal and incorruptible" (*Carmen aureum* 70, 71). Aristotle argues for a natural principle, or breath, in the soul of all living beings, akin "to the element of the stars" (*De generatione animalium* 2.3.737a, 1). The Latin passage from Dickinson (*Physica* 171) reads, "Moreover, it pleased God that the multiplying of the species arises as a capacity not of the masculine or the feminine, but of both. Nor should it be doubted that woman was made for that reason chiefly a helper to man that she contribute her share to the multiplication of the species. Moses indeed teaches this in a proper and restrained yet sufficiently frank speech, when he says that God made Eve in order that she become a helpmeet [chenegdo] to Adam, truly of such a kind as would be in his presence, even joined to the former by a member" (B. Melton's translation).

accordingly places in it; And hence the *Generation* is not improperly ascribed unto the *Parents*.

But after all, Such is the Mystery of the Divine Operations, in this, as well as in other Matters, that it becomes all Men humbly to confess, *That what they know, is the least Part of what they do not know*. If they are *Divines*, Lett them acknowledge with *Lactantius*, *Hominem in Generatione, præter materiam nascendi (nempe semen) nihil conferre; cætera omnia, nimirum, conceptionem, Inspirationem Animæ, corporis Formationem, partiumque virtutem et incolumitatem Dei esse*. If they are *Philosophers*, Lett them acknowledge with *Harvey*, *Ille rectè pièque rem reputavit, qui rerum omnium generationes ab eodem illo æterno atque omnipotente numine deducit; à cujus nutu rerum universitas dependet*. If they are *Physicians*, Lett them not incur the Rebuke of *Galen*, who saies, *Quo pacto hæc fiant, si scrutaberis, convinceris te non intellegere, neque tuam imbecillitatem; nec opificis tui potentiam*.²⁵⁶

Some fine Hints, my Author, now falls into, as the Effects of his own Experiments; That there is in Man, a certain Lucid and Igneous Nature, which ha's a strange Affinity with the Cœlestial *Sun*. A Tincture, fulgid like the *Sun*, may be by Art, fetched out of an Humane Body, which if the Rayes of the *Sun* fall upon, it will take *Fire* immediately. This *Essence* being lodg'd in a Glass, will Illuminate the Largest Room in the Darkest Night, beyond any *Carbuncle*. Tis the *Aurum Naturæ* in us; and there are no where so Rich Veins of it, as in the *Humane Body*; yea, the *Aurific Tincture* may there be mett withal. When *Moses* notes, That the *Luminaries* of Heaven, are to send, Gen. 1.17. אֲרָרָא/ Or, or, *Light*, and *Fire* upon the *Earth*, it is a most comprehensive Word, and also intends, whatever may here be called, *Aurum*, or *Gold*; and especially, That *Solar* and *Golden Essence*, which is in other things, but especially, in the Body of Man. But this is a Matter here to be no further prosecuted.²⁵⁷

²⁵⁶ The Latin passage here greatly condensed and extracted from Lactantius (*De opificio Dei* 19) [PL 7. 74A] insists that “during procreation, parents contribute nothing more than the material of birth (namely seed). Everything beyond this is the work of God, – namely, the conception itself, the breathing in of life, the moulding of the body, and the bringing forth in safety whatever afterwards contributes to the preservation of man” (*On the Workmanship of God*, ch. 19), in *ANF* (7:299). Natural philosophers should second William Harvey’s pious remark in his *Exercitationes de Generatione Animalium* (50) that “man considers the matter rightly and in a devout way who derives the begetting of all things from that same eternal and omnipotent divinity on whose will the universe of things depends” (B. Melton’s translation). Lastly, physicians should not incur the censure of the famous Greek physician Galen of Pergamum (129–c. 216 CE), who rebukes unbelievers in his *De usu partium corporis humani* (15.1): “If you will investigate in which way these things are made, you will be convinced that you grasp neither your own weakness nor the power of your maker” (B. Melton’s translation).

²⁵⁷ Mather here refers to Dickinson (*Physica* 192), whose experiments are, perhaps, too much like those Jonathan Swift would ridicule two decades later in *Gulliver’s Travels* (1726) 3.5–6. The “*Aurum Naturæ*” or “gold of nature” is perhaps as fine an essence as that which a worthy professor at Swift’s Academy of Lagado sought to extract from cucumbers (3.5.152–53). The

[85r] | Thus we see a most *Beautiful World*, produced; and the *First Matter*, (which was those *Atoms*, that the Apocryphal *Wisdom of Solomon* calls, *The Unseen Matter*, & that for the Smallness of them rendring them *Invisible*, the Apostle calls, Heb. 11.1. *μη φαινόμενα*, *Not Seen*,) formed into Shapes Innumerable. The old Jewes called that *First Matter* by the Name of אֵין *Ain*, that is, *Nothing*; because it consisted of so very *Small Bodies*, as could be no more seen, than if they were *Nothing*. It was most expressively done in *Moses*, to assign that *First Matter* those Two Names, of *Tohu*, and *Bohu*. The *Tohu*, was the *First Matter*, scattered throughout the Universe; but *Empty Space* was necessary, to putt that Matter into *Motion*; and that *Space*, as a *Principium sine quo non*, is called *Bohu*; as among the *Arabians* also, *Bahi*, signifies, a *Vacuum*.²⁵⁸ [These Names, tho' we sometimes find them together in the Prophets, Jer. 4.23. and Isa. 34.11. yett it is a Mistake in those Interpreters, who make them of but one Signification. Accordingly, we elsewhere have *Tohu* alone. Isa. 45.18. Psal. 107.40. Job. 12.24. Deut. 32.10.] Agreeably, the old Greek Philosophers, made these the two *Principles* of all things; τὸ πλῆρες, *Plenum*, and, τὸ κενόν, *Vacuum*. *Asclepiades* called those very *Principles*, ὄγκους, *Moles*, and, πόρους, *Meatus*. But, as for the *First Matter* itself, t'was a *Vain Philosophy*, which came at length, to assert it *eternal*; No, its *Beginning*, and *Creation* by God out of *Nothing*, is asserted in the very first Words of the Bible; on which the Gloss of the Blessed old *Austin*, was highly in the Right; *Informis illa materia, quam de nihilo fecit Deus, primò appellata est Cælum et Terra. Nam quem admodum, si semen Arboris considerantes, dicamus ibi esse Radices et Truncum et Ramos et Folia, atque Fructus, non quia jam sunt, sed quia indè futura sunt; sic in principio Deus fecit Cælum et Terram, quasi semen Cæli et Terræ; cùm in confuso adhuc erat Cæli et Terræ Natura*. The Way, by which this *First Matter* came into Shapes, was, by the *Spirit of God* moving it. This was that *Wind*, *κόλπια*, celebrated by the Ancients; not a proper *Wind*, but אֵין קוֹל פִּי יְהוָה *Kol-pi-jah*, or, *The Voice of the Mouth of God*. But the general Notion, that so many Thousands of Interpreters have run upon, That here is a Metaphor in the *Mosaic Word*, *Merechepeth*, taken from the Incubation of a *Bird*, is altogether mistaken, and it proceeds from their Ignorance of the Old & the True Philosophy.²⁵⁹

Hebrew word אוֹר [owr] (Gen. 1:17) suggests “to be luminous” and “luminary” [Strong’s # 215, 216].

²⁵⁸ The passage about the “*Beautiful World*” that is seen, but made from atoms or “*Unseen Matter*” (i.e., “matter without form”) evidently refers to Wisdom of Solomon 11:17; 13:1–7 (LXX Apocrypha). The Hebrew word אֵין [ayin] means “nothing, non-entity” [Strong’s # 369]. For the Arabic word for the Hebrew “*bohu*” (Gen: 1:2), suggesting “void,” see Walton’s *Biblia Sacra Polyglotta* (1:3).

²⁵⁹ Mather extracts the entire paragraph from Dickinson (*Physica* 198, 200, 203, 206, 207). The ancient Greek philosophers who called these principles “to pleres” and “to kenon,” meaning, respectively, “body” and “space” (or “fullness” and “emptiness”), are Leucippus and Democritus (Aristotle’s *Metaphysica* 1.4.985b, 5–7). These principles are called by Asclepiades

In the *Creation* thus brought about, we find *Moses*, as a *Philosopher* mentioning only *Two Heavens*; the *Æthereal*, and the *Aëreal*; but as a *Divine*, he elsewhere mentions, *A Third Heaven*. [see Deut. 10.14. with 2. Cor. 12.2.] This is that *Light which no Man can approach unto*. The *Two Heavens* are certainly very *Fluid*, and *Various*. And for the *Motion* of the *Bodies* in them, the *Ptolomeans*, and the *Copernicans*, & the *Cartesians*, may save themselves the Labour of their several *Hypotheses*. 'Tis enough, that we are told, Job. 37.12. *It is turned about by the Counsels of God*; where the original Word, alludes to the *Counsels* of a *Pilot*. And inasmuch as we read, that the *Fingers of God*, have a special *Work* about the *Heavens*; But the *Angels of God*, are meant by His *Fingers*; And we read of *Angels* having particular Parts of the *Creation*, peculiarly committed unto their Charge: Behold a further Provision, for the Carrying on of things in the Government of the World, which we do not as yett fully understand! A Provision, whereof the ancient Philosophers among the *Gentiles* were not Ignorant; For, besides what *Aristotle* speaks about *Intelligences*, wee have *Hesiod*, near Three Thousand Years ago, acknowledging *Myriads of Angels*, as having the World under their Management.²⁶⁰

“ogkous” (i.e., “mass,” “lumps,” and “molecules”), whereas “porous” suggests “way” or “means” (of achieving something). See also Cudworth (*True Intellectual System*, bk. 1, ch. 1, sec. 6, pp. 8–10). The adapted citation from St. Augustine of Hippo’s gloss *De Genesi contra Manichaeos* (1.7.11) [PL 34, 178] tries to harmonize the seeming contradiction: “That unformed matter which God made from nothing was first called heaven and earth. [Not because it already was, but] because it could be. If we consider the seed of a tree, we say that the roots, trunk, branches, fruit and leaves are present there, not because they are already in the seed, but because they will come to be from it. In the same way [Scripture said], ‘In the beginning God made heaven and earth,’ the seed, so to speak, of heaven and earth, since the matter of heaven and earth was still in a confused state” (*On Genesis against the Manichees* 58–59). Dickinson’s holy wind קֹלֶפֶיָּה [kolpijah] appears as a Greek transliteration [Κολπία] in Eusebius (*Praeparatio evangelica* 1.10.7.3; 1.10.34b–c), where the bishop of Caesarea (citing Philon of Byblos) relates, “from the wind Colpias and his wife Baau (which he [Philo] translates ‘Night’) were born Aeon and Protogonus, mortal men.” The Hebrew word “kolpijah” does not appear in the Hebrew Scriptures, but seems to be a composite of 2 Chron. 35:22 (mouth of God) and Deut. 4:32 (voice of God). Dickinson’s source for *Physica* (206) is Bochart’s *Geographia* (pars 2, lib. 2. cap. 2, col. 706). See also Keil-Delitzsch (*Commentary* 1:24, note 1).

²⁶⁰ Mather extracts and translates this paragraph from Dickinson (*Physica* 229, 232, 236). The motion of the celestial bodies as debated between Ptolemy, Copernicus, and Descartes alludes to Galileo Galilei’s famous *Dialogue* (1632; 1638), in which Aristotle, Ptolemy, and Copernicus debate the structure of the universe and the motion of the celestial bodies (*Dialogue* 3); and to René Descartes’s *Principles of Philosophy* (1644), esp. part II and IV, who explains motion purely in terms of natural laws without the hand of God. (See also R. Blackwell’s *Galileo*, esp. chs. 2, 5, 7, and D. Stimson’s *Gradual Acceptance*, esp. chs. 2–5). For Mather and his peers, their arguments were either outdated or too mechanistic. Although Mather embraced Copernicus’s heliocentric universe, he shared the disdain of many of his contemporaries who felt threatened by the natural laws of a purely mechanistic (Cartesian) universe; in a purely mechanistic universe there was seemingly no room for God’s providential intervention. Much better than Isaac Newton’s *Philosophiae Naturalis Principia Mathematica* (1686), which seemed to explain gravity and the motion of bodies in terms of the operations of God’s supreme power in the universe. For detail see A. R. Hall (*From Galileo* 37–77 ff), J. Henry (“Pray” 123–47),

This is the Scheme, & the Summ, of the *Philosophy*, which our *Dickinson* supposes constantly præserted among the *Patriarchs*, down unto the Dayes of *Moses*. Nor is it likely, that the *Israelites* were Strangers to this *Philosophy*, even while they were in *Egypt*. They were an Ingenious Nation, and probably the *Egyptians* themselves among whom they lived, were not in the Dayes of *Joseph*, sunk into that *Idolatry*, to which they afterwards degenerated; but worshipped the same True God, with the *Israelites*, and according to the Instructions of *Joseph*, who *taught their Senators Wisdome*. Yea, tis not improbable, That the *Israelites*, when they grew Numerous, built a *Temple*, (as well as lesser *Synagogues*) for the Worship of the True God: [whereof we have some Intimation, in 2. Sam. 7.6.] Indeed, Both *Egyptians* and *Israelites* afterwards fell into *Idolatry*; and God made those very *Egyptians*, in Conformity to whom they so corrupted themselves, to prove a sore Scourge unto them. Nevertheless, even then also, their

[86v] Servitude | was not so very hard, [see Num. 11.18. and Exod. 5.21.] as to leave them, without Men of Education, who still instructed them, in this *Religious Philosophy*. And how well instructed in it, their Neighbours and Kinsmen, the *Idumæans* were, the Book of *Job*, is enough to satisfy us; if the Prophets *Jeremiah* and *Obadiah*, had hinted nothing about it. But for *Moses* himself, the whole World could not show a Man, that was more Accomplished. His Education in the Court of *Egypt*; His Fellowship in the Colledge of *Diospolis*; His Expedition into *Æthiopia*; His Conversation with the wisest Men of *Arabia*, and *Idumæa*, and, perhaps *Phœnicia*, during his long Exile; But above all, His Intimate Communion with Heaven; All conspire to Invite our Expectations, of great Things from him. Among his other Excellencies, it seems likely that his *Chymistry* enabled him to do such things, as the Philosophers in our Age, are Strangers unto. That of Dissolving the *Golden Calf* into Powder, seems to be one of those things. A Work for none but an *Adeptist*! And it will be hard for us, to obtain satisfactory Thoughts, about, *The Holy Anointing Oil*, præpared by *Moses*, for the Use of all the ensuing Generations; or about, *The Perfume*, which might not be imitated; except we suppose *Moses*, a Master of the great *Philosophic Secrets*, by which the true and pure *Essences* of Things, and the finest *Magisteries* may be come at.²⁶¹

and E. McMullin (*Newton*). Although Cotton Mather's *Christian Philosopher* (1720/21) is justly celebrated for promoting Newtonian science in colonial North America, he felt equally at home in the ancient cosmology of his father's *Angelographia* (1696) in which myriads of angels and invisible messengers carried out God's eternal plan. Like their immortal counterparts in Hesiod's *Theogonia* (363–70), the ancient gods proliferated myriads of offspring, including three thousand nymphs with shapely ankles born to Oceanus and Tethys (see also Plato, *Timæus* 41a–42d).

²⁶¹ This translated paragraph is excerpted from Dickinson (*Physica* 298, 302). Since Moses was a member of the royal household, he is likely to have been initiated into the hermetic secrets of Egypt's priestly classes. Philo Judæus relates that philosophers from Chaldea, Babylonia, Greece, and Egypt were recruited to educate the young Moses, who was known by various other Egyptian names (*De vita Mosis* 1.5.20–25). Josephus describes Moses as an Egyptian general, who vanquished the Ethiopians and married Tharbis, daughter of the

Our *Dickinson* having mentioned the *Chymistry* of *Moses*, his Profession will be some Excuse for him, if he take Occasion to give a more ancient Instance of the most exquisite and exalted *Chymistry*, in one that lived long before the Dayes of *Moses*; and that is, *Noah* himself.

We read of, *A Window*, ordered for the *Ark*; [Gen. 6.16.] The Word, *Tsohar*, signifies, not, *A Window*, but, *A Splendor*; and for a proper *Window*, *Moses* uses the Word, *Chalon*, and one *Window* would hardly serve the Three Stories of the *Ark*. Some *Hebrew* Doctors, do therefore, by *Tsohar*, understand, the *Light* of certain precious Stones, hung up, in the several Stories there, like so many *Carbuncles*. But our Dr. *Dickinson*, apprehends, That it was the *Splendour*, of a certain Igneous, and Sulphureous *Liquor*, which *Noah* prepared with admirable Art, and hung up in *Chrystal Vessels* every where, so as to Illuminate the several Cells of the *Ark*; the subtil Steams whereof contributed not a little to the Sustaining, Refreshing, and Nourishing of all the Creatures there Imprisoned.²⁶²

But thus you have had sett before you, a *Key* to the Philosophy of that excellent *Moses*, of whom the very Pagans themselves knew not how to speak any thing, but what was magnificent; *Chalcidius* calls him, τὸν προφήτην, *The Prophet*; *Plato* calls him, Νόμοθέτην, *The Lawgiver*; but *Eupolemus* calls him, τὸν πρῶτον σοφόν, *The First Wise Man*; and *Numenius*, σοφώτατον, *The Wisest of Men*. Tho' in giving you this *Key*, I have taken the Liberty, to cloathe the Conceptions very much in my own Expressions, yett for these Conceptions, I have been very much beholden unto my Dr. *Dickinson*, whose Book of above Three hundred

Ethiopian king (*Antiquities* 2.9.6–7, 2.10.1–2; *Contra Apion* 1.31–32). That Moses was educated “in the Colledge of *Diospolis*” is not unlikely, for Diospolis Megale, better known as Thebes (Upper Egypt), was the Pharaonic capital (2nd millennium BCE), with the temples of Luxor and Karnak and the worship of Amun (the Invisible) at the center of the eleventh dynasty (KP). Moses’s dissolving of Aaron’s molten calf into powder (Exod. 32:4, 20) and of preparing the sweet-smelling ointment and incense “according to the work of the apothecary” (Exod. 37:29) are frequently cited as evidence of the occult knowledge of the Hebrew lawgiver. The history of the golden calf and its cultic significance are examined at length in John Selden’s *De Diis Syris Syntagmata* (1617), Synt. 1, lib. 1, cap. 4, pp. 46–64, and in Samuel Bochart’s *Hierozoicon* (pars 1, lib. 2, cap. 34, col. 330–60). For the use of perfume as a means of covering the odor of sacrificial animals, see Maimonides (*Guide* 3.45.358). Significantly, Mather’s seeming belief in the occult powers of Moses is not shared by Simon Patrick (on Exod. 32:4, 20), who argues that the wrathful lawgiver used nothing but a common file to reduce the calf to dust (*Commentary* 1:341–43, 346).

²⁶² Dickinson (*Physica* 324, 325, 326). The source for this legend on Gen. 6:16 is the Soncino Midrash Rabbah (Gen. XXXI:11). R. Abba ben Kahana relates that the word “Zohar” here signifies “a skylight,” but R. Levi opts for a “precious stone” or “polished gem,” which (according to R. Phineas) lit Noah’s Ark for an entire year, dimmed during the day, and shone at night. (See also Talmudic tractate Sanhedrin 108b.) Mather’s objection that the word צֹהָר [tsohar] (Gen. 6:16) means “splendor” is correct, but it is also used to denote “glistening light” and “window” [Strong’s # 6671, 6672]. However, the word חַלּוֹן [challown], suggesting “window” [Strong’s # 2474], also appears in Gen. 8:6. Mather returns to the same issue in his annotations on Gen. 6:16 (below).

Quarto Pages, I have here digested into an *Epitome*, which you see less than *Three Sheets* have contained. And I am verily perswaded, That if this Account of the *Creation*, be further examined and considered, you will find it an Incomparable *Key*, to very many other Passages, throughout the whole *Sacred Scriptures*.²⁶³

I will only add, That the Vain Witts of the Foolish and Profane Men in this Age, do take too much Liberty in the Diminutive Terms, with which they speak of the *Terraqueous Globe* whereon the Great God ha's placed us. It is not from a Religious Contempt of *this World*, but because the Spirit of Irreligion in them, too often, designs a Contempt of the Great God, & of His Works, that they so express themselves. This *Lower World* is a more Noble Part of the *Creation*, and more *highly* to be accounted of, than many are well aware. But of all its *Prerogatives*, whereof our *Dickinson* does enumerate several, I cannot break off, till I have in his own Words mention'd This;

Nihil potuit amplius, nihil elatius in ejus honorem proferri, quàm quòd FILIUS HOMINIS, qui Deus est, et Caelos atque Terram fecit, ipse ad Terram descendere, et sumptâ sibi carne ex eodem luto, ex quo omnes mortales effecti sunt, ibidem morari per plures Annos haud dedignatus est.

Allow me for once to be a *Translator*.

Nothing Further, Nothing Higher, can be spoken for the Honour of this Earth, than that the SON OF MAN, who is God as well as Man, & made both Heaven & Earth, would vouchsafe to descend unto the Earth, & assume Flesh of the same Clay, whereof all Mortals are formed, and sojourn here for many Years together.

[87r] | Having thus done with my Doctor *Dickinson*, I will add one Historical Remark for the Conclusion of all.

There have been Two great *Physicians*, who have betaken themselves unto *Scripture*, that they may understand the Secrets of *Nature*.

Sennertus, who finds much Fault with such as perverted the Text of *Moses*, and attempted an Exposition of him, out of Heathen Authors; *Ausu infelici et non tolerando*.

And, *Valesius*, who in his Proem to his, *Sacra Philosophia*, tells us, That whereas he had in the former Part of his Life commented upon *Aristotle*, and upon many Pieces of *Hippocrates* and *Galen*, he was resolved now to devote the

²⁶³ Dickinson (*Physica* 331). Chalcidius (4th c. CE), whose “ton propheten” signifies “the prophet,” is a Christian commentator and translator of Plato’s *Timaeus*. Plato uses the term “nomotheten” (*Cratylus* 389d, 5; 390a, 4, 7 etc.) to signify “rule-setters” (i.e. “lawgivers”) in general but does not refer to the Hebrew lawgiver at all. The Jewish historian Eupolemus (fl. c. 150 BCE) is quoted by Clemens Alexandrinus as calling Moses “the first wise man” (*Stromata* 1.23.153, *ANF* 2:335). Finally, Numenius of Apamea praises Moses as more eminent than Plato: “For what is Plato, but Moses speaking in Attic Greek?” (Eusebius’s *Praeparatio evangelica* 9.6.411a, and Clemens Alexandrinus’ *Stromata* 1.22.150.4.2). Dickinson’s book is 344 quarto pages long. For a summary of Dickinson’s main ideas, see K. B. Collier (*Cosmogonies* 149–65).

Remainder of his Dayes, to the Study of the *Holy Scriptures*, & seek his Philosophy out of them for the time to come. — *Quod Deus concesserit vitæ reliquum, statui in iis philosophari, cum quoniam nulla alia ratione censeo certi quippiam & Naturalibus haberi posse, tum quid nescio quo modo eorum lectio, etiam Historica aut Physica, animum pietate latenter imbuat.*²⁶⁴

[88v]

Q. We know, that in respect of God, it is alike, to create all things in an Instant, or to do it successively in a shorter or a longer Time. We may humbly enquire, after the *Reasons*, why the Almighty took a Period of *Six Dayes*, to finish the Works of Creation? v. 31.

A. It is, as Mr. *Robert Jenkins* observes, more suitable to the Capacities and Apprehensions of Men, that the Creation of the World should be delivered unto us, as finished in *Six Dayes*, rather than a shorter or longer Time; and therefore it was fitt, that it should be really so Performed and Finished, as to render the History more useful unto us. By such a Successive and Gradual Proceeding in the Production of things, the Glory of God is more manifested unto Men, than it would have been, if all had been done at once, or by more Tedious Methods. The Obligation to the Observation of a *Sabbath* hence arising, & this to commemorate the Works of Creation, is one Remarkable Instance.²⁶⁵

²⁶⁴ Daniel Sennert (1572–1637), a German physician and iatrochemist, professor of medicine at Wittenberg University, is best known for his *Tractatus de consensu et dissensu Galenicorum* (1619) and *Hypomnematum Physicorum* (1636), which were partly incorporated in Peter Cole's English translation of Sennert's *Thirteen Books of Natural Philosophy* (1659). Sennert rebukes those who pervert the Mosaic Pentateuch "by means of unfortunate and intolerable daring" (B. Melton's translation). In his third discourse "Of Atomes and Mixture," Sennert credits "one Mochus, a Phoenician, who is reputed to have flourished before the destruction of Troy," with having originated the atomistic theory long before Democritus, Empedocles, and other ancient Greeks (later followed by Aristotle) were given credit for inventing it (*Thirteen Books*, Discourse 3, ch. 1, p. 446). Dickinson, Cudworth, Selden, Theophilus Gale, More, Boyle, and others associate this Phoenician "Mochus" with the Israelite Lawgiver Moses. Increase Mather owned two of Sennert's medical works *Medicina practica* (1629), *Institutionum medicinae* (1645) — see Tuttle ("Libraries" 290); however, it is unclear which specific edition he owned. Cotton Mather also mentions Sennert as an authority on the gout, in *Angel of Bethesda* (1972), "Capsula XII" (67). Finally, the Spanish physician Franciscus Valesius, aka. Valles (1524–92), author of *Francisci Vallesii De Sacra Philosophia, sive De iis Quae Physice Scripta sunt in Libris Sacris* (1587, 1608), in his old age relinquished his former study of heathen authors and henceforth devoted himself to God's Word. Valesius confessed that "what remainder of life God has conceded to me, I have decided to pursue philosophy in these Scriptures, not only because I believe that by no other method can anything certain and in natural things be known, but also because I do not know at all how the study of those things, even history or physics, [might not] secretly imbue the mind with piety" (B. Melton's translation).

²⁶⁵ Mather refers to Robert Jenkin (1656–1727), chaplain to the earl of Exeter. Jenkin's *The Reasonableness and Certainty of the Christian Religion* (1698) was very popular and went through six editions in Mather's lifetime. Whether God created the universe in six literal days, years, millennia, or in an instant was a hotly debated issue in Mather's time. The Swiss Calvinist Francis Turretin (1623–87) identifies some of the most significant combatants and their respective arguments in Questions 5 and 6 of his *Institutes of Elenctic Theology* (1:444–52).

But lett us ascend a little Higher. It is *Austins* Opinion, That the *Six Dayes* of the Creation of the World, are distinguished, according to the Perception which the *Angels* had of the Creation; From whence was framed the Distinction of the Schoolmen, between *Cognitio Matutina*, and, *Cognitio Vespertina*. We will not altogether keep to that Notion. But this we will propose. The *Angels* were the Beginning of the Creation, and were created probably in the Morning of the First Day. We read, Job. XXXVIII.7. *The Morning Stars sang together, and all the Sons of God shouted for Joy; & glorified God, for His Creating of the World.* Now the *Angels*, tho' they are so very Blessed and Glorious, yett they are but *Finite*, and are unable to fathom the wonderful Works of God, *which things the Angels desire to look into*: And the more they Know of God and His Works, the more they Adore Him with their Praises. The whole Scene of the Creation seems to have been laid open in Order before them, according to the several Degrees and various Natures of things; whereby they must have had a fuller View, & a clearer Understanding of the Divine Power & Wisdome, than they could have had, if the World had been started forth in an Instant, and Jump't as it were into this beautiful Frame & Order. God was pleased by several Steps to declare His Glory before the *Angels*, and excite their Adoration, which was expressed in *Songs* and *Shouts of Joy*. His Glory, and their Happiness was this Way advanced, much beyond what it would have been, if all things had been Created, & Disposed into their Order, in a Moment. They look'd into the First Principles of Things; and every day presented them with New Wonders; and thus were their Voices Tuned and Raised unto those Praises, which are to be their Employment unto Eternity.²⁶⁶

But after all, as our *Jenkins* expresses it; *It were a strange Præsumption, to demand of Almighty God a Reason of all His Actions, and not Beleeve Him upon His Word.*

[89r]

1328.

Q. The *Wisdome* and *Goodness*, of the Great God, in the System of the *World*, is it not very sensible to all that will observe it? v. 31.

²⁶⁶ St. Augustine (*Liber imperfectus de genesi ad litteram* 3.7–8, *De Genesi ad Manichaeos* 1.2.3–4, and *De Genesi ad litteram* 4.24.41) tries to solve this dilemma by arguing that the reference to day and night (Gen. 1:1–5) before time was created must be understood from the point of view of the angels who had existence either before Chaos was formed into the heaven and earth of the first day (Gen. 1:1) or were part of the first-day's creation. One way to redress this problem is to read the Mosaic hexaemeron as an allegory of angelic cognition, because God presented "so many notions to the intellect of angels. Thus each angelic cognition may be called a day and may be said to have a morning [matutina] and evening [vespertina]," in Turretin, "Fifth Question," *Institutes* (1:444). This tradition dates back to Jewish Wisdom literature and non-canonical books such as the Wisdom of Solomon, Sirach, Jubilees, Secrets of Enoch, Enoch, and their emulators. See F. E. Robbins's *Hexaemeral Literature* (24–27).

A. The Order and Beauty of the Systematical Parts of the World, and the Discernible Ends thereof, wherein there still appears a τὸ βέλτιον, or a *Meliority* above what was necessary to bee, this is evidently such, as to make us conclude, That the present Constitution, proceeded not from any blind Causes of Necessary *Matter*, or Fortuitous *Atom*; wee must from hence conclude, That an Intelligent Being of Infinite *Wisdom*e and *Goodness*, formed this World, out of Choice, in this particular Way.²⁶⁷

For our Assistance in the Contemplation hereof, I will call in the Industrious and Ingenious Reflections, of Mr. *Bentley*, in his Discourse, at the Lecture, founded by Mr. *Boyl*, for the Defence of the *Christian Religion*.²⁶⁸

Come then; Laying aside the Prejudices of our Youth, Lett us consider;²⁶⁹

'Tis evident, that all the *Planets* Receive *Heat & Light*, from the Body of the *Sun*; without which, our own *Earth* particularly, would bee a Desolate Lump of Clay. It is *Good* therefore, that there should bee a *Sun*, to Impart these Influences. But how came the *Sun* to bee *Luminous*? It was not from the Necessity of Natural Causes, or from the Constitution of the Heavens. All the *Planets* might have moved about him in the same Orbs, & with the same Velocity, as they do now; and yett the *Sun* might have been a *Dark*, and a *Cold* Body, like any of them. For, as the six primary *Planets*, Revolve about the *Sun*, so there are secondary ones that Revolve about those *Planets*; as the *Moon* about the *Earth*, and the *Satellites* about *Saturn* and *Jupiter*. But then, in what horrible Desolation must the whole World have been overwhelmed! It had been utterly unfit for the *Animated Creatures*, that God intended for its Inhabitants. That the central *Sun*, should bee a lucid Body, and convey *Heat* and *Light* and Life unto the *Planets* round about him; This is a *Wise* and a *Good* Contrivance of Him, who *in His Wisdom*e made the *Heavens*.²⁷⁰

To proceed; The concentric Revolutions of the *Planets* about the *Sun*, proceed from a *Compound Motion*; a *Gravitation* towards the *Sun*, which is a constant Energy infused into Matter, by the Author of all Things; and a Projected, Transverse Impulse, in *Tangents* to their several *Orbs*, that was also Imprinted at first by the Divine Arm upon them, & will carry them around, until the End of all Things. Now, admitting, that *Gravity* may bee essential to Matter; and that a Transverse Impulse might likewise bee acquired by Natural

267 Mather's Greek "to beltion" suggests "amelioration" or "betterment."

268 The following MS pp. [89r–95r] are extracted from Richard Bentley's *Confutation of Atheism* (1693), eighth Boylean lecture (Dec. 5, 1692). J. H. Monk's *The Life of Richard Bentley* (1833) is still one of the best biographies on this early Newtonian. For the significance of the Boyle Lectureships and the spread of Newtonianism, see M. C. Jacob's *Newtonians* (ch. 5) and S. Mandelbrote's "Natural Theology."

269 Mather invites conservative readers to lay aside the Ptolemaic geocentric cosmogony and to embrace the Copernican heliocentric system. See also Blackwell, *Galileo* (chs. 5, 7); McCollery, "Rosse-Wilkins Debate"; and D. Fleming, "Judgment."

270 Bentley, *Confutation* (lect. 8, sec. 1, pp. 10, 11). Jer. 51:15.

Causes; yett, for all the Planets to move about the *Sun*, in *Circular Orbs*, there must bee given to each, a Determinate Impulse, & these present particular Degrees of Velocity, which they now have, in Proportion to their Distances from the Sun, & to the quantity of the Solar Matter. For, had the Velocities of the several Planets, been greater or smaller than they *are*, at the same Distances from the Sun, or, had their Distance from the Sun, or the quantity of the Sun's Matter, & consequently his Attractive Power, been greater or smaller than they *are*; now with the same Velocities; They would not have Revolved in Concentric Circles, as they do, but have moved in *Hyperbola's* or *Parabola's*, or in *Ellipses* very Eccentric. And what wee thus assert about the *Primary* Planets, may also bee applied unto the *Secondary*. Now, that all these Distances, and Motions, and Quantities of Matter, should bee so accurately & Harmoniously adjusted, in this great Variety of our System, it is above the Fortuitous Hitts, of meer, blind, material Causes; it must certainly flow, from the Disposals of that infinitely *Wise* and *Good* Being, who, as *Plato* saies, ἀεὶ γεωμετρῇ, *always acts geometrically*. If the Planets had moved in such Lines, as wee have described, sometimes they would have approached the Sun, as near as the Orb of *Mercury*, and sometimes have exorbitate[d] beyond the Distance of *Saturn*, & some of them, would have quite left the *Sun*, with[out] ever seeing him any more. Now, the very Constitution of a *Planet*, would have been Corrupted, & Ruined, by such a Change of Interval, between *It*, and the *Sun*; and no Animals could ever have endured such Excesses of Heat and Cold.²⁷¹

Furthermore, The *Æthereal* Spaces are perfect[ly] *Fluid*; they neither do assist, nor, do they retard, the Revolutions of the *Planets*, which rowl thro' those Regions, as unresisted, as if they moved in a *Vacuum*. They might, any of them have moved in Courses opposite unto the present, and in Planes crossing the Planes of the *Ecliptic*, in any kind of Angles. Now if the System had been fortuitously framed by the convening Matter of a *Chaos*, how should all the Planets, as well the primary as the secondary, move the *Same Way*, from the West to the East, & in the *Same Plane* too, without any considerable Variation? Here would bee Millions of Millions of Odds to an Unit, in such a Cast of a *Chance*; and therefore, tis to some Divine Conduct, that such a Regular Harmony must bee ascribed. Especially, if wee consid[er,] that the smallest Planets, are scituated nearest the *Sun*, & each other; whereas *Jupiter* and *Saturn*, that are vastly greater

271 Bentley, *Confutation* (lect. 8, sec. 2, pp. 11, 12, 13). Bentley here summarizes Isaac Newton's "System of the World" (esp. # 1–8), appended to Newton's *Principia* (1686). For the necessity of God's hand in maintaining the planetary orbits, see Robert Boyle's "About the Excellency and Grounds Of the Mechanical Hypothesis" (1674). Plato's "aei geometrei," suggesting "ever-geometrically" or "ever-proportionately," appears in Plutarch, *Moralia: Quaestiones convivales* (8.718 B, 8 and 8.718 C, 3), but is also an adaptation of Plato's *Gorgias* (508a, 6–8), where Socrates explains to his interlocutor Callicles the order of the world as evidence that the gods (and men) greatly favor proportion and harmony.

than the rest, & have many Satell{ites} about them, are happily placed at the extreme Regions of the System, and Immensely Distant. At so wide a Distance, they do in their *Conjunctions*, a little Disturb one another, by their Gravitating Powers; but if such huge Masses of Matter had been scituated much nearer to the Sun, or to one another, the Disturban{ce} in the World, must have been consider{able.}²⁷²

To pass on; Our *Ear{th}* par{ticularly}, is placed so conveniently, {that} the Creatures which inhabit it, live and {thrive} in their Habitation. The Distance fro{m} | {the *Sun* as it now turns, most likely is} *Better*, than any greater or smaller Distance would have been. Tis mathematically certain, That the *Heat* of the Sun, is, according to the Density of the *Sun-beams*, and is Reciprocally Proportional to the Square of the Distance, from the Body of the Sun. By this Calculation, if the *Earth* should now Revolve, suppose, in the Orbit of *Mercury*, the whole Ocean would boil with Extremity of Heat, & bee exhal'd into Vapours, and all that growes upon the Dry Land, would bee consumed as in a Fiery Furnace. But suppose the *Earth* should bee carried as far off as the Orbit of *Saturn*; There the whole Globe would bee one *Frigid Zone*, the deepest Seas under the very Equator, would bee frozen to the bottom, and there would bee nothing of Animation, or Germination in these forlorn Regions of the Universe. Place the *Earth* yett at any other Distance, and still you alter it for the worse, proportionally to the Alteration. Tis then in a Place, which an infinitely Intelligent, & Voluntary Agent hath assign'd unto it. But if any one think, How then can any thing live in *Mercury*, or in *Saturn*? Lett him also think, That the Matter of each *Planet*, may have a Texture very Different, which will dispose the same to bee acted on, by greater or smaller Degrees of *Heat*, according to their several Scituations, & that the Lawes of Life, and Vegetation & Propagation, are the Arbitrary Pleasure of God, and may vary in every *Planet*, as Hee pleases, to us Incomprehensibly. Tis enough, that the Texture of *Ours*, is inconsistent with any other Scituation: Wee could not wear Flesh and Blood, any where else.²⁷³ [90v]

Moreover; The *Earth* Revolves with a *Double Motion*: while tis carried round the Sun, in the *Orbis Magnus* once a Year, it perpetually wheels about its own *Axis*, once in a Day, in every twenty four Hours, turning all the Parts of the *Equinoctial* to the Rayes of the Sun. Conspicuous are the Uses of this Vertiginous Motion; this tis that successively gives Day and Night, over the Face of the whole Earth, and makes it all over Habitable; Without this *Diurnal Rota-*

²⁷² Bentley, *Confutation* (lect. 8, sec. 3, pp. 13, 14). Bentley's teleological argument seems modern, yet asserting his argument on the basis of how the solar system benefits mankind renders his proof more in line with medieval cosmogonies. The passages in braces {} – lost through defacement – are restored from Bentley's text.

²⁷³ Bentley, *Confutation* (lect. 8, sec. 4, pp. 14, 15, 16). The passages in braces {} are lost through wear and tear, but are here reconstructed from Bentley's first edition (1693).

tion, one Hæmisphære would ly Dead, in perpetual Darkness, Frost, and Cold, and the best Part of the other, wasted with a permanent Heat wherein it must ly basking without Intermission. The Vicissitudes made by the *Earths* Moving about its own Center, are better, than an Exposing of the same Side alwayes unto the *Sun*. But whence came these Vicissitudes? The *Earth* might *Annually* have compassed the *Sun*, without such a daily Turn; as wee see the *Moon* ever showes the same Face unto us. Indeed, *Shee* does in her menstrual Orb, turn all her Globe to the Sun, and enjoy *Dayes* and *Nights*, alternately Fourteen Times as long as ours. But should the *Earth* bee deprived of its *Diurnal Motion*, one half of it, must never see any *Dayes* at all. Behold, that Glory of Him, that made Things, as now they are.²⁷⁴

Besides; Compare the Diurnal and the An{n}ual Revolutions of the *Earth*, which have a {ve}ry Different Degree of Velocitie. In {ev}ery Natural Day, all Parts of the *Equator* {h}ave some thing more than Three of the *Earths* Diameters, which makes about Eleven Hundred in the Space of a Year. But within the same Space, the Center of the Earth is carried more than fifty times as far, once round the *Orbis Magnus*, whose Wideness wee now assume to bee Twenty Thousand Terrestrial Diameters. The Annual Motion therefore is more than Fifty Times swifter than the Diurnal. But it must bee acknowledged, That since the Earth Revolves not upon a Material, but a Geometrical Plane, their Proportions may bee varied in Innumerable Degrees, any of which might have happened as easily as the present. What was it then that præscribed this particular Proportion and Celerity to each Motion? Tis certain, That there is a Meliority in the present Constitution. Suppose the *Annual* Motion of the Earth, were now performed in *Six* Months rather than *Twelve*; The Seasons then, would bee Twice as short as they are, and the cold Winters would overtake us before any of our Fruits could bee Ripe. Were the Motion Retarded, the Mischief would on the other Side be as fatal; for most Countreyes would bee so parched & effæte, by the Draught of the Summers, that they could never have an Harvest of a Store sufficient for the Consumption of a Double Year. And then, for the *Diurnal* Motion of the Earth; suppose it made only Twelve Circuits in a Year; Then every Day & Night, would bee Thirty Times as long as they are Now, and not at all suited unto any Humane Affayrs. But on the other Hand, suppose it wheeled a Thousand Times about its own Center, while the Center describes one Circle about the Sun; Then an Equinoctial Day would bee but Four Hours; and such Hasty Returns of Evening would sadly confound, all our Labours, and our Journeyes, & our other Affayrs.²⁷⁵

²⁷⁴ Bentley, *Confutation* (lect. 8, sec. 5, pp. 16, 17, 18).

²⁷⁵ Bentley, *Confutation* (lect. 8, sec. 6, pp. 18–19, 20).

Yett further; Lett the *Mode* of the Earths *Diurnal Motion* bee considered. Conceive an Imaginary *Plane*, which passing thro' the Centers of the *Sun*, & of the *Earth*, extends itself on all Sides as far as the Firmament; This *Plane* is called, The *Ecliptic*; and in this, the Center of the Earth is carried without any Deviation. But then the *Axis* of the Earth, about which its Diurnal Rotation is made, is not erect, unto the *Plane* of this *Ecliptic*, but Inclines towards it, from the Perpendicularum, in an Angle of Twenty Three Degrees, and an Half. Now, why is the *Axis* of the Earth, in this *Particular Posture*, and not in any other? Was this, by *Chance*, or from *Choice*? Wee all know, that this *Inclined Position* of the *Axis*, which keeps alwayes the same Direction, and to construct Parallelism to itself, is the sole Cause of those grateful, and needful Vicissitudes, of the Four Seasons of the Year, and the Variation in the Length of Days. If wee take away the *Inclination*, it would absolutely undo our Northern Nations; the Sun would never come nearer us, than hee doth now, on the *Tenth* of *March*, or the *Twelfth* of *September*. But would wee rather part with the *Parallelism*? Suppose then, that the *Axis* of the *Earth*, keeps alwayes the same *Inclination* | towards the Body of the Sun. This would cause indeed a Varietie of Days, and Nights, and Seasons, on the Earth, but then every particular Countrey, would have alwayes the same Diversity of Day and Night, and the same Constitution of Season, without any Alternation; some would alwayes have *Long Nights* and *Short Dayes*: others again perpetually *Long Dayes* and *Short Nights*: one Climate would bee sweltered with everlasting *Dog-Dayes*, while an eternal *December* blasted another. But shall the *Axis* rather observe no constant Inclination to any thing, but vary and waver in all Manner of Uncertainty? Truly, there could bee no Health, no Life, no Subsistence in such an Irregular System: by the surprising Nods of the Pole, wee might bee tossed backward or forward, from *January* to *June*, yea, possibly from the *January* of *Greenland*, to the *June* of *Abyssinia*. Certainly, the present Constitution, is more Beneficial for us, than any other. Some have Imagined, that if the *Poles* had been erect unto the Plane of *Ecliptic*, all Mankind had enjoy'd a *Perpetual Spring*, & a very Paradise upon Earth, with all the Comforts, in the utmost Measures of *Longevity*. But this perpetual, and universal Spring, is a meer Poetical Fancy; & bating the Equalitie of Dayes and Nights, in all other Points tis an Impossible Imagination. To the People, who dwell near the Equator, the *Spring*, so much admired, would bee an *Insupportable Summer*: and as for the Countreyes nearer the Pole, tis not a *Spring* that would answer their Necessities; they must have nearer Approaches of the Sun, with longer Dayes, & a less Obliquity of his Rayes, a Summer, & an Harvest, for the Ripening of their Fruits, or else bid an eternal adieu to the very best of their Sustenance. An equal Distribution of the same yearly Heat, would no more bring our Fruits unto Maturity, than such a quantity of Fuel, gradually & successively lighted, would make Water to boil, which being all kindled at once, will do it immediately. A perpetual *Equinox* would render the best Parts of the

[91r]

Globe, no other than perpetually Desolate. And the Expectation of a *Constant Serenity*, from such a Position of the *Sphere*, this also, is but precarious: For the affections of the Atmosphere, do not proceed only from the Course of the *Sun*, but also from the Scituations and Exhalations of the *Earth*, & many other uncertain Causes. Nor are the *Equinoxes* of our Year, upon Experience found, more free from Tempestuous Exorbitances, than any of the other Seasons, which also dismisses the Fond Hopes of *Longevity*, from such a *Spring*, as these do talk of: *Longevity*, can't bee prov'd, the Effect of meer *Calm*; and the Inhabitants of the *Torrid Zone*, are generally, both shorter-lived than other People, & inferiour to them in Strength, Stature, & Courage, as well as Intellectual Capacities.²⁷⁶

And shall wee now come a little nearer, within our *Atmosphere*? The *Air*, is a Thin, Fluid Body, endued with Elasticity, and capable of Condensation and Rarefaction. If the *Air* should bee, much more expanded, or condensed, than it naturally is, no Animals could live and breathe in it; nor could those *Vapors*, bee exhaled, or supported, which are absolutely necessary to keep alive all that growes upon the Earth.²⁷⁷ Tis demonstrated, That the Air is always condensed, or expanded, according, proportionably to the Pressure of that Weight which is incumbent on it: so that if the *Atmosphere* had been much greater or smaller than it is, it would have had, in its lowest Region, on the Surface of the Earth, much more Density or Tenuity of Texture; & consequently have been unserviceable unto its most necessary Purposes. Who, but an Intelligent Being, did, or could so adapt it? The *Atmosphere* of the *Moon*, hath no *Clouds*; but if ours had been so, nothing that growes upon Earth, had been produced, or præsaved. If our *Air* had not been a springy Body, no Animal could have exercised the very Function of Respiration; and yett the Designs & Uses of Respiration, are not served by that Springiness, but by some other Quality: as is evident from the *Death* of things in the exhausted Receivers of Air-pumps where an Air is left, exhal'd from, it may bee Minerals, Flesh, Fruits, or Liquors.²⁷⁸

But, Lett us, make our Descent into the *Ocean*. The vast *Atlantic Ocean* is of more Worth unto the World, than if it were changed into a *Fifth Continent*.²⁷⁹ Before the *Dry Land* grow too little for its Inhabitants, there will arrive *New*

²⁷⁶ Bentley, *Confutation* (lect. 8, sec. 7, pp. 20–21, 22–23, 24, 25). Bentley here echoes Thomas Burnet's *Sacred Theory* (1684), bk. 2, chs. 3, 8, pp. 194–96, 268–69. On Burnet's explanation of the tilting of the earth's axis, see also F. Haber 78–79.

²⁷⁷ Bentley here refers to Robert Boyle's *General History of the Air* (1692) or rather one of its preceding incarnations such as *New Experiments Physico-Mechanicall, touching the Spring of the Air* (1660).

²⁷⁸ Bentley, *Confutation* (lect. 8, sec. 8, pp. 27, 28). Bentley extracts his information on Boyle's air pump from *A Continuation of New Experiments* (1680; 1682).

²⁷⁹ Bentley's reference to the Atlantic as a fifth continent suggests that even by the time of William Dampier's visit to the west coast of Australia in 1689 and 1699, European geographers still assumed that Australia was not a continent, but another island or extension of South-East Asia. The famous Captain James Cook corrected that misconception in 1768 and thereafter.

Heavens, and a *New Earth*. The mighty Stores of *Waters*, upon this *Globe*, are no more than what is Necessary for the present Constitution. The whole Substance of all *Vegetables*, and consequentl{y} of all *Animals* too, is but *Modified Water*. An Immense Quantity of it, is continually exhaled by the *Sun*, to fill the *Atmosphere* with Vapours, & feed the Plants, with Dewes and Showrs. If wee could but compute the prodigious Mass of it, that is daily thrown into the Channel of the Sea, from all the Rivers in the World, wee should then with Admiration know, how much is again, by Evaporation, cast upon the Continent, for the Supply of those Innumerable Streams. Behold, not only the *Use*, but the *Cause* also, of the Vastness of the *Ocean*; wee never heard of any Nation, compl{ai}ning of Rivers, too many, too broad, too deep; all nations {under-}stand better, how to value those In{esti}mable Gifts of Nature. But if {the Breadth} and Extent of *Rivers*, bee as now it {is,} the *Ocean* must needs bee no less than {it is.}} The Origin [92v] of our Fountains, is from Vapors, with Rain, & the Receptracle of Waters, into which the Rivers flowing from those Fountains must empty themselves, must have so spacious a Surface, that as much Water may bee continually fetch'd out by the *Sun*, and brush'd off by the *Wind*, as (besides, what falls again in Rain upon its own Surface) is brought into it, by all the Rivers; Now the Surface of the *Ocean*, is just so wide; for if more were evaporated than returns into it again, the Sea would become less; if less were evaporated, it would grow bigger: but since it ha's been, from Time Immemorial at a stand, without any considerable Variation, wee may bee sure, it is exactly proportioned.²⁸⁰

Finally; The Irregular Surface of the *Earth*, is displeasing to some: and, they say,

*Nequaquam nobis Divinitus esse creatam,
Naturam Rerum, tanta stat predicta culpa.*²⁸¹

They would have the vast Body of a Planet, as round as a factitious Globe represents it, and as plain, and smooth, & æquable every where as the *Elysian* Fields. If the Ocean were dried, what an horrible hollow! But, a very small skill in the Mathematicks, would instruct us, that before a Man could bee carried far enough off the Surface of the Earth, to take a full View, of any large Extent, all the Inæquality of the Surface would bee lost unto his View; all would appear as an even Plane, tho' every Rock were as high, as the *Pico of Teneriff*.²⁸² Besides, Is there any physical Deformity in the Fabric of an Humane Body, because our Imagination can strip it of its Muscles, and shew us the Scragged & Knotty

²⁸⁰ The passages in braces {} are lost through wear and tear, but are here reconstructed from Bentley, *Confutation* (lect. 8, sec. 9, pp. 29, 30, 31).

²⁸¹ Bentley, *Confutation* (lect. 8, sec. 10, p. 32). The Latin passage from Lucretius, *De rerum natura* (2.180–81; see also 5.199–200), signifies “the nature of the universe has by no means been made for us through divine power: so great are the faults it stands endowed with.”

²⁸² The third-largest volcano on earth, the Pico del Teide (12,185 ft; 3,718 m) is located on the island of Tenerife (Canary Islands), off the coast of West Africa, and widely visible to seafarers.

Back-bone, the gaping & ghastly Jawes, and all the *Skeleton* underneath? However, our Objectors would at least have the Seashores to have been uniform, without Creeks, and Bayes, and Angles; which would bee a fine Bargain! To part with our commodious Harbours, for the Imaginary Pleasure of an open Shoar, without any Retreat, or Shelter from the Winds. But what Apology can bee made, for the hideous Deformity, of Rocks, and Cliffs, and barren Mountains, even in the convenientest Latitudes for Habitation, if those Ruines could bee removed out of the Way? Truly, wee don't contend, for this Earth to bee our Paradise, or to make an Heaven of our Globe? Tis the Land of our *Peregrination*, and wee aspire after a *better Countrey*. And yett wee may further say, That these Irregularities, must necessarily come to pass, from {the} established Lawes of *Mechanism*, & {from} the ordinary Course of Nature. For, if there bee a *Sea*, the Banks must bee Torn by the *Waves* of it; and if there bee *Mountains*, the Gravel upon the Tops thereof, must bee swept off by *Tempests*, and their Naked Ribs bee exposed unto the Face of the Sun: and if the Seeds of Subterraneous Minerals must ferment, there must follow Earthquakes, that produce what looks like much Confusion. To murmur at these Things, is as unreasonable, as to complain, that wee are *Men*, placed in this *World* at all. Moreover, Lett it bee considered, That the Deformity objected, is but in the *Imaginations* of Men. For there is an *Universal Reason*, that a Figure, by us called *Regular*, with æqual Sides and Angles, is absolutely more beautiful than any Irregular one. All *Pulchritude* is Relative; and all Bodies, are beautiful in all possible Shapes, that are good in their Kind, and fitt for the proper Ends of their Natures.²⁸³ The Ranges of Barren Mountains, by condensing the Vapours, and producing of Rains, and Fountains, and Rivers, give the Plains & Valleyes themselves, that Fertility they boast of. And if there were no Inæqualities in the Surface of the Earth, wee should loose a considerable Share of the *Vegetable Kingdome*; for all Plants will not grow on an uniform Level. To deprive us of *Metals*, would render us meer *Salvages*; but wee are obliged unto our Hills for these. Who would part with all these Blessings, for a fantastical Pleasantness, of an uniform Convexity, and Rotundity, of a Globe? And yett this also, could never bee enjoy'd by any Man living; for the Inhabitants of such an Earth, could have only the short Prospect, of a little circular Plane, about three Miles around them, tho' there were neither Wood, nor Hedge, nor Artificial Bank to Intercept it; and this little too, would appear to have an Acclivity on all sides, from the Spectators; Every Man would fancy himself the Lowest, & as dwelling in a Bottom. But if a Man were lifted up a great Heighth in the Air, for the View of a spacious *Horizon*, hee would only

²⁸³ Bentley specifically targets Thomas Burnet, whose *Sacred Theory of the Earth* (1684) postulated that the antediluvian earth was uniformly level and without mountains, valleys, or craggy shorelines. For a discussion of the changing attitudes toward rugged mountains and nature's nature, see M. H. Nicolson's *Mountain Gloom* (esp. ch. 4) and M. H. Abrams's *Natural Supernaturalism* (esp. pt. 2, ch. 6).

see below him a great circular *Flat*, as level, as the face of the Moon. Whereas, the Poets themselves, cannot embellish the most blissful Seats, without Idæas, of Hills, and Vales.²⁸⁴

Thus have I driven into as little Room as I could, without Injury to them, the excellent Contemplations of a Christian, and Orthodox Philosophy, which make it evident, that it could bee no other than an Infinite God, who by *His Wisdome hath founded the Earth, & by His Understanding hath established the Heavens*.²⁸⁵

[93r]

1346.

Q. What have you to say, why the Formation of the World, was not from such a *Fortuitous Concurrence of Atoms*; as the silly Atheists, in several Ages have ascribed it unto? v. 31.

A. By *Fortuitous* wee suppose their Atheistical Hypothesis, to mean, *Mechanical*; for otherwise, the Word *Fortuitous*, will imply, that there was a *Præ-existent*, and Intelligent, Spectator, who expected something else from the Materials of the World, but some unknown Tendencies of Matter, produced a World at length quite beside his Expectation. This, they will by no means allow; and therefore *Fortune*, in this vile Hypothesis, must bee synonymous with *Mechanical*, and, *Necessary*; and it is Imagined, that Numberless Atoms according to the essential Properties of their Bulk, Figure, and Motion, did, not conscious of their own Operations, naturally shape the World as now it is.²⁸⁶

Now, Lett it bee considered, That the most considerable *Phænomenon*, belonging to Terrestrial Bodies, is the general Action of *Gravitation*, whereby all known Bodies in the Vicinity of the Earth, do tend & press, towards the Center of it; and even the comparatively lightest Bodies, yea, the very Elements themselves (as they call them) in their proper Places, thus do gravitate. But it is the constant Property of *Gravitation*, That the *Weight* of all Bodies around the *Earth*, is ever proportional to the Quantity of their *Matter*. E.g. A Pound Weight of all kinds of Bodies, tho' of the most different Forms, & Textures, does alwayes contain an equal quantity of solid Mass, or corporeal Substance. This Thing is by Mr. *Isaac Newton*, demonstrated now beyond all Controversy.²⁸⁷ Briefly, All

²⁸⁴ The entire paragraph is excerpted from Bentley, *Confutation* (lect. 8, sec. 10, pp. 32–40). Among the poet-historians whose concept of bliss is couched in terms of the beauty of nature, hills, and valleys, are Claudius Aelianus (*De Varia Historia* 3.1.123–29), Lucretius (*De rerum natura* 1.1–49), Virgil (*Aeneid* 6.676–79, 754), and John Milton (*Paradise Lost* 4.241–43, 6.640–41). See also J. Delumeau, *History of Paradise* (3–14, 97–116).

²⁸⁵ The italicized passage is from Prov. 3:19.

²⁸⁶ Mather here excerpts Bentley's *Confutation of Atheism* (1693). The question at the beginning of MS [93r] is derived from lecture 7, sec. 1, p. 4 and targets Cartesian mechanism.

²⁸⁷ Bentley refers to Newton's *Principia* (bk. 3, ch. 6, p. 411): "That all bodies gravitate towards every planet; and that the weights of bodies towards any one planet, at equal distances

Bodies weigh according to their Matter; provided only, that the compared Bodies bee at equal Distances from the Center, toward which they weigh. Indeed, the further they are Removed from the Center, the lighter they are; gradually and uniformly Decreasing in Weight, in a Duplicate Proportion, to the Increase of the Distance. Now, this Doctrine of *Gravity*, introduces a manifest Necessity of Admitting a *Vacuum*, for if there were every where an absolute *Plenitude*, then all Bodies of æqual Dimensions would contain an æqual Quantity of Matter, and Gold, Copper, Stone, Wood, and Feather, would all have the same Specific Weight: and if all Space were Full, the Air would bee as Heavy as They. If it bee said, That a pure, fine, ethereal Matter, which is in a perpetual Motion, may pervade the minutest *Cavities* of the closest *Bodies*, & adæquately fill every *Pore*, so Preventing Vacuity without Increasing the Weight; it must bee answered, That this rare subtil Matter itself, must bee of the same Substance and Nature, with all other Matter; & therefore It also must weigh proportionally to its Bulk; and as much of it, as is at any Time comprehended within the Pores of a particular Body, must jointly gravitate with that Body; so that if the Presence of this Matter, made an absolute Fulness, all Bodies of æqual Dimensions would still bee æqually heavy. In fine, simple *Extension*, or, that which wee call *Space*, is of a very different Nature, and Notion, from that of the Body which is Impenetrable Substance.²⁸⁸

Lett us proceed now, to make a Computation. It is upon many Trials manifest, That Refined *Gold*, the most ponderous of known Bodies, (tho' even this also must bee Porose, being Dissoluble in *Mercury*; and *Aqua Regis*, and other Chymical Liquors; and it being a thing Impossible, that the Figures and Sizes of its constituent Particles should bee so jointly adapted, as to touch one another, in every Point:) *Gold*, is in a Specific Weight unto common *Water*, as 19 to 1;

from the centre of the planet, are proportional to the quantities of matter which they severally contain" (Motte's 1729 translation).

²⁸⁸ Bentley's *Confutation* (lect. 7, sec. 2, pp. 7–10). Here, Bentley rejects the Cartesian notion that there is no vacuum in the universe because all space, no matter how infinitesimally small, is filled up with vortices of impenetrable particles. Following Newton, Bentley argues that if there was no vacuum to begin with, atoms (whose properties are extension, impenetrability, and inertia) would not have been able to combine into material substances that comprise our planetary system. In his *Opticks* (Query 28), esp. pp. 367–70, Newton asserts that because of the "*Vis inertiae*" of matter, the planets and comets would lose their motion (first given them by the finger of God) if the heavens (outer space) were without a vacuum: "A dense Fluid can be of no use for explaining the Phænomena of Nature, the Motions of the Planets and Comets being better explain'd without it. It serves only to disturb and retard the Motions of those great Bodies, and make the Frame of Nature languish . . . What is there in places almost empty of Matter, and whence is it that the Sun and Planets gravitate towards one another, without dense Matter between them? . . . Does it not appear from Phænomena that there is a Being incorporeal, living, intelligent, omnipresent, who in infinite Space, as it were in his Sensory, sees the things themselves intimately, and thoroughly perceives them, and comprehends them wholly by their immediate presence to himself"? (368, 369, 370). For a more general discussion, see J. E. Van De Wetering's "Puritan Dilemma" and R. Lockwood's "Scientific Revolution."

and *Water*, is unto common *Air*, as 850 to 1; so that *Gold* is to *Air*, as 16150 to 1. Whence it appears, that since *Matter* and *Gravity* are always commensurate, (altho' wee should allow the Texture of *Gold*, close, without any Vacuity,) the ordinary *Air*, in which wee Live and Breath{e}, is of so Thin a Composition, that 16149 Parts of its Dimensions, are meer *Emptiness*, and just *Nothing* at all; and the Remaining *One*, only Material, Corporeal, & Real Substance. But if *Gold* itself, bee admitted, as it must bee, for a *Porose Concrete*, the Proportion of meer *Void*, unto *Body*, in the Texture of common *Air*, will bee so much the greater.²⁸⁹ Thus it is in the Lowest, and the Densest Region of the *Air*, near the Surface of the *Earth*, where the whole Mass of *Air*, is under a violent Compression, & the Inferior constipated by the Incumbent. But since the *Air* is now certainly known to consist, of Elastic Particles, that have a continual Tendency to Expand and Display themselves, and the Dimensions to which they expand themselves, bee Reciprocally as the Compression, it followes, that the Higher you ascend in it, where it is less & less compress'd by the superiour *Air*, the more and more it is Rarified. At the Heighth of a few Miles, from the Surface of the *Earth*, it must, by Computation, have several *Million Parts* of empty Space in its Texture, for one of *Solid Matter*. And at the heighth of one Terrestrial *Semidiameter*, (not above 4000 Miles) the *Ether* is of that wonderful Tenuity, that by the Incomparable *Newtons* Calculation, if a small Sphære of common *Air*, of one Inch *Diameter* (which is already 16149 Parts *Nothing*) should bee further expanded unto the Thinness of the *Ether*, it would more than take up the vast Orb of *Saturn*, which is many Million Million Times bigger than the whole Globe of the *Earth*.²⁹⁰ And yett, {the} Higher you ascend above that Region, the *Rarefaction* still gradually Increases with{out} Limit; so that the whole Concave of the Firmament, except the Sun, & the Planets, {in} their Atmosphæres, may bee considered as a meer *Void*. Lett us allow then, that all the Matter of the System of our *Sun*, may bee 50000 times as much as the whole Mass of the *Earth*; and suppose, that the whole Globe of the *Earth* is entirely solid and compact, without any empty Interstices; both of which are more liberal Concessions, than there is any Need of making: Yett wee shall find, that the *Void Space* of our System is immensely bigger than all its corporeal Mass. If wee assume the Diameter {of} the *Orbis Magnus* (wherein the *Earth* {circles} about the *Sun*) to bee only 7000 times {as} big, as the Diameter of the *Earth*, (a[though] | the latest, & most accurate Observations make it Thrice 7000,) and, the Diameter of the Firmament to bee only 100000 {times} as long as the Diameter of the *Orbis Magnus*, (tho' it cannot possibly bee Less than That, but may bee unspeakably Bigger,) yett, after these Concessions, on that Side, and Abatements on ours, wee must pronounce,

[94v]

²⁸⁹ Bentley here draws on Robert Boyle's *Experiments and Considerations* (1684) and *Of a Degradation of Gold* (1678).

²⁹⁰ See Isaac Newton's *Principia* (bk. 3, ch. 13, pp. 420–22 etc.)

That the Sum of *Empty Spaces*, within the Concave of the Firmament, is 6860 Million, Million, Million times bigger, than all the Matter, contained in it.²⁹¹

But some Astronomers do suppose every *Fixed Star*, to bee of the same Nature with our *Sun*; whereof each may have *Planets* about them, tho' by reason of their Distance, they are Invisible unto us. Wherefore, Lett us assume, That the like Proportion, between *Void Space*, and *Matter*, which is found in our *Suns* Region, within the Sphære of the *Fixed Stars*, may competently well hold in the whole System of the Universe. In this Computation, wee must not assign the whole Capacity of that Sphære for the Region of our Sun, but allow half of its Diameter, for the Radij of the several Regions of the Fixed Stars themselves. Diminishing then, our former Number, as this last Consideration requires, it is from Demonstrated Principles affirmed, That the *Empty Spaces* of our Solar Region, (comprehending Half of the Diameter of the Firmament) are 8575 hundred thousand Million Million times more ample, than all the Corporeal Substance in it; and wee may fairly suppose, the like Proportion holding thro' the whole Extent of the Universe.²⁹²

Now our *Atomists*, must suppose *Matter*, in the general *Chaos*, to bee somewhat or well-nigh, *evenly* diffused thro' the Space of the World; which indeed is agreeable to the ancient Opinion, of the Worlds having (as *Diodorus Siculus* expresses it) *μίαν ιδέαν*; or (as *Apoll. Rhodius*) *μίαν μορφήν*, one Form, Texture, and Constitution.²⁹³ And *Matter* being in such a State of Diffusion; every single Particle, would have a *Sphære* of *Void Space* around it, 8575 hundred thousand Million Million Times bigger than the Dimensions of that Particle. Nay, every single Particle, would really bee surrounded with a *Void Space* Eight times as capacious as what wee have mentioned; the Diameter of it being compounded of the Diameter of the proper Sphære, and the Semidiameters of the contiguous Sphæres, of the Neighbouring Particles. Whence it appears, that every Particle, (supposing 'em globular or not very oblong) would bee above Nine Million Times their own Length, from any other Particle. Nor, in the whole Surface of this *Void Sphære*, can there bee more than only *Twelve* Particles *evenly* placed, or at æqual Distances, from the central one, and each other. Were than the *Matter* of the Universe æqually dispersed, the result would bee, not only that every *Atom*, would bee many Millions of Times, its own Length, Distant from any other, but if any one should bee moved *Mechanically* (without Attraction or Direction) to the Limit of this Distance, tis above an hundred Million, Millions,

²⁹¹ This paragraph is extracted from Bentley, *Confutation* (lect. 7, sec. 2, pp. 11–14).

²⁹² Bentley, *Confutation* (lect. 7, sec. 2, pp. 14–15).

²⁹³ The Greek phrases “mian idean” and “mian morphēn” signify, respectively, “one form” (i.e., “indistinguishable”) and “one texture.” Bentley here refers to Diodorus Siculus (1.7.1–2; 1.7.7.5) and to *Argonautica* (1.497; 3.1007, 1141), by the Greek poet Apollonius Rhodius of Alexandria (3rd c. BCE).

Odds, to an Unit, that it would not strike upon any other Atom, but glide thro' an *Empty* Interval, without any Contact.²⁹⁴

Indeed our Adversaries, will not grant the Particles of Matter, ever to have been at the absolute *Rest*, supposed in this even Diffusion. Wherefore what wee have said, serves only to Demonstrate the *Tenuity* of their Imaginary *Chaos*, & reduce it unto some Computation; which Computation, will yett hold with Exactness enough, tho' wee allow the Particles of the *Chaos* to bee variously moved, & to differ in Size, and Site, and Figure; If some are nearer to each other, from some other they would bee but the further off.²⁹⁵

Behold then the Condition of the *Chaos*! Now, to form a System, tis necessary, that the so squandered *Atoms*, convene and unite into *Compact Masses*, like the several Planets. Without such a Coalition, the Diffused *Chaos* must have Reigned unto all Eternity. But how could Particles, thus widely dispersed, combine into that Closeness of Texture? Suppose Two Ships, fitted with durable Timber and Rigging, but without any to steer it, placed in the vast *Atlantic Ocean*, as far asunder as may bee. How many thousands of Years might expire, before those Vessels happen to strike one against another? But lett us imagine, a Space yett more Ample, even the whole Face of the *Earth*, to bee covered with *Sea*, and the Two Ships to bee placed, in the opposite *Poles*: Might they not now move, long enough, without any Danger of clashing? And yett the Two nearest Atoms; in our Evenly Diffused *Chaos*, have ten thousand times less Proportion to the two void circular Planes around them, than our two *Ships*, would have to the whole Surface of the Deluge. But the Ships would move in one and the same Surface, & so they must encounter, when they advance towards one another in *Direct* Lines; or meet in the Intersection of *Cross* ones; whereas the Atoms may not only fly side-ways, but over likewise, and under each other; which makes it many Million times more Improbable, that they should interfere, than the *Ships* in our Supposition. And wee may add, That the Improbability of *Casual Hits* is never diminished, by the Repetition of Trials; They are as unlikely to fall out at the Thousandth, as at the First; so that the Conc{o}urse of our Atoms to produce a Regular World, is vainly expected, even in an endless Duration.²⁹⁶

Mr. Bentley, to whose *Confutation of Atheism, from the Origin & Frame of the World*, I have been much beholden, for these *Illustrations*, | does here upon, [95r]

²⁹⁴ Bentley, *Confutation* (lect. 7, sec. 2, pp. 15–17).

²⁹⁵ Bentley, *Confutation* (lect. 7, sec. 2, pp. 17–18). Bentley here specifically targets the followers of Lucretius and of the ancient Epicurean atomists who hypothesize that atoms possess different shapes, perpetually renew themselves through dissolution and new combinations, never diminish in quantity, and are self-propelled and constantly moving (Lucretius, *De rerum natura* 2.62–332). This sort of argument endows matter with immanent principles of activity that are necessarily self-existing and require no omnipotent agent to sustain them. See also G. B. Stones, "Atomic View."

²⁹⁶ Bentley, *Confutation* (lect. 7, sec. 2, pp. 18, 22, 23).

with Irrefragable Demonstration, prove, That by *Common Motion*, the *Matter* of the *Chaos*, could never convene into such *Masses*, as the *Planets* now are; or, that if they should, yett they could not acquire any of those *Revolutions*, about the *Sun*, which they are now carried withal; or if such *Revolutions* were Acquired, yett they could not bee *continued*. Hee proves, That *Gravitation* is not Essential, and Inhærent unto *Matter*; for, upon those Terms, the Epicureans cannot suppose, there was ever any *Chaos* at all; but the World must have been eternally *Attracted* into the Form, that now it is of: Nor indeed is it possible, that Inanimate Matter (without the Mediation of some Immaterial Being) should operate upon other Matter, without mutual Contact. Hee proves, lastly, That if Gravitation & Reciprocal Attraction, were innate unto *Matter*, yett the present System of the World, never could arise out of it; The *Atoms* would but from all Quarters descend, so as to make only one huge sphærical Mass, which would bee the only Body in the Universe. His Discourse, is too long to bee all *Transcribed* into these *Illustrations*; and it cannot bee *Abridged* without Injury. Wherefore I refer you to it.²⁹⁷

But having mentioned, that Power of *Gravity*; wee will, before wee break off, observe, That the Power of *Gravity* perpetually acting in the present Constitution of the System of the Universe, is an Invincible Argument for the Being of a *GOD*.

Lett these *Phænomena* of Nature be considered.

The *Sun*, *Moon*, and all the *Planets*, do Reciprocally gravitate one towards another.

The *gravitating Power* in each of these, is exactly proportional to their Matter, & arises from the several Gravitations or Attractions, of every Individual Particle that compose the whole Mass.

All Matter, near the Surface of the Earth, for Example, doth not only gravitate downwards, but upwards also, and side-ways, & toward all Imaginable Points; tho' the Tendency *Downwards* bee prædominant and alone Discernible, because of the Greatness, and Nearness, of the Attracting Body, the *Earth*.

Every Particle of the whole Universe, doth attract, and is attracted by, all the rest; All operating upon All.

This *Universal Attraction*, or Gravitation, is an Incessant, Regular, and Uniform Action, by certain, and established Lawes, according to the Quantity of Matter, & Longitude of Distance; and it cannot bee Destroyed, nor Impaired, nor Augmented, by any thing, neither by Motion, nor Rest, nor Scituation, nor Posture, nor Alteration of Form, nor Diversity of Medium.

²⁹⁷ Bentley, *Confutation* (lect. 7, sec. 2, pp. 20, 21). The reference to the Epicureans is to Lucretius's *De rerum natura* (2.216 ff). Although Bentley's eight Boylean lectures *A Confutation of Atheism* were published separately (sermons 1–6, in 1692, and 7–8, in 1693), collected and revised editions appeared in 1699, 1724, and 1735.

This is not a Magnetical Power, nor the Effect of a Vortical Motion.

All these things are fully Demonstrated by Sir *Isaac Newton*; and they can be ascribed unto none, but the *Great GOD, that formed all things*.²⁹⁸

Q. A Remark yett further to be made, on the *First Chapter of Genesis*? v. 31.

A. It shall be made in the Words of Monsr. *Saurin*.²⁹⁹

“It was absolutely indispensable, That *Moses* should make the *Newness of the World*, the Corner-stone, as one may call it, upon which he was to build, the whole *System of Religion*, which he was about to impart unto the Church.

“— One is amazed, to read the different Opinions of the Heathen Philosophers, about the *Beginning* of this World.

“— Lett a Man only consult the famous Work of *Cicero*, entituled, *De Natura Deorum*; and which ought rather to be look’d upon, as a List of extravagant Fancies, which he had formed about the *Divinity*, than as a Treatise upon the *Nature* thereof. Do but observe, the Manner in which Interlocutors of this *Dialogue* speak of the *Origin of the World*, and you will soon discover the Superiority of the System of *Moses*, over that of all Humane Authors.”

Wee will add the expressive Words of the Lord Chief Justice *Hale*, in his Book on, *The Origination of Mankind*; pronouncing a Sentence on the vain & various *Hypotheses* of the Philosophers, for the *Origination* of the World.³⁰⁰

“That which may illustrate my Meaning, (says he) in this Præference of the *Revealed Light* of the *Holy Scriptures*, touching this Matter above the Essays of a *Philosophical Imagination*, may be this. Suppose That *Greece* be unacquainted with the *Curiosity* of mechanical Engines, tho’ known in some remote Region of the World; and that an excellent *Artist* had secretly brought & deposited in some Field or Forest, some excellent Watch or Clock, which had been so formed, that the Original of its Motion were hidden, & involved in some closely contrived Piece of Mechanism, that this Watch was so framed, that the Motion thereof may have lasted a Year, or some such Time, and might give a Reasonable Period for their Philosophical Descanting upon it; and that the Plain Table then had

²⁹⁸ Mather’s sententious summary is extracted from Bentley, *Confutation* (lect. 7, sec. 2, pp. 29–31); Bentley himself relies on Newton’s “System of the World,” in *Principia* (bk. 3). Mather popularized Newtonian science in his *Christian Philosopher* (esp. Essays 1–10, 21).

²⁹⁹ Subsequent paragraphs in quotation marks are extracted from Jacques Saurin (Diss. I, 1:8).

³⁰⁰ The following extract from Sir Matthew Hale [95r–96v] is not in Mather’s own hand, but in what appears to be in the same that copied the passages from Thomas Pyle [55r–57r]. Mather’s conflict between the revolutionary advances of Newtonian science and his conservative faith in the Creator as the prime mover in the universe is particularly revealing in the following excerpt from an allegory that appeared in *The Primitive Origination of Mankind* (1677), by Sir Matthew Hale (1609–76), Lord Chief Justice of England, whose writings on witchcraft Mather cites in defense of the Salem witchcraft trials, in *Wonders of the Invisible World* (1693) 83–93.

[96v]

been not the Description & Indication of Hours, but the Configurations & Indication of the various Phases of the *Moon* | the motion & place of the Sun in the Ecliptick, and diverse other curious Indications of Coelestial Motions; and the Scholars of the Several Schools of *Epicurus*, of *Aristotle*, of *Plato*, and the rest of the Philosophical Sects had casually in their Walk found this Admirable *Automaton*; what kind of Work would there have been made by every Sect, in giving an Account of this Phænomenon? We should have had the *Epicurean* Sect have told the By-Standers, according to their preconceived Hypothesis, *That this was nothing else but an accidental Concretion of Atoms, that happily fallen together, had made up the Index, the Wheels & the Ballance; and that being happily fallen into this Posture, they were put into Motion.* Then the *Cartesian* falls in with him, as to the main of their Supposition; but tells him, *that he doth not sufficiently explicate how this Engine is put into Motion; and therefore to furnish this Motion, there is a certain Materia Subtilis, that pervades that Engine and the moveable Parts, consisting of certain globular Atoms apt for Motion; they are thereby, & by the Mobility of the globular Atoms put into Motion.* A Third finding Fault with the two former, because *those Motions are so regular, & do express the various Phenomena of the Distribution of Time & the Heavenly Motions;* therefore it seems to him, *that this Engine & Motion also, so analogical to the Motion of the Heavens, was wrought by some admirable Conjunction of the Heavenly Bodies, which formed this Instrument and its Motions, in such an admirable Correspondency to its own Existence.* A Fourth disliking the Suppositions of the three former, tells the rest, *That he hath a more plain & evident Solution of the Phenomenon, namely, the Universal Soul of the World, or Spirit of Nature, that formed so many Sorts of Insects with so many Organs, Faculties, and such Congruity of their whole Composition, & such curious & various Motions, as we may observe in them, hath formed and set into Motion this Admirable Automaton, and regulated & ordered it, with all these Congruities we see in it.* Then steps {in} an *Aristotelian*; & being dissatisfied with the former Solutions tells them, *Gentlemen, you are all mistaken, your Solutions are inexplicable and unsatisfactory; You have taken up certain precarious Hypotheses; & being prepossess'd with these Creatures of your own Fancies, & in love with them, right or wrong you form all your Conceptions of things according to those fancied & preconceived Imaginations. The Short of the Business is, this Machina is eternal, & so are all the Motions of it, & inasmuch as a Circular Motion hath no Beginning nor End, this Motion that you see both in the Wheels & Index, & the successive Indications of the Coelestial Motions is eternal and without Beginning. And this is a Ready & expedite Way of solving the Phenomena, without so much ado as you made about it.*³⁰¹

301 Hale, *Origination* (bk. 4, ch. 6, pp. 340–41). Hale here targets ancient and modern Epicureans who believe in an universe that came about through blind chance; Cartesians who seem to assert a mechanistic universe without a God; astrologers who assert fortuitous constellations of the zodiac as the cause of the solar system; Neoplatonists and Transcendentalists who

“And whilst all the Masters were thus contriving the Solution of the *Phænomenon* in the Hearing of the Artist that made it; and when they had all spent their Philosophizing upon it, the Artist that made the Engine, & all this while listned to their admirable Fancies, tells them *Gentlemen, you have discovered very much Excellency of Invention, touching this Piece of Work that is before you, but you are all miserably Mistaken; for it was I that made this Watch & brought it hither, & I will shew you how I made it. First, I wrought the Spring & the Fuse & the Wheels & the Balance, and the Case & Table; I fitted them one to another; & placed these several Axes, that are to direct the Motions, of the Index to discover the Hour of the Day, of the Figure that discovers the Phases of the Moon, & the other various Motions, that you see; and then I put it together, & wound up the Spring, which hath given all these Motions, that you see in this curious Peece of Work; and that you may be sure, I tell you true, I will tell you the whole Order and Progress of my making, disposing & ordering this Peece of Work; the Several Materials of it; the Manner of forming of every individual Part to it, & how long I was about it.* This plain & evident Discovery renders all these excogitated *Hypotheses* of those Philosophical *Enthusiasts* vain & ridiculous, without any great Help of Rhetorical Flourishes or Logical Confutations, & much of the same Nature is that Disparity of the *Hypotheses* of the Learned Philosophers, in relation to the Origination of the World & Man, after a great deal of Dust raised & fancied Explications, & unintelligible *Hypotheses*. The plain but Divine Narrative but the Hand of *Moses* full of Sence & Congruity, & Clearness & Reasonableness in itself, does at the same Moment give us a true & clear Discovery of this great Mystery, & renders all the Essays of the Generality of Heathen Philosophers to be vain, inevident, & indeed inexplicable Theories, the Creatures of Fancy & Imagination, & nothing else.”³⁰²

2882.

Q. The *History* of the *Creation*, all good Men do and must Beleeve, in the *Literal* Sense. But may there not be a *Mystery* in the *History*? The *Mystical* Sense may be very Glorious. Perhaps, the *History* of the *Creation* of the *World*, may contain in the Bowels of it, also a *Prophecy* of the Proceedings of Divine *Providence* towards the *Church*, until the End of the *World*? v. 31.

believe in an impersonal World Soul; and, finally, the Aristotelians who assert the eternity of the universe without a beginning or end.

³⁰² Here ends the extract written in a different hand. Hale, *Origination* (bk. 4, ch. 6, pp. 341–42). The enlightened physico-theologian who remained a thorough-going creationist has the last laugh. Mather is not alone in appreciating Hale’s allegorical tale, for Robert St. Clair, MD, who attacked Thomas Burnet for plagiarizing parts of *Sacred Theory*, praised Hale’s clock-work story, in *The Abyssinian Philosophy Confuted* (1697), “Dedication” (a2–a3).

A. I have in my Hands, a short *Manuscript*, upon this very Head, written by Mr. *Robert Parker*, a New English Divine; but one well-known in *England* by some of his learned Works. I'll here Transcribe it.³⁰³

De Creatione Mysticâ, respectu Ecclesiæ Christianæ in genere.

*Ego sensum Literalem præsuppono, ut abundè et copiosè traditum a Doctissimis Interpretibus, in varijs ipsorum commentarijs. Sensum Mysticum hic tantum indagare et eruere, pro viribus decrevi, à nostris Doctoribus, quod sciam, hactenus omissum; licet à pontificijs subindè, et aliquà ex parte, et sæpè ex errore frustrà tentatum. Neque ego perfectionem in hoc opere promittere potero; sed conatum proferam. De Creatione autem Mysticâ agam primò respectu totius Ecclesiæ Christianæ in genere. Nam productio Ecclesiæ Christianæ est Nova Creatio, et Creatio Cœli Novi, ac Terræ Novæ. Esa. 65.17.*³⁰⁴

1. *Præcedebat quasi Vetus Cœlum, et Vetus Terra, ante Christi Domini Nativitatem; qualis fuit Ecclesiæ status indè ab Adamo, et specialiter in Ecclesiâ Judaica. Esa. 65:16, 17, 18. Status iste fuit instar Terræ, deformis, vacuus, et tenebrosus, propter Lapsum Adami, et propter priorum temporum tenebras: et*

³⁰³ Mather evidently confuses Thomas Parker (1595–1677), minister and teacher at Newbury (Mass.), with Parker's father Richard Parker (c. 1564–1614), an English millenarian, but not one of the NE divines. According to Leroy Froom (*Faith of the Fathers* 3:67–77), Thomas Parker wrote several volumes on the prophecies, but published only one. Samuel Sewall, whose father had migrated to New England with Thomas Parker in 1634, may have inherited the Latin manuscripts, and quotes a passage from Thomas Parker on Isa. 60, in Sewall's *Phaenomena quaedam Apocalyptica* (1697) 19–20. Cotton Mather probably looked at the same manuscript, since most of the passages here transcribed by him are an exposition of the prophet Isaiah. Mather published his biography of Thomas Parker in *Magnalia Christi Americana* (bk. 3, ch. 25, pp. 143–45). Here, Mather mentions that Parker was an avid student of the prophecies and “had written several Volumes, a great part of them in *Latin*; whereof no part was ever publish'd, but one upon *Daniel* which he wrote in *English*.” See Parker's *Visions and Prophecies* (1646). Mather evidently liked Parker's millenarian expositions so much that he calls him “the *Homer of New-England*” (*Magnalia*, bk. 3, ch. 25, p. 144, § 9). See also D. I. Davis, “Critical Editions” (1968) 208.

³⁰⁴ Mather's lengthy excerpt from Thomas Parker's Latin manuscript reads as follows [*italics* inverted]:

On the Mystical Creation with regard to the Nature of the Christian Church.

I take the *Literal* sense to be known, in the way it has been handed down to us in abundance and great detail by the most learned exegetes in their various commentaries. I decided to trace and open, according to my powers, only the *Mystical* sense here, which has so far been, as I know, *omitted* by our learned scholars; to be sure, it was soon put to the test by the priests, albeit with little success; they applied it only in parts and often erroneously. Nor can I promise to be perfect in this work; yet I will put forth an effort. I will examine the *Mystical Creation* primarily with regard to the nature of the entire *Christian Church*. For the *Coming forth* of the *Christian Church* is the *New Creation* of the *New Heavens and the New Earth*. Esa. 65.17.

*specialiter propter errores fundamentales in Judaicam Ecclesiam introductos, à Sadducæis et Pharisæis, Paulò ante Christi Domini Nativitatem.*³⁰⁵

2. *Tum dixit Dominus, Fiat lux, et facta est lux; per Christi Domini introductionem. Christus enim fuit Lux Mundi. Joh. 1.*

3. *Christo Domino tandem post passionem in cælum assumpto; secutum est opus quasi Diei Secundi. Tum factum est quasi Firmamentum, sive Cœlum Novum et Terra Nova, per Electorum è Judæis conversionem, ad Fidem Christianam: et divisæ fuerunt Aquæ Evangelicæ, tanquam Aquæ Superiores, ab Aquis, sive Doctrinis quasi Terrenis et Heterodoxis; et divisa fuit Ecclesia Evangelica ab Ecclesiâ Pharisæicâ.*

4. *Post Divisionem Judæorum Electorum à Reprobis et Apostaticis, in viâ conversionis ad Fidem Christianam, secuta fuit quasi Die Tertio Divisio Imperij Romani. Prodeunte enim Evangelio è Zione, status ejus Ethnicus, velut Aqua salsa et marina seorsim abscessit, et factum est quasi mare multorum populorum in viâ Ethnicismi à Christianis separatorum: et apparuit quasi Arida, sive Terra Christiana, ab Ethnicismo et ethnicis populis apertè distincta, per multorum ex Ethnicis ad Fidem Christianam conversionem.*

*Porrò, Terra ista, sive Ecclesia Christiana, fructum protulit Deo gratum, quasi herbas et arbores omnis generis, per verum Dei cultum, et mores Evangelicos, et bona opera; et per multorum conversionem, in dies singulos crescentem.*³⁰⁶

5. *Tandem à Temporibus Constantini Magni, facta est absoluta conversio populorum per totum Romanum Imperium: et Imperatores Christiani, velut Sol et Luna, et sub ijs Stellæ, sive Præfecti inferiores, tum Politici tum Ecclesiastici,*

³⁰⁵ 1. The *Old Heaven*, as it were, and the *Old Earth* preceded the birth of Christ, the Lord; such was the state of the Church from *Adam* onwards and especially in the *Jewish Church*. Esa. 65.16, 17, 18. That state was like the *Earth* itself. It was without shape, *empty, and dark*, because of the Fall of *Adam* and the darkness of earlier times; and in particular because of the fundamental errors introduced in the Jewish Church by the *Sadducees* and the *Pharisees* a short time before the Nativity of Christ, the Lord.

³⁰⁶ 2. Then the Lord said: *Let there be light, and there was light*; because of the introduction of Christ the Lord. For Christ was the *Light of the World*. Joh. 1.

3. Then Christ, the Lord, was received into heaven after his passion. The work of the *Second Day*, as it were, followed. What came about then was the *Firmament*, or the *New Heaven and the New Earth* by the conversion of the Elected Jews to the Christian Faith. And the Evangelical Waters were divided, like the *Waters above the Firmament from the Waters [under the Firmament]*, or Doctrines related to the Earth and to Heterodoxy, and the Evangelical Church was divided from the Church of the Pharisees.

4. After the Division of the Elected Jews from the Reprobates and Apostates by their conversion to the Christian Faith, the Division [like that] of the Roman Empire followed on the *Third Day*. For when the Gospel came forth from Zion, its pagan state receded like marine salt water, and a *Sea* of many peoples following Paganism was brought forth, separated from the Christians. And the *Dry Land* like the Christian Earth appeared, clearly distinguished from Paganism and the pagan peoples because of the conversion of many Pagans to the Christian Faith.

And see, that Land, being the Christian Church, by the Grace of God brought forth *fruit* such as herbs and trees of all kind, because of the true worship of God, the evangelical customs, and the good works; and because of the conversion of many, which grew day after day.

*per totum Imperium populis prælucebant; et in orbe Romano apertè Dominabantur, — usque ad Annum circiter Quadringentesimum.*³⁰⁷

6. *Posteà, indè ab Anno circiter Quatringentesimo, creati cæperunt quasi Die Quinto, Balænæ Maris ingentes, et devorantes, per Irruptiones et Inundationes, primò Barbarorum ab Aquilone; deindè per erectionem Antichristi; tertio per solutionem Saracenorum à meridie; quartò denique per laxationem Turcarum ab oriente. Hi successivè devorabant Ecclesiam in Apostasiam illabentem, instar Balenarum ingentium. Esa. 27.1. Jer. 1. Jon. 1. et 2. Reptilia etiam maris creabantur, sive emittebantur in Romanum orbem; nempè sub Ducibus et ductoribus, populi conformes, et unà conspirantes in perniciem ecclesiæ. Sancti verò his Temporibus emergebant, tanquam Volucres et Columbæ, solito altius ad Dominum evolantes, et cum eo quasi in Cælo, communionem seorsim exercentes. Status iste durasse videtur usque ad Tempora Wiclefi.*³⁰⁸

7. *Sexto quasi Die Terra protulit Pecora, Reptilia, et Bestias Agri. Mare proferebat Balénas antè descriptas Die Quinto. Et Mare Die Tertio separata fuit à Terrâ in viâ Ethnicismi. Terra verò veram Ecclesiam repræsentabat. Terrâ igitur Die Sexto, videbatur similiter repræsentare veram Ecclesiam, nempè Reformatam, erectam à Temporibus Wiclefi, post Antichristi, Leviathanis illius magni dominationem, Die quasi Quinto introductam. Esa. 27.1. Erectâ tam apertè Ecclesiâ Reformatâ, extiterunt quasi Pecora, Oves et Boves, et Capri, et Jumenta; nempè Animalia humano usin accommo{dare} {**** torn} | videntur significare Reformatos, et Evangelicos, Christo eiusque Legibus subordinatos, eiusque gubernatione subjectos: sed adhuc in statu imperfectiori et initiali, et adhuc tanquam Sacrificia persecutionibus identidem obnoxios. Apoc. 6.9, 10, 11. Belluæ verò significare videntur Antichristianos, Rapaces, Savos, et Persecutionibus subindè imminentes, quales hactenus Evangelicis indè à temporibus Wiclefi fuerunt oppositi. Reptilia significant etiam commixtos homines, Mundana Sapientes, et concupiscentijs indulgentes, atque etiam Antichristianos ordinis inferioris. Et talis quidem erit status Ecclesiæ Reformatæ, indè a Temporibus Wiclefi, usque ad Finem Annorum Antichristi, Reformatis sub Lege* [98v]

³⁰⁷ 5. Finally, in the Days of *Constantine the Great*, the conversion of the peoples living throughout the entire Roman Empire was complete. And the Christian Emperors were the guiding lights for the peoples all over the Empire like the *Sun* and *Moon* and the *Stars* beneath them, being the lower Prefects in both Political and Ecclesiastical terms; and they Ruled openly in the Roman world — to about the Year Four Hundred.

³⁰⁸ 6. Afterwards, from about the Year Four Hundred, on the *Fifth Day*, as it were, great Sea Whales were brought forth, and devoured through Earthquakes and Floods first by the Eagle of the Barbarians, second by the Rise of Antichrist, third by the release of the Saracens from the south, and fourth, finally, by the coming forth of the Turks from the east. Like great Whales, they were one after the other devouring the Church, which was then sliding into Apostasy. Esa. 27.1. Jon. 1. and 2. Sea reptiles were also created and sent out of the Roman world; for the peoples unified under Leaders and Kings conspired to ruin the Church. At this time, however, Saints emerged, flying higher than usually up to the Lord like *Birds* and *Doves* and celebrating the communion with Him alone in the Heavens. This state seems to have lasted until the Days of *Wyclif*.

Christo subordinatis, instar Ovium et Pecorum, licet in statu imperfecto, et interea Belluis Antichristianis identidem savientibus.

Finitis verò annis Antichristi, creabitur quasi Homo, ad Dei similitudinem; quoniam Evangelici tunc adducentes ad perfectum statum Reformationis, et in omnes quasi Belluas Antichristianas et oppositas, et in omnes etiam Terræ Incolas, in viâ Evangelij perfectè dominabuntur.

*Ad hunc modum operibus Dei finitis, sequetur Sabbathum æternum, et perfecta Requies in gloriâ Cœlesti.*³⁰⁹

2883.

Q. But can't you give us another, & perhaps a better, Scheme of this Matter?

A. Such Writers, as Monsr. Jurieu, have accommodated us.³¹⁰

309 7. On the *Sixth Day* the Earth brought forth Cattle, Reptiles, and Beasts of the Field. The Sea brought forth Whales as described above on the Fifth Day. And on the Third Day the Sea was separated from the Earth because of Paganism. But the Earth represented the true Church. So on the *Sixth Day* the Earth seemed to represent the true Church in a similar way, the Reformed Church, that is, which was established in the Days of *Wyclif*; after the reign Antichrist, the Great Leviathan, began as it were on the Fifth Day. Esa. 27.1. The Reformed Church being established visibly, Cattle such as Sheep, Oxen, Goats, and Beasts of Burden came about; for the Animals adjusted to being useful to humanity {**** torn} [98v] they seem to signify the Reformed and the Evangelicals, those subordinated to Christ and His Laws and subject to his governance: but still being in an imperfect and initial state, and, like the Sacrifice, constantly prey to persecutions. Apoc. 6.9, 10, 11. The Wild Beasts, however, seem to signify the Violent and Raging Antichristians who exert danger from their Persecutions, the likes of which have been opposed to the Evangelicals from the time of *Wyclif* up to now. The Reptiles signify another mix of people, the worldly wise, and those who indulge their lust, and also the Antichristians of the lower rank. And such will be the state of the Reformed Church from the Days of *Wyclif* until the End of the Period of Antichrist. During that period, the Reformed will be subject to the Law of Christ, like the Sheep and Cattle, albeit in an imperfect state, while in the meantime the Antichristian Beasts will go berserk again and again.

Once the years of Antichrist are up, however, *Man* will be created in the likeness of God. For the Evangelicals, who will then be brought to the perfect state of Reformation, will rule over all the opposing Antichristian Beasts and over all the inhabitants of the Earth in perfect harmony with the Gospel.

When the work of God is thus finished, the eternal *Sabbath* and perfect Peace in the glory of Heaven will follow. [*Italics inverted*].

310 The following paragraphs are borrowed from Pierre Jurieu (1637–1713), a prominent French Calvinist theologian, controversialist, millenarian, and minister to a Huguenot church in Rotterdam. As a fellow millennialist, Mather was especially fond of Jurieu's interpretation of the prophecies, which Mather also incorporated in his *Threefold Paradise* (327). Ever eager to derive prophetic mysteries from the Bible, Mather embraces Jurieu's typological reading of the Mosaic hexameron as a mystical foreshadowing of the history of the Church Universal. Mather had good precedent for such a reading, for his maternal grandfather John Cotton (1584–1652) had developed similar mystical readings of the Church, in *A Brief Exposition of the Whole Booke of Canticles* (1642), because Cotton read Solomon's Canticles as a "divine abridgement of the Acts and Monuments of the Church" (13). Jurieu's work, which Mather here excerpts, is *The Accomplishment of the Scripture Prophecies* (1687) pt. 2, chs. 20–22, pp. 332–56.

I'l croud the Matter into such *Laconisms*, that upon every Sentence, you must be at the Pains to lay the answerable Clauses in the *History* of the *Creation* before you; which, if you do, perhaps, you'l be surprised at the charming *Mystery*.

The forlorn *Mass* of Mankind, was horribly defaced and confounded by *Sin*.³¹¹

Of that Confusion, as *God* is not the *Author*, so *God* will not say, *It is Good*.

Yett the *Spirit* of *God* præsidèd over the *Waters*, or the *People*; and still præservèd somewhat of His Interest in them.³¹²

This World of Mankind, had *One Day* from *Adam* to *Abraham*; wherein Men had first an *Evening*, or Dimmer, and then a *Morning*, & brighter Notice of the *Messiah*, who is, *The Light of the World*.

The *Church* itself was this while an *unform'd*, and *unshap'd* thing, in Dispersed Families: But they had some *Light* of the *Messiah*, tho' He were not to come until some *Dayes*, or Ages after.

The *Light* of the *Church*, as glimmering as it might be, was distinguished by *God*, from the *Dark* of the *World*.³¹³

However, He *Blesses* not the *World* in their Separation from the *Church*.

The World had a *Second Day*, from *Abraham* to *Moses*.

God now began to sett apart His own *People*, from the rest of the *Waters*.

But the Separation was hitherto *Imperfect*; there were other Godly Persons yett left in many other Places.

He called a *People* up unto an Heavenly *Church-State*; but so small was the Number of the *People*, thus advanced, in the Houses of a few *Patriarchs*, that they were no more in Comparison with the rest, than the *Cloud's* are to the *Sea's*.

However, t'was fitt they should make some Figure in the Book of *God*; for from them have come down the *Rains* of the *Blessings* on us all.³¹⁴

The World had a *Third Day*, from *Moses* to *Jesus*.

The Separation of *God's People*, from the *Waters*, was now compleated in the *National Church* of *Israel*.

T'was ripe for a *Blessing*; yea, for a Repeated one.

The *People* of the Most High, now appear as a *Dry Land*; the *Church* is not like the *Sea* (as the *World* is,) barren, rugged, full of Monsters; and tho' the *Sea* be alwayes beating {the Superficies, the *Earth* is fruitfull.} | Yea, The *Fruits* of all [99r]

³¹¹ Mather here summarizes Jurieu's *Accomplishment* (pt. 2, ch. 21, pp. 334–36).

³¹² Jurieu's *Accomplishment* (pt. 2, ch. 21, p. 336).

³¹³ Jurieu's *Accomplishment* (pt. 2, ch. 21, pp. 337–39).

³¹⁴ Jurieu's *Accomplishment* (pt. 2, ch. 21, pp. 339–42).

Graces, Vertues, and Good Works, in an agreeable Diversity, are conspicuous on it: If *Weeds* appear, they are to be plucked up.³¹⁵

The World had a *Fourth Day*, from *Jesus*, to *Antichrist*.

Now does our Lord Christ, *The Sun of Righteousness*, exhibit Himself; and the Church becomes as a *Moon*, with her borrow'd, various, changeable Illuminations, (tho' not without her *Spotts*) depending on Him; and *Stars*, or Ministers, of several Magnitudes, among which, the *Apostles* were of, *The First*, are now shining in the Orbs of Heaven.³¹⁶

The World had a *Fifth Day*, from the *Rise* to the *Heighth* of *Antichrist*; or, from the *Fifth* Century to the *Eleventh*.

Birds and *Fishes* are the Emblems of the Men, that make the Stirrs in these Ages.

First, there were Men of Bold, Soaring, Daring Spirits, that would needs fly so high, as to raise Disputations upon the *Trinity*, the *Generation* of the Son, the *Procession* of the Holy Ghost.

In those times, tis known, how all Matters ran upon the Flights of the *Arian*, *Macedonian*, *Eutychian*; & such other Hæresies; The Flights were sometimes *Happy*, and often *Too far*.

Afterwards, there are spawn'd vast *Shoals* of other Creatures, that live upon Filth, and Mud, and upon Devouring one another; They had the *Multitude* on their Side, and they dwelt in the *Abyss* of Ignorance; and those great *Crocodiles*, the *Popes* of *Rome*, have had a very particular Consideration among them.³¹⁷

The World ha's a *Sixth Day*, from the *Heighth* to the *Fall* of *Antichrist*.

All sorts of *Beasts*, and *Insects*, and *Serpents*, have in these Ages been mett withal.

But in the Close, our Lord Jesus Christ, our *Second Adam*, sett's *Himself* to espouse *His Church*, now under the Notion of a *Woman*, unto Himself.

And what is then to follow, but a *Sabbath*, wherein our Lord will give His Church to see that *Rest*, which *remains for the People of God*.³¹⁸

315 Jurieu's *Accomplishment* (pt. 2, ch. 21, pp. 342–44). The passage in braces {} is lost through wear and tear, but here restored from Jurieu (343).

316 Jurieu's *Accomplishment* (pt. 2, ch. 22, pp. 345–47).

317 Jurieu's *Accomplishment* (pt. 2, ch. 22, pp. 347–51). The Arian, Macedonian, and Euty-chian heresies – all deal with one or the other aspect of Christ's divinity and the doctrine of the Trinity. The heresiarch Arius (c. 250–c. 336) maintained that Christ was a created, rather than an eternal, being, an instrument through whom the Father created the world. Macedonius, bishop of Constantinople (d. c. 362), has been called the founder of the Macedonian sect, which is to have denied the full Godhead of the Holy Spirit (pneumatomachi). Finally, Eutyches (c. 378–454) of Constantinople denied Christ's consubstantial manhood with ours (rendering redemption unattainable) and like the later Monophysites held Christ's double nature "before, but only one after, the Union" in the Savior's incarnation (ODCC).

318 Jurieu's *Accomplishment* (pt. 2, ch. 22, pp. 351–56).

The *Poet* shall unite with the *Prophet*. You know, who of the Ancients employ'd their *Poetry* on the *Creation*. I will here transcribe nothing from them. I will only give you six or seven Lines of Modern Poetry, which give the Order of the *Creation*.

*Terra et Abyssus Aquæ, Lux, Primâ Luce creavit.
Cælum, atque Undarum Divisio facta Secundâ.
Tertia secrevit Terram et Mare; protulit Herbas.
Quarta dedit nitido Stellarum Sydera Olympo.
Quinta tulit Pisces in Aquis, Cælique Volucres.
Sexta Feras, Hominesque Dei sub imagine, fecit.
Septenâ tandem Deus Quæsit Luce Quietem.*³¹⁹

Q. Will you allow me to ask, *At what Season of the Year, the World was created?*

A. No; The Quæstion is too *ungeographical* and unreasonable.

For, as *Calmet* observes; & indeed every body knows, *Tis impossible that Spring & Autumn should happen throughout the whole Earth at the same time.*³²⁰

³¹⁹ Aristotle reminds us that whereas a historian's task is to relate what *has happened*, the poet's is to utter what *might happen* (*Poetica* 9.1451a, 37–39). Among the ancients who celebrate the creation in their poetry are Hesiod (*Theogonia* 115–210), Lucretius (*De rerum natura*), and Ovid (*Metamorphoses* 1.1–87). The seven lines of Latin poetry by an as yet unidentified “modern” poet read as follows:

The Earth, the Abyss of Water, and the Light He created on the First Day.

The Sky and the Parting of the Waters were made on the Second Day.

The Third Day separated the Earth and the Sea, and brought forth the Plants.

The Fourth Day gave the shining Mount Olympus the Luminaries.

The Fifth Day brought forth the Fish in the Water, and the Birds in the Sky.

The Sixth Day made Wild Beasts and Human beings in the image of God.

On the Seventh Day God finally sought Rest.

In the last line of the Latin version, “*Quæsit*” reads “*Quasit*” in the MS.

³²⁰ The question and its answer – amusing as they may seem to modern readers – were hotly debated in the seventeenth century. If Virgil (*Georgics* 2.336–45) believed the world began in the spring, when all living beings appeared, if Ovid (*Metamorphosis* 1.107–10, 116–18) sang to the same tune, and if Thomas Burnet (*Telluris Theoria Sacra* [1681], bk. 2, cap. 2–3, pp. 156–181; *Theory of the Earth* [1684], bk. 2, ch. 1, p. 176–79, ch. 2, pp. 185–86, 189, ch. 3, pp. 195–97) insisted that the antediluvian earth maintained a perpetual spring (or equinox) because the axis of the earth did not tilt until after the Flood, none less than James Ussher, archbishop of Armagh and primate of Ireland, argued that time began “on the night preceding the twenty third day of *Octob.* in the year of the Julian Calendar, 710 (4004 BCE)” (*Annals* 1). And there were many who applauded his precision. The Swiss Calvinist Francis Turretin had the following to say: “When we say the world was created in autumn, this must not be understood of every part of the globe. It could not happen that everywhere (at one and the same time) it could be spring or autumn, summer or winter (because the seasons differ by reason of hemispheres and climates) . . . But it must be understood of that part of the world in which Adam was formed and (in our hemisphere) in which Moses wrote the history of the creation (since the sun ought to have begun his course from some of the twelve Zodiacal signs, either from the Ram [*Ariete*] in spring or from the Scales [*Libra*] in autumn)” *Institutes of Elenctic Theology* [Fifth Topic, Quest. 4, sec. 9] 1:443. The noted English Calvinist John Edwards surveys the various guesstimates of the precise year when God created the earth and speculates about the

[100v] |
3325.

Q. It may be a Subject, productive of some *Curious Thoughts*, what special Design the great *Moses* might have, in taking such or such a way of Writing. Tho' the general Aim of his Writing, was to teach the *Israelites* the Worship of the True God, & give them the Lawes, which he had received from Him. Nevertheless, in the Abridgment of the ancient History, which he ha's left behind him, he might insert here and there a special Passage, with a particular Design, upon which, tis possible to form some Conjecture, that may be very entertaining? v. 31.

A. I wish, *Leclerc* had never published any worse Thoughts, than those few, which I shall on this Occasion fetch from his *Criticisms*.³²¹

It is plain, that *Moses* presenting us only with a Naked Chronology of the First Times, occasionally sprinkles diverse Things, which he imagined might more easily induce the *Israelites*, to observe the Law. Hence he so particularly does insist on the Lords Resting on the *Sabbath-day*; the Celebration of which Day, was no little Article in the Religion of the *Israelites*. Hence, when he mentions the several Uses of the *Suns* and *Moons* Motion, he observes by the by, that they shewed *Seasons*, or solemn Festivals. Hence, when he might have contracted the History of the *First Sin*, he chose to enlarge more copiously upon it, because it might be useful unto the *Jewes*, who had several Points of *Abstinence* imposed upon them, to know, that the *First Sin* proceeded from Intemperance. Moreover, It seems to have been the Design of *Moses*, to Reform the Manners of the *Israelites*, not only by Direct and *Open Præcepts*, but by a more *Oblique Way* of Instructing them with *Narrations*. It was a common Custome with the *Israelites*, to cast off their Wives at Pleasure; and now, tho' for the *Hardness of their Hearts*, he did not absolutely Forbid them, yett he sufficiently hints to them, *That it was not so from the Beginning*. Polygamy, too was in fashion among them; which if

terrestrial season on earth at that time, in his *Exercitations Critical* (1702), Part 1, Exerc. 1, pp. 16–25. The learned French Benedictine Dom Antoine Augustin Calmet (1672–1757), to whom Mather here refers, authored his famous *Dictionnaire Historique*. 2 vols. (1722), a 4-volume edition of which appeared in 1730. Here, however, Mather refers to Calmet's annotations on Gen. 1–2, in his multi-volume *Commentaire littéral sur tous les livres de l'Ancien et du Nouveau Testament* (vol. 1).

³²¹ Mather refers to Jean LeClerc (1657–1736), a Dutch Arminian controversialist born in Geneva, an outstanding biblical scholar and theologian, and a professor of philosophy and Church history at Amsterdam. Mather takes exception to his famous colleague's radical biblical criticism anonymously published as *Sentimens de quelques Théologiens de Hollande* (1685), in which LeClerc – though ostensibly reproaching the Oratorian Father Richard Simon for his “public scribes” hypothesis – follows in Spinoza's footsteps and subverts the belief in the divine inspiration of the Bible. Here, however, Mather is mollified by LeClerc's defense of the Mosaic authorship of the Pentateuch, in *Twelve Dissertations* (1696). The following paragraphs are excerpted from “Diss. III: Concerning *Moses*, the Writer of the Pentateuch, and the Design in writing” of LeClerc's *Twelve Dissertations* (105–41). For an introduction to this important theologian, see S.A. Golden (1972).

he had openly attack'd, he had alienated all the Hearts of the People from him; however, in the compendious History of the ante-diluvian Ages, he judg'd it agreeable to intimate, That the First Instance of *Polygamy*, was in the Generation of *Cain*, and that the First who assumed that Liberty, was one of a Fierce Disposition, and a Despiser of his Wives.³²²

Furthermore, *Moses* endeavours to raise in the *Israelites*, an aversion to the *Fables* of their Neighbours, and consequently to their *Fabulous Religion*. He not only tells, That the World was created, (which They also confessed,) but also he shewes, how many {*Generations* there were from the Beginning of the World} down to his Time; which was to oppose the vain Pretences of the *Egyptians*, who as *Herodotus*, about the Middle of the Fourth *Chiliad*, reports, pretended, That after the Gods had ceased to Reign in *Egypt*, there had ran to his Time, Three hundred & forty five Generations, which makes up 10473 Years. [*Compare* Ezek. 29.3.] Whereas, *Moses* now also shewes, That after the Flood, *Egypt* was peopled by the Posterity of *Cham*, who came thither out of *Babylon*. The *Egyptians* too Romanced intolerably, about the Generation of Men in their Countrey, & about the Flood, as we find in *Diodorus*; and they boasted, That they were the First Inventors of all Things. *Moses* by the Bye confutes 'em; and shewes, who were the true Authors of the most useful Inventions then known in the World.³²³

Again, By not only writing his Law, but also publishing it, and commanding that it should be Publickly Read every Seventh Year, *Moses* tacitly reprehended the Conduct of the *Egyptian* Priests, who had their Secret Rites, and Hidden Doctrines, which it was not lawful to discover unto the People.³²⁴

To proceed; Most of the Oriental Nations, not only boasted of their Antiquity, as *Diodorus Siculus* hath observed, but likewise extravagantly praised their Founders, and reckon'd them among their *Gods*, as *Herodotus*, and *Manetho*, and others have remarked. Now *Moses* tells how many of them, were descended from *Cham*, who was indeed so far from deserving a Place among the Divinities, that he could not be esteemed a good Man. And for a more particular Mortification of the *Canaanites*, he tells that they were descended from a Race which God had *Cursed*; You know also, how he mortifies the *Ammonites*, and *Moabites*. But, whereas the *Edomites* might boast their

322 LeClerc, *Twelve Dissertations* (Diss. III, pp. 134, 135, 136, 137).

323 LeClerc, *Twelve Dissertations* (Diss. III, pp. 137, 138). The passage in braces {} is lost through wear and tear of Mather's holograph manuscript, but here restored from LeClerc (137). LeClerc's source appears to be John Marsham's *Chronicus Canon Aegyptiacus Ebraicus Graecus* (1672). Herodotus (2.142–43) describes his encounter with Egyptian priests and their calendars, and Diodorus Siculus (1.2.1–4; 1.16.1–3; 1.8.1 ff) tells us that the art of making brass and iron was developed in Thebais and that the Egyptian Hermes invented music and the three-stringed harp ([Gen. 4:21] attributes this invention to Jubal, son of Lamech). See also Eusebius Pamphilus's *Praeparatio evangelica* (9.27).

324 See Deut. 31:10, Herodotus (1.123, 140; 2.35–98), Diodorus Siculus (1.94.2, 40.3.1–8).

Descent, from *Jacobs* elder Brother, he exposes it, how scandalously *Esau* sold his Birthright. Yea, tis remarkable to see, how many Occasions *Moses* takes, to observe, that several *First-begotten Sons*, either forfeited their Birthright, or were inferior to their younger Brothers in laudable Qualities. Probably, t'was to retund the Aspiring of the *Moabites*, the *Ammonites*, the *Ishmaelites*, and the *Edomites*, who because they were descended from eldest Sons, might claim a Right over the *Israelites*, when they should happen to be more powerful than They. Nay, *Moses* himself was a younger Brother, but præferr'd unto his elder Brother, *Non sine aliquâ Fratris Invidiâ*.³²⁵

But after all, We may elsewhere discover, some admirable and mysterious references to the affairs of the *Messiah*, couched in the *Mosaic* Writings, which from a Critic of such a *Genius* as *Leclerc*, are not to be expected.³²⁶

842.

Q. I am very willing, to bee informed, What *Notions* the Ancient *Pagans* had, of the chief Matters mentioned in the *Scriptures*; which *Notions*, I suppose you conclude, they had originally from the *Scriptures*, and so those *Notions* will much help to confirm the Divinitie of these Glorious Writings?

Please to *Begin* at the *Beginning*; and lett mee have the History of *Creation*, as Received, and Confessed, by the Heathen. v. 31.

A. The very *Entrance of Gods Word*, gave *Light*, even unto *Them*, hereabout.

I will bee particularly beholden, unto the Pains, of our *Edwards*, for a Collection of Passages, to Illustrate this Matter.³²⁷

The general Opinion of the ancient Gentiles, was, That the World was made out of a *Chaos*, a disordered & Indigested Mass of Matter, *Without Form & Void*.

Sanconiathon, the Phœnician Historian, mentions this *Chaos*, as the Source of all things.³²⁸

³²⁵ LeClerc, *Twelve Dissertations* (Diss. 3, pp. 139, 140n). Diodorus Siculus (1.10.1–7 ff); Herodotus (2.142–46); Manetho's *Aegyptiaca* (Epitome), which includes an account of the deified founders of Egypt, survives in fragments, in Eusebius Pamphilus, Diodorus Siculus, Syncellus, and Sextus Julius Africanus. See especially Eusebius's *Praeparatio evangelica* (2.1–2.44d–60d) [PG 21. 93–104]. For the references to the cursed Canaanites, see Gen. 9:25–26; for Ammon and Moab, the incestuous offspring of Lot by his two daughters, see Gen. 19:30–38; for Esau's selling of his birthright to his younger brother Jacob, see Gen. 25:29–34; and for Moses's being preferred over his elder sibling, "without any envy of his brother [Aaron]," see Exod. 4:14.

³²⁶ Mather here appears to allude to LeClerc's acclaimed contributions to the Republic of Letters, as well as to LeClerc's *Harmonia Evangelica* (1699) – a harmony of the conflicting narratives in the Gospels.

³²⁷ The following MS page is extracted from John Edwards's *Discourse Concerning the Authority, Stile, and Perfection*, in 3 vols. (1693–95) 1:88–94.

³²⁸ Edwards (*Discourse* 1:88–89) refers to the Phœnician historian Σαγκουνιάθων [Sanghouniathon], variously Latinized as Sanchoniathon (Sanchuniathon), whose history of ancient

The old Poet *Orpheus*, held this *Chaos* to be the first Principle of all things! And *Hesiod* agrees with him,

Ἡ τοι μὲν πρωτίστα Χάος γένετο.

Ovid, with his,

Ante Mare et Terras, —

in forty or fifty Pair of smooth Verses, describes this Origine of all things, & makes the very *Chaos* Beautiful.³²⁹

This is the same with *Hyle*, the first Matter; the *Demogorgon* of the Poets.

The *Phœnicians* expressed it, by the Words, *Thoth* and *Bau*, which are but a small Variation from *Tohu* and *Bohu*, in the Hebrew Text.

Moses intimates, that a formless Heap of *Water* and *Earth*, together mingled, contained the first Elements of all Things.³³⁰

Hence the old Pagan Divines, that is, the Poets, made, the *Ocean*, to be the Original of all Generation.

Orpheus also call'd the *Ocean*, *The Parent of all things*.

Homer did the like, asserting the *Ocean*, to be the Ancientest of the Gods:

Ὠκεανὸν τε θεῶν γένεσιν.³³¹

Thus, as *Philo* tells us, the Stoicks held, the *Chaos* to be *Water*, and to have its Denomination, from *χυσίς*, a flowing or pouring out. The Scholiast upon *Pindar*, thinks that his, *Ἀριστον μὲν ὕδωρ*, alludes to this ancient Opinion.

Thales, the founder of the *Ionic* Philosophy, expressly mentained, that all things were produced of *Water*. *Aquā dixit esse initium Rerum, Deum autem eam*

Phoenicia preserved the teachings of the priest Hierombalos. If Philon of Byblos is to be trusted, then Sanchoniathon lived before the Trojan War (13th c. BCE) and taught in Tyre. Edwards here relies on fragments preserved in Eusebius's *Praeparatio evangelica* (1.9.30a–31d).
 329 The mythical bard *Orpheus* describes the primordial chaos in *Orphica* (*Hymni* 78.4 ff). *Hesiod*'s agreement (*Theogonia* 116) reads, "Verily at the first Chaos came to be." Mather again omits the Greek diacritical marks even though they appear in Edwards (*Discourse* 1:89). The line from the creation account in *Metamorphoses* (1.5), by the Roman poet Publius Ovidius Naso (43 BCE–c. 17 CE) translates, "Before the sea [was] and the lands." *Ovid* makes no effort to conceal his skepticism about the many creation stories he has come across. See also Aristotle (*Metaphysica* 1.4.984b, 24–30).

330 The "*Demogorgon* [demiurgus] of the Poets," the mysterious Maker of the World, perhaps here refers to Anaximander of Miletus, one of the Seven Sages (c. 610–c. 540 BCE), whose *Peri physēōs* (*On the Nature of Things*) describes how the "apeiron" or "infinite" constantly shapes and reshapes the cosmos (*Testimonia*, fragm. 14.6 ff; fragm. 30.13 ff). Mather here repeats much of the same material he had already excerpted [78v–81r] from John Dickinson's *Physica* (bk. 1, ch. 4, pp. 42–44). The Greek word "hyle" signifies "matter," "chaos," "elements," even "sand" or "dust" (Aristotle's *Metaphysica* 1.4.985b, 5–10 and *Timaeus* 30a, 52d–53b; Athenaeus of Naucratis 7.22.14); The Phoenician words "Thoth" and "Bau," variants of Hebrew-Chaldaic "Tohu" and "Bohu," signal "without form" and "void" (Gen. 1:2, 2:7) [Strong's # 8414, 922] and in a larger sense a "primeval mixture of elements" [Strong's # 2344, 4325, 6083].

331 Edwards (*Discourse* 1:90). For the Ocean as the father of myriads, see *Orphica* (*Hymni* 83.1 ff); *Homer* (*Iliad* 14.201, 302) sings "Oceanus, from whom the gods are sprung." Plato (*Cratylus* 402b–c) cites *Homer*'s passage to the same effect and enlists the ancient bards *Orpheus* and *Hesiod* (*Theogonia* 337–70); see also Aristotle (*Metaphysica* 1.3.983b, 30–32).

mentem quæ ex Aquâ cuncta fingeret; as Tully reports of him. [Behold, a Commentary upon Gen. 1.2.] Yea, the Indian *Brachmans*, according to *Strabo*, and the Egyptian Philosophers, according to *Philo*, thought so too.³³²

Wherefore *Helmont*, in our Days, holds that all Bodies are from one Element; are materially simple *Water* disguised into various Forms, by the *Plastic* Virtue of their Seeds. —³³³

To the *Chaos*, and *Water*, the Ancients added another concurrent Principle, namely, *Night*. That the World had its Beginning from *Night* (or, *Erebus*) and *Chaos*, was an Universal Tradition both of such Poets, as *Orpheus*, *Linus*, *Hesiod*, *Homer*, and others, and such Philosophers as *Epicharmus*, *Thales*, *Plato*, and all the Græcians.³³⁴

³³² Edwards (*Discourse* 1:90–92). Philo Judæus tells his story about the Stoicks, in *De aeternitate mundi* (18.3). The Greek “kysis” (“chysis”) suggests “to pour.” The Scholiast upon the Greek lyric poet Pindar (c. 518–443 BCE) of Cynoscephalæ (Boetia) is an Alexandrian or medieval commentator on Pindar’s *Olympian Odes*. The Greek passage “Ariston men ydor,” literally signifying “Best is water” (*Olympian Odes* 1.1), appears in several commentaries, including *Scholia in Pindarum (scholia vetera)*, *Olympia*: Ode 1.1 (scholion 1a, 1–2; 1d, 1); and in *Scholia et glossæ in Olympia et Phythia* (Ode-treatise Olympia, Ode 1, scholion 1.10, 24). Aristotle tells us that the famous Thales of Miletus postulated that water is the first principle of all things (*arxe*), in *Metaphysica* (1.3.983b, 20–984a, 4); so does Seneca in *Naturales quaestiones* (3.13.1). The Roman orator and statesman Tully, aka. Marcus Tullius Cicero (106–43 BCE), cites Thales, who “said that water was the first principle of things, but that god was the mind that formed all things out of water” (*De natura deorum* 1.10.25). According to the Greek geographer Strabo (*Geography* 15.1.59), the Indian Brachmans or Brahmins also believed that water is the principal element; Philo Judæus reports the same of the Egyptians, who honored water as the first principle of all creation (*De vita Mosis* 1.98.2–4).

³³³ The Flemish chemist and physician Jean Baptista van Helmont (c. 1577–1644) described the significance of water in his famous *Ortus Medicinæ* (1648), edited by his son Francisco Mercurio van Helmont. Perhaps because Cotton Mather considered becoming a physician before he overcame his speech impediment, he owned the Amsterdam, 1652 edition of *Ortus Medicinæ*, which Mather also put to good use in his own medical handbook *Angel of Bethesda* (1972). Van Helmont discusses the function of water in “Causa, & initia naturalem” (*Ortus Medicinæ*, cap. 29, # 23–24), in “Aqua” (cap. 46–49), and in “Natura contravivorum nescia” (cap. 25, pp. 139–40, # 38–39). The “*Plastic*” virtue of seeds is based on the Platonic concept of the *anima mundi*, according to which all living things, including all matter, are endowed with an intrinsic, albeit blind, vital force that shapes the function and purpose of each organism. As Sir Matthew Hale, Chief Justice of England, would put the issue in his *Primitive Origination of Mankind* (1677), God’s spirit from the beginning “impregnated” dead matter “with several kinds of vital influence, varied and diversified according to their several parts and uses [Thus] Activity and active Forms, Powers or Qualities were derived into Matter, namely, not from Matter it self, or such which is meerly unactive and passive; but from another Principle, namely, the vigorous influx of this Spirit that moved upon the face of the Water” (bk. 4, ch. 2, p. 293). For a discussion of the concept of “Plastic Nature,” see W. B. Hunter’s “Doctrine.”

³³⁴ For the ancient Phoenician theory, see the fragment of Philon of Byblos in Eusebius (*Praeparatio evangelica* 1.9–10.30d–42d) and *Fragmenta* (Jacoby # F 3c, 790, F fragment 2.6); for the primordial Chaos and Night, see Orpheus (*Orphica, Hymni* 78.4 ff), Hesiod (*Theogonia* 115–20, 123–25, 213–24), Homer (*Iliad* 14.255–62), and Ovid (*Metamorphoses* 1.5–20). Linus (perhaps the mythical Linos, son of Apollo and Samathe, or the son of Urania

Aristotle relates, that Persons who were skilled in the ancient Theology, beleaved, *all things were made of Night*.³³⁵

What is this, but a Testimony to that Passage, in Gen. 1.2. *Darkness was on the face of the Deep*? The *Deep* is their *Chaos*, and the *Darkness* is their *Night*, or *Erebus*. For the known Signification of Ερεβος, is, *Caligo*, Darkness. Or, perhaps it may bee borrowed, from [*Ereb*] the *Evening*, mentioned Gen. 1.5. as the first Beginning of Time, from the Creation. Whence, the old Notion, of *Æther*, and, *The Day*, begot by the *Night*.³³⁶

And, the *Mosaic History*, of Gods orderly *Dividing, Separating, and Digesting*, of this *Dark Mass*, the old Philosophers have likewise agreed unto. *Anaxagoras*, little deserved the Name of an *Atheist*; for *Plutarch* tells us, Hee was the first, who denyed *Fortune*, or *Fate*, to bee the Cause or Principle of the fair Order & Harmony of the Universe, and sett up a pure *Spirit*, or *Mind*, separating the Homogeneous Parts of the Universe from the whole confused Mixture.³³⁷

Diogenes Laertius gives us these, as his Words, *All Things were in an Heap & Jumble at first; afterwards came the Eternal Mind, and Disposed and Ordered them, in an Excellent Manner*.³³⁸

This did *Aristotle* mean, when hee said, *That in Infinite Matter, a Mind or Intelligence produced Motion, and separated the Parts*: Which *Mind* is by *Simplicius*, on the Place, called κοσμοποιος νους, the *World-making Mind*.

Thus, *Tully* afterwards asserts, That those Particles of infinite Matter, which were alike in themselves, but very minute, subtil, & confused, were afterwards, by the *Divine Mind*, brought into Order.

and Amphimarus) is probably the celebrated singer whom Apollo killed for "being his rival in singing" (Pausanias 9.29.6–9); see also Homer (*Iliad* 18.569). Eusebius (*Praeparatio evangelica* 10.4.469b–470b; 10.11.495b; 13.12.668a–b) maintains that Moses lived much before them all. For the Greek philosophers Epicharmus, the Sicilian playwright (5th c. BCE) to whom large numbers of philosophical writings are attributed, see Theocritus (*Epigrammata* 18) and Pseudepicharmea (*Fragmenta* 1.3); for Thales of Miletus, father of natural philosophy, see Aristotle (*Metaphysica* 1.3.983b, 20–984a, 4) and Diogenes Laertius (*Vita Philosophorum* 1.27); for Plato, see his (*Symposium* 178b; *Timaeus* 53b, et al.). One of the best discussions of ancient philosophical speculations about atomism remains Lucretius, *De rerum natura* (l.159ff, 2.62ff); for a modern introduction, see J. Barnes's *Early Greek Philosophy* (1987), R. B. Lindsay's "Pierre Gassendi," and G. B. Stones's "Atomic View."

³³⁵ Edwards (*Discourse* 1:92). Aristotle (*Metaphysica* 12.6.1071b, 26–27, and esp. 14.4.1091b, 5–12).

³³⁶ Edwards (*Discourse* 1:93). Gen. 1:4–7. "Erebus" and "Caligo" respectively suggest "the underworld," "darkness," "gloom," or "thick vapor" (see f. e., Lucretius, *De rerum natura* 5.649, 6.852). For the old concept of the aether (upper atmosphere, abode of the gods), born from Night, see Hesiod (*Theogonia* 123–25).

³³⁷ Plutarch vindicates the Greek atomist Anaxagoras in *Plutarch's Lives* 3:10–12 (*Pericles* 4.4.1–10).

³³⁸ Edwards (*Discourse* 1:93). The Greek biographer Diogenes Laertius (3rd c. BCE) wrote a valuable collection of biographies on the ancient philosophers and their teachings. The passage here is a comment on Anaxagoras's doctrine, in *Vita philosophorum* (2.6.1–10).

Now, these Principles of the Pagans, must needs bee *Traditional*; and the fountain of the Traditions must bee, the Description which *Moses* has given of the *Creation*.³³⁹

[102v]

Q. Lett us add a Devout Remark or two, on some Circumstances in the History of the *Creation*? v. 31.

A. This I will do from my dear Doctor *Arrowsmith*.³⁴⁰

It is to be Remark'd, That *Heaven*, a Place of Blessedness, was made before *Earth*, a Stage of Vanity. To teach us, that we should begin our Search, our Love, our Desire, where God first began His Work; At *Heaven*. It is a preposterous Course taken, to begin with *Earth*. We are so directed, Matth. VI.33. *Seek first the Kingdome of God*. Every Soul that is *Baptised with the Holy Spirit & with Fire*, ha's a *Fire* in it, that will carry it up towards *Heaven*.³⁴¹

Another Thing to be Remark'd, is, That God made some things, which now depend upon others, before the Things upon which they depend. The *Light* now depends upon the *Sun*. Yett God made the *Light* before any *Sun*. The Growth of *Plants* now depends upon the *Rain*. Yett God made the *Plants*, when *the Lord had not caused it to Rain upon the Earth*. To teach us, That tho' Creatures

339 Edwards (*Discourse* 1:94). The Neoplatonist Simplicius (6th c. CE) comments on Anaxagoras and Aristotle's concept of Mind producing motion, in *Aristotelis physicorum libros commentaria* (10.1123.21–24). Mather (via Edwards) here translates a passage from Marcus Tully Cicero's *Academica priora* 2.37.118), which summarizes the atomistic theory of Anaxagoras. (See also Cicero's *De natura deorum* 1.26). The climax of Mather's excerpt from Edwards seems almost buried in the multiplicity of learned citations from the ancients. Notwithstanding the philological and philosophical challenges to the Mosaic hexaemeron, Edwards (*Discourse* 1:94) sums up his belief in *prisca theologia*, which most of his peers instinctively tried to uphold as well: "Now I ask, whence had they [ancient philosophers] this Notion concerning the Origine of the World? It is not a Principle in Philosophy; therefore they had it [from] somewhere else, which is the thing I am proving. Those Speculations and Theories concerning the Rise of the World, were not their own, but were Traditional Principles, *i.e.* they received them from the Antients, and these had them conveyed to them from the Bible. Their Philosophizing in this Matter was from that Divine Penman *Moses* . . . [T]hus the Writings of the first Heathen Philosophers, bear witness to the first and antientest Penman of the Old Testament" (*Discourse* 1:94). See esp. Theophilus Gale's *Court of the Gentiles* (1676), part II, bk. 1, chs. 1–4. For Edwards as for Mather, the etiological paradigm of true knowledge seems to remain constant in the best Renaissance tradition of *prisca theologia*: Moses is the oldest and most reliable source if properly decrypted. In one way or the other, pagan philosophers – Phoenician, Egyptian, Greek – all derived their religion and philosophy from the Hebrew Lawgiver, the prime conduit of divine metaphysics. Edwards devotes his huge *Πολυποικίλος Σοφία: A Compleat History . . . of Religion* (1699) to this subject, primarily to refute John Spencer's daring thesis (in *De Legibus Hebraeorum Ritualibus* [1685]) that Moses adapted many religious rites from his pagan neighbors. For modern discussions, see D. P. Walker's *Ancient Theology* (chs. 1, 5, 7), E. Iversen's *Myth of Egypt* (chs. 3–4), and J. Seznec's *Pagan Gods*.

340 The hortatory remarks in the following paragraphs are from ΘΕΑΝΘΡΩΠΙΟΣ [Theanthropos]; *Or, God-Man* (1660), by John Arrowsmith (1602–59), professor of divinity and master of Trinity College, Cambridge.

341 Arrowsmith, *God-Man* (49 # 1).

are subordinate unto one another, their chief Dependence is upon God. And when all Means fail, we may still depend upon God.³⁴²

A Third thing to be remarked is; That God, who was able to do all things in a Moment, nevertheless took *Six Dayes* to finish His Work of Creation. To teach us, the Necessity of Deliberation; of what Consequence it is, to *Take Time*, in Matters of Consequence.

Finally, Man was made, just before the *Sabbath*; and this that so the *First Work* he took in hand, might be the Worship of the God that made him. How Instructive this Remark!³⁴³

[103r]

Q. It will be some Accession to our Stores, if we take in Dr. *Ro. Hooks*, Explication of the *Creation*, & of the *Flood*, which in his *Posthumous Works*, published by the Ingenious Mr. *Ri. Waller*, we are entertain'd withal? v. 31.³⁴⁴

A. According to this Gentlemans Understanding of it, first, the *Central Earth* is in the *Mosaic* Account, represented as a *Vacuum*, and an *Abyss* enclosed with *Darkness*; That is, the *Water* followes next above it, which covered it all round on every side. Above this is the *Air*; and then the *Æther*, which is called by the Name of *Light*.

In the Fourth Verse, the Hebrew runs, *And God divided between the Light, and between the Darkness*. The LXX repeats the, *Ανα μεσον*. GOD caused a Twofold Separation; one in the Middle of the *Æther*; and another in the Middle

³⁴² Arrowsmith, *God-Man* (50–51 # 4).

³⁴³ Arrowsmith, *God-Man* (52–53 # 1, 5). Arrowsmith's comments on God's instantaneous (or protracted) creation are true to John Calvin's *Institutes* (1.14.2, 22) and *The Works of John Calvin* (1:78, 105) on Gen. 1:5, 2:3. Notwithstanding his allegorical reading, Arrowsmith is sensitive to the scientific debate about the sequence of the creative days in the Mosaic hexameron. Significantly, God created plants, herbs, and fruit-bearing trees on the Third Day (Gen. 1:11–12) *before* he created sun light (Gen. 1:14–19) on the Fourth Day and *before* "he had caused it to rain" (Gen. 2:5). Francis Turretin seems to sidestep the issue by concentrating on the instantaneous creation of fully grown plants and their seeds (Fifth Topic, Quest. 6, sec. 12–14), in *Institutes* (1:450–51). Simon Patrick quotes Rabbi Abravanel (Abarbanel) on Gen. 1:12, positing that while plants do "need the influence of the Sun, to make them sprout: But then [Third Day] they came forth by the Power of God, before there was any Sun, which was not formed till the next Day [Fourth Day]" (*Commentary* 1:5). Theophilus Antiochenus (*Ad Autolytus* 2.15) is, perhaps, the first to explain this scientific paradox as the Creator's deliberate attempt to thwart the vain philosophers of after ages who might exclude God by attributing all things to random chance and atomic elements: "In order, therefore, that the truth might be obvious, the plants and seeds were produced prior to the heavenly bodies, for what is posterior cannot produce that which is prior" (*ANF* 2:100). See also Porphyrius (*De abstinence* 2.5.12) and Eusebius (*Praeparatio evangelica* 1.9.28d) who argue that by necessity plants had to exist before animals.

³⁴⁴ Mather extracts his material from Richard Waller's "Lectures and Discourses of Earthquakes," in *The Posthumous Works of Robert Hooke* (1705) 413–15. Hooke (1635–1703), a renowned English physicist, experimental philosopher, and distinguished member of the Royal Society of London, was highly esteemed for his scientific and micrographic discoveries. His *Posthumous Works* were collected and edited by Richard Waller (c. 1660–1715), natural philosopher and secretary of the Royal Society.

of the *Darkness*, which covered the *Central Earth*; or the *Abyss*. This Covering of *Darkness* was the *Water*, which is often called, the *Abyss*. The former of these is afterwards and alwayes called, στερεώμα του ουρανού, *The Firmament of Heaven*; to distinguish it from the latter, which is called, στερεώμα εν μέσω του υδάτος, *The Firmament in the Middle of the Water*.³⁴⁵

The First Firmament, εν μέσω του υδάτος, seems to have been an hard, strong, solid, sphærical Shell, which encompassed the Ball of the *Central Earth*. This thick Shell was placed, in the Midst of the encompassing Water; as one would say, in the Midst of the White of the Egg: The circumferential half of it; being without the Shell; and the central half of it, within the Shell. At the First Creation, this was the Order. First, the Central Earth, was in the Middle; as the Yolk of the Egg. This was enclosed in Darkness, by the Water under the *Firmament*. By the hard Shell, there was a Separation made between half the Water that was under this *Firmament*, and half that was above it; which latter half was the Water upon which we read of the *Spirits Moving*. The whole *Globe* then was at this time covered with Water. – *Circumfluit humor ultima possedit, solidumque coeruit orbem*. This *Firmament* in the Middle of Waters, our *Hook* takes to be that which in many Places of the Bible, is called, *The Foundation of the Earth*. See, Psal. XXIV.2. Prov. III.19. Job. XXXVI.6.³⁴⁶

This *Firmament* or sphærical Shell, we may suppose was in many Places raised or forced outwards, and some other Parts were pressed Inwards, or Downwards, and sunk Lower; *When God commanded the Waters under the Heaven, to be gathered together into one Place, & the dry Land appear*. By depressing in of several Parts of the sphærical Shell, to make room for the Reception of the Waters, which before covered the Whole, other Parts must be thrust out, the Contents within being the same, & so requiring æqual Space or Extension. What went below the former sphærical Surface, must be æqualed by other Parts ascending without that Surface, and so the Quantities of the Waters, both those within it, and those without it, remained each the same, and still distinguished and separated by this *Firmament in the Middle of the Waters*, tho' altered from the *Spherical Figure* of it; And the Outward Surface of the Outward Water, as

345 Hooke, *Posthumous Works* (413). The Greek passages from the LXX “ana meson” (Gen. 1:6, 7) signifies “middle between” and “stereōma en mesō tou hudatos” translates “a firmament in the midst of the water” (Gen. 1:6–7). Even though Waller’s edition of Hooke’s *Works* supplies the diacritical marks, Mather elects to omit them in his excerpt.

346 Hooke, *Posthumous Works* (413). The metaphoric comparison of the earth enveloped in darkness under the firmament to the yolk and white of an egg is not entirely accidental because it alludes to the primordial cosmic egg of Orpheus. See Proclus’s *In Platonis Parmenidem commentarii* (7.168) and *In Platonis Timeum commentarii* (2.117), as well as *Clementine Homilies* (6.3–4) and *Recognitions of Clement* (10.17, 30). The Greek passage from the LXX “en mesō tou hudatos” reads “in the midst of the Water” (Gen. 1:6). The Latin passage from Ovid’s *Metamorphoses* (1.30–31) means “The streaming water took the last place of all, and held the solid land confined in its embrace.”

well as the Inward Surface of the Inward Water, must remain sphærical; because of the Power of Gravity.

In such a State the *Earth* continued until the *Flood*. And this was produced by the Opening of the *Two Firmaments*. As for the *Firmament*, εν μεσω του ουρανου, the Opening of that was in a *Rain* for Forty Dayes. As for that εν μεσω του υδατος, there was a Sinking of that Inwards, with an Opening of a Passage for the Waters within to flow out upon it, until it was gott in seventy five dayes more, to the Level wherein it was at the Creation. But then, by Degrees, there was | a Rising of other Parts by Degrees, as much above the Waters, as they had been below it. So that which had been the bottom of the Sea, became Dry Land, as what had been Dry Land, was now become the Bottom of the Sea.³⁴⁷ [104v]

³⁴⁷ Hooke, *Posthumous Works* (414, 415). The Greek passages from the LXX “en mesō tou ouranou” and “en mesō tou hudatos” signify respectively “in the midst of the Heaven” and “in the midst of the water” (Gen. 1:6, 8). Again, Mather omits the vocalization marks, though they do occur in his source.

Q. On the *Lords Resting* after the *Creation of Man*? v. 2.

A. It is a sweet Remark, made by my excellent Friend, Mr. *Boehm*, in his, *Enchiridion Precum*. – *Quem ad modum Tu Deus ac opifex noster omnipotens, in nulla creatura, præterquam in Homine quievisti; (nam hoc creato quievisti ab operibus tuis) ità nec Anima humana in ulla creatura Requiem invenit, nisi in TE solo creatore.*¹

3367.

Q. What is the Meaning of the Double Expression, *created and made*? v. 3.

A. In the Hebrew tis, *created to make*. For God *created* something at first out of which to *make* all the rest in the *Six Dayes Work*.²

3368.

Q. The Place & the Time, wherein the Creator of the World, who had hitherto been called, only, *God*, comes now to be called, *LORD God*, what is there observable in it? v. 4.

A. It is observed by *Tertullian*; *Exinde Dominus, qui retrò Deus tantum*, – From hence forward He is called, *LORD*, who hitherto was called only, *GOD*.

And it is the Observation of the Hebrew Doctors, That *Jehovah Elohim*, *LORD GOD*, is the *Full & Perfect Name of God*; and therefore fitly reserved until this Place, when the Works of God were *perfected*.³

1 Mather quotes from *Enchiridion Precum, Ad Promovendum Solidioris Pietatis* (1707) 62–63, a collection of sermons by the German Lutheran Pietist preacher Anton Wilhelm Böhme (Boehm, Boehme) of Halle (1673–1722), who represented the Society for Promoting Christian Knowledge (SPCK) in London. Boehm's *Enchiridion Precum* went through three editions (1707, 1709, 1715), and Boehm here praises God's creation: "You, our Almighty God and workmaster, did not take rest in any creature but in man (for it was after the creation of man when You recovered from Your labors); likewise, the human Soul does not find Rest in any creature but in You, the sole creator." Evidently, Mather was fond of this work, for on Oct. 7, 1716, he pledged in his *Diary* (2:376) to read in Boehm's *Enchiridion precum* "every morning, before I rise" and to translate paragraphs for his consort into English. Likewise, he encouraged his son Samuel to "read unto me, into English, the *Adspirations*" in Boehm's work (*Diary* 2:379). Mather (*Diary* 2:332–33, 563) was on friendly terms with Boehm and through him forwarded to the German Pietist August Hermann Francke "some scores of American Treatises, besides a few small presents of Gold, unto the Orphanotropheum." See also *Diary* 2:348, 364, 406–07, 411–13, 582. For Mather's promotion of German Pietism and his relationship with Francke of Halle, see K. Francke, "Beginning" and R. Lovelace, *American Pietism* (1979), ch. 2.

2 Extracted from Simon Patrick, on Gen. 2:3 (*Commentary* 1:10).

3 Simon Patrick, on Gen. 2:4 (*Commentary* 1:10). In his *Adversus Hermogenes* (3.3), Tertullian argues, "from then on [i.e., Gen. 2:7, 8, 9 etc.] [He is called] Lord, who until then was only [called] God" (*ANF* 3.3.478). The Soncino Midrash Rabbah (Gen. XIII:3, n2) agrees, for it

[106v]

4199.

Q. Is there any special Remark, that the Hebrewes have upon the Hebrew Word used here; when it is said, *The Lord God FORMED Man?* v. 7.

A. 'Tis observed by them, and others, That the Word יָצַר has a Double *Jod* in it, whereas Regularly it should have been with a Single *Jod* and a Double *Tzere*; as it is written, when the Creation of the *Beasts* is mentioned. They suppose tis to intimate a double Work of Creation employ'd upon Man; *Terrenam, Corporis; et Caelestem, Animæ*. It is a Note of R. *Salomon. Duo Jodin duo notant sæcula, Præsens et Futurum. Homo autem conditus est ad utrumque sæculum: Bestiæ ad præsens solummodò.*⁴

3369.

Q. We find, The Lords *Putting of Man into Paradise* here mentioned; And anon, *Seven Verses* hence, we have it mentioned over again. May there be any Mystery in That? v. 8.

A. *Theophilus Antiochenus* thinks there is. He takes it for a mysterious Intimation, That after *Man* was cast out of one *Paradise*, he should still have a Right unto another; *By being well instructed in his Banishment, & prepared for a Restitution, at the General Resurrection, and New Creation.*⁵

[107r]

Q. The *Gold of Havilah?* v. 12.

confirms Mather's citation from Patrick that "Lord God" was the full name of God and was mentioned here (Gen. 2:7) for the first time because his creation was complete. R. Solomon Jarchi, aka. Shlomo Yitzchaki (1040–1105), better known by his acronym *Rashi*, adds another variant: "Elohim JHWH" signifies "Ruler and Judge over the entire world" (*Mikraoth Gedoloth: Genesis* 1:37). Rashi's mystical readings (Gen. 1:1) further suggest that "Lord God" signifies God's attributes of "Mercy," "Justice," and "Eternity." R. Maimonides (Rambam) adds "Faith" as a fourth principle (*Guide* 1.61.89–91).

⁴ Mather draws attention to the different spellings of יָצַר [yatsar] "to form, fashion, frame" [Strong's # 3335] in Gen. 2:7 and 2:19. In the former, where God forms man יָצַר [way-yitzer] "and formed" (Gen. 2:7), the phrase has two yods [י], but only one when God formed beasts (Gen. 2:19), יָצַרְתָּ. (Mather means "Double *Zadde*" (צ), not "*Tzere*.") The double creation of "the body from the dust [earth] and the soul from the spirit," one for this world, the other for the resurrection, is suggested by Rashi on Gen. 2:7. See also Tanchuma (Tazria 1), in Midrash Tanchuma (5:211–12). Typologically, "Two *Jods* denote two ages, present and future. Man, however, is made for one and the other age; animals only for the present" (see Midrash Rabbah, Gen. XIV:3, 5).

⁵ Mather's immediate source is Simon Patrick on Gen. 2:8 (*Commentary* 1:11). Theophilus Antiochenus (*Ad Autolyicum* 2.26) asserts God's "great kindness" in expelling Adam from paradise, because in his banishment, man could expiate sin "within an appointed time" and be returned at the resurrection: "When man had been formed in this world, it is mystically written in Genesis, as if he had been twice placed in Paradise; so that the one was fulfilled when he was placed there, and the second will be fulfilled after the resurrection and judgment" (*ANF* 2:104).

A. Tis, I think, hardly worth while, to offer a Thought of old Sir *John Pettus* upon it.

The *Gold* was *Good*, you must suppose, in the First Innocency of Times. However, we hear no more of *Gold*, in Holy Writt, until near Three Thousand Years after *Adam*; tho' it was counted, *The Golden Age*. It seems, tis something better than *Gold*, that makes a *Golden Age*.⁶

3092.

Q. What is the *Bdellium*, which is mention'd in the Description of *Paradise*? v. 12.

A. It hath been somewhat observed, That *Pearls* are so often mentioned in the *New Testament*, and so rarely mentioned in the *Old*. But the Incomparable *Bochart* ha's demonstrated, that it is oftner mention'd than ha's been imagin'd; and very particularly, That what we render *Bdellium*, is to be rendred, *Pearls*.⁷

The *Bdellium* in the Land of *Havilah*, is doubtless no other than *Pearl*. For that Land is a Part of *Arabia*, near *Catipha*, and *Bahara*, which is famous for the Fishing of *Pearl*. The River *Pishon* which washes that Land, is a Branch of *Euphrates*, which *Peter Teixeira* an Ey-witness, affirms to run into the *Persian Gulph*, at *Catipha* near *Bahara*. And there is that most celebrated *Pearl-fishery*, which is described by him, and others; especially by *Alkazuinius*, in his Chapter, *De Insulis Maris Persici*. Yea, that the Matter may be yett more incontestable, *Benjamin* writing of *Catipha*, describes the Manner of the *Fishing* for *Pearl* there; but for the *Pearl* he uses the very Name of *BEDOLACH*. And *Kalonymus*,

6 Sir John Pettus (1613–90), deputy governor of the royal mines of Wales, England, and Scotland, authored *Volatiles from the History of Adam and Eve* (1674). Sir Pettus offers a standard alchemical assessment of the gold, bdellium, and onyx mentioned in Genesis (2:12), but his empiricism leads him to dismiss the more wishful speculations about the Philosopher's Stone: "There are three eminent stones in the nature of minerals, which were known to *Adam*; the one is a stone that hath a virtue of transmutation of metals, and possibly this may be meant by gold; the other hath a virtue to discover the quality of all Sensibles and Vegetables, and this may be meant by *Bdellium*; and the third of a more transcending nature, by imparting to us all Angelical operations, and this may be meant by *Onyx*: But whether or no there were or are such stones by nature or art, the fruitless labours of others shall cease my further inquiry" (*Volatiles*, pt. I. p. 38, § 19). The perfections of the Golden Age in ancient times are celebrated in Ovid's *Metamorphoses* (1.89–112), but Mather is more interested in its literal accomplishment at the Second Coming than that of the ancients. See also Mather's discussion in *Threefold Paradise* (103–04).

7 Among Mather's immediate sources are Samuel Bochart's invaluable *Hierozoicon Sive bipertitum opus De Animalibus Sacrae Scripturae* (pars 2, lib. 5, cap. 5, col. 673–74) and Matthew Poole's *Synopsis Criticorum* (1:23) on Gen. 2:12. Mather had access to the Franeker 1675 edition of Bochart's *Hierozoicon* at Harvard (*Catalogus* 6) and perhaps prefers Bochart's translation of "*bdellium*" and "*bedolach*" as "pearls" because they seem to be much more valuable than the aromatic, white, and transparent resin exuded from the *Borassus flabelliformis* tree mostly growing in Arabia Petraea and Babylonia; other translators render "*bdellium*" as "crystal" or "amber" (Simon Patrick, *Commentary* 1:13).

another Hebrew Writer, *De Naturâ Animalium*, describes how the *Pearl* grows in the *Shell*; but uses the Name of BEDOLACH for it.⁸

Bochart having thus fish'd for *Pearl*, & found them in the *Shell* of the Name, which is in our Version, *Bdellium*, he gives | the Notation of the Name. [108v] He inclines to think, that the Final /ח/ *Cheth* is paragogical, and that /בדלח/ *Bedolach*, may come from the Verb, /בדל/ *To Segregate*, and *Separate*; and the Glory of the *Pearl* is therein agreeably intimated.⁹

If we should be content, That the *Bedolach* in the Land of *Havilah*, should be the *Bdellium*, yett the Resemblance of the *Manna* to it, (Num. 11.7.) altogether forbids that Apprehension. The *Bdellium* is commonly *Black*; nor shall you see it in *Round Grains*, but in ruder *Clotts* and *Lumps*. Whereas the *Manna* was *White*, and *Round*, and *Small*, and might admirably well be resembled unto *Pearl*. Nor is this a New Thought; For the *Talmudic Doctors* explaining this Place, (in *Joma*, c. 8. fol. 75. a.) say, The *Manna* was *Round*, like the *Coriander*, and *White* כמרגלית *As the Margarite*. The *Arabick Versions*, do countenance this Translation; for *Bedolach*, they have, *Allulu*, which is, *The Pearl*. And *Aben Ezra*, on *Genesis* ha's this Passage, *Dixit* (Saadiah) Gaon, voce BEDOLACH *Lapillos rotundos designari ex Aquis educi solitos, quibus, quia tenues sunt; Mannæ grana conferuntur*. And *Kimchi* saies, *Sunt qui dicunt lapidem esse Album, et Rotundum*,

⁸ The entire paragraph is extracted and translated from Bochart's *Hierozoicon* (pars 2, lib. 5, cap. 5, col. 674–79), who supplies the pertinent Arabic and Hebrew excerpts from the authors to which Mather here refers. Pierre-Daniel Huet (1630–1721), bishop of Avranches and classical scholar extraordinaire, provides a detailed discussion of this issue in his *Treatise of the Situation of Paradise* (1694), chs. 10–11, pp. 91–102. The Portuguese traveler Pedro Teixeira of Lisbon (c. 1570–c. 1640) published an account of his journey by land to India (c. 1600) as *Relaciones de Pedro Teixeira* (1610). An English translation appeared as *The History of Persia* (1710). Teixeira's reference appears in *The Travels of Pedro Teixeira* (ch. 3, pp. 25–26). For Bochart's reference to Teixeira see *Hierozoicon* (675). Bochart quotes from Alkazuinius (an Arabic writer) in the original tongue, but supplies a Latin translation and reference to the chapter “De Insulis Maris Persici,” in *De Naturae Mirabilis* (*Hierozoicon*, pars 2, lib. 5, cap. 5, col. 675, 678). The medieval Jewish traveler Benjamin (Rabbi Ben Jonah) of Tudela, Navarre, Spain (fl. 1150–1200) recounts his journey through Italy, Greece, the Ottoman Empire, Arabia, and all the way to India and beyond, in his famous *Sefer ha-Massa'ot* (Constantinople, 1543), the Latin edition of his *Itinerary* was printed in Ferrara (1556) and subsequently translated into virtually all other European languages. For his account of pearl-fishing at Catipha (El-Katif), near Bahrain, see his *Itinerary* (89). Kalonymus is probably Kalonymus ben Kalonymus or Ben Meir Ha-Nasi (c. 1286–1337), a notable Jewish scholar, who translated into Hebrew a number of Arabic works on medicine, philosophy, and astronomy (*EJ*). Kalonymus's *De Natura Animalium* is extracted out of Abulsapha, in *Libro Hebraeo manuscripto*.

⁹ The paragraph is extracted from the chapter summary of Bochart's *Hierozoicon* (pars 2, lib. 5, cap. 5, col. 674). The paragogical “heth” is a final letter or syllable added to a word to qualify its signification. And the Hebrew verb בָּדַל [badal] [Strong's # 914] suggests indeed “to divide,” “separate,” or “distinguish.”

*ex quo perforato, et cum alijs similibus consociato torquem efficiunt; which is in short, A Pearl-necklace.*¹⁰

Q. Tis said, *The Lord God Took the Man*. How did He *Take* him? v. 15.

A. Compare Psal. 78.70.

As a Prophet was sent from God, for the Anointing of *David*, when He *Took* him; so tis probable, as Dr. *Patrick* thinks, That God Himself appeared unto *Adam*, in a visible & glorious Majesty, which the Jewes call, The SHECHINAH, because it was a *Token of the Special Presence of God*, & by it *He dwelt among His People*. It seems to have been a very *Shining Flame*, or an amazing *Splendor of Light*, breaking out of a Thick *Cloud*. We often read of it, under the Name of, *The Glory of the Lord*. [see Exod. 3.2.] Probably, This Divine Majesty conducted *Adam* from the Place, where he was formed, into the Garden of *Eden*.

It is likely, That the Creatures were brought unto *Adam*, by the Ministry of *Angels*, who were perpetual Attendants upon the *Shechinah*.¹¹

[109r]

¹⁰ The entire paragraph (including the translated citation from the Talmudic tractate Yoma [Joma] and the Latin quotations from Aben Ezra, Saadiah Gaon, and Kimchi) is extracted from Bochart's *Hieroicoicon* (pars 2, lib. 5, cap. 5, col. 678–79). R. Ammi and R. Assi are the Talmudic doctors who disputed the shape and color of coriander (“gad”), the former insisting that manna was like coriander, the latter that “it was round like a seed [of coriander] and white like a pearl” (Soncino Talmudic tractate Yoma 75a). The Hebrew term כמרגלית [chamargalith] signifies “like margalith” (“margarite”), an Indian pearl. For the Arabic version of Gen. 2:12, Bochart (678) relies on La Jay's *Polyglot Bible* (Paris, 1629–45), which is considered to be less accurate than Brian Walton's *Biblia Sacra Polyglotta* (1:9). Ironically, both the Syriac and Arabic versions in Walton's famous edition translate “bedolach” not as “pearl,” but as “crystal stone” (*Biblia Sacra Polyglotta* 1:8–9). The famous Spanish Rabbi Abraham Ibn (Aben) Ezra (1089–1164) of Tudela, biblical commentator, philosopher, and physician quotes Gaon Saadiah ben Joseph (882–942), the leading scholar of the academy in the post-Talmudic period in Babylon. Ibn Ezra's commentary on the Pentateuch (*Sefer ha-Shem*) survives only in fragments (Genesis and Exodus). For Ibn Ezra, Gaon Saadiah, and David Kimchi, Bochart (678–79) most likely drew on Daniel Bomberg's famous *Biblia Rabbinica* (1516–17), which set the standard for reprinting the classical commentaries in the margins, or the widely available *Tiberias, sive Commentarius masorethicus triplex* (1618), by the German Hebraist Johann Buxtorf, the elder (1564–1629), who includes several medieval Jewish commentaries. (See Burnett's *Christian Hebraism* 203–39). Furthermore, Buxtorf's *Lexicon Hebraicum et Chaldaicum* (1621) would have been available as well as David Kimchi's famous Hebrew dictionary *Sefer ha-shorashim* (1546, 1564), edited and translated by the German Hebraist Sebastian Münster (1489–1552); see also B. Hall, “Biblical Scholarship” (3:52–54). At any rate, Ibn Ezra's Latinized quotation from Saadiah Gaon suggests, “Saadiah Gaon renders BEDOLACH” (bedellium) as follows: “This denotes round stones [pearls] usually extracted from water, with which, because they are fine, grains of manna are compared” (see Ibn Ezra's *Commentary* 1:56). And Bochart's Latin translation from David Kimchi's commentary on Gen. 2:12 reads, “Some say that the stone is the white, round one which is pierced, put with others like it, and made into a [pearl] necklace” (see *Hachut Hameshulash* 1:93).

¹¹ Extracted from Simon Patrick on Gen. 2:15, 19 (*Commentary* 1:13, 15).

3427.

Q. The Name of *Adam*, what Intimation, hitherto not much observed, may there bee given to us in it? v. 15.

A. The Import of the Hebrew Word, *Adam*, is not only, *Rubuit*, Hee was *Red*; (and so *Adam* is as much as *Edom*, which was the Name of *Esau*, for his *Ruddy* Complexion, Gen. 25.25.) but it is of a larger Signification, and is as much as to say, *Splenduit*, Hee *Shone*. Thus the Word, *Adamdameth* (Lev. 13.19.) is to be rendred, *Shining*, or *Glistering*. Sometimes *Adam* is as much as, *Formosus fuit*. Thus of the Healthy *Nazarites*, wee read, Lam. 4.7. *Nitidi fuere*. It is noted of *David*, That hee was *Admoni* (1. Sam. 16.12.) *Ruddy*, that is to say, *Beautiful*. Compare Cant. 5.10.

Bochart remarks, that *Adam* is in the *Arabic* Language, *Splendere*. And *Ludolphus*, that in the *Ethiopic* Language, tis, *Pulchrum esse*. Thus in the Latin Tongue, (as Mr. *Edwards*, who now helps mee, observes,) *Rutilare* is the same with, *Splendidum esse*; and *Purpureus* is the same with *Splendidus*.

Other *Animals* were formed out of, *Aretz*, the common Earth; but *Adam* was formed out of, *Adamah*, a more shining Earth: (*E meliore luto*;) yea, out of the *Dust* of this Ground, the finest, purest, & most agile Part of it. Behold, the true, *Terra sigillata*, Earth with the *Image* of God enstamped on it.

If I had not hoped, That from this Illustration, you would Raise very Rare Thoughts, concerning the *Body* of our *Lord-Messiah*, and the *Resurrection-Body*, as well as the *Body* of the *First-Adam*, you should not have had it.¹²

1888.

Q. In the Lords Threatning of Death to Man, upon his Eating of the *Forbidden Tree*, was there any Room left, for a *Surety* to undergo this *Death*? v. 17.

A. Doubtless.

¹² In his "Note Book of Authors and Texts Throughout the Bible" (1720), vol. 1 (Gen. 2:15), Mather identifies as one of his source *The Husbandmans Calling* (1668) 1 (i.e., § 1, pp. 1–5), by the English nonconformist divine Richard Steele (1629–92). However, Mather also draws on Hiob (Job) Ludolphus (1624–1704), a German polymath who authored one of the first lexicons (1661) and grammars of Amharic (1661), the language of Ethiopia. Bochart's etymology of the term "Adam" is discussed in *Geographia* (pars 2, lib. 2, cap. 2, col. 706–07); Ludolph's etymology appears in his *Historia Aethiopica* (1681), lib. 1, cap. 15, (English translation: 1682, bk. 1, ch. 15, p. 77), and in his *Commentarius* (1691) xv. See also Patrick's *Commentary* (1:14–15, on Gen. 2:19). Adam's appearance ("*Formosa fuit*") "was beautiful," and the healthy Nazarites ("*Nitidi fuere*") "have been shining." The Latin phrases "Splendere" and "Pulchrum esse" mean respectively, "to shine," "be bright" and "to be beautiful." Mather also consults John Edwards's *Discourse* (1693) 1:95–117; 2:219. "*Rutilare*" and "*Splendidum esse*" as well as "*Purpureus*" and "*Splendidus*" signify respectively, "to be reddish" or "to have a reddish glow" and "to be shining," "purple-colored," and "shining." Adam was formed out of "*Adamah*" ("*E meliore luto*"); i.e., "out of better" or "finer dust" or "clay." The true "*Terra sigillata*" literally signifies "earth adorned with a figure."

And there is a notable Confession of a Jew to this Purpose, in, *Midrasch Kobleth*; on Eccl. 7.14. R. Judah there introduces the Blessed God, as charging of *Adam*, to forbear meddling with the *Forbidden Tree*, and using this Argument among the rest. If you do eat of it, *Eris illi Justo occasio mortis*, you'll bee the Death of the *Just One*. But now, *The Just One*, is the Name of the *Messiah*.¹³

4205.

Q. The *Wife of Adam* is provided as an *Help*, to be *Before Him*; What may be the Import of that Expression? v. 18.

A. Hear what *Munster* saies; *Voluit Dominus, per id significare, quòd uxor semper et ubique debet esse coram marito; non sicut Brutalis Fœmina, quæ semel in Anno querit virum, et non perpetuò cohabitavit viro suo; sed uxor cohabitavit semper, tanquam caro una.*¹⁴

1515.

Q. What may wee observe upon the Lords *bringing* the Creatures unto *Adam*, *To See what hee would call them*? v. 19.

A. Tho' the Generality of Interpreters, carry it otherwise, yett wee will observe this; *To See*, refers not unto *God*, but unto *Adam*. The Creatures were brought unto *Adam*, that *hee* might first *See* them, & so *Name* them. The Almighty *Knew* sufficiently aforehand, what *Adam* would call them all. Now, tho' some of their *Names*, do signify no more than their external and visible Qualities, yett there was an Instance of Sagacity, thus at the *First View* to putt such *Names* upon them. Yea, tis probable, that some of the *Names* are now forgotten, or at least, the Original, Ancient, Primitive *Signification* of the *Names* may bee forgotten.¹⁵

¹³ In his "Note Book of Authors" (vol. 1), on Gen. 2:16,17, Mather identifies as his source "M. Exercise at Giles, p. 109"; i.e., *The Morning Exercise Methodized* (1660) 109, "Sermon 6: The Covenant of Works," preached by a "Mr. [William] Cooper"; a collection of twenty-eight sermons by several London ministers, edited by Thomas Case (c. 1598–1682), an ejected nonconformist minister at St. Giles-in-the-Fields, London (*ODNB*). Mather draws on the same collection in his commentary on Gen. 42:21 (below). The second work is *Discourse of the Two Covenants* (1678) 1, by William Strong (d. 1654), an Independent minister who gathered a congregation at Westminster, London. If these works served as his original inspiration, then Mather must have abandoned them during a later revision process and opted instead to quote R. Judah's comments in Midrash Koheleth, aka. Midrash Rabbah Ecclesiastes (Koheleth) 7:4 (not 7:14), although it occurs in a different context: R. Judah teaches that "if one repudiates an obligation of benevolence [respect for the dead], it is as though he repudiated the cardinal doctrine [of God's existence]."

¹⁴ In his commentary on Gen. ch. 3 (*Hebraica Biblia*, 2 vols. [1546] 1:7, annot. 9), Sebastian Münster states, "In order to demonstrate this, the Lord decreed that the wife should be at the side of her husband always and everywhere, unlike the female brute, which seeks its male mate once a year and does not stay with it perpetually; but the wife should always stay with her husband, as if they were one flesh."

¹⁵ A similar interpretation of Gen. 2:19 appears in Patrick (*Commentary* 1:14–15) and in Matthew Poole (*Synopsis Criticorum* 1:28).

Q. For the Formation of the *First Woman*, what may be the most probable Account of the Matter? v. 20.

A. Some sagacious Men have thus apprehended it. The Word, *Zelah*, which we translate, a *Rib*, is not in the Signification of it restrained unto any one *Bone* in the whole Humane Fabric. But the *Bone* that has the Best Claim to the Term, {is} in the *Backbone*; in which also is found the famous *Luz*, which the Hebrews talk of. The *Spina Dorsi* is the First Thing visible in an *Embryo*; and the *Carina* of the *Fœtus*; Anon the *Cerebrum* & *Cerebellum* appear, which are as Appendices to it; Then the *Salient Point* of the *Heart*; And so the *Thirty Pair* of *Nerves* that come out between the *Vertebres*, proceed with their Influences; and with them there goes forth from the Medullary Matter in the *Spina Dorsi*, which is the Foundation of our whole Corporeal Substance, that from whence the muscular and carneous Parts are propagated, & have their Nutriment. Now, to produce a Consort for *Adam*, our *First Father* (who was Father to our *First Mother* too) was, by the great *GOD who formeth all things*, thrown into a *Deep Sleep*, or, *Deliquium* and *Extasy*; wherein his whole Animal Oeconomy was thrown into a sort of *Digestion*, and had a Degree of *Resolution* brought upon it. From *Adam*, even from every Part of his *Body*, but originally from that *Bone*, and probably not without an *Image* of the whole Shape at the same time formed in his Mind, there was *extracted*, [How discharged, *GOD knows!*] the Matter, that was quickly wrought up into the *Body* of an *Help Meet* for him. The Proceeding of this Operation, might well be called, an *Opening* of a *Side*, and the Finishing of it called, a *Closing* of it. And thus, the *First Adam* had one that was *Bone of his Bone*, and *Flesh of his Flesh*, brought unto him.¹⁶

Compare now, Eph. v. 30, 31, 32.

¹⁶ For the same material, see Mather's *Threefold Paradise* (265) and *Christian Philosopher* (Essay XXXII, p. 284). The "Spina Dorsi" is the backbone; "Carina" is "a genus of Heteropodous Molluscs, having a delicate shell of glassy translucency which protects the heart and liver" (*OED*). The "Cerebrum" is the anterior part of the brain, whereas the "Cerebellum" is "the little or hinder brain, situated behind and below the cerebrum, and above the *medulla oblongata*" (*OED*). The "Salient Point" (*Punctum saliens*) is an archaic term for "the heart as it first appears in an embryo; hence the first beginning of life or motion" (*OED*). And the "Medullary Matter" is the spinal marrow, which was believed to provide the nutrients for the muscular and carneous parts of the body (*OED*). Mather's knowledge of human anatomy and diseases is well known; his *Angel of Bethesda* (publ. 1972) is one of the first medical handbooks in colonial America. Among the relevant sources for embryology – all quoted in *Angel of Bethesda* and in *Christian Philosopher* – are (1) *Joannis Fernelii Ambiani Universa Medicina*. Pars 1, Physiologiae, lib. 7 (1619), by Jean Fernel (1497–1558), French physiologist and physician to Henry II of France. Fernel was among the first to describe the functions of the heart and the spinal canal. Mather's relevant discussion appears in Fernel's *Universa Medicina* (Pars 1, lib. 1. cap. 2–3, pp. 2–11, esp. p. 4). (2) *Anthropologia Nova; Or, A New System of Anatomy*, 2 vols. (1707), by James Drake, MD (1667–1707), an English anatomist and Fellow of the College of Physicians of the Royal Society, whose pertinent discussion appears in Vol. 2 (lib. 3, cap. 5–8, pp. 493–524). And (3) *Historiarum Anatomicarum et Medicarum rariorum centuria I–VI*. 3 vols. (1654–61), by Thomas

3371.

{What} sort of a *Sleep* was that, which came upon *Adam*, when *Eve* was to be formed out of him? It has been long since, the Opinion of the Learned, That It was a *Sleep* accompanied with an *Ecstasy*, [so the LXX translate this Word; see also, Job. 4.13.] wherein was repræsented to his *Mind*, both what was done to him, & the *Mystery* of it.¹⁷

3372.

Indeed, What *Rib* of *Adam* is it likely afforded a Body to *Eve*; *Tho. Bartholinus*, a late famous Physician, thinks it probable that *Adam*, had XIII Ribs on each Side, and that the Great Creator took *One Pair*, with the Musculous Parts that adhære to them; and made *Eve* out of them. Commonly Men have no more than XII *Ribs*, tho' sometimes there have been found, (as *Galen*, and *Riolanus* upon him, testify) those who have had XIII; And very rarely some who have but XI.¹⁸

But we have already given a more likely Account of the Matter.

Bartholin (1616–80), a Danish anatomist and physiologist. Mather owned a copy of Bartholin's 1661 edition (AAS # 0722A BW; Tuttle, "Libraries" 316). For Mather's contributions to American medicine, see O. T. Beall, Jr., and R. H. Shryock, *Cotton Mather* (1954) and G. W. Jones, M. D., "Introduction" to Mather's *Angel of Bethesda* (1972).

17 The relative pronoun {What}, canceled in the holograph manuscript, is here restored even though Mather replaces the canceled pronoun with the ungrammatical phrase "As for the." Mather's immediate source seems to be Simon Patrick on Gen. 2:21 (*Commentary* 1:15). For the same material, see his *Threefold Paradise* (265), where Mather explains "the *Mystery*" as Christ's restoration of the "Changed Saints" whose human bodies are to be immortalized and who are to replenish the earth with their offspring during Christ's millennial reign. Mather's juxtaposition of Gen. 2:21 with Job 4:13 (LXX) is amusing, for while the former suggests ecstasy, the latter employs the term "phobos" ("terror"). The Hebrew term "tardemah" is employed in both instances and indeed suggests "trance" and "lethargy" [Strong's # 8639].

18 Mather's source is Patrick on Gen. 2:21 (*Commentary* 1:15). Thomas Bartholinus tells the story of a young man who, upon his dissection in 1656, evinced eleven ribs on one side and only a stub as the twelfth on the other (*Historiarium Anatomicarum ... centuria V*. Vol. 3, cap. I: "Historia I: Undecim costae in thorace," pp. 1–3). Truth to tell, the disagreement about the true number of human ribs started among the ancients. For instance, the famous Greek physician of Pergamum Claudius Galen (*De anatomicis* 2:652.16) mentions that some men have thirteen (!) ribs on one side, even though Aristotle (*Historia animalium* 1.15, 493b, 14–15) had allowed only eight – evidently not counting the five "imperfect" ribs. Jean Riolanus (1580–1657), French professor of medicine, anatomy, and botany at the Royal College of Paris, published several pertinent works on human anatomy: *Anthropographia* (1626), *Encheiridium Anatomicum* (1648), and *Opera Anatomica* (1649). In his *Sure Guide* (1657), bk. 6, ch. 16, p. 275, Riolanus distinguishes between seven "true" and five "bastard" ribs on each side, but also agrees with Aristotle that often enough an eighth rib has been found during dissections. Amusingly, in *De humani corporis Fabrica* (1543), lib. 1, cap. 19, Andreas Vesalius of Brussels (1514–64), professor of anatomy at Padua, ridicules the venerable tradition of the Church that men have one rib less than women on one side because God had taken it from Adam to form Eve (Gen. 2: 22): "Granted that perhaps Adam's bones ... might have lacked a rib on one side," Vesalius wisely conceded, but "it does not necessarily follow on that account that all men

2032.

Q. Why was not *Eve* also fetched & formed out of the *Earth*, as well as *Adam*; but from a *Rib* of *Adam*? v. 21.

A. *Athanasius* gives an agreeable Reason for it; *ἵνα μὴ ἐχέσιν ἀφορμὴν λέγειν, ὅτι ἄλλο τὸ χῶμα ἐστὶ τοῦ Ἀδάμ, καὶ ἄλλο τῆς Εὐας*. That they might not have Occasion to say, That *Adam* was formed from one sort of *Dust*, and *Eve* was formed from another; and that the *Dust* of *Adam*, was more excellent than that of *Eve*; & that the Offspring accordingly took their Good Tempers from *Adam*, & their Ill from *Eve*.¹⁹

354.

Q. Give us, if you please, a little Touch by the by, upon this Passage about the Rib of *Adam*, relating to *Cheirurgery*? v. 21.

A. Dr. *Brown*, in his Treatise entituled, *The Garden of Cyrus*, ha's this little Touch upon it. *Cheirurgery* finds its whole Art, in that one Passage, concerning the Rib of *Adam*. For there are Three Things which that Art all turns upon; Διαίρεσις, which we see in the Opening of the Flesh; Ἐξάιρεσις, which we see in the Taking out the Rib; and, Σύνθεσις, which we see Closing up the Part again.²⁰

|

[111r]

641.

Q. What Pagan Traditions and Confessions, concerning the Production of our First Parents, agreeable to the *Scriptures*, can you find in any Monuments of Antiquitie? v. 25.

A. A Many.

From the Tradition of the *First Man's being made out of the Earth*, arose the Perswasion of many People, especially the *Græcians* (yea, and our *Britains* also)

are lacking a rib as well" (*On the Fabric of the Human Body*, bk. 1, ch. 19, p. 89 of the online edition). The Targum Jonathan ben Uziel, on Gen. 2:21 (Walton 4:5) explains that God took the thirteenth rib of Adam's right (dexter) side (Etheridge 2:163), but John Milton, though allowing a supernumerary rib as well, insists it was one from the left (sinister) side that he made the woman (*Paradise Lost* 8:465–66, 10:887–88). For background on this bone of contention, see A. D. White (*History* 2:49–55).

¹⁹ The citation from Athanasius of Alexandria, for which Mather provides a free translation in the following sentence, appears in *Quaestiones in Scripturam Sacram* [PG 28. 732–733, lines 55–56]. The Greek passage signifies, "That they will not have an occasion to say that this soil belongs to Adam and that to Eve." Again, Mather dispenses with the diacritical marks because they (like the Masoretic notations) were of a much later origin (*Manuductio* 29–30). Simon Patrick gives a much more benign explanation of this verse: "That God did not form *Eve* out of the Ground, as he had done *Adam*; but out of his Side: That as he might breed the greater Love between him and her, as Parts of the same Whole" (*Commentary* 1:15).

²⁰ Mather excerpts this paragraph from Sir Thomas Brown's *Garden of Cyrus* (1658; 1668), ch. 1, p. 33. The Greek words "Diairesis," "Exairesis," and "Synthesis" – all in Brown's marginal annotations – signify "a dividing," "a way of taking out," and "a putting together," in *Works* (3:148).

That they were *Αυτοχθονες*, or, *Born of the Earth* which they *Lived* upon: And in Memory of this, they wore golden *Grasshoppers*, being styled also, *Tettigophori*, which *Animal* was reckoned to have the same Original.²¹

The *Terrestrial Extraction* of the First Man, is often mentioned by *Plato*; and *Censorinus* tells us, It was held by *Empedocles*; *Laertius* tells us, It was held by *Zeno Eleates*.²²

It is a notable Passage, which *Tacitus* relates, of the *Germans*; *Celebrant Carminibus Antiquis*, (*quod unum apud illos Memoriae et Annalium genus est*) *Tui{s} tonem Deum, Terrâ Editum et Filium Mannum, originem gentis conditoresque. Tuit*, or *Thuit*, is the same with *Θεος*; *Mannus*, or *Man* (which is German, for *Vir*) is *Adam*, the *first Man*; who was the *Son of God*: And the reason is here given; Because hee was made by Him, out of the *Earth*: Hence, the ET here, seemes Transposed; it should be placed before, *Terrâ Editum*.²³

The *Greek Poets*, *Orpheus*, *Hesiod*, *Homer*, testify this Thing. From these, the *Latines* borrowed it. *Juvenal* thus describes the Original of the First People;

Compositique luto nullos habuere parentes.

But *Ovid* conforms to *Moses* exactly.

*Sanctius his Animâ, mentisque capacius altæ,
De erat adhuc, et quod dominari in cætera posset;
Natus Homo est.*²⁴

21 This and the subsequent paragraphs [111r–114v] are again extracted from John Edwards, *Discourse* (1:95 ff). The Greek “*Autochthones*” suggests “indigenous,” “native,” and “sprung from the land” and is used in this signification by Herodotus, Thucydides, and others. Aristophanes (*Equites* 1331; *Knights* 1:397) has his sausage seller poke fun at the Athenians who are given the epithet *Tettigophori* because they wear a golden grasshopper (or rather a cicada) on their clothing. For their mythic origin, see Clemens Alexandrinus (*Protrepticus* 1.1; *Exhortation to the Heathen*, ch. 1), in *ANF* (2:171).

22 Edwards, *Discourse* (1:96). Plato relates in *Critias* (109c–d) how Hephaestus and his sister Athena fashioned “good men” from the land they had received as their portion from their father Zeus. In his *De Die Natali Liber Ad Q. Caerelium* (4.7–8), the Roman grammarian Censorinus (3rd c. CE) alludes to the story of Deucalion and Pyrrha in the debate between Anaximander Milesius, Empedocles, and Lucretius, and affirms man’s origin from the dust of the earth. Empedocles’s *Fragmenta* (Fragm. B 21.3–12) says much the same about man’s origin, in an extant fragment in Simplicius’s commentary *In Aristotelis physicorum* (33.18ff, 159.13ff). Diogenes Laertius (*De Vitae philosophorum* 9.29) relates that the Greek philosopher Zeno of Elea (early 5th c. BCE) believed everything in nature arose from a mixture of warm and cold, dry and moist elements; mankind arose from earth, their soul being a balanced mixture of these elements, without one element attaining superiority over the other.

23 The Latin passage from the Roman historian Cornelius Tacitus (c. 56–c. 117 CE) appears in *De origine et situ Germanorum* (2.2) and reads “their ancient hymns – the only style of record or history which they possess – celebrate a god Tuisto, a scion of the soil, and his son Mannus as the beginning and founder of their race.” Mather argues that the Latin coordinating conjunction “ET” (“and”) should be placed before “offspring of the earth.”

24 Edwards, *Discourse* (1:96, 97). The mythical Orpheus (*Orphica: Hymn* 83.1–2), the ancient Hesiod (*Theogonia* 116–23, 561–612; *Opera et Dies* 60–82), and Homer (*Iliad* 14.193ff) – all attribute the origin of man to the earth or its agents. The Roman poet and satirist Decimus Junius Juvenalis (c. 60–c. 140 CE) relates that the first people were “shaped from mud and had no

De erat adhuc] answers to Gen. 2.5. *There was not a Man. Quod Dominari in caetera posset*] answers to Gen. 1.26, 27. Man was *made to have Dominion over the Fish, the Fowl, & every Living Thing*. It is here also acknowledged, That Man was made last of all. *Sanctius Animal*,] excellently expresses, that Man was made for Religion; Σωον το θεοσεβεστατον, as *Plato* calls him. Or, because hee was made after Gods Likeness, – which followes,

Finxit in effigiem moderantium cuncta Deorum.

Finxit] is the proper Version, of the Hebrew *Jitzer*, in Gen. 2.7. *The Lord God Formed Man. Deorum*] answers to *Elohim*; so, *Lett US make Man. In effigiem Deorum*] is the same with, *In the Image of Elohim*. Behold, another Truth, taken by the *Pagan*, from the *Sacred*, Writings.²⁵

Ovid ascribes the Formation of *Man*, to *Prometheus*; which is the Name of, *The Wise God*: προμηθευς, is *Providens*, *Sapiens*, *Sagax*. This *Prometheus* formed *Men of Clay*. How well agrees this, with the Inspired Writer! Hence, both *Tertullian* and *Lactantius*, think, that the *Poets* had their Notion of it, from our Inspired Oracles. And when *Ovid* adds, *That hee took Fire from Heaven, to animate this Clay*: What is it, but, *The Breath of Life*, mentioned in the Second Chapter of *Genesis*?²⁶

That Manner of Expression, in Gen. 7.22. *The Breath of the Spirit of Life*; afforded unto the Gentile Sages, a Notion of the Souls being; *Divinae particula Auræ*; [Hence, πνευμα ἢ πνειν: *Spiritus*, ἢ *Spirando*; *Animus*, ab {*Anima*}, Ἀνεμος, *Ventus*.] And that the *Rational Soul* is a *Part of God*; Or, an Emanation from Him: which *Plato* meant, when hee said, *The Soul* was Θειας κοινωνος φύσεως. The *Stoicks* more peculiarly, called the *Soul*, a *Part*, a *Piece*, an *Effluviū* of the

parents" (*Satura* 6.13); see also Virgil's *Aeneid* (8.314–15). Ovid's passage from *Metamorphoses* (1.76–78) signifies "A living creature of finer stuff than these, more capable of lofty thought / one who could have dominion over all the rest, was lacking. / Then man was born."

25 Edwards, *Discourse* (1693) 1:98. "De erat adhuc" means "There was still." "Quod Dominari in caetera posset" translates "who moreover could dominate." "Sanctius Animal" signifies "finer being." Plato (*Timaeus* 42a, 1) insists that man was made "the most god-fearing of living beings." And Ovid's "Finxit in effigiem moderantium cuncta deorum" (*Metamorphoses* 1.83) can be rendered "molded into the form of the all-controlling gods"; "Finxit" suggests "he formed" and agrees with the Hebrew "Jitzer" יָצַר "formed" [Strong's # 3336]. "Deorum" signifies "of the gods." The Hebrew "Elohim" denotes "gods" (plural).

26 Edwards, *Discourse* (1:98, 99). Ovid – though never mentioning Prometheus (Apollo) by name – relates how "the Creator" forms man, and how Deucalion and Pyrrha replenish the earth after the flood by throwing the bones (stones) of Mother Earth over their shoulders (*Metamorphoses* 1.76–88, 390–437). Mather's Greek "Prometheus" and Latin "Providens" ("seeing ahead," "providing"), "Sapiens" ("wise"), and "Sagax" ("sharp witted," "clever") – all reflect his interest in rereading the classical myths of Greece and Rome as corrupted offshoots of the Mosaic narrative. Mather's interpretation is not exceptional, for he follows the ancient tradition of the Church Fathers. Tertullian (*De Carne Christi* 1, 6), in *ANF* (3:521, 526–27) and Lactantius, in *Divinarum institutionum* (2.11) [PL 6. 313B], in *ANF* (7:58–60), used much of the same approach. How clay was animated by a mixture of fire, water, and earth is described in Ovid's *Metamorphoses* (1.421–37).

Godhead. Ar{r}ianus agrees hereto; telling us, *That our Souls are Particles of God, pluck't from Him.* So *Seneca*, in his, *Dei Pars*: So, *Cicero*, in his, *A Naturâ Divinâ haustos Animos, et Delibatos*, Yea, they carried it so far, that some Inferiour Animals, had *Souls* (because like unto *Mans*) *thus Parts of the Divinity.*

Esse Apibus partem divinæ mentis, you'll find in *Virgil*. Briefly, They carried on the *Mosaic* Account, of this Matter, unto Extravagancies.²⁷

Eve's being made out of *Adam*, is intimated by what *Plato* saies, That the First Man was Ἀνδρογυνης, a Mixture of both *Sexes*. T'was from a Jewish Tradition, That the first Man was an *Hermaphrodite*; that a Male & a Female Body, were joined in him, which the Creator afterward splitt into *Two*.

These were Mistakes, arising from the Misunderstanding of those two Scriptures, [Gen. 5.2.] *God called Their Name, Adam*: and [Gen. 2.21.] *God took one of the Mans Ribs, and out of it made Hee a Woman.*

Adams Dominion over the *Beasts*, accompanied with his *Calling* and *Naming* of them, was the Foundation, of what the Poets Talk about, *Orpheus* his Drawing & his Taming of them: if that Story did not rather come from *Noahs* Fetching of them into the Ark.²⁸

²⁷ Edwards, *Discourse* (1:99, 100, 101). The ancient sages believed the soul to be of a "divine, golden particle." Hence "pneuma a pnein" ("the breath from breathing," "living breath"); "spiritus à spirando" ("breath or spirit from breathing"); "Animus ab {Anima}" ("soul from breath"); Greek "Anemos" and Latin "Ventus" both denote "wind" and "spirit." Mather accidentally omitted copying the word {Anima} from his source in Edwards (1:99). The statement of the soul's being "theias koinonos physeos" ("partaking in divine nature") does not appear in Plato, but in *De trinitate* (2.8.1) [PG 39. 690, line 1], by the Alexandrian theologian Didymus Caecus (c. 313–98), "the Blind." Lucius Flavius Arrianus of Nicomedia (c. 86–c. 160 CE) was a distinguished writer, historian, and philosopher, who affirms this transcendental belief, in Epictetus Hierapolitanus (*Dissertationes ab Arriano digestae* 1.14.6). Seneca, commenting on Virgil's belief (*Aeneid* 5.363) that virtue is akin to godliness, raises the rhetorical question, "And why should [man] not believe that something of divinity exists in one who is [dei pars] a part of God?" (*Epistulae morales* 92.30). The Roman orator and statesman Marcus Tullius Cicero (*De divinatione* 1.110) argues that "our souls have been drawn and poured from divine nature." (Mather's citation from Cicero is abridged). And the last word on the divinity of nature and all its creatures is given by Virgil (*Georgics* 4.220), who argues that even "bees have a share of the divine Mind."

²⁸ Edwards, *Discourse* (1:101, 102). According to R. Jeremiah ben Leazar, God created Adam an "hermaphrodite," and R. Samuel ben Nahman explains that God created Adam "double-faced," then "split him and made him of two backs" (Midrash Rabbah: Gen. VIII: 1). To this argument R. Levi adds that man was created "with two body-fronts" and God "sawed him in two, so that two backs resulted" – one for each of the male and female (Midrash Rabbah: Lev. XVI:1). Plato (*Symposium* 189e–192c) relates how the gods divided the first human being, an "Androgynos" with male and female genitalia, into two separate beings – each yearning for the other half. The popular story of Orpheus's spell-binding wild animals, the gods, and the shades of the Underworld appears in Ovid's *Metamorphoses* (10.1–52; 11.1–5) and was a popular motif in classical literature and art. The myth of Orpheus's taming wild animals and its association with Noah's calling of the animals into the ark (Gen. 7:5–9) is explored in Robert Eisler's

| However, *Plato*, in his *Cratylus*, denies the *Grecian* Language, to have been the original one; but hee saies, Εἰσι δὲ ἡμῶν ἀρχαιότεροι Βαρβάροι, The *Barbarians* (by which hee means the *Jewes*,) were elder than they; and that the Interpretation of *Names* was to bee fetch'd from them; which argues, his Knowledge of *Adams* giving significant *Names* unto the Creatures.²⁹ [112v]

The *Innocent State of Man* at the first, is admirably described by *Hesiod*; and *Plato* further illustrates it, in Telling us, how 'twas when the Θεὰ φύσις prevailed. Elsewhere, hee tells us, how *Then* Man gott his Living without Labour, and Nakedness was his Ornament. [According to Gen. 2.25.] *Diodorus Siculus*, reports from the old Writings of the *Egyptians*, that the first Men and Women went, *Naked*.³⁰

The Happiness of *Paradise* is described, by *Homer*, in his *Odysses*; and by *Virgil*, in his *Georgics* and his *Eneids*; and by *Ovid*, in the *Golden Age*, of his *Metamorphosis*.³¹

classic *Orpheus – The Fisher* (1921), esp. pp. 17–18 and 184–91. See also D. P. Walker's *Ancient Theology* (23–27).

29 Edwards, *Discourse* (1:103). Socrates, according to Plato (*Cratylus* 425e, 3), raises the question whether the Greeks got their letters “from foreigners [barbarians], who are more ancient than we are.” However, Socrates reminds his interlocutor Hermogenes that historians and poets really have no idea how names and languages originate and that they therefore attribute them to the gods or some other people. Mather and his peers are still trying to uphold the pious belief that Hebrew was spoken by Adam and passed down to Moses. Hence all languages – including those arising from the confusion of tongues at Babel (Gen. 11:7–8) – derive from ancient Hebrew. Seventeenth-century philological research and comparative linguistics began to cast doubt on this theological mainstay, and Mather's “BA” bears witness to the philological battle of his time. For instance, building on Isaac Vossius's *Dissertatio de vera aetate mundi* (1659) and on Martin Martinius's *Sinicae historiae* (1658), John Webb, Esq. (1611–72) point-blank argued in his *Historical Essay* (1669) and *Antiquity of China* (1678), that since the chronology of the LXX is longer by more than 1,400 years than that of the Hebrew and Vulgate versions, Noah (who moved to China after the Flood) must have spoken the oldest language of mankind: Chinese (!). See R. Ramsey, “China.” Lest that claim surprise us, the Flemish scholar Joannes Goropius Becanus demonstrated that Dutch (“Diets”) was the language of Paradise (*Origines Antwerpianae* 539). Not to be outdone, his Swedish colleague Andreas Kempe (1622–89) pleaded for Swedish as the language God spoke in Paradise; Adam spoke Danish, and the wily serpent French (!), in *Schwedische Standarte* (1683). For the history of this debate see A. D. White (*History* 2:168–208), D. C. Allen (“Some Theories”), P. Rossi (*Dark Abyss* 137–52), C. C. Elert (“Andreas Kempe”), and M. Olender (*Languages of Paradise* 1–3). For Mark Twain's humorous reflection on the state of the debate in the 19th century, see “Eve's Diary” and “The Autobiography of Eve,” in *The Bible according to Mark Twain* (1995) 23, 46.

30 Edwards, *Discourse* (1:103, 104). Hesiod (*Opera et Dies* 111–22) tells us what mankind was like during the Golden Age, and Plato (*Politicus* 271d–272b) discusses the belief in the original perfection of “Divine Nature” and man's happiness in the First Age. In his *Protagoras* (321c–322d), Plato describes the primitive state of man, when Prometheus stole the arts from the gods and bestowed them on man. Finally, Diodorus Siculus (1.8.5–6) pities the nakedness of the first men and women, their lack of housing, fire, and “cultivated food.”

31 Edwards, in *Discourse* (1:104–05), variously alludes to the pleasures of the Elysian fields

The *Elysian Fields*, (or, Gardens) of the Pagans, point at the *Paradisaic* Fælicitie; *Plato*, and *Virgil*, describe them. And these, are the same, with the *Fortunate Islands*, where, as the *Greeks* have said, none Inhabit, but the Vertuous. Or, if *Paradise* must bee more expressly parallel'd with a *Garden*, you have that of *Alcinous* in *Homer*; which the famous *Justin Martyr*, in his Oration against the Gentiles, affirms to have been taken from the Description of *Paradise*. Or, there was the *Garden of Adonis*, which carries *Eden* in the very Denomination of it; or, the *Garden of Jupiter*, celebrated in the *Symposiacks* of *Plato*, which *Origen* thinks, to refer enigmatically hereunto.³²

What were the *Orchards* of the *Hesperides*, in which the Trees bore Golden Apples? Tis very sure, that near the fountain of the River *Tigris*, the Seat of *Paradise*, wee read of a Place, which bears the Name of *Hesperetitis*, and *Hisperitis*.³³

The *Tree of Life*, in *Paradise*, gave Rise to the poetical *Nectar* and *Ambrosia*, the Repast of the earthly Gods. The *Nectar* made the *Drinkers*, ever *Youthful*, [q. νεοκταρ, το νεους ποιουν τους πινοντας] and would not suffer them to *Dye*; [Νεκταρ à νή ετ κτείνειν.] And the *Ambrosia* had the same Vertue. But these were the very Blessings of the *Tree of Life*!

described in *Homer's Odyssey* (7.112–32), in *Virgil's Georgics* (1.38 ff) and *Aeneid* (5.735, 6.637 ff, 6.743 ff), and in *Ovid's Metamorphoses* (1.89–112).

32 Again, *Plato* describes these gardens of unearthly delight, in *Critias* (109a–d, 113c–114a); *Hesiod*, in *Opera et Dies* (116–20); *Pindar*, in his *Olympian Odes* (2.68–78); *Virgil*, in *Aeneid* (5.733–35, 6.743–51); and *Homer* describes the garden of *Alcinous*, king of the *Phaiakians*, in his *Odyssey* (7.112–32), to which pleasure ground the Apostolic Father *Justin Martyr* refers by way of quotation, in his *Hortatory Address to the Greeks* (ch. 28), in *ANF* (1:284–85). For the garden and the rites of handsome *Adonis*, see *Ovid's Metamorphoses* (1.90–112, 10.519–59). And the parallel between what happened in *Plato's* garden of *Jupiter-Zeus* (*Symposium* 203b–c) and in that of *Adam and Eve* is drawn in *Origen's Contra Celsum* (4.39), in *ANF* (4:515). See also *Mather's Threefold Paradise* (106, 108). Whether the Mosaic paradise was to be understood as a literal place on earth, as an allegory, or both is discussed in *J. Delumeau's History of Paradise* (3–21).

33 *Edwards, Discourse* (1:105). *Edwards* here draws on *Edward Wells, An Historical Geography of the Old Testament* (1711–12), vol. 1, bk. 1, ch. 1, pp. 1–53; on *Bochart's Geographia* (pars 1, lib. 2, cap. 28, col. 142–43); and on *Pierre-Daniel Huet's Treatise of the Situation of Paradise* (1694), chs. 15–17, pp. 137–53. See also *Marmaduke Carver's Discourse of the Terrestrial Paradise* (1666). *Venus* tells *Adonis* the story of the golden apples, which grow on a golden tree in the field of *Tamasus* (Cyprus), and which *Hippomenes* drops on the road to halt the race of fleet footed *Atalanta* (*Ovid, Metamorphoses* 10.638–80). The Garden of the *Hesperides* is variously placed in the *Atlas* mountains near the Straits of *Gibraltar*, on the River *Oceanus* in *Hyperborea*, on the coast of *Cyrenaica* (Libya), or on the coast of the *Red Sea*, near *Berenice*. *Huet* (*Treatise* 1), *Bochart* (*Geographia Sacra*, “Dissertatio,” 9–28), and *Gerhard Mercator* (*Historia Mundi*) place *Eden* near the confluence of the *Tigris* River and the *Persian Gulf* – not at the fountain of the *Tigris* in *Armenia* major or the mythical *Hesperides* (see also *Mather's Threefold Paradise* 102, 109). The 17th-c. debate about the location of the prelapsarian *Paradise* is covered in *J. Delumeau's History of Paradise* (155–74).

Thus the Writings of the Heathen do confirm the Scriptures of the Church.³⁴

4206.

Q. The Marriage of *Adam* and *Eve*, leads us, to consider the Mystical Marriage, between the Lord and His People? v. 25.

A. The Apostle *Paul* instructs a *Man* to honour his *Wife*, because of that *Mystery*.

But there is a surprising Passage of *Munster*, which I judge worthy to be Recited on this *Occasion*.

*Sicut Semen Virile, à cerebro capitis descendit, per venulas quæ sese ramificant per Dorsum Hominis; et hinc in Hebraismo, concubitus ipse cognitio vocatur, quia Semen à loco cognitionis propagatur; ita DEUS est caput nostrum; à quo si in nos fluat Semen Gratia, nascimur Filij ejus. Hanc comparisonem apud Rabi Menahem invenies. Cujus Mysterij et Divus Paulus meminit, cum Christum caput ponit, et Homines membra.*³⁵

[113r]

613.

Q. That the Pagans did under other Names, mention in their Stories, many of the Persons mentioned in the Scriptures, is very likely; but is it not as likely, that the *Gods* worshipped by the Pagans, were but some of the *Hero's* in the Bible, disguised under other Denominations? v. 25.

A. Yes. The Book of *Genesis*, as *Edwards* truly observes, afforded unto the *Pagan World*, the greatest Part of their Ancient Gods and Goddesses.

Adam [or, *Noah*, with whom the Pagans ignorantly confounded him] seems to have been the *Saturn*, descended, as the Poets tell us, of his Father *Cælus*, and his Mother *Tellus*: under him, was the *Golden Age*, but hee was

³⁴ Edwards, *Discourse* (1:105–06). Mather's Greek passage – again without diacritical marks – describes the virtues of the elixir of the Hellenic gods, as defined in *Suda*, *Lexicon* (alphabetic letter *nu* entry 144, lines 1–2). Mather's first Greek citation reads, "Nectar, making those who drink from it younger"; the second citation, which reads in Edwards's footnote Α νή & κτείνεν is by Mather embellished and intended to signify, "Nectar, not allowing them to die" (*Discourse* 1:106).

³⁵ St. Paul's instructions appear in 1 Cor. 7: 1–40. Mather's lengthy citation from Münster's *Hebraica Biblia Latina planeq* (1:7, annot. *k*, on Gen. 3) points out that "the male seed descends from the brain and moves through the veins, which branch out across the human back; that is why they call coitus *cognition* in Hebrew, since the seed moves forth from the location of cognition. In the same way, God is head. From there, we are born as his sons, if the seed of grace flows within ourselves. You will find this comparison in Rabbi Menachem. The divine Paul reminds us of this mystery, too, when [he says that] the head gives birth to Christ, and the limbs give birth to man." No doubt, the ancient Greeks would have found little to object here, since according to an ancient myth (Pindar, *Olympian Odes* 7.35–38; Hesiod, *Theogonia* 924), Athena sprang from Zeus's head. Not to be outdone, John Milton (*Paradise Lost* 2.754–61) has Sin, fully grown, spring from Satan's head.

afterwards expelled from his Kingdome, & became the Author of *Agriculture*. This is *Adam* all over. Moreover, *Adam*, with whom was the Beginning of *Time*, is very fitly called *Xpovos*, or *Kpovos*, i.e. *Time*, which was the Name of *Saturn*. As for the Name of *Saturn*, it might bee given to *Adam*, from *Satar*, i.e. *Latere*; for hee *hid himself*. [Gen. 3.10.] *Saturnus* is therefore, as *Vossius* tells us, the same with *Latius*; and the Place which was once called *Saturnia*, was afterwards call'd, *Latium*, as *Virgil* testifies.³⁶

It is to bee wondered at, that so few of the Mythologists, do assign any Goddess-ship unto *Eve*, among the Pagan Divinities; nay, that *Vossius*, who thus advances *Naamah*, the obscure Wife of *Lamech*, should leave out our Mother *Eve*, the Empress of the World. Whereas, Doubtless, *Minerva*, the Goddess of Wisdome, was the very *Shee*, *Spinning*, and *Weaving*, and *Oyl* (that is, as wee may suppose, for the Ordering of the *Wool*) were the Three Staple Inventions of that Goddess; And *Eve*, who was endued by God, with singular Perfections, what Art better can bee ascribed unto her, than that of *Clothing*, which the Ancients called, *εργον Αθηναιης*, the very *Business of Minerva*. When the Poets also tell us, that *Minerva* (or, *Meminerva*, as *Arnobius*, & others Interpret it, for her *good Memory*;) was born, of *Jupiters* brain, without a Mother, they seem to refer unto the Sacred History, of *Eves* Original.³⁷

Cain, the eldest Son of *Adam*, seems to have been the oldest *Jupiter*; the Son of *Saturn*, to whom they ascribe, the first founding of Cities: and was

³⁶ Edwards, *Discourse* (1:204–05), here mostly relies on *De Theologia Gentili* (1641), by Gerard Joannes Vossius (1577–1649), a Dutch-German theologian, whose works are classic contributions to humanist learning. The passage is extracted from *De Theologia Gentili* (lib. 1, cap. 18, pp. 138–39) and associates the heroes of the OT patriarchy with the deities of Greece and Rome. For the theogony of Saturn as Adam, Abraham, and Noah, see Theophilus Gale's *Court* (1672), part 1, bk. 2, ch. 1, pp. 4–10, §§ 3–6. The Roman Saturn, son of Coelus and Tellus (Heaven and Earth Spirit), is the Latin equivalent to the Greek “Xronos” or “Kronos,” son of Uranus and Gaia (Heaven and Earth), and father of the Olympian gods. As ruler during the Golden Age (Hesiod, *Opera et Dies* 111 ff), Kronos is also associated with the passage of time (horology, chronology). Saturn's name is probably derived from *satus* (“sowing” or “planting of seed-corns”). *Satar* and *latere* suggest “hidden” and “unknown.” Vossius argues that Saturn is associated with Latius, the ancient territory of the Latini on the Tiber and Anio rivers in Western Italy, since Virgil tells the story of how Saturn fleeing from Olymp found refuge in Latium, where he gave his laws to the people of the Golden Age (*Aeneid* 8.319–29).

³⁷ Edwards, *Discourse* (1:205). Vossius links Lamech's wife Naamah (Gen. 4:22) with Minerva (Athena), Italian goddess of handicrafts (OCD) rather than with Eve (*De Theologia Gentili*, lib. 1, cap. 17, pp. 129–30). Among the ancients who called the domestic crafts of weaving, spinning, and carding “the work of Athena” (*ergon Athenaies*) are Homer (*Odyssey* 16.207), Callimachus (*In Dianam* 245), and Apollonius of Rhodius (*Argonautica* 1.551) – the latter describing Athena's craftiness in helping Jason. Minerva (Athena) is by the Roman rhetorician Arnobius (*Adversus nationes* 3.31), in *ANF* (6:472), praised for her power of memory and wisdom, and sprang from the head of her father Jupiter (Zeus) as we are told by Hesiod (*Theogonia* 924) and others. Her Platonic conception is therefore equated with that of Eve, who was made from Adam's rib.

therefore called Πολιευς, and Ερκειος, that is, a *Founder*, and a *Strengthner*, of *Cities*; and of whom, they also say, That hee married his own Sister, *Vesta*, the Daughter of *Saturn*, & the Goddess of (that which best fitted him) *Architecture*: and that hee Transmitted all unto the World, which in other Terms, is, *Cain* the *Vagabond*.³⁸

What was the old *Vulcan*, the Smith of the Gods, but only *Tubal-Cain*, by a common Aphæresis, and Permutation of Letters?

As for *Noah*, *Hee*, as well as *Adam*, was called *Saturn*; and indeed, the Persians call *Noah*, the Second *Adam*.³⁹

Saturn was the Husband of *Rhea*; i.e. of the *Earth*. And *Noah* wee find called, *Ish Haadamah*, [Gen. 9.20.] *Vir Terræ*; which the Pagans might Interpret, *The Husband of the Earth*. Or if here by bee meant, that hee was an Humble Man, & led a mean Life, then the *Saturnian Reign*, agrees with it, most Incomparably. Or, if you take it for, *An Husbandman*, still *Saturn* was employ'd about the *Earth*, and the Fruits of it. *Saturn* devoured his Children; which *Bochart* applies to that of *Noah*, [Heb. 11.7.] Hee *condemned the World*, to perish in the Flood. Or, it may bee apply'd unto this, that hee shutt up his Children in the *Ark*, among the Beasts, as if hee intended them to bee devoured. *Saturn* vomited up his Children again; as *Noah* restored his Children to the Earth, after they had been shutt up in the *Ark*. *Saturn* was driven out of his Kingdome, & this by his

38 Edwards, *Discourse* (1:208). Edwards equates Adam's son Cain with Jupiter (Zeus), son of Saturn (Uranus), the founder of cities, and spouse to his sister Vesta, because Edwards believes the Greek myth originated in the story of Cain, who moved to the Land of Nod, East of Eden, where he married his sister, became father of Enoch, and built a city (Gen. 4:16–22). Cain thus became the ancestor of Tubalcain, “instructor of every artificer in brass and iron” (Gen. 4:22). Remote parallels such as these lead Edwards and his euhemerist peers to develop early forms of comparative religion. However, since the Mosaic history was still believed to be the most reliable account of the origin of man, theologians constructed elaborate euhemerist studies to prove that the Pagan deities are derived from the primordial heroes of the Pentateuch. For alternative readings, see Lord Herbert of Cherbury's *De Religione Gentilium* (1663), esp. chs. 12–14. See also Dio Chrysostom (*Orationes* 1.39.1–2; 12.75.2–3), Plato (*Euthydemus* 302d, 2), and Suda (*Lexicon*, alphabetic letter *epsilon*, entry 3015, lines 1, 3).

39 Edwards, *Discourse* (1:208, 211). For the mythological derivation of Vulcan from Tubalcain, see Vossius's *De Theologia Gentili* (1641), pars 1, lib. 1, cap. 16, pp. 123–24; and Theophilus Gale's *Court* (1672), part 1, bk. 2, ch. 6, pp. 66–67. The Roman Vulcan or Volcanus (Hephaistos), god of destructive fire and the art of smithery, is here paralleled with Tubalcain (Gen. 4:22) to whom the biblical author attributes the invention of the same art (Gen. 4:22). Edwards argues that through the loss of sounds or letters (apheresis) of Tubalcain's name, the Latin name “Vulcan” came about. Because of the similarity of sound, modern classical scholars associate the name “Vulcan” with the Cretan “Felcanos,” a deity though with dissimilar functions (*OED*). According to Bochart, the ancient Persians associated both Adam and Noah (the Utnapishtim of the *Gilgamesh Epic*) with Saturn (*Geographia Sacra*, pars 1, lib. 1, cap. 1, col. 1–2). See also Vossius's *De Theologia Gentili* (1641), pars 1, lib. 1, cap. 18–19, pp. 136–49; and Theophilus Gale's *Court* (1672), part 1, bk. 2, ch. 1, pp. 6–7, 9–10, §§ 4, 6.

own Son, and this after hee had first cutt off his Fathers Genitals: which refers to *Cham*, the Son of *Noah*; who [Gen. 9.22.] *saw his Fathers Nakedness*, *וַיֵּרֶא* *Hee Told*, with Derision, *to his Brethren*. Tis possible, that the Word *וַיֵּרֶא* *Hee Told*, was by the Pagans read *וַיִּגְרַע* *Hee Told*. And that *Jupiter Hammon*, this unhappy Son of *Saturn*, was the same with *Ham*, the Son of *Noah*, may bee gathered from the Place, where *Ham* & his Posteritie were seated; which was in *Africa*. Here, in the Desarts of *Lybia*, was the famous Oracle of *Jupiter Hammon*; so called from the wicked Son of *Noah*, who, in this Place vented his *Blasphemies*, by some accounted *Oracles*, and thereby Debauched that Age exceedingly. And the Incomparable *Bochart* thinks, that as *Hammon*, was the same with *Ham*, the Son of *Noah*, whence *Egypt* is called, *The Land of Ham*; so, this African *Hammon* is mentioned, in those Texts, [Ezek. 30.15.] *I will cutt off the Multitude of No*, or, according to the Hebrew, *Hamon of No*; And [Jer. 46.25.] *Amon of No*; And [Nah. 3.8.] *No of Amon*.⁴⁰

Moreover, of *Saturn* they say, That hee had *Three Sons*, *Jupiter*, *Neptune*, and *Pluto*; and that hee divided the World among them. This evidently refers to the *Three Sons of Noah*. [Gen. 9.19. and 10.32.] The Hot Countrey of *Africa*, was *Chams* Division; who might have his Name given him, from a Foresight of the *Torrid Zone*, where hee & his Race, were to inhabit; for *Cham* signifies {*Heat* and *Chum* signals *Black*. Therefore, *Cham's* name [implies] not only to become *Hot*, but also to become *Black*}. As for | the *Isles*, and the *Peninsulae*, they mostly fell to *Japhet*; who might therefore bee accounted *Neptune*.⁴¹

⁴⁰ Edwards, *Discourse* (1:211–13), extracts most of his information from Bochart (*Geographia*, pars 1, lib. 1, cap. 1, col. 1–5). And the story of Saturn (Uranus), devouring his offspring, vomiting them up again, and being castrated and banished by his son Kronos (Jupiter), appears in a variety of sources, the oldest of which is Hesiod (*Theogonia* 154–206). See also Bochart (*Geographia*, pars 1, lib. 1, cap. 1, col. 3–8). Kronos's castration of his father, Bochart feels, was inspired by the story of Ham's derision of Noah's nakedness. R. Rab and R. Samuel argue that Ham sexually molested or castrated his inebriated father (Soncino Talmudic tractate Sanhedrin 70a; and Midrash Rabbah, Gen. XXXVI.4–7). Jupiter Hammon (Ammon), evidently the Egyptian (Amana or Amun) who was revered in Thebes and later among the Greeks as Zeus-Ammon, is similarly cursed by his father Uranus for cutting off his genitals (Hesiod, *Theogonia* 207–10). Because of these semblances, Bochart and his disciples deem the biblical story of Noah's curse of Ham-Canaan (Gen. 9:22–27) as the original source for the ancient Greek myth. See also Theophilus Gale's *Court* (1672), part I, bk. 2, ch. 1, pp. 11–13, §§ 7–9. Since Ham was believed to be the progenitor of Black Africans, Christian tradition laboriously defended the enslavement of Africans on the basis of Noah's curse (see S. R. Haynes, *Noah's Curse* 3–40; and D. M. Goldenberg, *Curse of Ham* 141–82).

⁴¹ Edwards, *Discourse* (1:214). Interpolated from a different source than Edwards, Mather's lost passage at the bottom of [113r] is restored from Bochart: "Hebraeis *חם* *Cham* calidum, & *חם* *Chum* nigrum sonat. Itaque Chami nomen vel à calore vel à nigredine factum" (*Geographia*, pars 1, lib. 4, cap. 1, col. 203). Japheth's allotment is discussed in Bochart's *Geographia* (Pars 1, lib. 1, cap. 1, col. 9).

Tis also conceived, that *Noah* was *Bacchus*, who first planted Vines; The easy Change of One Letter, / into ʒ/ makes their Names, the very same. And from *Noahs* Experiment of the Grape-Juice, arose the Poets Tippling Deitie; who was

– *Genialis consitor uva.*

But for *Janus*, you'll find him to bee *Noah* all over; whereof you shall have a fuller Account, when wee have gott Nine or Ten Chapters further, in our *Illustrations*.⁴²

Again, What was the Egyptian *Apis*, or, *Serapis*, but *Joseph*, the celebrated Ruler of *Egypt*? An *Ox*, was erected unto his Memory; not only because hee obtained his Reputation, by Interpreting the Kings Dream, about Fat and Lean *Kine*, whereby that Sort of Creature, became Reverenced, as *Hieroglyphical*; but also, because that Animal is eminently used, in the Producing of *Corn*, whereby *Famine* is prevented.

Some think, the Holy Spirit refers to this, in Gen. 49.6. which Text, speaking of the Design in *Josephs* Brethren to kill him, calls him, *An Ox*, (or, *Bull*;) according to the LXX; and so according to the Hebrew, if you read it, *Shor*, and not, *Shur*. And *Joseph* is by *Moses*, in Deut. 33.17. compared unto an *Ox*, or, *Bullock*. Now *Shor*, signifies a *Prince* also, as well as an *Ox*, and *Captains* are, both by Sacred and Profane Writers called so; that Creature being of such Significancy among other Cattel. But *Joseph* was thus Resembled, for the Reason that was afterwards given by *Solomon*, [in Prov. 14.4.], *Much Increase* [Hebr. of Corn and Grain] *is by the Strength of the Oxe*. And with Allusion unto this Matter, it was said, in Jer. 46.20. *Egypt is like a fair Heifer*.⁴³

⁴² Edwards, *Discourse* (1:209, 210–11). Noah's drunkenness is here taken as the biblical original for the Greek Bacchus, god of wine and revelry. The philological speculation that the Hebrew letter "nun" might have been misread as "beth" because of their similar shape is here taken as further proof. Gerard Vossius, however, takes exception to this simplistic interpretation (*De Theologia Gentili*, lib. 1, cap. 19, pp. 144–49). The Latin passage from Ovid's *Metamorphoses* (4.14) signifies "planter of the joy-giving vine." The Roman Janus, god of the doorways whose double-faced head looks into both directions, was linked with the beginnings and ends of campaigns (*OED*). Since Noah, too, figuratively looks both backward and forward to the period before and after the Flood, Edwards and Mather identify him as the biblical original for the Roman Janus.

⁴³ Edwards, *Discourse* (1:214–15). The Greco-Egyptian Osiris-Apis or Serapis is the deified representation of the Apis bull of Memphis (*Plutarch's Moralia* 3:70–73. *De Iside et Osiride* 29.362c–d). Revered as lord of the Underworld, Osirapis (Pluto) delivered his oracles and cures through dreams (Clemens Alexandrinus, *Protrepticus* 4.48). The association of Joseph as "Zaphnath-paaneah," meaning "the revealer of secrets" (Gen. 41:45); i.e., the interpreter of Pharaoh's dream of the seven fat and lean cows (Gen. 41:1–45), is here taken to be the biblical original for the Serapis cult. Because of this providential revelation, Joseph is supposed to have been revered among the Egyptians as the sacred Apis bull – if Gerard Vossius (*De Theologia Gentili*, lib. 1, cap. 29, pp. 213–20), Theophilus Gale (*Court* [1672], part 1, bk. 2, ch. 7, pp. 92–95), and their disciples can still be relied upon. Pierre Jurieu, however, begs to differ;

The Egyptian *Serapis*, was a true Hieroglyphic of *Joseph*; especially, when you consider, that *Ruffinus* tells us, a *Bushel* was placed on its Head; signifying, that *Joseph* was the Giver of *Corn*, and measured it with exact Proportions in his giving of it. Yea, tis probable, that *Serapis*, was originally *Sorapis*; a Compound of *Sor*, an Ox; and *Apis*, an Egyptian Word, perhaps of the same Importance.⁴⁴

And some have Imagined, That *Mercury*, was a Name given by the Pagans, unto this *Joseph*; hee being *Hermes*, an *Interpreter*. Hee was also called, *Zaphnath Paaneah*, an *Interpreter of Secrets*. Tho' my Judicious *Edwards* rather thinks, that *Jerom* ha's rendred the Words better; as hee saies, hee learnt from some that understood well the *Egyptian* Tongue; *Salvator Mundi*; referring them to *Josephs* Timely Saving that Part of the World from Death by the *Terrible Famine*.⁴⁵

That learned Frenchman, *Huet*, ha's thoroughly proved, that *Moses* was intended by *Mercury*. And *Vossius* ha's no less ingeniously proved, That *Liber* or *Bacchus*, was in many things, a disguised *Moses*. *Bacchus* was no sooner Born, but in a little *Ark* exposed unto the Waters. Hee was Βυβλάτωρ: [see Exod. 2.10.]

he traces the debate in his "Treatise of the Golden-Calf," but ultimately rejects as erroneous the figurative representation of the Patriarch Joseph as the Apis bull, in *A Critical History* (1705) 2:183–89. The LXX version (Gen. 49:6) has Joseph's father Jacob specifically mention a bull [ταῦρος] "tauros," as Jacob predicts the fate of his twelve sons. Significantly, the translators of the KJV rendered the applicable reference (Gen. 49:6) עֲקְרֵר שׁוֹר [shuwr iqqeru] "they hamstrung an ox" (Tanach and LXX) as "they digged down a wall" (KJV). Hence Edwards and Mather suggest that the KJV misread שׁוֹר [showr ~ shor], signifying "a bullock," as שׁוֹר [shuwr ~ shoor], signifying "a wall" [Strong's # 7794, 7791, 7792, 6131], an easy mistake if the Masoretic vowel points are disregarded. In this context, it is well worth remembering the seventeenth-century debate about the origin of the Hebrew vowel points. The controversy involved Louis Cappellus (1585–1658), professor of Hebrew and divinity at Saumur, and the two Johannes Buxtorfs (the Elder and the Younger). In his *Arcanum punctationis revelatur* (1624), Cappellus demonstrated that the vowel points were devised by the rabbis of Tiberias in the sixth century (CE), whereas Buxtorf maintained the diacritical marks dated back to the origin of the Hebrew language given to Adam and handed down to Moses. In his 1681 Harvard master's thesis "Puncta Hebraica sunt originis divinae," Mather adopted Buxtorf's position and argued for their divine inspiration and the contemporaneous occurrence of the vowel points; however, he later recanted and agreed with Cappellus. (See R. A. Muller's "vowel points," M. Olender's *Languages* 21–36, and S. Burnett's *Christian Hebraism*, ch. 7).

⁴⁴ Edwards, *Discourse* (1:216). The Roman monk and historian Rufinus Aquileiensis (c. 345–410) describes a statue of Serapis in his *Historia Ecclesiastica* (2.23) [PL 21. 532A–533B] and argues that King Apis fed the starving inhabitants of Alexandria from his own granaries. That is why – in the best tradition of Euhemerus – the Alexandrians deified this king and revered him in the shape of the sacred Apis bull, a bovine being universally useful to mankind. (See Pierre Jurieu's *Critical History* 2:183–87). For a helpful discussion of how the Fathers of the early and medieval Church wielded pagan euhemerism (the deification of ancient heroes) as a weapon against the belief in the ancient gods, see J. D. Cooke's "Euhemerism."

⁴⁵ Edwards, *Discourse* (1:217). The annotators of the KJV gloss Joseph's new title "Zaphnath-paaneah" as the Coptic signification of "the man to whom secrets are revealed" (Gen. 41:45). St. Jerome's Latin Vulgate translation renders Joseph's title "salvator mundi" or "savior of the world." For Moses's designation as Hermes, see Eusebius Pamphilus's *Praeparatio evangelica* (9.27).

And, Beautiful. [see Exod. 2.2.] As the Jewish Historian, *Joseph{us}*, saies of *Moses*, *Because hee was* Μορφή τε θειος, και φρονηματι γενναιος, *of a Divine Shape, & a generous Mind*, thus the Pagan Historian, *Justin*, saies of him, *Quem formæ pulchritudo commendabat*. Moreover, *Orpheus* calls *Bacchus*, Θεσμοφορον, which answers to *Moses's* being a *Legislator*; and hee attributes unto him, Διπλάκα θεσμον, because of the *Two Tables of the Law*. And *Bacchus* is called, by *Orpheus*, Ταυρομετωπος, and, Ταυροκερως, and Κερασφορος, and by *Euripides*, Ταυροκερος θεος; which might bee occasioned by a Mistake of those Words, Exod. 34.29. *Moses's Face shone*; which the Latin renders, *Cornuta erat facies sua*; mistaking the Hebrew *Karan*, whence κερας, *cornu*: and so, *Moses* is pictured with *Two Horns* unto this Day. Lastly, Tho' *Moses* did not, like *Bacchus*, find out *Wine*, yett hee led the People unto a Land flowing with *Wine*, as well as *Milk* and *Honey*; and by a mighty *Bunch of Grapes*, hee encouraged the fainthearted *Israelites*.⁴⁶

But Monsieur *Huet*, shewes, how *Moses* was also repræsented by *Apollo*, *Æsculapius*, *Pan*, *Priapus*, *Prometheus*, *Janus*, and by those Egyptian Deities, *Osiris*, *Apis*, *Serapis*, *Orus*, *Anubis*.⁴⁷

⁴⁶ Edwards, *Discourse* (1:217–18) relies for his information on Vossius's *De Theologia Gentili* (lib. 1, cap. 19, 30). Mather quotes at second hand from the celebrated Pierre-Daniel Huet, who cites numerous ancient sources to assert that Moses is disguised in pagan histories with such names as the Egyptian Mercurius, Bacchus, Osiris, and various other ancient deities (*Demonstratio evangelica* [1690], Prop. IV, cap. 2, § 15, p. 58D; §§ 26–30, 36–38 pp. 60–61, 62–63; and esp. in cap. 4, pp. 73–88). This popular and often reprinted commentary incorporates Huet's many conversations with R. Manasseh ben Israel of Amsterdam, the teacher of Spinoza. Vossius's proof of Moses as the original for Zeus's son Bacchus (Dionysius), god of wine and revelry – mostly on the basis of some parallels in their legends – is derived from works by Orpheus, Josephus Flavius, Clemens Alexandria, and Diodorus Siculus, in Vossius (*De Theologia Gentili*, lib. 1, cap. 30, pp. 130–32). Bacchus is called “Bimator,” the meaning of which is unclear, but is by Mather associated with “ὑδατος” [udatos] “out of the water” (LXX, Exod. 2:10). For Josephus Flavius, see his *Antiquities* (2.9.7). The Roman historian Marcus Iunianius Iustinus (fl. 2nd, 3rd, or 4th c. CE) relates in his *Historiarum Philippicarum T. Pompei Trogi* (36.2.11) that Bacchus was one, “who endeared himself for the beauty of his shape.” Orpheus calls Bacchus “Thesmophoron” or “lawgiver,” an ancient name for Demeter (Ceres), in *Orphica Argonautica* (27). Orpheus attributes unto Moses “Diplaka thesmon,” the “two-fold table of the law” (Eusebius, *Praeparatio evangelica* 13.12.5. line 37; 13.12.666a; *Pseudo-Auctores-Hellenistae, Fragmenta*, fragment d, line 74). Bacchus is called “Taurometopos,” “Taurokeros,” and “Kerasphoros,” i.e., “bull-horned” and “horned,” in *Orphica (Hymni* 45.1) and in Clemens Alexandrinus (*Protrepticus* 4.54.2, line 4). And the Greek comic playwright Euripides (c. 480–c. 406 BCE) calls him “Taurokeros theos” or “the god with the horns of a bull” (*Bacchae* 100). The Latin quotation from Jerome's Vulgate (Exod. 34:29) reads “his face was horned,” a humorous mistranslation of the Hebrew word קָרָן “karan” (rays, or horns), the Shechinah (glory of God) radiating on the face of Moses. Perhaps the most famous depiction of the horned Moses is Michelangelo's statue, the center-piece of the tomb of Pope Julius II, in the Vatican Museum. The Torah attributes the honor of discovering wine to Noah (Gen. 9:20–21), and Moses relates how his spies in Canaan brought back huge clusters of grapes, bespeaking the fertility of the land that flows with milk and honey (Num. 13:23, 27; 14:8).

⁴⁷ Pierre-Daniel Huet, in *Demonstratio evangelica* (1690), Prop. IV, cap. 3, § 3, pp. 70–71, argues that the Hebrew lawgiver was represented by the Greeks and Egyptians as Apollo (Greek god of prophecy, medicine, poetry, and purification); as Æsculapius, god of healing (Prop. IV,

How *Joshua* was intended by the Pagan *Apollo*, and *Hercules*, we may show in some other Illustration.

I'll here only add, That as *Sampson* and *Hercules* were contemporary, so one was t'other. And *Hercules* his Killing the *Nemean* Lion, was but *Sampsons* exploit paganized. *Hercules* did mortify the *Tyrants*, or *Monsters*, of his Time: *Hercules* was made a Captive to *Eurystheus*, & underwent sore Labours in his Captivitie; *Hercules* was of mighty *Strength*, but very effeminate; and in his Death at last spontaneous & voluntary. What is this, but *Sampson* all over?⁴⁸

I have chosen here, at the Beginning, to give you only a little Tast of these Things, fetch'd out of Mr. *Edwards* Discourse on the Authority of the *Scriptures*. But having thus whetted your Appetite, I promise you further Intimations of these Matters, in some further Illustrations.⁴⁹

[115r]

Q. Some Essay upon the Scituation of PARADISE? v. 25.

A. With how much Discouragement, must one essay any thing upon so problematical a Subject?

cap. 8, §§ 3, 6, pp. 105–08, 110–12); as Pan, god of shepherds (Prop. IV, cap. 8, § 4, p. 108–09); as Priapus, god of fertility, gardens, and herds (Prop. IV, cap. 8, § 5, pp. 109–10); as Prometheus, god of fire and maker of man from clay (Prop. IV, cap. 8, § 7, pp. 112–13); and as Janus, god of gateways and of the beginning and closing of military campaigns (Prop. IV, cap. 9, § 2, pp. 134–35). The Egyptian Osiris is the god of death and resurrection (Prop. IV, cap. 4, § 3, pp. 79–82); Apis and Serapis, the sacred bull of Memphis combining the attributes of Osiris and Apis (Prop. IV, cap. 4, §§ 4–5, pp. 82–83); Orus (Horus), god of light and pharaonic order (Prop. IV, cap. 4, § 6, p. 83); and finally, Anubis, the dog-faced guardian of the dead (Prop. IV, cap. 4, § 7, p. 83). In their effort to maintain the sacred origin of the Hebrew Bible as the most ancient account of the origin of mankind, Huet and his euhemerist compeers inevitably associate the deities of the Chaldean, Egyptian, and Graeco-Roman worlds with the OT heroes, who (they maintain) became the prototypes for the deified heroes in pagan religions. Vossius's *De Theologia Gentili* (1641) is perhaps the most significant if not the most comprehensive of this type of classical scholarship, but see also Herbert of Cherbury's *De Religione Gentilium* (1663) and Theophilus Gale's *The Court of the Gentiles* (1672). For John Toland's critique of his colleagues' endeavor to correlate pagan gods with the biblical Moses, see Toland's *Adeisidaemon et Origines Judaicae* (1709).

⁴⁸ Joshua's euhemeristic parallel with Apollo is asserted in Edmund Dickinson's *Delphi Phoenicizantes* (1655), cap. 3, pp. 20–35; and in Theophilus Gale's *Court* (1672), part 1, bk. 2, ch. 4, pp. 40–44, § 3. Edwards, *Discourse* (1:219–20), who draws on Vossius's *De Theologia Gentili* (lib. 1, cap. 22, p. 169), associates the OT judge Samson with the Greek hero Heracles (Hercules), for both heroes kill a lion with their bare hands. So, too, while Samson kills a thousand Philistines with the jawbone of an ass, Heracles (while still an infant) strangles the serpents (hydras) sent to him by Hera and later vanquishes the Centaurs; while Samson is captured by the Philistines and bound to the pillars of the Temple of Dagon, Heracles becomes a vassal to King Eurystheus of Argos and is required to perform his twelve tasks; and finally, while Samson succumbs to Delilah's seduction, so Hercules equally serves Omphale of Lydia (Judg. 14:5–6, 15:15, 16:4–31; Sophocles, *Trachiniae* 248–80; Ovid, *Heroides* 9.47–119). Although published after Mather's death, the widely scattered story of Hercules is related in an English translation of Antoine Banier's *The Mythology and Fables of the Ancients* (1739–40) 4:72–126.

⁴⁹ Here ends the lengthy excerpt from John Edwards's *Discourse* (vol. 1, chs. 3–4, 6), which Mather mines extensively throughout "BA."

Monsr. *Huet* has enumerated the Disagreements of Men upon the Problem, in such Terms as these.

"Paradise has been placed in the *Third Heaven*; in the *Fourth*; in the *Heaven* of the *Moon*; in the *Moon* itself; in the Middle Region of the *Air*; *Above* the Earth; *Under* the Earth; in a Place *Hidden & Remote* from the Knowledge of Men; It has been fixed under the *Arctic Pole*; in *Tartary*; in the Place filled at Present by the *Caspian Sea*: Others have sent it away to the extreme Parts of the South, in the *Terra del Fuego*: Several have placed it in the *Levant*; or, upon the Banks of the *Ganges*; or in the Island of *Ceylon*; even deriving the Name of the *Indies*, from that of *Eden*: It has been placed in *China*; or even beyond the *Levant* in some uninhabited Countrey; some will have it be in *Armenia*; others, in *Africa*, under the Equator: Others at the equinoctial Orient: Others under the *Mountains of the Moon*, from whence it was beleaved the *Nile* proceeded: But most, in *Asia*; some in *Armenia Major*; others in *Mesopotamia*; others in *Assyria*; or in *Persia*; or in *Babylonia*; or in *Arabia*; or in *Syria*; or in *Palestine*; There have even some such been found, that have honoured *Europe* with its Scituation."⁵⁰

The learned *Huet*, after all this List, proposes another Scituation. *Calmet* praises him, & yett refutes him, finding | the Scituation of it, in *Armenia*, between the Springs of the *Tigris*, the *Euphrates*, the *Phasis*, & the *Araxis*. And *Reland* comes with further Speculations.⁵¹

[116v]

⁵⁰ Mather's citation is from Pierre Daniel Huet's *Treatise of the Situation of Paradise* (1694), "Preface" (3–4), whose summary of the various theories about the primeval Garden and its location is based on Sir Walter Raleigh's *History of the World* (1614), bk. 1, ch. 3, pp. 33–39, §§ 4, 6–8. Christopher Columbus, largely inspired by Cardinal Pierre d'Ailly's *Tractatus de Imagine Mundi* (c. 1483), locates Paradise at the source of the Amazonas River, where the earth is in "the shape of the stalk of the pear" (*Four Voyages*, "Third Voyage" 2:30, 36, 38). Huet frowns on his pious colleagues who locate Paradise in Europe: "And which is beyond the greatest Impertinency, ... [they] placed it at *Hedin* a City in *Artois*, upon no other ground than the Affinity of that name with the word *Eden*. I do not despair, but some Adventurer, to have it nearer to us, will one day undertake to place it at *Houdan*" ("Preface" 4–5). J. Delumeau explores the medieval debate about the geographical location of Eden in his *History of Paradise* (39–70).

⁵¹ Huet proposes the traditional site of Paradise at one of the meandering canals of the Tigris and Euphrates rivers, North of their confluence in the Persian Gulf, "near the place where was the ancient Town of *Erec*, or *Aracca*, according to the Position of *Ptolomy*" ("A Map of the Situation of the Terrestrial Paradise," in *Treatise* 1, and ch. 1, p. 25), and in Claudius Ptolemaeus (Ptolemy), *Geography* (6.3. tabula V Asia). Dom Augustin Calmet's refutation of Huet's Mesopotamian Paradise appears in Calmet's *Commentaire littéral* (vol. 1). See also Calmet's *Great Dictionary* (1812–17), "Paradise" (2: n.p.), and his commentary on Genesis (ch. 1), where Calmet generically locates Paradise in Armenia, "in a *temperate* region ... in a hilly country" (*Expository Index* 4:11–13). Adriaan Reland (1676–1718), the Dutch professor of Oriental languages and church history at Utrecht, outlines his speculations in "De situ Paradisi terrestris," in *Dissertationes miscellaneae* (1706–8) 1:58–75 and situates Paradise in Armenia, near the source of the Euphrates, Tigris, Phasis, and Araxes rivers. For Reland, however, the Pison River (Phasis) is in Colchis and empties itself into the Euxine Sea near Chabala (Chavilah); the Gihon is the Araxes and flows into the Caspian Sea; the Hiddekel is the Tigris, and the Phrat (Perath) is the Euphrates. The 17th-c. debate about Eden's precise locale is sketched in F. Motta's "Geographia Sacra" (esp. pp. 299–311).

I shall not so much as consult the admirable *Bochart*, on this Occasion. But being a Possessor of some very precious Treasures, that were never yett exposed, I will venture to offer them; and the rather because many Illustrations on other Passages of the Sacred Scriptures, will be offered in them.⁵²

[117r] |
745.

OF PARADISE,⁵³

I find a notable Remembrance, and Resemblance, in a City of *Syria*, scituate, on the River, *Orontes*, which for the many Delights of it, is called *Paradisus*, by *Strabo*, *Ptolomy*, & *Pliny*, and by *Diodorus* call'd also *Tripardisus*; a City, not far from the *Goodly Mountains* of *Lebanon*; where the Scripture doth report the *House of Eden* [Amos. 1.5.] to have sway'd the Scepter of Government. In this *Valley of Eden* (which the Ancient Gentiles, do celebrate in their *Adonis* and *Adonius*) there stood the beautiful City of *Damascus*, a City Six Miles in Compass, and the rarest Prospect in the World. Here, besides a thousand other Delicacies, there grew, the *Pomegranat*, and the *Pistacho*. (*Jacobs* Present unto *Joseph*, Gen. 43.11.) and the rare Figs of the Emperour *Julian*. Here also were the choice Quarries of *Alabaster*, and the golden Sands of the River *Chrysorroas*, the supposed *Pharphar* mentioned in the Bible, not far from the River *Adonis*.⁵⁴

⁵² Bochart and Huet locate Paradise in the same general area of Mesopotamia-Armenia (Bochart, *Geographia*, pars 1, lib. 1, cap. 4, col. 21); see also Stephanus Morinus's "Dissertatio de paradiso terrestri," in Bochart's *Geographia* (col. 9–28); Huet, *Treatise* (1, map, and ch. 1, p. 25). Mather here inserts a condensed version of a lost manuscript by the Puritan divine Samuel Lee (1625–91) of Bristol, Rhode Island, the father of Lydia Lee George, Mather's third wife (1715). In his *Threefold Paradise* (94), Mather identifies his "very precious Treasures" as Lee's unpublished treatise "Of a Threefold Paradise," which Mather epitomized and included in his "BA" [117r–124v]. The same text (with slight variations) became the basis of Mather's "First Paradise" (*Threefold Paradise* 94–106), which he began sometime in 1712 (*Diary* 3:91). Significantly, the substance of what follows below is extracted from Sir Walter Raleigh's *History of the World* (1614), bk. 1, chs. 3–4, and can also be found in Huet (*Treatise*) and in *Historical Geography of the OT* (1711–12), vol. 1, bk. 1, ch. 1, pp. 1–53, by the English mathematician and geographer Edward Wells, D. D. (1667–1727), rector of Cotes, Leicestershire, whose geographical studies were highly regarded by his contemporaries. See Mather's recommendation in *Manuductio* (55, 148). The location and interpretative function of Paradise are examined in M. Engammare's "Portrait."

⁵³ See Appendix A.

⁵⁴ See Mather's *Threefold Paradise* (95–96) and Huet's *Treatise* (ch. 1, p. 21). The River Orontes (Typhon) and the town "Paradeisus" (in Laodicea, near Antioch, Syria) are mentioned by Strabo (16.2.19); by Ptolemy (*Geography* 5.14. tabula IV Asia); by Pliny (5.18.82, 5.22.93), who also mentions a river by that name; and by Diodorus Siculus (18.39.1, 3; 19.12.2). The Adonis River (near modern Byblus) is associated with the legend of Adonis, who was accidentally killed on Mt. Libanus and whose corybantic rites were widely celebrated in the Hellenic world (Ovid, *Metamorphoses* 10.298–559, 708–39). For a description of the region, see Strabo (16.2.16–20), and for its location in Coele-Syria and Decapolis, Ptolemy (*Geography* 5.14, 15). The rare figs of Julian the Apostate, Roman Emperor Flavius Claudius Julianus (332–63) are probably those which Julian praises in his "Letter to the most illustrious Serapion." The local figs are renowned for their sweet virtue, Julian argues, and a gift of 100 figs is to be deemed a

In this Valley, some will have *Cain* to have kill'd his Brother; & so they derive the Name, of *Damascus*, from, *Dam-Shach*, the *Blood* of the *Boy*. However, In this Valley, is that *Eden*, wherein the Prophet *Ezekiel* [Ezek. 28.13, 14.] finds the Prince of *Tyrus* walking; & upon the *Holy Mountain of God*, that is, upon *Lebanon*. Moreover, when the Lord foretels [Amos. 1.5.], that Hee will send the Syrians of *Damascus* Captives to, *Kir*, that is, a Countrey in *Media*, upon the River *Cyrus*, now called *Kur*, Hee also fore-dooms the Cutting off the Inhabitant from *Aven*, that is, *Heliopolis* [*Balbek*, or, *Baal-beth*] the House of *Baal*, or the Sun; which stood in this very Valley; as also, to take the Scepter from the *House of Eden*, which was here scituated. In after-times, wee find these *Damascen* People, in a Captive-state [Isa. 37.12.] by the Name of, *The Children of Eden*; at *Telassar*, or, the *Tal-atha* of *Ptolomy*, near the River *Tigris* in *Assyria*.⁵⁵

But after all, wee shall seek, and find, the True *Paradise*, of our Father *Adam*, somewhere about the Rivers of *Mesopotamia*; where fell Serpents & fierce Dragons are now hissing among the *Thorns*, which the Primitive *Curse* ha's brought upon it.⁵⁶

Yea, perhaps, e're wee have done, wee shall have so described it, that an Ingenious Traveller may go directly to it; and carry from the farthest *America* some Informations to the *Armenian* and *Nestorian* Bishops, thereabouts Inhabiting, which they never had before.⁵⁷

regal present (*Works of Emperor Julian* 3:266–83 and Calmer's *Dictionary* 4:492–93). The word "Alab(l)aster" is derived from the Egyptian city Alabastro, famed for its quarries (Pliny 5.11.61; Ptolemy, *Geography* 4.5); Mather, however, refers to King David's quarries near Damascus (1 Chron. 29:2). The River Chrysorrhoeas (Strabo 16.2.16) is here associated with the River Pharp(h)ar (Ptolemy, *Geography* 5.14; see 2 Kings 5:12).

55 Mather's etymological derivation of Damascus (here copied out of Lee's lost manuscript) is based on the preclassical episteme that the signifier and the thing signified form a linguistic unit that directly relates to its original Hebrew signification current in Adam's time. All languages derived from Hebrew, Mather and his peers still believed; modern geographers could thus establish the locale of a biblical event (here: Cain's spilling of Abel's blood) by linking the place name with its purported Hebrew etymology. Samuel Bochart cultivated this technique into a fine art in his massive *Geographia Sacra* (1646) and *Hierozaicon* (1646) – standard reference works until the late 18th century (see F. Motte's "Geographia Sacra"). According to Strong's's # 1834, the name of the Syrian city Damascus is derived from דַּמְעֵסֶק "Dammeseq" [dam-meh'sek] or similar variants, but is of foreign origin and may signify "silent is the sackcloth weaver." Well, there it is. Hiram, prince of the Phoenician Tyre, supplied the building materials for Solomon's temple (1. Kings 5:1–10, 7:1–8; 2 Chron. 2:11–14). Ptolemy's Talatha on the Tigris River in Babylonia appears in his *Geography* (5.19. tabula IV Asia).

56 See Gen. 3:14, 18, 24; Herodotus (3.108–9).

57 The Nestorians were sectarian followers of the Syrian ecclesiastic Nestorius, Patriarch of Constantinople (d. c. 451), who held that the divine and human natures of Christ remained distinct. See Mather's *Threefold Paradise* (96) and *India Christiana* (1721).

Lett us first begin with the Text,

Gen. 2.8, 10.

The Lord God planted a Garden Eastward in Eden, – And a River went out of Eden, to water the Garden; and from thence it was parted, & became into four Heads,

The Hebrew Original more exactly tells us, It was, *a Garden in Eden from Kedem*: that is, on the East-side of *Kedemah*; or, in the Countrey of, *Eden*, towards the East of it. Wee'l thus paraphrase it; This Garden lay in the Countrey of *Eden*, East from *Kedemah*, a Territory in & near *Aram-naharaim*, or, *Syria* of the Rivers; that is, *Mesopotamia*, or, *Armenia*; nigh to the River *Uphrates*, where the *Children of the East*, or, *Kedemah*, so often mentioned by *Moses*, & other Sacred Writers, had their Ancient Residence.⁵⁸

The Region of *Kedemah*, in a fair Map, would Illustrate Scriptures not a few. Hence it was that the *Wise Men* came to worship our Lord; the King that [Num. 24.7.] is to bee *Higher than Agag* (or, *Gog*, as the Samaritan has it; that is, the *Turk*.) Tis the Countrey, which I suppose called, *Anatole*, or, *Oriens*, in the, *Themata* of *Constantine*; & so tis mentioned in the *Notices of the Empire*, exhibited by *Pancirollus*; and here t'was that *Zenobia*, the Queen fam'd in History, Ruled.⁵⁹

⁵⁸ The substance of the excerpt from Lee's lost manuscript also appears in Huet's *Treatise* (chs. 3–5, pp. 26–54). Locating the terrestrial Paradise in seventeenth-century geography was crucial to many who had begun to question the authority and inspiration of the Bible. The translator of Huet's French *Treatise* puts the issue squarely: "Our first Parents, READER, were turned out of Paradise for their Disobedience: Many of their Posterity endeavour by their Disbelief of *Moses's* Writings, to turn Paradise out of the World. To stop and correct this Humour, several Learned Books have been put in Print; and this [Huet's *Treatise*], the last of all" (*Treatise* A2). Thomas Burnet, for one dismissed such pious quests for Paradise, because the Noachide Flood completely reshaped the earth's surface and thus destroyed all traces of the antediluvian Eden (*Sacred Theory*, bk. 1, ch. 10–11; bk. 2, ch. 1). See also Simon Patrick on Gen. 2:10–14 (*Commentary* 1:12–13) and Marmaduke Carver's *Discourse of the Terrestrial Paradise* (1666).

⁵⁹ According to a 6th-century Eastern tradition, the three Wise Men or Magi (Matth. 2:1) are called Caspar, Melchior, and Balthasar (*Collectanea et Flores*, PL 94. 0541B–C). The Samaritan Pentateuch (Num. 24:7) identifies Agag with Gog, in Walton's *Polyglotta* (1:653). Generally, Gog of Magog (Ezek. chs. 38, 39) is identified with Gyges, king of Lydia (Asia Minor). Most millennialists in Mather's time identified Gog of Magog with the Turks, the powerful Ottoman Empire, which played a significant role in Anglo-American eschatology. See Joseph Mede, *Paraleipomena* (28) and Mather's "Where to find *Gog* and *Magog*," in *Threefold Paradise* (292–94). The Byzantine emperor Constantine VII Porphyrogenitus (905–59) reports in *De Administrando Imperio* (50.96–100) that during the time of Leo, several garrisons of soldiers were transferred to "Anatolikoi" province (the plateau-region of W Turkey). The Italian lawyer, antiquarian, translator, and author, Guido Pancirolli (1523–99) excerpted this work in his *Notitia utraque dignitatum cum Orientis tum Occidentis ultra Arcadii* (1593), but he is now best remembered for his popular *History of Many Memorable Things Lost* (1715). Zenobia, or Bath Zabbai, famed queen of Palmyra (267–72), conquered much of Asia Minor, but surrendered to Aurelian when he besieged Palmyra.

Here then, Lett us first look out for the Land of *Kedemah*, which lay *West* unto the Countrey & Garden of *Eden*. It had its Denomination from *Kedem*, [Gen. 25.15.] one of the Sons of *Ishmael*; whose Children gave Names unto their Cities & Castles, whereof wee find Remnants in the Writings of the Ancient Pagans, & so may from thence, deduce their true Scituation.

It is recorded of *Ishmael*, [Gen. 16.12.] Hee was *to Dwell in the Presence of his Brethren*: *עַל פָּנֵי* or, before their Face; that is, on the East-side, of the Habitations of the Sons of *Sarah* & of *Keturah*: the Usage of Adoration towards the *East*, made *This* a Phrase for *That*. Accordingly, wee find *Abraham* disposing his Children by *Keturah* [Gen. 25.6.] into the Land of *Kedem*; a Land, it seems, known by that Name, when this Book was written: That so they might bee seated near to the Posterity of *Ishmael*: For which Cause, *Ishmaelites* and *Midianites*, are so Joined, as they sometimes are in the Sacred Story: [see Gen. 37.25. and Judg. 8.1, 24.]⁶⁰

You may now meet with the Children of *Keturah*; on the East-side of Mount *Gilead*, & *Hermon*, towards *Uphrates*; and more Southwardly towards *Edom*: Which may bee | Part of the Reason, why *Laban* went with *Jacob*, no farther than that Mountain; for it was the Limits between those Eastern People, and the *Amorites* in the Land of *Canaan*. [118v]

Zimran was the first of these. [Gen. 25.2.] Of him, the petty Kingdomes of *Zimri* [Jer. 25.25.] had their Appellation: called the *Zamareni* by *Pliny*, lying near the *Cennessari*, (now, *Quennessari*) in the Nubian Geographer: Twenty Miles west of *Haleb*, or *Aleppo*, by *Ptolomy* called *Chalybon*.⁶¹

Jokshan was the next; whose Offspring & Countrey, seems to bee *Casama*, in *Ptolomy*.

As *Medan*, the Third, seems to bee the adjacent *Odmana*, in that Author.⁶²

Midian, lay near Mount *Gilead* of old; but in their Migrations marched further towards the Red-Sea; where *Ptolomy* gives us *Modiana*, and *Madiana*.

⁶⁰ The Hebrew phrase *עַל פָּנֵי* [al-panee] signifies “before their face” or “in their presence.” After *Sarah*’s death, *Abraham* married *Keturah*, who bore him six sons: *Zimran*, *Jokshan*, *Medan*, *Midian*, *Ishback*, and *Shuah* – the progenitors of various N Arabian tribes in SE Palestine (Gen. 23:1–2, 24:67, 25:1–4).

⁶¹ See also Mather’s *Threefold Paradise* (97). *Pliny* (6.32.158) and *Ptolemy*, *Geography* (5.14). The title “Nubian Geographer” is a misnomer for *Idrisi* (*Edrisi*), the Arab historian and geographer *Abu Abdullah Mohammed Ibn al-Sharif al-Idrisi* (c. 1099–1166 or 1180) of Cordova (Spain), medieval traveler and advisor to King *Roger II*, Norman king of Sicily. An abridgement of *Idrisi*’s famous Arabic geography was translated into Latin by the Maronite scholars *Gabriel Sionita* and *Joannes Hezronita* and appeared as *Geographia Nubiensis* (1592, 1619), the title of which gave rise to the misunderstanding of the author’s origin. Mather’s reference appears in *Geographia Nubiensis* (1619), clim. 4, pars 5, pp. 194, 196.

⁶² *Odmana*, a town in *Palmurene*, is listed in *Ptolemy*, *Geography* (5.14. tabula IV Asia).

And in the *Peutinger Tables*, we have *Medeia*, or *Midian*, a City, about Forty Miles from *Elush*, or, *Alush*, & Eighty Miles from *Paran*, near the Red-Sea.⁶³

Ishbak, affords us; the *Scabiosa Laodicea*, upon the River *Orontes*; near *Emesa*, or *Emissa*; in *Ptolomy*, styled, *Cabiosa*.⁶⁴

Shuach, (whereof was *Bildad the Shuhite*, by *Procopius* on the *Kings*, called, *Sauchæorum Tyrannus*;) gives us the City *Sucta*, in *Ptolomy*, and in the *Peutinger Tables*, about Sixteen Miles from *Gadara*.⁶⁵

Of *Sheba*, the Grandson of *Abraham*, by *Jokshan*, we have *Sabe* in *Ptolomy*; Southwest of *Palmyra*, and north of *Aurana*, or *Hauran*: and hence are denominated, the *Arabes Scenitæ*, *Sabæi*, of *Pliny*; These were the *Sabeans* that infested *Job*; & here seems to have been the *Aram-zobah*, in Scripture; and *Asabajah*, in the *Notices* of the Eastern Empire.⁶⁶

Dedan, the brother of *Shebah*, dwelt not far off; – about four Miles from *Punon*; & hence do seem to be [Isa. 21.13.] the *Travelling Companies of Dedanim*. This *Punon* was the Place, where the *Brazen Serpent* was made, of the *Phennesia Metalla*, often mention'd by the Ancients, & called, *Metallofenum*, by *Jerom*; and *Phenustus*, by *Gul. Tyrius*; and, *Pinon* a Dukedome of *Edom*, [Gen. 36.41.] and *Diafenis* in the *Notices*.⁶⁷

⁶³ Modiana, a town on the Arabian Gulf, is mentioned in Ptolemy, *Geography* (6.7. tabula VI Asia). Mather's "Peutinger Tables" refers to the *Tabula Peutingeriana* (1598), segmentum (IX.4–5), a third- or fourth-century Roman road map, consisting of twelve sections on a long, narrow strip, which survives in the copy made by the German scholar, Orientalist, and antiquarian Konrad Peutinger (1465–1547) of Augsburg.

⁶⁴ The *Scabiosa Laodicea* (shabby Laodicea) on the River *Orontes* can be found in Strabo (6.2.9; 16.2.7). The city of *Emesa* (*Emisa*), in *Apamene*, is listed in Ptolemy's *Geography* (5.14, 16. tabula IV Asia).

⁶⁵ Shuah, the sixth son of *Keturah*, is believed to have been the ancestor of *Bildad* (Job 2:11). In the LXX (Job 2:11), *Bildad* is called Σαυχέων Τυράννος [*Saucheon Tyrannos*], or the Prince of the *Sauchaeans*. *Procopius Gazæus* (c. 475–c. 538), biblical exegete of *Gaza*, identifies *Shua(c)h* with *Sauchæorum Tyrannus* (Gen. 25:2), in his *Commentarii in Libros Regum et Paralipomenum* (1620). Ptolemy lists *Gadara*, a town in *Coele-Syria*, and *Decapolis*, in his *Geography* (5.14. tabula IV Asia), and Peutinger, *Tabula Peutingeriana* (segmentum X.1).

⁶⁶ Ptolemy identifies *Sabe* (*Saba*) as a town in the center of *Arabia Felix*, in his *Geography* (6.7); *Pliny* (5.21.87). For *Aram-zobah*, see Ps. 60:1, and for the *Notices*, see Pancirollus's edition of *Notitia utraque dignitatum* (1593, 1623).

⁶⁷ Made of copper, the brazen serpent of *Moses* (Num. 21:4–9; 1 Cor. 10:9) healed all faithful Israelites, whose lengthy peregrination is believed to have taken them to a campsite at *Punon* (Num. 33:41–43). The Latin Church Father *Jerome* (c. 340–420) mentions this "metallofenum," or rather "metallum aeris fanum," in his geography of Hebrew places, *De situ et nominibus locorum Hebraicorum* [PL 23. 855D; see also PL 23. 199]. *Guillelmus Tyrensis*, or *William of Tyre* (c. 1130–87), archbishop of *Tyre* (1175), wrote one of the most important medieval historiographies, *Historia rerum in partibus transmarinis gestarum* (begun 1169) and mentions "*Phenustus*," a city in *Becerra* (*Arabia*) [PL 201. 209]. Both "*Phenustus*" and "*Diafenis*" (*Diaphenum*) are listed alphabetically in *Lexicon Universale* (1677, 1698), by *Johann Jacob Hofmann* (1635–1706), Swiss professor of Greek at the University of Basel. Mather revisits this topic at greater length in his annotations on *Numb. 21: 9* and explores the typological

As for *Ashur*, the Son of *Dedan*, as *Assyria* is by *Strabo* called *Atyria*, so, hee may well afford us, the *Atera* of *Ptolomy*, near *Casama*; lying somewhat North of Mount *Alsadamus*, or Mount *Hermon*, or *Syrion*, the South-Eastern Part of *Lebanon*.

Letush may bee imprinted on the *Latavi*, of the *Notices*, in Parts adjacent unto *Palmyra*.⁶⁸

Leum hath Affinitie with *Luma*, in *Ptolomy*, South-East of *Aurana*, or *Hauran*, of *Ezekiel* [chap. 47.16.] in the same Wilderness. *Hauran*, was a famous Place, built on a Mountain of Three Ridges, mentioned by *Niger*. And may not the *Emims*, remember this Name, with a /ʔ/ præfixed?⁶⁹

Ephab [whereof see Isa. 60.6.] is *Papha* with *Ptolomy*; and perhaps *Aphaca* in *Lebanon*, where stood the Temple of *Venus Aphacitis*, between *Heliopolis*, & *Byblus*.

Epher; or, *Geber*; *Gabara*, lying N. E. of *Aurana*, in *Ptolomy*.

Hanoch; *Anetha*, or, *Canacha*, in *Arabia Petraea*; lying East of *Cletharro*, which is a Name corrupted for *Beth-ar*, in *Moab*.⁷⁰

Abidah; In *Ptolomy*, *Eboda*, near *Maliattha*, or, *Amalek*. This may well bee the ὄβοδα, of *Stephanus*, by him call'd, Χωριον Ναβαταίων, a Region of *Nebajoth*.

Eldaah; possibly, the *Allata*, of *Ptolomy*; among *Rhaabeni*, in the South of *Arabia Deserta*.⁷¹

Behold, how much of Scripture-Geography, I have already Illustrated unto you! You may see, how long the Ancient Names of Places remained upon them, & laying of *Ptolomy* with *Moses* you see where to find them: especially mountainous Countreys, which were not so liable to bee subdued, by Strangers.

relationship between the brazen serpent of Moses and Christ in *Zalmonah: The Gospel of the Brasen Serpent in the Mosaic History* (1725).

⁶⁸ Aturia, in Strabo (16.1.1, 2, 3); Atera, a town in Palmurene, in Ptolemy, *Geography* (5.14. tabula IV Asia). Strabo (16.1.1) calls Mt. Alsadamus by the name of Mt. Zagrus. Latavi probably appears in Pancirollus's *Notitia dignitatum* (1623).

⁶⁹ Luma, an inland town in Arabia Deserta, is located in Ptolemy, *Geography* (5.18. tabula IV Asia). The Venetian Renaissance geographer Dominicus Marius Niger (fl. c. 1490–c. 1520) calls the mountain ridge “Luma” and identifies its location in *Geographiae Commentariorum libri XI* (1557), “Geographia Asiae,” comment. 4, p. 524. The Hebrew letter is “lamed.”

⁷⁰ For Papha (Paphara), a town in the district of Cyrrhastica (N Syria), see Ptolemy, *Geography* (5.14). The temple of Aphrodite at Aphaca was destroyed by Constantine the Great. Gabara (Gubba) and Cletharrho are located in the interior of Arabia Petraea or “Stony Arabia” (the region including the Sinai Peninsula and modern N Saudi Arabia) – all listed in Ptolemy, *Geography* (5.16, 18).

⁷¹ Ptolemy's Eboda, a town in the interior of Arabia Petrea (*Geography* 5.16. tabula IV Asia) is here identified with the Greek name “Oboda” and “Xorion Nabataion” (the Place of the Nabataeans), in Stephanus's *Ethnica* (482.15), a valuable study of ancient place names (60 books), by the Byzantine grammarian and lexicographer Stephanus (6th c. CE). See also Strabo (16.4.24). The Al(l)ata among the Rhaabeni in Arabia Deserta (Syrian Desert) appears in Ptolemy's *Geography* (5.18. tabula IV Asia).

Thus the Sons of *Abrahams* Concubines, were together placed in *Kedemah*, or the East Countrey; Eastward from *Canaan*, which was intended for *Isaac*.

But were not the *Ishmaelites* also seated hereabouts?

They took their general Name of *Hagarens*, from their Mother *Hagar*: or from a Name of that Sound, signifying *A Rock*. Their first Bounds were in the Wilderness of *Paran*, from *Havilah* to *Shur*, [Gen. 25.18.] that is, from *Eloth*, or *Elana*, by the Red-Sea, to *El-Toro*, on the same Strand. By some they are styled *Agareni*, and *Agrei*; & their chief City is by *Stephanus*, called Ἑγρᾶ: And, *Hagiar*, or, *El-hagiar*, by the *Arabians*. *Jerom* (*de locis*) tells us, That *Hagiar*, or, *Petra*, was Ten Miles North of *Eloth*, by the Red-Sea.⁷²

Lett us now take an orderly View of their Castles and Cities.

Nebajoth, the eldest Son of *Ishmael*: His Countrey is called, *Regio Nabathæa*, & his Dominions are, in *Ovid*, *Regna Nabathæa*; & the chief City thereof, *Pliny* calls, *Petra*. Hence came the *Fat Rams* of *Nebajoth*, [Isa. 60.7.] whose Tails were so broad & large, that they laid them upon Sleds to bee drawn after them, & were forty Pound in Weight. This is the City, from whence, tis thought, *Arabia Petraea*, derives its Name: compassed, as *Pliny* saies, *Montibus Inaccessis*. *Malchus* was King of this *Arabia*, in *Cæsars* Time; and *Aretas* [2. Cor. 11.32.] in the Apostle *Pauls*. In this Countrey, with *Stephanus* wee find *Saraka*, [119r] [possibly the same with *Masrekah*, Gen. 36.36.] whence the | *Saracens* had their Name. And several other Places & Peoples, which it will not much serve our present Purpose, to mention.⁷³

72 See also Mather's *Threefold Paradise* (98). The Ishmaelites are descendents of Abraham's son Ishmael by his secondary wife Hagar (Gen. 16:15). The chief city "Hegra" is listed in Stephanus (260.11). Jerome's "Concerning Places" refers to his *De situ et nominibus locorum Hebraicorum*, which lists "Hegra" (# 282) in [PL 23. 924B].

73 Nebajoth (1 Chron. 1:29) is to have settled *Regio Nabathæa*, or the Nabathean Regions, which Ovid calls Nabathæan Kingdoms (*Metamorphoses* 1.61), which Pliny calls Petra (5.21.87; 6.32.144). Mather's reference to the fat rams of Nebajoth (Isa. 60:7), whose weighty tails are of a kind with the cluster of grapes from the brook of Eshcol (Num. 13:23), typify the fruitfulness of the land. The source for these stupendous rams is Herodotus (3:113), who mutters something about two kinds of sheep – a long-tailed one, which drag their furry tails (4 ½ feet) behind them on carts to avoid injury; and a thick-tailed sheep, with a tail 1 ½-foot wide. In his *Geographical Historie of Africa* [1600], bk. 9, p. 341), the Islamic scholar of Granada Leo Africanus, aka. Hassan Ibn Muhammad Al Wazzan Al Fasi (c. 1485–c. 1554), knowingly relates of African rams near Cairo with tails weighing ten, even twenty pounds. Some of these Egyptian rams are so well fed, he reports, "untill their tailles growe so bigge that they cannot remooove themselves from place to place" and must pull their tails behind them on "little carts." Yet others had tails weighing "fower-score pounds," even "an hundred and fiftie pounds weight." See also Ludovicus Vartomannus (*Travels* 87). Pliny (6.32.144) relates that Stony Arabia is surrounded by "inaccessible mountains." King Malchus of Arabia Petraea was Caesar's ally during the Roman conquest of Egypt (c. 40 BCE); Aretas IV (BCE 9–39 CE) was an Arab ruler of Damascus at the time of St. Paul's escape from that city. Finally, Stephanus lists Saraka [Σάρακα] (*Ethnica* 556.3), supposedly the etymological original of the Saracens (Bedouin tribes along the Syrian frontier), whose name was later applied to the Muslim Empire before the Turkish conquests.

Kedar; from /קדר/ *obscurus fuit*; because living in a Dark Wilderness. [Compare Psal. 120.5. *Meshech* was *Kedars* Brother.] The Name of their City lies buried in *Ptolomies* Ἀδρα, in the South Part of *Arabia Petraea*, not far from *Petra*. They are called, *Cedrei*, by *Pliny*; and they are those Men of *Kedemah*, joined with *Hazor*, [Jer. 49.28.]⁷⁴

Abdeel; or, the *Adubeni*, or, *Augubeni*, in *Junius*.⁷⁵

Chisbam; the *Muasemones*, near Mount *Zamatha*, in *Arabia felix*.

Mishmah; where *Zagmais*, and the *Rhaabeni*, in *Ptolomy*, near to *Rabba*.

Dumah; *Dumetha*, among the *Rhaabeni*; and *Dumatha*, in *Stephanus*.

Massah; Μεσσην in *Stephanus*; the *Masani*, between *Euphrates* and *Tigris*, in *Ptolomy*; and the *Meshech* of the Psalmist. [Psal. 120.5.]⁷⁶

Hadar, or *Chadar*: the *Atharite* or *Athritæ*, in *Junius*. I take this to be the *Hazor* of *Jeremiah*, [Jer. 49.28.] where the petty Kingdoms of *Hazor*, are those of the *Nabathæans*: *Napata*, and *Adara*.⁷⁷

Tema, or, *Thema*; near the Mountains of *Arabia Felix*. The *Temanite* was here.

Jetur: The *Jturei* in *Trachonitis*, [Luc. 3.1.] a Part, of *Hermon*, in *Cælo-Syria*. Here were the Συρμαῖοι, or the *Hermonites*, in a Plain between the *Nomades* and the *Nabathæans*: and near them, the Σαλαμίοι, or such as Quartered about *Salmon*, [Psal. 68.14.] in *Stephanus*.⁷⁸

⁷⁴ The Hebrew name *Kedar* [kay-dawr] [Strong's # 6938], signifies "dark" or "to make dark" (Gen. 25:13). Mather here copies Lee's error and mistakes the name of Noah's grandson *Meshech* for the name of *Ishmael's* fifth son *Mishmah* (Gen. 10:2, 25:13–15; 1 Chron. 1:5, 29–31; Ps. 120:5). *Ptolemy* lists "Adra" in his *Geography* (5.14, 16. tabula IV Asia), and *Pliny* (5.12.65) mentions the Arabian *Cedrei* who live near the *Nabataeans*.

⁷⁵ Again, Mather errs and mistakes *Ishmael's* son *Adbeel* (Gen. 25:15) for *Abdeel* (Jer. 36:26). *Franciscus Junius*, or *François Du Jon* (1545–1602), is the learned *Huguenot* theologian, professor of theology at *Heidelberg* and *Leiden*, and translator (with *Tremellius*) of the Hebrew OT into Latin (1576–79). *Junius's* reference appears in his annotations on Gen. 25:15, in *Biblia Sacra* (1593) 1:28, note 15. See also *Ptolemy's Geography* (5.18. tabula IV Asia). Mather owned a copy of the second edition of *Biblia Sacra* (1593).

⁷⁶ *Chisbam* should be *Mibsam*, *Ishmael's* fourth son (Gen. 25:13), located in "Arabia the Happy," the ancient territory of *Yemen*, renowned for its fertile land and prosperous people, in *Junius, Biblia Sacra* (1:28, n 15). *Mishma*, the fifth son of *Ishmael*, is associated with *Rhaabeni*, in *Ptolemy, Geography* (5.18). *Stephanus* associates *Dumah*, *Ishmael's* sixth son (Gen. 25:13) with *Dumatha* (*Dumaïos*), in (*Ethnica* 54.15). Likewise, *Massah* (*Ishmael's* seventh son) is equated with Μεσσην "Messeneh" (*Stephanus* 89.10 and 447.14 ff) and with the *Masani*, in *Ptolemy (Geography* 5.18).

⁷⁷ *Ishmael's* eighth son *Hadar* is by *Junius* associated with *Athritæ* (*Biblia Sacra* 1:28, n 15). For *Adara*, see *Ptolemy's Geography* (5.18).

⁷⁸ For *T(h)ema*, *Jetur*, the *Ituraei* in *Trachonitis* (a volcanic region of the NE Transjordan, in High Syria), see *Junius (Biblia Sacra* 1:28, n 15). The "Surmaïoi" and "Salamïoi" can be found, respectively, in *Stephanus* (593.13, 14; and 550.12).

Naphish, or, *Nabis*: The *Nubei Arabes*, of *Junius*; in or near *Lebanon*. Possibly, *Noba* was here. [1. Chron. 15.19.]⁷⁹

Kedemah: – in the Land of the *Kadmonites*, giving denomination to the whole Country.

Here were the Posterity of *Hagar* mostly randevouzed.

Wee are still on the West-side of *Paradise*, in the Land of *Kedemah*: and I know not how to leave that Illustrious Land, until wee have entertained ourselves, with further Observations upon some of its Inhabitants, and Illustrations of the Texts that mention them.

That Land, hitherto undescribed by any, lay, South of *Aram*, or, *Syria*; East, of *Canaan*; North, of *Edom*, & *Arabia* the Happy: And West, of the Region of the Ancient *Eden*.

In this Country, wee find *Job*, with his Friends, inhabiting. And in the *Notices* of the Eastern Empire, and in the *Themata*, wee find here a peculiar Province, termed, *Oriens*, κατ' ἑξοχῇ, whereof, *Zenobia*, so often mentioned, was Queen: as I have already told you. *Job*, was the *Chief* [Job. 29.25.] in this Region. His Head-City was עֲרֵץ / *Gutz*; by the Arabian Geographers called, *Algutze*, or, *Algauta*. The People are called, *Autai*, by *Pliny*, and *Æsitæ*, by *Ptolomy*, and by *Niger*, his Explanator: The City itself, *Ciasa*, or *Cæasa*, and *Cæsa*, South-East of *Palmyra*.⁸⁰ The Country, Αυστις, by the LXX, and the City, *Auza*, somewhat North of *Teman*. This *Cæsa*, or, *Uz*, is by *Ptolomy* placed in the Latitude of 32.^{gr} 50.^{min}. The *Æsitæ*, which are by some thought so called, from אֵשׁ / *Ignis*; because they were Worshippers of the *Fire*, the *Sun*, & the *Stars*; and judg'd the same with the *Zabij*, celebrated in many Authors, who may bee so styled from worshipping *Zabaoth*, or the Hosts of Heaven: People of the same Complexion, with the Chaldeans of *Ur*, who, worshipped *Ur*, the great *Light* of the *Sun*, and were great Students in *Astronomy*.⁸¹ These extended their vain Superstitions thro'

⁷⁹ *Naphish*, Ishmael's eleventh son (Gen. 25:15) is by *Junius* associated with the Arabian Nubians (*Biblia Sacra* 1:28, n 15). *Noba(h)* is mentioned in Num. 32:42 – not in the Chronicles.

⁸⁰ See also Mather's *Threefold Paradise* (99). For the *Notices*, see Pancirollus, *Notitia utraque*. The *Themata* bestows on *Oriens*, the kingdom of Queen *Zenobia* (267–272 CE), the honorific “in accordance with its eminence.” See also Rufus Festus *Breviarium rerum gestarum populi Romani* (4th c. CE), cap. 24. The homeland of *Job* (Job 1:1) is commonly identified as *Uz*, or עֲרֵץ Uwtz [Strong's # 5780]. Among the Arabian geographers generally consulted at the time are Alfragan, i.e., Achmed Ibn Ketir al-Farghani [Alfergan, Alfragan] (c. 840), an astronomer who worked for Kalif Al-Mamun; and Abulfeda, i.e., Ismail Abu'l Fida (1273–1331), the historian and geographer of Damascus, whose *Geographia* [Thakwim el-Boldan: The True Position of the Countries] was translated into Latin and published as early as 1650 (Huet, *Treatise*, ch. 2, p. 24). *Pliny* (6.32.158) calls them *Autaci*, and *Ptolemy* calls them *Ascitæ* (*Geography* 6.7. tabula VI Asia), and *Dominicus Marius Niger*, “aesitæ populi,” in his *Geographiae Commentariorum* (1557), comment. 4, p. 524.

⁸¹ The Greek “Ausitis” (LXX, Job 1:1) is the name for *Job*'s homeland. *Ptolemy* lists *Caesa* (Gaesa), a town in Arabia Felix, in his *Geography* (6.7.); Mather's Hebrew term seems inaccurate and should read אֵשׁ “esh” (aysh) [Strong's # 784]; signifying “fire,” it is associated with Zoroaster (Zarathustra), a Persian prophet (7th–6th c. BCE), whose adoration of the supreme god

all these adjacent Regions; the *Superstitions* infinitely detested & condemned [Jer. 10.2.] in the Word of God. They dwelt all along the Banks of *Uphrates*, up as far as *Harar*, where dwelt *Laban*, one of those poor *Star-gazers*, who composed (as is judged) his *Talismanical* Gods of certain Metals, imprinted with a *Lion*, or *Scorpion*, or the like, when the Sun & Moon faced one another with benign Aspects, from the same Triplicitie, & in proper Houses, & Mansions of the Heavens; for the Designs of Divination: and therefore, by *Rachel*, his Daughter, stolen from him.⁸²

Teman, the City of *Eliphaz*, was well-known to the Romans; having long been a *Præsidium*, or *Garrison* of theirs, among the *Arabians*. *Jerom*, in his Book of *Hebrew Places*, putts it at five Miles distance off *Petra*; but it is fifteen, in the Greek Copy of *Eusebius*, which was *Jeroms* Original. The *Peutinger* Tables have it, One & Twenty Miles from the Temple, *Ad Dianam*; which I suppose, was the Idolatrous *Fanum* of the Romans, on, or near Mount *Horeb*.⁸³

Sue, the City of *Bildad*, had its Name from a Rock. It is called, *Socho*, *Sueth*, and *Sueta*, by the Romans *Capitolias*; & it is described at large by *Gulielmus Tyrius*. Its exact Position is in the *Peutinger* Tables: and this Prince of it is called, *Sauchæorum Tyrannus*, who are the *Saccæi* of *Ptolomy*, near the *Agrei*, or *Agarens*, in the same Vicinage of *Arabia Petræa*. *Capitolias*, is by *Peutinger* fixed Ten Miles from *Edrei*, and this, Twenty Four, from *Dozzals*; the same, it may bee, is, whats called, *Saveh*, or, *Kings-dale*, in *Genesis*. [Gen. 14.17.]⁸⁴

Ahura Mazda is connected with the worship of fire, the sun, and the stars (see Hyde, *Historia Religionis*, cap. 9, pp. 161–69). Zabaoth or Sabaoth (from “tsebaoth”), signifies “The Lord of Hosts” (Rom. 9:29). The city of Ur (near Bozra, S Iraq) is believed to be the birthplace of Abraham (Gen. 11:28). Mather discusses the “*Zabij*” (Zabians, Sabians, Sabaeans) – allegedly a Chaldean people – in his essay “V. Antiqua. Or, Our Sacred Scripture Illustrated with some Accounts of the *Sabians* and the *Magians*,” in “Appendix. Containing some General Store,” following Mather’s commentary on the Revelation. For the rise and fall of the Zabians as an “invention” of Maimonides, see J. Elukin, “Maimonides” and J. Assmann, *Moses the Egyptian* (57–72).

⁸² Laban’s teraphim (family gods) were stolen by Rachel (Gen. 31:30–35). For the origin and occult function of the teraphim as idols and as talismanic healing devices, see Gerard Vossius’s *De Theologia Gentili* (lib. 1, cap. 3, p. 20), Pierre Jurieu’s *Critical History* (2:77–109), and especially Jacques Gaffarel’s *Unheard-of Curiosities* (1650), part 2, chs. 6–7, pp. 141–246. See also Mather’s commentary on Gen. 31:19, in “BA” [401r–405r].

⁸³ See also Mather’s *Threefold Paradise* (99–100). Son of Eliphaz (Gen. 36:11, 15, 42; 1 Chron. 1:36, 53), the Edomite Teman also supplied the name for a region or city by that name. Jerome mentions it in his *De situ et nominibus locorum Hebraicorum* (“De Genesi” # 282) [PL 23. 924B], but relies on Eusebius Pamphilus’s *Commentaria in Isaiam* (1.80.37) for his source. *Peutinger’s Tabula Peutingeriana* lists T(h)eman in segm. IX.5. The Roman temple “To Diana” (Artemis) is dedicated to the protectress of women (Ptolemy, *Geography* 5.1. tabula I Asia). And the Roman god Faunus, protector of agriculture, is associated with the Arcadian Pan. One of Faunus’s temples stood near Mt. Horeb.

⁸⁴ Archbishop William of Tyre (Guillelmus Tyrius) describes the city Capitolias in his *Historia* [PL 201. 209]. *Peutinger* positions the city in *Tabula Peutingeriana* (segm. X.1–2), and

[120v] | *Naguamathi*, was the Seat of *Zophar*. It is corrupted into *Nazama*, in *Ptolomy*, and the Imperial *Notitiæ*. It signifies an *Ostrich*, which was a Creature frequent in those Wildernesses. It was near *Palmyra*: but if you would know the Position, with a more critical Exactness, I refer you to the Tables. All I am doing, at this Instant, is, to show you, with some general Hints, whereabouts you are, when you read the Scriptures.⁸⁵

In this Countrey of *Kedemah*, you'll find *Balaam* also. His Town, *Pethor*, was by the River *Uphrates*, and the Mountains of *Kedem*, on the East, by *Aram*; that is, *Aram Naharaim*, or, *Mesopotamia*. It seems to bee the *Betthara*, of *Ptolomy*, near the Mountains of *Aramenia*.⁸⁶

And in this Countrey you'll find *Jacob*, fled unto his Uncle, at *Harān*, & *Padan-aram*; for *Laban* probably had a great Interest in both of those Places. *Padan* I take to bee the *Aphadana*, of *Ptolomy*; and *Harān*, to bee the ancient *Carrae*, famous for the Overthrow of *Crassus*; and called *Charran*, by Holy *Stephen*. 'Tis not the same with *Hauran* mentioned by *Ezekiel*, [Ezek. 47.16.] which is the *Aurana*, of *Ptolomy*; standing in the *Peutinger*-Maps, Eighteen Miles East of *Adrianople*, or *Palmyra* of *Stephanus*, famous for *Palm-trees*, & answering the Name *Tamar*, or *Tadmor*, i.e. the *Palm-City*, a stronghold built by King *Solomon*, in this Wilderness.⁸⁷

Moreover, To pass by what wee read about this Land of *Kedemah*, in the Book of *Judges*: [Judg. 6.3. & 8.10. & 24.8, 11.] wee find it mention'd in the Story of Mens planting the World soon after the *Flood*.⁸⁸ [Gen. 11.2.] The Ark resting on Mount *Ararat*, in the Northern Parts of *Armenia*, they travelled thence first unto this *Kedemah*; the Countrey called, *East*, not in respect of *Ararat*, but of *Canaan*. As *Abraham* has it said of him, in another Place [Gen. 13.1.] *Hee went out of Egypt into the South*; altho' indeed it was *North* from *Egypt*: and the original Word should still bee kept here untranslated, *Negob*; *Hee went*

Bildad is the prince of the Sauchaeans (LXX, Job. 2:11); his city, Tyre, is listed in Ptolemy's *Geography* (5.14).

⁸⁵ See also Mather's *Threefold Paradise* (100). Zophar, the Naamathite, is one of Job's three comforters (Job. 2:11); Ptolemy lists Nazama as a city in Apamene (*Geography* 5.14). And finally, Peutinger lists Nazama in his *Tabula Peutingeriana* (segm. X.1–2).

⁸⁶ Betthara (possibly Bethauna) is listed in Ptolemy's *Geography* (5.17). However, a town called Bethar (7 miles SSW of Jerusalem), where Bar Kochba's final stand against the Romans was crushed, may also here be intended.

⁸⁷ Apphadana, a town in Mesopotamia near the Euphrates, and Carrae in the interior, are listed in Ptolemy (*Geography* 5.17. tabula IV Asia). Marcus Licinius Crassus Dives (c. 112–53 BCE), Roman senator and general in the Parthian campaign, was killed near Carr(h)ae. Charran (Acts 7:2, 4) is the location where St. Stephen, the first Christian martyr (Acts 7:57–60), gave a speech to the local council. Aurana, an inland town in Arabia Deserta, is mentioned in Ptolemy's *Geography* (5.18) and listed in Peutinger's *Tabula Peutingeriana* (segm. X.5–XI.1). Finally, Stephanus records Palmyra in *Ethnica* (498.7–8).

⁸⁸ There is no twenty-fourth chapter of Judges. The most likely scripture is Josh. 24:8, 11, which describe the Israelites' fight against the Amorites and the crossing over the Jordan River.

into *Negob*; that is, a Countrey in the South of *Canaan*, so called.⁸⁹ But the *Plain of Shinar*, whereto those first Companies came, is that which is called *Senagjar*, in *Golius*, and *Sinigarus*, in *Ptolomy*, which gave Name, as well to a *City*, as a *Plain*, on the South of the *Gordiean*, or, *Ararat* Mountains.⁹⁰ In this *Kedemah* wee likewise find [Gen. 10.30.] Mount *Sephar*, or, *Saphir*, that is, the Shining Mountain; where the Posteritie of *Shem* dwelt in the Parts adjacent unto *Mesha*, that is, Mount *Masius*. A Mount of this Name, *Shapher*, wee have in the Journeyes of *Israel*, thro' the Wilderness: [Num. 33.23.] it was in *Arabia Petraea*. And this might lead us, to Illustrate the Scituation of other Stages taken by *Israel* in those Journeyes, from the Tables of *Peutinger*, & *Ptolomy*: But I suspect, you begin to grow weary of tarrying thus long at *Kedemah*: and perhaps you wonder, where I design to carry you.⁹¹

To content you, I'll so far anticipate the Entertainment, which I have anon for you, as to tell you, That I hope, I shall anon determine the Countrey of *Paradise* to have been, the *Inter omnia*, or the principal Part, if not the whole, of *Mesopotamia*, between the two famous Rivers, of *Tigris*, & *Uphrates*: the same Countrey which the Arabians call *Algerive*.⁹²

But wee are not yett gott so far; Wee have hitherto been only surveying the *West-side* of *Eden*; the *Countrey* of *Eden*, is to bee sought in the East of *Kedemah*, and the *Garden* of *Eden*, in a particular Part of that Countrey, to bee e're long discovered.⁹³

Before wee come thither, Lett us a little view the *North Side* of *Eden*. Famous Rivers ran down the mountainous Craggs, in the *North* of *Assyria* and *Mesopotamia*, and imparted Innumerable Excellencies, to the Transcendent & Illustrious Countrey, which was of old called, *הַגִּבְרִי* / *Voluptas*, the *Countrey* of *Eden*, or, Delight: and by the Greeks, *Ἰδωνή* and *Adonis*. But, if you ask, which of those two Rivers, *Tigris*, or, *Euphrates*, did strike thro' the *Garden* of this *Eden*, before its Departure, into its four Branches, or *Divortia*, mentioned

⁸⁹ Negob (Negeb) is a desert area S of the mountains of Judah.

⁹⁰ Jacob Golius, aka. Gohl (1596–1667), is the Dutch Calvinist, professor of mathematics, and translator of Arabic manuscripts. Samuel Lee (Mather's immediate source) probably refers to Golius's *Lexicon Arabico-Latinum* (1653). Ptolemy locates Sin(i)gara on the banks of the Tigris River (*Geography* 5.17).

⁹¹ The Masius Mountains in Mesopotamia are also mentioned in Ptolemy's *Geography* (5.17). Mather's self-conscious address to his readers is understandable, given that accurate maps of the region were largely unavailable and seventeenth-century geographers were forced to turn to the classical mainstays of Greek and Roman antiquity. Mather's effort to identify ancient Canaanite and Israelite place names with their Greek, Roman, or Arabic equivalent is borne out by his desire to uphold the accuracy of the Mosaic geography and the philological verity of the Bible as text.

⁹² See also Mather's *Threefold Paradise* (101). "Inter omnia" signifies "among all things."

⁹³ It is important to remember that Mather and most of his contemporaries distinguished between the Garden of Eden (Paradise) and the Country of Eden, a region in which the pleasure ground of Adam and Eve was situated. For a debate on this issue, see Huet (*Treatise*, ch. 2, pp. 15–25).

in the Second Chapter of *Genesis*; I must shortly show you, that it was *Tigris*: *Tigris*, that sprang from the Mountains of *Elwend*, or, *Ararat*, a long Ledge of *Taurus* and *Caucasus*, on the North of *Media* and *Armenia*. Near hereunto Rose the River *Phasis* of *Iberia*; and the City *Cholcis* was near the Head of *Tigris*, where the *Golden Fleece*, as the Poets remarkably tell us, was kept by a *Dragon*.⁹⁴

You shall now Travel with mee, to the *East-side* of *Eden*. *Moses* acquaints us, [Gen. 3.24.] There were *Cherubims* placed with *Flaming Swords*, to keep the *Way of the Tree of Life*; and these were on the *East Side of the Garden*. Some learned Men Judge these to bee the Sulphureous *Lakes* thereabouts, continually Flaming Day and Night; which were beheld long after, by *Alexander* the great, with great Admiration: a Notable *Emblem*, &c a Probable *Effect*, of *Angels*, who are called [121r] *Flames of Fire*. These Fiery, | Bituminous, and Stupendous *Lakes*, are found in *Plutarch's* Life of *Alexander*, near *Ecbatana*, the Head-City of *Media*, call'd *Acbatana*, by *Ptolomy*, and in Sacred Writ, [Ezr. 6.2.] *Achmetha*; His Words are, *Χάσμα πυρὸς ἐν Εκβατάνοις*.⁹⁵ Wee read also in *Pliny*, of a *Burning Mountain* among the *Bactrians*, and *Medians*: And wee read of a Field of *Babylon*, that Burns, as it were in a Fish-Pond of an Acre in Quantity; and the same is by *Tibullus* glanced at; *Ardet Aractæis aut unda per hospita campis*: The strange Lake that Burns in the Fields of *Aracta*; that is, of *Erech*, [Gen. 10.{10.}] not far from *Babylon*. These Conflagrations, worse than *Sodoms*, continued for many Ages; and, I suppose, do still continue, or are apt on the least Occasions, to enkindle.⁹⁶

Moreover, when *Cain* went out from the Worship of God, in his Fathers Family, tis said, Hee dwelt in the Land of *Nod*, on the East of *Eden*: [Gen. 4.16.] which is call'd *Naid*, by *Jerom*. And it is added, Hee built a City, & call'd it by the Name of his Son, *Enoch*. Here probably is the Land, which the *Nubian* Geographer, calls *Nodha*; where is the City *Kir*, which is the same with the

94 The Hebrew עֵדֶן "ay-den" [Strong's # 5731], or Eden, signifies "pleasure" as does the Latin "Voluptas" and the Greek "Hedone" and "Adonis." *Elwend* is a chain of mountains in N Media, formerly called Orontes. Jason and the Argonauts in their quest for the Golden Fleece of Hermes's winged ram, guarded by a sleepless dragon at Cholcis (Ptolemy, *Geography* 5.9), are celebrated by the Greek poets Pindar (*Pythian Odes* 4.179–246), Apollonius Rhodius (*Argonautica* 2.1143–47, 4.123–82), and the Roman poet Gaius Valerius Flaccus (*Argonautica* 7.510–8.139).

95 The burning pits of bitumen near Ecbatana – which the Macedonian conqueror Alexander the Great (356–323 BCE) saw during his Parthian campaign into Syria and Medo-Perisa – are described in Plutarch's *Alexander* (35.1–2), in *Plutarch's Lives* (7:328), which also locates the "Xasma puros en Ekbatanois" or the "Chasm of fire among the Ekbatanae." The ancient city of Acbatana (also Ecbatana), in the interior of Media, is listed in Ptolemy's *Geography* (6.2).

96 Pliny (2.110.236–37) mentions the flames of Mt. Etna, of Mt. Chimaera (Lycia), the "coil of flame" at the Bactrian Cophantium, and similar flammable regions in Media. The Latin passage from Albius Tibullus (c. 54–c. 19 BCE), a Roman elegiac poet, translates "Or the strange wave burns in the fields of Aracta," which may be an adaptation of "aret, Araccæis aut unda Oroatia campis," i.e., "or the waters of Oroatis in the plains of Aracca (*Panegyricus Messallae* 3.7.142). Sodom, supposedly located near the "slimepits" or lakes of burning bitumen (Gen. 14:10), was destroyed in a conflagration issuing from heaven (Gen. 19:24).

City *Cyrus*, or, *Cyropolis*, of *Ptolomy*; upon the River *Kur*, in *Media*; mentioned by the Ingenious *Olearius*: whither the People of *Syria* and *Damascus* were, as I have told you, carried captive.⁹⁷ [Amos. 1.5.] And as for the City, *Enoch*, tis embalmed by *Mela*, by *Solinus*, by *Pliny*, and by *Ptolomy*, among the *Eniochi*, or *Heniochi*, in the Land of *Enochia*. And in the *Nubian*, wee read of the Clime called, *Kir-cajan*, and another called *Abil*, near *Nodha*, and *Candaul*. Hee speaks also of other Places, called, *Tel-becain*, that is, *Tel-beth-cain*, or, The Mount of the House of *Cain*. So, the first Man, that built a *City*, was the first *Wicked Man* in the World.⁹⁸

But lett us now take our Course to the *South Side of Eden*. And, Remem-
bring our former distinction between the Countrey of *Eden*, and the Garden of *Eden*, wee may here observe, That the Land of *Eden*, is the same, that the *Ara-
bians* now call, *Gesire*, or, *Diarbeck*; that is, the Province lying between the Two
Rivers *Uphrates* and *Tigris*; & reaching to the South Sea, into which those Rivers
are Disembogued. Unto this Purpose, *Ethicus*, in his *Cosmography*, notes, that
the River *Armodius*, illustrates the Region of *Adonis* [i.e. *Eden*, or, *Gezre*] and
Mesopotamia; and is Received into the *Persian Gulf*. This *Armodius*, I suppose
to bee *Armodus*, or the River of *Ormuz*, that is, *Tigris*. This was the *Countrey*.
But now the *Garden*, of *Eden* lies on the East-side of this Land of *Adonis*; It is an
Island of *Tigris*; on the South Side whereof, the River *Tigris* issuing out of that
pleasant Spott, is by several Cutts lett into *Euphrates*; which, with its branches,
deciphers the *Four Rivers*, or Heads of Water, mentioned in the Second of
Genesis, to bee divided, on the South-side of the Garden.⁹⁹

⁹⁷ See also Mather's *Threefold Paradise* (101–102). St. Jerome's place name "Naid" (Gen. 4:16) appears in his commentary *Quaestiones Hebraicae in Genesim* [PL 23. 945A–B], but does not signify the name of a country, but the quality of Cain's meandering hither than thither: "What the Septuagint translated as Naid is expressed in Hebrew as *Nod*, and is to be interpreted as *saleuomenos*, that is, unsteady, moving like the waves, and of an unfixed abode. The reference is not, therefore, to a land called Naid, as the mass of our people think; but God's decision is discharged in that he [Cain] wandered hither and thither as a wanderer and a fugitive" (*Hebrew Questions*, p. 35). The Arabic geographer Abu Abdullah Mohammad Ibn al-Sharif al-Idrisi (Edrisi) calls this region Nodha (Nodhair) in his *Geographia Nubiensis* (1619), clim. 3, pars 5, p. 110. Ptolemy lists the Median city Cyropolis in his *Geography* (6.2. tabula V Asia). And Olearius is the German philologist and ducal secretary Adam Oelschlaeger (1603–71), whose *Beschreibung der Newen Orientalischen Reisen* (1647) [second, expanded edition 1656] appeared in an English translation as *The Voyages & Travels of the Ambassadors* (1662), bk. 5, p. 197.

⁹⁸ See also Mather's *Threefold Paradise* (103). The city Enoch is mentioned by Roman geographer Pomponius Mela (fl. 40 CE) in his *De Chorographia* (1.99, 100, 110, 111), by his countryman Gaius Julius Solinus (fl. 200 CE) in *Collectanea Rerum Memorabilium* (15.17, 16), by Pliny (6.4.12–14; 6.5.16), and by Ptolemy (*Geography* 5.8. tabula II Asia). Idrisi mentions Kir-cajan (Kelcaian), Abil, and Tel-becain in his *Geographia Nubiensis* (1619), clim. 2, pars 8, p. 65 and elsewhere.

⁹⁹ Mather refers to *Cosmographia* (84), a hopelessly corrupted work based on first-century maps by Julius Aethicus (Ethicus, Aethikos Ister), who flourished in the 5th c. CE.

I. The River *Pison*, or, the *Fish-ful* River.

Omitting what *Pliny* writes, of *Eels* Thirty foot long, to bee caught in this River: I shall only tell you, That this River is called, *Pasitigris*. *It compasses the Land of Havilah*; [Gen. 2.11.] the Land, by *Strabo* called, *Chalonites*; and by some, *Chaulan*; but by *Benjamin of Tudela*, *Haoula*. Its *Compassing* that Land, means not an *Encircling* of it, but a *Winding* in and out, upon its borders. Tis true, there was an Ancient *Havilah*, upon the Strand of the Red Sea: [Gen. 25.18. and 1. Sam. 15.7.] the same which *Alah*, or, *Eloth*, or, *Elanoh*, or *Hailat*, in *Magirus*, upon *Ptolomy*.¹⁰⁰ Here dwelt *Havilah*, the Son of *Cush*; the Ethiopian of *Arabia*. But near this Place, there is no notable River to detain us. There is another *Havilah*, which lay, in or near the East *Indies*, in the Golden *Chersonese*; where is the Island of *Ceilan*, or, *Chaulan*, that is, *Havilah*: and the Plantation of *Ophir*, couched in *Hiphouros*, or, *Hippurus*, is in the same Island, of *Zeilan*. But there was a Third *Havilah*, from *Havilah*, the Son of *Joktan*, who dwelt near his Brother *Ophir*, and the rest of *Shems* Issue, in the Golden Countrey of *Arabia*, and afterwards colonised into more Eastern Countreyes of *Asia*, where wee find, a New *Havilah*, and a New *Ophir*. This is the *Havilah* of the Text now before us. In the very Mouth of the *Persian* Sea, wee light upon the Diving-places, or Oister-banks, for *Pearl*; and anon, sais *Arrian*, in his *Periplus*, of the *Red-Sea*, you have the *Χώρα πασινου*, *Regio Pasini*, or, Countrey of *Pison*; called also, *Vallum Pasini*, near the united Falls of *Tigris* & *Uphrates* into the *Persian* Gulf.¹⁰¹ The

¹⁰⁰ For Huet's attempts to locate and identify the P(h)ison River in the Land of Havilah, see his *Treatise* (ch. 7–8, pp. 66–97). Samuel Bochart's description of the four rivers in *Geographia* (pars 1, lib. 1, cap. 7–8, col. 30–35) is the ultimate source for much of what is described below. In Philemon Holland's translation of Pliny's *Naturall Historie* (1601), bk. 9, ch. 3, p. 235, "yeeles [eels] within the river Ganges of thirtie foot in length" are in our modern edition of Pliny (9.2.4) listed as "300 ft." (!) long – the River Ganges being frequently identified as the biblical Pison. Eels "Seven Foot" long with a "circumference Seven and Twenty Inches, the Weight Six and Thirty Pounds" were also caught at Maldon, Essex, if Samuel Dale's "Account," in *Philosophical Transactions* 20 (1698): 90–97, can be trusted. Strabo calls the region Chalonitis (11.14.8; 16.1.1). The Sephardic traveler and geographer of medieval Spain, Rabbi Benjamin (Ben Jonah) of Tudela (fl. 1150–1200), identified the Pison as the Egyptian Nile and consequently located Haoula or Havilah (Zawilah) in what is now modern Ghana (*Itinerary* 97). The commentator on Claudius Ptolemy's *Geography* and on the nine crystal spheres of the ancients in Ptolemy's *Almagest* is Johannes Magirus (? – 1596), professor of physics at the Lutheran University of Marburg (Germany). Magirus's popular Aristotelian Physics textbook *Physiologiae Peripateticae libri sex* (1597) was part of John Harvard's original bequest to Harvard and there used as a textbook. The *Catalogus Librorum Bibliothecae Collegij Harvardini* (84 [86]) lists the 1619 Frankfurt edition of Magirus's work. See also Samuel Eliot Morison, *Founding of Harvard* (265) and *Harvard College* (1:226–27, 233), as well as his "Harvard School of Astronomy" (6–7).

¹⁰¹ Havilah, the second son of Cush (Gen. 10:7), and Havilah, the second son of Joktan (Gen. 10:29) – each is to have given rise to various place names: (1) Havilah in the land of Eden, through which the River Pison (Araxes) flowed, has been associated with Colchis, NE Asia Minor, near the Caspian Sea; (2) Havilah on the Island of Ceylon (modern Sri Lanka); and (3) Havilah associated with Kualan, in NW Yemen, Arabia, a region settled by the Ishmaelites. For

People of *Chelfa* there, affirm themselves to have their Habitation in *Eden*. The *Bedolach*, *Bdellium*, or true Oriental *Pearl*, is here found, abundantly, near the Isle of *Baharem*. As for the *Gold* of *Havilah*, wee know the best *Gold* is in that Part of *Arabia*; (ῥαίλα of *Ptolomy*, is near the *Homerites* of *Arabia*;) & in such Plenty, that they exchange it for æqual Quantities of *Coper* and *Iron*. Here, *Ophir* was at first planted, near *Chesem*, or the *Cassanite*; & the Place called *Auphar*, in *Arrian* and *Ptolomy*; but by Removes carried further into *Asia*. *Solomons Ophir*, lay in the Second Plantation of the Sons of *Joktan*; & not far from the Bay of *Persia*, where *Strabo* affirms, that *Gold*, & transparent Stones were to be met withal. There | is one Raritie more, by *Moses* assigned unto *Havilah*; and that is, the *Onyx*, which some take for the *Sardonix*: as indeed Metals & Jewels, use to ly together; for our precious Stones are but the Flowers, Ebullitions, or Exudations, of *Minerals*. The *Onyx* is here called, *Soham*; and the *Nubian* Geographer, saies, *Du-Sohaim* was in the Land of *Chaulan*, or, *Havilah*: The Upshott is, This Land lay in the Easterly Part of *Arabia*, environed by the River *Pison*, which was a Fish-ful Branch of *Tigris*, after the Conjunction of *Uphrates*, & its Running down toward the *Persian* Sea, at *Teredon*, now *Belsara*, where all these Waters Tumble into the *Erythrean* Ocean. The Prophet *Ezekiel*, you know, fetches *Pearl* & *Coral*, out of *Eden*; in the South Part of the aforesaid Countrey.¹⁰² [122v]

the seventeenth-century debate about locating Havilah, see Huet (*Treatise*, ch. 8, pp. 83–87) and Bochart (*Geographia*, pars 1, lib. 2, cap. 28, col. 142–43; lib. 4, cap. 11, col. 225). Ophir, the eleventh son of Joktan (Gen. 10:29), is today associated with a region or city in S Arabia on Solomon's trading route. In Mather's time Solomon's famed gold mine inspired a whole host of fanciful interpreters who located Solomon's Ophir as far away as the South American Peru. Sir Walter Raleigh, *The History of the World* (1614), located Ophir in the East-Indian Molucca Islands (bk. 1, ch. 8, sec. 5, pp. 148–49); Manasseh ben Israel likes Peru as the most likely site of Solomon's Ophir (*Hope of Israel*, sec. 38, pp. 43–44), and Joseph Hall, in his *The Discovery of a New World* (1609), perhaps inspired by the region's legendary wealth, points toward the West Indies (A4v); long before them, however, José Acosta derides such pious endeavors in his *Naturall and Morall Historie of the East and West Indies* (1604), bk. 1, ch. 8, pp. 41–44, and follows Josephus in placing Ophir (Aurea Chersonesus) in East India (*Antiquities* 8.6.5). Augustin Calmet places Ophir in Armenia ("Ophir," *Great Dictionary*). Edward Wells rehearses the entire debate in his *Historical Geography of the Old Testament* (vol. 1, bk. 1, ch. 1, pp. 9–13). Mather employs a different set of sources on the fabulous gold of Ophir in his commentary on 2 Chron. 8:18. For a helpful synopsis of the different views see CBTEL. The Greek citation from *Periplus maris Erythraei* (35.12), a work on circumnavigation attributed to the Greek historian and Roman consul Lucius Flavius Arrianus, signifies in its Latin interpretation "Country of Pasini," "Region of Pasini," and "Wall of Pasini."

¹⁰² See also Mather's *Threefold Paradise* (104). Just like Havilah, Pison, and Ophir, the terms "Bedolach" and "B(e)dellium" (Gen. 2:12) are notoriously difficult to identify. Mather's contemporaries either thought they designate an aromatic gum, a crystal, amber, or believed they signified pearls. Josephus (*Antiquities* 3.1.6); the Greek translators Aquila, Theodotian, and Symmachus keep the term "bdellium," but evidently intend a sweet-smelling gum, in Origen's *Hexaplorum quae supersunt in Genesim monitum* (on Gen. 2:12) [PG 15. 165]; the LXX translates "bdellium" as "carbuncle" (Gen. 2:10) and as "crystal" (Num. 11:7); finally, Samuel Bochart (*Hierozycon*, pars 2, lib. 5, cap. 5, col. 673–80) identifies bdellium as pearls. Huet discourses on the signification of "bdellium" in his *Treatise* (chs. 10–11, pp. 91–102), but

II. *Gihon*.

This River is the same that is called, *Gyndes*, by *Herodotus*, *Tibullus*, *Am-
mianus Marcellinus*, and *Orosius*. The Poet speaks of,

Rapidus Cyri Dementia Gyndes.¹⁰³

A Channel cutt out of *Tigris* by *Cyrus*, was called so. But the Ancient *Gihon*, gave Title, in the *Dayes of Moses* to another Branch of Waters, issuing out from *Tigris*. *It compassed the whole Land of Ethiopia*: [Gen. 2.13.] which wee must understand of the *Arabian Ethiopia*; or, the Eastern, mentioned by *Homer*, of old: From whence came *Zerah*, with his vast Army, against *Judah*. [2. Chron. 14.9.] The Land of *Midian*, was a Part of that *Ethiopia*; where *Moses* married his Wife. The Word *הַסֶּבֶב* / *Circuiens*, may bee rendred, *Alluens*, *Allambens*. This River, in its pleasant *Maanders*, ran down, on the Eastern Side, of the *Arabian* Desarts; at last, it spreads itself in great Circuits, into the Lakes of *Chaldea*; & joining with *Tigris* & *Uphrates* united, they fall together, with a Joyful Roar, from a vast Mouth, into the *Persian Gulf*. Tis the Flood, which *Ptolomy* calls *Maarsares*, or, *Naarsares*, or the *Regius Fluuius*, issuing out of *Uphrates*, at *Siphara*, near *Naarda*, the University of the Jewish Rabbins; it rowls up & down

like most of his contemporaries, they turned to Matthew Poole's trusty *Synopsis Criticorum* (1669–76) vol. 1, col. 23, where the various positions and interpreters are itemized (*Works* 1:150). Mather's "Baharem" is the modern Bahrain island in the Persian Gulf. Ptolemy locates "Huaila," near the Homerites, a people in Arabia Felix (*Geographia* 6.7.41, line 9, and tabula VI Asia). Flavius Arrianus mentions "Saphar" (not "Auphar") in *Periplus maris Erythraei* (23.1), and so does Ptolemy (*Geographia* 5.19.6, line 5) and the region of the Cassanitae (6.7.6, line 1). Strabo (16.4.20) uses the disclaimer "it is said" that the gold mines in the Persian Gulf also carry "emerald" and "beryl." Moses's onyx stone (Gen. 2:12) is in Aquila's Greek version rendered sardonyx, an onyx stone (chalcedony) with interspersed layers of sard, in Origen's *Hexaplorum quae supersunt in Genesim monitum* (164) [PG. 15. 164]. For Mather's discussion of minerals, their origin, and qualities, see his "Essay 25. Of Minerals" (*Christian Philosopher*, pp. 22–29). And the Arab historian and geographer Idrisi weighs in for the location of Du-Sohaim in the land of Chaulan (*Geographia Nubiensis*, clim. 2, pars 5, pp. 49–50). Teredon (Diridotis), a city near the channel of Pison (Ptolemy, *Geography* 5.19. tabula IV Asia), lay near the modern city Abadan, where the Tigris and Euphrates flow into the Persian Gulf, which is an arm of the Indian (Erythrean) Ocean. Finally, the prophet Ezekiel relates how the riches of this region were traded all the way to Syria (Ezek. 27:16).

103 For Huet's discussion of the Gihon River, see his *Treatise* (ch. 12, pp. 103–16); The Mosaic Gihon River (Gen. 2:13) is here identified with the Gyndes, mentioned by the Greek historian Herodotus (1.189–90, 202); by Roman poet Albius Tibullus (*Panegyricus Messallae* 3.7.141); by Roman historian of Antioch Ammianus Marcellinus (c. 330–90 CE), in his *Historia* (23.6.40); and by Paulus Orosius (fl. 385–20), a Spanish historian, presbyter, and disciple of Augustine, in *Historiarum contra gentis* 2.6. [PL 31. 757A, note 3]. The Latin citation, which translates "The rushing Gyndes which maddened Cyrus," appears in Tibullus (*Panegyricus Messallae* 3.7.141) and alludes to the diversion of the Gyndes into many channels, by Cyrus the Great (c. 557–c. 530 BCE), the founder of the Persian Empire and conqueror of the Nabonidean Babylon (c. 539 BCE).

in many voluminous Windings, West of *Babylon*, & thence to *Volgesia*, *Borsita*, *Bibla Beana*, *Didigna*; and falls into *Tigris* at *Apamia*.¹⁰⁴

III. *Hiddekel*.

The Name of this River, is from, *Dekel*, a *Dart*, for the Swiftness of it; & therefore called also, *Tigris*. The Springs of this Rapid River, tis true, are in the Northern Mountains of *Armenia*, & *Media*, about *Caucasus*. But our present Concern lies in that Part of it, where the main Single Stream, rowles out of *Paradise*, on the South Side of the Garden, & runs nimbly towards the East of *Assyria*. Of old, *Assyria* contained itself within the Bounds of these two Rivers; called since, *Mesopotamia*: hence *Lucan* calls, *Haran*, or *Carrae*, where *Crassus* came to his End, *An Assyrian City*.

Assyrias Latio maculavit sanguine Carras.

Nimrod (afterwards constellated into *Orion*.) at first passed into that Land of *Ashur*; [Gen. 10.4.] and there hee build *Ninive*, or, *Nini-nave*, i.e. the Habitation of *Nimrod*; and *Rehoboth*, *Calah* and *Resen*; that is, *Oroba*, *Calicala*, and *Rhesnea*, near *Ptolomies Ingine*, or *Engannim*, the Fountain of Gardens, or *Edens*, Eastward of *Chebar*, or, *Aboras*.¹⁰⁵

IV. *Euphrates*.

That is, *Huperath*, or *Phrat*, in English, *The Fruitful River*. This goodly Stream, ran thro' the Midst of *Babylon*; and it is afterward spent, partly in the Chaldæan Lakes, near *Urchoa*, and the *Orcheni*, or the *Ur* of *Abraham*; and partly recollects itself into *Tigris*, & then envelops itself in the Bosom of the *Persian* Sea, and so is lost in what *Solinus* & others call, the *Ethiopian Ocean*.

¹⁰⁴ See also Mather's *Threefold Paradise* (104–05). For the building of channels by Cyrus, see Tibullus (*Panegyricus Messallae* 3.7.140 ff). Homer mentions Ethiopia (E Arabia) in several places including *The Odyssey* (1.22–25, 4.84, 5.282–87). Zerah, the Cushite general, was defeated by King Asa (2 Chron. 14:1, 9–15). Mather's Hebrew passage “hassebeeb,” adapted from Gen. 2:13 הַסִּבֵּב “hassebeeb” [see Strong's # 5437], suggests “surrounds” and “encompasses.” The Latin rendition denotes “going around,” “washing,” and “licking at.” The “Royal River” is also called Palla Cottas Canalis, a canal (not a river), which Ammianus Marcellinus (*Historia* 23.6.25; 24.2.7; 24.6.1) attributes to Nebuchadnezzar. The Yeshiva near Naardia (Nehardea), which Bochart identifies as “*Naardensis Academiae Doctores ad Euphratem*” (*Hieroicoicon*, pars 2, lib. 6, cap. 5, col. 818), was founded in the third century CE. Finally, the names of places and rivers are almost all listed in Ptolemy's *Geography* (5.17).

¹⁰⁵ See also Mather's *Threefold Paradise* (105). The Roman poet-historian Marcus Annaeus Lucanus (39–65 CE) celebrates the strategies of Roman senator and general Marcus Licinius Crassus, who “stained Syrian Carrhae with Latin blood” (*De Bello Civili sive Pharsalia* 1.105). Crassus's death (53 BCE) in the battle near Carrhae, in Mesopotamia, is related by Pliny (5.21.86). Son of Cush (1 Chron. 1:10), Nimrod is believed to have been the founder of the cities of Babylon and Nineveh (Gen. 10:10, 12; 11:3–4). For the location of the various Mesopotamian towns, rivers, and regions here mentioned, see Ptolemy's *Geography* (5.17. tabula IV Asia). Strabo (16.1.27) locates the Aborras (near Anthemusia) as flowing “between the Euphrates and the Tigris.”

So Famous is this River, that it needs no Description; or, if you would have it, go to *Pliny* for it; But beware you do not so affront the Scripture, as to take the present *Bagdat*, upon *Tigris*, for *Babylon*; for the old *Babylon*, is, as the Scripture foretold, now in desolate Heaps; nothing of Building is in it, or near it, but *Felugea* of late, a little Warehouse, for Merchants.¹⁰⁶

Tis remarkable, to see how the Four *Monarchies*, have been accommodated unto these Rivers; The *Assyrian* to *Tigris*, the *Persian* to *Pison*, the *Græcian* to *Gihon*, and the *Roman* to *Euphrates*, the Old & New *Babylon*.¹⁰⁷

But passing That Curiositie, *tanquam canis ad Nilum*; The River that Runs thro' the Garden of *Eden*, must needs bee *Tigris*. Accordingly, wee shall find a very beautiful *Island*, in the Midst of the River *Tigris*, called, *Gesire*, or, The *Garden*, from גֶּזַר / *Secuit*. It were easy, but it would bee Tedious, now to produce, the Proofs of undoubted *Geography*, that such an *Island* there is, not far from the Place, where *Noah's* Ark rested, abundantly answering all the Scriptural Circumstances of *Paradise*. Wee might especially, insist on the Testimony of [123r] Sir *Walter Rawleigh*, taken out of *Masius*, reciting the Epistle | of the *Nestorian* Bishops, who live at & near the Place. Whereto wee may add, the Accounts of Travellers, in *Purchas*, who assert, that the true Ancient Garden of *Eden*, was in the Island *Gozoria*, Ten Miles in Circuit; a Matter of Twelve Miles North of *Mosul*, a City now on the West Side of *Tigris*, over against *Niniveh*. This *Mosul*, in Lat. 36. gr. 50. min. is a famous Place, at this Day, tho' *Ninive*, over the Water, on the East Side, bee, as was prophesied, a *Desolate Heap*.¹⁰⁸

¹⁰⁶ The modern Persian Gulf is by Solinus called Ethiopian Ocean (*Collectanea rerum memorabilium* 24, 30.3). For the ancient description of the Euphrates, see Pliny (5.20.83–85 and 6.30.117 ff.). Babylon's doom is foretold in Jer. 51:37. The modern Felujah (Felugea), an ancient castle about fifty miles N of Babylon, is situated near the river canal Flumen Regium.

¹⁰⁷ A mainstay in the eschatological hermeneutics of Mather's day, Daniel's Four Monarchies (Dan. 2:31–45) are identified with a succession of empires that would give way to Christ's Fifth Monarchy (Dan. 2:31–45). See Mather's *Threefold Paradise* (319–44) and his commentary on Daniel, ch. 2 ("BA").

¹⁰⁸ See Mather's *Threefold Paradise* (105–06). In Mather's time, the Latin phrase "Just like the dog near the Nile" seems to have been a well-known reference to Pliny (8.61.148–49) who describes how the Egyptian dogs "lap up water from the river [Nile] as they run" because they are afraid they might get snatched by crocodiles. This phrase is used metaphorically to express Mather's shying away from discussing a controversial topic lest he be devoured by critics. This popular metaphor appears for instance in *Arcana Microcosmi* (1652), a book on comparative anatomy by Alexander Ross (bk. 2, pp. 13, 21). The island in the midst of the Tigris is by Huet called "*Gezair*," an Arabic wording that signifies "*the Island*" of the Garden of Eden, which "lies immediately above the coming together of the *Tigris* and *Euphrates*" (*Treatise*, ch. 17, pp. 147, 148). Mather's Hebrew citation "gazar" [Strong's # 1504] suggests "to cut down," "to exclude," "to decide," "to divide" – all of which are suggested by the Latin translation "secuit" or "it has divided." Sir Walter Raleigh (c. 1552–1618), Elizabethan soldier, mariner, and historian, gives his account of Paradise in his famous *History of the World* (1614), bk. 1, chs. 3–4, and draws on "De paradiso commentarius," in *Epistola populi Nestoriani* (1573), a collection of travelogues by the Flemish Orientalist Andreas Masius (1514–73). The reference to Masius, who translated the letters of Nestorius from Syriac into Latin, appears in Raleigh's *History* (bk. 1, ch. 3, pp. 44–46,

This *Island*, is called, *Zegira*, by *Ptolomy*; *Gizirra*, by *Farrarius*; *Zizira*, by *Jansonius*; *Jasirey*, by *Olearius*; and Mr. *Tavernier* mentions, *Gezire*, a little City, in an Island of *Tigris*. [The doubled / $\square$ / *Clausum*, in Gen. 2.8. may intimate, that *Paradise* was a, *Locus Circumseptus*, walled with Water.]¹⁰⁹

Thevet, in his *Cosmography*, sais, *Gesire*, in the Middle of *Tigris*, is the most fertile Soyl, of all *Asia*. [Compare Gen. 2.9.] And all *Mesopotamia*, is, by the *Arabians* hence called *Algezire*.¹¹⁰

This is the *Island*, whereto *Eliphaz* the *Temanite* alludes, who lived not far from it: [Job. 22.30.] *Hee shall deliver the Island of the Innocent*; and perhaps hee prophesies, that God will deliver this *Island* of the Innocent *Adam*, in the Lat{t}er *Dayes*, into some wonderful *Circumstances* of *Glory*, not yett comprehended.¹¹¹

Every Quarter of the World, ha's had its *Memorials*, of this glorious *Island*. *Asia* had sundry *Tempe's*; *Africa* its *Fortunate Islands* & *Hesperides*; *America*, its *Atlantis* of *Plato*; And *Europe*, the Island of Great *Britain*, by *Hesiod* called, *The Happy*: the *Elysian Fields*, & the *Gardens of Alcinous*.¹¹²

§ 10), as does the story of the Nestorian bishops, followers of Nestorius (d. c. 451), who espoused the heretical belief in two separate persons dwelling within Christ – human and divine. Of the many travelers who visited the region of Eden, John Cartwright describes the Garden and its presumed location on Gozoria in his 1603 “Voyage from Aleppo to Hispaan,” published in Samuel Purchas, *Hakluytus Posthumus, or Purchas his Pilgrimes* (1625). My reference is to the Glasgow edition (1905–07), vol. 8, ch. 4, § 4, pp. 519–20. The desolation of Ninive (Nineveh) was foretold in Nah. 3:7 and Zeph. 2:13. Simon Patrick uses many of the same sources for his *Commentary* (1:12), on Gen. 2:10.

109 See also Mather's *Threefold Paradise* (106). Ptolemy identifies “*Zegira*” or “*Zigira*” as a town or village in that region (*Geography* 6.1. tabula V Asia). Mather's *Farrarius* is Philippus Ferrarius (d. 1626), an Italian geographer, whose popular *Lexicon Geographicum* (1627) was reprinted in London, in 1657 and 1665. Ferrarius identifies Ptolemy as his source, but spells the island's name “Gisira” and locates it in the Mediterranean near the N African city “Ulizibram” (*Lexicon Geographicum* [1657], p. 164). Johannes Jansonius (Jan Jansson the Elder) (1588–1664) is a Dutch geographer and mapmaker, whose *Atlas Major, sive Cosmographia Universalis*, in 10 vols. (1657–75) was reprinted many times and translated into many languages. “*Jasirey*” (spelled: “*Tzisire*”) appears in Olearius's *Voyages and Travels* (1662), bk. 5, p. 200. Finally, the French Baron of Aubonne and traveler Jean-Baptiste Tavernier (1605–89) identifies “*Gezire*” in his “Persian travels,” in *The Six Voyages of John Baptista Tavernier* (1678), bk. 3, ch. 4, p. 108. The doubled Hebrew “ $\square$ ” [mem], “*Clausum*” or “enclosure,” suggests to Samuel Lee (Mather's source) an “enclosed place” – the primordial Paradise closed off on all sides by the waters of the Tigris River.

110 André Thevet (1502–90), French traveler and cosmographer, mentions “*Gesire*” in his *Cosmographie de Levant* (1556), ch. 39, p. 147. Raleigh, too, comments at great length on the fertility of the soil thereabouts, in his *History* (bk. 1, ch. 3, pp. 48–49, § 12).

111 Eliphaz, the Temanite, is the chief of Job's three comforters (Job. 22:1).

112 Celebrated for its Sylvan beauty, Tempe is a valley gorge near Mt. Olympus in NE Thessaly. The Fortunate Islands (Canary Islands), like the Gardens of the Hesperides, were associated with the winterless abodes of the happy dead. The Hesperides (Bernicide) is a mountainous region on a N African promontory near Benghazi (Libya), whose fabled terraces are placed in Cyrenaica. The mythical Atlantis, in Plato's *Timaëus* (24e–25d) and *Critias* (108e–109a, 113c–114c), was believed to be an island located in the Atlantic beyond the Pillars

Here was the *Garden Enclosed* [Cant. 4.12.] the Pinacle of Terrestrial Delight & Glory, and the Palace, where *Adam* and *Eve* were together a Type of our Lord Jesus Christ, with His Church, in the Latter Dayes. This was the Place, *Watered*, & by God Himself Defended & *Watched, Night & Day*. Here all Creatures waited on the Harp of the True *Orpheus*, & presented themselves before the *High-priest of the Creation*.¹¹³

*Magna Viri merces, parat ultima Terra Triumphos,
Tigris et Euphrates, Sub Tua Jura fluunt.*

Propert. L. 3. p. 206.¹¹⁴

In these Remarks, which have so far determined the Scituation of the Primitive PARADISE, and at the same time illustrated the *Geography* of the Bible in very many other Instances; I have chiefly subsisted on some Communications in Manuscript, from a learned Friend, Mr. *Samuel Lee*. I will now add, That there is one *Dr. Wells*, who ha's published some things on the *Geography of the Old Testament*; and he does out of *Bochart* and *Huet* further insist on this Matter, with a Discourse, from which I shall not think it amiss to offer you a few Delibations.¹¹⁵

The Scituation of *Havilah*, in the Eastern Tract of *Arabia*, near and on the Bottom of the *Persian Gulf*, is no longer to be doubted of. Here we find a River, which *encompasses*, that is, with a winding Stream washes, *all one side* of such a Land, & hath a Communication with the Three other Rivers mentioned in the History, by one common Channel. This must needs be our *Pison*. To confirm this, *Huet* observes, it must be remembred, that *Moses* wrote his History in *Arabia Petraea*, or somewhere thereabouts. This River was therefore the

of Hercules (Straits of Gibraltar). The Greek poet-historian Hesiod locates the Elysian Fields and the Isles of the Blessed "at the world's end," where fortunate heroes are translated into life eternal (*Opera et Dies* 166–75). The paradisiacal orchards of King Alcinous, celebrated grandson of Poseidon and happy ruler of the Phaeacians on Scheria, in Homer's *Odyssey* (7.110–32), are well known. For the debates on the location of Paradise, see esp. J. Delumeau's *History of Paradise* (39–70, 97–116, 155–74).

113 In their prelapsarian condition, Adam and Eve are the OT types of the Second or Last Adam, Christ and his Bride (the Church) (Rom. 5:14; 1 Cor. 15:45). As the true savior, Christ is the Homeric counterpart to the false Orpheus, who failed to recover his Eurydice from Hades, even though he was able to charm the rulers of the Underworld (Ovid, *Metamorphoses* 10.1–85).

114 The quotation from the Roman elegiac poet Sextus Propertius (b. c. 54/48–c. 2 BCE) translates "Great is the reward, O men [of Rome], the most distant of lands is preparing triumphs for you, / Tigris and Euphrates will flow under your dominion" (*Elegiae* 3.4.3–4). Mather's page reference is probably to one of at least four editions of Propertius's poetry published in England during Mather's lifetime. See Appendix A.

115 See also Mather's *Threefold Paradise* (106). Here ends Mather's extract from a now lost manuscript by his father-in-law Samuel Lee. Mather's subsequent account is largely gleaned from Edward Wells's *Historical Geography of the Old Testament and New Testament* (vol. 1, bk. 1, ch. 1, pp. 1–53), a prized work throughout the eighteenth-century, which incorporates much information from Huet's *Treatise of the Situation of Paradise* (1694) and from Samuel Bochart's *Geographia* (pars 1, lib 2, cap. 28, col. 142–43). For an analysis of Bochart's geographical location of Paradise, see F. Motto's "Geographia Sacra."

nearest unto him; and so it was very Natural and Proper for him, to Name it first. The Etymology of the Word, *Pison*, is also to be considered. Most of the Hebrew Grammarians agree, that it comes either, of /פִּשׁוֹן/ *To be Full*, or /פִּשְׁפֹּשׁ/ *To Spread*. Because the Tides are so high, so violent, so Boisterous, at the End of the *Persian* Gulf, that no Trenches can defend the Neighbouring Grounds from their Incursions. It is therefore observed by *Strabo*, that all the Coast is full of Lakes and Marishes. The Author of the Apocryphal *Ecclesiasticus*, makes an Allusion to this Etymology, where he saies of God, [c. XXIV.25.] *He fills all with Wisdome, like the Pison*.¹¹⁶

The Province washed by the *Gihon*, was formerly called, *Cush*. Now, the Countrey adjoining to the Easterly Mouth of *Euphrates*, and which by the *Greeks* and *Latins*, was called, *Susiana*, had formerly that Name of *Cush*; yea, tis at present called so. The Journals of all Travellers inform us, That *Susiana* is now called, *Chuzestan*; which carries plain Footsteps of *Chus*, or *Chuz*, as the Name of *Chush* uses to be written. *Benjamin* of *Navarre*, saies, the great Province of *Elam*, whereof *Susa* is the Metropolis, is called so. That Province is *Elymais*, which extends itself, as far as the *Persian* Gulf, at the East of the Mouth of the *Euphrates*. When the *Nubian* Geographer calls it, *Churestan*, it is | doubtless a Mistake of the Copiers, not well distinguishing the Letter R from Z of the Arabians. The Inhabitants of the Land call it absolutely, *Chus*, if you will beleieve *Marius Niger*. The same Region is called, *Cushab*, [2. King. XVII.24.] And it was partly from thence, that *Salmanassar*, transported a Colony into *Samaria*. This New Colony, afterwards known under the Name of, *Samaritans*, kept also the Name of its Origin, & was called, The *Cuthæans*. *Dion* has observed, That the Letter, S, is often changed into T, or, TH, by the *Chaldeans*. We find here also, the *Cosseans*, Neighbours to the *Uxians*, according to *Pliny*, *Ptolomy*, and *Arrian*; whose Name is doubtless from *Chus*. From hence likewise the Name of *Cissia*, and of the *Cissians*; a little Province of *Susiana*, and used sometimes, to denote all the *Susians*. The Poet *Æschylus*, takes Notice of a City of that Name, seated in the same Land, & remarkable for its Antiquity.¹¹⁷

[124v]

¹¹⁶ See also Mather's *Threefold Paradise* (107). The entire paragraph is a paraphrase of Huet, *Treatise* (ch. 7, pp. 75–77, 85–87) and of Wells, *Historical Geography* (vol. 1, bk. 1, ch. 1, 13–19). According to Huet, Moses wrote the Pentateuch in Arabia Petraea (*Treatise* 75). The Hebrew terms “poosh” [Strong's # 6335] and “pasah” [Strong's # 6581] signify respectively “to grow fat, full” and “to spread.” Strabo mentions the lakes and marshes, in *Geographia* (15.3.5); the citation from Jesus ben Sirach's *Liber Ecclesiasticus* (Wisdom of Sirach) 24:25 reads, “He filleth all things with his wisdome, as Physon, and as Tigris in the time of the new fruits” (*Ecclesiasticus* 24:25, KJV 1611).

¹¹⁷ Rabbi Benjamin of Navarre or rather, Rabbi Benjamin ben Jonah of Tudela in Navarre, as previously mentioned, is the most renowned Jewish traveler of the Middle Ages. Mather, via Huet (*Treatise*, ch. 13, pp. 119–21) and Wells (*Historical Geography*, vol. 1, bk. 1, ch. 1, pp. 16–17), refers to the rabbi's famous *Itinerarium*, which mentions “*Khuzistan*” and the ruins of Shushan (Susa), the former capital of King Ahasuerus (*Itinerary* 73). For Mather's “*Churistan*,” see Idrisi (Edrisi), *Geographia Nubiensis* (1619), clim. 3, pars 6, p. 124. The similarity

The Third River is Hiddekel. You must not be surprised, if you are now told, That the Name of *Hiddekel* here given by *Moses*; and that of *Diglath*, which they give it in the East; and that of *Tigris*, which the Europæans give it; are but one & the same, varied by diverse Nations. Take away the Aspiration from the Word, *Hiddekel*, and the Word, *Dekel*, remains; which the Syrians disguised into *Diklat*. *Josephus*, and the *Chaldean* Paraphrasts, the *Arabians* and the *Persians*, turned it into *Diglath*; other Modern Orientals into *Degil*, and *Degola*; *Pliny*, or those who informed him, into *Diglito*; And the Greeks, who gave to all strange Words, the Turn of their own Tongue, turned the *Diglis*, into *Tigris*; to which they might be the rather induced, because they were informed of an extreme Swiftmess in the River. From the Place where *Moses* was writing, this is the *Third River* that in our Travelling along, we must meet withal. It is here added, (for so it may rather be rendred,) *That is it, which goes before Assyria*. There was as yett no *Assyria*, but only the Province that was first so called, whereof *Niniveh* was the Capital City. Now from the Parts where *Moses* was writing, there was no going into that *Assyria*, without crossing the *Tigris*, as running along before it.¹¹⁸

The River, *Euphrates* is by this time, so well known, as to need no particular Marks for the distinguishing of it. The Greeks turned *Perath* into *Euphrates*; partly to suit the Genius of their own Language; and perhaps partly to allude unto the *Pleasantness* or *Fruitfulness* of the Countrey, washed with it. The Greek Word, *Ευφραϊνεν*, signifies, both, *To Rejoice*, and, *To make Fruitful*; agreeable

between the Arabic letters ر (rā) and ز (zāy), indeed, invites misreading. Dominicus Marius Niger mentions a city and region by the name of “Chus,” in *Geographiae Commentariorum* (1557), “*Geographia Asiae*” (comment. 5, pp. 534, 536); and likewise a place name in Africa, in “*Geographia Africae*” (comment. 3, p. 396). Salmanassar (Shalmaneser), Assyrian king during the times of Hoshea (c. 740 BCE), the last king of the N kingdom of Israel, transported the Israelites into Medo-Persian captivity (see esp. *Josephus*, *Antiquities* 9.14.3). The Greek monk Johannes of Xiphilinus, nephew of Xiphilinus, Patriarch of Constantinople (1071–78), epitomized books 61–80 of *Historia Romanae*, by the Greek senator and Roman historian Cassius Dio (c. 164–c. 229 CE). Mather (via Huet, *Treatise*, ch. 8, p. 120) refers to Xiphilinus’s epitome of Dio’s *Historia Romanae* (68.26.4, S238, lines 7–14; *Dio’s Roman History* 8:411). The Cossacans are mentioned by Pliny (6.31.134), in Ptolemy’s *Geography* (6.3. tabula V Asiae), in Lucius Flavius Arrianus’s *Alexandri Anabasis* (7.15.1–2, 7.23.1), and *Historia Indica* (8.40.6). Finally, the Greek dramatist Aeschylus Atheniensis (c. 525–c. 456 BCE) mentions Cissia’s “ancient ramparts” and the Cissians of Susiana, in *Persae* (16–17, 118–119) and *Choephoroe* (423), and so does Strabo in his *Geography* (15.3.2).

¹¹⁸ See also Mather’s *Threefold Paradise* (107–108). The principal source for this paragraph is Huet (*Treatise*, ch. 14, pp. 130–36). Hiddekel (Gen. 2:14) is called Diglath by *Josephus* (*Antiquities* 1.1.3), by the *Chaldean* Paraphrasts including the Targum Jonathan ben Uziel and the *Persian* Paraphrasts (Walton 4:4), yet the Syriac and Arabic Versions called Hiddekel respectively “*Declar*” and “*Degla*” (Walton 1:8–9) as do the “modern Orientals,” i.e., Middle-Eastern authors. Pliny (6.31.127) points out that “the sluggish part” of the *Tigris* is called “*Diglitus*”; the LXX and Vulgate, of course, have “*Tigris*” (Gen. 2:14). *Moses* wrote the Pentateuch in Arabia Petraea. See also Wells (*Historical Geography*, vol. 1, bk. 1, ch. 1, pp. 31–33).

to the Latin Expression, *Lætum facere*; – whence *Virgil*, *Quid lætas faciat segetes*. Compare, *Psal. LXV.12, 13*.¹¹⁹

The Words of *Moses*, imply, That in *Eden*, the River was but one; that is, it had but one single Channel; but *from thence*, or, out of *Eden*, it was parted, & became *Four Heads*, or Four principal Channels. The Place he assigns for *Paradise*, is the *Eastern Part of Eden*. And as *Dr. Wells* expresses it, It must be scituated on one of the Turnings of this River, that goes from West to East, & probably at the Easternly End of the Southernly Branch of the lowest great Turning, which *Ptolomy* takes notice of.¹²⁰

It is probable, That this *Garden of Eden*, was the Original of, those curious Gardens, with which the Princes of the East, were so curious to accommodate themselves; and by which they would represent the *Garden of Eden*. Such an one was that *Golden Garden*, valued at Five-hundred Talents, which *Aristobulus*, King of the Jews, presented unto *Pompey*; and which *Pompey* afterwards carried in Triumph, & consecrated unto *Jupiter* in the Capitol. The Garden was called, *τερπωλη*, and, *τερπνον*, which in Strictness of Speech, is, *Eden*, or, *Pleasure*. And the Conformity between the very Words, *Garden of Eden*, and, *Garden of Adon*, seems to shew, that unto the *Garden of Eden* was owing the Rise of those Gardens, consecrated unto *Adonis*, which the *Greeks*, *Egyptians* and *Assyrians*, planted in Earthen Vessels, and Silver Baskets, to adorn their Houses withal, & carried about in their Processions. And there is no doubt, that out of this Pattern, the Poets formed, their *Fortunate Islands*, the *Elysian Fields*, the *Meadows of Pluto*, the *Gardens of the Hesperides*, of *Plato*, & of *Alcinous*.¹²¹

119 See also Mather's *Threefold Paradise* (108). This and the following paragraph are again extracted from Huet (*Treatise*, ch. 16, pp. 140–43), but see also Wells (*Historical Geography* 1:35–57). The Greeks turned the Hebrew פֶּרֶה [Perath] into “Euphrainein,” which in Latin signifies “to make fertile.” Virgil's “What makes the crops fertile” appears in his *Georgics* (1.1).

120 Well's (*Historical Geography*: 37–39) and Ptolemy (*Geography* 6.2–3) describe the region and the meandering river.

121 According to Josephus (*Antiquities* 14.3.1), Aristobulus II (d. 49 BCE) bribed the Roman general Ganeus Pompeius Magnus (106–48 BCE) and seized the crown and office of high priest from his brother Hyrcanus (c. 58 BCE). Aristobulus lost in the ensuing fraternal war when Pompey favored the cause of Hyrcanus, took Jerusalem (63 BCE), and consecrated the spoils to Jupiter in the Capitol of Rome (*HJP* 1.1:312–25). Josephus relates that Aristobulus sent Pompey a present of “a golden vine, of the value of five hundred talents.” Strabo of Cappadocia values this present at 4,000 gold pieces and calls it “vine or a Garden” or “Terpole, the Delight” (Josephus, *Antiquities* 14.3.1). The Greek words “terpole” and “terpnon” signify “delight” and “delightful thing.” Pluto (giver of wealth), the ruler of the Underworld, presided over both good and evil. In this sense, the Meadows of Pluto and the Gardens of the Hesperides are linked with the resting place of the dead in the Fortunate Islands and the Elysian fields (Homer, *Odyssey* 11.13ff), with Plato's Hesperides (Cap Verde Islands or Atlantis), in *Timaeus* (25a–d), and with Homer's garden of the Phaeacians King Alcinous (*Odyssey* 7.110–33). For Mather's borrowings, again see Wells (*Historical Geography* 1:45–47) and Huet (*Treatise* xvii.145–46). See also J. Delumeau's *History of Paradise* (139–74).

We may add this one Curiosity. The *Land of Nod*, whereto *Cain* was banished, it is here said, *It lay before Eden*. This is to be understood, with respect unto the Place where *Moses* was now writing. Consequently it was on the *West of Eden*. One would therefore incline to the Opinion of *Grotius*; who supposes *Cain* doom'd of God, unto a Withdraw into the Desarts of *Arabia*, which does join to the *West of Eden*. Such a Place, (rather than a Pleasant & Fruitful *Susiana*) is most proper for a Banishment. And unto the Barrenness of this Part of *Arabia*, may pertain the Curse, Gen. IV.12. *When thou tillest the Ground, it shall not henceforth yeeld her Strength unto thee.*¹²²

After all these things, I cannot well forbear transcribing the Words of M. *Tournefort*, in his *Travels to the Levant*, which are these.¹²³

[125r]
 | “If we follow the Letter of that Passage, wherein *Moses* describes the Situation of the *Terrestrial Paradise*, nothing seems more Natural, than the Opinion of M. *Huetius*, the ancient Bishop of *Avranches*, one of the most learned Men of his Time. *Moses* assures us, That a River went out of that delightful Place, and divided itself into four Channels, the *Euphrates*, the *Tigris*, *Pison*, and *Gihon*. But no such River can be found in any Part of *Asia*, except this of *Arabia*; that is to say, the *Euphrates* and *Tigris* join'd together, and divided into four great Channels, which empty themselves into the Bay of *Persia*. *Huetius* therefore seems indeed, to have fully satisfied the Letter of the Text, in fixing Paradise in this Place.¹²⁴ But notwithstanding this, his Notion can not be maintained; it being so very manifest from the *Greek* and *Latin* Geographers & Historians, [Plin. L. 6. c. 26. Polyb. Hist. L. 5. Strabo, L. 16. Appian de Civ. Bel. L. 2. Arrian. de Exped. Alex. L. 7. Ptolom. Geogr. L. 5. c. 17. Ammian. Marcel. L. 24. c. 21. Zosim. L. 3. c. 24.] That the *Euphrates* and *Tigris*, formerly ran in Separate Beds; and likewise that there was a Design to make a Canal of Communication between the Two Rivers; and that afterwards several Canals were actually made, by Commands of the Kings of *Babylon*, of *Alexander* the Great, and even of *Trajan* and *Severus*, for the facility of Commerce, & to render the Countrey more fruitful. There is

¹²² See also Mather's *Threefold Paradise* (108–109). Huet (*Treatise*, ch. 17, pp. 149–50) and Wells (*Historical Geography* 1:47–48). Mather takes his cue from Hugo Grotius (1583–1645), the great Dutch jurist, statesman, philologist, and theologian, whose *Annotiones ad Vetus Testamentum* (Gen. 4:16) identifies the land of Nod as Arabia Deserta (*Opera Omnia* 1:7). In his *Manuductio ad Ministerium* (1726), Mather recommended Grotius's works (though heterodox in many respects) to young candidates for the ministry (8, 46, 59, 64).

¹²³ See also Mather's *Threefold Paradise* (109). Joseph Pitton de Tournefort (1656–1708), French botanist, traveler, and physician, recorded his travel narrative in *Un Voyage du Levant* (1717), which appeared in an English translation in at least two subsequent London editions (1718, 1741). Mather's excerpt can be found in *A Voyage into the Levant* (1741), bk. 3, ch. 7, pp. 161–63.

¹²⁴ Tournefort refers to the Paris edition of Pierre-Daniel Huet, whose *Traité de la Situation du Paradis Terrestre* (1691) appeared in an English translation as *A Treatise of the Situation of Paradise* (1694), which Mather had excerpted for much of his discussion of the location of Paradise.

no reason therefore to doubt, but those Branches of this River of *Arabia*, were made by the Art of Man, & consequently were not in the *Terrestrial Paradise*.¹²⁵

[126v] “The Commentators upon *Genesis*, even those who are most confined unto the Letter, don’t think it necessary, in order to assign the Place of Paradise, to find a *River*, which divides itself into Four Branches; because of the very great Alterations, the Flood may have introduced: But think it enough to shew the Heads of the Rivers mentioned | by *Moses*; namely, the *Euphrates*, *Tigris*, *Pison* and *Gihon*. And thus, it cannot be doubted, but that Paradise must have been in the Way between *Erzeron* and *Teflis*; if it be allow’d, to take the *Phasis* for *Pison*, and *Araxes* for *Gihon*. And then, not to remove Paradise too far from the Heads of these Rivers, it must of necessity be placed in the beautiful Vales of *Georgia*, which furnish *Erzeron* with all sorts of Fruits. And, if we may suppose, the Terrestrial Paradise, to have been a Place of considerable Extent, & to have retained some of its Beauties, notwithstanding the Alterations made in the Earth at the Flood, and since that time, I don’t know a finer Spott, to which to assign this wonderful Place, than the Countrey of the Three Churches, about Twenty French Leagues distant, from the *Heads* of *Euphrates*, and *Araxes*; and near as many from the *Phasis*. The Extent of *Paradise*, must at least reach to the Heads of these Rivers; and so it will comprehend the ancient *Media*, and Part of *Armenia*, and *Iberia*. Or, if this be thought too large a Compass, it may be confined only to Part of *Iberia* and *Armenia*, that is, from *Erzeron* to *Teflis*. For it can’t be doubted, that the Plain of *Erzeron*, which is at the Head of *Euphrates* and *Araxis*, must be taken in.”¹²⁶

[127r] |

125 Tournefort probably relies on the French equivalent of Philemon Holland’s translation of Pliny’s *Natural History* (1601), bk. 6. ch. 26, pp. 135–37, which roughly corresponds to our modern editions of Pliny (6.29.114–31.135); moreover, Tournefort refers to the *Universal History* of the Greek historiographer Polybius (c. 205–c. 125 BCE), in *Historiae* (5.45.4–46.9, 5.48.16, 5.51.4); to Strabo’s *Geographia* (16.1.9, 13, 21, 27); to *De Bellis Civilis* (2.153) in *The Roman History*, by the Roman historian Appianus of Alexandria (c. 95–c. 165 CE); to Arrianus’s *Alexandri Anabasis* (7.7.3–5); to Ptolemy’s *Geography* (5.17. tabula IV Asia); to Ammianus Marcellinus’s *Historia* (24.6.1); and, lastly, to the Greek historian Zosimus (fl. 5th–6th c. CE), whose *Historia nova* (3.24.2) is the work in question. Nebuchadnezzar’s many building activities included numerous canals connecting the rivers of Mesopotamia, the most famous of which canals is perhaps Flumen Regium Pallas Cottas Canalis (“the Royal River”), mentioned in Ammianus Marcellinus (*Historia* 23.6.25; 24.2.7; 24.6.1). Roman emperor Marcus Ulpian Traianus (98–117 CE) invaded Armenia, Cappadocia, and Mesopotamia in 113–15 CE. Finally, Lucius Septimius Severus, Roman emperor (193–211 CE), was renowned for his successful campaigns in Egypt, Syria, and Mesopotamia.

126 See also Mather’s *Threefold Paradise* (109–110). Tournefort, *Voyage into the Levant* (bk. 3, ch. 7, pp. 162–63). Thomas Burnet, for one, dismisses any efforts to locate Eden in Mesopotamia or near the Springs of the four rivers, because he hypothesized that the antediluvian earth collapsing upon internal caverns erased any trace of the former garden (*Sacred Theory*, bk. 1, chs. 10–11; bk. 2, ch. 1). Twenty French Leagues are approximately 28 miles (45 km). The modern Tiflis (Tbilisi) is the capital of the Republic of Georgia, south of the Caucasus, and Erzeron is the capital in modern Armenia.

Q. The Discourse about the Seat of the *Terrestrial Paradise*, ha's carried so much Demonstration with it, that, methinks, we need no further Satisfaction. But having since litt upon the Thoughts of the excellent *Heidegger*, about that Subject, it may not be amiss to call them in, for our further Entertainment?¹²⁷

A. *Heidegger* is of Opinion, That the true Seat of *Paradise*, was in that Part of the *Holy Land*, which was called *Genesar*; and which comprehends the Sea of *Galilee*, the illustrious Field and Vale of *Jericho*, and the Countrey which the *Dead Sea* ha's now buried under Water.

The *River of Paradise*, he takes to be the *River of Jordan*. The Four famous Rivers of *Pison*, and *Gihon*, and *Hiddekel*, and *Euphrates*, he takes to hold such a subterraneous Communication with *Jordan*, which we know, ha's no Outlett above Ground, that *Jordan* may be justly esteem'd the Source of them all. He thinks, an Inspection of the Maps, would invite one to such Apprehensions. Both *Brocardus* and, *Villamontius*, do mutter something of such a Matter. Yea, the very Name of *Jordan*, seems originally to have been *אֶדֶן עַד* / *The River of Eden*.¹²⁸

Moreover, The Name of *Genesar* is as much as to say *גַּן שֶׁר* / *Hortus Princeps*, or, *Hortus Principis*; to wit, The *Garden of Adam*.

It is Remarkable, That in *Ecclesiasti{c}us*; ch. 24. v. 35, 36. Those *Five* are joined, as the Five Rivers of Divine Wisdome; *Pison*, *Tigris*, *Euphrates*, *Jordan* and *Gihon*.¹²⁹

The Word used for, the *Watering* of *Paradise* by its *River*, is the same that we find used for this very Countrey; Gen. 13.10. *The Plain of Jordan was well-watered every where*. Compare, Josh. 3.15.

It is probable, That *Paradise* was not far from the Place, where *Adam* was created. And it is probable that *Adam* was created in the Field of *Damascus*; which was not far from hence. We may gather from *Josephus*, that this was a very

¹²⁷ Subsequent paragraphs are extracted from Johann Heinrich Heidegger (1633–98), a Swiss Protestant theologian, professor of Hebrew and philosophy at Heidelberg and Zurich. Mather extensively mines Heidegger's *De Historia Sacra Patriarcharum*, 2 vols. (1667–81, 1729) for his "BA." All citations from Heidegger are from the 1729 Tiguri edition of his work.

¹²⁸ Mather's extract is from Heidegger's "Exercitatio IV: De Adamo et Eva," in *Historia Sacra Patriarcharum* (1:94–95, Exerc. IV, §§ 41–42). The subterraneous connection of the four rivers is also maintained by the German Dominican Brocardus, aka. Burchardus de Monte Sion (d. after 1285), a monastic geographer, whose popular *Descriptio terrae sanctae* (c. 1271–91), first published in Lübeck (1475), was often reprinted, translated, and bound with other geographical works by other authors (BBK). Jacques de Villamont (c. 1560–c. 1625), native of Anjou, and Knight of the Order of Jerusalem, published *Les Voyages du Seigneur de Villamont* (1596), a collection of his travels through Europe, the Middle-East, and Africa, which went through several editions. In Heidegger's etymology, the Hebrew *אֶדֶן* [*yeor*], signifying "canal," "river," or "stream" [Strong's # 2975]; and *עַד* [*ayden*], denoting "Eden" or "pleasure" [Strong's # 5731], are conflated into *עַדְדֵן* [*Yarden*], i.e., "Jordan" or "descender" [Strong's # 3383].

¹²⁹ The Hebrew *גַּן שֶׁר* [*gan sar*], signifying a "first or principal fenced garden" [Strong's # 8269, 1588], is also suggested by the Latin "First Garden" or "Original Garden." The reference to the apocryphal *Ecclesiasticus* 24 should be to verses 25, 26, not 35, 36.

ancient Tradition among the People of God. And *Adrichomius* magnifies the *Red Earth* of that Place; *Ager Damascenus habet Terram Rubram, et mirè tractabilem, quam Saraceni deferunt in Ægyptum, Judeam, Æthiopiam, caré vendentes*. Accordingly, *Basil* mentions an Ancient Tradition, ὡς πρώτη ἡ Ἰουδαία ἀνθρώπων εσχεν οικητοῦρα. *That the Land of Judea, was the first Land, that ever had a Man for its Inhabitant*. Yea, there is a well-known Tradition, | That *Adam* was buried in Mount *Calvary*.¹³⁰

The Admirable Fertility and Amœnity of this Region agrees well enough, to our Assignment of it, for the Seat of *Paradise*. If you consult such Witnesses as *Hegesippus* and *Brocardus*, they will tell you enough, to make you {fall} in Love with the Countrey.

We will not insist on the plentiful Growth of that Fruit there, which is to this Day commonly called, *The Apple of Paradise*.¹³¹

It is expressly said of this Place; Gen. 13.10. *It was well watered, as the Garden of the Lord*. The /ð/ which we render, *As*, may not be, συγκριτον, to make a Comparison, but, αιτιατικον, to mention the *Cause*, why it was *well-watered*; namely, *As being the Garden of the Lord!* Thus our *Heidegger*.¹³²

¹³⁰ Josephus Flavius translates the Hebrew word “Adam” as “one that is red,” but does not specify the location from which the Creator took this “red earth” to form his protoplast (*Antiquities* 1.1.2). The Dutch ecclesiastic Christian Adrichomius (van Adrichem) (1533–85) elaborates on Josephus’s description and argues in his *Theatrum Terrae Sanctae* (1590) 45 # 90 (Ager Damascenus), that Adam was created in the fields of Libanus, between the rivers Adonis and Zidon: “The field of Damascus contains red and wonderfully pliant soil which the Saracens carry to Egypt, Judea, Ethiopia, and sell it where it is not available.” Mather’s second-hand citation from Heidegger (1:95, Exerc. IV, § 42) is a variant of St. Basil of Caesaria’s ὡς ἄρα πρῶτον ἡ Ἰουδαία ἐσχεν οικητοῦρα τὸν Ἀδὰμ, *Enneratio in prophetam Isaiam* (5.141.2–3). The tradition that Adam was buried on Mt. Calvary (Golgotha) is as venerable as the one in the Zohar that had Adam and Eve buried in the cave of Machpelah, which Abraham (upon recognizing it as Adam’s burial site) purchased for Sarah and himself (Soncino Zohar, vol. 1, Bereshith, sec. 1, pp. 127a, 128a, see also 248b). This story evidently derives from the Talmud, where R. Isaac relates that four couples were buried in the cave of Machpelah: Adam and Eve, Abraham and Sarah, Isaac and Rachel, and Jacob and Leah (Soncino Talmud, tractates Sotah 13a and Baba Bathra 84a). However, if the apocryphal *Revelation of Moses* is to be trusted, then angels took Adam’s body, wrapped him in three layers of linen and silk, and buried him in the land of Eden, from where God had taken the dust of which Adam was made (*ANF* 8:569–70). Versions of the same myth appear in the apocryphal *Testament of Adam* (3:6) and *Jubilee* (4:29–31). Finally, Epiphanius Constantiensis (c. 315–403), bishop of Salamis, relates that Adam was buried in Golgotha (Mt. Calvary), in the very same spot where the Second Adam would be crucified millennia later (*Panarion* 46.5.1–3, in *Epiphanius* 2:208).

¹³¹ Hegesippus (2nd c. CE) wrote one of the earliest histories of the Church – fragments of which survive in Photius. Brocardus’s discussion appears in his *Descriptio Locorum Terrae Sanctae exactissima* (1554).

¹³² Heidegger (and Mather) here distinguishes between the use of the Hebrew “kaph” as a correlative conjunction and as an adverb. Hence not “sugkrit[e]on” (verbal adjective) “one must compare” should be used, but “aitiateon” (verbal adjective) “one must allege as the cause.” Here ends the first excerpt from Heidegger (1:94–95, Exerc. IV, §§ 41–42), but Mather returns to this work many times more before he is done with his commentary on Genesis.

I know not what Reception these Thoughts may find, with the learned World. However the *Geography* of my incomparable *Helvetian* is more defensible, than that of the old *Epiphanius*, who (to show us, no doubt, that the Fathers were as accurate in their *Geography*, as in their *Astronomy*,) tells us, That *Pison*, which was one of the *Four Rivers* that watered *Paradise*, mentioned by *Moses*, was the same that the Indians and Ethiopians called, *Ganges*, and the Greeks, *Indus*; which River passing at length thro' *Ethiopia*, dischargeth itself at length into the Ocean at *Cales*.¹³³

The mention of which invites me, to take Notice: That all the Fathers do by *Gihon*, another of the Rivers wherewith *Paradise* was washed, understand the River *Nilus*. And even so late a Modern as Cardinal *Perron*, was herein so deceived, that he delivered it as an express Text of the Scriptures. A Dream, which was built, as tis noted both by *Scaliger* & by *Petavius*, upon no Manner of Reason.¹³⁴

But what shall we say? The *Philosophy* of the *Fathers*, was no better than their *Geography*. *Tertullian* endues the *Plants*, with *Sense*, & with *Understanding* too. *Ambrose* ha's a wondrous Flight; *Frequenter solem videmus madidum atque rorantem, in quo evidens est indicium, quod alimentiam sibi Aquarum ad Temperiem sui sumpserit*. And how scornfully does *Justin Martyr* deride the *Spherical Figure* of the Heavens! *Lactantius* would not endure to hear that the Earth is round. And *Austin* treats those as Infidels, who beleeve *Antipodes*.¹³⁵

133 Mather's praise for Heidegger, his "incomparable Helvetian," does not come as a surprise because in his *Ancoratus* (58.2.1–7), St. Epiphanius repeats his contemporaries' confusion about the identity of the Mesopotamian *Pison*, which he variously identifies with the *Indus* River in W India (today's Pakistan) and the *Ganges* in E India (modern Bangladesh).

134 Among the ancients who identified the River *Gihon* (Gen. 2:13) with the Egyptian Nile are Josephus (*Antiquities* 1.1.3), St. Epiphanius (*Panarion* 66.1.11, in *Epiphanius* 3:16–17), and many others. See Huet, *Treatise* (ch. 12, pp. 103–10). The debate among the ancients and seventeenth-century moderns is best synopsized in Matthew Poole's *Synopsis Criticorum* (vol. 1, col. 24–25; *Works* 1:151–55). Jacques Davy Du Perron (1556–1618), eminently learned RC prelate, cardinal, and later archbishop of Sens, and author of *Les Diverses Oeuvres* (1620–22), was criticized by Joseph Justus Scaliger (1540–1609), the famous Dutch Lutheran Renaissance historian, philologist, and chronologer, in his *De Emendatione Temporum* (lib. 5), and by Dionysius Petavius (Denys Pétau) (1583–1652), the celebrated French Jesuit and chronologer, esteemed for his massive five-volume (though incomplete) *Dogmata Theologica* (1643–50), *Tabulae Chronologicae* (1628) and *De Doctrina Temporum* (1627). Petavius rejects the assumption that the River *Gihon* is the same as the Egyptian Nile, in his *Theologicorum Dogmatum* (1644), tomus tertius, "De Sex Primorum Mundi Opificio" (lib. 2, cap. 5, § 7, p. 317).

135 In opposing Aristotle's argument that plants have vitality but lack knowledge and understanding (*De Anima* 2.2–3.30.413b–414b), the African Church Father Tertullian of Carthage examines the behavior of ivy-plants, shrubs, and trees and insists that their adaptive behavior to adverse environmental conditions suggests "vital instincts," "knowledge," and "understanding" (*Treatise on the Soul* 19), in *ANF* (3:199–200). St. Ambrose's wondrous flight signifies, "We often see the sun covered in drops of water and dew, which is a clear sign that he has nourished himself with water in order to cool himself down," in *Hexaemeron* (2.3.13–14) [PL 14. 151D]. Pointing at how Plato and Aristotle contradict each other on god, matter, and form, Justin

[129r]

Q. The affair of the *Nakedness* of our First Parents, deserves to be considered? v. 25.

A. There was a *Luminous Garment*, which the Lord putt on our First Parents, as a Pledge of their Innocence, and Purity, & of their Protection under the *Shechinah* of the Son of God. When our First Parents Revolted from God, that *Luminous Garment* was taken from them, & they were left in a grievous Confusion, *Ashamed* to appear in their New *Nakedness* before the Son of God in the *Shechinah*.¹³⁶

Fleming, among others, ha's lately a little cultivated this Notion; with some Thoughts that are not unworthy of Attention.¹³⁷

That this was the Beleeif of the Ancient Jewes, appears from the *Targum* of *Jonathan Ben Uzziel*, on, Gen. 3.7. *And the Eyes of both of them were opened, for they found, that the Bright Garment, with which they had been created, was gone from them.* The Word, which we translate, *Bright*, signifies, the *Onyx*, or, *Alabaster*; and therefore the Latin Version ha's it, *Nudati erant à veste Onychina, in quâ creati erant.* This *Garment*, they tell us, was to the whole Body, that which the *Nails* are to the Fingers; but more *beautiful*, and more pliable.¹³⁸

Probably, from this Glorious Garment, our First Parents, had the Name of *Adam*. This *Garment* was their *Glory*; It was the Token of their *Favour* with God: It was their Defence against the Injuries of the *Weather*; & against Sickness, & all Uneasiness: It was their *Shelter* against *Satan* too, who could not now so well approach them, to hurt their *Bodies*; It was the *Ensign* and *Engine* of their

Martyr dismisses them as unreliable guides on earthly matters (*Hortatory Address to the Greeks*, chs. 2–6), in *ANF* (1:273–76). Lactantius of Bithynia took exception to the idea of antipodes and the spherical figure of the earth because the feet of the inhabitants at the South Pole would be higher than their heads (*Divine Institutes* 3.24), in *ANF* (7:94–95). Finally, St. Augustine rejected the idea of antipodes as an illogical and empirically unproven speculation (*City of God* 16.9), in *NPNFi* (2:315–16). Mather also mocked these unphilosophical Fathers of the Church, in *Magnalia Christi Americana* (bk. 1, ch. 1, p. 2, §§ 1–2), and “General Introduction” (§ 5). Increase Mather joined the merriment, in his *Dissertation Concerning the Future Conversion* (32), and Samuel Sewall, in *Phaenomena* (34, 42). Long before his American exponents, Samuel Purchas had the first laugh in his *Purchas his Pilgrimage* (1626), bk. 8, ch. 1, § 1, p. 792–93.

¹³⁶ Mather argued that this protective “*Luminous Garment*,” forfeited by Adam and Eve, would be restored to the Raised Saints at the Second Coming” (*Threefold Paradise* 255). Mather’s source for this argument is evidently the Latin commentary by Isidore Clarius (on Gen. 2:25), incorporated in the famous commentary *Critici Sacri, sive Doctissimorum Virorum* (1660), edited by John Pearson, which offers the same explanation (1:59).

¹³⁷ The commentary on Gen. 2:25 in the subsequent paragraphs is extracted from Robert Fleming’s *Christology. A Discourse Concerning Christ*, vol. 2 (bk. 3, ch. 3, pp. 247–51).

¹³⁸ Fleming’s source and Latin quotation from the Targum of Jonathan ben Uziel (Gen. 3:7) is Walton (4:5). Mather’s rendition of “*Bright Garments*” reads “*White Garments*,” in Fleming (*Christology*, vol. 2, bk. 3, ch. 3, p. 247). The Latin variant from Jonathan ben Uziel translates, “they were naked, divested of the purple robe [onyx-garment], in which they had been created” (Etheridge 1:165).

Authority over the Inferiour Creatures; And, the Book of *Wisdom*, [ch. II.23.] insinuates, It was the Instrument of their *Immortality*.¹³⁹

Tis true, we are told before the Fall, *They were both Naked, the Man & his Wife, & were not Ashamed*. But this must not be understood of an *absolute Nakedness*. Otherwise we shall have but an odd Idæa of their Ignorance; For we find, They did not know themselves to be *Naked*, until after the Fall. The Meaning must be, That they had no such Material, Substantial, Thick Sort of a *Garment*, as they had, when they came to have the Skins of Beasts clothed upon them. What they wanted of a more Dense Covering, was abundantly made up in that *Luminous Garment*, with which the Glorious One defended them, & adorned them.

This *Luminous Garment* being removed on their Fall, they now *have their Eyes Opened, & know that they are Naked*. Finding themselves thus miserably Altered, they hide themselves among the Trees, & make *Fig-leaves* their Covering; as being *Asham'd* of their Folly, & *Afraid* of appearing before the Son of God, with whom they had formerly conversed, as appearing in the *Luminous Garment* of the *Shechinah*; whereto theirs had some Resemblance. They could not without shameful Confusion, stand in the Presence of Him, whom they had before seen and heard with the greatest Satisfaction; for by their Sin, they had *Lost their Garments*.¹⁴⁰

[On this Occasion, with a New Key in your hand, consider, Rev. 16.15. *Blessed is he that watcheth, & keepeth his Garments; lest he walk naked, & they see his Shame.*]

When they hear the *Voice* of the Lord, walking in the Garden, they *hid themselves from the Shechinah of the Lord*, among the Trees of the Garden. This | very *Flight*, was a Discovery of their *Guilt*. Being fetch'd into the Presence of the Lord, they confess their *Shameful Folly*, in losing the *Luminous Garment*, which He had bestow'd upon them. The Rebuke of the Lord upon them, is not in two distinct Quæries, as rendred in our Version; but there are two Parts of the same Sentence; *who told thee that thou wast Naked? Is it not because thou hast Eaten of the Tree?* Is it not thy own Sin, that ha's brought this Change upon thee?

[130v]

Behold, a more Consistent and Rational Account of this Matter, than what we have in the common Commentators!¹⁴¹

139 The apocryphal Wisdom of Solomon – originally part of the 1611 edition of the KJV – argues that “God created man to bee immortall, and made him to be an image of his owne eternitie” (Wisdom 2:23). The marginal annotation refers to its parallel text in Gen. 1:26–27.

140 Fleming, *Christology* (vol. 2, bk. 3, ch. 3, p. 249), evidently takes his cue from the Targum of Jonathan ben Uziel (Walton 4:5), which describes Adam and Eve's nakedness as a loss of their glory.

141 Mather's scientific-rationalistic analysis reveals his desire to transcend purely moral interpretations. Neither Simon Patrick, nor Matthew Henry, nor Matthew Poole, nor Samuel Clark in the seventeenth, nor John Gill (*Exposition*, 1:21–22, 24) in the eighteenth centuries, attempt to explain their nakedness in any other than moral or allegorical terms. Even the magisterial

There is this to confirm it. Our Apostle *Paul*, evidently alludes to this Notion. [2. Cor. V.1, 2, 3. and, 1. Cor. XV.44, 45, 53, 54.]

He runs a Comparison, between our present *Bodies*, and those *Garments of Light*, which the *Spirits* of Good Men, putt on, when they leave their *Bodies*. But then, our *Bodies* at length coming to be Raised from their Graves, *This Corruptible Body must putt on Incorruption; and this Mortal Body must putt on Immortality*. Tis a plain Allusion to that *Luminous Garment*, with which our First Parents were clothed in their Primæval State, & which rendred them *Incorruptible* and *Immortal*; & the Withdraw whereof brought them into their feeble, & dying Circumstances. This *Heavenly Cloathing* first præserve unto the departed *Spirits* of the Faithful, some Capacity of Appearing as *Men*. And afterwards, being super-induced on the Raised *Bodies* of the Faithful, it will præserve them from all *Corruption* and *Mortality*. This Opinion is unjustly ascribed unto *Origen*, as the Author of it; For it was the Opinion of the Jewish Church; from whence *Pythagoras* and *Plato* borrowed it, but carried the Matter too far, in their Fancies of, *Transmigration*. In our *Illustrations* on the *Pauline* Passages, this Matter will be further spoken to.¹⁴²

Synopsis Criticorum (1669–76) and *Critici Sacri* (1660) – perhaps the two most prestigious collections of sixteenth and seventeenth-century commentaries – confine themselves to moral explanations.

142 Origin asserts the resurrection of physical, yet immortal bodies in his *De Principiis* (2.10), in *ANF* (4:293–94). Among the Hebrew sources asserting the physical resurrection of the body are the traditions collected in the Midrash Rabbah (Gen. XX.10), the Mishnah (Abot 4:22), and the Talmud (Sanhedrin 91b), where Raba explains, “The Holy One, blessed be He, said, What I slay, I resurrect [i.e., in the same state], and then, what I wound, I heal [after their revival].” Greek philosophy – as Mather and most of his contemporaries still believed – was derived from the writings of Moses either directly or indirectly through dissemination among the Egyptians and Chaldeans. The concept of metempsychosis is ascribed to Pythagoras by several ancient authors including Porphyry (*Vitæ Pythagoræ* 19), Herodotus (2.123.2–3), Diogenes Laertius (*Vitæ philosophorum* 8.4–5), Diodorus Siculus (10.6.1–3), and Plato in *Phædo* (70c–d, 81–82), *Phædrus* (248c–e), and *Timæus* (41d–42d, 90e–91d).

Q. On the affair of {the} *Serpent*, in the Temptation of our First *Parents*? v. 1.

A. The excellent *Joachimus Langius*, in his Noble Treatise which is entituled, *Causa DEI, et Religionis Judæis revelatæ*: delivers us, from abundance of Difficulty, & this Part of the *Mosaic History*, from abundance of Encumbrance and Exception; by maintaining, That there was nothing of a *Literal Snake* in the Matter, nor any thing but a *Devil* appearing as an *Angel of Light* unto our Mother, and procuring the Name of, *The Serpent*, by the Poison & Mischief he therein brought unto her, & hers.¹

This is his Theorem.

Serpens Protoplastorum Tentator, non fuit Serpens naturalis, à Satanà obsessus, sed solus et merus Cacodæmon, in Angelum Lucis transformatus, et Serpentis nomine tantum cum emphasi insignitus.

A proper *Serpent*, we know, is no *Speaker*. What passed from the Mouth of *Balaams Ass*, was a Miracle.²

The *Punishment* in the Sentence of GOD upon the *Serpent*, won't prove such for the *Natural Serpent*. There is no more *Enmity* between *Man* and a *Serpent*, than between *Man*, and many *other* Noxious Creatures. For a *Man* in *Walking* to *bruise* the *Head* of a *Natural Serpent*, & have his *Heel* bitt'n by

1 The German Lutheran Pietist Joachim Lange (1670–1744), professor of theology at the Frederician University of Halle (Saxony), was a close associate of the Pietist August Hermann Francke of Halle, with whom Mather corresponded and exchanged several of his works. See K. Francke (“Correspondence,” “Cotton Mather”), Benz (“Ecumenical Relations”), and Lovelace (*American Pietism*, ch. 2). Mather refers to Lange’s *Causa Dei et religionis Judæis revelatæ* (1726–27), a repudiation of the philosophers Benedict Spinoza and Christian Wolff.

2 Lange’s theorem states that “the serpent, the tempter of the first-created people, was not a natural serpent possessed by Satan, but merely and purely an evil demon, transformed into an Angel of Light, and emphatically distinguished by only the name of a serpent.” In Mather’s time, ancient and modern authorities were deeply divided on how to interpret the story of the serpent in Eden. Literalists insisted on Satan speaking through the serpent akin to the miraculous voice issuing from Balaam’s Ass (Num. 23:5) – an event all too common, it seems, considering that Hera endowed Achilles’s horse Xanthus with human speech predicting his master’s death (Homer, *Iliad* 19.404–17). Fellow literalists include Josephus Flavius (*Antiquities* 1.1.4) and Philo Judæus (*De Opificio Mundi* 56.156, 160). Aristotle for one argued that the entire species of serpents is “mean and treacherous” (*Historia animalium* 1.1.488b, 16–17); Gregory of Nyssa, however, thought that the serpent in Eden was a gentle creature, not winding on dust, but going upright upon its feet (*De Paradiso* 79.20–21), an idea also espoused by R. Hoshaya the Elder (Midrash Rabbah, Gen. XIX:1). Others such as Joseph Mede (*Works* I, Discourse XXXIII.277–86) and Simon Patrick (*Commentary* 1:16) provide standard interpretations. The debate is best summarized in Matthew Poole’s *Synopsis Criticorum* (1:31–33, *Works* 1:175–82), on Gen. 3:1. Adam Clarke’s *Commentary* (1:47–49) lists interpreters who translated the Hebrew noun “nachash” (serpent) as whale, serpent, hippopotamus, sea-horse, crocodile, even as orangutan.

him, is a very, very Rare Contingency. And in it, the *Heel* of the *Man*, rather *Touches* than *Bruises* the *Head* of the *Serpent*. To *creep* on his *Belly*, & lick the *Dust*, – how many *Reptiles* are there, besides the *Natural Serpent* which this belongs unto. And must the whole *Kind* of *Serpents*, be punished for the Sake of something that occur'd in *One Individual*?

In Parallel Texts of Scripture, the Term *Serpent*, means nothing of the *Natural Serpent*, but the *Devil*. Consider, 2. Cor. XI.2. Rev. XII.9. XX.2. Compare, Matth. III.7. XII.34. XIII.33. Rom. III.13. XVI.20. Psal. XCI.13. Isa. XXVII.1. Our SAVIOR instead of, The *Serpent*, says, The *Devil*. Joh. VIII.44. Compare, Rev. XII.9. XX.2. –

Tis among the *Hermeneutic Rules*; *Talia esse subjecta, qualia permittuntur esse à fuit predicatis*.³

And whereas we read, *The Serpent was more subtil than any Beast of the Field*: he is here *Distinguished* from the *Beasts*. Tis not the Particle, /ב/ but the Particle /נ/ that is employ'd on this Occasion; which intimates a Comparison, but an exclusive one.

The Name of a *Serpent*, is very justly putt upon *Satan*; considering the *Mortal Venom*, as well as *Cunning* of the Animal, especially some Species of it. See Act. XXVIII.2. And so, *Herod* was called, *A Fox*. The *Hebrews*, when the [132v] metaphorical Name of, *A Serpent*, was used by *Moses*, on this Occasion | were so well acquainted with the *Fall* of *Man*, that they needed no Explication of it.⁴

Yea, Tis plain; The Terms, /נחש/ and /שרף/ are synonymous. [Plain from, Num. XXI.8, 9.] But the Word, *Seraph*, is a Name for an *Angel*: on the Score of the Splendor he appears in. And then, why may not the Word, *Nachash*, do for a *Devil*?

By this Interpretation, as my *Langius* observes; *Effugimus Difficultates alias non facile solubiles*.⁵

[133r] |
3038.

Q. Who was it, that first mention'd the Name of GOD, in this World, and on what Occasion was the first mention of it? v. 1.

A. *Athanasius*, for ought I know, was the first that made this odd Remark. It was the *Divel*, when he said unto *Eve*; *Hath God said?*

3 The hermeneutic rule reads, “that subjects are of such sorts as are allowed by predicates.”

4 The Hebrew particles are “beth” and “mem.” Mather’s reference to the viper fastening itself to Paul’s hand after his shipwreck on Malta appears in Acts 28:3–4 – not verse 2. Herod the Great (or his son Herod Antipas) is referred to as a “fox” in Luke 13:32.

5 The Hebrew terms נָחָשׁ [nachash] (Gen. 3:1) and שֶׂרָפִים [seraph] (Num. 21:8–9) both suggest “serpent,” “fiery (poisonous) serpent,” but also “seraph” and “seraphim” – orders of winged angelic beings [Strong’s # 5175, 8134]. No wonder that Joachim Lange observes in his *Causa Dei*, “We flee other difficulties that are not easily solvable.” Mather also explores the literal and typological significance of the serpent in his annotations on Numb. 21:9, on Psal. 58:5–6, and in his sermon *Zalmonah* (1725).

This may afford Matters of some sad Reflection.⁶

3373.

Q. The *Serpent* in which the *Divel* managed the Temptation of our *First Parents*, what may one think of it? v. 1.

A. I find some learned Men, of late, offering this Conjecture.⁷

There were, (and still are in the *Eastern & Southern* Parts of the World,) *Serpents* having *Wings*, and shining very brightly, like unto *Fire*. [See Isa. 14.29.] The *Fiery Serpents* are called *Seraphims*: [Num. 21.6, 8.] Not meerly from their *Venome*, which *inflamed* the Bodies which they stung, but also from their *Aspect*, which appeared like a *Flame* in their Flight.

Seraphim is a Name given to that Higher Sort of *Angels*, which are called, *Angels of the Presence*: [Isa. 6.2, 6] who exhibited themselves in some such Form, no doubt, with *Flaming Wings*. Probably the *Divel* used some such *Serpent*, (but of a more surpassing *Brightness*, than any now extant,) that he might resemble one of the most *Illustrious Angels*, as near as might be. *Eve* might the more easily hearken to the *Serpent*, when she took him, for one of the *Seraphim*; which herself had seen in such splendid Circumstances attending upon the Divine Majesty; for the *Angels* alwayes made a Part of the *Shechinah*. Was not this Matter so understood by *Tertullian*, when he said, *Istum fuisse Serpentem, cui Eva, ut Filio Dei crediderat*; and elsewhere he said, The *Serpent* was, *Divinae Imaginis Prædo*, An *Usurper of the Divine Image* from the Beginning.⁸

6 St. Athanasius points out this oddity in *Questiones in scripturam sacram* [PG 28. 744a]. In his "Notebook of Authors and Texts Throughout the Bible" (1720) [AAS Mather Family, Box 50], Mather identifies this reference as Athanasius's *Opera* (2:415), yet does not identify which Latin edition of the Greek original he refers to. Numerous Latin and Greek editions of Athanasius's works had been published by the end of Mather's lifetime.

7 Most of Mather's commentary on Gen. 3:1–5 (below) is copied (often verbatim) from Simon Patrick (*Commentary* 1:16–18).

8 Typical of much of the theological scholarship of the day, layers upon layers of citations at second, third, or fourth hand are submerged in this and other paragraphs. Mather's immediate source is Patrick (*Commentary* 1:16). The Latin citation from Tertullian's *Adversus omnes haereses* (cap. 2) signifies, "this was the Serpent, to whom *Eve* gave Credit, as to the Son of God" (see *ANF* 3:651). Tellingly, Mather cites Tertullian at second hand from Patrick's *Commentary*, but not Patrick's translation. Patrick erroneously identifies as his source Tertullian's *De praescriptionibus adversus haereticos* (cap. 47). The second citation is from Tertullian's *Adversus Valentianianos* (cap. 2) [PL 2. 544B], in *ANF* (3:504), but this time Mather does copy Patrick's translation (*Commentary* 1:16–17). Patrick's own acknowledged source, including the Latin translations, is *Of Idolatry* (1678), by Dr. Thomas Tenison (1636–1715), archbishop of Canterbury, who faithfully uses quotation marks to set off his own material from that of his own sources (ch. 24, pp. 355–56). Tenison's acknowledged source for "Saraph" is Johannes Buxtorf's *Lexicon Hebraicum and Chaldaicum* (1646): 437, 805, 813, 830. Increase Mather discussed the whole order of angels, their function, and purpose, in *Angelographia* (1696). For Mather's typological link between the brazen serpent of Moses and Christ as Savior, see his sermon *Zalmonah* (1725).

Epiphanius mentions those, who held, That the Woman listned unto the *Serpent*, και ἐπεισθη ὡς υἱὸς θεοῦ, and was perswaded by him, as *the Son of God*. One knows not, what Notion R. *Bechai* might have, when he said, on the Fourteenth Verse of this Chapter, *This is a Mystery of the Holy Language, that a Serpent is called Saraph, as an Angel is called Saraph*; and adds, That the *Seraphim* in the Book of *Numbers*, were *The Offspring of this old Serpent*. He concludes, *understand this, as a Matter of great Concernment*.⁹

Q. The Woman represents God as putting that Clause into His Prohibition, *Neither shall yee touch it*. In Gen. 2.17. we don't find that Clause? v. 3.

A. *Lyra* thinks, that she added these Words, out of Dislike to the Præcept. One who dislikes a Præcept, adds unto it, to make it seem the more grievous.¹⁰

3374.

Q. It seems much, that *Eve* should so easily take up, with the Account, which the Diuel gave, of the *Forbidden Fruit*? v. 5.

A. Dr. *Patrick* saies, He can give no Account of it, but this; That when we are searching after the Reason of Things, (as *Eve* doubtless was, after the Reason of the Lords *Forbidding* that *Fruit*;) and cannot find it; if one be suggested unto us, which never came into our Mind before, tho' in itself most unlikely, we readily catch at it, & are pleased with it. When the Mind is weary with enquiring, it will take up with a *False Reason*, rather than with None at all. The Promise also of *Knowledge*, especially of such Knowledge, as would advance her to a more Noble Condition, was very Tempting. And it is likely, she thought an Heavenly Minister might understand the Meaning of God, better than herself.¹¹

Q. *Knowing Good and Evil*. What? v. 5.

A. It signifies as much as, To *know every thing*. Compare 2. Sam. XIV.14, 20. and, Deut. I.39. and Gen. XXXI.29.

⁹ Patrick, *Commentary* (1:17) on Gen. 3:1. In his *Panarion* (37.4.5), Epiphanius Constantiensis points his finger at the sect of the Ophites (snake worshipers) who held that Eve believed the serpent "as if he were God's son" (*Epiphanius* 2:56.9–10). Rabbi Bechai (c. 1260–1340), also known by his Hebrew name Rabbeinu Bachya ben Asher, is the Spanish biblical scholar from the same circle as R. Nachmanides (Ramban). The citation from R. Bechai's commentary on the Torah (Gen. 3:14, 15) appears in his *Beor al ha-torah: Bereshith* (*Torah Commentary* 1:118), a classical Hebrew commentary generally cited in every Rabbinic Bible (Mikraoth Gedoloth).

¹⁰ Nicholas of Lyra (c. 1270–c. 1340), a Franciscan theologian of Verneuil (Normandy), gives his explanation of this discrepancy (Gen. 2:17, 3:5) in his *Postilla Super Totam Bibliam* (1492): l.n.p. It is very likely that Mather quoted the passage at second hand, even though he had access to a Harvard copy of Lyra's *Lyrani Operâ Theologorum Duacens*. 7 vols. (Duaci, 1618), in *Catalogus* (1723), p. 4 (folio).

¹¹ Mather's verbatim extract is from Patrick's *Commentary* (1:17–18) on Gen. 3:5.

Q. What can you offer, to Illustrate the Largeness and Likelihood of the *Fig-leave* Aprons, used by our sinning and shamed First-Parents? v. 7.

A. If any Doubt, what *Fig-tree* could afford *Leaves* large enough, handsomely to accommodate any with a Garment, Lett him remember, that besides what *Athenæus* propounds out of *Theophrastus* concerning the Indian *Fig-tree*, as θαυμαστή οὐσα τῷ μεγέθει, there is a Passage in his L.4. *de plantis*, c. 5. that saith of this Tree, φύλλον οὐκ ἔλαττον ἔχει πέλτης, it is *as Large as a Shield*. *Pliny*, I will not quote you; for hee is an Author so Fabulous, that, A *Plinyism*, is justly become, a Phrase for a *Fable*: Yett, whether in that I shall do better or no, I'll quote you *Solinus*, who saith, of this Tree, *Foliorum latitudo, forme Amazonice peltæ comparatur, pomum eximie suavitatis*.¹²

The Paradaisaic *Figtree* probably, had *Leaves* of as large Dimensions, as any now in the *Indies*. But if now the Supply of Garments from this *Tree* rather than from another, with the Reported *Sweetness*, of its Fruit, shall incline you to think, that this very *Tree*, was it, by the Eating whereof, our first Parents came | to see their Want of those *Garments*, you will have the Consent of *Isidore Pelusiota*, to confirm you in that Opinion: for hee, giving the Reason why our Saviour cursed the *Figtree*, saith, L.1. ep. 51. ὅτι το ξύλον της παραβάσεως τουτο, – and this being the *Tree of Transgression*, saith hee, our Lord, out of Pitty & Mercy to Mankind Imprecated it, *ne posthac fructum peccati causam proferret*. However, I can't forgett the notable Cause assigned, by *Irenæus*, and by *Cedrenus*, why our First Parents chose *Fig-leaves* rather than any thing else to cover them; *Per succinctoria, in facto ostendit suam pænitentiam, tali Indutus tegumento, quod Delectationem quidem nullam præstat, mordet autem et pungit corpus*. A Consideration that carries much Admonition in it!¹³ [134v]

¹² Athenæus of Naucratis (3.13.7), citing Theophrastus (*De causis plantarum* 2.10.2), affirms that the Indian fig-tree “is of surprising height” (*Deipnosophists* 3.77f). Theophrastus argues in his *Historia plantarum* (4.4.4.16) that the leaves of the Indian fig-tree [*Ficus bengalensis*] are “almost as large as a shield.” Pliny (16.49.113) asserts that the Eastern fig-tree has the greatest and most shady leaf of all, but Gaius Iulius Solinus, who cribs his Latin sentence (and virtually everything else) from Pliny (12.11.22–12.12.24), claims that “the broad leaves [of the Indian fig-tree] are comparable to the shape of an Amazonian buckler, the fruit of extraordinary sweetness,” in Solinus’s *De mirabilibus mundi* (ch. 53 “India,” toward the end).

¹³ St. Isidore of Pelusium (d. c. 450) confirms in *Catena in Matthæum* (catena integra), in *Catenæ Græcorum partum in Novum Testamentum* (1:171.23), that “this being the tree of transgression,” the Lord cursed the tree “so that henceforth it may not bring forth fruit as the occasion for sin.” At least six editions of Isidore Pelusiota’s works (bk. 1, epist. 51) had been printed by the end of the seventeenth century. According to Irenæus (*Against Heresies* 3.23.5), our protoplast chose fig leaves as punishment because they irritated his body more than any other leaf (*ANF* 1:457). The Byzantine historian Georgius Cedrenus (fl. 11th–12th c.) opined in his *Compendium historiarum* (1:14.19–1:15.3) that “by their loincloths, he [Adam] shows his penitence by deed; clothed in such a garment that no pleasure is available, he bites and stings his body.”

Q. Tis said of our Parents, *They Sewed Figleaves together*. Where had they their *Needle & Threed?* v. 7.

A. There was no need of *Needle* or *Threed* in the business; for the original Word, signifies, not *Sowing*, but, *Wreathing* or *Twisting*. They took the *Boughs* with the *Leaves*, which they twisted into a figure suitable to their Occasion.

2752. We may make this Matter, yett a little more unexceptionable; because the foolish *Deists*, do so cavil at it.

The original Word here, *Tapar*, signifies no more than to *Adapt*, and *Apply*. And the Word, *gueleh*, which wee render, *Leaves*, also signifies *Branches* of Trees, the same whereof they made *Booths* or *Bowers*. Thus what wee render, To *sew Leaves together*, is only to twist or platt the Flexible Branches of the *Fig-tree*, round about their Wastes, in the Manner of a Roman Crown; the Broad Leaves of the Tree now hanging down, represented the fashion of a Pair of *green Breeches*. I will add, The *Sieur Luillier*, in his Voyage to the *East-Indies*, finds a *Fig tree*, the Leaves whereof are so long and so broad, that they can easily cover a Man all over. And hee conjectures this to be the same with *Adams* Fig tree.¹⁴

2732.

Q. What is meant by their *Knowing themselves to be Naked?*

A. Dr. *Patrick* summs up all the Senses of it, thus; A *cold Shivering* siezed on them; They perceived also that they were stript of their Intellectual Ornaments; (as *Athanasius* expounds it;) and blush'd also at their Bodily Nakedness.¹⁵

Q. Some Further Considerations on the *Figleaves?*

A. It is a little surprizing, to call to Mind, the several Considerations, which Antiquitie had of the *Fig tree*, with reference to the *Secret Parts*. They are by Sir *Tho. Brown* touch'd upon.

Fig-leaves are described by sundry Authors, to have some Resemblance unto the Genitals; and so they seem aptly formed, for a Contection of those Parts. In *Praxiteles's* famous Statue of *Alexander*, the Secret Parts were veil'd with *Fig-leaves*. This Tree was of old sacred unto *Priapus*. And it is well known, that the Diseases of the *Secret Parts* have derived their Names from *Figs*.

¹⁴ The prime root of the Hebrew word תָּפַר [taphar] suggests "to sew together" [Strong's # 8609], and the Hebrew עָלֶה [aleh] signifies "leaf" or "foliage" [Strong's # 5929]. Mather refers to the French traveler *Sieur Luillier-Lagaudiers* (fl. 17th c.), whose popular *Nouveau voyage du Sieur Luillier aux Grandes Indes* (1705) was excerpted in Capt. William Symson's *A New Voyage to the East Indies . . . With many excellent Remarks by the Sieur Luillier* (1715).

¹⁵ The paragraph is extracted from Simon Patrick's annotations on Gen. 3:7, in *Commentary* (1:18). Patrick's own annotations are derived from *Athanasius's Against the Heathen* (§ 3), in *NPNFii* (4:5). Like *Athanasius*, the Targum Hierosolymitanum on Gen. 2:25 here interprets "naked" as "wise" (Poole's *Synopsis Criticorum* 1:30–31; *Works* 1:173).

It is a pretty odd Note of *Almeloveen*, in his *Opuscula*; That the Statues of *Priapus* in After-ages, were made of the *Fig tree*; in remembrance of the early Use, to which our First Parents putt the Leaves of it.¹⁶

3376.

Q. What was the *Presence of the Lord*, from whence our Fallen Parents hid themselves? v. 8.

A. The Son of God, now appeared in the very Glorious *Clouds*, or *Flames* of the *Shechinah*, with a most amazing Brightness. Probably, The *Shechinah* or the *Divine Majesty* appeared not now in so mild a Lustre, as when they were first acquainted with Him. No, but in a more terribly burning *Light*, which look'd as if it would consume them. So we know, He appeared, at the giving of the Law, upon Mount *Sinai*. [Exod. 19.18. and Deut. 4.11.]¹⁷

Q. On that Enquiry, *Adam, where art thou?* v. 8.

A. Old *Eucherius* would have this contained in it; *Quo recidisti?* whither art thou fallen? what art thou come to? Tis not meerly, *pro sciscitatione querentis*, but also, *cum Increpatione Interrogantis*.

He also says, it intimates, That *omnis ille qui peccat, per Delictum recedens à conspectu Dei, notitia eius efficiatur indignus*. A Sinner is not worthy, that GOD should look upon him, and see where he is.¹⁸

[▽Insert from 137r]¹⁹

[▽137r]

3377.

Q. Why is it not said unto our First Parents, *Thou art Cursed*, as well as unto the *Serpent*? v. 14.

¹⁶ Sir Thomas Browne discusses the parable of the fig tree, the medicinal qualities of figs and fig leaves, and the fig tree's sacredness as a symbol of fertility, in his *Certain Miscellany Tracts* (1684), Tract 1: "Observations upon several Plants mention'd in Scripture" (sect. 43), *Works* 3:265–72. "*Confection*" is an obsolete term for "covering up" (*OED*). The worship of the Greco-Roman god *Priapus*, the ithyphallic son of *Dionysius-Bacchus*, is by *Strabo* (13.1.12) associated with the city that bears the god's name. The famous statue of *Alexander the Great*, attributed to the Athenian sculptor *Praxiteles* (c. 375–330 BCE), is probably that of the *Satyr*, leaning on a tree stump. Only a Roman copy survives of *Praxiteles*'s original. The "pretty odd Note" of *Theodoor Jansson van Almeloveen* (1657–1712), Dutch professor of medicine at *Harderwijk University*, appears in his *Opuscula; sive, Antiquitatum e sacris profanarum specimen* (1686) 1–7.

¹⁷ See Appendix B.

¹⁸ *Mather* records this entire paragraph on a separate snippet of paper [verso blank] for sequential insertion at this point. Old St. *Eucherius Lugdunensis*, bishop of *Lyon* (d. c. 449), insists in his *Instructionem ad Salomonium libri Duo, in Genesi* (lib. 1, cap. 1) [PL 50. 776C] that the rebuke is not merely "for the curiosity of someone asking," but also done, "with the rebuke of an examiner." God's question intimates that "everyone who sins, receding from the sight of God by his transgressions, is made unworthy to know Him."

¹⁹ See Appendix B.

A. It is observed by *Tertullian*, That tho' God inflicted Punishments on *Adam* and *Eve*, yett He did not *Curse* them, as He did the *Serpent*, *Ut Restitutionis candidatos*; they standing fair for a *Restitution* to His Favour.²⁰

3378.

Q. Why should the literal *Serpent* be *cursed*, which was only an Instrument of the *Divel*? v. 14.

A. Why must an *Oxe* which killed a Man, be stoned? [Exod. 21.28.] It was to show, the great Value, that God sett upon the Life of Man. Thus, the *Serpent* was condemned, in Mercy to *Adam* and *Eve*; That they might be still minded of their foul Crime and Guilt, & excited unto Repentance, by seeing a Noble Creature (which was but the Instrument of their Fall) debased into so vile a Condition.

But I have elsewhere denied the literal *Serpent* any Share in the Matter.²¹

3379.

Q. What was the *Curse* of the *Divel*, involved in that of the *Serpent*? v. 14.

A. The *Curse* of the *Divel* in general, was, To be thrust down further than before, from his ancient Heavenly Habitation; and confined unto the lower, smoaky, wretched Region of the Air; where he hath lost all Relish of Cœlestial Enjoyments, & pleases himself only in his vile Endeavours (as Dr. *Patrick* expresses it) to make Mankind as wicked as himself.²²

3381.

Q. That Clause in the *Curse* upon the *Serpent*, *Dust shalt thou eat, all the Dayes of thy Life*: What Gloss did the Ancients putt upon it? v. 14.²³

A. I'll entertain you with a Gloss of the Blessed *Prosper* upon it; and tho' it may not please our *Judgment*, yett if it Help our *Practice*, t'wil be worth mentioning.

Saies he, *Terrenis Cupiditatibus inhiantes Animæ, Terræ similes comparantur*. Lett *Earthly-minded* Men look to it; for Satan makes a Prey of them. Such Persons, as *Prosper* proceeds, are meant, by *David*, when he saies, *The Wicked shall be as the Dust* [Chaff] *which the Wind drives to & fro*; And by *Jeremiah*, *They which*

²⁰ The Latin citation from Tertullian's *Adversus Marcionem* (2.25) [PL 2. 315A] is at second Hand from Patrick's *Commentary* (1:19) on Gen. 3:14 and reads "for [they were] candidates for restoration" (*ANF* 3:317). In his "Note Book of Authors and Texts Throughout the Bible" (1720), Mather also lists as his additional source Mede, *Works* (bk. 1, Disc. 38, pp. 287–94).

²¹ The passage is extracted from Simon Patrick's *Commentary* (1:19). Mather also discusses this issue in his commentary on Gen. 3:15 (below) and Gen. 3.1 (above).

²² Patrick's annotation on Gen. 3:14 (*Commentary* 1:19). Satan's ousting from heaven is described in Rev. 12:9.

²³ Erroneous v. 15 in MS changed to v. 14.

depart from thee, shall be written in the Earth; And by Job, The Earth is given into the Hand of the Wicked.²⁴

Q. Why is our Saviour called, *The Seed of the Woman*? v. 15.

A. Elsewhere we give some Account of it.

All that I shall do here, is to recite a Passage, which I find in the first Volume of the, *Miscellanea Curiosa*.

Dr. George Garden, of Aberdeen in Pursuance of what had been observed by Dr. Lieuenhoeck, of an Infinite Number of *Animalcule in Semine Marium* of all kinds, proceeds to confirm these Three Observations. First; That all Animals are *Ex Animalculo*. Secondly; That these Animalcules are originally, *in Semine Marium et non in Feminis*. Thirdly; That they can never come forward, nor be formed into Animals of the Respective Kind, without the *Ova in Feminis*. It seems also most probable to him, that the *Stamina* of all the Plants and Animals that have been, or ever shall be in the World, have been formed, *ab Origine Mundi*, by the Almighty, within the First of each Respective Kind.

He adds, "This gives a New Light, as it were, to the First Prophecy concerning the *Messiah*, *That the Seed of the Woman shall bruise the Head of the Serpent*; All the rest of Mankind, being thus most properly & truly, the *Seed of the Man*."²⁵

[135r]

²⁴ St. Prosper of Aquitaine (c. 390–c. 463) argues in his *De promissionibus et praedictionibus Dei. A Nonnullis S. Prospero Attributus*, cap. 3, § 5. [PL 51. 736B] that "souls that covet earthly desires are treated as though they were earth." The biblical references are to Jer. 17:13 and Job 9:24. See also Mede's *Works* (bk. 1, Disc. 39, pp. 295–300).

²⁵ This extract is from Dr. George Garden (1649–1733), a physician of Aberdeen (Scotland), whose article "A Discourse concerning the Modern Theory of Generation" appeared in *Miscellanea Curiosa: Being A Collection of some of the Principal Phaenomena in Nature*, 3 vols. (1705–07) 1:143, 147, 148–49. Dr. Garden's microscopic experiments confirmed those of Anton van Leeuwenhoek (1632–1723), an accomplished Dutch scientist and discoverer of microorganisms. Leeuwenhoek postulated that the spermatozoa in the seminal fluids fertilized the ovum upon penetration of the egg. The debate centered on the question of procreation and its theological implications: Does a new creation (by God) take place every time an egg is fertilized, or does each microscopically small fetus exist in the seminal fluid (independent of the egg) and merely expands during the incubation process? The debate involved such noteworthy scientists as William Harvey, Marcello Malpighi, Jan Swammerdam, Anton van Leeuwenhoek, Claude Perrault, and many others. The Latin passages from George Garden's article read respectively "a tiny animal in the seminal fluids," "out of tiny living animals," "in the seminal fluids and not in the female," "the eggs in the female," and "from the beginning of the world." In this manner, physio-theologians like Garden saw no conflict between their microscopic research and their study of messianic prophecies (Gen. 3:15). Mather also put to good use the work of Garden and Leeuwenhoek in his anthology of scientific discoveries *The Christian Philosopher* (1721) and in his medical handbook *The Angel of Bethesda* (1972).

1648.

Q. Is there any singular Curiositie in the Letters of the first Promise to Fallen Man? v. 15.

A. It may bee, you'l reckon the Strain a little too fine, if I mention a Note of one; but I'll mention it.

Hee saies, That there occur Instances, wherein Times are to bee reckoned by *Letters* of the Bible; and that our Lord intimated this, when Hee styled Himself A, and Ω;

Hee adds, for an Instance, That the very Number in the Hebrew Letters of that *Curse* to the *Serpent*, or *Blessing* to our *First Parents*, in Gen. 3.15. [which is 4266] makes up the Years of the World, according unto *Scaliger*, & all that follow him, to *Constantines* breaking of *Maxentius* and *Licinius*, and the other Members of the *Dragon* in the *Revelation*; a Pledge of a greater Work that yett remains to bee done by our Lord Jesus Christ.²⁶

3380.

Q. What more particular Kindness, both unto *Adam*, and unto *Mankind*, was expressed by God, in His first Promise unto them? v. 15.

A. Mr. *Alix* hath observed, That *Adam* having been seduced by his Wife it might have produced a Breach between them, had not God mercifully prevented it, by a gracious Promise of a *Redeemer*, depending on his *Union* with his Wife, from whom one should issue, that would repair their Losses.

Again; The Time when this Promise was made, is Remarkable. It was long before any Distinction was made upon any Account among the Sons of *Adam*;

²⁶ Numerological studies (Gematria) of the Hebrew Bible were popular throughout the ages and served those who searched for its mystical significations as a means to decipher hidden meanings and prophetic foreshadowing. See Jacques Basnage's *History of the Jews* (bk. 3, ch. 11, pp. 189–90). Mather's material may have been based on John Foxe's popular martyrology, *Acts and Monuments* (1632) 1:129–30 (Ages Digital Library 1:898); Mather employs an almost identical passage in his *Threefold Paradise* (292–93). The Christological reading of Gen. 3:15 in connection with the termination of Satan's rule (Rev. 12:13–14; 13:5) is standard in Mather's day and is generally derived from Joseph Mede's "Discourses" 25, 29, 37, and "Discourse 39" on Gen. 3:15, in *Works* (1664 ed.), bk. 1, pp. 143, 184, 284–85, 295–300. (See Mather's "Note Book of Authors," on Gen. 3:15). Mather's Gematria result of 4266 years – when dated from the creation of Adam (4004 BCE) – should yield the year when Roman Emperor Constantine I vanquished Maxentius and Licinius; however, this tabulation of years, though agreeing with the timeline established by Joseph Justus Scaliger, in *De Emendatione Temporum* (1583), does not concur with the timeline established by James Ussher half a century later. In Christian martyrologies, Roman Emperors Marcus Aurelius Valerius Maxentius (306–12) and Publius Flavius Galerius Licinius (307–324) are mostly remembered for their cruel persecutions of early Christians. Constantine I, the Great (d. 337), Roman emperor of the East, killed Maxentius in 312 and Licinius in 324. See A. T. Grafton, "Joseph Scaliger."

to show that all the World might look upon the *Messiah*, as a Benefit *common* unto them all.²⁷

[▽Insert from 141r–142v]

[▽141r]

Q. A good Illustration upon that *Prot-Evangelium*, as we may well call it; *I will putt Enmity between thee and the Woman, and between thy Seed and her Seed; It shall bruise thy Head, & thou shalt bruise His Heel*. This would help us to understand the Religion of the *Patriarchs*; and it would open to us, the Text, upon which indeed the whole ensuing Bible is a Commentary? v. 15.

A. The Jewes themselves do acknowledge, That *Satan* is, in this famous Oracle to be understood under the Hieroglyphick of the *Serpent*. [Compare, Isa. 27.1. and Psal. 91.13.] The *Punishment* here denounced, is upon him who deceived *Eve*; It was not the *Serpent* but *Satan*, in it, who spoke to her. No Creature on Earth pretends to *Speech*, but *Man*. And therefore, as others call *Man*, λογικον ζων· the *Hebrewes* call him מְדַבֵּר / *The Speaking Creature*. What is called, Gen. 2.7. *A Living Soul*, is by *Onkelos* rendred, *A Speaking Spirit*. The *Syriac* and the *Arabic* Language, uses the like Term. The *Serpent* was possessed by *Satan*, or as the *Synagogue* tells, by *Samael*, the *Angel of Death*.²⁸

And now, behold, how the whole *Oeconomy* of *Grace*, in the great Matter of our Salvation, is here delivered unto us! We will summ up the Observations, of the great *Cocceius*, and of his Scholar *Heidegger*, upon it.²⁹

²⁷ The material of these two paragraphs is extracted from Simon Patrick's annotations on Gen. 3:15, in *Commentary* (1:20). But the true source for both Patrick and Mather is *Reflexions upon the Books of the Holy Scripture* (1688), vol. 1, ch. 9, p. 51, by the learned Huguenot divine Pierre Allix (1641–1717).

²⁸ Mather alludes to Ibn Ezra's commentary on Gen. 3:1 where the famous rabbi presents the opinions of various interpreters who either believed that the serpent was "Satan," that an angel spoke while the serpent mimicked speech, or that the serpent could speak and "walked in an upright position" (*Commentary on the Pentateuch: Genesis*, 1:64–65). Philo Judaeus presents a similar argument, in his *Questions and Answers on Genesis*, I (31–32), in *Works* (797–98), and he is among the many ancient commentators who called man "logikon zoön," or "reasoning being." Mather's Hebrew-Aramaic citation מְדַבֵּר / [memalla] appears in Onkelos (Gen. 2:7, silently corrected from Mather's erroneous verse Gen. 2:6) and is rendered "homini in spiritū loquentē." The Syriac and Arabic versions translated into Latin render the phrase "animam viventem" and "anima ratione" respectively. In all these cases (Gen. 2:7), Mather draws on Brian Walton's *Biblia Sacra Polyglotta* (1:6, 7). Hebrew commentaries identify Samael as a wicked angel, hence the angel of death. See *Genesis Rabbah* (LVI:4), *Exodus Rabbah* (XVIII:5), and *Zohar* (Bereshith, sec. 1, p. 23b).

²⁹ Praising the Reformed theology of his German colleague Johannes Cocceius (1603–69), Reformed theologian and professor of Hebrew at Leiden University, Mather here tabulates Cocceius Christological interpretation of Gen. 3:15. Cocceius's *Lexicon et commentarius* (1669), *Summa doctrinae*, editio secunda (1654), and *Operum omnium* (1660) were within Mather's reach at Harvard Library (*Catalogus Librorum* 10, 73). The Zurich professor of theology Johann Heinrich Heidegger elaborates on some of these Christological concepts in his *De historia sacra patriarcharum* (1:100–05, Exerc. IV, §§ 57–69).

I. First, *I will putt Enmity*. Alas, then there is an *Amity*. Man ha's lost the Friendship & Image of God by Sin, & is become willing to do the Will of *Satan*. Our Natural *Misery*, & *Impotence* is here before us.

II. Man does not of his own Accord come to *Repentance*; does not of himself shake off the Service of *Satan*. It is *God*, who *putts the Enmity*. And He does it in a way of Sovereign *Grace*; a *Grace* which is not suspended on any thing done by us; who continue the Slaves of *Satan*, till that *Grace* do rescue us.

III. In the *Conversion* of a Sinner to God, what is he brought unto? An *Enmity* to *Satan*. So then, the converted Sinner does not persist in his Obedience to *Satan*. He is turned from *Satan*, and becomes obedient unto *God*.

IV. The *Woman* ha's a *Seed*, which is distinguished from the *Seed* of the *Serpent*. The *Woman* becomes the *Mother*, of, אִמַּת כָּל *Every Living One*;³⁰ all that Part of Mankind, which become so Quickened by the *Spirit of Holiness*, as to be the Heirs of *Everlasting Life*. All wicked People, are, *The Seed of the Serpent*. [Compare, Matth. 13.38. and, 1. Joh. 3.10. and Matth. 3.7.] But unto *Eve* there is promised, an *Holy Posterity* [compare, Isa. 6.13.] who after many Conflicts with *Satan*, come to Inherit *Life Eternal*.

V. How is the *Holy Seed* produced? The Children of God, are Made and Born so, from supernatural Influences of Heaven upon them. [Compare, Joh. 1.13. and, Rom. 9.8.] The Promise belonging to the *Seed of the Woman*, the Patriarchs might now gather, that it belonged not unto *all* the Children of Men. *Eve* seems to exclude *Cain* from any Share in it. [Gen. 4.25.]

VI. A Glorious CHRIST is now exhibited unto us. *Eve* is called, The *Mother of all the Living Seed*. Why was not she so called, before the *Promise*? Meer *Natural Life* is not all that is intended in it. It was from her apprehending of this *Promise*, that she obtained the Name. The *Living Seed* implies, both the, *Enlivening Seed*, and the *Enlivened Seed*; the *Sanctifying* and the *Sanctified*. [Compare, Heb. 2.11.] It is the *Messiah* that is the *Enlivening Seed*. None but He, whose Name is *Jehovah*, could *Bruise the Head* of *Satan*. [Compare, Zech. 3.2. and, Rom. 16.20.] And if a *Christ* were *promised* in this Word, we may conclude, that a *Christ* was also *perceived* by the *Patriarchs*, who had this Word convey'd unto them. *Si nullo modo percipere potuissent sensum genuinum, Spiritus S. ijs talia locutus non esset.*³¹

VII. Our Glorious CHRIST is the *Redeemer* of Men. *Sin* had made us obnoxious to *Death*; and *Satan* had the *Power of Death*. [Heb. 2.14.] The *Messiah* takes away this *Power* from him, in *Bruising* of his *Head*. By *bruising* of his *Head*, He rescues His Elect, out of the *Jawes* of the *Angel of Death*.

VIII. All the Faithful have a *Communion* with the Saviour, in His *Great Salvation*. For tho' our CHRIST underwent the *Wrath* of the *Winepress Alone*, and

³⁰ Gen. 3:20: אִמַּת כָּל אֲדָמָה [em kol-hay] "mother of all the living" [Strong's # 2416].

³¹ Mather's second-hand Latin citation – probably from Cocceius's *Lexicon* – reads, "If they had not been able to perceive the true meaning in any way, the Holy Spirit would not have spoken such things to them."

Alone *Bruised the Head of the Serpent*: yett this *Contrition* and *Victory* is ascribed unto *all the Seed*. We have an, admirable *Fellowship* with the *Messiah*, in His *Victory* over *Satan*.

IX. Stand Astonished at the *Justice* of God! The Sinner cannot be Delivered, except the *Heel* of the *Seed of the Woman* be *Bruised*. The *Death* of our CHRIST is meant, in that *Bruising of the Heel*. The *Law* had adjudged the Sinner to *Death*. *Satan* putts in his Memorial for the Execution of the *Law*. The *Law* must be satisfied, by the *Death* of the *Messiah* for us.

X. And might not the Fathers discern from the Prophecy, that the *Messiah* must be *God* and *Man*, in *one Person*, This being the *Seed of the Woman*, infers³² that He must be a *Man*. There must also be a Kindred | between Him, and the rest of the *Seed of the Woman*. But then, He that *breaks the Head of the Serpent* must be God; This is a Work for none but a *God*!

[▽142v]

XI. Whatsoever is *Born of a Woman* in an *ordinary Way*, is born under *Guilt* and *Curse*. The *Messiah* being to *break the Serpents Head*, and rescue Mankind from the *Curse*, the Patriarchs might infer³³ that He should not be born in the *ordinary Way* with the rest of Mankind. They might gather, that He must be the *Son of a Virgin*. His being also called, *The Seed of the Woman*, might intimate, that He should have a *Mother* without a *Father*.

XII. The *breaking of the Serpents Head*, is a Destruction that will involve the *Seed of the Serpent* in it. As on the one Side, the People of the *Messiah*, must expect Vexations from the Diuel, who does *bruise the Heel* of the *Seed of the Woman*; so on the other Side, the *Serpent* ha's a People, who must perish with *the Diuel & his Angels*. And thus, the *Last Judgment* also came into the *Faith of the Patriarchs*.

This is the Summ of the *Christian Religion*, wherein the Ancient Patriarchs were instructed of God. And this *Idea* of the *Patriarchal Religion*, ought to be carried in our Minds, as we go on in reading the rest of the Sacred Scriptures now before us.

One elegantly calls the rest of the Scriptures, *Commentaries upon that Evangelical Grain of Mustard-Seed, sown by the Hand of God in Paradise*.³⁴

[△Insert ends]

[△]

[▽Insert from 137r–138v]³⁵

[▽137r]

³² Or rather, “implies” – a common error in Mather’s writing.

³³ I.e., “imply.”

³⁴ Mather probably has Cocceius in mind and the scriptures in Matt. 13:31 and Luke 13:19, in which the kingdom of heaven is likened to a small mustard seed that sprouts into a mighty tree.

³⁵ Mather inserts the following directions: “Here bring in from the Next Leaf, ye Two Illustrations, on v. 15. and 17.”

1693.

Q. The *Curse* denounced by the Blessed God, on the *Earth*, at and for the Fall of Man: when took it place? v. 17.

A. Lett us consider, with Dr. *Woodward*, the other Part of the *Curse*, which was *Death* upon Man himself; and wee shall find, that tho' the Dominion of *Death* over Man, commenced indeed, the same *Day* that the Sentence was passed, yea, the same *Hour* that by tasting the forbidden Fruit hee incurr'd the Sentence; yett it was a long while, that the full Execution was delay'd, by the Clemency of God; *Adam* was Reprieved for Eight or Nine Hundred Years.³⁶ Thus here, the *Sterility*, which the *Earth* was *cursed* unto, so far took place immediately that *Thorns* immediately manifested themselves on every Side: Nevertheless, tis thought by some, the *Fertility* of the *Earth*, suffered little Diminution, till the *Flood* overwhelmed it. The Vegetable Productions of the Antediluvian *Earth*, still preserved, have satisfied, such Industrious and Judicious Enquirers, as my Dr. *Woodward*, That the Luxuriance and Fecundity of that *Earth*, was wonderful. At the Time, when the *Deluge* came, the *Earth* was even over-loaded, with its own Productions, to such a Degree, that such an Expedient was wanting, to ease it of its Burden. That the *Deluge* was the special fulfilment of the *Curse* pronounced at the Fall, is evident from the Words of God, at *Noahs* coming out of the Ark, when the Deluge was over, Gen. 8.21. *I will not again curse the Ground any more*: which anon Hee calls, Gen. 9.11. *A Destroying of the Earth*. Nor is it strange, that the *Curse* had its Effect no sooner; for | you may see this Way of Proceeding, in other Instances. A *Curse* due to *Cham*, is denounced upon *Canaan*; *A Servant of Servants, hee shall bee to his Brethren*; to *Shem*, and *Japhet*. This was not inflicted so much as upon the Person of *Canaan*, but upon his Posterity; and this not until many Generations afterwards, when the *Israelites* did subjugate the *Canaanites*; T'was well onwards of a Thousand Years, before the *Curse* began to take Effect!

[▽138v]

Thus, it was as long after, as the *Flood*, that the *Curse* upon the Primitive *Earth* was executed. The *First Earth*, was then taken all to Peeces, & framed anew; *Our Earth*, was by the *Flood*, in just such a Posture, as the *First Earth* was, when it first Rose out of Nothing; and God used such a Method of Nature, in *Settling* it again, when Hee had broken it all to Shivers (by bursting the *Strata*

³⁶ According to James Ussher (*Annals* 2), Adam and Eve were punished by God for their transgression and expelled from Eden on the same day that he was first brought into the garden “upon the tenth day of the world,” which in the Julian calendar occurred on the “first day of *November*.” Adam died 930 years later, in 930 AM (Anno Mundi) or in the year 1640 (Julian Calendar), which is 3074 BCE (Gregorian Calendar). The following four paragraphs are a paraphrase of *An Essay toward a Natural History of the Earth* (1695), part 2, pp. 99, 100, 101, 102, 103, 104–05, by Mather’s correspondent John Woodward (1665–1728), professor of physics at Gresham College and leading member of the Royal Society of London. Woodward’s thesis of the Flood and its impact on the earth’s fertility was highly controversial at the time.

of it, & bringing out the central *Abyss* upon it,) as Hee did in first *Forming* of it: only Hee brought a Notable Change upon it, in regard of its *Fertility*.³⁷

The *Vegetable Matter*, which before lay on the Surface of the *Earth*, was now retrenched, & confounded, and much of it, Buried. Only so much of it was left near the Surface, as might just suffice the Wants of Mankind; and this not *pure*, but mixed with so much *Mineral Matter*, as that it requires much Labour, Tillage, and Manure, to fetch a competent Crop out of it. By this Means, a great Part of the *Time*, which the Inhabitants of the *First Earth* had to spare, (for tho' they *till'd* the Earth, yett a very little *Tillage* would serve!) and which they used unto very vicious and ungodly Purposes, even so as to fill the World, with such enormous Wickedness as might bee expected from the sinful Hearts of Men, when they are at Liesure to sin, This *Time* is now spent in *Digging*, in *Plowing*, in difficult Employments, which Restraine Men from such Miscarriages, as else they would soon abandon themselves unto.³⁸

Behold therefore, the *Curse* of the *Earth*, gloriously moderated with a *Blessing*, to the succeeding Generations of its Inhabitants. The Constitution of the *Earth*, as it is by the *Flood* fashioned afresh, is more nearly accommodated unto the Frailties of them that live upon it. Had the only Design of the *Deluge* been, to punish the People then living, & so to deter their Offspring from living like them, this Design might have been more compendiously brought about, than by thus unhinging the whole Frame of this Globe, all at once. God could have sent innumerable Disasters upon them, which might have carried them off by sholes, and have swept them all clear away. The Artillery of the Sky, which is in His Power, was enough to have Thunderstruck them all; Hee could have consumed them with Fire from Heaven. The Design lay deeper; It was to Remove the Temptations and Inducements of Sin, out of Mans Way, when hee had lost his Innocence. Had the *Earth* been emptied of Men, the next Sett of Men, would have gone on to sin, like their Predecessors, if they had not been Fettered, by the *Earths* being brought into such a Condition, as would require the most of their Thoughts and Cares, to contrive, not *Wickedness*, but a *Subsistence* upon it.

But upon the miserable Condition of the *Antediluvian Earth*, we may elsewhere offer some different Sentiments.

[△Insert ends]

[△]

3381.

Q. What Remark upon that, *Thou shalt eat the Herb of the Field?* v. 18.

A. Here the Rabbins cry out, *Mensura pro Mensurâ!* Behold, the Justice of God, who served Man in his Kind! He was not satisfied with the choice *Fruits* of the *Garden*, in which God putt him; and therefore He took them from him,

³⁷ See Woodward's *An Essay* (part 2, pp. 108, 97–98; part 3, pp. 117–18, 151).

³⁸ See Woodward's *An Essay* (part 2, pp. 108, 105–06).

& sent him to eat the ordinary Food of *Beasts*; and that not without hard Labour neither.³⁹

2417.

Q. What special Remark, is to be made upon the Sentence passed against us, *In the Sweat of thy Face, thou shalt eat Bread?* v. 19.

A. 'Tis the Remark of *Maimonides* upon it, That the *Punishment* answers the *Sin*. *Qui cibo peccaverat, cibo punitur*.⁴⁰

{..}46.

Q. *Adam* seems to call his Wife, *Eve*, not until after the Fall; why not until *Then?* v. 20.

A. Before the Fall, hee call'd her, (A *Woman*) *Ishah*. But now, upon the Fall, the Promise of the *Messiah* was made unto her; and hereupon hee call'd her *Eve*, because out of her should proceed *Hee*, that should give *Life*, unto all them that seek Him. In and by the *Messiah*, shee is the *Mother of all the Living*, who, brought into the World else none but Sinners, and such as without *Him*, are *Dead in Trespasses & Sins*. This Observation, I had from one *John Jacob*, an Ingenious *Jew Turn'd Christian*.

Mr. *Pyles* has this Note upon it. *Adam* under a Threatning of Death, expecting that the Threatning would be immediately executed, was transported when he heard of being saved from the present Execution of it, and express'd his Joy by calling his Wife, *Eve*, or one that should yett *Live*, and bear an Offspring that should also *Live* and be *Saved*.⁴¹

2825.

Q. We read, The Lord made for our fallen Parents, *Coats of Skins*, & clothed them: why, *Coats of Skins?* v. 21.

³⁹ Mather's erroneous identification of verse 18 as v. 19 is here emended. Mather's comments are again cribbed from Patrick's annotation on Gen. 3:18 (*Commentary* 1:21), but Patrick himself consults Maimonides. Adam's punishment for disobeying God was banishment from Paradise: "measure for measure," as suggested by Buxtorf's Latin translation of Maimonides's *Doctor Perplexorum* (1629), pars 1, cap. 2, p. 6. (*Guide* 1.2.16).

⁴⁰ Alluding to Ps. 49:13, Maimonides (*Doctor Perplexorum*, pars 1, cap. 2, p. 6) argues that since Adam listened to a beast (the serpent), he was reduced to the level of a beast as well. According to Maimonides, Adam's punishment answered his sin because he "who had transgressed by food, will be punished by food" (see *Guide* 1.2.16).

⁴¹ See Patrick on Gen. 3:20 (*Commentary* 1:21). Mather's acknowledged source is [*Even Jero'sh pina*] *The Jew turned Christian; Or the Corner-Stone* (1678/9), by the purported converso John Jacob (fl. 17th c). See also Richard Mayo's *A Conference betwixt a Protestant and a Jew* (1678, 1687). The passage from Thomas Pyle is extracted verbatim from his *Paraphrase with Short and Useful Notes* (1717), vol. 1, ch. 3, p. 24, note 20 (Gen. 3:20).

A. Why not, that He might intimate unto them, the *Beastliness* into which they were fallen? I find some learned Man making this Gloss upon it.⁴²

My excellent *Langius* ha's another Gloss. *Eos de veste Justitiæ, quam CHRIS-TUS, Agnus ille Dei, aliquando immolandus, ipsis paraturus eras, simul admonuisse videtur.* God putt them in Mind of the *Garments of Righteousness*, which were to be provided for them, from a *Sacrificed Saviour*.⁴³

[Insert from 142v–144v]

[▽142v]

Q. Some Remarks upon the State of the Church before the Law, may be seasonably introduced here? v. 21.

A. They shall be Monsr. *Jurieu*'s. The Church did exist in *Families* dispersed thro' the World. If the *Families* lived near one another, they cultivated a good Correspondence, and for the most Part maintained something of an Union in their Worship.⁴⁴

These *Families* were Independent, & had no necessary Recourse to one another in Religious Matters.

Tho' if any Chief were known to enjoy extraordinary Illuminations from GOD, the other Families would in difficult Cases repair unto him. So *Job*, was the Oracle of the whole Countrey where he lived.

The Devotions performed in each of the Families, were according to Directions from the Head of it; The Father, was the Teacher, & the Ruler.

No Family pretended unto the Right of Quarrelling with another for the Declining from the Path of true Piety; every Family claim'd an entire Liberty of Conscience.

Yett the Families often invited one another, unto their Sacrifices & Entertainments; whereat he that gave the Invitation was the Master.

While the Children lived under the Tuition of their Parents, they were obliged unto the Religion of their Parents. But when they swarmed into Families of their own, they did as they pleased, in all Respects.

⁴² The learned man is the Anglican clergyman Thomas Gataker (1574–1654), whose *Londinatis Cinnus* (1651) 202, is the source in question. Matthew Poole offers much the same in his *Synopsis Criticorum* (1:48) on Gen. 3:21.

⁴³ Joachim Langius's gloss, most likely from his previously cited *Causa Dei et religionis* (1726–27), reads that the Lord "seems to have warned them at the same time about the robe of righteousness, which Christ, the Lamb of God, who would later be sacrificed, was to prepare for them."

⁴⁴ Pierre Jurieu here defends Congregational Independency against the Presbyterian polity advocated by Cocceius and Heidegger (1:46–77, Exerc. III: "De ecclesia et theologia patriarcharum"). Heidegger argues that in the times of the ancient patriarchs, ecclesiastical courts were already in existence to censure transgressions among the tribal families as a whole. The subsequent paragraphs are a synopsis of Jurieu's *Critical History*, vol. 1, part I, ch. xviii, pp. 182–83 (§§ 3–4, 6–9), and p. 184.

All these petty Churches, being in such Independency on one another, did not acknowledge any one for their Supream Head, so as to submitt unto his Decisions.

Indeed, it required a greater Presence of the *Prophetic Spirit*, for the Preserving of the Church, while so destitute of an exterior Form, that the Jews putt the Name of, *Tohu*, or *Chaos*, upon it.⁴⁵ But probably, the *Spirit* made more frequent Visits in those Days; and very many of the *Patriarchs*, were *Prophets* also.

Monsr. *Jurieu* from this View of the Ancient Church, argues, the Folly & Falsity of that Notion, that the Church cannot subsist without a Sovereign Court of Justice, or Judge to determine such Differences, as may arise from time to time. Sais he, *I am clearly of Opinion, that they lived as peaceably in the ancient Church, as we do nowadays, in ours; Neither do I find them ever to inveigh against Hæresy & Hereticks, unless under that Name you will comprehend Idolatry.*⁴⁶

[▽143r]

Q. Some Remarks on the Relation given by *Moses*, concerning the *Fall of our First Parents*? v. 21.

A. In a Discourse of Dr. *Sherlock* the Younger, concerning, *The Use and Intent of Prophecy*, you will find some Remarks to this Purpose.⁴⁷

The more and oftner the Case is considered in all its Circumstances, the more will the commonly received Interpretation prevail; which is evidently the True Ancient Interpretation of the Jewish Church; as appears, by the Allusions to the *History of the Fall*, to be mett withal in the Books of the *Old Testament*.

Unto some *Unbelievers*, the *History of the Fall*, would have been altogether as *Incredible*, tho' perhaps not quite so *Diverting*, had it been told in the *Simplest* and *Plainest* Language. — As to others, who are not Infidels with regard unto Religion in general, yett are shock'd with the Circumstances of this History; Lett *Them* consider, That the *Speculations* arising from the *History of the Fall*, and the Introduction of *Natural* and *Moral* Evil into the World, are of all others the most abstruse & obscure, & the most out of Reach unto us. This Difficulty led Men in the *Earliest Ages*, to imagine Two Independent Principles of *Good* and *Evil*: A Notion tending to destroy that *Sovereignty of GOD*, the Maintaining whereof is the principal Design of the *Mosaic History*. Had the *History of the Fall* plainly introduced an *Invisible Evil Being*, to confound the Works of *GOD*, and be the *Author of Iniquity*, it might have given great Countenance to this Error, of *Two Principles*; or, to prevent it, *Moses* must likewise have written, the *History of the Angels Fall*; which he had no Commission to do; nor were we very

⁴⁵ Gen. 1:2. See Soncino Talmudic tractate Mas. Chagigah (12a) and Sanhedrin (26b).

⁴⁶ *Jurieu, Critical History*, vol. 1, Part I, ch. xviii, p. 185 § 3.

⁴⁷ The following paragraphs are excerpted from *The Use and Intent of Prophecy*, sixth edition (1755), a collection of discourses delivered in 1724, by Thomas Sherlock, D.D. (1678–1761), bishop of London, whose conflict with Dr. Hoadly in the Bangorian Controversy is reflected here. Mather's verbatim extract is from "Discourse III," in Sherlock's *Use and Intent* (55–65).

capable Judges of such a Matter. The Difficulty is in a great Measure avoided, by his having recourse to the common Usage of the *Eastern Countreys*; which was, To cloathe *Histories* in *Parables*, and exhibit Things under the Conveyance & Advantage of *Similitudes*. The *Serpent* was remarkable for an *Insidious Cunning*; and therefore stood as a proper Emblem of a *Deceiver*: And yett being one of the *Lowest Creatures*, the Emblem gave no Suspicion of any Power concerned, that might pretend for to Rival the Almighty Creator. This Method has not so obscured the *History*, but that we may with great Certainty come to the Knowledge of all that it is necessary for us to know. Lett us consider the History of *Moses*, as we would any other Ancient History, of like Antiquity. Suppose, for Instance, that this Account of the Fall, had been præserted unto us out of *Sanchoniathons* Phœnician History;⁴⁸ we should in that Case be at a Loss perhaps to account for every *Manner* and *Figure* of *Representation*, and every *Expression* in the Story. But we should soon agree, that all this Difficulty was imputable, to the *Manner* & *Custom* of his *Age* and *Countrey*; and show more of Respect unto so venerable a Peece of *Antiquity*, than to charge it with Want of *Sense*, because we did not understand every minute Circumstance. We should likewise agree, that there were evidently *Four Persons* concerned in the Story. The *Man*, the *Woman*, the *Person* represented by the *Serpent*, and *GOD*: And about their several Parts, there could be no Disagreement. The *Serpent* is evidently the *Tempter*; The *Man* and the *Woman* are the *Offenders*; And *GOD* is the *Judge* of all the Three. The *Punishments* inflicted on the *Man* & the *Woman*, are all intelligible enough. And as to the *Sentence* on the *Serpent*, we should think it Reasonable to give such a Sense of it, as the whole Series of the Story requires. If the same Equity be allowed in the Interpreting of *Moses*, this *Plain Fact* undeniably appears in the History, “Man being Tempted unto Disobedience, did actually Disobey his Maker; and thereby forfeit all Title unto Happiness, and unto Life itself: And *GOD* thereupon Judged *him*, and the *Deceiver* likewise under the Form of a *Serpent*.”⁴⁹

That Great and First Prophecy, *I will putt Enmity between thee & the Woman, and between thy Seed and her Seed; It shall bruise thy Head, and thou shalt bruise His Heel*⁵⁰; This is Part of the *Sentence* passed on the *Deceiver*. Christian Writers apply this to our Blessed SAVIOUR; emphatically styled, *The Seed of the Woman*, who came in the Fullness of Time to *Bruise the Serpents Head*, by

48 Sanchoniathon's *Phœnician History* (c. 700–500 BCE?), extracts of which survive in Eusebius's *Preparatio evangelica* (1.9–10) and elsewhere, is by the Greek historian Philon of Byblos (70–c. 160 CE) dated to the period before the Trojan War (c. 1300 BCE). However, Sanchoniathon more likely lived during the reign of Alexander the Great in the 4th c. BCE. In Mather's time, Henry Dodwell discusses the trustworthiness of this Phœnician historian, in his *Discourse Concerning Sanchoniathon's Phœnician History* (1681).

49 The passage in quotation marks is a rhetorical reconstruction of Sanchoniathon's history and appears in Sherlock's *Use and Intent* (58).

50 Gen. 3:15.

[▽144v]

destroying the Works of the *Devil*, and restoring those to the Liberty of the Sons of GOD who were held under the Bondage of Sin. You will say, By what Rule do you find all these things intended here? Tis no Wonder to hear such Quæstions from those, who look no further than the *Third Chapter of Genesis*, to see the Ground of the Christian Application. But lett us first See, what might be discovered unto our *First Parents* at the *Time* when this Prophecy was | delivered; and what we may reasonably suppose they apprehended of it.

They were now in a State of *Sin*, standing before GOD, and waiting to receive Sentence for their Disobedience, and had Reason to expect a full Execution of the Penalty, *In the Day thou Eatest thereof thou shalt surely Dy.*⁵¹ But GOD came in *Mercy* as well as in *Judgment*, and purposed not only to *Punish* Man but also to *Restore* him. The Judgment is awful & severe; Terminating in This, *Dust thou art, and unto Dust thou shalt return.*⁵² Had they been left thus, they might have look'd on themselves as Rejected utterly of their Maker, delivered up to *Trouble* in This World, without Hope of any *Comfort* in another. Upon that Foot, there could not have been any Religion left in the World. If therefore GOD would præserve them as Objects of Mercy, it was necessary to communicate so much *Hope* unto them, as might afford a *Rational Foundation* for their future Endeavours to seek Reconciliation and yeeld Better Obedience. This Prophecy is excellently adapted unto this Purpose, and manifestly conveyed such Hopes unto our First Parents. Now they must necessarily understand the Prophecy, either according to the literal Meaning of the Words, or according to such a Meaning as the whole Circumstance of the Transaction whereof they are a Part, will require. If we suppose them to understand the Words Literally, the Passage must appear absolutely Ridiculous. Do but imagine, that you see GOD coming to *Judge* the Offenders; *Adam* and *Eve* before Him in the utmost Anguish of Distress; and GOD inflicting *Pains*, and *Griefs*, and *Miseries*, and even *Death* itself upon the First of Humane Race: And in the Midst of this Wo, and fearful Calamity, you hear the Great GOD foretelling with all *Solemnity*, a very *Trivial Accident* that should sometimes happen in the World; That *Serpents* would sometimes bite a Man by the *Heel*, and the Man would be ready to Revenge himself by striking them on the *Head*. I beseech you, what has this *Trifle* to do, with the *Loss of Mankind*, the *Corruption* of the *Natural* and *Moral* World, and the *Ruine* of all the *Glory* and *Happiness* of the Creation? A mighty Comfort this, to *Adam*, after telling him, that his *Life* would be short & sad & full of Misery, and he must have *no Hope in his Death*, to lett him know, that he should now & then knock a *Snake* on the *Head*; but not even that, without paying dear for his poor *Victory*; for the *Snake* would often give him a Bite by the *Heel*. *Adam* could never understand this Prophecy in such a Sense; tho' some of

⁵¹ Gen. 2:17.

⁵² Gen. 3:19.

his wretched Sons, would have it understood so. But then, what Meaning must the Circumstances of the Transaction unavoidably fix upon the Words of this Prophecy? *Adam* tempted by *Eve*, and She by the *Serpent*, had fallen from their Obedience to GOD, and were now in His Presence, expecting His Judgment. They knew full well, that their Fall was the *Victory* of the *Serpent*, whom they found by Experience to be an *Enemy* of GOD, whose Noble Work he had now defaced, and of *Man*, whom he had ruined by seducing him to sin. It could not therefore but be some Comfort unto them, to hear the *Serpent* first condemned, and see that however he had prevailed against *them*, he had gain'd no *Victory* over their *Maker*; who was able to assert His own Honour, and punish this Great Author of Iniquity. By this Method they were secured from thinking, that there was any *Evil Being* æqual to the Creator, in Dominion. Probably to this refers that Ancient Passage; Job. XII. 16. *With GOD is Strength & Wisdome; the Deceiver & the Deceived are His*; equally subject unto His Command. This Beleeif being thus præserted, (which was much lost in After-Ages,) it was necessary still to give them such an *Hope*, as might make them capable of Religion towards GOD. This *Hope* they could not but conceive, when they heard from the Mouth of GOD, that the *Serpents Victory* even over themselves, was not compleat; but they & their Posterity should be able to contest his Empire, & tho' they suffered much in the Struggle, yett they should finally prevail, & *Bruise the Serpents Head*, & be delivered from his Dominion over them. Now, what could this Conquest of the *Serpent* mean? But as the Enemy had by *Sin* subdued them, *he* should be subdued by a Return of *Righteousness*; And this must be followed with a Recovery of the Blessings which they had forfeited.⁵³

[136v]

Q. How may those Words bee taken, *The Lord God said, Behold, the Man is become, as one of us?* v. 22.

A. What say you to this? May not these Words, bee a Censure of Almighty God, upon Fallen Man, of this Import; *Man is now as ONE FROM HIM*; that is, one from the *Divel*, thro' whose Temptation Man fell? This I am sure of, *בְּיָמָיו* denotes the *Third Person Singular*; and in one Verse [namely, Zech. 10.4.] tis rendred, FROM HIM, no less than Four Times over.⁵⁴

⁵³ Here ends Mather's verbatim excerpt from Sherlock's *Use and Intent* (55–65).

⁵⁴ Mather here adopts Martin Luther's reading (Gen. 3:22) and argues that the Hebrew *בְּיָמָיו* "of us" [1st person common plural] denotes that Adam "became like the devil" (*Lectures on Genesis*, in *Luther's Works* 1:222). John Calvin similarly rejects verse 22 ("one of us") as proof of the Trinity and suggests this verse signifies the following: "After this, Adam will be so like ME [God], that we shall become companions for each other" (*Commentaries* 1:183). Either way, Mather's standard reference source, Patrick's *Commentary* (1:21–22), rejects both Luther and Calvin, citing as authoritative proof *Disputationes de locutionibus sacris* (1648), Disp. IV (n. 15), by the German Lutheran Orientalist Theodor Hackspan (1607–59). Mather, however, is

607.

Q. Is there any Remarkable, about the Name of *Adam*, when the Lord said, *The Man is become as one of us?* v. 22.

A. The Jewes themselves confess, That *Adam* was, as *Menasseh Ben Israel* speaks, *Caput et Principium Humanæ Naturæ*. And it is a Note of, *Aben-Ezra*, which that Author mentions; *Nominibus proprijs in Sacrà Scripturà non præfigi*, He Demonstrativum; *Quod tamen, in voce Adam sit*, Gen. 3.22. *Ratio est, quia in Adamo notantur eius posterì, et universa species Humana designatur.*⁵⁵

667.

Q. The Condition of Man, after his Fall, coming to *know Good & Evil*, what means it? v. 22.

A. Mr. *Baxter* saies, *I have been as much Troubled to understand that Text, as any one almost in the Bible, being somewhat unsatisfied with some ordinary Expositions; and yett it is too hard for mee.*⁵⁶

Nevertheless, hee offers, a Notion to this Purpose, as the most probable Interpretation.

Adam, in his Innocency, was like a Child in his Fathers House; to know, and please, & obey his Father, was to bee his only Study. Hee was to take no Care for himself, for while hee was obedient, it was the Part of his Father, to præserve him from all *Evil* and supply him, with all *Good*; Tho' Man had then the *Facultie* of *Knowing*, beyond what hee hath *Now*, yett hee had no need of Troubling himself about the Matters of *Self*; or, what should happen, *Good* or *Evil* for him in the future Condition of his Life; those Matters belonged unto God; the Actual, and the Considering, *Knowledge* hereof, hee needed, no further, than to have a Religious *Hope*, for the *Good* of the *Promise*, and *Fear* of

correct in pointing to Zech 10:4 as evidence for the translation of the Hebrew phrase מִמֶּנּוּ as "from him" [Strong's # B5520].

⁵⁵ Mather here refers to *De creatione problemata XXX* (1635), by Manasseh Ben Israel (1604–57), the celebrated rabbinic scholar of Amsterdam, best known for his four-volume *Conciliator; sive de convenientia locorum S. Scripturæ* (1632–51). Ben Israel argues that Adam was "the Head and Beginning of Human Nature." Ben Israel cites a note of the medieval Jewish scholar Aben Ezra (Abraham Ibn Ezra), who insists that "the demonstrative He [הוא] is not prefixed to proper nouns in the Holy Scripture; however, it may be in the word *Adam* (Gen. 3:22). The reason is that in *Adam* his successors are denoted, and the whole of humankind is designated." See also "Questions 6, 7, 8, 9," in Ben Israel's *The Conciliator* (1:13–18). In his *Commentary on the Pentateuch: Genesis* (1:42–47, 75–76), Ibn Ezra discusses the confusion about the plural pronoun "us" and denies that it implies God's plurality.

⁵⁶ The citation is from *A Treatise of Self-Denial* (1659), reprinted in *The Practical Works of... Richard Baxter* (1707) 3:346, ch. 1, sec. 6, of Richard Baxter (1615–91), an influential English Nonconformist divine, friend and correspondent of the Mathers. Several of Baxter's works were owned by the Mathers (Tuttle, "Libraries" 284, 316) and as many more were accessible to Mather at Harvard library (*Catalogus* 4, 38, 68, 69, 71). For Mather's esteem for Baxter's works, esp. his *Christian Directory*, see *Diary* (1:412; 2:25, 315, 498, 518, 782); *Memorable Providences* (1691), "Preface"; and *Threefold Paradise* (22–23, 34, 270, 311).

the *Evil* in the *Threatning*; any further *Knowledge*, or, Concernment about those things, would have been Unnecessary, Tempting, and Vexing. [Eccl. 1.18. Heb. 2.15.] Indeed, in our *Fallen Estate*, there may bee more need, for some of this *Knowledge*; but in our *Upright Estate*, there need {be} only of our *Knowing* our Maker, and His Will, and Law; and His *Works* as the Glass, that Repræsented Him, and all Creatures, as Instruments for His Glory. Wee need have busied ourselves no further; as to the Disposing of *Events* that might bee *Good* or *Evil* for ourselves, wee should have left all unto the Lord. But, by the Temptation of *Satan*, it came to pass, that *Man* would bee past a *Child*; hee would no longer bee under his Fathers Care, but would Himself, *Know*, Discern, Order, what should bee *Good* or *Evil* for himself, in his Natural Circumstances. Now, hee studied the Creatures, no longer to Behold *God* in them; no, but that hee might Search after what should bee *Good* or *Evil*, for *himself* in them. Hee would no longer *Know* one God, and all things else only in and for God, but hee now minded *himself*; and all things as they were *Good* or *Evil* for *himself*. As a Patient, that shall bee dissatisfied, with the Care and Skill of his faithful Physician, but will needs himself *Know* all that shall bee *Good* or *Evil* for himself, that hee may no more trust his Helper; & hearkens therefore to a Seducer, who tells him, *The Physician does but keep thee in Ignorance, lest thou shouldest bee as wise as hee, and able to Help and Heal thyself; Hearken to mee, and I will teach thee, to know all things for thyself, and so thou mayst look after thyself*. Thus was Man withdrawn, from his Necessary Dependence on the God, that made him.⁵⁷

[▽137r]

[139r]

2333.

Q. The *Flaming Sword*, which turned every Way, to keep the Way of the Tree of Life; Your Thoughts upon it? v. 24.

A. That which is commonly rendred, *Flaming Sword*, is, as our Dr. *Nichols* notes, the *Flame of Cutting*, or, a *Dividing Flame*. Tho' the same Word signify, *Sword*, yett it also signifies *Division*. And the Writers of the New Testament, translate the same Word both Wayes. [Math. 10.34. with Luk. 12.51.] This *Dividing Flame*, or, *Fiery Division*, then, is but answerable to the *Wall of Fire*, which God promised by the Prophet *Zachary*, to make about *Jerusalem*. It was, as Dr. *Nichols* thinks, the Accension of some Inflammable Matter, round about the Garden, which excluded all Comers to it, until such Time as the Beauty of the Place was defaced.⁵⁸

⁵⁷ Nota Bene: The sequence of Mather's MS pages is here adjusted to accommodate his later insertions.

⁵⁸ This and the next paragraph are a close paraphrase of a passage in *A Conference with a Theist* (1696), part I, pp. 246–47, by William Nicholls, D.D. (1664–1712), rector of Selsey, Sussex, and chaplain to Ralph, Earl of Montague (*ODNB*). The wall of fire is mentioned in Zech. 2:5.

Now wee know, that even to this Day; the Countreyes thereabouts, have abundance of *Naphtha* and *Bitumen*, according to the Relations of *Pliny*, *Plutarch*, *Strabo*, and *Curtius*; and there are Fields, which even yett at some Times of the Year, seem all on Fire.⁵⁹

But this Matter, was under Angelic Management.

[Compare our Discourse, on *Paradise*.]

Why should not we think, That the *Shechinah*, or Divine Majesty, appeared in a Terrible Manner, at the Passage into the Garden of *Eden*, as in after-times at the Door of the Tabernacle of the Congregation of *Israel*, to the great Astonishment of our First Parents, chasing them away from thence? And then, that one of the *Seraphim* (in *Moses*'s Age call'd *Cherubim*,) which alwayes attended the *Shechinah*, remained for a while there, darting out Flames on every Side of him, to terrify our First Parents from all Thoughts of being Re-admitted there?⁶⁰

3382.

Q. The Hindring of Man, from Taking of the *Tree of Life*, what Thoughts had the Ancients about it?

A. Many of the Ancient Fathers look upon it, as a merciful Dispensation, That Man might not be perpetuated in a State of Sin. So *Irenaeus*, L.3. c.37. And *Greg. Nazianzen*, Orat. 38. God thus ordered, Ἵνα μὴ ἀθάνατον ἦ τὸ κακόν· καὶ γίνεται φιλανθρωπία ἢ τιμωρία, *That Sin might not be Immortal, & the Punishment might be a Kindness*, which he Repeats, Orat. 45. Thus *Epiphanius*; *Hæres.* 37. n. 1. *When Man had spoiled himself, God unmade him, that He might make him better.* And thus, *Methodius* in him, *Hæres.* 44. where he proceeds so far, as to say, That Death was not sent upon Man, ἐπὶ κακῷ τινὶ *Out of any Evil Design to him*, but as a Mercy.⁶¹

⁵⁹ Nicholls, *Conference* (part I, pp. 246–47), but his own source seems to have been Hugo Grotius's *Annotationes ad Vetus Testamentum* (Gen. 3:23), in *Opera Omnia* (1:6). The bituminous lakes of liquid asphalt are described in Pliny (2.106.226; 5.15.71–72), in Plutarch's *Vitae parallelæ: Alexander* (35.1–8), in Strabo (16.1.4, 15, 24), and in *Historia Alexandri Magni* (5.1.16), by the Roman historian and rhetorician Quintus Curtius Rufus (1st–2nd c. CE).

⁶⁰ Mather's "Discourse, on *Paradise*" follows his commentary on Gen. 2:25 ("BA" 117r). See also his *Threefold Paradise* (101) and Simon Patrick's annotations on Gen. 3:24 (*Commentary* 1:22).

⁶¹ The passage is extracted from Simon Patrick's annotations on Gen. 2:17 and 3:22 (*Commentary* 1:14, 22). Mather here copies Patrick's erroneous reference to Irenaeus's *Adversus haereses* 3.37 (instead of 3.23). Irenaeus (3.23.6) argues that God barred Adam from the tree of life that the protoplast would not continue in his sinful state forever (*ANF*1:457). The Greek citations from Gregorius Nazianzenus's *Oration* (38.12), *In theophania* [PG 36. 324, lines 50–51]; and from *Oration* (45.8), *In sanctum pascha* [PG 36. 633, lines 15–16] confirm in both instances that God benefits man by making "death, and the cutting off of sin, in order that evil may not be immortal. Thus his punishment is changed into a mercy," in *On the Theophany, or Birthday of Christ* (*Oration* 38.12) and *The Second Oration on Easter* (*Oration* 45.8) – both in *NPNFii* (7:348, 415). Mather erroneously lists the repetition of the Nazianzen citation as "Orat. 42." Here silently corrected to "Orat. 45." The Greek passage ἐπὶ κακῷ τινὶ, here trans-

356.

Q. E're we wholly dismiss the History of *Adam*, t'wil be useful for us to consider, wherein *Adam*, was a *Type* of the Lord Jesus Christ. v. 24.

A. If *Names* bee among the Rules to determine *Types*, Behold the Name of our Lord, in 1. Cor. 15.45. *The Last Adam*. Indeed, they were both such *public* and *common* Persons, that the Scripture speaks, as if there were but those *Two Men* in all the World!⁶²

Adam, was a *Parent* of all the World. Wee read [1. Cor. 15.45.] Hee was *the First Man*; and, [Gen. 2.5.] when hee was first made, there was *No Man* else. *Præadamism* is by the Apostle condemned as *Heresy*.⁶³ Thus, our Lord Jesus Christ is the *Parent*, of all true Beleevers; they are [Isa. 53.10.] *His Seed*.

Adam was an *Agent* for all the World. The *Covenant* with him, was with all his Posterity, in him, as their Grand Repræsentative. When *hee* sinned [Rom. 5.12.] *All* sinned. When *hee* Dy'd [Gen. 3.19.] there t'was *Appointed unto all Men, once to Dy*. Thus our Lord Jesus Christ, is the *Agent* for all true Beleevers. Tis our *Union* with Him [2. Cor. 5.21.] that makes all that *Hee* had done, reckoned *Ours*.

Adam in *Loosing*, *Adam* in *Hurting*, is an Indigitation of what our Lord Jesus Christ, in *Gaining*, *Helping*, *Saving*. From *Adam* wee derive Sin; [Gen. 5.3.] but *Grace* [Joh. 1.16.] from our Lord Jesus Christ. From *Adam* wee derive *Death*; [Rom. 5.18.] but *Life* [Joh. 3.36.] from our Lord Jesus Christ. Yea, the Confusion which is brought upon the World by *Adam*, shall bee one Day, by our Lord Jesus Christ Repaired. [Consider, Rom. 8.20, 21.] It is said of our Lord, in Isa. 9.6, Hee is *the Father of the World to come*. Here is an *Old World*, full of

lated by Mather, appears in Epiphanius's *Panarion* 64.37.6 (*Epiphanius* 2:458, line 19), which the venerable bishop of Salamis excerpts from *De Resurrectione* (3.1.10), in *ANF* (6:370), by St. Methodius, bishop of Lycia (260–c. 311).

⁶² For his typological reading of the First and Second Adam, Mather may have drawn on his uncle's *The Figures or Types of the Old Testament* (1683) 65–90 (on Rom. 5:14), a comprehensive study of historical types (OT) and their antitypes (NT), by Samuel Mather, Congregational minister in Dublin, Ireland. New England's own poet-theologian Edward Taylor presents the now standard typological relationship between the First and Second Adam in his *Upon the Types of the OT* (1989) 1:35–45.

⁶³ The French Marrano theologian Isaac La Peyrère (c. 1594–1676) startled his contemporaries with his thesis that the account in Gen. 1:27 referred to the creation of the gentiles before Adam, whereas the account in Gen. 2:7 ff referred to the creation of Adam and Eve, the progenitors of the Hebrews, not of mankind in general. La Peyrère's *Prae-Adamitæ* (1655) appeared in an English translation as *A Theological Systeme upon that Presupposition, That Men were before Adam* (1655), esp. bk. 2, ch. 10, pp. 112–18; and bk. 3, ch. 1, p. 129–40. For the best discussion of the topic, see R. Popkin's *Isaac La Peyrère*, chs. 3 and 9.

Sinners, and *Briars* and *Thorns*; which is *Old Adams World*; But in the *World to come*, or the future State of the *New Heavens*, & the *New Earth*, our Second *Adam* will have a *World*, wherein all the Disorders of the *Old* shall bee rectify'd.

Adam, was a *Man*, formed out of the *Earth*: [Gen. 2.7.] And our Lord Jesus Christ also, was a *Man*, that had a Body of *Earth*; [Ps. 139.15.] But *Adam* had no *Man* for his Father; [Gen. 1.27.] Nor had our Lord Jesus Christ; and hence tis *Hee*, of whom tis said, [Luc. 3.38.] *Hee was the Son of God*. Oh! the Admirable *Suitableness* of this God-*Man*, to bee the *Saviour* of Mankind! *Adam* in one or two of the Eastern Languages, is the same with, *Beautiful*; I am sure, our Saviour, our *Immanuel*, is now *Altogether Lovely*.

It was the Prærogative of *Adam*, to have [Gen. 1.27.] *The Image of God*. Hee lost it; but in our Lord Jesus Christ, there is to bee found, with all Perfection, [Col. 1.15.] *The Image of the Invisible God*. If *Adam*, had much *Knowledge*; our Lord ha's more; [Col. 2.3.] If *Adam* had much *Vertue*; our Lord ha's more; [Heb. 7.26.] If *Adam* had a *Dominion* of this lower World; our Lord is now *Lord of all*; and shall at the *Restitution of all things* bee more sensibly so. [Psal. 8.6.]

The Marriage between *Adam* and *Eve* was a *Sacrament* [Eph. 5.32.] of the Entercourse between our Lord Jesus Christ, and His Church. There is a *Mystical Marriage* between our Lord & His People; the Song of *Solomon*, the *forty-fifth Psalm* [with 2. Cor. 11.2.] are lively descriptions of it. *Eve* was *taken* out of *Adam*; and our Lord with His Church, make but *One*. [Eph. 5.30.] *Adam* was *Asleep* when *Eve* was formed out of him; and our Lord was cast into a Deep, a Dead *Sleep*, for Three Dayes, by which Means Hee procured a Church unto Himself. [Tit. 2.14.] The Side of *Adam* was opened, that *Eve* might bee fetched out; and the Blood of our Lord, which purchased His Church for Him, came out of His *opened Side*. [Joh. 19.34.]

Was *Adam* the principal Officer, of the Church, which was in His Family for many Years? the Church, out of which *Cain* [Gen. 4.16.] was *excommunicated*? Our Lord Jesus Christ, is thus, over that Church, which is the Family of God. [Heb. 10.21.]

And the Church is the *Tillage* of our Lord Jesus Christ, as the *Garden* was of *Adam*. [Compare Gen. 2.15. with Cant. 4.16.]

[146v]

Finally, There was a wonderful Analogy, between the *Sinning of Adam*, & the *Suffering* of the Lord Jesus Christ. Wonder at the *Harmony*! For the *Place*; *Adam* sinned in a *Garden*, & our Lord suffered in a *Garden*. For the *Time*; *Adam* sinned about Noon on the *Sixth Day* of the Week, and our Lord suffered about Noon on the *Sixth Day* of the Week. For the *Seat*; *Adam* sinned with his *Heart*, & with his *Hand*, with his *Jaw*; our Lord was wounded in *Heart*, *Hand*, & *Jaw*. For the *Instrument*; *Adam* sinned at a *Tree*, and our Lord suffered on a *Tree*.⁶⁴

⁶⁴ See Appendix A.

[147r]

Q. A Review of the Affair in this Chapter? v. 24.

A. Our *First Parents*, when they first came into the World, were undoubtedly furnished with the strongest Powers of *Reason*, as well as the most Regular Dispositions of *Will* to be always led by the Dictates of *Reason*. Wherefore it should not appear at all odd or strange to us, that we do not upon their Formation, find any *Laws of Religion* præscribed unto them; They had those already in the *Laws of Reason*, which the *GOD that forms the Spirit of Man within him*, had imprinted on their Minds. There yett remained only Three or Four Points, wherein the Super-addition of a *Revelation* was necessary for them. One for the Determination of *Marriage*, in succeeding Generations. Another, for the Communication of their Sense to one another in a proper *Language*. A Third, for the Consecration of a special *Time* for Divine Worship. And a Fourth, for their *Food*, that they might understand, what should be *Holesome*, and what *Hurtful* for them. In every one of these, we find they were very particularly accommodated.

The *Revelation* which directed their Choice of *Proper Food*, particularly forbad their Tasting the Fruit of one *Tree*, called, *The Tree of Knowledge of Good & Evil*; which had a Venom in it, that was of *Deadly Tendency*, & in *the Day* they should eat of it, they would *surely Dy*, or, be *sure of Dying*.

Here, the *Devil*, who is called, *The Serpent*, envying the Happiness of Mankind, in the Enjoyment of Mankind, from which he himself had been banished, laid the Baits of Ruine for our *First Parents*, and of their Offspring. He address'd our Mother, with an Endeavour to perswade her, That there was no Danger in eating the *Forbidden Fruit*; And that they wanted nothing to make them sure of Everlasting Happiness, but only the Faculty always to discern certainly between *Good* and *Evil*, which Faculty this Fruit would give them. To satisfy her in this, he doubtless pretended the Character of a Messenger from GOD; and as bringing a *Second Revelation*, to assure them, that the *Fruit* was not of a Destructive Nature; but instead of Destroying them it would Exalt them, & make them like Himself in a Right Knowledge of *Good* and *Evil*. Says he, "As you are sensible, He made you to be Happy in a *Likeness* to Himself, & knows there is nothing wanting in your Circumstances, to assure you of being immortally so, but to be assur'd of a Right Knowledge of *Good* and *Evil*, so as never to be mistaken in your Choice, you cannot imagine, that He will continue to deny you this Fruit, which will in its Nature give you this Knowledge; or that He who desires you should be *Immortal*, will putt you to *Death* for doing that which will naturally make you *Immortal*. Now | such is the Nature of this Fruit. And as the Lord knows it to be so, so He ha's sent me to inform you of it; And tho' before, He thought fitt to forbid the Eating of it, under the Penalty of *Death*, you are *Now* commanded to eat of it, as a Necessary Means in the Nature of Things, to an

[148v]

Happy & Immortal Life.” This is the Paraphrase given of it by the Dr. *Tho. Burnett*, who is now, [1726.] the Rector of *Westkington*, in his *Boylean Lectures*.⁶⁵

To render it the more likely, that the *Tempter* now appeared as a *Messenger* from GOD, and perhaps very much in the Form of a *Seraph*, or, *Angel of Light*, the same Gentleman, does, with much Reason, insist on what our Apostle writes to the *Corinthians*: [Ep. II. ch. XI.] where he makes a Comparison between the People tempted by a False Apostle, and *Eve* beguiled by the *Serpent*. He also represents the Ministers of *Satan* as acting with the *Corinthians*, the Part that *Satan* had acted with *Eve*; which, he says, was that of *Satan transforming himself into an Angel of Light*. We know the Consequences.⁶⁶

That Passage, *They were Naked & Ashamed*, our Author so paraphrases: “They were *Ashamed* at their *Nakedness*, They saw such uncomely Motions & Disorders in their Bodies, as they had never seen before, & were ashamed at; & therefore thought it necessary to hide, by making themselves Coverings to conceal them with.”⁶⁷

[149r]

651.

Q. In *Pagan* Antiquitie, find you *any* Foot-Steps, of our First Parents Fall? v. 24.

A. *Many*.⁶⁸

The Apostasy of the *Angels*, which had its Influence on the Apostasy of our *Parents*, is plainly mentioned by the old Philosopher, *Empedocles*, as *Plutarch* tells us; These were the *Dæmons*, whom that Philosopher calls by the Name of *ουρανοπετεις*, or, *Heaven-fallen Creatures*.⁶⁹

Then, for the Fall itself; the Transgression of *Eve*, was represented by *Homer*, in his *Ate*; whom Incensed *Jupiter* thrust down from Heaven, threatening that shee should never bee Restored unto that Place again; which *Ate*, the Poets tell us, was the *First-born* Daughter of *Jupiter*, & the Woman who brought Mischief on the whole Race of Man.⁷⁰

⁶⁵ The preceding and following paragraphs are close paraphrase and citations from *The Demonstration of True Religion*, 2 vols. (1726), by Thomas Burnett, D. D. (d. 1750), prebendary of Sarum and rector of Westkington, Wiltshire, who delivered the prestigious Boyle lecture series for 1724–25. Mather’s extracts are from vol. 2, part 2, ch. 1, pp. 11–12, 19, 22, 27, 31–32.

⁶⁶ Burnett, *Demonstration*, vol. 2, part 2, ch. 1, pp. 33–34.

⁶⁷ Burnett, *Demonstration*, vol. 2, part 2, ch. 2, pp. 53–54.

⁶⁸ For the parallels between classical sources and the OT story of Adam’s Fall, Mather mines John Edwards’s *Discourse* (1693), vol. 1, ch. 3, sec. 3, pp. 106–07, 108–09, 110–14, 115–16.

⁶⁹ Edwards, *Discourse* (1:106–07). Plutarch cites Empedocles of Acragas, in his *Moralia: De vitando aere alieno* (830 F, line 3). The Greek passage more closely signifies “spirits ... expelled by the gods and thrown out from heaven” (*Plutarch’s Moralia* 10:332).

⁷⁰ Edwards, *Discourse* (1:107). Jupiter’s ouster of his daughter *Ate*, personification of *atē* (delusion as a tragic flaw of character leading to catastrophe), is described in Homer’s *Iliad* (19.90–94, 126–31).

Our Mother *Eve* was doubtless meant also by the *Pandora*, mentioned by *Hesiod*, & others of the Ancients; out of whose Deadly Box, that shee gave to *Epimetheus*, flew all Evil into the World; whereby shee became the Original of all the miserable Occurrences that happen to Mankind.

[Compare, Gen. 3.6, 13.]

Adam, too late aware of it, might well bee called, an *Epimetheus*.⁷¹

Original Sin, the Early, Corruption & Confusion, which was the Effect of the Fall, was observed by the Gentiles. Among whom, *Sopater* calls it, the Συμφύτον το αμαρτανειν ανθρωποις, the *Congenite Sin*; *Hierocles* calls it, οικειον κακον, the *Domestic Evil* of Mankind; *Aristotle* calls it, 'τι πεφυκος αντιβαινον τω λογω, the *Natural Repugnancy of Mans Temper to Reason*. The *Pythagoreans*, quoted by *Iamblicus*, do style it, Θνητον τι ζωης ειδος πολυκεφαλον θηριον, *A mortal Kind of Life*, and, *A Many-Headed Beast*. The Moralists, are full of such Notions; complain{in}g that our Nature is Vitiated, Propense to Evil, Averse to Good; & the Fountains all polluted. Both *Greek* & *Roman* Philosophers, are full of these Complaints; especially the *Stoicks* & the *Platonists*.

How frequently doth *Seneca* reflect with Sadness, on the Lapse of our Nature?⁷² *Porphyrus*, and *Simplicius*, & *Hierocles*, how passionately do they lament, the defect of a former Innocency, & the Departure of their Souls from God, & the strong Dispositions of our Nature to Ill, by a Detrusion into Terrestrial Bodies?

It was the Knowledge of Mans Fall, that caused *Plato* to disguise the Matter, with his Doctrine of, *The Pre-existence of Souls*.⁷³

⁷¹ Edwards, *Discourse* (1:107). *Hesiod* (*Opera et dies* 70–89) relates how Pandora (“All Gifts”), the first woman among humans, was given to Epimetheus (“Hindsight”), brother of Prometheus (“Foresight”). When she opened her box of gifts to man, all sorts of evils escaped, leaving behind only hope. In Mather’s analogy, God’s gift to Adam similarly precipitated man’s Fall. Like Epimetheus, Adam, too, is left with little more than “Hindsight.”

⁷² Edwards, *Discourse* (1:108). The Greek passage attributed to Sopater (4th c. CE), Greek rhetorician of Athens, appears in Johannes Stobaeus Anthologus (*Anthologium* 4.5.59, lines 3–4) and literally means “inborn failure of man.” Hence “*Congenite Sin*” suggests “congenital” or “connate” sin, which mankind inherits at birth. As usual, Mather does not transcribe the diacritical marks of his Greek citations (*Manuductio* 29–30). The Neoplatonist Hierocles of Alexandria (d. c. 432 CE), student of Plutarch of Athens, discusses “the *Domestic Evil* of Mankind” in his commentary on the golden poems of the Pythagoreans *In aureum carmen* (24.18.5). The Greek passage from Aristotle is adapted from his *Ethica Nicomachea* (1.13.1102b, lines 17–18, 23–24). The citation from the Neoplatonist philosopher Iamblichus (c. 245–c. 325 CE) appears in his *Protrepticus* (p. 14, lines 1–2). Seneca ponders the condition of man’s fallen nature in many places, including in his *Epistulae Morales* (50.4–9) and in his *Octavia* (377–436).

⁷³ Edwards, *Discourse* (1:108–09). The Greco-Roman philosopher Porphyrius (234–c. 305 CE) laments man’s corruption in his *De abstinentia*, and so do the Neoplatonist Simplicius (6th-c. CE) in his *Commentarius in Epicteti enchiridion* and Hierocles of Alexandria in his *In aureum carmen*. Plato holds forth on the pre-existence of the soul and its descent into a mortal body in his *Timaeus* (41a–42d, 69–71), in *Phaedo* (70a–73c), *Phaedrus* (245c–246a), *Symposium* (107a–208e), and elsewhere.

Mans *Fall* was by the *Divels* Means. Agreeably hereto, t'was the Tradition among the Pagans, that a sort of malignant & malicious *Dæmons* Envied the Happiness of Man, & Attempted the Destruction thereof. The *Pythagoreans* and *Platonists*, often speak of the Spirits, thus mischievous.

Hence arose the Notion of Two Principles; the One, Θεός, of *Good*, the other, Δαίμων, of *Evil*, as they were styled by the *Manichees*, whose Father *Manes*, was a Persian, & Received this Opinion from his Pagan Countreymen. That People called those two Principles, *Oromasdes*, and *Arimanius*; and as *Diogenes Laertius* & others assure us, they worshipped both of them. Yea, they were not only the *Magi* of *Persia*, who held this Opinion; but, *Plutarch* shows the *Antiquitie*, and almost *Universalitie* of it. Among the *Græcians*, these two Principles, were *Jupiter Olympius*, and *Hades*: The *Egyptians* called them, *Isis*, or, *Osiris*, and *Typho*; The *Chaldeans*, whose Gods were the *Planets*, did among the *Planets* look for them.⁷⁴

At the Fall of Man, the *Divel* appeared in the form of a *Serpent*. Now *Plato* sais (as quoted by *Eusebius*) That in *Saturns* dayes, folks were able to talk with *Beasts*, as well as *Men*; This was from *Eves* Colloquy with the *Serpent*. And, is not *Eve* disguised under the Fable of *Proserpina*, the Daughter of *Jupiter*, which *Pluto* Ravished, or, as others tell us, whom *Jupiter* knew, in the form of a *Serpent*?⁷⁵

Pherecydes gives us the Sense of the Heathen, about our first Parents being circumvented by the *Divel*, in the Shape of a *Serpent*, when Οφιόνευς, is in him, the Title of the great one, who opposed *Saturn*. *Origen* against *Celsus*, maintains *This* was taken from the Relation of *Moses* about the *Serpent* in Paradise, & not *Moses's* taken from *This*.⁷⁶ *Eusebius* thinks the same, & adds that *Pherecydes* was

74 Edwards, *Discourse* (1:110–11). Edwards here synthesizes the prologue to Diogenes Laertes's *Vitae philosophorum* (1.8). In their Manichean context, the Greek words "Theos" and "Daimon" suggest a dualistic principle of Good and Evil (light and darkness), whose intermingling of divine substance with matter in precosmic times can only be reversed through an ascetic lifestyle as taught by the Babylonian Mani (216–76 CE) in his catechism *Kephalaia*. Plutarch describes the pre-Manichean development of the belief in this dualism in his *Moralia: De superstitiōe* (167 D-F) and in *Moralia: De Iside et Osiride* (351D ff). Hesiod (*Theogonia* 820–34) has a hundred-headed snake grow from the shoulders of Typhoeus, offspring of Tartarus and Gaia. Finally, Eusebius Pamphilus (*Praeparatio evangelica* 2.1.43d–50c) describes the cultic positions of Isis, Osiris, and Typho among the Phoenicians and Egyptians and their relationship to the Greek pantheon.

75 In confirmation of the serpent's conversation with Eve (Gen. 3:1), Eusebius (*Praeparatio evangelica* 12.14.586d) enlists Plato's story (*Politicus* 272b–c) that in the Golden Age, man freely conversed with the gods and the animals. Proserpina (Persephone), daughter of Demeter and Zeus, was abducted by Pluto (Hades), brother of Zeus, and became queen of the underworld (*Hymnus Homericus ad venerem: Hymn to Demeter*). Proserpina would probably have agreed with Achilles that if she could choose, she'd rather be a servant of some poor man on earth than to be ruler of the dead in the underworld (*Odyssey* 11.488–91).

76 Edwards, *Discourse* (1:112–13). Pherecydes of Syros (fl. 544 BCE), Greek prose writer and historian relates in his *Testimonia* (fragm. 11) and *Fragmenta* (fragm. 4) how Kronos (Saturn) battled with 'Οφιόνευς [Ophioneus], the snake. In his debate with Celsus, Origen insists that the Mosaic story of the serpent in Eden is far older than the story of Kronos's battle with

conversant among the *Phœnicians*, who worshipp'd their God, under the figure of a *Serpent*. Indeed, the *Divel* ha's affected much to bee Adored in that Shape, which hee first Assumed. *Serpents* were among the sacred & secret Mysteries of the Gentiles; & so great was their Veneration for them, that some of their *Temples*, according to *Strabo*, were styled among them, *Draconian*.⁷⁷ The | *Ba-* [150v]
bylonians worshipped a *Dragon*, according to the *Apocrypha*; and the *Egyptians*, according to *Eusebius*, worshipped, *Ophioneus*; and in their *Hieroglyphicks* they show'd what Admirers they were of *Serpents*: *Horus* tells us, They encircled the *Heads* of their *Gods* with them; and with them, they sett the *Crowns* of their *Kings*. Yea, the *Egyptians*, as well as the *Phœnicians*, call'd them, *Good Demons*. Pass over to *Greece*, and there you'l see Images of *Serpents*, over the Gates of consecrated places; *Dragons* were generally painted there, as the *Genij* of them; the *Genij* thereof, they thought appeared in such a shape.

Pinge duos Angues, sacer est locus; extrà mei{i}te.⁷⁸

The *Apollo* of *Delphi*, what was hee, but *Pythius*? – and this of /יָפֶת/ a *Serpent*? *Clemens* of *Alexandria*, reports to us, That the Heathens, at the feast of *Bacchus* were crowned with *Serpents*, and would carry a *Serpent* in Procession, crying with a loud Voice, *Eva, Eva!* For, *Hevia*, or, *Hivia*, hee sais, in the Hebrew signifies a *Serpent*: tho' hee mistakes the Hebrew for the *Chaldee*. But it is more probable, that the Acclamation of *Eva*, was in Remembrance of our First Mother. And perhaps, the Word *Evàntes*, used by *Virgil*, for Madding Frolicks, was of this Original.⁷⁹

Ophioneus, as told by Heraclitus or even by Pherecydes (*Origen against Celsus* 6. 42–43), in *ANF* (4:591–93).

⁷⁷ Eusebius (*Praeparatio evangelica* 1.10.41d, 10.4.470b–d; 10.7.467b–c; 10.11.495a–496c; 10.12.500a), too, credits Moses as the most ancient source from which Pherecydes and all others took their distorted accounts at second or third hand. According to Strabo (14.1.19), the temple of Artemis, called Tauropolium, is located near the towns of Oenoë and Dracenum, on the island of Icaria. The goddess Artemis (daughter of Zeus) is frequently depicted with writhing serpents on her arms. Mather here likes Edwards's pun (1:113) on the serpent as dragon and its homonymic allusion to Draco (7th c. BCE), the Athenian lawgiver, known for the severity of his judgment.

⁷⁸ Edwards, *Discourse* (1:113). Citing Philon of Byblos for evidence, Eusebius (*Praeparatio evangelica* (1.10.41d) relates that Pherecydes borrowed from the Phoenicians his theological ideas about the god Ophion and the Ophionidae (serpent worshippers), from whom the Egyptians derived Horus, the falcon-headed god. The Egyptians represented the world as a circle with “a hawk-shaped serpent stretched across the middle of it,” signifying “the good daemon.” Similar reports of the adoration of sacred serpents are given in *De natura animalium* (11.2, 17), by the Greek historians Claudius Aelianus of Palestrina (c. 165/70–c. 230/5 CE); and in *Historia* (2.58, 83, 137, 155–56), by Herodotus of Halicarnassus (5th c. BCE). The centered Latin quotation from the Roman satirist Aulus Persius Flaccus (*Satura* 1.113–14) translates, “Paint up two [holy] snakes [on the walls]; this place is off limits [sacred is this place]; piss outside.” Edwards's illustration from Persius asserts that depictions of serpents were used to designate temples and holy places in ancient Greece.

⁷⁹ Edwards, *Discourse* (1:113–14). The healer Apollo, son of Zeus, killed Gaia's Python that guarded the Oracle of Delphi and assumed its guardian position himself (see Plutarch, *De*

What a Worship, and Regard, our *American* Salvages, pay to *Serpents*, and, how often the *Divels* appear like and in *Serpents* unto them, is well-known unto us all.⁸⁰

But all this doubtless, ha's had a Reference, to what was in the Beginning of the World.

The *Place* of Mans Fall, was in the *Garden of Eden*. The *Golden Apples* of the *Hesperides*, among the Poets, were a Remembrance of the *Forbidden Fruit* in Paradise. These *Golden Apples* were watch'd by a *Dragon*; which is a Remembrance of the *Divel*, in the Serpent, watching about the *Tree*. The *Golden Apples* were *stolen* at last; and what was the Taking of the *Fruit* by our Parents, but a downright *Stealth*, of what was not their own? The Story is all out of *Genesis*.⁸¹

753.

Q. Is there any curious Remark, to bee made, on the *Speeches* uttered by the *Antediluvians*, in the Mosaic History?

A. To see how horribly Man was wounded in his *Head*, by his *Fall* from God! It ha's been Remark'd, (by Dr. *Brown*, in his Enquiry into *Vulgar Errors*), That in the Scriptural Relation, of what passed before the *Flood*, there is but one Speech delivered by Man, wherein there is not some *Error*, or some Conception very Injurious to *Truth*. The *Speeches* are *Six*.⁸²

That Speech of *Adam*, *I was Naked and Hid myself*; how does it infringe the Omniscience & Omnipresence of his Maker? or how could hee have imagined, that *one Tree* should have *concealed* his Nakedness from Gods Eye, as another had Revealed it unto his own?

Pythiae oraculis). "Pythius" is the masculine form of "Phythia," a priestess who communicated with the gods in her trances. The Hebrew noun פִּתְיָה [pe-then] suggests the twisting of an asp or adder [Strong's # 6620]. Clemens of Alexandria describes these Bacchanalian rites in his *Protrepticus* (ch. 2), in *ANF* (1:174–75). For Virgil's evantes (euhantis) see *Aeneid* (6.517).

⁸⁰ Accounts of Native American religious beliefs appeared early on in Thomas Harriet's *A briefe and true report of the new found land of Virginia* (1590), part 3, pp. 24–25, and in Roger Williams's *Key into the Language of America* (1643), ch. 21, pp. 114–132. However, neither work mentions the worship of serpents. Nevertheless, Mather was well familiar with José Acosta's *The Naturall and Morall History of the Indies* (1604), which describes the Indian worship of the Mexican serpent-headed god Vitziliputzli (bk. 5, ch. 9, esp. pp. 350–52; see also bk. 7, chs. 4–5, pp. 504–09). See Mather's *Threefold Paradise* (285) and *Wonders of the Invisible World* (139–41).

⁸¹ Edwards, *Discourse* (1:115–16). In Greek mythology, the golden apples in the garden of the Hesperides (daughters of Night and Erebus) at the edge of the world are mentioned by Hesiod (*Theogonia* 213–16), Diodorus Siculus (4.26.2–4.27.1–2), and Apollonius Rhodius (*Argonautica* 4.1396–1435). As one of his Twelve Labors, Heracles (Hercules) took the golden fruit after killing the dragon Ladon. Because of its overt symbolism, this myth is associated with the story of the forbidden fruit in Eden (Gen. 3:1–6).

⁸² The following paragraphs are excerpted from Sir Thomas Browne's *Pseudodoxia Epidemica* (bk. 1, ch. 2), *Works* (1658; 1907–12) 1:127–31.

That Speech of *Adam*, *The Woman whom thou gavest mee*; What an unsatisfactory Reply was it, attempting to render God the *Author of Sin*?

That Speech of *Eve*, *The Serpent beguiled mee*; what a feeble Excuse was this, offering that for an *Extenuation*, which was indeed an *Aggravation*, of her Fault?

That Speech of *Cain*, *I know not where my Brother is*! What an Impudence was this, & what a Præsumption to putt off the *Searcher of Hearts* with a Lye?

That Speech of *Cain*, *My Iniquitie greater than can bee forgiven*: what is there in this Desperate Assertion, but a false Opinion concerning the Mercy of God?

That Speech of *Lamech*, *If Cain bee Avenged Sevenfold, truly Lamech Seventy Sevenfold*: What seems it, but an erroneous Illation, from the Indulgence of God, unto *Cain*, concluding an Immunitie, & Impunitie, unto himself?⁸³

83 The various speeches (above) refer to Gen. 3:10, 3:12, 3:13, 4:9, 4:13, 4:24.

134.

Q. What is the true Sense of the Hebrew Particle (מֵן) which wee translate, *From* in the Speech of *Eve*, on the Birth of *Cain*, *I have gotten a Man from the Lord?* v. 1.

A. It is a Note of the Accusative Case by way of Apposition; and it should bee rendred, *I have gotten the Man, the Lord*. A little Philology, will give you to see this Apposition of Accusatives, in Multitudes of Instances; and the Particle here used, is never used, to express the *Help* of the Lord. It is probable, our *Mother* had her Thoughts now upon the *Messiah*. If shee now imagined *This* her Son, to bee that *Messiah*, shee was either Ignorant or Forgetful of Circumstances, that were to attend that Almighty *Serpent-killer*. But, I am rather pleased with the Opinion of *Schmidius*, in his Disputation, *De Fide Matris Evæ*; That *Eve* did not call her Son, *Cain*, as mistaking him, for the *Messiah*; but that while shee was bearing of *him*, her Mind ran much upon the future Birth of the *Messiah*, whereof the Birth of Children in her Family, might well confirm her Expectation. – Shee did by *Faith* already *possess*, that Promised Redeemer, & shee putt upon her Son, a *Name* which might bee a perpetual Testimony & Recordacon of her *Faith*. I now say of this Exposition, as *Pfeiffer* do's about *Calovius's*, upon this Place, *Sententiã istam, quæ mihi Thymo dulcior Hyblæ est, pro lectori in Timore Domini expendendam relinquimus*.⁸⁴

One M. *Gousset*, thus explains it. *Eve* had never yett seen any Man, but *Adam*, unto whom she was made Subject for her Sin. *Cain* being born, she said, she had then a *Man* that should have Dependence on her, & yeeld Obedience

⁸⁴ In his "Note Book of Authors" (on Gen. 4:1–2), Mather lists Johannes Glassius's *Christologia* (pp. 143, 154) as one of his sources. The Hebrew preposition מֵן [ayth] suggests a number of meanings, including "from" [Strong's # 854]. Mather is not alone in offering his alternative reading without preposition, a translation which is also favored by such famous Hebraists as Paulus Fagius (1504–49), Johannes Forster (1495–1556), Valentin Schindler (d. 1604), Martin Luther (1483–1546), Conrad Pellican (1478–1556), Johannes Cocceius (1603–69). Here, Mather more specifically refers to the Hebraist Sebastian Schmid(t) (1617–96), professor of theology at Strasburg, whose commentary on Genesis appeared in Strasbourg (1697). Mather owned his *Sabbathum Deuteroproton* (1686), but the reference is likely at second hand. Most accessible to Mather was Paulus Fagius's explication of this issue in *Critici Sacri* (1:98–99). Mather's neologism "Recordacon," suggesting "Recordation" or "Remembrance," cannot be found in any dictionary. August Pfeiffer (1640–98), Lutheran Hebraist and professor of theology at Leipzig, critiques the translation of Abraham Calovius (1612–86), Lutheran professor of theology at Königsberg and Wittenberg: "That opinion, which is to me sweeter than Thyme of Hybla, we leave for the reader to judge in the fear of the Lord." See Pfeiffer's *Hermeneutica Sacra* (1684) on Gen. 4.

to her, as being her Son. But fearing to appear too proud, or ungrateful to God, she adds *with the Lord*; she possessed him only in common with the Lord.⁸⁵

3383.

Q. Where did they use to bring their Offerings, at the Beginning of the World? v. 3.

A. I must again, & again advise you, to consider the Appearance of the *Shechinah*, as affording us a Key to very many of the most ancient affairs. The Place where the *Shechinah*, or the Son of God, in the *Divine Majesty* of the luminous Cloud, attended with *Angels*, did use to Appear, there t'was that Men brought their Offerings. Probably this was yett at the Entrance of *Paradise*, from whence Man was driven. When tis anon said, That *Cain went out from the Presence of the Lord*, it implies, That he never enjoy'd the Sight of the *Shechinah* any more. If *Cain* after this turn'd *Idolater*, it is likely, he introduced the Worship of the *Sun*, (which was the most ancient *Idolatri*) and of the *Fire*; the best Resemblance he could find of the *Shechinah*, or, *The Glory of the Lord*.⁸⁶

1928.

Q. How did *Abel* know, the Respect which God had unto His *Offering*? v. 4.

A. Why not, by *Fire* from Heaven falling upon it? or I should rather say, By a Stream of *Light* or *Flame* from the *Shechinah*, which burnt it up. Compare Gen. 15.17. and Lev. 9.24. and Judg. 6.21. and 1. Chron. 21.26. and 2. Chron. 17.13. and 1. King. 8.38. And now, Lett mee, with some Astonishment, at the Power which the *Divel* hath had sometimes to *Ape* the Almighty, Lett mee recite a Passage that *Solinus*, writes about his Pagan Gods, at *Agrigentum*. — *Collis Vulcanius, — in quo qui Divinae Rei operantur, lignea vitea super Aras struunt, nec apponitur Ignis super hanc congeriem, cum prosciscias intulerint. Si adest Deus, sacrorum probator, sarmenta, licet viridia, Ignem sponte concipiunt, et Nullo inflammante Halitu, à Numine fit Incendium. Ibi epulantibus alludit flamma, quæ fléxuosis excessibus vagabunda, quem contigerit, non adurit. Nec aliud est quàm Imago nuncia perfecti ritè voti.* We may add, That both *Homer* and *Virgil*, bring in *Jupiter* giving of good Signs by *Lightning*.⁸⁷

⁸⁵ Mather refers to Jacques Gousset (1635–1705), French professor of Hebrew and theology at Groningen, and voluminous writer, whose *Commentarii linguae Ebraicae* (1702) is among his principal works.

⁸⁶ Extracted from Simon Patrick's annotations of Gen. 4:3, 16 (*Commentary* 1:23, 26).

⁸⁷ The slightly corrupted version of this passage from Caius Julius Solinus's *De mirabilibus mundi* (ch. 5, paragr. 3) tells of how the ancient gods at Agrigentum (SW Sicily) consumed the sacrifice with sacred fire: "The Hill of Vulcan on which those who devote themselves to divine service pile up vine-wood on the altars, and no fire is placed upon the heap, even though inquiries have been made. If God, the approver of sacrifices, is there, then the twigs, although green, catch fire of their own accord, and not by any inflaming breath; the fire arises by the divine power. The flame plays around with those who dine sumptuously; wandering around

3384.

Q. What might be the guilty Defect of *Cains* Offering? v. 5.

A. Many think, it lay in this, That he did not bring the *First* of his *Fruits*, as even the Heathens afterwards did, in their *Præmessum*, the First-fruits of their *Corn*, and their *Calpar* which was the richest of their *Wine*; For tis only said, *He brought of the Fruit of his Ground*.⁸⁸

The Baron *Puffendorf* observes, There does not any Reason appear, why it should please God from the Beginning to receive into His Worship such a Performance as that of *Sacrificing* Animals unless it was to represent the Sacrifice which the Saviour of the World was to exhibit in His own Body. And this might be the Reason why he despised the Sacrifice of *Cain*. It was not an Animal that represented the *Messiah*.⁸⁹

3246.

Q. What may bee the Intention of those Words, *If thou dost not well, Sin lieth at the Door*? v. 7.

A. I cannot think the Intention to bee, q.d. There is a sudden Judgment ready to devour thee. No, But the *Sin* here, is, A *Sin-Offering*, or, a *Sacrifice* for *Sin*. (Compare, Hos. 4.8. and 2. Cor. 5.21. and, *Leviticus* all along.) This Expression, *It lies at the Door*, is, q.d. It is ready provided for thee; *Moses* uses a Phrase, best known in his Time, when they laid the *Sacrifice* at the Door of the *Sanctuary*.⁹⁰

But I find it thus carried by the learned *Momma* of *Hamburgh*. *Sin lies at the Door*, as a Master, that will enter, and will soon take Possession of thee, & of all that belongs unto thee. But such is the *Deceitfulness of Sin*, that it appears not presently, *ut Hostis et postis*; No, it flatters the Sinner, & with Flatteries insinuates into him, *Ad te Accursatio ejus*; Concupiscence meets him, & offers to serve him. Yea, while the Sinner is a *Slave* to *Sin*, yett at the same time he *Rules* over

winding as it goes, it does not burn them when it touches them. And it is none other than the apparition which announces a votive offering correctly accomplished." Be that as it may, the ancient Sicilian priests have nothing on *Elijah* the prophet (1 Kings 18:33–38). Lightning as a sign of Jupiter's approval is mentioned, for instance, in Homer's *Iliad* (2.351–54) and in Virgil's *Aeneid* (2.689–94). See also Patrick's annotations on Gen. 4:4 (*Commentary* 1:24).

⁸⁸ This paragraph is again cribbed from Patrick on Gen. 4:4 (*Commentary* 1:24), but Patrick's own source is John Selden's *History of Tithes* (1618), ch. 1, sect. 3, p. 7. The Latin nouns "*Præmessum*," and "*Calpar*" respectively signify "the measuring out of the first fruits beforehand" and "the new wine to be sacrificed to the gods."

⁸⁹ Samuel Freiherr von Pufendorf (1632–94), German political philosopher, one of the fathers of the modern theory of natural law, discusses this issue in his *De habitu religionis Christianae ad vitam civilem* (1687), a plea for religious toleration to stem the massacre of French Huguenots after the revocation of the Edict of Nantes (1685). An English translation of this work appeared as *Of the Nature and Qualification of Religion in Reference to Civil Society* (1698); Mather here paraphrases passages from § 8, "Of the Nature of Revealed Religion" (pp. 17, 18).

⁹⁰ See Appendix A.

it; it serves him, as the *Tool* of his Intentions. *Momma* saies, *Hæc nobis videtur simplicissima huius loci Interpretaria.*⁹¹

3018.

Q. There not having been yett in the World, any one Exemple of Humane *Death*, how did *Cain* learn the Way of bringing *Death* upon his Brother? v. 8.

A. Wee have this *Question*, among the *Questiones ad Antiochum*, in the Works of *Athanasius*; and the Answer, that *Athanasius* gives to it is, ὁ διάβολος αὐτῷ κατ' ὄναρ ὑπέδειξεν. *The Diavel show'd him in a Dream, how to do it.*

By the way; Is not the Greek Word, *καίνω*, To *kill*; taken from the Name of *Cain*, the first Murderer?

But, *Cain* had seen the *Death* of *Sacrifices*. And it may be one End why the Glorious GOD instituted *Sacrifices*, might be, That our Parents who had no Notion of the *Death* which had been threatened, for their Sin, might have a lively Sense of it, so produc'd & præserv'd in them. Tho', The Grand End of the Institution was, to maintain the Faith of the Redeemer to come and save us by making Himself a *Sacrifice*.⁹²

895.

Q. *Cains* Murder of *Abel*, is repræsented, as a *Crying Sin*. Is there any special Remark upon *Crying Sins*, to bee made, from the Language of the Holy Spirit? v. 10.

A. All greater, & grosser Sins, are by the common People, called, *Crying Sins*. But the Language of the Holy Spirit ha's confined that Name, unto *Four Sins*, [Gen. 4.10. and Gen. 18.20. and Exod. 22.23. and Jam. 5.4.] And all of them, Sins against the *Second Table*; comprehended in this distich:

*Clamitat ad Cælum, Vox sanguinis, et Sodomorum,
Vox oppressorum, Merces detenta laborum.*⁹³

⁹¹ Mather refers to Wilhelm Momma (1642–77), Hamburg-born German Reformed theologian, professor of theology at Hamm and later at Middleburg (Holland). Momma's *Oeconomia temporum testamentaria triplex* (1673) and *Praelectiones theologicae* (1683) are among his most significant works. According to Momma sin is so deceitful that it does not appear "as the enemy and the doorpost." Sin insinuates itself with "I hurry to you." Momma says, "This seems to me the simplest interpretation of this passage."

⁹² St. Athanasius's answer appears in *Quaestiones ad Antiochum ducem* [PG 28. 632, line 38]. Mather's derivation of the Greek word *καίνω* (*kaino*) is a bit too fortuitous, for *καίνος* (*kainos*) signifies "to make new, innovate" [Liddell and Scott's Greek English Lexicon]. However, in Mather's time, the homonymic similarity between the Greek and Hebrew words still testified to the pious belief that all languages derived from Hebrew.

⁹³ The Latin distich is derived from the Vulgate version (Gen. 4:10) and translates, "The voice of blood, and of the Sodomites, cries repeatedly unto Heaven, / The voice of the oppressed, the payment for their work is held back."

3386.

Q. But in the Hebrew it runs, *Thy Brothers Bloods*, in the Plural Number? v. 10.

A. And the Hebrew Doctors tell us, 'Tis because he had killed *Abel*, and all his Posterity, which were in his Loins. Thus we read, 2. King. 9.26. *I have seen the Blood of Naboth, & the Blood of his Sons*; tho' we read, of no body stoned, but *Naboth* himself.⁹⁴

[152v]

|

873.

Q. What was there peculiar, in the Death of the *First Man*, that ever Dyed? v. 11.

A. Tho' *Death* bee in general undesireable unto all Sorts of Men, yett there are especially Three Circumstances of *Death* which procure it, a peculiar Undesirableness. The first is, To Dy *Young*. The Second is, To Dy by external *Violence*. The Third is, To Dy without *Posterity*. Now in the Death of *Abel*, you find a Complication of all these doleful Circumstances.

2643.

Q. What special Mystery may there ly in the History of *Cain* and *Abel*? v. 12.

A. Good old *Prosper* finds the Mystery of those two People, the *Jewes* and *Gentiles*, and their Disposition towards Heaven & each other, & the Character, & Quality of their Sacrifices, in the History of *Cain* and *Abel*.

I beleeve, in this Notion of *Prosper*, you have an admirable Key to the First Epistle of *John*. Take Time to consider it, and you may fall into the View of many Elegancies.⁹⁵

It is a notable Passage of *Jacobus Naclantus*, in his Treatise entituled, *Scripturae Medulla*, printed at *Venice*, as long ago as the Year 1561. *In ijs Fratribus, duo adumbrati sunt populi; In Juniore Electi, et praesertim ex Gentibus; In Seniore Reprobi et maximè ex Israelitis. Nec modò, duo denotantur populi, sed et maximè eorum capita; propter quod et Abelus Typus est Christi, qui est Electorum Electus, et e diverso Cainus, Antichristi, qui Reproborum est Reprobus.*⁹⁶

⁹⁴ Mather extracts this annotation (Gen. 4:10) from Patrick's *Commentary* (1:25). That in killing Abel, Cain also killed all of Abel's potential offspring is suggested in the (Soncino) Talmudic Tractate Mas. Sanhedrin (37a). The Targum Onkelos (Gen. 4) has God say, "The voice of the blood of generations which were to come from thy brother complaineth before Me from the earth!" (Etheridge 1:43). Rashi and Ibn Ezra offer the same interpretation.

⁹⁵ Mather refers to St. Prosper Tiro of Aquitaine, whose *De promissionibus et praedictionibus Dei* (cap. 4, §§ 8–9) [PL 51. 737D–738C] is the work in question.

⁹⁶ *Scripturae Sacrae Medulla* (1561) was authored by the Italian prelate Jacobus Naclantus, aka. Giacomo Nacchlanti (d. 1596), bishop of Chiozzia. Mather owned a copy of the first edition of this work (1561) [AAS Library # 0667]. The Latin quotation appears in a longer version in Naclantus's *Scripturae sacrae medulla* (40) and translates, "In these brothers, two peoples are outlined. In the younger, the Elect, and particularly those from among the Gentiles; in the elder, the Condemned, and chiefly those from among the Israelites. And not only are two

[Insert Ar] **Q.** A Further Glance upon this Mystery in the History of *Cain* and *Abel*? v. 12.

A. Such Holy Writers of Experimental and Efficacious *Piety*, as the famous Dr. *John Arndt*, have much encouraged our Searches after the Administration of the Kingdome of God in the affairs of *Piety living to God*, as lying hid under the Covers of the Letter of the Scriptural Histories. And indeed, if we do not sinfully carry the Speculation so far as to *kill* the *Letter*, we may with vast Profit find the *Spirit* of Christian *Piety* covered under the Histories of the Bible.

Thus, the Words of the excellent *Arndt*, on the History now before us, deserve Consideration.

Exemplo Caini et Abelis; Quærum Naturam, Indolem, et proprietatis, si penitius inspexeris, facile deprehendes, eam Historiam, surrogatis modò in locum Caini et Abelis, Veteris et Novi Hominis nominibus, in te identidem agi et iterari. Quid enim est illa utriusque similtas, quæ illæ Caini Insidiæ, quæ Abelo struit? Quid, inquam, hæc aliud indigitant, quam assiduam luctam carnis ac spiritus? Quam Inimicitiam [Av] inter semen mulieris, et semen serpentis: In Cain and Abel, the Strife between the Flesh and the Spirit in us, is notably adumbrated. So, in reading of the Flood, our Arndt would have us think on the Flood of Heavenly Grace, which is to drown our Corruptions. And in reading the Life of Abraham, how many Allegories, instructive of what we have to do in the Christian Life!

He concludes; *Summus Deus Scripturam Sacram universam, ut Fide et Spiritu digeratur, consignavit, omniaque spiritualiter in te impleantur.*

Thus, the Wars of the *Israelites* against the Devoted Nations.

And the whole *Mosaic Pædagogy*.⁹⁷

people denoted, but also especially their heads, because Abel is a prototype of Christ, who is the Elect of the Elect, and conversely, Cain is a prototype of the Antichrist, who is the Condemned of the Condemned.”

⁹⁷ The works of the German Lutheran Pietist Johannes Arndt (1555–1621) were of great interest to Mather, whose own Pietism was shaped by Arndt, Spener, and the Halle Pietist August Herman Francke – all of whom Mather recommended as required reading to candidates for the ministry (*Manuductio* 28, 81, 130). See R. Lovelace’s *American Pietism* (ch. 2). Arndt’s most popular Pietist work, translated into many European languages, is *Wahres Christenthum* (1605). The Latin extracts are from Arndt’s *De Vero Christianismo* (1708), tom. 1, lib. 1, cap. 4, p. 32, § 2, and pp. 35, 36, §§ 6, 7, 8 (pastiche), and presents Cain and Abel as moral exemplars of the unregenerate and regenerate man: “By the example of Cain and Abel – if you examine closely their nature, innate character, and qualities – you will easily see that that story, with but the names of Old Man and New Man substituted in the place of Cain and Abel, is acted and repeated again and again in you. For what is that rivalry between each other, what are those traps of Cain’s, which he builds for Abel? What else, I ask, do they continually point to, but the unremitting struggle of body and spirit? What but the enmity between the woman’s seed and the serpent’s?” Arndt concludes, “God Almighty has authenticated the universal Holy Scripture, that it may be digested by faith and by spirit, and that everything in you may be spiritually satisfied.” Mather also cites Arndt on the title page of his homily *Renatus* (1725) and includes him into the list of books every young theology student should have in his library (*Manuductio* 151). For a useful summary of Arndt’s life and achievement, see J. Wallmann (21–37).

Q. On that, *My Punishment greater than I can bear?* v. 13.

A. 'Tis most probably an Interrogation. *Is my Sin too great to be forgiven?*⁹⁸
[Insert ends]

{.}123.

Q. What was the *Mark*, which the *Lord sett upon Cain?* v. 15.

A. You know how many Fancies the Jewes have concerning it. Some have thought it a Real *Brand*, made upon the Body of *Cain*; particularly That one of the Letters in the Name יהוה was imprinted on him. Others have thought it an *Horn* growing out of his Body; q.d. *Cornu ferit ille caveto*. And some, in *Aben Ezra*, have thought *Cains Mark*, to have been his *Dog*, which was clapt upon him, for a perpetual Companion. Others have thought a guilty, ghastly *Countenance* (& perhaps, as an *Arabian Author* adds, *A continual Trembling of his Body*) to have been the *Mark* of this wicked Fratricide. They that have been acquainted with the *Look* of Murderers, have seen *Cains Mark* expounded. And I should without any Hæitation espouse this Opinion, if I had not been, by some learned Men, after *Aben Ezra*, invited rather to think, the Meaning of this whole Business, to bee This, That the Great God (so great His *Long Suffering!*) wrought a certain *Miracle* before *Cain*, to assure him, that hee should have his Dayes prolonged in the World, notwithstanding his Desert; of the Contrary; & that hee should bee spared for the Propagation of a Posterity among whom there might bee some chosen ones. *Ponere signum alicui*, is not, *Insignire peculiari caractere*, but it is, *Miraculum edere, undè convincatur*. Compare Exod. 10.1, 2.⁹⁹

Except we shall rather say, That the *Face* of *Cain*, was Blasted with Lightning from the *Shechinah*.

⁹⁸ Nachmanides (*Commentary on the Torah* 93), Rashi (on Gen. 4:15), and the Midrash Rabbah (Gen. XXII:11) also put Cain's statement in form of a question, as does the Talmudic Tractate Sanhedrin (101b).

⁹⁹ Most of the information on this verse is extracted from Christian Noldius (1626–83), professor of theology at Copenhagen, who outlines the different positions in his *Concordantiae Particularum Ebreo Chaldaicarum* (1679) 303–04. According to one interpretation, one of the letters of the Tetragrammaton יהוה [HWHY] appeared as a mark on Cain's forehead. Abba Jose argues that God made a horn grow on Cain's head, but Rabbi Aba believes that God assigned to Cain a dog to defend himself against potential attackers (Midrash Rabbah, Gen. XXII:12). Mather's "*Arabian Author*" who relates Cain's trembling is the Arabic Christian historian Saidus Patricides (876–940), aka. Sa'id ibn Batriq, aka. Eutychius, Patriarch of Alexandria, who is cited affirmatively, in *Smegma Orientale* (1658), lib. 1, cap. 8, p. 223, by Johann Heinrich Hottinger (1620–67), Swiss Reformed theologian and professor of oriental languages at Heidelberg and Zurich. The positions of Aben Ezra appear in Ibn Ezra's *Commentary on The Pentateuch* (1:85–86). Rabbi Solomon ben Isaac Jarchi (RASHI) believes that Cain was punished with a continuous trembling (*Mikraoth Gedoloth: Genesis* 1:71a). See also Nachmanides (*Commentary on the Torah* 1:91–92). Noldius's *Concordantiae Particularum* (303, 304) convinces Mather that "to put a sign on somebody" is not "to distinguish him with a particular mark," but it is "to perform a miracle, by which he is conquered."

Or, why is it not enough to say, GOD secured *Cain* from being killed, as much as if He had sett a *Mark* upon his Face, for every one to know him. So our *Pyles*.¹⁰⁰

2335.

Q. The silly & profane Deist cavils, that here must needs bee *Prae-adamites*; because wee find *Cain*, so early retiring to a *Land of Nod*? v. 16.

A. The Word *Nod*, does not necessarily signify, a Countrey; it may signify, *A Fugitive*: so that the Sense may bee, *Hee lived a Fugitive or a Vagabond, in the Land*.¹⁰¹

And there might bee a considerable Number of Men then in the World. The Murder of *Abel* probably happened in the 129 Year of *Adam*. It is not likely, that *Adam* had no Children all this Time. According to the Proportion of *Israels* multiplying in *Egypt*, *Adam* now might have his Offspring multiplied into one hundred thousand.

A. M.	30	10
	60	100
	90	1 000
	120	10 000
	130	100 000.

The Author of the *Dissertations Historiques, Chronologiques, Geographiques, et Critiques, Sur La Bible*, printed lately in *Paris*, allowes *Cain* and *Abel* to marry in the 19th Year of the World. They might easily have had each 8 Children in the 25th, Males & Females; In the 50th Year 64 Persons might be in a Direct Line descended from them. In the Year, 74, they would come to 572. In 98, to 4096; In 122, to 32768. Add the other Children born to *Cain* & *Abel* in this time, & their Descendents, in 1122 Years there would be 421162 marriageable People.¹⁰²

¹⁰⁰ Simon Patrick (Gen. 4:15) argues that the mark on Cain's face was nothing but a burn mark caused by a flash of lightning that issued from the Shechinah (*Commentary* 1:26). Finally, Mather quotes the least fanciful interpretation of them all from Thomas Pyle's *Paraphrase with Short and Useful Notes*, Part 1 (1:30).

¹⁰¹ For the belief in the existence of men before Adam (discussed earlier), see Isaac La Peyrère's *Theological Systeme* (1655). That "*Nod*" may indeed signify "*Fugitive*" or "*Vagabond*" is offered by Ibn Ezra on Gen. 4:12 (*Commentary on The Pentateuch* 1:84).

¹⁰² Mather's calculation (duplicated in his annotation on Gen. 4:25, below) is based on James Ussher's chronology, in *Annals of the World* (1658) 2. Like many of his predecessors, the French ecclesiastical historian Louis Ellies Du Pin (1657–1719), professor at the Sorbonne, developed elaborate calculations about human reproduction to refute La Peyrère's old argument that there had to be men before Adam if Cain was afraid of the people of Nod. Mather here extracts Du Pin's commentary from *Dissertationes Historiques, Chronologiques, Geographiques et Critiques Sur la Bible* (1711), vol. 1 (Diss. I, ch. 6, pp. 120–23). Similar calculations appear in Thomas Burnet's *Sacred Theory of the Earth* (bk. 1, ch. 3, p. 36) and in William Whiston's *New Theory of the Earth*, 5th ed. (pt. 2, bk. 3, ch. 3, p. 249).

[▽157r] [Insert from 157r]

Q. On what account, *Jabal*, the *Father of such as dwell in Tents*? v. 20.

A. The ingenious Mr. *Derham* well paraphrases it; “He was the Inventor of Tents, and pitching those moveable Houses in the Fields, for looking after, and depasturing their Cattel, in the Desarts, & uncultivated World.”¹⁰³

1514.

Q. *Jubal*, the Son of *Lamech*, who was the Inventor of Music; Is there any Commemoration of his Name, Remarkable? v. 21.

A. Yes. From his Name, some think, a *Jubilee* is called so; because it is proclaimed with *Music*.

Moreover, The Story of *Pythagoras*’s finding out *Musical Notes*, from the Strokes of the Hammers, upon the Smiths Anvil, arose from a Mistake of *Tubal*, for *Jubal*, (Sons of the same Father.)¹⁰⁴

[△] [△Insert ends]

33.

Q. What may bee the Sense of *Lamechs* Brag? v. 23, 24.

A. *Lamech* praesuming possibly, on the Strength of his Family, & priding himself in the Arts, invented by his Sons, especially by *Tubal-Cain*, who was an Artificer in Brass & Iron, & so tis likely made *Swords*, with other Instruments of War; hee thought himself able to Resist, & Conquer, any that should offend him. His Wives might bee afraid, lest his Boisterous Humours, might expose him unto Danger; wherefore in a Vaunting Fashion, hee thus addresses them, *Fear not concerning mee; for if a Man should Attempt to sett upon mee, I would slay that Man by my Wounding of him, & tho’ hee were a young Man that should do it, yett I would Dispatch him, by my Hurting him.* And if *Cain*, a Fratricide, shall bee avenged sevenfold, surely *Lamech*, that kills a Man in his own Defence, shall bee avenged Seventy times sevenfold.

For this Cause *Lamech* uses to bee called, *The Father of Duellers*.¹⁰⁵

¹⁰³ The citation appears in William Derham’s *Physico-Theology* (fourth edition, 1716), bk. 5, ch. 1, p. 268.

¹⁰⁴ Mather’s source is Simon Patrick’s annotation on this verse (*Commentary* 1:28), but Patrick’s own source is Samuel Bochart, who identifies Jubal (in the guise of King Cinyras of Cyprus) as the inventor of music (*Geographia*, pars 2, lib. 2, cap. 7, col. 728–29). Josephus Flavius (*Antiquities* 1.2.2) ascribes to Jubal the invention of “the psaltery and the harp.” The ancient Greeks bestowed the honor of developing musical notes on the Pythagorean Hippasos of Metapontum (mid-5th c. BCE), who by striking four bronze discs of the same diameter but of different thickness, discovered musical ratios. See *Scholias in Platonem* (Dialogue Phd, 108d, 3–10). Jabal and Jubal were both Lamech’s sons (Gen. 4:19–21).

¹⁰⁵ For greater detail on these verses, see Simon Patrick (*Commentary* 1:28). Samuel Bochart (*Geographia*, pars 1, lib. 3, cap. 12, col. 179–86), Gerard Vossius (*De Theologia Gentili*, pars 1, lib. 1, cap. 16, pp. 123–24), and Theophilus Gale (*Court* [1672], part 1, bk. 2, ch. 6, pp. 66–67) associate Tubalcain with Hephaistos (Vulcan), Greek (Roman) god of smithery.

But the learned *Pfeiffer* thinks rather, That *Moses* recounting here, the Families of the *Cainites*, and mentioning somewhat of their Studies & Manners, would give an Instance of that Antipathy & Persecution, with which they molested the True Church of God. That Instance was *this*; An Aged *Prophet*, with his Young *Son*, were murdered by *Lamech*, probably for some Reproofs which might bee given him from those Men of God. His *Wives* having an Inkling of it, might bee afraid of the *Vengeance* whereto their whole Houshold might bee thereby exposed. But hee profanely gloried in his Wickedness, and brag'd, That hee should himself alone sustain all the *Mischief* that would follow upon that Murder; which in truth, sais hee, will bee none at all; for if any Man go to kill mee, who have not slain a *Brother*, as *Cain* did, but my envious Adversaries, it will bee Revenged, more than you know the Killing of our Grandfather *Cain* himself.¹⁰⁶

[153r]

Q. The Marriage of *Cain*, with his own *Sister*, ha's been a Matter of some Torture on the Minds of Men, that have been Inquisitive, How far the *Light and Law of Nature* extends in such a Matter? v. 24.

A. I shall only take Notice of such things as *Heidegger* speaks upon it.¹⁰⁷

We will omitt the *Oriental Traditions*, mentioned by *Patricides*, not without some Intimations thereof also in *Epiphanius* and *Cedrenus*; That *Cain* and *Abel* had their *Twin-Sisters* born with them. The *Twin-Sister* of *Cain*, they say, was called *Azron*; The *Twin-Sister* of *Abel*, was called, *Awin*. And because Marriage must be made with as much Distance as may be, they suppose, that *Cain* married *Awin*, and *Abel* married *Azron*, the *Sister* that was not born with him.¹⁰⁸

The *Talmuds* on this Occasion, talk much about a *Special Indulgence* of GOD: And so they Read; Psal. 89.2. *Nam dixi, Indulgentia, seu, Benignitas,*

¹⁰⁶ Extracted from August Pfeiffer's commentary on Gen. 4:22, in *Hermeneutica Sacra* (1684). Patrick (*Commentary* 1:28) provides several variant interpretations of Lamech's boast.

¹⁰⁷ The entire commentary on Gen. 4:24 is extracted from Johann Heinrich Heidegger (1:130–32, Exerc. V, §§ 39–43).

¹⁰⁸ Heidegger (1:130, Exerc. V, § 39). The tradition of Cain and Abel's twin sisters is related by Patricides in his universal history *Nazm al-Gawahir* (*Chaplet of Pearls*), which appeared in Edward Pococke's Latin translation *Contextio Gemmarum, sive, Eutychie Patriarchae Alexandrini Annales* (1656) 1:15. See also John Selden's *De Jure Naturali & Gentium* (1640), lib. 3, cap. 2, pp. 277–78, and lib. 5, cap. 8, pp. 576–83. The same is told by Abulfarag (Abul-Pharagius), in Edward Pococke's *Historia compendiosa dynastiarum* (1663), pt. 1, p. 4. St. Epiphanius (*Panarion* 39.5.2–3; 39.6.1–4), dismissing the claim of the Sethians that their progenitor Seth married his sister Horaea, cites the book of *Jubilees* in affirmation that Seth married his sister Azura, and Cain his older sister Save. Thus Adam and Eve had a total of 12 sons and 2 daughters (*Epiphanius* 2:76–77.25–29). The Byzantine chronographer Georgius Cedrenus of Constantinople relates that Adam and Eve had 33 sons and 27 daughters, in *Cedrenus's Compendium historiarum* (1:15–16).

ædificavit sæculum. To this Purpose, they quote, Lev. 20.17. /חסד הוה/ *Indulgentia erat*. But these are Strains.¹⁰⁹

Austin writing, *De Civitate Dei*, saies; *cum non essent ulli homines, nisi qui ex illis duobus nati fuissent, viri sorores suas conjuges acceperunt: Quod profectò quantò est Antiquius, compellente necessitate, tantò postea factum est Damnabilius, Religione prohibente*. The Great GOD, who had the *Residue of the Spirit*, and could have made more Men or Women, did, by His Making of no more, make this Necessity.¹¹⁰

Before the Law of *Moses*, the Marriages of *Brothers and Sisters*, were, as *Plato* saies of them, μηδ'αμ'ως οσια και θεομιση· *Minimè Pia, sed Deo invisā*. And we are told by *Diodorus Siculus*, The Prohibition of them, was, κοινον εθος των ανθρωπων· *Communis mos hominum*.¹¹¹

The Opinion of *Maimonides*, is, That the Law forbidding this *Incest*, was given unto *Adam* at the first; but as a Law, that was not to take place, until Mankind should be a little multiplied.

When Mankind became so multiplied, that *Brothers and Sisters* might *live together* in the same House, and yett *live asunder*; or, they might converse together without *Hazard and Scandal*: Now their *Matrimonial Conjunction* was pronounced *Incestuous*, and *Criminal*. Until Families were so multiplied, [154v] that *Wives* could be fetched out of | *other Families*, they who lived in the *same Families*, were more obnoxious to one another.¹¹²

Briefly; On *Cains* Marriage, the Sentence of *Heidegger*, is; *Non fuit hæc Dispensatio à Lege Naturali, quia Jus Naturale non simpliciter damnat tales Nuptias, sed in certo tantum statu*. *Grotius* very well teaches us, That some Things are, *Juris Naturalis, non simpliciter, sed pro certo rerum statu*.¹¹³

109 Heidegger (1:131, Exerc. V, § 41). The story of Cain and Abel marrying each other's twin sisters with God's approval is discussed in Soncino Talmudic tractates Sanhedrin (58b) and Yevamoth (62a). The Latin passage derived from the Talmudic tractate Sanhedrin (58b) reads, "For I said, the world shall be built up by grace"; or closer to the Latin translation: "For I have said, indulgence, or mercy, shall be built up forever" (Ps. 89:2). Rashi on Lev. 20:17 glosses, "As it is said, 'the world is built on kindness.'"

110 Heidegger (1:132, Exerc. V, § 42). St. Augustine comments in his *De Civitate Dei* (15.16.1) [PL 41. 457–458], "as there were no human beings except those who had been born of these two, men took their sisters for wives, – an act which was as certainly dictated by necessity in these ancient days as afterwards it was condemned by the prohibitions of religion" (*NPNFi* 2:297).

111 Plato (*De Legibus* 8.838b, 10–11) considers such incest "an abomination in the sight of the gods" or, according to the Latinized rendition, "by no means holy, but hateful to god." Diodorus Siculus (1.27.1) argues that the prohibition to marry one's own siblings was "contrary to the general custom of mankind." As usual, Mather dispenses with the diacritical marks of the Greek originals.

112 Maimonides's views on incest are discussed in his *Guide* (3.49.376–77) and his *Mishneh Torah: Hilchot Issurei Bi'ah* (1:4–7). See also Soncino Genesis Rabbah (XVI:6) and *Ej*: "Incest."

113 Heidegger's sentence appears in his *Historia Sacra Patriarcharum* (1:132, Exerc. V, § 43) and reads as follows: "This was not a dispensation from Natural Law, because Natural Law

Before, I part with my *Heidegger*, I will mention a Remark of his, on the *Banishment*, which was the *Punishment of Cain*, after his Murder. *Cum Agricola fuerit, tantò gravior ipsi futura erat jactura agrorum, quos ante hac feliciter coluit*: His Loss of the *Fields* which he had cultivated, might be one sensible Stroke in his Calamities.

I will also mention his Remark on that; *Whosoever slayeth Cain, Vengeance shall be taken on him Seven-fold*. Why so? *Utpotè qui pœna Caino inflicta, non fuerit ab homicidio absterritus*: Because he took not Warning from the Judgment inflicted on *Cain* for his Wickedness.¹¹⁴

About the Scituation of the Land of *Nod*, our *Heidegger* sits down satisfied, with the Opinion of *Junius*. *Cum in illo tractu, qui subest Babyloniae, Gentes fere sint in Tigurijs, et mapalibus habitantes, tum in Arabia Desertâ, tum in extremâ Babyloniam ad sinum Persicum, tum in Susiane conterminâ, quæ Gentes Nomades appellantur; totum illum Tractum appellari Terram Nod, ex eo Judicaverim. Sed, quia latè patebat ille Tractus, quem Nomades coluerunt, propterea Distinctionis ergò circumstantia altera adjicitur; nempe Cainum se in eam Terram Nod recepisse, quæ ex adverso Hedenis, orientem versus sita est: ac proindè ex eo concludimus sedem Caini fuisse in unâ Susiane, ubi Characeni et Eulæi à Geographis dicuntur habitasse*. Look for the *Susiane*, where the Geographers have placed the *Characenes* and the *Eulæans*, and you find, The Land of *Nod*.¹¹⁵

does not condemn such marriages absolutely, but only in certain circumstances.” Similarly, the celebrated Dutch legal philosopher Hugo Grotius (1583–1645) cautions that some things are “allowed by the Law of Nature, not absolutely, but according to a certain State of Affairs” (*De Iure Belli et Pacis* [1625], lib. 1, cap. 1, art. 10, § 7; *Rights of War and Peace* 1:156).

114 The preceding two paragraphs appear in *Heidegger* (1:128–29, Exerc. V, §§ 25–26), and the Latin citations signify, “Since he [Cain] was a farmer, the loss of his fields, which before this he had happily tended, would be so much more burdensome to him”; and respectively, “Inasmuch as whosoever might inflict punishment on Cain would not have been deterred from murder.”

115 *Heidegger* (1:130, Exerc. V, § 39). *Heidegger* cites from Franciscus Junius’s annotation on Gen. 4:16, in *Opera Theologica* (1613), “Libri genesios Analysis” (vol. 1, p. 148, lines 20–31). Junius opines, “In that region, which is near Babylon, there are wild tribes among the Tigurii, and tribes who live in huts, sometimes in the Arabian Desert, at other times at the edge of Babylon by the Persian Gulf, and other times at the border of Susa; these tribes are called nomads. Given this, I would have concluded that this whole region is called the Land of Nod. However, because the region where the nomads dwell (nomads do not tend land) lay wide open, we must add a further detail arising from that distinction, which is that Cain was taken into the Land of Nod, which is situated towards the east on the opposite side of Eden. And so from this we conclude that the seat of Cain was in Susiana alone, where the Characeni and the Eulæi are reputed by geographers to live.” Susa, the capital of Susiana (Susis) is located in E Assyria. See also Pliny (6.31.135) and Ptolemy (*Geographia* 6.3. Tabula V. Asia, pp. 135–36). Pierre-Daniel Huet’s *Treatise of the Situation of Paradise*, which Mather consulted on the location of Paradise, gives greater detail (ch. 13, pp. 120–22).

3239.

Q. It won't be amiss to ask over again; Have the ancient Pagans no Traditions of the *Ante-diluvian* Matters, & other Biblical Affayrs, of great Antiquity? v. 24.

A. Very many.¹¹⁶ But there is a very particular Exactness, in what *Herodotus* relates, as having received it from the *Egyptian* Priests. He tells us, That of the *Gods*, there were *Three Orders*. Of the first Order were *Eight*. These no doubt were called, The *first*, because descended of *Cain*, the eldest Son of *Adam*. For *Adam*, with all his Line, by *Cain*, as *Moses* hath delivered it, make just the Number *Eight*. Only *Herodotus* misplaces *Pan*, for the first of the *Eight*, who is probably miswritten for *Kan*; The Greek Γ (as well as the Latin P) is in Figure, very like the Hebrew לך/ wherewith *Kain* is written.¹¹⁷

Of the Second Order of Gods, he saies, there were *Twelve*; who were so called, not because they were all Juniors to the *Dij Primi*, but because they were in the Line of *Seth*, the younger Son of *Adam*. And from *Seth*, inclusively to *Askenaz*, the last Named in the Line of *Japhet*, there are *Twelve* enumerated in the *Mosaic* Genealogy.

Those of the Third Order, *Herodotus* tells us, were born of the *Dij Secundi*.¹¹⁸

Josephus affirms, That all that have written the History of the Barbarous Nations, make mention of *Noah's* Flood and Ark. *Abydenus*, in his Commentaries, taken out of the *Median* and *Assyrian* Archives, gives an Account, of *Saturn's* prædicting the *Flood*, and sending *Birds* out of the *Ark*, after the stormy Rains were over, to see if the Waters were asswaged; and that they Returned, and were sent out again, and a Third Time; just according to the Sacred Story. And *Plato, de Legibus*. 3. saies, we must suppose, that there were some Reliques of Mankind, who saved themselves from the Flood, upon the Mountains.¹¹⁹

¹¹⁶ Mather's commentary on Gen. 4:24 [155r–156v] is extracted from Nehemiah Grew's *Cosmologia Sacra* (bk. 4, ch. 2, §§ 9–25, pp. 145–49).

¹¹⁷ Herodotus (2.145–46) describes the Egyptian deities in their relation to those of the Greeks. According to Herodotus, the Greek Pan is the Egyptian god Khem; however, unlike Khem who is ranked as the first of the eight oldest Egyptian deities, Pan is among the three youngest of the Greek gods (*KP*). Whereas Grew argues that the Greek letter “Gamma” and the Latin “P” are “in Sound” very much like the Hebrew “qoph” (145), Mather corrects Grew and argues that these letters are, instead, similar “in Figure.”

¹¹⁸ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, §§ 10–11, pp. 145–46). Arguing (as most of his euhemerist contemporaries did) that the offspring of Adam and Eve in the Mosaic account became the deities in the pantheon of the Egyptians and Greeks, Grew associates the “*Dij Primi*” (first order of gods) and “*Dij Secundi*” (second order of gods) with the line of descent of Seth and of Japheth in the Mosaic genealogical account. Herodotus describes the third order of gods in *Historia* (2.145).

¹¹⁹ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 12, p. 146). Josephus Flavius (*Antiquities* 1.3.6, 9) cites the Chaldean historian Berosus, the Egyptian Hieronymous (who authored a Phoenician history), the Greek geographer Mnaseas of Patara (Lycia), the Greek historian Nicolaus

The *Tower of Babel* is mentioned by so many Pagan Writers, that *Polyhistor* calls it, Ἰστοροῦμενον Πύργον, *The Tower that every Historian talk'd of*.

Diodorus, and *Strabo*, and *Pliny*, and *Tacitus*, and others mention the Burning of *Sodom* with Fire from Heaven, and the Effects of it. *Solinus* writes, *Longo ab Hierosolymis recessu tristis sinus panditur, quem de cælo tactum, testatur humus nigra, et in cinerem soluta*.¹²⁰

Of *Abraham* speaks *Berosus* in *Josephus*, and *Eupolemus* in *Eusebius*, affirming that he lived in the Tenth Generation after the Flood. *Melo*, cited by *Polyhistor*, tells of his Two Wives, whereof the one was his *Kinswoman*, the other an *Egyptian*. That by the former he had but one Son, whom the Greeks called Γέλωτα, or, *Laughter*; And that by the other, he had Twelve Sons, (meaning the Twelve Princes born of *Ishmael*.) *Cleodemus* also mentions his Children by *Ketura*, with the very Names of some of them; *Asurem*, and *Aferem*, that is, *Asshurim* and *Epher*.¹²¹ *Eupolemus* mentions his Victory over the *Armenian* Kings, and his Entertainment by *Melchizedek*. *Nicolaus Damascenus* and *Artapanus*, mention, his going in the Time of a Famine unto *Pharaoh* the King of *Egypt*, the Plaguing of that Kings Court for the Sake of *Sarah*, and his return to

of Damascus, and many others – all testifying to the story of the Noachic Flood. *Eusebius* (*Praeparatio evangelica* 9.12.414d–415b) cites *Abydenus*, whose Chaldean history *Assyriaca et Babyloniaca* also relates a version of the Flood story, in which *Kronos* reveals to King *Sisithrus* the coming of “a great rain,” and commands him to store all records “at Heliopolis in the country of the Sippari.” When floodwaters carried *Sisithrus*’s ship to Armenia, the king released three sets of birds on the third day, after the rains had stopped, to discover if the flood had receded from the land. In after ages, *Sisithrus*’s ark “supplied the people of the country [Armenia] with wooden amulets as antidotes to poison” (*Eusebius*, *Preparation for the Gospel* 1:446). *Plato*, too, mentions that floods repeatedly wiped out the human race and that only a remnant survived on mountain tops (*De Legibus* 3.677a, 682b–c, 702a).

120 The Greek citation (“the tower renowned in history”) from the Greco-Roman polymath *Cornelius Alexander*, nicknamed *Polyhistor* (c. 105–c. 40 BCE), appears in *Eusebius*’s *Praeparatio evangelica* (9.17.3, line 1; 9.17.418c) and in *Cornelius Alexander*’s *Fragmenta* (fragm. 3.10). *Diodorus Siculus* (2.48.6–8; 19.98.1–99.3) describes the floating asphalt and noxious fumes of the Dead Sea, but does not mention *Sodom* or *Gomorra*h; however, *Strabo* (16.2.44), *Pliny* (2.109–110.235–38), and *Tacitus* (*Historiarum* 5.7) – all mention the rivers of fire in the Fertile Crescent. Whether these historians had in mind the biblical *Sodom* and *Gomorra*h is a different matter. Finally, *Solinus*’s *De mirabilibus mundi* (c. 36) relates that “from the long recess of Jerusalem, a woeful crater spreads out; black earth turned to ash testifies to its having been touched by heaven.”

121 *Grew*, *Cosmologia Sacra* (bk. 4, ch. 2, § 16, pp. 146–47). *Josephus* *Flavius* (*Antiquities* 1.7.2) cites *Berosus* as evidence for the historicity of the Patriarch *Abraham*, who lived in the tenth generation after the deluge. The same is mentioned by *Eupolemus* in a fragment of *Alexander Polyhistor*, surviving in *Eusebius*’s *Praeparatio evangelica* (9.17.418c–419c); *Alexander Polyhistor* (*Fragmenta*, fragm. 5.9–15), in an excerpt from a polemic *Against the Jews*, by the Greek rhetorician *Apollonios Molon* (*Melo*) of Rhodes, relates that *Abraham* had two wives, but “his lawful wife” bore him a son called “*Gelos*” (“*Laughter*”) – all in *Eusebius*’s *Praeparatio evangelica* (9.19.421a). The Hellenist historian *Cleodemus Malchus* (2nd c. BCE) acknowledges the offspring of *Keturah*, *Abraham*’s concubine (Gen. 25:1–4; 1 Chron. 1:32–33), in a fragment surviving in *Eusebius*’s *Praeparatio evangelica* (9.20.421b).

Syria upon his receiving of *Sarah* again. *Polyhistor* mentions Gods commanding him to offer up his Son, and his offering a Ram instead of a Son. They all agree, That he was a very wise Man, and well skill'd in *Astronomy*. Yea, *Hecataeus* wrote an entire Volumn, of his Life.¹²²

Of *Jacob*, tis reported by *Theodotus*, in *Eusebius*, (an excellent Poet,) That the City *Kikima*, (meaning, *Shechem*,) was by him taken in the Time of *Emmor*, or, *Hamor*; Thus ascribing to *Jacob*, what was done by his Two Sons: And, That before This, for fear of his Brother, he went and liv'd with *Laban* in *Syria*, & married his Two Daughters, & was cheated with the Eldest first; of whom, saies *Theodotus*, he begat Eleven Sons, and beautiful *Dina*. You see, how near he comes to the true Account! And *Artapanus* gives an Account of his going into *Egypt*, with all his Houshold, unto his Son *Joseph*; and his living there, 'Εν τῇ πόλει Καϊσαν, that is, in *Goshen*.¹²³

Aristaeas in his History of the *Jewes*, tells us, That *Job* was the Son of *Esau*, by his Wife *Bassura*; a most Just Man, & very Rich: That God, for his Trial, permitted his Estate and Children to be destroyed, & his Body to be smitten with a grievous *Ulcer*; That *Eliphaz*, King of the *Temanites*, *Bildad*, Tyrant of the *Saucheans*, and *Elihu* the Son of *Barechiel*, the *Tobite*, came to comfort him, tho' in vain: But that God afterwards exalted him.¹²⁴

[156v] *Artapanus* gives a large Account of *Joseph*; How his Brethren envying his Witt, & conspiring against him, sent him away by certain *Arabians* into *Egypt*, where he was made | Lieutenant of that Kingdome; How he caused the Lands to be Surveyed, and Divided, and Cultivated; whereby the Meanest of the People, before oppressed, had their Share: with much more well agreeing with the *Mosaic* History. *Philo*, among other *Poets*, recited by *Eusebius*, mentions his placing of *Jacob* in a fruitful Countrey, by the King allow'd unto him; and his Gift of Interpreting Dreams; and his being Lord of *Egypt*. Even our Schoolboyes

¹²² The information from Eupolemus, from the Greek peripatetic historian Nicolaus Damascus, from the Hellenist Jewish author Artapanus (2nd c. BCE), from Cornelius Alexander Polyhistor, and from the Ionian prose-writer Hecataeus of Miletus (6th–5th c. BCE) – all appear respectively in Eusebius's *Praeparatio evangelica* (9.17, 18, 19; 13.13.680d). See also S. E. Morison's "Harvard School of Astronomy."

¹²³ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 17, p. 147). The Samaritan epic poet Theodotus (2nd c. BCE) relates his story of Jacob's conquests (both bellicose and matrimonial) in Eusebius's invaluable resource *Praeparatio evangelica* (9.22.425b–429b), and so does Artapanus about Joseph's chaste residence in Goshen (Heliopolis and Saïs). Both this story and the Greek citation "in the city Caesana" appear in *Praeparatio evangelica* (9.23.430a) and in Cornelius Alexander (Polyhistor), *Fragmenta* (fragm. 10.24).

¹²⁴ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 18, p. 147). Aristaeas (2nd c. BCE), who authored *Historia Iudaeis*, lists Jobab (Job) as Esau's son by Bassara (Eusebius, *Praeparatio evangelica* 9.25.430d). However, this affiliation – based on a postscript to the LXX translation of Job 42:17 – is erroneous and appears to be the result of confusion between Bassura (Bosorrha) in the LXX, Bozra in the Vulgate and KJV, and Basemath in the LXX (Gen. 36:13, 33; Job 43:17); see *EJ*: "Aristeas." The story of Job's exemplary faithfulness is well known and can be found in the book that bears his name.

can tell, what is by *Trogus Pompeius* reported of him; *Ejus excellens ingenium veriti fratres, clam interceptum peregrinis mercatoribus vendiderunt.* And, *Regi Egypti percharus fuit; nam et prodigiorum sagacissimus erat, et somniorum primus intelligentiam condidit; Nihilque divini Juris humanique ei incognitum videbatur, adeò ut sterilitatem agrorum, etiam ante multos annos, previderit; perijssetque omnis Egyptus Fame, nisi monitu ejus, Rex edicto servari per multos Annos Fruges jussisset. Tantaque ejus experimenta fuerunt, ut non ab Homine, sed à Deo, Responsa dari viderentur.*¹²⁵

Polyhistor, from *Artapanus*, and he, from the *Egyptian* Priests, relating the History of *Moses* at large, saies, That he was the Son of an Hebrew Woman, but Adopted by *Merrhin*, *Phalmanoth* the Egyptian Tyrants Daughter: That for his Skill in all kinds of Philosophy, and his great Wisdome, they gave him Divine Honour, and called him *Hermes*. But being envied, & his Life sought, killing the intended Assassine, by his Brother *Aarons* Advice, he fled into, *Arabia*, & there married the Daughter of *Raguel*, Prince of the Countrey. Where, in praying for his People, appear'd unto him, a *Fire*, burning without Fuel, with a Divine Voice, commanding him, to go, and rescue the Jewes from *Egypt*, and conduct them into their own Countrey. Then he relates the Transaction with the King of *Egypt*, the Miracles which he wrought, the Plagues which follow'd the Contempt of them; the Marching of the *Israelites* thro' the Red-Sea, and the Drowning of the *Egyptians* that followed them; their Wandering in the Wilderness (according to him) Thirty Years; and their being Fed there with *Corn from Heaven*, [see Ps. 78.24.] like *Panic*, (or *Indian Oatmeal*) white as the Snow.¹²⁶ *Ezekiel* the Tragic Poet, also tells the whole Story of *Moses* exactly. The Opposition, he had from *Jannes* and *Jambres* is related by *Numenius* the *Pythagorean*.

125 Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 19, p. 147). Artapanus's account of Joseph appears in Eusebius's *Praeparatio evangelica* (9.23.429c–430b) followed by six lines from the Greek epic poem *De Hierosolymis*, by Philo (the Elder), in *Praeparatio evangelica* (9.24.430c). The young charges of Ezekiel Cheever at Boston Latin School would have known what Pompeius Trogus (b. c. 41 BCE), Roman historian from Gaul, wrote about Joseph's accomplishments in Egypt, in his *Historiae Philippicae* (c. 9 CE), which survives in a Latin epitome of Marcus Junianus Justinus (2nd, 3rd, or 4th c. CE). Mather's excerpt from Pompeius Trogus (via Nehemiah Grew) appears with slight variations in Justinus's *Historiarum Philippicarum in Epitomen Redacti* (36.2.6–10), which John Selby Watson translates as follows: Joseph, "whom the brothers, fearing his extraordinary abilities, secretly made prisoner, and sold to some foreign merchants." And, "he found favor with the Egyptian king; he was eminently skilled in prodigies, and was the first to establish the science of interpreting dreams; and nothing, indeed of divine or human law, seems to have been unknown to him; so that he foretold the dearth in the land some years before it happened, and all Egypt would have perished by famine, had not the king by his advice ordered the corn to be laid up for several years; such being the proofs of his knowledge, that his admonitions seemed to proceed, not from a mortal, but a god" (adapted from J. S. Watson's translation of Justin's *Epitome* [36.2.6–10], pp. 245–46).

126 Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 20, pp. 147–48). Cornelius Alexander Polyhistor's story of Moses in Egypt (excerpted from Artapanus) survives in a lengthy fragment in Eusebius's *Praeparatio evangelica* (9.27), on which Grew relies all along.

Yea, *Herodotus*, and *Polemo*, and *Apion*, and *Ptolomæus* the *Mendesian* Priest, and *Hellanicus*, and *Philochorus*, all relate that *Moses* was Prince of the Jewes, & led them forth of *Egypt*, about the Time of *Amasis*, or perhaps *Armais*. *Josephus* recites what *Manetho* saies of it. *Moses* encourages the pursued *Israelites*, with telling them, [Exod. 14.14] That *the Lord would fight for them*. And *Strabo* reports the same of him, (Lib. 16.) ἀντὶ τῶν ὀπλῶν, τὰ ἱερὰ προυβάλλετο, καὶ το θεῖον, *Instead of Arms, he sett before them the Memorial of Gods Mercy to them in the Holy Passeeover, & the Divine Power*.¹²⁷

The Conquest of *Canaan* by *Joshua*, is largely related by *Procopius*; And *Eupolemus* calls him, *Jesus the Son of Nava*; saying, That he sett up a Sacred Tabernacle, ἐν Σηλόι. And that he dyed One hundred & Ten Years old. *Strabo* adds this Testimony, That the Successors of *Moses*, for some Time, observed the Lawes that he gave them, and were truly Religious. [Compare, Josh. 2.7.]

The Fertility of the Land of *Canaan* (tho' it be at this Day, a barren Land,) was admired by *Pliny*, and *Aristeas*.¹²⁸

Eupolemus tells us, That after *Joshua*, there succeeded *Samuel* the Prophet, and *Saul*, and then *David*; and that the *Idumeans*, and several other Nations

127 The Hellenistic Jewish playwright Ezekiel, the Poet, wrote *Exagoge* ("The Exodus"), a dramatization of Moses's life in Egypt, in iambic trimeter (*EJ*: "Ezekiel the Poet"). The third-hand fragment of the play, excerpted by Polyhistor, survives in Eusebius's *Praeparatio evangelica* (9.28–29). The story of Jannes and Jambres, the mysterious Egyptian magi who opposed Moses, appears in an excerpt of the Pythagorean Numenius of Apamea (2nd c. CE) and elsewhere, but is here extracted from Eusebius's *Praeparatio evangelica* (9.8). The life of Moses in Egypt is also alluded to in Herodotus (2.13), in a lost history by Polemon of Ilium (c. 202–181 BCE), in a diatribe of Apion (1st c. CE, Greek rhetorician of Alexandria), in a lost chronology of Ptolemy of Mende (an Egyptian priest), in a fragment of Hellancius (Helladius) of Antinoupolis (3rd c. CE), and in a fragment of Philochorus (c. 340–260 BCE). These ancient authors all mention Moses at the time of Amosis (Amasis). Attempts to identify this Amosis with the Pharaoh of the house of Tahpanhes (c. 569–525 BCE), mentioned in Jer. 43:9, seem misguided since the period in which this Amosis lived is far too late for the Hebrew Lawgiver (*CBTEL*). Modern historiography dates the Israelite Exodus to the Nineteenth Dynasty (c. 1304–1200 BCE), probably under Rameses II (c. 1290–1223 BCE). See *EJ*: "Egypt." Mather's source (via Grew) is the Christian writer Sextus Julius Africanus (c. 160–c. 240), whose *Chronographiae tertio* is excerpted in Eusebius's *Praeparatio evangelica* (10.10). Josephus Flavius (*Against Apion* 1.15) extracts from Manetho a lengthy chronology of the Egyptian rulers of the period. The Greek citation from Strabo (16.2.36) translates more accurately "instead of using arms, [Moses] put forward as defence his sacrifices and his Divine Being." Mather's diacritical marks in his Greek citation – by him generally omitted – do not reflect modern standards.

128 The biblical exegete Procopius Gazaetus (c. 475–c. 538 CE) describes Joshua's conquest in *Commentarii in Octateuchum* (in Josue) [PG 87.1. 992–1042]. In the Greek original of *De Eliae prophetia opere*, Eupolemus calls him Ἰησοῦν τὸν τοῦ Ναυῆ [Iesoun ton tou Naue], the Greek version of Joshua's Hebrew name (Yeshua / Yoshua), which in Latin is generally rendered Jesus. Moreover, Eupolemus relates that Joshua ("Jesus the son of Nave") set up the sacred tabernacle [en Zeloi] in Shilo (Eusebius, *Praeparatio evangelica* 9.30.447a). Strabo's testimony appears in his *Geography* (16.2.37). The fertility of the region is celebrated in Pliny (5.15.70, 73; 13.9.44–45), and Aristeas briefly mentions that plenty of water was available in Jerusalem (Eusebius, *Praeparatio evangelica* 9.38).

paid their Tribute unto *David*; and that he sent Ships for Gold, unto *Urphen*, an Island of the Red-Sea, then abounding with Gold-Mines; and that he Reigned Forty Years; and having been a Man of Blood, was commanded to leave the Building of the Temple to his Son; for which he received his Directions by an Angel, whose Name was *Διαναθάν*. (Doubtless, the Prophet *Nathan*; 2. Chron. 29.25.)¹²⁹

Theodotus, and *Hipsicrates*, and *Mochus*, who were *Phœnicians*, and *Menander* of *Pergamus*, mention the League between *Solomon*, and *Hiram*, who is by *Eupolemus* called, *Suron*; And the Supplies of Timber and Workmen, which he received from this King, and from *Vaphres*, King of *Egypt*. And the latter, gives as particular Account, partly true, partly false, of the Temple & its Utensels.

When we come down to the *Babylonian* Captivity, we have such an Army of Pagan Writers, consenting to what we have in our Sacred Oracles, that it were endless to cite them.

The Collection with which I have now entertained you, is fetched out of the most Ingenious Dr. N. Grewes, *Cosmologia Sacra*.¹³⁰

| [157r]
2418.

Q. *Lamech* is the first *Exemple of Polygamy*; what might be the first *Original of Polygamy*? v. 24.

A. It is thought by some, That the earnest Desire of seeing the *Blessed Seed*, which was promised unto *Eve*, might induce good Men in the former Ages, to take more Wives than one; hoping, that by multiplying their Posterity, some or other thereof, might be so happy as to produce that *Seed*.

This is a learned & a pious Account, of the *Original of Polygamy*; and behold, what a mitigating Circumstance it now appears withal! God, for the Sake

¹²⁹ Grew, *Cosmologia Sacra* (bk. 4, ch. 2, § 23, p. 149). See also Mather's commentary on 2 Chron. 8:18. Eupolemus relates the well-known story of succession, of David's ships sailing to Urphen (Ophir), and of the angel *Διαναθάν* [Dianathan] – all extant in Eusebius (*Praeparatio evangelica* 9.30.447d).

¹³⁰ Finally, Mather extracts his last two paragraphs from Grew's *Cosmologia Sacra* (bk. 4, ch. 2, §§ 24, 25, p. 149). Grew's source is Tatian's *Oratio adversus Graecos* (cap. 31, 36), in an extant fragment in Eusebius Pamphilus's *Praeparatio evangelica* (10.11.493b–d). The Greek historian Menander of Pergamon (1st c. BCE) mentions King Solomon of Jerusalem in an extant fragment of his history of the Greeks and the Barbarians (*Fragmenta* 1, line 21). Eupolemus details the constructive relationship between King Solomon, *Σούρων* [Suron], probably King Hiram of Tyre, and *Οὐαφρής* (Vaphres), king of Egypt, in Eusebius's *Praeparatio evangelica* (9.30–34.447c–452a). The German chronologist Seth Calvisius (1556–1615) argues that Vaphres was Pharaoh Sesostrius, whose daughter (1 Kings 3:1) was given to Solomon in marriage, in Calvisius's *Opus Chronologicum* (1685) 191–92. Because Sesostrius is to have lived before the Trojan War (Herodotus 2.102–10; Manetho, *Aegyptiaca* 2, fragm. 34), Solomon's father-in-law could have been a latter-day Senwosret, the cognomen of several Egyptian kings of the 12th Dynasty (*OCD*, *KP*).

of His glorious *Messiah*, pardoned the Error, whereinto so many of the Patriarchs fell, when it was Respect unto His *Messiah*, that led them into the Error.¹³¹

Q. A Remark upon the Numbers of People, in the most early Time of the World; which may explain several Passages in the History? v. 25.

A. It is probable enough that *Cain* was but one Year younger than his Father; Tho' *Adam* was 129 Years old, when *Seth* was born.

Suppose *Adam* had no more than 10 Children, in 30 Years, yett these & their Posterity might in 130 Years, multiply to, 100,000;

A. M.	Men.
30	10
60	100
90	1000
120	10,000
130	100,000.

Nay, *Cain* himself might be multiplied into as many as this amounts to. So that we need not wonder, if he built a City, after his Expulsion from his Fathers Family, where the *Shechinah* as yett was exhibited.

If we suppose that *Adam* had 50 Children of his own Body instead of 10 in 130 Years, (which is no unreasonable Supposition,) Mankind may have amounted unto several Millions, when *Seth* was born.

But *Seth* is he, whom God from the *Shechinah*, Elected & Appointed, for the Second *Patriarch*, or *Emperour* of the World; the Successor to *Adam* in the Government of the World.¹³²

1909.

Q. The Words of *Eve*, upon the Birth of *Seth*, *God hath appointed mee another Seed, instead of Abel*: May there bee any further signification, besides the obvious, in them? v. 25.

A. I'll offer you a Jewish Curiositie; and one that is the more curious, because of a great Point of the Christian Faith confessed in it.

In Bereschith Rabba minori, super Gen. 4.25. there is this Passage;

*R. Tanchuma; Illud scilicet semen, quod venit de loco alio. Et quod est istud? Istud est Rex Messias.*¹³³

¹³¹ Mather's annotation is extracted from Simon Patrick's *Commentary* (1:27–28), on Gen. 4:19. John Selden's explanation is more practical, arguing that men of wealth and power could afford more wives than one (*De Jure Naturali & Gentium*, lib. 5, cap. 6, pp. 561–64). See Appendix B.

¹³² The same multiplication table appears in Mather's commentary on Gen. 4:16. Since Mather kept adding annotations to his "BA" volumes for more than thirty years, such repetitions are not surprising.

¹³³ The commentary of the Palestinian scholar R. Tanchuma bar Abba appears in Midrash

513.

Q. Why did *Seth* call his Son, *Enosh*? v. 26.

A. *Enosh*, is as much as to say, *Sorrowful, Afflicted, Miserable*. And *Seth* would have his Son, so to account himself, on the Occasion which is here mentioned. Our Translation runs, *Then began Men to call upon the Name of the Lord*. But some very great Interpreters do choose thus to Translate it, *Then began Corruption in calling on the Name of the Lord*. So *Tremelius* among others, *Tum ceptum est profanari, in Invocando Nomine Jehovah*.¹³⁴

570. And some think, that, *Noah* [2. Pet. 2.5.] is called, *The Eighth*, in reference to these Times; Namely, *The Eighth*, in Succession from *Enosh*, in whose Times the World began to bee *profane*.¹³⁵

Tis very certain, that *Noah* comes in the *Eighth Generation*, from the Time when there was a Distinction made between the *Children of God*, and the *Children of Men*, in the corrupted World; quickly after which Distinction, there followed a Confusion which continued until the *Flood*.

The Patience of God, waited, after the Denunciation of the *Flood*, 120 Years, for the Reformation of the *World*; which was an *Eighth Part* of 960 Years, that had hitherto been, within a *Decad* of Years, the utmost Age of Man.¹³⁶

Rabbah (Gen. XXIII:5). The Latin citation reads, "That seed, of course, which would arise from another source. And who is that? That is the King Messiah."

134 Mather here enters the fray over conflicting translations of Gen. 4:26. Beginning with "Our Translation," he first offers the standard reading from the King James Version (1611), but mentions the disagreement among many interpreters of note. This disagreement is hinted at in the alternate translation in the margin of the KJV: "to call themselves by the Name of the Lord." In fact, the major Jewish interpreters read Gen. 4:26 as suggesting that widespread corruption or profanation of God's name through idolatry began in the days of Enosh (Targum Onkelos, Targum Jonathan, Rashi, Maimonides, Ibn Ezra). Mather says as much by offering this alternative reading in a Latin quotation from Immanuel Tremellius's annotation, which translates literally: "then was it begun to profane in calling the name of Jehovah"; i.e., "then was God's name profaned." Curiously, Mather's reference to Tremellius seems erroneous, because his own copy of Tremellius's *Testamenti Veteris Biblia Sacra* (1596) renders the phrase in v. 26 "tunc coeptum est invocari nomen Jehovah" ("then was it begun to call [on] the name of Jehovah"; i.e., "then men began to pray to God"). In his annotations to this verse, Tremellius first suggests several allegorical interpretations and then defends his own Latin rendition against the Jewish interpreters by enlisting both Martin Luther and Ibn Ezra; the former offering a Christological reading, the latter allowing for two alternatives: that men began to pray or that men began to profane God's name by introducing idolatry into the world. See Tremellius, on Gen. 4:26, in *Testamenti Veteris Biblia Sacra* (note 51); *Lectures on Genesis*, in *Luther's Works* (1:326); Ibn Ezra's *Commentary: Genesis* (1:89); Maimonides's *Avodat Kochavim* (1.1) in *Mishneh Torah* (3:14). The seventeenth-century debate about the rise of idolatry is superbly reviewed in F. Schmidt, "Polytheisms" (9–11).

135 Both Johann Heinrich Hottinger, in *Smegma Orientale* (lib. 1, cap. 8, pp. 251–52), and Henry Hammond, in *Paraphrase, and Annotations Upon all the Books of the New Testament* (815), are among those who explain this apparent contradiction (2 Pet. 2:5) by counting the line of succession from Enosh rather than Adam.

136 According to James Ussher, God allowed Noah 120 years to proclaim the coming of the

And when the Lord had staid thus, till *Eight Generations* had passed, Hee brought the Flood, from whence but *Eight Persons* escaped.

[158v] |
1972.

Q. Look back again, upon the Affayr of *Cain* and *Abel*, and see whether no happy Conjecture may bee made upon it, for the Illustration thereof? v. 26.

A. I am thinking, What if the *Sacrifices* of the Two Brethren, were for a *Special Trial*, which of them the Lord would choose, for the Man, in whose Family the *Blessed Line* should bee continued, and the *Blessed Seed* produced? [Compare, Num. 16.6, 7.]

Cains Complaint of being *Hid from the Face of the Lord*, which is the Name of the *Messiah*, seems to point out such a Thing unto us. And many other Passages in what occur'd on this Occasion, have a notable *Key* afforded 'em in this Conjecture.

The Apostle *John*, comparing the Rejected Jewes, persecuting the Faithful which were blessed with the Knowledge and Favour of the True *Messiah*, unto *Cain* persecuting of *Abel*, may bee curiously Illustrated from this Remark.¹³⁷

If you object, That *Abel* himself, did by his *Immature Death* lose the Priviledge, of having the *Messiah* of his Family; I answer, That the Words of *Eve*, upon the Birth of *Seth*, do intimate that hee coming in the Room of *Abel*, his Family was legally to bee reckoned *Abels*. You know, there was a Law in *Israel* afterward, that made the Next Brother, to be *legally the same*, with the Brother which died Issue-less.¹³⁸ That Law, was ordained with a special Eye to the *Line* of the *Messiah*. And methinks, it appears begun in the Surrogation of *Seth* to *Abel*.

655.

Q. A little more of the Traditions, that *Pagan* Antiquitie, gives us concerning the Ante-diluvian Times of the World? v. 26.

A. The Translation of *Enoch* (and afterwards, of *Elias*) gave Occasion to the Stories of their *Heroes* being Translated; and of *Astræa*, with others ascending alive in Heaven, where they were turned into Stars: Perhaps also, the *Apotheosis*, among the Gentiles may bee founded here.¹³⁹

Flood in A.M. 1536 or 2469 BCE. Jared (the sixth from Adam) and Methuselah (the eighth from Adam) died when they were respectively 962 and 969 years old (*Annals* 3).

¹³⁷ Mather alludes to 1 John 3:12.

¹³⁸ See Deut. 25:2, 6.

¹³⁹ This and the three subsequent paragraphs are excerpted from John Edwards's *Discourse* (1:117–18, ch. 3, § 4). Both Enoch and Elías (Elijah) were translated into heaven without incurring death (Gen. 5:24, 2 Kings 2:1, 11). The apotheoses of Greek heroes are well known and can be found in Hesiod's *Theogonia* and elsewhere. The goddess Astræa (Astraia), daughter of Astraios (Titan), was the last of the gods to leave the earth in the Age of Iron and ascended to the heavens where she became the constellation Virgo. When giants attacked the throne of

Moreover, *Josephus* tells us, *All that have committed unto Writing, the Antiquities, either of the Greeks or Barbarians, attest the Longævitie of the Men before the Flood.* Hee adds, “*Manetho the Egyptian Writer, Berosus the Chaldean, Mochus, Hestiaus, Jerom the Egyptian, who have treated of the Egyptian affayrs, agree with us, in this. Also Hesiod, with Hecataeus, Hellanicus, and Acusilaus, Ephorus and Nicolas, tell us, that those People of old, lived a thousand Years.*”¹⁴⁰

The Greek and Latin Poets likewise relate, that there were *Giants*, in the first Times of the World.

And from what is said, in Gen. 6.4. *The sons of God, came in unto the Daughters of Men*, arose the Fiction of *Orpheus, Hesiod, & other Greek Poets*, that their *Heroes* were partly the race of the Gods; and that the *Giants* were the Sons of Heaven & Earth.¹⁴¹

An Illustration, upon Gen. 4.26. See in our Illustration upon, 2. Pet. 2.5.¹⁴²

heaven, Saturn (Zeus) struck them down (Ovid, *Metamorphoses* 1.149–76). See also Stephanus Byzantius (139.10–11ff).

¹⁴⁰ The excerpt from Josephus Flavius (*Antiquity* 1.3.9) appears in Edwards (*Discourse* 1:117, § 4). Nehemiah Grew relies on the same material, in *Cosmologia Sacra* (bk. 4, ch. 2, § 8, p. 145, and ch. 4, § 6, p. 185). According to Josephus, the antediluvians lived much longer lives because they were more virtuous, chronologically closer to Adam, and ate wholesome food. Moreover, God prolonged their lives because of “the good use they made of it in astronomical and geometrical discoveries” (*Antiquities* 1.3.9). Their longevity is also attested to in Manetho’s *Aegyptiaca* (Epitome), *Fragm. 3*; Berosus is not far behind his Egyptian colleague and lists the long lifespan of several ancient rulers (*Babylonika* 2, *Fragm. F3, F4a*). The Phoenician Mochus (who taught the creation of heaven and earth from a cosmic egg); Hestiaeus (Hestiaios) of Perinth, student of Plato; Jerome (Hieronymus the Egyptian), the author of *The Archaeology of Phoenicia* (Eusebius’s *Praeparatio evangelica* 9.11.414b–c; 9.13.415d) – all confirm the longevity of the antediluvians as related in the Hebrew Scriptures. Likewise Hesiod (*Opera et Dies* 109–201) euphemistically mentions the long lives of the ancients during the Golden and Silver Ages of man. Hecataeus of Miletus, Hellanicus of Mytilene (5th c. BCE), Acusilaus of Argos (5th c. BCE), Ephorus of Kyme (4th c. BCE), and finally, Nicolas (Nicolaus) Damascenus – all Greek historians or mythographers – point to the long duration of the lives of man in the first age. Like Josephus long before him, Mather points to the similarities between pagan and OT history to uphold the trustworthiness of the Mosaic account.

¹⁴¹ Orpheus (*Orphica, Hymni* 32.12; *Argonautica* 429, 516), Hesiod (*Theogonia* 50–52), Homer (*Odyssey* 9.526–31). Philo Judaeus devotes a whole tract to the subject (*De gigantibus*); Eusebius (*Praeparatio evangelica* 9.17.418c) cites an extant fragment of Eupolemus from Alexander Polyhistor’s *Of the Jews*, as evidence that Babel was founded by survivors of the Flood, “and that they were giants, and built the tower renowned in history.” Finally, the Abbé Antoine Banier (1673–1741) summarizes the ancient and modern debates about the fabled race of giants (dinosaur bones and all) in his *Mythology and Fables of the Ancients* (vol. 2, bk. 1, ch. 1, art. 3, pp. 192–209). For Mather’s belief in giants in America, see his commentary on “BA,” Gen. 6:4 (below), and D. Levin’s “Giants.”

¹⁴² Mather’s illustration upon 2 Pet. 2:5 (“BA”) reads as follows:

Q. Hee saved Noah the Eighth Person, a Preacher of Righteousness: Why is Noah called, *The Eighth Person*? v. 5.

A. Hee is not called so, but, *The Eighth Preacher*. Here is an Evidence contributed unto the Act of Divine Justice, in Drowning the *Old World*. Tho’ *Eight eminent Preachers of Righteousness*

had been employ'd in order to promote a Reformation among them, yet they neglected them all, and entertained their Advice with Derision. These *Eight* were *Enos, Cainan, Mahaleel, Jared, Enoch, Mathusalah, Lamech, Noah*.

Wee reckon *Enos* the first of these, because wee read, [for so wee may read it,] *Then Preaching began in the Name of the Lord*. [Gen. 4.26] The Word /קרא/ may very well admitt of this Interpretation. [See Jon. 3.2] It hath a plain Affinity, with the *Chaldee* /כרין/ from whence, κηρυξ, *A Preacher*, is derived. And it is in the LXX expressed by κηρυττειν. [Gen. 41.43, Exod. 32.5, Prov. 8.1.] Indeed, that which our Translation ascribes to Men in general, the Greek and Latin assigns to *Enos* only; *Then Enos began to preach in the Name of the Lord*; namely, concerning the Desolation that would come upon the World, except Repentance prevented it.

But if we understand, *The Eighth*, here to mean, *The Eighth Person*, it must mean, *The Eighth* of them that were saved from the Flood. So *Plutarch* saies of *Pelopidas*, That he came, εις οσκααν δωδεκατος, *Unto his House, The Twelfth*; that is with Eleven more. And *Polybius* of *Dionesidorus*, That, τριτος απενηξατο, *He swam out the Third*; that is, with Two more. This we know, The Hill where the *Ark* rested, is called, *The Hill of the Eight*, or, *Themanius: And the Village by it; bears the same Name*.

853.

Q. What is there observable, in the Condition of the *Three* first Patriarchs, that went out of the World? v. 1.

A. There are but *Three* Wayes, wherein the Lord will fetch out of the World, all that come into it. A *Death Violent*, a *Death Natural*, and, a *Translation*; And this *Last Way* is the *Last*, that is to bee common in the Condition of the Saints; It will bee so in the *Last Age*, which will bee the *Sabbatism* of the World. Now, tis Remarkable, that the *Three first* Patriarchs, who left the World, exemplified these *Three Wayes* of going away. The First, was *Abel*, who Dy'd a *Violent Death*; The Second was *Adam*, who Dy'd a *Natural Death*; The Third was *Enoch*, the *Seventh* Patriarch, who was *Translated*.¹

1809.

Q. Of *Seth* tis said, *Adam begat a Son in his own Likeness, after his Image*. Why is not this as well said of *Cain*, and of *Abel*? v. 3.

A. It was as *true* of *Cain*, as *true* of *Abel*: But *Abel* was to Dye without Issue, and *Cain's* Issue was all Drown'd in the Flood. All the race of Mankind, continued in the World, are the Children of *Seth*. Now, to mind *us*, of that *Evil Image*, which in *Original Sin* is come upon us, the *Image* of our Father *Seth* is particularly Declar'd unto us.²

399.

Q. The Years of the Antediluvian *Patriarchs*, were they *Solar* ones, or only *Lunar* ones? v. 3.

A. The gradual Decrease of Humane Age, till *Jacobs*, or *Davids* Time, ha's been observed, not only in Sacred Writings, but also in Profane Ones;³

That the Years of Mens Ages, mentioned in the Scriptures, were alwayes of the same Sort, is evident from the Impossibility of setting the *Period*, where the supposed Account should bee changed. Will you have *Moses* but Six Years old at his going to deliver *Israel*; and *Jacob* no more than Ten, when hee went into

¹ In his *Threefold Paradise* (272–73), Mather describes the successive translation of the Changed Saints. For Abel's violent death, see Gen. 4:8; for Adam's natural death, Gen. 5:5; for Enoch's translation, Gen. 5:24.

² In his "Note Book of Authors and Texts Throughout the Bible" (1720), Mather identifies his source as "Burgess of Original Sin, p. 110." Mather refers to *The Doctrine of Original Sin Asserted* (1659), pt. 2, ch. 8, pp. 110–11, by Anthony Burgess (d. 1664), a nonconformist divine, vicar of Sutton Coldfield (Warwickshire), and member of the Westminster Assembly (ODNB).

³ See Appendix A.

Egypt, with Seventy of his Offspring? So some of the Antediluvians, particularly *Mahaleel* and *Enoch*, must be little more than five Years old, when they Begat Sons & Daughters. Only, the true State of things in the *Antediluvian World*, ha's not been yett enough considered; for which Cause, I suspect, the Comparison between Ages Then, and Now, ha's not been exactly Instituted. Perhaps, you may shortly hear more of it. In the mean time, I'll tell you one pleasant Observation, I have seen made, on the Ages of the Patriarchs, That those *lived longest* who *married latest*; such as *Jared*, & *Methuselah*. This Observation, is indeed more pleasant than solid; For the *Patriarchs* might be married, long before they had Children; and besides, *Lamech* who begat *Noah* at an *hundred & eighty two*, dyed yett at *Seven hundred Seventy Seven*. It is also a Reflection made by some, That tho' *Methuselah* saw *most Years* of any among the Patriarchs, yett hee was not really the *Oldest Man* among them. For, granting that *Adam* was created at the full State of Manhood, which must be *Sixty* at least, you shall add this to his *Nine-hundred & thirty Years*, which hee actually lived, and hee was Twenty one Years older than *Methuselah*.⁴

3356:

Q. But ha's there nothing been offered in our Time, to confirm the great Age of the *Ante-diluvian Patriarchs*? v. 3.

A. *Josephus* entertains us, with the Testimonies of the ancient both *Græcian* and *Barbarian* Philosophers, concurring, *That Men lived anciently a Thousand Years*.

The Strength of their Constitution & their better Diet, & the Vigour of the Earth producing better Fruits, before the Flood; the better Temper of the Air,

⁴ The longevity of the biblical patriarchs created something of a headache to seventeenth-century biblical commentators and physico-theologians alike. Mather here upholds the letter of the Bible by insisting that the age of the patriarchs was measured in solar years of 365 days each and not in lunar years of 28 days. For if the ages of Mahalaleel, who fathered Jared at 165 (LXX Gen. 5:15), and of Enoch, who fathered Methuselah also at 165 (LXX Gen. 5:21), were measured in lunar years, then they both would have been barely six years of age at the time of their paternity. Significantly, Mather here elects to follow the chronology of the LXX, rather than that of the KJV, for the latter sets the age of their paternity at 65, not at 165 years. Mather had previously visited the issue of longevity in his commentary on Gen. 4:26 (above) and would again – reaching at times opposite conclusions – in his commentary on Gen. 5:32 (below) simply because his entries were made over a long period of time and frequently reflect the tenor of the specific sources he used for each entry at the time. Matthew Poole (*Works* 1:290–91) identifies some of the principal combatants on the issue of the patriarchs' longevity: the Flemish Jesuit Jacobus Bonfrerius (1573–1642), the Dutch RC professor of divinity at Douai Gulielmus Estius (1542–1631), the Flemish Jesuit Jacobus Tirinus (1580–1636), the Franciscan Nicholas de Lyra (c. 1270–1340), the learned Italian Jesuit Giovanni Steffano Menochius (1576–1655), and the Dutch Jesuit Professor of Hebrew at Louvain and Rome Cornelius à Lapide (1566–1637). They debated whether the patriarchs' lifespans are to be measured in months, or Egyptian years of thirty days, or Arabian years of six months each – most maintaining literal years of 365 days.

& the greater Temperance of the People; but above all, the Providence of God, which had special Designs in it; All contributed unto this Longævity.

In *Bacon*, and *Bartholin*, and others we find many Instances of a great Longævity, in Times nearer to ourselves, than those of *Pliny*, who also mentions diverse Instances. But there is hardly one more notable, than that which *Gassendus* relates, in the Life of *Peireskius*; That in the Year 1636. a Man then in *Persia*, known to several Persons worthy of Credit, was *Four Hundred Years* old; *Idque ipsis omninò esse exploratum, atque indubium.*⁵

[▽160v]

Q. Upon *Enoch's* begetting of *Methuselah*? v. 21.

A. Some have had a Note of this Importance; A *Short Life* spent in a *Walk with God*, will begett the *Longest Life*; even *Everlasting Life*.⁶

[△Insert ends]

[△]

5 The three paragraphs are extracted from Simon Patrick's annotations on Gen. 5:5 (*Commentary* 1:30). Flavius Josephus's testimony appears in *Antiquities* (1.3.9) and in Eusebius's *Præparatio evangelica* (9.13.415d), where Josephus explains that the longevity of the ancients was a result of better food, their greater virtue and perfection, and their knowledge of "astronomy and geometry," which they would not have been able to develop "had they not lived at least sixhundred years." In fact, none less than the Egyptian, Chaldean, and the Phœnician historians, followed by the ancient Greeks, assert, "that the ancients lived a thousand years." Be that as it may, Josephus cautioned, "let every one look upon them as he thinks fit" (*Antiquities* 1.3.9). Pliny (7.48–49.153–64), Josephus's Roman contemporary, also marvels at the longevity of many ancients and moderns. In his medical treatise *Historia vitæ et mortis* (1622–23), Sir Francis Bacon (1561–1626) goes beyond the standard explanation: the lifespan of the postdiluvians was not shortened because of God's punishment for their sins, but because of such other factors as a change in diet, declining air quality, and poorer living conditions that contributed to their loss of longevity. See especially Bacon's *Historie of Life and Death* (1638), art. 5–9, "The Length and Shortness of Mans Life" (73–130). The Swedish-Danish mathematician and anatomist Thomas Bartholinus (1616–80), best known for his analysis of the lymphatics and their function, mentions several cases of persons who were as old as 115 and 120 years, in his *Historiarum anatomicarum et medicarum* (1661), Centuria V, vol. 3, capito: historia xxviii, pp. 46–51. A copy of this edition is in Mather's library now at the AAS (Tuttle, "Libraries," 316). The French mathematician and philosopher Pierre Gassendi (1592–1655) tells the following apocryphal story in *The Mirrour of True Nobility & Gentility* (1657): Lord Peireskius (Nicolaus Claudius Fabricius), senator of Aix-en Provence, validates the tale that "having information from Alepo [sic], by the Letters of *Peter* and *John Constantine*, that there was a man in *Persia*, known to the *Capucines*, and other credible persons, who was now four hundred years old: of the verity whereof, they were undoubtedly satisfied" (bk. 5, pp. 139–40, "for 1636"). Simon Patrick, who also furnishes Mather with the Latin quotation, supplies his own translation, but here omitted by Mather: "And the Persons that wrote this, were fully assured of the undoubted Truth of it" (*Commentary* 1:30).

6 Verse 21 is silently substituted for Mather's erroneous "v. 25." Mather's punning annotation may suggest the following: According to Gen. 5:21–24, Enoch was 65 years old (165 in the LXX) when he fathered Methuselah and "walked with God" for 300 years before being translated into eternal life. At the same time, since his son Methuselah lived for 969 years, longer than any other biblical hero (Gen. 5:27), Enoch also begat "the *Longest Life*."

364.

Q. I suppose you reckon *Enoch*, a notable *Type* of our Lord Jesus Christ; Lett mee know *Wherefore?* and *Wherein* you so reckon Him? v. 24.

A. I have newly shown you *Adam*, as a *Type*; and [on Joh. 10.15.] *Abel*, as a *Type*, of our Lord. Hereafter, do you remember to ask, after the *Type*, whether it bee a *Personal Type*, or a *Real Type*, when the History of the Typical *Man*, or *Thing* occurs; *that* will bee the fittest Place for mee to display the *Mystery*.⁷

*Here then, for Enoch.*⁸

First, *Enoch* signifies, a *Dedicated*, a *Consecrated* Man. Such a *Man*, was that Man, who is *God* as well as Man. Hee is called, in Luc. 1.35. *That Holy thing. Holiness* properly lies in *Devotion to God*. [Consider, Isa. 49.5. spoken *by* our Lord; and Isa. 42.1. spoken *of* Him.]

Again; Of *Enoch*, tis testify'd, in Gen. 5.22. *Hee walked with God*; his Life was fill'd with Acts of Respect, & Homage to the Lord. *Langius* gives us a noble Paraphrase on it. It is, *Deum habere et agnoscere praesentissimum, eumque imitare, et cum eo familiariter, iubinè et Sancte versari*.⁹ Such was the whole *Walk* of our Lord Jesus *Christ*, in the World; Hee was *Thinking* on God, ever *Speaking* of God, always *Doing* for Him. [See Act. 10.38.]

Further; Tis said of *Enoch*, in Jude. 14. *Hee prophesied*. But it is our Lord Jesus Christ, who is the glorious *Prophet* of His Church. [Tis to bee confessed, as in Joh. 3.3.] Hee *Reveals* divine Objects to us. [Joh. 15.15.] And Hee *Instructs* and *Strengthens* us to *Discern* what Hee Reveals. [1. Joh. 5.20.]

[160v] | Yett more; What was the Prophe{c}y of *Enoch*? It was a Warning about the *Day of Judgment*. And, this was the Prophecy of *Jesus* too. There was hardly any one Article more Inculcated in the Sermons of our Lord.¹⁰

Moreover. The Years of *Enoch*, were as many as the Dayes, wherein the *Sun* performs its Annual Revolution; they are cast up, in Gen. 5.23. *Three hundred & sixty five Years*. His Son was the longest Liver, & himself the shortest Liver,

7 In his "Note Book of Authors" (Gen. 5:24), Mather identifies as his source "Franzius Interp. p. 228." This is probably *De Interpretatione de S. Scripturarum maxime legitima* (1619), by Wolfgang Franzius (1564–1628), professor of theology at the Lutheran University of Wittenberg. However, Samuel Mather's *Figures or Types of the Old Testament* (1683) seems to have assisted his Boston nephew as well. In his third sermon (Rom. 5:14), Samuel Mather distinguishes between *Personal Types* (Adam, Enoch, Noah) and *Real Types* (the Temple, Noah's ark, or sacrifices), but warns that no matter how holy, these men or things were but "partial Types" and "Shadows." Their analogical relationship is such that "the *Antitype* excels the *Type*" (81–82). See also Edward Taylor's *Upon the Types of the OT* (1689) 1:33–59, 341–74, 409–36; 2:627–48. Helpful analyses of Samuel Mather's *Figures or Types* and of Puritan typology in general are provided in Brumm (*American Thought*, ch. 4), Lowance (*Language*, ch. 4), and Korshin (*Typologies*).

8 See Samuel Mather's *Figures or Types* (86–87)

9 Joachim Langius's paraphrase, most likely from his previously cited *Causa Dei*, can be rendered, "To have and discern God very close by, and to imitate him, and to dwell with him in familiarity, prayer, and holiness."

10 According to Jude 1:14, Christ will "come with ten thousands of his saints."

in the Catalogue of the Antediluvian Patriarchs. But the Eternity of the Lord Jesus Christ had a Blessed Emblem in the Age of that worthy Man. What are the *Dayes of the Sun*? They are *Three hundred & sixty five*, over & over again; tis quæstionable whether the *Sun* shall not shine, with such successive Revolutions, throughout Eternal Ages; tho' some fear its Extinction in its *Maculæ*.¹¹ However, such are to bee the *Dayes* of our Lord Jesus Christ. Tis expressly enough declared; in Psal. 72.17. *His Name shall endure forever, His Name shall bee continued, as the Sun; & Men shall bee Blessed in Him*. Sooner shall wee bee without the *Sun* in the Firmament, than without that *Sun of Righteousness*.

Finally, consider the strange Account wee have of *Enoch*; [in Gen. 5.24. explained, in Heb. 11.5.] Some have made this Remark by the way; *Enoch* walked with God, & pleased Him, and it followes, *He was not*; A Man who walks in the Way of God, must resolve to be of *none Account* in an evil World. Such must be the Lords *Hidden Ones*. But there is more than this intended. Hee was a Minister much Noted & Famous, in the World; & one whom the Eyes of all Men, were much fixed upon. The *Angels* of God, at length took him away, *Spirit* and *Body*; and carried him into the Immediate Enjoyment of Cœlestial Glories. No doubt, there was much Enquiry made, *what was become of this admirable Man*? But the Lord gave them to see; That as the *Faith* of *Abel* had caused his Death, so the *Faith* of *Enoch* had conquered his Death. Thus hee became, as *Tertullian* speaks, *A Candidate of Eternity*.¹² In like Manner our Lord is *Translated & Ascended* into Heaven. Hee heard a *great Voice* from Heaven, say to Him, *Come up hither!* At last Hee took His Flight, from the Top of Mount *Olivet*, in the Sight of many People, guarded with Holy Angels. If a Jew now ask us, *Where is your crucify'd God?* wee may reply from Eph. 4.10. *Hee is Ascended up, far above all Heavens*.

3387.

Q. A further Touch, upon the Design & Manner of *Enoch's* Translation? v. 25.

A. The Design of Heaven seems, to support and comfort the Godly, in their State of Mortality, with the Hope of a better Life in another World: And this the

¹¹ The Italian mathematician and scientist Galileo Galilei (1564–1642) discovered that spots (*maculae*) frequently appear on the surface of the sun, blemishes that he attributed to the increasing or decreasing density of the sun's atmosphere. He published his findings in *Istoria e Dimostrazioni intorno alle Macchie Solari e loro accidenti* (1613); i.e., *History and Demonstrations Concerning Sunspots and Their Properties*. While this phenomenon – though well known throughout the ages – led the German mathematician Christoph Scheiner (1573–1650) to postulate that these sunspots are merely the shadows of the sun's own satellites, the English mathematician Robert Hooke followed Galileo's conclusion and argued that the sun's light (as well as that of the stars) diminishes over time as the surface matter burns itself out, in "Lectures on Light" (sec. 2), in *Posthumous Works* (89–95). Mather seems to favor Isaac Newton's conjecture that the sun conserves its own energy through re-absorption notwithstanding the "*Maculae Solares*" (*Opticks*, bk. 3, pt. 1, quest. 11, pp. 343–44). See Mather's discussion "Essay IV: Of the Sun," in *Christian Philosopher* (35–42).

¹² Or, "*Æternitatis candidatus*," in Tertullian's *An Answer to the Jews* (ch. 2), in *ANF* (3:153).

rather, in that *Adam* the Father of them all, had now been Dead, not threescore Years. (Observe, by the way, *Adam* had not the Consolation of seeing this.) And it is not improbable, That *Enoch* was Translated in some such visible Manner, as *Elijah* was afterwards, perhaps, with a glorious Appearance of the *Shechinah*, from whence were sent some Heavenly Ministers to fetch him up.¹³

265:

Q. Find you any other *Types* of our Lord, besides *Enoch*, among the Antediluvian Patriarchs? v. 25.

A. Yes; As *Enoch the Seventh from Adam*, was a Type of the *Second Adam*, so why not *Seth* likewise, the *Second from Adam*? The Name of *Seth*, signifies a *Foundation*; the Lord Jesus Christ, is the only *Foundation* for His Church, or our Souls; wee are to build upon this Rock. And what will you say of *Methuselah*? The Name signifies, *Hee sent his Death*; his Father thus prophesied the *Death*, which God would *send* upon the World, within a Year, after his Decease. In like Manner, if wee look upon our Lord Jesus Christ, wee may see & say; *God sent His Death*. *Death* was threatned unto sinful Man; Man with Comfort may now behold our Dying Lord, make this Reflection, *God hath sent His Death*; so wee may hope to escape it forever.¹⁴

Q. When *Lamech* saies of *Noah*, *This same shall give us Rest*, hee seems to have some Notions of the *Great Sabbatism* in his Mind; This makes mee Inquisitive after any Characters of *Sabbatism* to bee found peculiar in him? v. 29.

A. *Lamech* was all made up of *Septenaries*, or, the Number of *Sabbatism*. As *Enoch*, who was translated, was the Seventh from *Adam*, so *Lamech* was the Seventh, who left the World after *Enoch*, & the Seventh who dyed after *Adam*, having lived *Seven-hundred, & Seventy Seven Years*!¹⁵

Q. A Remark on *Lamechs* Expectation? v. 29.

¹³ Extracted (almost verbatim) from Simon Patrick's annotation on Gen. 5:24 (*Commentary* 1:31–32). The translation of the Prophet Elijah in a whirlwind is related in 2 Kings 2:1, 11.

¹⁴ The third son of Adam, "Seth" [שֵׁט] signifies "compensation" [Strong's # 8352] for the loss of Abel. However, R. Shemaiah argues that Seth was so called "because on him was founded (*bushtath*) the world" (Midrash Rabbah: Num. XIV:12). Likewise, since through Seth was to come the line of David leading to the Christ (Luke 3:23–38), Seth may also be a type of the messiah and his Church. See also Patrick's annotation on Gen. 5:21 (*Commentary* 1:31). According to Samuel Bochart's *Geographia Sacra* (pars 1, lib. 2, cap. 13, col. 88–89), the name "Methuselah" signifies as much as "he dies" and "the sending forth of Water" (Job. 5:10), hence "when he is dead, [then] shall ensue an emission or inundation of Waters" (Noah's Flood).

¹⁵ Verse 29 is substituted for Mather's erroneous "v. 28." The "*Great Sabbatism*" of God's rest after the six creative days, but also during Christ's millennial reign, is a major concern in Mather's later eschatology (*Threefold Paradise* 268–94). According to Gen. 5:31, Lamech was 777 years old when he died.

A. M. *Jurieu* observes, that it may rather be read, *Because of the Ground which the Lord shall curse*. And that he did not reflect so much on the first Malediction after the Fall, as on the Flood which the Earth was now going to be *cursed* withal.¹⁶

142.

Q. What was the Occasion, of *Lamechs* putting the Name of *Noah*, upon his Son, with such Expectation of *Consolation* from him? v. 29.

A. None of all the Reasons commonly assigned, for this *Onomathesie*, are to mee fully satisfactory. But at last, I acquiesce in this; That *Lamech* mistook his *Noah* for the promised *Messiah*, the only Comforter, Saviour and Redeemer of the World. For that Removal of the *Curse*, which was then, & still is expected, from the *Messias* alone, is here ascribed unto *Noah*.¹⁷

[161r]

Q. Some Remarks on the Expectation of *Lamech*, about his *Noah*; *This same shall comfort us concerning our Work & Toil of our hands, because of the Ground which the Lord hath cursed?* v. 29.

A. We will be beholden to Dr. *Thomas Sherlock*, for some of his Thoughts upon it.¹⁸

It is plain, that the *Curse upon the Ground* subsisted in its Rigour, to the Days of *Lamech*; and the *Work & the Toil* necessary to raise from the Ground a sufficient Support was a very Irksome & Grievous *Burden*.

It is plain, that there was among those who had not quite *forgotten* GOD, an Expectation of a Deliverance from the *Curse* of the Fall.

¹⁶ Mather's annotation is from Pierre Jurieu's *Critical History* (vol. 1, part 1, ch. 4, p. 34).

¹⁷ This cryptic comment refers to the following debate: According to Rabbi Johanan, the interpretation of Noah's name in Gen. 5:29 ("This same shall comfort us") neither agrees with its onomastical signification ("This same shall give us rest"), nor the onomastical signification with Noah's name (Midrash Rabbah: Gen. XXV:2). Although agreeing with R. Johanan, Rashi and Ibn Ezra (*Commentary* 1:92) reconcile the disagreement between meaning and linguistic form by suggesting that *Noah* signifies both "rest" and "comfort." As the inventor of agriculture, Noah introduced plowshares thus giving man "rest" and "comfort" from the toils of working the postlapsarian soil without adequate tools (*Mikraoth Gedoloth: Genesis* 1:80–81). In the seventeenth century, Hugo Grotius also points at the inadequacy of an etymological interpretation of Noah's name, but does not offer a solution in his famous *Annotationes ad Vetus Testamentum* on Gen. 5:29 (*Opera Omnia Theologica* 1:8). John Lightfoot's explanation that Noah's name signifies "comforter" because man was now allowed "to eat flesh," in *A Few, and New Observations* (1642) 8, would not have been to Mather's liking either. Giovanni Stefano Menochius, in his *Commentarii totius Sacrae Scripturae* (1755 ed.) 23, was evidently the first Christian exegete to offer the onomastical explication that "Noah" signifies "rest" and "comforter" because the messiah would be born through him. Matthew Poole synthesizes the whole debate in his invaluable *Synopsis Criticorum* (1:70–71) and in *Works* (1:297–98). Finally, see also Simon Patrick's annotations on Gen. 5:29 (*Commentary* 1:32) for many of the same issues.

¹⁸ The following material [161r–163r] is extracted from Dr. Thomas Sherlock's *Use and Intent* (Disc. IV, pp. 79–104).

It is plain, that the Expectation was not of a *Sudden Deliverance*, immediately to be accomplished; nor that it should be *all at once* from the whole *Curse* of the Fall. *Lamech* who so well remembred the *Curse* on the *Ground*, could not be unmindful of the *Greater Curse* upon *Man*; *To Dust thou shalt return*. And yett from this Part of the *Curse* he gives no Hope of Deliverance. *Noah* was not the Seed who should *bring Life & Immortality to Light*; He should only save them from *the Work & the Toil of their Hands*. The Hope of Deliverance from the *Greater Curse* he leaves to stand, as it had hitherto been, upon the Faith of the *First Prophecy*. This Notion of a *Gradual Deliverance* is countenanced by our Apostle, when he says, *The LAST ENEMY that shall be destroy'd is DEATH*.¹⁹

Accordingly, this Prophecy of *Lamech* ha's been verified in the Event; and the *Earth* ha's been very much restored from the *Curse* laid on it at the Fall, and enjoys the Effect of the *Blessing* which *Noah* received from the Lord. Men may fancy they see an Alteration for the Worse in every Age, and Nature may seem to them almost worn out, & less able now to provide for her Children than formerly. We meet with many Reflexions of this Kind, in grave Authors; and so, *Cyprian* particularly complains, that things were grown sensibly worse, within the Compass of his own Time, and the Seasons of the Year were not so Pleasant, & the Fruits of the Earth not so Delightful & Refreshing, as he remembred them.²⁰ This Prejudice has yett a further Support, from the Tradition of the *Golden Age*, wherein Peace & Plenty & Vertue reigned; which the old Writers that celebrate, be sure annex heavy Complaints of the *Iron Age*, in which they lived themselves. These Gentlemen lived at such a Distance from the Flood, that they might well call the Times that came soon after the Flood, by the Name of *Ancient Times*. They had no Pretence to know, how Men lived before. They might have some obscure Tradition of the *Paradisiacal State*; but if they had, they confounded it with their *Golden Age*. Now the Ages next the *Flood* afforded sufficient Ground for this Tradition, without supposing any such succeeding Alterations in the State of the *Earth*, as have been imagined. The *Earth* was in a poor Condition indeed after the Flood, if it could not afford enough to answer the *Conveniencies* as well as the *Necessities*, of its few Inhabitants. And what Occasion was there for People to use *Fraud* and *Violence*, and *Extortion*, upon one another, when every Man had more than enough! Anon indeed, upon the Increase of Mankind, the *Earth* was divided in *Property*, & the Case was altered. This First Happy State continued Even to the Time of *Abraham*; when he &

¹⁹ Sherlock, *Use and Intent* (Disc. IV, pp. 79–81).

²⁰ In his "Address to Demetrianus" (*Treatise* 5.3), St. Cyprian rejects the charge of Proconsul Demetri(a)nus of Africa (3rd c. CE) by arguing that wars, famines, and plagues are not caused by the spread of Christianity, but by the aging process of the world: the world has grown old and effete with less rain falling in winter, the sun giving less heat in summer, less fruit growing throughout the seasons, and the earth's minerals and precious stones being nearly exhausted (*ANF* 5:458).

Lot were Strangers in the Land of *Canaan*, and yett had great Flocks & Herds, & a Plenty of all things. And when their Servants quarrelled about some *Conveniencies* in feeding of the Cattel, how does *Abraham* offer *Lot* his Choice, as if he were *Lord of the Soyl*? Some small Parts of the *Earth*, which lay near Towns, were then possessed in *Property*, as we learn from the *Purchase* which he made of a *Burying-place*. But he was no *Proprietor* of the Countrey, where he fed his Cattel; And yett he mett with no Disturbance.²¹

The *Jewish* Interpreters generally agree, to expound the Words of *Lamech*, as importing a Deliverance to be granted from the excessive Labour of Tillage, occasioned by the *Curse* on the Ground; and some of them suppose the Words to have a Regard unto the *Restoration* of the World, thro' *Noah* and his Offspring. But lett us follow the Guidance of the *Scripture*. The Prædiction of *Lamech* is before us. When GOD informs *Noah*, of His Purpose to Destroy the World, He adds, *But with thee will I establish my Covenant*. *Lamech* expects from the Promise of GOD, a *Deliverance* from the *Curse* of the *Earth*; and foresees that something of this *Deliverance* would come from the Son that is now born unto him. | When GOD threatens to *Destroy the Earth*, and complete the *Curse* He had laid upon it, He Remembers His *Covenant*, and Promises to *Noah* the Benefit of it. This *Covenant* must be the very Promise that *Lamech* foresaw would be made good unto *Noah*, and which is now with a New Promise convey'd unto him. It must refer to {the} *Covenant* then subsisting, and not one to be made afterwards. The *Flood* being over, GOD then declares, *I will not again curse the Ground any more for the Sake of Man*. In Consequence of this Discharge from the *Curse*, a *New Blessing* is immediately pronounced upon the *Earth*: *While the Earth remaineth, Seed-time & Harvest, and Cold and Heat, and Summer and Winter, and Day & Night shall not cease*. This is called, *A Covenant between GOD, and the Earth*; And, *A Covenant with Noah* and his Offspring, and with *every Living Creature, of the Fowl, of the Cattel, & of every Beast of the Field*. And it is with Respect unto this *Covenant*, that the Psalmist breaks forth into the Admiration of the Divine Goodness; Psal. XXXVI.5, 6. *Thy Mercy, O Lord, is in the Heavens, and thy Faithfulness reacheth unto the Clouds; Thy Righteousness is like the Great Mountains, thy Judgments a Great Deep; O Lord, Thou præservest Man & Beast*.²²

[162v]

21 Sherlock, *Use and Intent* (Disc. IV, pp. 81, 83, 84, 85, 86). For the Golden Age and its descent all the way down to the Iron Age, see Hesiod (*Opera et dies* 109–201) and Ovid (*Metamorphoses* 1.89–150). Abraham's acquisition of the cave in the field of Machpelah (near Hebron) as a burial place for Sarah (Gen. 23:9, 17) is generally believed to be the first recorded instance of a real-estate purchase.

22 Sherlock, *Use and Intent* (Disc. IV, pp. 88, 89, 90). Among the Jewish commentators who interpret the name of *Lamech*'s son *Noah* as "rest" and "comfort" from excessive labor or as the restoration of the world through *Noah*'s offspring are Ibn Ezra on Gen. 5:29 (*Commentary* 1:91–92) and Rashi, who quotes Midrash Tanchuma (1:61), Bereishis 11 (*Mikraoth Gedoloth: Genesis* 1:80). See also the various rabbinic interpretations in Midrash Rabbah (Gen. XXV:2;

When *Adam* was first formed, and placed on the *Earth*, he had several *Blessings* by his GOD conferred upon him, which by his Fall he forfeited. What shall we say, if we see these very *Blessings* restored unto *Noah*, and his Posterity, after the Flood? Lett us make the Comparison. To *Adam* and *Eve*, GOD said, *Be Fruitful, & Multiply, & Replenish the Earth*. To *Noah* and his Three Sons, He said, *Be Fruitful, & Multiply, & Replenish the Earth*. To our First Parent, GOD said, *Have Dominion over the Fish of the Sea, & over the Fowl of the Air, and over every Living Thing that moveth on the Earth*. To our other *Patriarch*, now GOD says, *The Fear of you, and the Dread of you, shall be upon every Beast of the Earth, & upon every Fowl of the Air, and upon all the Fishes of the Sea; Into your hand they are delivered*. Our First Parent had for *Food* granted unto him, *every Herb, — & every Tree*. Our other *Patriarch* has a larger Charter; *Every moving thing that liveth shall be Meat for you, even as the Green Herb I have given you all Things*. The *Blessing* on the *Earth* at the Creation, was; *Lett the Earth bring forth Grass, & Herb yielding Seed, and the Fruit Tree yielding Fruit after his kind, whose Seed is in itself upon the Earth*. After the Flood, the *Blessing* is, *while the Earth remaineth Seed-time and Harvest shall not cease*. In the Beginning, *The Lights in the Firmament* were to *Divide the Day from the Night, & be for Seasons & for Days and Years*. Now tis, *Cold and Heat, & Summer & Winter, & Day & Night shall not cease*. Which of the *First Blessings* is wanting in the *Second*? You may think, perhaps, that we see but little Effect of this *New Blessing*, and that the *Life* of Man still is full of *Work*, and of *Toil*, and he eats his Bread still with *Grief & Care*, and in the *Sweat of his Brow*, and the *Earth* still abounds with its *Thorns* and *Thistles*. But certainly, there were *Thorns* and *Thistles* before the Fall. And Man was made for *Business*; particularly, to Dress and Keep the *Garden*, which must call for *Labour*. Indeed after the Fall there was an *Increase of Labour*. And the Promise of *Regular Seasons* after the Flood, seems to intimate much *Irregularity* and *Confusion* before upon them. We may gather how it was, from the *Curse* upon Disobedient *Israel*: Lev. XXVI.19, 20. *I will make your Heaven as Iron, & your Earth as Brass, and your Strength shall be spent in vain; Your Land, shall not yeeld her Increase, neither shall the Trees of the Land yeeld their Fruit*.²³

We meet with frequent Allusions to this *Covenant* with *Noah*, in After-Times, & later Books, of Scripture. See Jer. XXXIII.20, 21, 25. See Isa. LIV.9. The LXV Psalm seems to be a Comment on the *Covenant* of GOD with *Noah*. It seems also to be with some reference to this *Covenant*, that the Psalmist appeals to GODs *Faithfulness in the Clouds*, and His *Mercy established in the Heavens*, and the *Moon*, and the *Faithful Witness in Heaven*. During the Age of this *Cov-*

XXVI:2, 6). God's covenant with Noah and his offspring is mentioned in Gen. 6:18; 9:10–15, his promise not to curse the earth again in Gen. 8:21–22.

²³ Sherlock, *Use and Intent* (Disc. IV, pp. 90, 91, 92, 93, 94). Although Sherlock identifies each of the biblical citations in this paragraph, Mather omits the specific references. They are paired in order of appearance: Gen. 1:22, 28; 8:17; 9:2–3; Gen. 1:11; 8:22; Gen. 1:14; 8:22.

enant, how notably does the Glorious GOD Reveal Himself, and how notably is He applied unto, with a Relation to this *Covenant*, and the Blessings of it! Compare, Job. V.8, 9, 10. And, Psal. CXLVII.7, 8, 9. And, Jer. V.24. Consider also, | Act. XVI.17. Yea, our SAVIOUR extols the Goodness and Mercy of the Glorious GOD, in the Works of this *Covenant*: *He maketh His Sun to rise on the Evil & on the Good, & sendeth Rain on the Just & on the Unjust*. The Words are directly a Comment on the *Covenant* of *Noah*, for Fruitful Seasons; which were to continue without being interrupted again, *Tho' the Imagination of Mans Heart is Evil from his Youth*. With Respect unto this *Covenant* of *Temporal Blessings*, given to *Noah*, and unto the Second *Covenant* of a future Glory given to our SAVIOUR, we are to understand the Words of the Apostle *Paul*; *Godliness is profitable to all things, having the Promise, of the Life that now is, and of that which is to come*. An Exposition of the Words in any other View, will not be consistent with Experience, or with the Admonitions of the Gospel which warn the Righteous to look for Sufferings in This World. But it is very true, That for the Sake of *Godliness*, the *Promise of the Life that now is*, was confirmed with *Noah*; and for the Sake of *Godliness*, a *Promise of Better Hopes*, was confirmed with our SAVIOUR.²⁴ [163r]

And without supposing a *Restoration of the Earth* after the *Flood*, how shall we account for Passages, that celebrate the Fertility of the *Earth*, and its comfortable Circumstances? *This very Earth*, is represented as *flowing with Milk & Honey*; and abounding with *Oil & Wine*, and every thing useful and pleasant in Life.²⁵

Here appears a *Gradual Working* of Providence, towards the Redemption of the World from the *Curse* of the Fall. The *Temporal Blessings* were first Restored, as a Pledge of *Better Things* to follow. The Law of *Moses* was given in what we may call, *The Age of that Covenant*; and so was conformable to it, employing *Express Promises* of no more than *Temporal Happiness*, and *Express Threatenings* of no more than *Temporal Misery*. Yett it must not be imagined, that all who lived under this *Covenant*, were Strangers to Expectations of a farther Extent than so. The *Covenant* of *Temporal Blessings* given unto *Noah*, could not supersede the *Better Hopes*, which the *First Promise* might lead the Faithful to, but it would mightily strengthen them & confirm them. The Fathers expecting a Deliverance from the *Whole Curse* of the Fall, the *Actual Deliverance* from *One Part* of it, was a very good Pledge of a *Further Deliverance* to be *in due Time* looked for. *Man* himself was *Cursed* as well as the *Ground*, and must *Return to Dust*. *Fruitful Seasons* are but a small Releef under so great a *Curse*: But when *Fruitful Seasons*

²⁴ Sherlock, *Use and Intent* (Disc. IV, pp. 95, 96, 97, 98). The biblical citations in italics (not identified by Sherlock or Mather) are in order of appearance from Ps. 36:5. Matt. 5:45, Gen. 8:21, 1 Tim. 4:8, and Heb. 7:19.

²⁵ Sherlock, *Use and Intent* (Disc. IV, pp. 98, 99). The mellifluous metaphor of fertility first appears in Exod. 3:8, 9.

come, and one Part of the *Curse* is evidently abated, it gives great Assurance, that the other shall not last forever.²⁶

That *Noah* had such Expectations himself, & that he transmitted them to his Posterity, we may gather from a peculiar Stroke in his Blessing upon *Shem*: which is, *Blessed be the Lord GOD of Shem*. Why, the *GOD of Shem*, and not the *GOD of Japhet*? Their Merits from their Father were equal; And *Japhet*, being the Elder, might rather have challenged the Preheminence; The Præference of *Shem* could not be for the *Temporal Covenant*; For that had been before confirmed unto *All* the Sons of *Noah*. Nor could the *Blessing* be any thing that it was in the Power of his Father to bestow; for if it had, *Japhet* would have been served before him. Of what *Other Blessing*, tis not easy to imagine, that *Noah* had any other Notion; unless we seek for it among the *Hopes* he conceived of a *Further Deliverance* from the *Curse*, grounded on the Divine Promise, That *the Seed of the Woman* should finally prevail. The Right unto this Promise had been before the Flood convey'd unto him; *With thee will I establish my Covenant*. *Noah* had not only the *Covenant of Temporal Blessings* given to him, & his Offspring; But the Apostle tells us, *He was also an Heir of the Righteousness which is by Faith*. *Noah* then foresaw, that with the *Restoration of the Earth*, a greater Blessing still behind, even the *Covenant* that should *Restore Man* unto himself & unto his Maker, should be convey'd thro' the Offspring of *Shem*.²⁷

[▽160v] [▽Insert from 160v]

143.

Q. How are the Three Sons of *Noah*, to bee Ranked, in the true Order of their *Ages*? v. 32.

A. Tis clear, that *Japhet* was the *Eldest* of the Three. Hee is called in Gen. 10.21. *Japhet the Elder*. Tis also plain, that *Ham* was the *Youngest* of the Three. Hee is called in Gen. 9.24. *The younger Son*. It remains, That *Shem* was the *Middlemost* of the Three. And it may bee further thus evinced. *Noah* began to bee a Father, when hee was just *Five-hundred Years* old. Now if *Shem* had been the *First-born* of his Three Sons, then *Two Years* after the Flood, *Shem* had been an *Hundred & Two Years* old; when indeed, according to Gen. 11.10. hee then was no more than an *Hundred*. That *Shem* still is first mentioned, is an Honour putt upon him, in Part because the *Israel* of God Rose from his Loins, but chiefly because from him the *Messiah* was to descend.²⁸

[165r]

Q. Is there any Remarkable Mystery, in the Genealogies of the Two *Antediluvian Families*, the *Cainites*, and the *Sethites*? v. 32.²⁹

A. *Austin* in his Fifteenth Book, *De Civitate Dei*, c. 1. observes, That there are Two Sorts of Men; *Unum, Eorum qui Secundum Hominem: Alterum, Eorum qui Secundum Deum, Vivunt*. He supposes them, to compose *Two Cities*; that is to say, Two *Societies*; whereof one is prædestinated to Reign with *God*, the other, to be punished with the *Divel*.³⁰

The Society of the *Wicked* have *Cain* for their Head. The Society of the *Godly*, are of the Race of *Abel*; who being murdered, we have *Seth* substituted in his room.

Among the Seed of *Cain*, we find several Things in the History, which are to be expected among the *Men of this World*.

First, There are *Cities* built; They propose *Fixed Habitations* in *this World*; They would have *this World*, their Home, & all their Happiness.

Secondly; The Biggest Part of them, have *Nothing* at all said of them. All that can be said of them, is, That *they were*. They did *nothing* worthy to be spoken of.

Thirdly; Yett there are *Arts* cultivated among them. Some of them are Notable *Artists*, and learned Men; and by their Learning obtain a *Name* for themselves.

Fourthly; In the Generation of the *Cainites*, we have *Women* mentioned; In that of the *Sethites* there is not once any mention of them. *Ubi* (saies *Austin*.) *elegantè significatum est, terrenam civitatem usque in finem sæculi, carnales habituram generationes, quæ marium feminarumque conjunctione proveniunt*.³¹

But now, among the Seed of *Seth*, it seems, as if they lived more like *Pilgrims* and *Strangers* in the World. We read of no *Cities*. They look for the

tine's position (*City of God* 16.11) – and that of Genesis Rabbah (XXVI:3) – that children are listed according to their significance (*NPNFi* 2:318). See also Patrick (*Commentary* 1:32).

²⁹ See Appendix B.

³⁰ For his subsequent commentary [165r–180v], Mather relies almost exclusively on Johann Heinrich Heidegger's *De Historia Sacra Patriarcharum* (1667), which Mather thoroughly mines and incorporates in his annotations on Genesis. The Latin citation from St. Augustine's *De Civitate Dei* (15.1.1) [PL 41. 437] translates "the one consisting of those who live according to man, the other of those who live according to God" (*NPNFi* 2:284). The passage from St. Augustine and the remainder of Mather's commentary on Gen. 5:32 appear in Heidegger (1:135, Exerc. VI, § 2). As in previous cases, all references to Heidegger's work are to the 1729 Tiguri edition.

³¹ In his *De Civitate Dei* (15.17) [PL 41. 461], St. Augustine infers from the genealogical list of Cain's female descendents that procreation will continue to the end: "Whereby it is elegantly signified that the earthly city shall to its termination have carnal generations proceeding from the intercourse of males and females" (*NPNFi* 2:299).

Heavenly City. All their *Inheritance* is in the *World to come*. What *Enoch* in that Race, Proposed and Received, was a fair intimation of that *Blessedness* in the *Heavenly Places*, where all the Hopes of the whole Race were laid up; and the Hopes of all that ever since belong unto it.³²

[166v]

Q. Have we no Ancient and Oriental *Traditions*, concerning, The *Separation* between the *Cainites* and the *Sethites*, in the *Antediluvian World*?

A. There are two famous Christian *Arabians*, namely, *Elmacinus*, and *Patricides*, who have entertained us with *Traditions* of a long and vast Antiquity, concerning this Matter; which, at least for their *Antiquity*, are well worthy to have a Place in these our *Memorials*.

The Words of *Elmacinus*, which I putt into this Translation, are these.³³

“The Second from *Adam*, and Successor to him, was *Seth*, the Son of *Adam*, of pious Memory. He dwelt in the *Holy Mountain*; He, and his Brethren, and their Children, with their Wives, according to the Dying Charge of their Father *Adam*. But *Cain*, with all his Offspring, dwelt in the *Valley*, where *Abel* was killed, below the Mountain. *Seth* was chief Ruler, over the People, who walked in the Way of Righteousness and Holiness, *praising of God*. And they overheard the Voices of the *Angels*, praising of God, and sanctifying of His Name, in *Paradise*, (for *Paradise* was not far off,) enjoying the Fruits of the Trees, which grew on the *Holy Mountain*. But *Cain*, and his Offspring, lived on the Fruits of the *Earth*, which they cultivated.”

The Words of *Patricides*, which I have also translated, are these.³⁴

“After the Death of *Adam*, the Family of *Seth* withdrew from the Family of the Accursed *Cain*. *Seth* now taking with him, his First-born Son *Enosh*, and *Kainan*, the Son of *Enosh*, and *Mahaleel* the Son of *Kainan*; together with their Wives and Children; he carried them up to the Top of the Mountain, where *Adam* was buried; But *Cain* and all his Offspring, staid below, in the Valley, where *Abel* was murdered. The Sons of *Seth*, in that Mountain, maintained much *Purity*, and *Sanctity*; and they heard the Voice of the *Angels*, who were at no great Distance from them; and they praised and magnified & glorified

³² Heidegger (1:135–36, Exerc. VI, § 2).

³³ This and the following paragraph are from Heidegger (1:138–39, Exerc. VI, § 6). Heidegger excerpts a passage from the Coptic Christian Georgius Elmacinus (c. 1223–c. 1274), aka. Ibn Al’Amid, excerpted in Hottinger’s *Smegma Orientale* (1658), lib. 1, cap. 8, p. 227; and from Saidus Patricides’s *Annales* (1656), lib. 1, pp. 19–20. The same excerpts appear in Hottinger’s *Smegma Orientale* (1658), lib. 1, cap. 8, pp. 226–28, but Mather’s English translation is based on Heidegger’s citation.

³⁴ Mather translates into English the words of Patricides from a Latin excerpt in Heidegger (1:139, Exerc. VI, § 6). Heidegger’s own source is Edward Pococke’s Latin translation of Saidus Patricides’s Arabic chronicle *Annales* (1656), lib. 1, pp. 19–20. For the same, see Hottinger’s *Smegma Orientale* (1658), lib. 1, cap. 8, pp. 227–28.

GOD with them; and they, with their *Wives*, and their *Offspring*, were called, *The Children of God*. There was no *Manufacture*, nor *Sowing* and *Reaping* among them. They were fed, by what the *Trees* yielded unto them; nor was there any Place, for Envy, and Injustice, and Falsehood among them. If they swore at any time, it was, *By the Blood of Abel*. Every Day, they ascended the Ridge of the Mountain, and prostrating themselves there, they praised God, – when the Death of *Seth* drew near, he adjured his Posterity, by the *Blood of Abel*, that none of them should go down from the Mountain, nor permit that any of their Children should go mix with the Posterity of the Accursed *Cain*.”

[167r]

Q. The History of the *Ante-diluvian World*, is but briefly given to us, in the ancient and glorious Writings of MOSES. And yett so *Expressive*, so *Important*, is the Brevity used in these Divine *Annals*, that we may fetch from thence, a more copious *History* than would be at first imagined.³⁵

Among other learned Men, who have bestow'd their Illustrations upon the Scriptures, which give us the Condition of things in the *Antediluvian World*, there is the excellent *Heidegger*, who, in his Work entituled, *Historia Sacra Patriarcharum*, ha's done excellently.³⁶ If we lay before us his *Exercitationes*, we may either there meet with, or they may lead us to think of, several Passages, not unworthy to be lodg'd among our Illustrations? v. 32.

A. Lett us then to our Work.

§ The First Thing that we shall observe, in the *Antediluvian Patriarchs* is their OECONOMY.³⁷

Tho' the Command of God, *Increase and Multiply*, did not on the one hand, impose on the *Patriarchs*, τας του αγαμου και οψιγαμου δικας, *Mulcts for a Neglect or a Delay of Marriage*, as *Pollux* tells us there were in some of the *Gracian* Commonwealths; or, like the *Lex Uxor*, which *Festus* tells us there was among the *Romans*: Nor was it in force only, as *Aquinas* and his Followers tell us on the other hand, in those Times when the World more wanted Inhabitants: Yett it encouraged the *Married State*, for the Production of what *Malachi* calls, *A Seed of God*, or a Faithful People to serve God in the World.³⁸

³⁵ See Appendix B.

³⁶ Johann Heinrich Heidegger, תַּרְגּוּם אֲשֶׁר לַדִּבְרֵי דֵּי הִיסְטוֹרְיָה סַאֲכָרָה פַּטְרִיָּאֲרַחֲרִי, *De Historia Sacra Patriarcharum Exercitationes Selectae*. Amstelodami, 2 vols. 1667–71. As in previous instances, my page references are to the Tiguri 1729 edition unless otherwise noted. See Appendix A.

³⁷ Most of the following extracts are from Heidegger (1:1–30, Exerc. I “De (E)conomia Patriarcharum”).

³⁸ Heidegger (1:26, Exerc. I, § 8). The Greek passage adapted from *Onomasticon* (3.48.6; 8.40.5), a rhetoric handbook by the Greek rhetorician and lexicographer Julius Pollux of Naucratis (2nd c. CE), translates more accurately, “mulctas sive ob caelibatum, sive ob nuptias dilatas imponendas,” or rather “Fines imposed for the unmarried state or for the delay of marriage.” (As usual, Mather omits the Greek diacritical marks in his transcription from most of his primary and secondary sources.) Plato's Athenian respondent to his interlocutor Clinias also mentions the requirement that men must marry between the ages of thirty to thirty-five or else

In this Married State, the *Patriarchs* must understand, every Conjunction to be unlawful, but that of *One Man* with *One Wife*, making but *One Flesh*; [Gen. 2.24.] Even the Light of Nature, would instruct, *νοῦν εὐ διακειμενον*, *Mentem rectè dispositam*; that *One Man* ought to have no more than *One Wife*.³⁹ It is a Mistake in *Ambrose*, to think, That *Adultery* was not unlawful, before the Giving of the *Mosaic Law*, and to say; *DEUS in Paradiso, licet Conjugium laudaverit, non Adulterium damnavit*. It was a Mistake in *Aquinas*, and in *Sixtus Senensis*, to introduce *Maimonides* as being of that Opinion. It was a Mistake in *Grotius*, and in *Selden*, to think, That *Polygamy* was Allow'd by God unto the *Patriarchs*; and in the *Jewes*, to say, that every Man might have *Two Wives*; one *Prolis Gratià*, and another, *Ad Concubitum*: To which latter the Husband gave the, *Poculum Sterilitatis*, as soon as he married her.⁴⁰ Indeed, *Maimonides* holds, That before the *Mosaic Law*, a Man might (as *Judah* did,) occasionally Hire and Use an *Harlott*; and that in those Dayes, as in *Terences*, *Non fuit Flagitium adolescentulum scortari*. The Schoolmen in like Manner hold, That *Fornicatio simplex non est peccatum contrà Jus Naturæ*. But the Apostle *Paul*, writing to the *Corinthians*, who had not been under the *Mosaic Law*; [1. Cor. 6.9, 10.] declares, That *Fornicators* were, *ἀδικοί Impij*, and as incapable of the *Kingdome of God* as *Idolaters*. And in the same Chapter, he charges a vile *Turpitude* upon *Fornication*; such an one, as ought to have been considered by the *Patriarchs*. Yea, the

be fined and disgraced (*De legibus* 4.721a–e). The Roman scholar Sextus Pompeius Festus (2nd c. CE) points at similar marriage laws and fines among his countrymen in his lexical work *De verborum significatione* (lib. 19: “Uxorium pependisse”). Finally, St. Thomas Aquinas has much to say on all aspects of marriage in *Summa Theologica* (5:2699–2813, Suppl. to pt. 3, Q41–68). However, he refers to St. Augustine (*De Genesi ad litteram* 3:12.20) to affirm that in marriage the “generation of children has a special relation to the number of the elect” (*Summa Theologica* 1:352, pt. 1: *Treatise on the Angels* [Q50–74], Q72: Reply Obj. 4).

³⁹ Heidegger (1:6–8, Exerc. I, §§ 9, 10, 11). The Greek passage, which Heidegger translates into Latin, signifies that the light of nature instructs “the mind with its appropriate order.”

⁴⁰ Ambrose Mediolanensis believed that adultery was not a crime before Moses received the Decalogue, arguing that “God in Paradise praised an approved union and did not condemn adultery” (*De Abraham Patriarcha*, lib. 1, cap. 4, § 23) [PL 14. 429]. Aquinas cites R. Moses Maimonides’s *Guide* (3.49) and *Mishneh Torah: Hilchot Ishut* (1.4), arguing that according to Maimonides “before the time of the Law fornication was not a sin; and he [Maimonides] proved his assertion from the fact that Juda had intercourse with Thamar” (*Summa Theologica* 5:2801, Suppl. to pt. 3: Q65, A5). Sixtus Senensis refers to the same chapter in Maimonides (*Guide* 3.49) as evidence of the mores before the Law was given (*Bibliotheca Sancta*, lib. 5, annot. 94). Hugo Grotius (*De Jure Belli ac Pacis*, lib. 2, cap. 5, art. 9, § 1; *Rights of War and Peace* 2:514–15) and John Selden (*Uxor Ebraica*, lib. 1, cap. 8, pp. 55–61; and *De Jure Naturali & Gentium*, lib. 5, cap. 6, pp. 561–67) argue that polygamy was universally practiced by the ancients who were subject to the Law of Nature and that the practice of polygamy among the biblical patriarchs was condoned by God. Selden cites the Latinized commentary on Gen. 4:19 and Job 24:21 by Solomon Jarchi (Rashi) as evidence that Jewish men were allowed to have two wives, one for the “love of offspring,” the other for “a lover” (*De Jure Naturali*, lib. 5, cap. 6, p. 564). Rashi relates that while the primary wife was kept for procreation, the concubine kept for pleasure was given a “poculum sterilitatis,” i.e., “a potion [of roots]” to render her “sterile” (Rashi on Gen. 4:19; Genesis Rabbah XXIII:2; Talmud Shabbath 110a and Yevamuth 65b).

Wise Men of the Gentiles, and their *Law givers*, who had but the *Law of Nature* to direct them, condemned *Fornication*, as an ἀκρημοσύνη, and punished it.⁴¹

It is also an Injurious Report, of the *Patriarchs*, given by the *Talmuds*, That *Marriage*, was among them no other than a *Bargain*, or a *Contract*, which they dissolved at Pleasure; as it was afterwards among the *Grecians* and the *Romans*, among whom, it was only for one to say to t'other, *ut res suas sibi habeat*, and there was an End. *Noachidis* (they tell us) *nec sunt Nuptiae, nec sunt Divortia*, (that is to say, solemn ones,) *sed, alteruter conjugum pro lubitu conjugium solvit*. Our Saviour ha's taught us otherwise; [Matth. 19.4, 5, 6.] and told us, That *from the Beginning it was not so*.⁴²

Incestuous Mixtures were in like Manner Forbidden to, and Avoided by the Holy *Patriarchs*. The *Eighteenth* Chapter of *Leviticus*, informs us, That such things were pronounced by God, *Abominations*, when they were done among the *Gentiles*. And the pious *Patriarchs* were as careful, not to marry with *Idolaters*.⁴³

They Religiously took also the Consent of their *Parents* in their *Marriages*. The Proceedings | in the Family of *Abraham*, will a little Declare and Explain, [168v] what we may suppose usual, among the Religious *Patriarchs* that went before

41 Maimonides does describe this practice, as in the case of Judah and Tamar (Gen. 38:2–26), arguing that before Moses, “intercourse with a harlot was as lawful as cohabitation of husband and wife since the Lawgiving; it was perfectly permitted, nobody considered it wrong” (*Guide* 3.49.374). The Latin citation is adapted from *Adelphoe* (1.2.21–22), the last play of the Roman playwright Publius Terentius Afer (fl. 2nd c BCE), which was commissioned (160 BCE) by Cornelius Scipio Aemilianus. Adapted from “non est flagitium, mihi crede, adulescentulum scortari,” Mather’s second-hand quotation from Terence (via Heidegger) reads “it is not a shameful deed to engage in whoring during adolescence.” Likewise, the scholastics argued that “simple fornication [between two unmarried persons] is not a sin against the Law of Nature.” The Apostle Paul writes to the Corinthian gentiles that fornicators were “sinful” or “unbelievers.” Finally, gentile lawgivers condemned fornication as an “ἀκρημοσύνη” [akremosyne] “a want of money,” “neediness,” or “indigence,” in Julius Pollux, *Onomasticon* (3.111.4; 6.197.4). Mather’s misspells “ἀκρημοσύνη” as “ἀκρημοσύνη,” an error he copies from Heidegger, but here silently corrected in the text.

42 Heidegger (1:9–10, Exerc. I, § 12). Marriage and divorce – like most other aspects of Jewish life – are governed by strict laws that determine the rights and obligations of all parties. The Talmudic tractate Mas. Kethuboth (51a, 88b–89b, and 100b) and Maimonides’s *Mishneh Torah: Hilchot Ishut* (1.2–3); *Hilchot Gerushin* (1.1 ff) provide some of the most significant stipulations governing bills of divorce (Get) and the return of the kethubah (dowry). A wife’s fidelity, ability to bear children, and domesticity were significant issues (see Maimonides, *Guide* 3.49.372–80; and *EJ*: “Marriage” and “Divorce”). Heidegger’s source for the Greek and Roman divorce practices is Joseph Justus Scaliger’s *Animadversiones ad Eusebiam Chronicon* (numero 2015), in *Thesaurus Temporum* (1606). The Latin formula of divorce translates “that he may have what belongs to him.” The “Noachidis,” a term designating children of Noah who are non-Jews as well as the children of the patriarchs before the giving of the Mosaic Law, “have neither a marriage ceremony nor a divorce, but either the husband or wife dissolves the marriage if he or she so desires.” See Midrash Rabbah (Gen. XVIII:5).

43 Heidegger (1:11–12, Exerc. I, § 13). For the proscription against incest, see Rashi’s commentary on Gen. 19:33, 26:5, 36:5, and Deut. 23:1.

him. They knew, That the *First Marriage* in the World, was made by the Direction of GOD. They knew, That (as was acknowledged in the After-Ages,) *φύσει αρχικον πατηρ υιων. Naturâ Pater imperat Filijs.* [Thus *Hermione* saies in *Euripides*,

Νυμφευματων μεν των εμων πατηρ {εμός}
 Μεριμνα{ν} ἐξει, κ'οὐκ εμον κρινειν τόδε.
Curam Parenti de meis ego Nuptijs
*Permitto, non est istud arbitrij mei.*⁴⁴

And *Hero* saies in *Museus*, Αμφαδον ου δυναμε{σ}θα γαμοις οσοιοσι πελασσαι ου γαρ εμοις τοκεεσσιν επεναδεν. *Lege maritali iungi non possumus ambo. Cum nolit pater, nolit mater.*] They knew, lastly, That it was neither Decent, nor Honest, for Children to introduce an *Heir* into the Estate of their *Grandparents* without their Leave. Accordingly, All Nations have damned, as even Invalid, the *Marriages*, that are made against the Consent of *Parents*; whereof you may Read, *Cujacius* in his *Observations*, and, *Cypræus de Sponsalibus*.⁴⁵

The *Ceremonies* used in the *Marriages* of the *Patriarchs*, were a *Solemn Benediction*; in Imitation of what the Lord bestow'd on our *First Parents*. And the Continuance of the *Bride* for a while in her Fathers House; and her appearing with a *Veil* upon her: [All which are exemplified in the Case of *Rebeckah*.] And a *Nuptial Feast*, which as *Jerom* notes, held usually a *Week* together; and was meant by *Laban*, when he would have *Jacob* to *Fulfil the Week* of his elder Daughter.⁴⁶

⁴⁴ Heidegger (1:12–13, Exerc. I, § 14). In his *Ethica Nichomachea* (8.11.1161a, 18–19), Aristotle acknowledges that in after-ages, “by nature a father tends to rule over his sons” (Jonathan Barnes’s translation). In *Andromache* (987–88), a tragedy by the Athenian playwright Euripides, Hermione tells Orestes, “My father shall take care of my marriage: it is not for me to decide this.”

⁴⁵ Hero, priestess of Aphrodite at Sestus, tells her beloved Leander, who swam across the Hellespont at night to see her, “we cannot openly come into a righteous marriage, / For it was not my parents’ will” (*Hero et Leander* 179–80), a miniature hexameter epic by the Neoplatonist poet Musaeus. Mather’s second-hand quotation from Heidegger (1:12–13) is without its Greek diacritical marks. Jacques Cujas (Cujacius, De Cujas) (1522–90), renowned French jurist and professor of Roman Law at Bourges, delineates the legal role of parents in marriage contracts of their children, in “Observatione III.5” (*Corpus juris civilis* [1663], lib. I, titulum X, “De Nuptiis,” pp. 5–6). The best collection of Cujacius’s works is Fabroti’s 10-volume edition of *Opera Omnia in decem tomos distribute* (Paris 1658). Likewise, the Danish jurist and historian Paulus Cypræus (1536–1609) has much to say on these contractual issues, especially on parental consent in the marriage of their children, in his *De Sponsalibus*, the running title of Cypræus’s *De connubiorum iure tractatus a multis desideratus* (1605), cap. 6, §§ 1–12, 153–214.

⁴⁶ Heidegger (1:13–14, Exerc. I, § 15) draws on Rabbi Eliezer’s *Pirke*, ch. 16 (esp. pp. 108–12). The solemn benediction reminiscent of that bestowed on Adam and Eve (Gen. 1:28) is, “Be fruitful and multiply” (Gen. 1:28). Rebecca married Isaac by proxy (Isaac’s servant Eliezer) and was encouraged to stay in her father’s house for another ten days before her departure (Gen. 24:55). In his *Quaestiones Hebraicae in Genesim* (Gen. 29:27) [PL 23. 981B], St. Jerome does not specifically mention that Laban’s wedding banquet for Jacob and Leah (Rachel’s elder sister) lasted seven days, but that Jacob “should complete seven days after his marriage to the elder sister,” before Laban would bestow the younger Rachel on Jacob as well: “He did not,

The Law for the *Leviratic Marriages* was in force among the *Patriarchs*; to preserve the *Right of Primogeniture*; not without an Eye to the Mystery of the *Messiah*, who was to be, *The First-born among many Brethren*.⁴⁷

Lett *Abraham* tell us, what the Care of the *Patriarchs* was, about the Education of their *Children*.⁴⁸

But then among the *Children*, there was one Remarkable Thing; The /הבכרה/ *Jus Primogenituræ*. The *First Born* had singular Prærogatives; In regard of whom, the Hebrewes call'd the other Sons, /בני פשוטים/ *Filios Vulgares*. It is evident, That the Fear of *Cain* was, lest he should lose his Power over his Brother *Abel*: To answer which, the Lord said, Gen. 4.7. *If thou doest well, thou shalt Rule over him*.⁴⁹ The *First-born* had more Honours paid him in the Family. And when he was out of it, the rest of the Children acknowledged in him, a Superiority and a Dominion over them. He had a *Double Portion* of the Patrimony. *Si tres fuerint Fratres, putentur ut Quatuor; et capiet ille duas partes*: As *Aben Ezra* explains the Rule.⁵⁰ And as he might expect a *Special Blessing* from his Father, so there was a *Right of Priesthood* belonging to him: which the Jewes tell us, was the Reason why *Jacob* so much desired the *Right of Primogeniture*. Before the Giving of the *Mosaic Law*, we read; [Exod. 19.22.] of *Priests* which were to sanctify themselves; and these *Priests* are anon called [Exod. 24.5.] *The young Men of Israel*. *Onkelos* calls them, *The First-born of Israel*.⁵¹ Indeed, the *Younger Brethren* do seem not excluded from the Office of *Sacrificing*; *Abel* had it; But it seems to have been, when they swarm'd into *other Families* of their own, and became the *Heads* of them. The *Eldest*, might *Sacrifice*, while his Father was yett living; And none but he might *Sacrifice*, while the rest of the Children continued yett in the same Family; And even then too, he was in Dignity before them all. The *Profaneness* of *Esau*, is in this Account, somewhat Illustrated. This *Right of*

then, as certain people wrongly suppose, receive Rachel as his wife after another seven years; but seven days after his marriage to his first wife" (*Hebrew Questions*, p. 64).

47 Heidegger (1:14, Exerc. I, § 16). As stipulated in Deut. 25:5–6, the brother of a deceased man (*levir*) is to marry his brother's widow when he died without offspring (*leviratic marriage*). See Mather's annotations on the Book of Ruth (1:17); Maimonides (*Guide* 3.49.374) and *EJ*: "Levirate marriage." Through the right of primogeniture, the firstborn son inherits his father's estate and title. In this sense, Jesus Christ is "the firstborn among many brethren" (Rom. 8:29).

48 Heidegger (1:14, Exerc. I, § 17). Patriarchs are to instruct their offspring to "keep the way of the Lord" and "to do justice and judgment" (Gen. 18:19).

49 Heidegger (1:15, Exerc. I, § 18). The remarkable thing is the "Right of the firstborn"; the other sons were called "common sons."

50 Heidegger (1:15–17, Exerc. I, § 19). Ibn Ezra's Latinized rule signifies, "If there are three brothers, then the estate is to be divided into fourths; and he will take two parts" (*Commentary of Abraham Ibn Ezra* 5:97, on Deut. 21:17). Rashi's commentary on the same verse is a bit more detailed in its directions: "The firstborn son does not take [a double share] from that which [the father's estate] is entitled to after the demise of the father, [e.g., from an uncollected debt,] as [he does] from what was in the father's actual possession."

51 The Targum Onkelos (Exod. 24:5) only calls them בְּנֵי יִשְׂרָאֵל or "primogenitos filiorum Israel" (Walton 1:329), rather than "young men of the children of Israel" (KJV).

Primogeniture, our Heidegger supposes, to belong only to the *First-born of the Father*. And as there was a *Civil Reason* for these Prerogatives of the *First-born*; the Order and Splendor of the Family: so, it was to exhibit the *Mystery* of our Dependence on the *Messiah*; who is often called, *The First-born*; and He also is our *High-Priest*; and thro' Him, we *obtain the Inheritance*. Yea, and the *First-born* in the Family, being *Holy* to the Lord, it signified, the *Sanctification of the Whole*; [Rom. 11.16.] So that the *Whole Family* now belong'd unto the Church of God, and might expect the Privileges of it: Yea, for the Infants thereof, dying in their Infancy, there might be expected a Portion in the Kingdome of God. And the *First-born* was in this also, a Type of our Saviour. [Heb. 2.11.]⁵²

But were there no *Servants* in the Families of the *Patriarchs*?

[169r]

Austin derives the Original of *Servitude* no higher, than the Malediction | of Noah upon Canaan; and adds, *Nomen itaque istud culpa meruit non Natura*. [De Civit. Dei. XIX.15.] And Chrysostom carries the Matter much this Way; That Men did not live so delicately, as to have *Servants* waiting on them, till Sin introduced it: *Peccatum autem, ubi intravit, Libertatem perdidit, et corruptit Dignitatem naturâ datam, Servitutemque introduxit*. [Homil. 29. in Genesim.] And Ambrose is yett more punctual; *Manebat antequam vinum inveniretur omnibus inconcussa libertas; Nemo sciebat è consorte naturæ suæ obsequia servitutis exigere. Non esset hodiè servitus, si ebrietas non esset*. [Serm. de Jejunijs.]⁵³ Indeed, we have no express mention of *Servants*, before the Flood. We are sure, There was then Sin enough. And there were *Giants* too; Men able and willing enough to bring other Men into *Servitude*. And, no doubt, there were those also, who answered the Character given by Posidonius the *Stoic*; who conscious of their own *Weakness*, voluntarily became *Servants*, ὅπως παρ' ἐκείνων Τυχχανοντες της εις αναγκαια επιμελειας αυτοι πάλιν αποδίδωσιν ἐκείνοις δι' αυτων απερ αν ωσιν υπηρετειν δυνατοι. *Ut Domini quidem ipsi providerent de Necessarijs, ipsi verò operam vicissim quam possint præstarent*.⁵⁴ There are more voluntary *Servants of Compact*, and there

⁵² Heidegger (1:18–19, Exerc. I, § 22).

⁵³ Heidegger (1:20–21, Exerc. I, § 25). St. Augustine's argument about the origin of servitude appears in his *De Civitate Dei* (19.15) [PL 41. 643] and explains, "It is a name, therefore, introduced by sin and not by nature" (*NPNFi* 2:411). Heidegger's free Latin translation from Joannes Chrysostom's Greek *Homiliae in Genesim* (*Homilia in Genesim* 29.23) [PG 53. 270] signifies, "When sin entered, however, he [man] lost freedom and corrupted the dignity that is the gift of nature, and introduced servitude" (see *Homilies on Genesis* 29.23, p. 214). Mather's MS erroneously lists "Homil. 19." St. Ambrose (c. 339–97), bishop of Milan (*De Elia et jejuniio* 1.5.11) [PL 14. 702], argues punctually, "Before wine was invented, liberty endured unshaken for everyone. Nobody knew by nature how to exact the obedience of a servant from his fellow man. Slavery would not exist today, if there were no drunkenness."

⁵⁴ Mather's translation of "Nephilim" (Gen. 6:4) as "giants" who tyrannize and press their fellow men into servitude deserves commenting. While Heidegger (Mather's source) and many other distinguished commentators argue that the "Nephilim" were "powerful tyrants," i.e., giants in political power, not in physical size (Matthew Poole, on Gen. 6:2–4, in *Synopsis Criticorum* 1:77–80), Mather rejects this allegorical interpretation of his colleagues and insists that "Nephilim" denotes literal "giants" (in size). The discovery of gigantic bones at Claverack,

are those that have been called, *Servi Paenæ*, such as are in a State of *Slavery*.⁵⁵ They that were taken in a *Just War*, usually underwent the *Latter Condition*. We read of *Abram* and *Lott*; that they carried into *Canaan* with them; Gen. 12.5. *The Souls which they had gotten in Charran*. Some, as *Aben Ezra* tells us, thereby understand, Their Proselytes, *Animas quas docuerunt veritatem, ut colerent verum Deum*. And so, *Jarchi*; *Animas quas congregarunt sub Alas Majestatis Dei*; *Abraham quidem proselytos fecit viros, Sara mulieres*. To the like Purpose, *Onkelos*. But it may rather mean, those which anon are called, Gen. 17.12. *Those which are Bought with Money*. The Justice of *Perpetual Servitude*, is thus expressed by my *Heidegger*; *Nec Servitus talis, quæ perpetuas operas præstat, pro Alimentis et alijs quæ vitæ exigit Necessitas, habet in se aliquid nimie Acerbitatis; quia perpetua illa obligatio compensatur perpetuâ Alimentorum certitudine, quam sæpè non habent, qui diurnas operas locant*. *Grotius* well urges this Reason; and *Selden* is not found a fitt Match, to answer him.⁵⁶ We have little Account, about the Circumstances of *Servitude* among the *Patriarchs*; Doubtless their *Servants* were, Ἀπρόσωποι.

near Albany, NY, in 1702, convinced him (and most of his fellow physico-theologians) that they were tangible evidence not only of Noah's global Flood, but also of literal giants, the offspring of fallen angels who cavorted with the daughters of man. Mather's subsequent commentary on Gen. 6:4 exemplifies the contemporaneous debate – a century before geologists began to postulate that these bones found all over the world were the remains of mastodons or dinosaurs, unknown species of animals, not mentioned in scriptures. (See also D. Stanford, "Giant Bones"; D. Levin's "Giants in the Earth"; R. Rappaport, *Geologists*, ch. 4; and P. Semonin, *American Monster* 15–40). The Stoic philosopher Posidonius of Apamea (c. 135–c. 51 BCE) established an academy in Rhodes, which became the center of Stoicism in the Greco-Roman Empire. Heidegger (1:21) cites a fragment from the Stoic Posidonius – extant in Athenaeus of Naucratis (6.84.5–7) – and argues that many weak and feeble-minded persons voluntarily enter servitude "in order that they may secure from them [their masters] provision for their daily needs, and in turn may themselves render to their patrons, through their own labours, whatever they are capable of in the way of service" (*Deipnosophists* 6.263c–d).

⁵⁵ Heidegger (1:21–22, Exerc. I, § 26). "*Servi Paenae*" are "perpetual slaves."

⁵⁶ Heidegger (1:22–23, Exerc. I, § 27). Actually, Ibn Ezra offers three different possibilities for Gen. 12:5: The "souls" gotten in Charran were either "servants born into their household," or servants that were "bought," or "the people to whom Abraham showed the truth, to worship God" (*Commentary on the Pentateuch: Genesis* 1:150). It is the latter interpretation, favored by Jarchi (Rashi) and the Genesis Rabbah (XXXIX:14), which suggests that they are "the souls who are gathered under the wings of the Majesty of God [Shechinah]; Abraham would convert the men, and Sarah [would convert] the women" (*Mikraoth Gedoloth: Genesis* 1:153). The Targum Onkelos (Gen. 12:5), in Walton (1:47) renders servitude less mercenary by calling his slaves "the souls whom they [Abram's family] had made subject to the law in Charan" (Etheridge 1:58). Heidegger (1:23, Exerc. I, § 27) defends the justice of perpetual servitude as follows: "And such servitude, which bestows upon us perpetual labors for the sake of food and other things which the necessity of life demands, does not have too much hardship in itself, because that constant obligation is compensated by the constant certainty of food, which those who contract others to perform their daily tasks often do not have." Hugo Grotius's explication in *De Jure Belli ac Pacis* (lib. 2, cap. 5, art. 27, § 2; *Rights of War and Peace* 2:557–58) agrees with that of Heidegger. John Selden addresses the issue of servitude in *De Juri Naturali et Gentium* (lib. 1, cap. 4, pp. 50–60; lib. 2, cap. 3, pp. 152ff; and lib. 6, cap. 19, pp. 774–82), but falls short of Grotius's legalistic acumen.

Which are, *Qui personam propriam et liberam non habent, sed Domino subjacent*. And their *Masters* (like *Abraham*) instructed them in the True Religion.⁵⁷

The *Patriarchs* for the most Part seem to have affected the Life and Work of *Shepherds*; which afforded most of Liesure to them, for their Meditations on the Things of God.⁵⁸

As they multiplied, there arose *Trade* among them; Ἀλλαγή, or, *Permutation*; which we all know, without learning it from the Philosopher, it arises from this, τῷ τὰ μὲν πλείω, τὰ δὲ ἐλάττω των ἱκανῶν εἶχειν τοὺς ἀνθρώπους. *Quòd homines alia quidem plura, alia verò pauciora quàm satis sit, habeant*. In the most early times, *Trucking* of one Commodity for another, seems to have been the only Way of *Dealing*. But probably, *Necessity* brought forth the Invention of *Money*, before *Seventeen Ages* were expired; that for their τὰ χρήσιμα, their *Profitables*, Men had an Εὐμεταχειριστον, a *Portable*, some Tractable Medium of their Traffick.⁵⁹ It is very sure, we find *Money* used in the Dayes of *Abraham*. As the *Talent* then used, seems to have been Double to the *Attic Talent*, and by Consequence to have been an hundred and twenty Pounds: Thus the *Shekel*; which was a *Didrachma*, seems to have been æqual unto *Four Attic Drachms*, & to weigh half an *Ounce*: which helps to explain the Terms used by the LXX and *Josephus*, on this Occasion.⁶⁰ In Two Places; [Gen. 33.19. and, Job. 42.11.] we read of a Sort of *Money*, called, /קֶשֶׁתָּה/ *Kesitha*. To interpret it, of *Sheep*, or *Lambs*, does not seem defensible. For neither the *Hebrew*, nor *Chaldee*, nor *Syriac*, nor *Arabic*, do use this Word, when the Management of *Sheep* is ever spoken of: And *Stephen* expressly tells us, that *Silver* was intended. The *Root* of this Word may be lost; except we should say, It comes from /כֶּשֶׁת/ *Veritas*; and the *Targums* use the Word, when *True* and *Just Weights* are spoken of. It may signify, *True*, and *Just*,

57 Heidegger (1:23–24, Exerc. I, § 29). Servants among the patriarchs were “Ἀπρόσωποι” or “faceless people,” which are “persons who have no property and no liberty, but are subjected to their master.” According to Rashi, Ibn Ezra, and Genesis Rabbah, Abraham instructed his slaves in the true religion (see note 56 above).

58 Heidegger (1:24, Exerc. I, § 30).

59 Heidegger (1:26–27, Exerc. I, § 33). The Greek word Ἀλλαγή, which Mather (adopting Heidegger’s Latinization) here translates as “*Permutation*,” more properly suggests “exchange” and “barter” during any buying or selling activity as suggested in Plato. The Greek philosopher quoted subsequently is Aristotle (*Politica* 1.6.1257a, 16–17), who argues that the value of goods (rate of exchange) and trade in general are determined by the fact that “because men had more than enough of some things and less than enough of others.” The invention of money arose from the necessity of having for their “profitable things” a “portable medium” of exchange.

60 Heidegger (1:27, 28, Exerc. I, § 34). Heidegger supplies the value of exchange (measured as the weight of silver) of Talent, Shekel, Didrachma, Attic Drachms, and cites several contemporary and ancient sources in support of his calculation. In his appendix to “BA” (following his commentary on Revelation), Mather provides conversion tables: “III. Tables Of the Measures, Weights, and Coins, occurring in the Sacred Scriptures” (“Coronis”). These conversion tables help Mather to determine the value of coinage in the LXX and in Josephus Flavius’s *Antiquities* (3.8.2, 10). One of the primary sources for ancient numismatics as illustrated here and in Whiston’s translation of Josephus is Adriaan Reland’s *De nummis veterum hebraeorum* (1709) 138.

and *Honest Money*. If we will still have *Lambs* in the Signification of the Word lett there be supposed, the Stamp of a *Lamb* upon the *Money*. Famous Interpreters go this Way. And both *Pliny* and *Plutarch* tell us, That *Servius* employ'd the Stamp of | *Cattel*, on the old *Money* of the *Romans*; for which Cause, it was called, *Pecunia*. *Varro* and *A. Gellius* tell us, of a Coin, called, *Oves*, or, *Sheep*, from the Stamp of that Creature upon it. And thus among the *Grecians*, they had, *The Oxe*, and, *The Tortoise*; upon which the People sometimes employ'd their *Witticisms*. I confess, *Villalpandus* objects, That for the avoiding of Idolatry, the Jewes might not use *Money* with any *Image* stamp'd upon it. But, an *Image* of a meer Civil Importance, was not forbidden. And it were well, if the absence of an *Image* from their *Money*, could keep the Jewes from *Idolizing* of it.⁶¹ [170v]

Heidegger enquires, whether there were any *Merchants* among the *Patriarchs*. He thinks, No; He saies, *Longiùs à naturà recedit, ut homines quæstum faciant ex hominum solùm laboribus, non ex terræ fructibus aut animalibus*. He adds, *Generosissimi quique populi indecorum ex mercaturâ quæstum reputavere*. Thus *Livius* of the *Romans*; *Patribus visus est mercatorius hic Quæstus planè indecorus*. If the Gentlemen concerned in these harsh Passages, do vindicate their own Reputation, by an Universal *Justice*, and *Goodness*, in all their *Traffic*, I know not, why they should be so harshly spoken of. I am sure, I know those, who much much more than the *Merchants* of *Tyrus*, deserve to be considered as *Princes*.⁶²

61 *Heidegger* (1:28–29, Exerc. I, § 35). Contrary to Mather's claim, the unknown unit of money כֶּסֶף (Keseetaw) [Strong's # 7192] is associated with "sheep" in the Hebrew, Chaldee, Syriac, and Arabic languages (Walton's *Biblia Sacra Polyglotta* on Gen. 33:19, Josh. 24:32, Job 42:11), but by the Protomartyr St. Stephen interpreted as ἀργύριον or "silver [money]" (Acts 7:16). Mather's etymological derivation of כֶּסֶף signifying "*Veritas*" (or in *Heidegger's* original, "*veram, probam, justam*"), however, is rendered in the Chaldean Targum of Onkelos "centum agnis" ("100 lambs") and both in the Targum Jonathan Ben Uziel and in the Targum Hierosolymitanum "centum margaritis" ("100 pearls"), in Walton 1:149 and 3:65). Both *Pliny* (18.3.12) and *Plutarch* (*Vitæ parallelæ: Publicola* 11.5–7) relate that *Servius Tullius*, sixth king of Rome (c. 578–535 BCE), embossed his earliest coins with effigies of cattle, oxen, or sheep. Similarly, in his *Noctes Atticæ* (2.21.8–9), the Roman author *Aulus Gellius* (b. c. 125 or 128 CE) cites *De lingua Latina* (7.4.74), by *Marcus Terentius Varro* (116–27 BCE), and *Fragmentum* (42), by *Lucius Aelius Seianus* (d. 31 CE), to confirm that imprints of "boves" (not "oves"), i. e., of "cattle" (not "sheep") could be seen on a Roman coin. These coins were therefore popularly nicknamed after the imprint they bore. (The error occurs in *Heidegger*, whom Mather copies here.) Likewise, the numismatic imprint of an ox or turtle can be found on some Peloponnesian coins (*Julius Pollux*, *Onomasticon* 9.74.3–5) – the witticism probably referring to the Greek and Roman military formation "the Turtle," in which a tightly compacted group of soldiers (phalanx) carried their shields above their heads to ward off any airborne enemy missiles such as arrows or spears. Finally, *Juan Bautista Villalpando* (1551–1608), the learned Spanish Jesuit of Cordoba celebrated for his imaginative depiction of Solomon's Temple, voices his stereotypical derogation in his *In Ezechielem explanationes et apparatus urbis ac templi Hierosolymitani* (1596–1605), vol. 2, pars 2, lib. 2, disput. 4, cap. 25.

62 *Heidegger* (1:30, Exerc. I, § 37). *Heidegger* thinks that "it is a distant withdrawal from nature that men should make a profit from the works of men alone, not from the fruits of the earth or from animals." He adds, "Each of the noblest tribes considers profit from trade to be shameful." The unidentified second-hand quotation from the Roman historian *Titus*

§ From the *Oeconomy* of the *Patriarchs*, we will now proceed unto their POLICY. When their *Families* multiplied, we may suppose them to combine into *Colonies*; where, as *Tully* in his Discourse *De Legibus*, will tell you; *Sine Imperio, nec Domus ulla, nec gens, nec hominum universum genus stare, nec rerum Natura omnis, nec ipse mundus potest.* And *Seneca*; *Imperium est vinculum, per quod Respublica coheret; ille spiritus vitalis, quem hæc tot millia trahunt; nihil ipsa per se futura, nisi onus et præda, si mans illa Imperij subtrahatur.* As there will always be, *The Upper House of Judgment*, in Heaven, so there must be, *The Lower House of Judgment*, on Earth. And we must not allow too much unto the Saying of, *Cedrenus*; προ του κατακλυσμου ουτε εθνος ουτε βασιλεια. *Ante Diluvium, nec Gens fuit, nec Regnum.*⁶³

After the Flood, we find several *Patriarchs*, to be themselves a Sort of *Kings*, and concerned with *Kings*. [1. Chron. 16.21, 22.] And hence, *Justin* out of *Trogus*, tells us; L.36. *Abraham, Moses, Israel Reges fuere.* And *Nicolaus Damascenus* writing of *Abraham*, uses the Term of, βασιλευσαι. *Regnasæ.*⁶⁴

After the *Flood*, no doubt, the chief Authority resided a long While with *Noah*. Nevertheless, it is to be feared, That the pious Children of *Shem* were ere long opposed, & kept under, by the Idolaters of *Chaldaea*: until a Call from Heaven, stirr'd up *Abraham*, & those that belong'd unto him, to assert their *Liberty*, and as *Freemen* accountable unto no Superiours, to remove unto another Countrey. The whole Condition and Conduct of *Abraham*, seems to carry such an Aspect with it; who made *Leagues* and *Wars*, like a *Sovereign Prince*. [And see, Gen. 23.6.] Probably then, before the Flood, the chief Authority resided with

Livius, best known for his history of Rome, *Ab urbe condita libri*, confirms that “the Fathers thought that this commercial profit was utterly shameful.” Finally, Mather’s praise for the noble “merchants of Tyre” (Isa. 23:8), perhaps could have served as a moral exemplum to Boston’s merchants, whose ignoble dealings Mather deplored in his *Lex Mercatoria* (1705), *Theopolis Americana* (1710), and *Fair Dealing between Debtor and Creditor* (1716).

63 The source for Mather’s sequence of extracts is from Heidegger’s *Historia Sacra Patriarcharum* (1:30–46, Exerc. II “Politia Patriarcharum”). Marcus Tullius Cicero (*De legibus tres* 3.1.3) explains to his friend Atticus the origin and necessity of civil laws: “Without government, existence is impossible for a household, a city, a nation, the human race, physical nature, and the universe itself.” Seneca weighs in with his caveat: “The empire is the bond by which the commonwealth is united, the breath of life which these many thousands draw, who in their own strength would be only a burden to themselves and the prey of others if the great mind of the empire should be withdrawn” (*De Clementia* 1.4.1–2), a disquisition on mercy. Mather dismisses Georgius Cedrenus’s saying, “Before the Flood, neither people nor government existed” (*Compendium historiarum* 1:21, line 10).

64 Heidegger (1:32–33, Exerc. II, § 3). Marcus Junianus Justinus, the epitomizer of Pompeius Trogus’s *Philippic Histories* (1st c. BCE), relates that “Abraham [and] Moses were kings of Israel” (*Historiarum Philippicarum in Epitomen* 36.2.3). And Nicolaus Damascenus (b. c. 64 BCE), Peripatetic historian and advisor to Herod the Great, is best remembered for his universal history *Historiai*, which survives in fragments only. Nicolaus refers to the Patriarch Abraham as “basileusai,” i.e., “he reigned” (*Fragmenta*, fragm. 66, line 232). Eusebius (*Praeparatio evangelica* 9.16.417c) cites Nicolaus Damascenus’s *Universal History* (bk. 4), which asserts that Abraham, coming from Chaldea with an army, became “king of Damascus.”

Adam, while he lived, and then with Seth, and so still, with the *Eldest Patriarch*. His Counsils, and Orders, regulated all things; especially among the *Sethites*, whom we may suppose a more orderly People; and no doubt, his Delegates and Officers, were such as were afterwards called, *The Elders of the People*. We find such a Government continued, among the *Israelites*, even while they were enslaved, in the Land of *Goshen*. *Aben Ezra* saies well, of the זקנים / *Seniores*; *In consilium adhiberi solent, per omnia sæcula*.⁶⁵

We will not enter into Dispute with *Maimonides*, upon his Assertion; *Non præst Judicijs eorum Fæmina*. Nor meddle with the universal Axiom of the Hebrewes; *Fæmina Judicijs exercendis inepta*. Nor contest the Matter with *Austin*; *Mulier, nec docere potest, neque Fidem dare, nec Judicare; quantò magis non potest Imperare?* The Happy Experience of the *English Nation*, has more than once with Satisfaction beheld a QUEEN on the Throne; whatever might be done among the *Patriarchs*.⁶⁶

What *Lawes* were administred among the *Antediluvian Patriarchs*, we are very little informed. There seems to have been a Law, *Ne matrimonium ineatur cum Infidelibus*. [Gen. 6.2. and Gen. 24.3.] The Law of *Tithes* does also seem to be very early. [Gen. 14.20.] The *Lawes* relating to *Marriage*, the Right of *Primogeniture*, the Form and Force of *Oathes*, the Rules of *Traffic*, and the like; we have some dark Intimations about them. And the Book of *Job*, will give us many Hints, of the *Lawes* in his Time, and what things were counted unlawful and criminal, in the early Ages. —⁶⁷

⁶⁵ Heidegger (1:33–37, Exerc. II, §§ 4–6). See also Hugo Grotius's *De Jure Belli ac Pacis* (lib. 1, cap. 3, art. 6; *Rights of War and Peace* 1:257–59). The Hebrew citation זקנים [zekenim] “elders” and Heidegger's Latin translation from Ibn Ezra's annotation on Exod. 4:29 signify, “The elders generally counseled each generation” (*Commentary on the Pentateuch*: Exodus 2:112).

⁶⁶ Heidegger (1:37–38, Exerc. II, § 7). Mather's unambiguous displeasure with Maimonides's assertion that “a woman's judgment does not excel” (see *Mishneh Torah: Hilchot Melachim* 9.14 and *Hilchot Edut* 9:2), or with the misogynistic view that “a woman's judgment is ineptly exercised,” or with St. Augustine's “a woman can neither be taught, nor be trusted, nor make a decision; how much less can she rule?” (adapted from *Quæstiones Veteris et Novi Testamenti*, quaest. XLV [PL 35. 2244] – all reveal his enlightened view of women. England's “Happy Experience” with exemplary queens ruling the kingdom is evidently an allusion to Queen Elizabeth I (1533–1603), Queen Mary II (1662–94), joint ruler with William III, and, perhaps, to Queen Anne (1665–1714). During his composition process, however, Mather evidently had three specific English queens in mind, but second thoughts about Mary I (1516–1558), better known as “Bloody Mary,” may have led him to change his original phrase “Three Thrones” for the less specific “more than once.” For Mather's view of women see his *Ornaments of the Daughters of Zion* (1692), esp. pp. 35–38 of the third (1741) edition.

⁶⁷ Heidegger (1:38–40, Exerc. II, §§ 8, 9, 10). Among the Laws given to Adam are six: concerning (1) courts of justice (2) blasphemy (3) idolatry (4) homicide (5) gluttony and stealing (6) against obscenity and adultery; finally, laws against (7) the eating of limbs of live animals were given to Noah (see Soncino Talmud tractate Sanhedrin 56a, 56b, and Nachmanides on Gen. 34:13, *Commentary on the Torah* 1:417n). John Selden's *History of Tithes* (1618) has much

[171r] | In vain are *Lawes*, without *Penalties*. And therefore doubtless there were such, and *Capital* ones too, in use before the Flood. Immediately after the Flood, we find the *Sword*, with a *Power of Life and Death*, putt into the Hands of the Civil Magistrate. And before the Giving of the *Law to Moses*, we find, *Stoning* spoken of, as a Punishment which the *Israelites* were well acquainted withal: Exod. 19.13. *He shall surely be stoned, or shott through*. More exactly, *Lapidando lapidabitur, vel projiciendo projicietur*. There were two Ways of *Lapidation* used among the *Israelites*; whereof we read in their Treatise entituled, *Sanhedrin*. The One; For the Malefactor to be violently *thrown down* upon an *Heap of Stones*, from the *בית הסקילה* / *House of Lapidation*; the Heighth whereof was Twice the Stature of a Man. The other; For the Malefactor to be overwhelmed, with *Stones* hurled at him, from the People; the *Witnesses* being the first in the Action. Thus may we understand the Text in *Exodus*; There is nothing in it, of being *shott through*: But, *Aut Lapidibus petitus obruatur, aut ita præceps in Terram è sublimi loco detrudatur ac projiciatur, quò sic vita privetur*.⁶⁸

Grotius conceives, That from the Direction of Heaven, for the *Capital Execution of a Murderer*, the common Light of Reason, would lead Men on, to enact *Lawes*, that should severely punish some other *Crimes*. For there are some other Interests, which are as dear to Men as their *Lives*. And *Moses* ha's left those *Lawes* unmentioned in his *History*, because we were to find them anon revived in his *Commonwealth*.⁶⁹

In the *History* of the *Patriarchs*, we do find a Punishment, called, *The Cutting off of the Soul*; which deserves to be considered. The Hebrewes all agree, That it was a Punishment, *בִּיד שָׁמַיִם* / inflicted by none but, *The Hand of God*. R. *Elias ben Moses*, ha's express'd their Sense of it; *Omne Chereth in lege memoratum infligitur per manus Dei, in penam aut Corporis aut Animæ*. And yett they are divided about the more particular Sense of it. Some, with *Abarbanel*, understand it, of an *Immature Death*. *Abbreviatiò Dierum Peccatoris, et mors ante Terminum Naturalem, in hoc mundo, {quæ mors est} operà cæli illata*. The Term, they take to

to say on the origin of tithing. Finally, the book of Job, ch. 31, intimates many ancient rules of law governing social interactions.

⁶⁸ Heidegger (1:40, Exerc. II, § 11). Even though Ibn Ezra (*Commentary on Exodus*. 2:381) and the KJV (Exod. 19:13) render the punishment as “shot through” (with arrows), Mather, following Heidegger, prefers to render the passage as “He who must be stoned will be stoned, or he who must be cast out will be cast out.” The Gemarist mentions this form of execution in the Talmudic tractate Sanhedrin (45a and 45b). The severity of punishment for transgressions is represented in the different forms of execution by stoning, burning, strangulation, and decapitation (Sanhedrin 40b and 41a); the execution of a culprit in the house of lapidation or stoning (“twice a man’s height”) is described in Sanhedrin (45a). Finally, the text in Exod. 19:13 is to be interpreted as follows: “Either the victim will be covered by stones, or he will be pushed and thrown headlong to the ground from a high place, whereby he will be deprived of life.”

⁶⁹ Heidegger (1:40–41, Exerc. II, § 12). Grotius surmises that from the proscription against war and murder, man in time developed other laws regulating social interaction (*De Jure Bellis ac Pacis*, lib. 1, cap. 2, art. 5; *Rights of War and Peace* 1:190–94).

be, before *Fifty*, or, some say, *Sixty*. Whence *Buxtorf* tells us, Old Men at *Sixty*, made a *Thanksgiving Feast*, in which they returned Thanks to God, That their *Soul had not been cutt off from their People*.⁷⁰

Others, as *Jarchi*, understand it of *Sterility*: *Excidium in eo consistit, ut quis moriatur ατεκνος*. [They fetch it from, Lev. 20.20, 21.] Others, as *Maimonides*, understand it, of a *Total Extinction of Soul and Body*; *Peribit ut Bestia*. Lastly; Some understand it, with *Abarbanel*, of *Hell*; *Anima excindetur ab isto Fasciculo Vitæ supremo, neque splendorem Divinitatis obtinebit*. The *Christians* are as much divided as the *Jewes*. But our *Heidegger* so sums up, and clears up, the Matter. The Punishment was doubtless *θειλατον*. *Inflicted by the Hand of God*. It was never heard of, that any were punished by *Men*, for the neglect of Circumcision. But we know the Danger which *Moses* was in. *Excommunication* does not seem to be the Punishment; for before *Circumcision*, they did not look on any to be Members of the Church. The *Excision* threatned, was an *Exclusion* from the Blessedness of the Life to come, which was promised in the *Covenant of Abraham*. Nevertheless, there seems to be also an *Excision*, which was a *Forensic Punishment*: The *Excision* spoken of, when *Capital Crimes* are spoken of: And then the Sense of it, must be gathered from the special Sorts and Wayes of inflicting the *Punishment*, which those Crimes have in the Law assign'd unto them.⁷¹

70 Heidegger (1:41–43, Exerc. II, § 13). The meaning of the phrase “*The Cutting off of the Soul*” (Gen. 17:14) is disputed among Hebrew commentators, but all agree that it was done by “the hand of God.” Some argue it signifies that the uncircumcised child is cut off from the world to come, but Ibn Ezra clearly rejects this interpretation (*Commentary on the Pentateuch* 1:186). See also Talmud tractate Shabbath (132b, 133b). Heidegger’s second-hand quotation from the unidentified Rabbi Elias ben Moses is taken from a manuscript acknowledged by John Selden and signifies, “Every Chereth [punishment] mentioned in the law is inflicted by the hands of God, in a punishment either of the body or of the soul.” Abarbanel’s commentary on Num. 15:22 reads, “A shortening of the Days of the Sinner, and death before the natural end of his lifespan in this world {which is death}, is effected by an act of heaven.” The phrase in braces {}, which Mather omits, is here restored from Heidegger. Buxtorf’s explanation appears in his exposition of קָרַח [karath] (cut off, torn off) in his famous *Lexicon Chaldaicum, Thalmudicum* (1639), col. 1100–1101; much the same is in his *Lexicon Hebraicum et Caldaicum* (1646) 357. One of the best recent studies of Buxtorf’s lexicons appears in Stephen Burnett’s *Christian Hebraism* (103–33). For Rashi’s standard reading, see *Mikraoth Gedoloth* (Genesis 1:197). The best summary of the various positions are in Ibn Ezra’s *Commentary* (1:186).

71 Heidegger (1:42, 43–44, Exerc. II, §§ 13, 14). Rabbi Jarchi (Rashi) interprets the phrase “that soul will be cut off” (Gen. 17:14) as sterility: “In this stands ruin, that a man should die childless.” The Greek word ἀτεκνος [ateknos] (LXX Gen. 15:2) signifies “childless.” In this reading Rashi follows Talmudic precedent (Talmud tractate Yevamoth 55a and Mo’ed Katan 28a) – both in *Mikraoth Gedoloth* (Genesis 1:197). Maimonides argues for the total extinction of body and soul, in *Mishneh Torah: Hilchot Teshuvah* (8.1, 5). Abarbanel, however, reads the phrase more allegorically: “The soul will be destroyed by that supreme Scepter of Life, and will not obtain the splendor of godliness.” Circumcision as the visible sign of God’s covenant with Abraham and his descendants is mentioned in Gen. 17:9–10. Heidegger’s summary of the major Christian positions appears in § 13 (1:42–43). The Greek word *θειλατον* [theilaton]

We find the *Patriarchs* also entering into *Covenants* now and then; and that with *Idolaters*. *Necessity* compelled them to it: And they might say, with *Solomon*, in *Josephus*: *Ἡμεῖς οὐκ ἀπὸ ἀνθρώπων τὴν φύσιν ἐσμεν, οὐδ' ἀλλοτριῶς πρὸς τοὺς ὁμοφύλους ἐχομεν*. *Non sumus inhumano ingenio, neque malè affecti ergò extraneos.*⁷²

§ From the *Policy* of the *Patriarchs*, Lett us pass on to their THEOLOGY. What Form and State of the *Church*, was observed among the *Patriarchs*, is not plainly declared unto us. It is a pleasant and popish Fancy, in *Sanders* and others, to sett up a fine Universal Ecclesiastical Monarchy among them. The confusion sent among the Builders of *Babel*, proclaimed the Displeasure of *Heaven* against such an Undertaking. And, by the way, why did not *Noah*, if he had been such a *Pope*, restrain *that* Evil Undertaking?⁷³

[172v] The *Teachers* of the Church, could then inculcate none but the Lawes of GOD, and what GOD had Reveled unto them. It looks, as if till the Dayes of *Moses*, those who were called, *The Elders*, were the *Pastors*, | and *Rulers* of the Churches. Possibly, they were not without their *Associations*; whereof each one, was called in the Writings of the After-ages, *Domus Judicij*; and *Maimonides* tells us of them, *Docebant homines ad morem concionatorum*. The Orientals have such a Notion among them. *Elmacinus* tells us, That *Mahalaleel* before he dyed, ordained *Jared*; of *Jared* he reports, *Et rexit populum suum Regimine pulchro.*⁷⁴

means “caused by a god.” Among the capital crimes here alluded to are the breaking of the Sabbath, adultery, incest, blasphemy, and idolatry.

72 Mather here summarizes Heidegger (1:44–45, Exerc. II, §§ 15, 16, 17, 18). Among the “idolaters” (non-Hebrews) with whom Abram covenanted are “the Amorite, brother of Eshcol, and brother of Aner” (Gen. 14:13), Abimelech (Gen. 21:27), and Laban (Gen. 31:44). Heidegger’s slightly diverging Greek citation from Josephus Flavius’s *Antiquities* is by William Whiston translated as follows: “we are not ourselves of an unsociable nature, nor behave ourselves like enemies to such as are not of our own people” (*Antiquities* 8.4.3 at the end). See also 1 Kings 8:43.

73 Heidegger (1:46–77, Exerc. III: “Ecclesia et Theologia Patriarcharum”). Mather’s excerpt is from § 3, pp. 48–49. Heidegger evidently had in mind *De visibili monarchia ecclesiae, libri octo* (1571), an exegetical work by Nicholas Sanders (c. 1530–81), a prominent English Roman Catholic exile during the reign of Elizabeth I, suspected of trying to depose her. Heidegger also mentions Johannes Cocceius, the Reformed theologian and professor of oriental languages at Leiden, whose argument about a spiritual dispensation of grace, distinct from Christ’s visible Universal Monarchy, smacked too much of what Protestant eschatologists believed was the endeavor of the papal Antichrist to become Universal Monarch (see Mather, *Threefold Paradise*, 237–38, 416 note 5). According to Gen. 11:4–7, God confounded the language of those engaged in building the Tower of Babel to ensure their dispersal over all the earth. Noah – progenitor of the entire postdiluvian population – knew better than to established himself Universal Monarch, Mather seems to argue, with Heidegger at his elbow, that the OT patriarch knew this office belonged to one greater than him.

74 Heidegger (1:50, Exerc. III, § 5). The elders or rulers of the church associated in the *bet-din* or “House of Justice” (of Eber); Maimonides relates that they “instructed men about the law of gathering them together / indoctrination” (*Liber Moreh Nebuchim* 2.39.302) [*Guide*, Part II, ch. 39, p. 231]. Finally, Georgius Elmacinus relates that according to an Eastern tradition

Aristotle, with other ancient Writers, does observe, That in those Heroic Times, He that was the *General* and *Governour*, was also, *Rerum Divinarum Moderator*. It is not improbable, that among the Patriarchs, the *Political* and *Ecclesiastical* Power, was lodged in the same Person; which, Conjunction of Power for the Slothfulness, & Luxury, and the too many Employments of the Princes, was afterwards abrogated by God. However, the *Power* exercised by the *Patriarchs*, in *Sacred* Matters, was not so absolute, as in *Civil*; No; as *Heidegger* saies, *In Ecclesiasticis, nulla Jurisdictio, Imperium nullum, locum habere potuit*. The Jewes after the Return out of *Babylon*, would fain (against the Mind of God,) have united this Power again. In the Christian Church, he that goes to unite them, does, as tis expressed by *Synesius*, κλωθειν τα ασυγκλωστα, *Conglomerare inconglomerabilia*.⁷⁵

We find, that there were *Preachers*, and *Prophets* among the *Patriarchs*. And they had something more than the Dictates of Mens Natural and Enfeebled *Light*, to preach upon. *Divine Revelation* was afforded unto them; for, according to the Golden Saying of my *Heidegger*, *Quicquid Deo Auctore non sit, impossibile est ut cum bonâ conscientia fieri possit*. *Cæstrial Apparitions* were very frequent among them. The Son of God, in the *Shechinah*, frequently made His Descent among them. He who is called, *The Speaker*; [Isa. 52.6.] tells us; Isa. 48.16. That He *spoke from the Beginning*. Our Saviour seems to apply those Words unto Himself; when He tells the Jewes; Joh. 8.25. *I am He that spoke unto you from the Beginning*.⁷⁶

The *Patriarchs* might be sure, That in these *Apparitions*, they were not by *Evil Angels* imposed on; First, By the Inimitable *Glory* of the *Shechinah*, wherein the Son of God appeared. And, Secondly, By the Tendency, the Sanctity, the Majesty of the Things that were *spoken*, when He appeared. For, as *Heidegger* well observes; *Veritatis et Sapientia ea vis est, ut non possit non splendere in Animo* εὐ διακειμενω, *rectè disposito*.⁷⁷

Mahalaleel, Cainan's son, ordained his own son Jared (Gen. 5:12–15), who “ruled his people with noble guidance,” in Hottinger (*Smegma Orientale*, lib. 1, cap. 8, p. 234).

⁷⁵ Heidegger (1:50–51, Exerc. III, § 6). In his *Politica* (3.14.1285b, 22–23), Aristotle argues that in the heroic ages, the ruler was “a general and a judge, and had the control of religion.” Among the other ancient writers (here alluded to) who point to the union of scepter and miter are Livy (2.2.1–2), Cicero (*De divinatione* 1.40.89), and Dionysius Halicarnassus (*Antiquitates Romanae* 5.1.1–4). The Latin citation from Heidegger reads, “In churches, jurisdiction and political power can have no common ground” (1:50, § 6). The Christian Neoplatonist Synesius of Cyrene (c. 370–413 CE), bishop of Ptolemais, argues that he who unites both secular and spiritual power “twists together that which must not be spun together” (*Epistulae adversus Andronicum* 57.271).

⁷⁶ Heidegger (1:51, 52, 53, Exerc. III, §§ 8, 10, 12). Heidegger's “Golden Saying” (§ 10, p. 52) declares, “Whatever does not have God as its originator cannot possibly come about with good conscience.”

⁷⁷ Heidegger (1:55, Exerc. III, § 17). He observes that “This is the power of truth and knowledge that it cannot fail to sparkle in a properly ordered mind.”

But the Foundation, and Epitome, of the whole Revelation granted unto the Patriarchs, was in that famous Promise, Gen. 3.15. *I will putt Enmity, between thee and the Woman, and between thy Seed and her Seed: It shall bruise thy Head, and thou shalt Bruise his Heel.* This *Protevangelium*, had the Marrow and Substance of all the Gospel in it.⁷⁸

Hence the Patriarchs came to such a *Creed* as this; *That* they were by Nature *Dead in Sin, Captives to Satan, and Cursed* of God. *That* nothing but the Sovereign and Powerful *Grace* of God, could bring them out of this Condition: *That* God will alwayes have a *Church* in the World; whereof the *Messiah* is to be the *Head*: *That* the *Messiah* had undertaken to be the *Redeemer* of His Church, from the *Miseries* which the *Fall* ha's brought upon us; *That* the *Messiah* should one Day be *Born of a Virgin*, & be *God and Man in One Person*, and accomplish what He had engaged: *That* the *Messiah* should therefore *Dy*, in the room of his Elect, and so make Expiation for their Offences; whereby the *Divel* should lose his Power, and *God* should without any Damage to His Justice, bestow Salvation on His People: *That* they who will approve themselves the People of the *Messiah*, must suffer Persecutions, until they enter into Everlasting Life: *That* the *Wicked* shall treasure up for themselves *Wrath against the Day of Wrath*, and be adjudged by the *Messiah* unto Eternal Perdition with the *Divel and his Angels*.

This Faith, illustrated with several and successive Revelations, the *Patriarchs* taught in their Assemblies. The *Names* of their *Sons*, carry in them a Confession of sundry Articles thereof.⁷⁹

In the Dayes of *Enosh*, the *Seed of the Serpent*, and the *Seed of the Woman*, came to a more visible *Separation*. About the *Faith* of the *Patriarchs* in these, and the following Times, we have notable Intimations, in the *Eleventh Chapter* to the *Hebrewes*. Unto which *Faith*, there is opposed, Heb. 10.39. ἡ υποστολή, *Subductio*: which means, A *Withdraw* from the true | *Messiah*, to some *other Hope* of Blessedness. The *Rock* on which the *Temple* stood, was in the Apostles Dayes, the Thing opposed unto this *Rock of our Salvation*.⁸⁰

The Difference between the *Church* of the *Patriarchs*, and the Church of the *Israelites*, is considered in the Sacred Scriptures. We read, Isa. 54.1. *More are*

⁷⁸ Heidegger (1:56–57, Exerc. III, § 24).

⁷⁹ Heidegger (1:57–58, 60, Exerc. III, §§ 26, 33). The wicked shall store up “wrath against the day of wrath” (Rom. 2:5). The names of some of the patriarchs’ sons suggest articles of faith: “Cain” signifies “possession,” “Abel” “breath,” “Seth” “compensation,” “Enoch” “dedication,” and “Mahalaleel” “praise of God.”

⁸⁰ Heidegger (1:62, Exerc. III, § 37). The notable intimations of the patriarchs’ faith appear in Heb. 11:9, 13, 17, 39. Unto faith is opposed “hypostole,” “a letting down, a shrinking back” [Strong’s # 5289]. Mather puns on the rock on which the Temple stood, Mt. Moriah, on which according to tradition Abraham offered up Isaac (Gen. 22:2, 2 Chron. 3:1); and the rock of our salvation (Christ, the savior, and Peter, on whom Christ’s Church would be built). Thus by implication, Mather argues the children of Abraham rejected Christ and his Church, the rock or corner stone of salvation (2 Sam. 22:3, 47; Ps. 18:2, 89:26, 95:1; Matt. 21:42; 1 Pet. 2:6–7).

the Children of the Desolate, than the Children of the Married Wife. My Heidegger takes the Church of the Patriarchs, to be the Desolate: It had not such Rulers, to be like Husbands lording over it, as the Church of the Israelites had; and it had no Offspring, while the Church of the Israelites was extant. But now the Children of this Desolate Church, are all the Faithful of the New Testament; who become the Children of God, only by Faith in the Promise made unto the Church of the Patriarchs; and not by Subjection to the Law, which the Church of the Israelites had as a Yoke upon it. Moreover, Sarah was a Type of the Church of the Patriarchs; and of the New Testament; as Hagar was of the Church of the Israelites; which is an Allegory, that our Apostle ha's elegantly prosecuted, in his Epistle to the Galatians.⁸¹

In the External Worship of the Patriarchs, we find Sacrifices, as early as just after the Fall; and a Distinction between Clean and Unclean Creatures for this Purpose before the Flood. The Patriarch and his First-born, were they, who offered the Sacrifices of their Families, & wore the Character of the Priesthood. An Imitation of such a Priesthood we find, in all the Antiquities of the Nations. But the Rite of Sacrificing, must needs originally have been a Matter of Divine Revelation and Institution. And, the εμπυρισμον, or, Inflammation from Heaven, was the usual Sign, that the Sacrifices found Acceptance. As the Sacrifices were accounted, the Food of Heaven, this Consumption was look'd upon, as its Eating the Food. This was a Type of the Holy Spirit falling on the Faithful, whereby we ourselves become Sacrifices unto God. And perhaps, in Allusion to this, are those Words, Matth. 3.11. Of being Baptised with the Holy Spirit & with Fire. [Compare, Act. 2.4.] And hence that Expression; 1. Thess. 5.19. Quench not the Spirit.⁸²

We read not of any Sacraments præscribed and practised among the Patriarchs before the Flood. Except the Weekly Sabbath should be look'd upon, as then observed; which for my own Part, I beleeve it was: but my Heidegger won't hear of That.⁸³

Quere, whether any such thing as Excommunication was used among them? Selden ha's proved, That there never were more than Two Sorts of Excommunication; The Niddui, and the Cherem. The Schamatha was but a Degree of the Niddui; a carrying on the Niddui a Month longer, if the Offendor did not within

⁸¹ Heidegger (1:66–67, Exerc. III, § 47). St. Paul's allegory of the two churches is explained in Gal. 4:22–27.

⁸² Heidegger (1:68–71, Exerc. III, §§ 51, 52, 53, 54). John Selden has much to say on the role of the patriarchal priesthood, feasts, and sacrifice among the ancients, both pagan and Israelite, in his *De Synedriis* (lib. 1, ch. 16, pp. esp. 642–56). See also Tibullus (*Elegiae* 2.1, 5), Marcus Porcius Cato, the Censor (*De agri cultura* 132–135, 140–42), and Philo Judæus (*De vita Mosis* 2.224). The Greek word “empyrismon” signifies “burning” (LXX, Num. 11:3, Lev. 10:6) as a sign that the burnt offering was accepted by God. For the same argument, see Rashi's commentary on Gen. 4:4 (*Mikraoth Gedoloth: Genesis* 1:65) and Ibn Ezra (*Commentary* 1:81).

⁸³ Heidegger (1:73–74, Exerc. III, § 58).

the First Month come unto Repentance.⁸⁴ The Offender was hereby separated from the Society of the Church, yea, and of his own Domesticks, that he might not come within *Four Cubits* of them. If in three Months he Repented not, then came the Thunder of the *Cherem*; which allow'd him, neither to *Teach* nor to *Learn*, and which forbad all People, to eat with him, or to have any Dealings with him; and laid him under direful *Curses*, fetch'd from the *Twenty Eighth* of *Deuteronomy*, and other Scriptures. But after all that *Selden*, and *Buxtorf*, and *Cocceius*; and *L'Empereur*, and others have written of this Matter, tis very clear, that such an *Excommunication* was unknown in the more early Ages; and that it was rather an *Humane Institution*, than a *Divine*, introduced after the *Israelites* fell under the Power of the *Chaldeans* and the *Persians*, and could not exercise their Jurisdiction as in their own free Commonwealth formerly they did use to do; and so by *Common Consent* they erected a *Church-Discipline*, by which they might keep their own People in an awful Obedience unto the Lawes of God.⁸⁵ This is *Grotius's* Opinion, and a very probable one. *Nam* (saies he) *in lege nulla earum poenarum mentio, neque in veteri Historiâ populi illius*. The Reasons brought by *Bertram*, for the use of such an *Excommunication* among the *Patriarchs*, are very little ones.⁸⁶ As for the *Maranatha*, or, an *Anathema* dispensed under such a Denomination; the *Hebrewes* are Strangers to it. Only *Nic. Flammel* tells of a *Chymical Book* written by one *Abraham*, a Jew, in *France*, to his own | Countreymen; to which there was prefixed, an horrid Heap of *Curses* against all that should look into the Book, except *Priests* and *Scribes*; and at every turn, the Word, *Maranatha*, repeated among the *Curses*.⁸⁷ My *Heidegger* thinks, That *Maranatha*, was no *Form of Imprecation* at all; but, *Symbolum omnium*

[174v]

⁸⁴ Heidegger (1:74–75, Exerc. III, § 59). Selden's discussion of excommunication and the severity and duration of punishment among the ancient Israelites appears in *De Jure Naturali* (lib. 4, c. 8, pp. 510–18) and in *De Synedriis* (lib. 1, cap. 7, esp. pp. 108–10, 116–21).

⁸⁵ For Selden, see note 84. Johannes Buxtorf's lexical explications of "Schamatha" (שָׁמַתָּה) and the various juridical applications of "Niddui" (separation, ban) and "Cherem" (anathema, excommunication) are given in his *Lexicon Chaldaicum, Thalmudicum* (1639), col. 2462–70. They regulate the degrees of punishment and forms of expulsion from the synagogue. Johannes Cocceius's explanations appear in his *Duo tituli Thalmudici Sanhedrin et Maccoth* (1629) 147. The Dutch Orientalist Constantinus L'Empereur (1591–1648), professor of Hebrew at Leiden, translated the Mishnah and Talmud into Latin. His discussion of excommunications appears in his *De legibus Ebraeorum* (1637) 156 and 269–71. See also Maimonides's *Mishneh Torah: Hilchot Talmud Torah* (7).

⁸⁶ Grotius's opinion is given in his commentary on Neh. 13:25 (*Annotationes* 1:197) and suggests, "For there is no mention of these punishments in the law, neither in the ancient history of that people." Mather dismisses the argument of his Swiss colleague Cornelius Bonaventura Bertramus (1531–94), professor of Hebrew at Geneva and Lausanne, who discusses the Hebrew practice of excommunication in his *De republica Hebraeorum* (1641), cap. 2, pp. 20–23.

⁸⁷ *Livre des Figures hiéroglyphiques*, allegedly copied by the Parisian alchemist Nicolas Flamel (1330–1418), was published in, *Trois Traitez de la Philosophie Naturelle* (1612), a collection of medieval and Renaissance alchemical works. Flamel refers to the pseudonymously written Rosicrucian work by Rabbi Abraham Eleazar's, whose *Chymical Book* sported the mysterious curse "maranatha" on its pages to warn off all but the most worthy initiates.

Christianorum, Adventum Domini confitentium; a Sort of *Symbol*, and *Signal*, by common Agreement used among all the Primitive Christians, to express their *Faith* in the *Coming* of our Saviour; and they express'd this *Faith*, usually when they denounced the *Curses* which they must expect, who denyed the Blessed JESUS, or proposed any other Saviour.⁸⁸

Lett us follow the *Patriarchs* to their *Graves*. It seems, that *Funerals* were solemnized with great Respect and Honour among them, and with much of Decency. We find this often Instanced, in the Ages after the *Flood*; and may well suppose it, *before*. And what became then of the *Souls* of them who *walked with God*, may be gathered, from the Nature of the World, unto which we may conclude *Enoch* was translated.⁸⁹

But so much for our present Entertainment. We shall have Opportunity to consult with our *Heidegger* again, I suppose, before we have done with the Book of *Genesis*.

Q. The *Successors* of *Seth*, in the Genealogy of the Antediluvian Patriarchs, are they all *Eldest Sons*? v. 32.

A. This is very uncertain, yea, very unlikely. The *Sons* mentioned, were those, whom God in the *Shechinah* chose, for the Emperours of the World, as well as the Ancestors of the Messiah. In this, He was far from obliging Himself to the *Primogeniture*.

And this gives us a clear *Idea*, of the Different Age, in which we find the Patriarchs having the Son of the Line born unto them. Some at little more than *Sixty*; Others at above *One hundred & Eighty*.⁹⁰

Q. But then, how comes *Noah*, to be 500 Years old, before he ha's his Three Sons? v. 32.

A. *Noah* was assured of the Coming of the Deluge; & was afflicted with the Wickedness of the World. He might be under a peculiar Direction from God therefore to act a different Part from his Predecessors. From these Considerations he might justly be induced not to marry so soon as others: And having Three Sons, to order his affaires, that they might not marry till the very time that the Flood came; that so, he & his Wife, & his Sons & their Wives, might

⁸⁸ Mather provides his own translation of the Latin citation from Heidegger (1:75, § 59).

⁸⁹ Heidegger (1:75–77, Exerc. III, §§ 60, 61). Ancient funeral rites are mentioned in Gen. 23:2–6. Enoch's translation is suggested in Gen. 5:24, and the state of the hereafter in Heb. 11:13–15. Josephus Flavius also describes Jacob's rite of mourning over the supposed death of Joseph (*Antiquities* 2.3.4).

⁹⁰ Heidegger (1:146–47, Exerc. VI: "De Cainitis et Sethitis," § 25; Exerc. XIV: "De Longaevitate Patriarcharum," § 8). Cainan's son Mahalaleel fathered his son Jared at age 60 (Gen. 5:5); Methuselah begat Lamech at age 187 (Gen. 5:25), and Lamech obliged his father with Noah at the age of 182 (Gen. 5:28).

not have the Incumbrance of young Children on them in the *Ark*, where they were to have so much other Work to mind.⁹¹

[175r]

Q. What may be the True Cause for the *Longevity* of the *Antediluvian Patriarchs*, and for & by what Cause has the *Life* of Man been since abbreviated? v. 32.

A. We will not enter into any Disquisition of the *Year*, which was used in the Computation of the *Patriarchs*. The Words of *Petavius* make some Impression upon me; *Quo Anni genere usi fuerint tum homines, nondum certò comperi. Credibile est, communes saldem adhibuisse Trecentorum et Sexaginta Dierum; quos identidem Intercalaribus auferent.* Or, I could be content with *Heideggers* Conjecture; That the *Months* of the *Patriarchs*, were *Lunar* ones; which was the most ancient and natural sort of Reckoning; And the *Years* were framed accordingly: but brought into a tolerable Correspondence with *Solar Years*, by seasonable *Intercalations*.⁹²

But we will not Forgive the *Chronology* in our present Copies of the LXX. Some licentious Transcribers of what was in the *Ptolomean Library*, imagining that the *Egyptians* would laugh at the Account which *Moses* gives, concerning the *Longevity* of the *Patriarchs*, would needs have the *Years* in the *Mosaic* Account, extend no further than a *Lunæ Senium*, and to be but so many *Months*; For that the *Egyptians* had such *Years* also. *Plutarch*, and *Diodorus Siculus*, and *Pliny* have informed us.⁹³ They have therefore added a *Century*, unto the *Years*

91 Extracted from Heidegger (1:333, Exerc. XVII, § 21; 1:346–47, XVIII, § 5; and 1:410, XX, § 4). Mather here accepts Heidegger's position but rejects that of his vade mecum Simon Patrick, who argues that "Moses sets down only those Persons by whom the Line of *Noah* was drawn from *Seth*, and *Abraham's* Line from *Noah*, by their true Ancestors; whether they were the eldest of the Family or no *Noah*, we may be confident had [children] before he begat *Sem*, *Ham*, and *Japhet*," even if Moses does not mention them (*Commentary* 1:30, on Gen. 5:6).

92 Heidegger (1:215, Exerc. XII: "De Anno Patriarcharum," §§ 12). See also Nehemiah Grew's *Cosmologia Sacra* (bk. 4, ch. 4, § 6, p. 185). Joseph Justus Scaliger's *De emendatione temporum* (1583), an outstanding attempt of the period to harmonize the calendars of the ancients, was surpassed by *Rationarum temporum* (1633), a study of ancient chronology, by the renowned French Jesuit Dionysius Petavius (1583–1652). This learned Jesuit impressed the Puritan Mather with the words, "I have not yet worked out what kind of year men used in those days. It is believable, at least, that years of three hundred and sixty days were universally employed, and that they expanded them repeatedly by adding intercalends" (*Rationarium Temporum*, lib. 2, cap. 1, § 11). The longevity of the ancient patriarchs posed a perennial problem for biblical commentators; attempts to interpret their incredible lifespan as lunar years (28 days) rather than solar years (365 days) were not universally accepted (Heidegger 1:216–17, Exerc. XII, esp. §§ 15–17). See note 4 (above).

93 Heidegger (1:224–25, Exerc. XIII: "De Ætate Patriarcharum Antediluvianorum," §§ 11, 13). The translation of the Hebrew Bible into Greek (LXX) was ordered by Ptolemy Philadelphus for the library in Alexandria, Egypt (Draper, *History* 19–20). The "*Lunæ Senium*" is the "waning of the moon," i.e., lunar years of 28 days each (1:225–26, Exerc. XIII, § 13). Plutarch (*Vitae Parallelæ*: *Numa* 18–19) details the intercalation of days and months in the ancient Greek and Roman calendars; Pliny (7.48.155) comments on the different calendars and means

of Generation, in the First, Second, Third, Fourth, Fifth, and Seventh Instances: Because else, the Number of Years assigned in the Bible for Generation in the Patriarchs, would not have brought them, unto an Age sufficient for it. But in the Sixth, and Eighth, and Ninth Instances, they have made no Immutation; because, at so many *Months*, as the Hebrew Annals here assign *Years*, the Lads might be capable of Generation. But this is a Computation that needs no Confutation. Accordingly, the Credit of the LXX is gone also beyond Recovery.⁹⁴ And tho' *Baronius* has gathered a *Cloud of Witnesses*, which emboldens him to say, *Catholicam Dei Ecclesiam in supputando Annorum numero Septuaginta Interpretes sequi consuevisse*; (In which by the way, he bears hard upon the *Vulgar Version*, which the Council of *Trent* made *Authentic*, tho' it follow not the LXX. and such famous Authors among the Papists, as *Pererius*, and *Bellarmino*, and *Torniellus*, and *Malvenda*, and *Petavius*, and others, who renounce the LXX:)⁹⁵

of measuring time in use among the ancients, which circumstance, he says, accounts for the incredible longevity among some of the ancients; and *Diodorus Siculus* (1.26.1–5) points out that the Egyptian priests used a calendar that measured the time between “the reign of Heliuss to the crossing of Alexander into Asia” (334 BCE) as 23,000 years. Egyptian legend reports that while the ancient gods ruled for more than 12,000 years, the more recent ones only for about 300 years (seasons). Some of the ancients therefore argue that before the movement of the sun was understood, years were counted by lunar cycles. By this reckoning, men could easily live for 1,200 lunar years. *Diodorus Siculus* adds that those of the Egyptians whose longevity was 300 years (seasons) thus only lived for 75 solar years of 4 seasons each – the year being “composed of the four months which comprise the seasons of each year.” For this reason, the Greeks called their years “horoi” (seasons), and their annals “horographs,” i.e., “records of seasons.”

94 Mather had visited this topic several times before (see his commentaries on Gen. 4:26 and on Gen. 5:3, above). The conflicting chronological data given in the LXX and in the KJV required some sort of explanation. For instance, while the LXX lists the age of paternity of Adam as 230, of Seth 205, of Enos 190, of Cainan of 170, of Mahalaleel 165, of Enoch 165, the KJV lowers their age of paternity by 100 years each (Gen. 5:3, 6, 9, 12, 15, 21). The only agreement between the LXX and KJV occurs in Gen. 5:18 where both versions give Jared's age as 162 years when he fathered Enoch. Furthermore, the ages of Methuselah and Lamech in the LXX are listed, respectively, as 167 and 188, whereas the KJV allows for 187 and 182 years (Gen. 5:25, 28). Following Heidegger's precedent, Mather argues that “They,” i.e., the copyists of the LXX who used lunar years of 28 days each, “added a *Century*, unto the Years of Generation” in those instances where the ages of the patriarchs would otherwise have been too young for procreation (Heidegger, 1:224–25, Exerc. XIII, § 11). Richard Simon (*Critical History of the OT*, bk. 2, chs. 1–10), Isaac Vossius (*Critical Enquiries*, chs. 16–18), and many others point at the hundreds of major and minor textual, stylistic, and substantive disagreements between the LXX, Vulgate, and Hebrew versions of the Bible; hence Mather's laconic reference to the Septuagint's irrevocable loss of credibility.

95 Cardinal Caesar Baronius (1538–1607), eminent scholar and librarian of the Vatican Library, gathered his “Cloud of Witnesses,” in his *Martyrologium Romanum ad novam Kalendarii* (1586). Mather's second-hand citation from this work translates, “The Catholic Church of God has been accustomed to following the Seventy Interpreters [Septuagint] in calculating the number of years” (Heidegger, 1:223, Exerc. XIII, § 5). The Council of Trent (1545–63) was convoked by Pope Paul III to consolidate RC strategies for the Counter-Reformation. The Latin Vulgate, whose revision was enjoined in 1546, did not acquire its final version until 1592 (ODC). Among Roman Catholic critics of the Vulgate and of the LXX versions of the OT are (1) the Spanish Jesuit Benito Pereira (Pererius) of Valencia (1535–1610), whose *Commentari in*

It is well-known, That *Austin*, and *Jerom*, the Two Learnedest of all the *Latin Fathers*, condemned the Greek Version, when they discussed that Quæstion; *An in dinumeratione Annorum, Hebræorum magis quàm Septuaginta Interpretum sequenda sit Auctoritas?*⁹⁶

We will proceed then to consider the *Long Life* of the *Patriarchs*. And in the Consideration of it, we will chiefly employ the Collections of *Heidegger* in his *Exercitation* on that Noble Subject.⁹⁷

If you will be at the Pains to consult the *Forty Eighth* Chapter, in the *Seventh* Book of *Pliny*, you will find a Notable Assembly of *Long-Livers*, whom that well-known Writer has gathered together. Many other Ancient Authors have Reported remarkable Instances of Aged Persons; and one *Phlegon* particularly ha's written, *περι μακροβίων*. Of later Times, every one ha's heard of the famous Englishman, *Parr*, who lived one hundred and fifty two Years. *Peireskios* was informed, as *Gassendus* informs us, in his *Life*, of a Man then in *Persia*, that was counted Four Hundred Years old. They affirm of *Johannes de Tempore*, who was an Officer of *Charlemaign*, that he arrived unto the Age of *Three Hundred*.⁹⁸

Genesim (1589–98), in 4 vols., and *Selectae disputationes* (1601–1610), in 5 vols. were frequently reprinted; (2) Cardinal Roberto Francesco Romolo Bellarmine (1542–1621), librarian of the Vatican Library, whose scholarship Mather respected highly; (3) Agostino Tornielli (1543–1622), learned Italian theologian and chronologer whose popular *Annales sacri et profane* (1611) went through several editions; (4) Thomas Malvenda (1566–1628), learned Spanish Dominican exegete and translator of the Hebrew OT into Latin, whose *Commentaria in sacram scripturam* (1650) was accessible at Harvard Library (*Catalogus* 23); and (5) the previously mentioned Jesuit Dionysius Petavius, whose *Rationarium temporum* (1633) is quoted above.

⁹⁶ Heidegger (1:223–24, Exerc. XIII, § 7). Mather here cites the Latin chapter title of Augustin's *De Civitate Dei* (15.13) [PL 41. 452], which translates, "Whether, in computing years, we ought to follow the Hebrew or the Septuagint" (*NPNFi* 2:293). In this chapter, St. Augustine addresses the conflicting chronological lifespans for some of the earliest patriarchs and insists that the authority of the LXX is not compromised, not because (as later polemicists claimed) Jews had deliberately tampered with the text, but because scribal errors occurred during the copying process. "When first their labors began to be transcribed from the copy in Ptolemy's library," St. Augustine argued in his *The City of God*, "some such misstatement might find its way into the first copy made, and from it might be disseminated far and wide; and that this might arise from no fraud, but from a mere copyist's error" (*NPNFi* 2:293). St. Jerome's preference for the Hebrew-Aramaic rather than LXX translation as the basis for his new Vulgate translation is generally taken as Jerome's condemnation of the LXX.

⁹⁷ Subsequent paragraphs are extracted from Heidegger (1:236 ff, Exerc. XIV: "De Longae-vitate Patriarcharum").

⁹⁸ Heidegger (1:236–37, Exerc. XIV, § 1). Pliny (7.48.153 ff) lists individuals by name whose longevity rivals that of some of the OT patriarchs. Publius Aelius Phlegon, aka. Phlegon of Tralleis (2nd c. CE), wrote a variety of works on Roman topics. His Book of Wonders *De mirabilibus [Peri Makrobion kai thaumasion]*, covering such issues as resurrection, longevity, hermaphrodites, and other wondrous tales, survives only in fragments. Thomas Parr (1483–1635), who is to have lived for 152 years and 9 months, lies buried in Westminster Abbey. The French philosopher Pierre Gassendi was not beyond credulity when he repeated the fourth-hand story of a Persian Methuselah, as related by Lord Peireskios (Nicolaus Claudius Fabricius), in Gassendi's *Mirroure of True Mobility* (1657), bk. 5, pp. 139–40. The same story is told by Simon Patrick (*Commentary* 1:30, on Gen. 5:5), but in the present case, Mather draws his information from

Joseph Scaliger, tells us, That in *Morocco*, & about Mount *Atlas*, they oftner see a Man of an *hundred & twenty Years* of age, than they see a Woman bear *Twins* in *Europe*. Vartomannus assures us, that in *Arabia*, he saw many surviving the hundred & twenty fifth Year of their Lives. The Inhabitants of *Hispaniola*, were commonly above One hundred & twenty Years of Age, when the *Spaniards* first came upon them. The *Hollanders* found at *Java*, a King that was One hundred & Fifty Years old, who at last lost his Life in a Fight. Scaliger himself saw a Person, called *Theobald*, who was an hundred & twenty Years old, and whose Father died at One hundred & thirty. He saies, That his Mothers Great Uncle passed | an hundred & twenty Years, without any Sickness. And elsewhere he tells of an old Man at *Paris*, who at One hundred and Forty was in Good Health, & had the Free Use of all his Limbs.⁹⁹ [176v]

But all these *Old Men*, were Children to the *Antediluvian Patriarchs*; of whose *Longevity* to many *Centuries*, as we have the Testimony of the *Sacred History*, so *Josephus* brings in an Army of Confessions from the ancient Pagan Writers; But the entire Text of *Josephus*, is given us more compleatly, and less corruptly by *Eusebius*, [*Præpar. Evang.* IX. c. 13.] than we have it in the modern Editions of that famous Author. Because it gives us, a little Summ of the Matter, I will Transcribe and Translate the whole Passage, as it lies in *Eusebius*.¹⁰⁰

Heidegger (1:236–37), not from Patrick as Mather had done for his annotations on Gen. 5:3 (above). Charlemagne (742–814), Holy Roman Emperor of the West, must have felt blessed to have such an aged officer as Johannes de Tempore in his service. The story is of the same caliber as that of the giant Suevian, who served in the emperor's army, as related in Joannes Aventinus's *Annalium Boiorum* (lib. 4, pp. 364–65, 420–21, 450).

⁹⁹ Heidegger's second-hand story about the longevity of some Moroccans is from Joseph Scaliger's *Elenchus primæ orationis chronologicae* (1607), §§ 65, 66. The Bolognese traveler Ludovicus Vartomannus (Luigi Varthema, also Barthema) (c. 1465–1517) gives his account in his popular *Ludovicus Vartomani Novum Itinerarium* (1511), lib. 2, cap. 8, which first appeared in Italian (1510), Latin (1511), English (1576–77), and in many other European languages. Vartomannus relates that in the city of Reame (Yerim), Arabia Felix, he talked to many "who were more than one hundred and twenty-five years old, and were still very healthy" (*Travels* 78). Heidegger's source for Native American longevity on Hispaniola (modern Haiti and the Dominican Republic) before the Spanish conquest is most likely Bartholomé de Las Casas, José Acosta, or Antonio de Herrera. These early historians continued the myth of American longevity first started by Antonio Pigafetta, who relates that some Brazilian natives "live a hundred years, or six score or seven score years, or more" (*Magellan's Voyage*, ch. 7, p. 43). Finally, the old man of Paris during the reign of Louis XI, turned 140 in 1584 and, no doubt, lived happily ever after.

¹⁰⁰ Heidegger (1:237–38, Exerc. XIV, § 3). Josephus Flavius, too, felt uneasy enough about the purported longevity of the Israelite patriarchs and referred to his more ancient Egyptian, Chaldean, and Phoenician fellow historians for credence (*Antiquities* 1.3.9). Legion are the editions and translations of Josephus Flavius's works before William Whiston's popular 1737 translation appeared in print. The first edition of Josephus's Greek manuscript was published by Frobenius and Episcopus (Basel, 1544) and was followed in quick succession by many reprints and translations on the continent. The first Latin translation – evidently by Cassiodorus – was printed by Johannes Schüssler (Augsburg, 1470), an incunabula testifying to the importance of Josephus's works to theologians (*Schaff-Herzog* 6.236). More than 100 editions and translations

“Lett no Man, upon a Comparison of the Ages of the Ancients, with our short Lives, imagine the things to be False, which have been written of them; or conjecture from the shorter Measures of our Lives, that the ancients could not have such a Stock of Time to spend upon. For they were dearer to God, and more near to the Immediate Workmanship of His own Hand. They used also a Diet, more likely to preserve their Strength and Vigour, & prolong their Lives for so many Years. There was likewise the Reward of their Vertue in it. And God indulged them a longer Life, that so by a long Experience, they might arrive unto a more certain and exact Knowledge of *Astrology* and *Geometry*, the Arts which themselves had invented: For, if they had not lived at least Six hundred Years, in which Time, *The Great Year*, is accomplished, they could have delivered nothing certain, of those Matters, to their Posterity. Of this, I have as many Witnesses, as there are Authors among the Greeks or Barbarians, that have left us any Monuments of Antiquity. *Manethus* who wrote the *Egyptian* History, and *Berosus* who wrote the *Chaldean*, and *Molus*, and *Hestiaeus*, and *Hieronymus Aegyptius*, who have handled the *Phœnician* Matters, all as one Man concur with me. Yea, and *Hesiod*, *Hecataeus*, *Hellanicus*, *Acusilaus*, *Ephorus* also, and *Nicolaus*, have delivered, That the Ancients lived a Thousand Years.”¹⁰¹

Austin laments it, that we have not left us, the same Demonstration of the *Ages* of the Patriarchs, that we have of their *Bodies*; *Non tamen ideò Fides Sacræ huic Historiæ deneganda est, cujus tanto impudentius (saith he) narrata non credimus, quantò impleri certiùs prænunciata conspiciamus.*¹⁰² And the Words of *Sabellius*, [Ennead. 1. L.1.] on this Occasion, are well worthy to be recited. *Non video, quid magis ineptum fieri possit, quàm cælum et omnia quæ cælo continentur, mira et ineffabili ratione, à Deo condita affirmare, Hominem, Animal nobilissimum, Rationis cœlestiumque rerum capax, quod summus ille universi Autor è*

of Josephus are listed in the *ESTC* alone. In Mather’s time, Eusebius’s *Praeparatio evangelica* (perhaps because of Joseph Justus Scaliger’s textual emendations) remained one of the most accessible anthologies of ancient authors and works now lost.

¹⁰¹ Mather translates Heidegger’s own Latin excerpt from Eusebius’s *Praeparatio evangelica* (9.13.415b–d) and uses much of the same material in his earlier commentary on Gen. 4:26 (above). The excerpted passage from Eusebius originates in Flavius Josephus’s *Antiquities* (1.3.9). Whereas Eusebius’s extract lists “Molus” (Apollonios Molon), the famed orator, grammarian, and teacher of Rhodes (2nd to 1st c. BCE), other editions – including Whiston’s 1737 translation of Josephus – here list “Mochus,” the ancient cosmogonist (*KP* 3:1399, 5:1363). Heidegger (1:237–38) comments on this confusion at some length, but Mather here omits this clarification altogether.

¹⁰² Heidegger (1:238–39, Exerc. XIV, § 4). St. Augustine laments in *De Civitate Dei* (15.9) [PL 41. 447] that his contemporaries are more inclined to believe the gigantic size of the antediluvians than their longevity, because huge bones and molars are frequently found like those of a man at Utica (Greece), whose remains are less certain proof of man’s longevity. (For Mather’s interest in petrified bones and other fossils, see his commentary on Gen. ch. 6, below). At any rate, Augustine cautions, “But we are not on this account to withhold our faith from the sacred history, whose statements of past fact we are the more inexcusable in discrediting, as we see the accuracy of its prediction of what was future” (*NPNFi* 2:291).

*terrâ suscitavit, non potuisse, aut si potuit, non debuisse, quàm diutissimè in vitâ retineri: præsertim mundo adhuc recenti, cùm in tantâ solitudine humano genere aucto imprimis opus esset.*¹⁰³

Abarbanel complains of those /חכמי נוצרים/ *Wise-Men among the Christians*, who have Invented various lesser Dimensions of Years, to abbreviate the *Lives* of the *Antediluvians*, and bring them to the modern Standard. Such there were in *Austins* time; whom he refutes, *Qui putant aliter annos illis Temporibus computatos; id est, tantæ brevitatis, ut unus Annus noster, decem illos habuisse credatur.* I know not, who they were, that so long ago started that Notion; but *Lactantius* taxes *Varro* among the *Gentiles*, for starting of it.¹⁰⁴

The Arguments to refute them, are too many and too obvious, to need any Recitation.

But, since the *Years* of the *Patriarchs*, were as they were, one would wonder that we find it so late, that so many *Years* pass, before they had their Offspring. *Austin* offers Two Reasons for it. One is, That they came later to *Maturity*. But that seems not sufficient. The other is, That they are not alwayes the *First-born Sons*, that are mentioned in the *Genealogy*; *Sed quos successionis ordo poscebat, ut perveniretur ad Noe.* And, with my *Heidegger*, I incline to this Opinion.¹⁰⁵

Maimonides and *Abarbanel* have a fond Imagination, That this *Longevity* was not a *General Thing*; But, *Longævitem hanc non fuisse nisi quorundam singularium commemoratorum in lege; reliquos illorum Sæculorum Annos attigisse non*

103 The second-hand citation from *Enneades sive Rhapsodia* (1504), vol. 1, bk. 1, a history of the world by the Venetian historian and editor Marcus Antonio Coccio Sabellicus (1436–1506), affirms God's power to prolong the patriarchs' lives as long he liked: "I do not see what could be more foolish than to assert that heaven and all that is contained in heaven, which was created by God with his wondrous and ineffable plan, could not (or if it could, must not) prolong the life of Man – the noblest of animals, capable of reason and of understanding heavenly matters, which the almighty Creator of the universe brought up from out of the earth – for as long as he liked; especially when the world was still new, when amidst such solitude the most pressing need was the increase of the human race." Mather's excerpt is much shorter than that in *Heidegger* (1:238).

104 *Heidegger* (1:238–39, Exerc. XIV, § 5). An abridgment of Don Isaac Abarbanel's commentary on the Bible and a dissertation on the patriarchs as giants (Genesis, ch. 5) was available in a Latin translation of Johannes Buxtorf's *Johannis Buxtorfi filii, Dissertationes philologico-theologicæ ... Accesserunt, R. Isaaci Abarbenelis* (1662). Wrestling with the problem of the patriarch's incredible longevity, St. Augustine exhorts his readers in his *De Civitate Dei* (15.12) [PL 41. 450] not to listen to those, "who suppose that in those times [before the Flood] years were differently reckoned, and were so short that one of our years may be supposed to be equal to ten of theirs" (*NPNFi* 2:292). Finally, the Christian apologist Lactantius (*Divinarum institutionum* 2.13) taxes his Roman colleague Marcus Terentius Varro with explaining away the longevity of the ancients: "For [Varro] says that among the Egyptians months are accounted as years: so that the circuit of the sun through the twelve signs of the zodiac does not make a year, but the moon, which traverses that sign-bearing circle in the space of thirty days" (*ANF* 7:62).

105 *Heidegger* (1:242, Exerc. XIV, § 10). St. Augustine's explanation in *De Civitate Dei* (15.15) [PL 41. 456] translates, "but those whose names were required to fill up the series until Noah was reached" (*NPNFi* 2:296).

[177r] *plures, quàm hodiè adhuc communiter fieri solet.* And some others of the Jewes, have thought | that they whose *Lives* were thus peculiarly prolonged by Miracle, were the same that *Moses* calls, *The Sons of God*. But *Nachmanides* earnestly opposes this Opinion. *Cur enim miraculum factum esset illis, qui neque Prophetae, neque Justī, neque Boni erant, ut continuīs aliquot sēculis miraculum ipsis fieret.* Indeed, the Opinion is too plainly False, to need any Confutation. The vast Age of the *Cainites*, as well as the *Sethites*, and the *Gradual Decrease* of Mans Age after the Flood, putts an End unto the Fancy, without any more ado.¹⁰⁶

Some have made their Observation, That we do not find any to have lived a *Thousand Years*. And *Ireneus* tells us of those in his Time, who looking on a *Thousand Years*, as *One Day with the Lord*, supposed the *Death* of every one before they had fill'd up their *Chiliad*, a fulfilment of the Threatning, *In the Day thou Eatest, thou shalt Dy*. My *Heidegger* seems a little more disdainful towards this Observation, than he needs to be; *Id planè dilutum et frivolum est*. But he saies, More probable is the Notion of those, who would have us instructed in the *Nothingness* of our Age, compared with the *Eternity* of GOD, with whom a *Thousand Years* is but as *One Day*. So *Cicero*, [I. Quæst. Tusc. c. 39.] mentioning the Creatures, whereof *Aristotle* reports, *That they live but One Day*, adds upon it; *confer nostram longissimam ætatem cum eternitate, in eadem propemodum ætate, quâ illæ Bestiolæ reperiemur*.¹⁰⁷

¹⁰⁶ Heidegger (1:243–44, Exerc. XIV, §§ 12, 13). Maimonides (Rambam) disallows biblical hyperbole in the longevity of the patriarchs and offers a middle way: “Only the persons named lived so long, whilst other people enjoyed ordinary lengths of life. The men named were exceptions, either in consequence of different causes, as e.g., their food or mode of living, or by way of miracle” (*Guide* 2.47.248). Don Isaac Abarbanel concurs in his commentary on Genesis (ch. 5) that their longevity was caused by a miracle, because men were to multiply and increase their species and to attain perfect knowledge in the sciences, arts, and virtues, which can only be achieved through long experimentation (in Buxtorf, *Dissertationes philologico-theologicae* [1662]). The meaning of “the sons of God” (Gen. 6:2) was hotly debated among the ancient rabbis. Whereas the KJV suggests that they were fallen angels who procreated the fierce Nephilim (giants), R. Simeon ben Yohai called the “sons of God” (bene Elohim) “sons of nobles [princes and judges] and cursed all who called them “sons of God.” R. Hanina and Resh Lakish argued they were called “sons of God” simply “because they lived a long time without trouble or suffering.” However, R. Huna believed they lived so long “that men might understand [astronomical] cycles and calculations” (Genesis Rabbah XXVI:5). Rashi’s explanation that they were “messengers of the Omnipresent,” i.e., “angels,” is closest to that suggested in the KJV (Gen. 6:2, 4), which also accords with *Pirke de Rabbi Eliezer* (ch. 22, pp. 160–61). Nachmanides (Ramban), however, argues that the phrase signifies “sons of judges,” who violated the sacred office of their fathers and preyed on the daughters of men. Finally, Ibn Ezra agrees with Ramban in that he also believes they were “sons of the judges, who performed God’s judgment on the earth” (*Mikraoth Gedoloth: Genesis* 1:81–82). Nachmanides vehemently contradicts Maimonides’s explanation (*Guide* 2.47.248) by asking, “Why should this miracle [longevity] have happened to them since they were neither prophets nor righteous, nor worthy that a miracle be done for them, especially for generation after generation?” (*Commentary on the Torah* 1:99).

¹⁰⁷ Heidegger (1:244–45, Exerc. XIV, § 14). Irenaeus mentions his contemporaries’ relative view of longevity (Ps. 90:4) in his *Adversus haereses* 5.23.2 (ANF 1:551–52). Heidegger’s disdain

But now, for the *Causes* of this wondrous *Longevity* in the *Patriarchs*, there are those, who with R. *Levi*, make it simply, *Opus Providentiæ, non Naturæ*. We may allow Both. But it is a Mistake in good old *Cyprian*, to ascribe the present *Brevity* of our *Lives*, unto a Sort of *Old Age* and *Decay* of *Nature*; tho' the Poets before him, had sufficiently flourished upon it. For, how comes *Nature* then to have been at such a *Stand*, for now some Thousands of Years together?¹⁰⁸

The *Causes* assigned by *Josephus*, will be found upon Examination, to have no Solidity in them. As for what he saies, of, *The Great Year*, it is proved by *Salmasius*; that among the *Egyptians*, it made no more than *Three hundred & Sixty five Years*. And that the ancients, made their *Greatest Year*, to be *Four Times* as large; in which Period, they imagined a *Revolution* of all the Heavenly Bodies.¹⁰⁹

The Hebrew Doctors, assign Three *Causes* of this Matter. The greater Strength of Humane Bodies, while they were yett nearer the Beginning of the World. The *Purity* of the *Air* in the Antediluvian World; And, The *Temperance* which Men then used in their *Diet*, which was also a very {w}holesome one. *Lyra* ha's adopted these *Causes*. But there is an Insufficiency in them. *Nature* is not spent, and tir'd, (in *Scaligers* Phrase) *ut Asinus ad Molam*. And the World was *cursed* before the *Flood*, as well as after. And our Saviour assures us, That before the *Flood* they liv'd *Intemperately*.¹¹⁰

translates, "this is plainly weak and frivolous" (1:244). Cicero alludes to the relative length of life of the ephemeron (mayfly), which lives but eight hours and "dies at sunset" (Aristotle, *Historia animalium* 5.19.552b, 18–24). "Contrast our longest lifetime with eternity," Cicero ponders in his *Tusculanae disputationes* (1.39.94); "we shall be found almost in the same category of short-lived beings as those tiny creatures."

108 Heidegger (1:245–46, Exerc. XIV, § 15). Maimonides attributes the longevity of the patriarchs to their exceptionality, but limits it only to those who are specifically mentioned in the Bible (*Guide* 2.47.248). The unidentified Rabbi Levi simply makes their longevity a work of providence, not of nature. St. Cyprian of Cathagena (*Treatises* 5.3–4) blames the present shortness of man's life on the decay of nature, which began with Adam's Fall and manifests itself in declining natural resources and the decreasing lifespan of man (*ANF* 5:458–59). The decline of nature is also a philosophical rationale in Hesiod (*Opera et dies* 90–201) and Ovid (*Metamorphoses* 1:89–150).

109 Heidegger (1:246–47, Exerc. XIV, § 16). Josephus Flavius argues that the patriarchs were blessed with longevity, because "they were beloved of God, and [lately] made by God himself; and because their food was then fitter for the prolongation of life." Moreover, "God afforded them a longer time of life on account of their virtue, and the good use they made of it in astronomical and geometrical discoveries, which would not have afforded the time of foretelling [the periods of the stars] unless they had lived six hundred years; for the Great Year is completed in that interval" (*Antiquities* 1.3.9). In his *Plinianae exercitationes* (1629) 552–53, Claudius Salmasius, aka. Claude de Saumaise (1588–1653), Huguenot philologist, classical scholar, and professor of Oriental languages at Leiden University, rejects Josephus's argument about the length of "the Great Year" (600 years), for the Egyptians only warranted 365 years.

110 Heidegger (1:247–48, Exerc. XIV, § 17). The three main causes, here summarized by Don Isaac Abarbanel (in Buxtorf, *Dissertationes*), are extracted from the explications of R. Maimonides (*Guide* 2.47.248) and of R. Nachmanides (*Commentary* 1:98–99) in *Mikraoth Gedoloth* (*Genesis* 1:77 on Gen. 5:4). Nicholas of Lyra, aka. Nicolaus Lyranus (c. 1270–c. 1340), the learned biblical exegete and professor at the Sorbonne, published the first printed commentary

The *Causes* that *Lyra* has added unto these, are also Insufficient. One is, The great Skill that *Adam* had in *Botanicks*, and in *Medicines*, *Quæ faciunt ad conservandam sanitatem, et vitam prolongandam*. But, certainly, the old Men suffered not their Skill, to dy with them. Another is, The good Aspect of the *Stars*, on the Countrey, where they lived. But, methinks, we should then at this day somewhere or other find out such a Countrey. His last is, The Disposition of Divine Providence, that Mankind might be *multiplied*. But the *Multiplication of Mankind*, ha's been marvellously carried on, where Men have lived no longer than they do now; The *Israelites* in *Egypt*, are a Testimony.¹¹¹

One would think, That when a *Physician* comes to handle this Noble Subject, we should see the *Nail hitt on the Head*. But, behold, The learned *Beverovicus*, in his *Thesaurus Sanitatis*, brings in *Peter Mexa* a Spaniard, assigning all the *Causes* of the Primitive *Longevity* already mentioned; and one more; Namely, The Use of *Raw Flesh* among the Antediluvians; For you must note, the Boiling or the Roasting of the *Flesh* for our Tables, consumes the most Nutritive Part of it; and so the *Vitæ Stamina* in us, are not strengthened by our Food. But, Syr; How do you know, that they liv'd upon *Raw Flesh* before the Flood? Or, do the *Animals* that feed on *Raw Flesh* live longer than they that feed on Plants? Or, Do we not by Experience find, that *Crudities* are hurtful and weakning to our *Bodies*? *Cardan* advanced this Notion of *Beverovicus*; but *Scaliger* ha's fallen upon him, with Arguments more efficacious, than if he had *beaten him with the Spitt*.¹¹²

on the Bible. In his *Postilla super bibliam* (1492), vol. 1, n.p., *Lyra* (on Gen. 5) offers the same causality as Abarbanel does for the decline of nature. Citing Joseph Scaliger's verdict that nature is not worn out "like the ass at the mill," Mather (via Heidegger) dismisses their reasoning: if "intemperance" of the postdiluvians is to be blamed for the shortness of our lives, their antediluvian progenitors were no less intemperate (Matt. 24:38, Luke 17:27).

111 Heidegger (1:249–50, Exerc. XIV, § 18). *Lyra* (*Postilla* 1, n.p., on Gen. 5) here seems to follow the thought of Josephus (*Antiquities* 1.3.9) and Nachmanides (*Commentary* 1:98–99) that patriarchal longevity was, in part, fostered by their scientific discoveries, the purity of the air, and God's providence: "They do this in order to preserve their health and prolong their lives." According to Gen. 46:26, the family of Jacob amounted to 76, when they joined Joseph in Egypt. At their escape from slavery 430 later, their descendants numbered 600,000 men, "beside children," women, and a mixed multitude (Exod. 12:37–38, 40). See also Mather's *Threefold Paradise* (275–76).

112 Heidegger (1:250–51, Excer. XIV, § 20). Johannes Beverovicus, aka. Jan van Beverwyck (1594–1647), was professor of medicine at Dordrecht. His medical works were excerpted and anthologized in much of the medical literature of the period. Mather, who owned at least three of Beverovicus's medical works, here refers to his *Thesaurus Sanitatis: Schat der gesontheyt* (2nd ed. 1638), which went through many editions and was translated into several European languages. In ch. 3, Beverovicus cites Peter Mexa, or rather Pedro Mexia (c. 1496–c. 1552), a Spanish historian and imperial biographer, whose *Silva de Varia Lección* (1540) appeared in an English translation as *The Forest or Collection of Historyes* (1576). Mexia explains the longevity of the patriarchs through natural rather than supernatural causation: "Our forefathers had not then *any the causes* whiche [sic] in us now ingender diverse maladyes and diseases, whence necessarily insue stouping age and death" (pt. I, ch. 1, p. 1v). Their healthy diet, moderate living,

Well; But what can our *Heidegger* tell us after all, of the *True Causes*, why such *Long Lives* were indulged unto the *Patriarchs*?

I will give you the Summ of what he saies; Tho' whether it will satisfy or no, *That* I must leave.

It is very sure, That if the *First Man* had continued in his *Rectitude*, his *Life* [178v] had been prolonged, without *Fear of Death*: The Lord would not have *Despised and Destroyed the Work of His Hands*. *Death* is threatned only to the *Sinner*. The *Sibyls* themselves in *Lactantius*, assign *Death*, unto the Seduction of Man by the *Serpent*. [Compare, Rom. 5.12.]¹¹³

The Θεοπρεπεια, and the Agreeableness of it, unto the *Righteousness* and *Holiness* of God, that *Sin* should be punished with *Death*, is not inconsistent, with the Exercise of His *Mercy*, in granting a *Long Life* unto *Sinful Man*. *Sinful Man* staid in *Paradise*, till the *Promise of a Saviour*, the *Blessed Seed of the Woman*, was made known unto him. And upon that *Promise of a Saviour*, there does entirely turn even the Prolongation of *Temporal Life* unto *Sinful Man*. Without this, *Adam* had not lived a *Moment*; and there had not been any Suc-

and close proximity in time to the perfection of the protoplast, accounts for their long lives. Moreover, their knowledge of medicinal herbs, the beneficial influence of stars, fewer eclipses, and the conjunctions of the planets – all these factors contributed to their longevity (Pt, 1, ch. 1, pp. 1r–2v). The “*Vitae Stamina*” is the “thread of life,” which is controlled by the Three Fates. The Italian physician and mathematician Girolamo Cardano (1501–76) lectured on medicine at Milan, Pavia, Bologna, and Rome. He published more than two hundred works on medicine, physics, astrology, and mathematics. The Italian philologist and physician Julius Caesar Scaliger (1484–1558) attacked Cardano on many issues in philology and the natural sciences. In his *Exotericarum exercitationum liber quintus decimus, de subtilitate, ad Hieronymum Cardanum* (1557), Scaliger took issue with his Italian colleague’s scientific and metaphysical explanations of nature, largely because the former defended Aristotelianism against Cardano’s popular *De subtilitate* (1551), a controversial system of cosmogony, which aroused great interest at the time. In “*Exercitationes XXII*,” Scaliger assails Cardano’s approval of Beverovicus’s theories.

113 Heidegger (1:251–52, Exerc. XIV, § 21). Job 10:3. Lactantius (*Divinarum Institutionum* 2.13) [PL 6. 325A] cites the Erythraean Sibyl (*Oracula Sibyllina* 8.260–61): “Death therefore followed man, according to the sentence of God, which even the Sibyl teaches in her verse, saying: ‘Man made by the very hands of God, whom the serpent treacherously beguiled that he might come to the fate of death, and receive the knowledge of good and evil.’” Thus the life of man became limited in duration” (ANF 7:62). The Sibylline Oracles are a collection of exclamatory statements delivering prophetic riddles in hexameter verse and circulated in Athens during the fifth century BCE. Tradition speaks of ten Sibyls – all are said to have gotten their name from the first Sibyl, believed to be the daughter of Dardanus and Neso. The most famous of them all is the Cumaean Sibyl, who is supposed to have sold the oracles to Tarquinius. Because of their strong messianic themes, they enjoyed widespread popularity. The authenticity of the Sibylline Oracles was hotly debated in William Whiston’s *A Vindication of the Sibylline Oracles* (1715) and in Edward Chandler’s *Defense of Christianity* (ch. 1, sec. 1, pp. 10–35). Even though Increase Mather had a low opinion of the Sibyls’ trustworthiness (*Dissertation Concerning the Future Conversion* 23), his son Cotton freely employed them as pagan confirmations of biblical prophecies (*Threefold Paradise* 194–98) and Mather’s essay “IX: Sibyllina,” appended to his commentary on “Revelation,” in “BA.”

cession of any *Posterity* unto him. We may truly say of Mankind; Isa. 6.13. *The Holy Seed is the Subsistence of it.*¹¹⁴

That the *Term of Life*, is Prolonged unto some, and Hastened upon others; this wholly depends on the *Will and Pleasure of God*. And the *Will of God* allows *Life* unto the *Sinner* mainly for this End; That so the Divine Patience and Forbearance may bring the Sinner to the Knowledge of CHRIST the *Mediator*, and such a *Repenting Faith* in Him, as will issue in Salvation; or else leave the Sinner wholly without Excuse. A very *Long Life* was granted unto the *First Patriarchs*, that so they might have Time, to come savingly to know the *Promise* made in *Paradise*, and by a long and accurate Contemplation of it, be able to inculcate it, and propagate it unto their Offspring, and vindicate it from the various Devices of *Satan* against it. The Revelation of this Mystery was more sparingly dispensed in those early Ages, than afterwards; but against that *Severity*; we may throw in this *Compassion* of Heaven; That Men lived a very great while, and had by their long Lives an Opportunity to acquaint themselves with this glorious Mystery. As the *Tradition* of the Mystery of CHRIST, grew more firm and clear, the Faith might be taught in a *Lesser Time*, and the *Life of Man*, was accordingly abbreviated. At last, it came to be committed unto the faithful Custody of *Written Volumes* by the Hand of *Moses*; and then the *Life of Man* was brought down unto the Measure at which it stands to this Day. A *Short Life* now is attended with less Damage to the Children of Men. The Comprehension and Conservation of the Mystery of CHRIST, is now more consistent with a *Short Life*, than it was in the Primitive Ages of the World.¹¹⁵

When the Patriarchs found their πολυημερία, their *Long Life*, beginning to fail, they complained of it, as a very great Calamity. This the Words of *Jacob* to *Pharaoh* intimate. The Reason was, The *Promise* of the *Messiah* held them in a very solicitous Expectation. [Consider, Matth. 13.17. and, Hebr. 11.39.]

As for us; We have a Promise of *Heavenly Blessedness*; and our *Conversation is in Heaven*, whither our Saviour is retired; and we have nothing assigned us on *Earth*, to be any *Pledge* thereof unto our *Faith*. And in a few Years, we may come to *Know* and *Have* more of CHRIST, than the Saints could, when *Longer Lives* were granted unto them; A *Child* now (according to the Prophecy) attains as much, as once a *Man of an hundred Years old*. Wherefore there is not now so much Occasion for the *Lives* of Men to be lengthened out unto the ancient Measures.¹¹⁶

114 Heidegger (1:252, Exerc. XIV, § 22). The Greek word “theoprepeia” signifies “being meet for a god.” The clause from Isa. 6:13 reads “substance” rather than “subsistence.”

115 Heidegger (1:252–53, Exerc. XIV, §§ 23, 24).

116 Heidegger (1:253–54, Exerc. XIV, § 25). The patriarchs’ “polymeria” is, indeed, “their many days.” The prophecy in Isa. 65:20 reads, “There shall be no more thence an infant of days, nor an old man that hath filled his days: for the child shall die an hundred years old; but the sinner being an hundred years old shall be accursed.” See also Mather’s *Threefold Paradise* (281–82).

As for the *Natural Medium*, used by God, in prolonging the *Lives* of the *Patriarchs*, our *Heidegger* flies to the Philosophers Discourse, *περί μακροβιοτητος και βραχυβιοτητος*. And he places *Life*, in a due Proportion of the *Calidum Innatum*, and the *Humidum Innatum*; That the *Radical Moisture*, neither *waste* too fast, nor *cool* too soon. By *Sin* the first Breach was made upon this *Regular Constitution* of Man. And God ha's ordered the Breach to go on, by the Limitations of His Glorious *Providence*, immediately exerted in the Matter.¹¹⁷

And this is the uttermost Account, which my *Heidegger* ha's given of it; wherewith I must content myself, till I can see a better.

I will only Transcribe some Words of Dr. *Cheyne*, upon this Matter; In his, *Essay of Health & Long Life*, his Words are these.

"Every Man had corrupted his Way, and GOD was forced to exterminate the whole Race, by an Universal Deluge, and was also obliged (that the Globe of the Earth might not, from the long Lives of its Inhabitants, become an *Hell*, and an *Habitation* for Incarnate *Devils*) to shorten their Lives from 900 or 1000 Years, to 70. He wisely foresaw, that *Animal Food*, and *Artificial Liquors*, would Naturally contribute towards *this End*; and indulged or permitted, the *Generation*, that was to plant the *Earth* again after the *Flood*, the Use of These for *Food*, knowing that tho' it would shorten the *Lives*, and plate a *Scourge* of *Thorns* for the Backs of the *Lazy* and *Voluptuous*, it would be cautiously avoided by those, who knew it was their *Duty*, and *Happiness* to keep their *Passions* Low, & their *Appetites* in Subjection."¹¹⁸

Appendix.

[179r]

There is an odd Passage in Dr. *Hooks* Posthumous *Discourse of Earthquakes*, which I will here transcribe, without making any Remarks upon it.

"We find that the Points of the Intersection of the *Equinoctial* and the *Ecliptic* vary; and possibly even the Motions of all may vary. A *Diurnal* Revolution of the Earth, may perhaps have been made in a much shorter Time than now. Possibly there may have been the same Alterations in the *Annual*; And

117 Heidegger (1:254–55, Exerc. XIV, § 26). Heidegger refers to the title of Aristotle's *On the Length and Shortness of Life* (464b, 1). The "*Calidum Innatum*" and the "*Humidum Innatum*" are the "innate warmth" and "innate moisture" of a body, which Heidegger (following Aristotle) identifies as the constituting factors that influence the duration of life. Mather offers an alternate explanation in his medical handbook *Angel of Bethesda*, "Capsula V: Nishmath-Chajim," arguing that Adam's sin impacted the nishmath-chajim, or breath of life, which constitutes "a *Middle Nature*, between the *Rational Soul*, and the *Corporeal Mass*" (*Angel* 28). Thus Adam's spiritual transgression effected man's physical deterioration. See also Mather's *Threefold Paradise* (122–26) and M. H. Warner, "Spiritualization of Medicine" (278–95).

118 Perhaps not fully satisfied with the philosophical and theological explanations of Heidegger, Mather, the man of science, turns to his fellow physico-theologian, physician, and mathematician Dr. George Cheyne (1673–1743), whose popular *An Essay of Health and Long Life* (1724) went through many editions. Mather's excerpt is from chapter 4, "Of Exercise and Quiet" (§ 2, pp. 92–93).

then, a Year or a Day, at the Beginning of the World, would not be of so long a Duration, as now when those Motions are grown slower. For, if the Motions of the Heavens be analogous to the Motion of a Wheel or a Top, as I think I can by very many Arguments make probable; then if the Earth were (as it were) at first sett up, or putt into a rapid circular Motion, like that of a Top, tis probable that the Fluid Medium in which it moves, may after a Thousand Revolutions, a little retard & slacken that Motion; and if so, then a longer Space of Time will pass while it makes its Revolution now, than it did at first. Hence possibly, the long Lives of the Posterity of *Adam* before the Flood, might be of no greater Duration, than Mens Lives are ordinarily *Now*: For tho' perhaps they might number more Revolutions of the Sun, or more Years than we can now, yett our few Years may comprehend as great a Space of Time."¹¹⁹

[180v] [blank]

¹¹⁹ Excerpted from Robert Hooke's "V: Discourses of Earthquakes," in *Collected Works of Robert Hooke* (322). Mather's deliberate silence and his refusal to comment on Hooke's fascinating attempt to reconcile biblical chronology with 17th-century scientific theories speaks loudly.

[▽Insert from 183r–184v]

[▽183r]

3291.

Q. The Behaviour of them that lived before the Flood, is thus described; *The Sons of God saw the Daughters of Men, that they were Fair, and they took them Wives of all which they chose.* You know the extravagant Opinion of the *Jewish Rabbins*, follow'd by the *Christian Fathers*; That the *Angels* coming down to the Earth, took Wives, whereof they begot a Generation of *Giants*? v. 2.

A. But *Elohim* often signifies no more, than Persons vested with *Authority*; and the *Daughters of Men*, may signify no more than *Daughters* of the *Inferior Sort*. And the Verb, translated here, *To Take*, signifies, *To take by Force*, or, to *Ravish*. And this Behaviour was that *Violence* [v. 11, 13.] which was among the Provocations to Heaven, that procured the *Deluge*. Such was the aggravated Wickedness of that Age! Those that were in Authority and should have been exemplary for their Vertue, were Examples of nothing but lustful *Violence*. It should be rendred, *Men in Authority, seeing that the Daughters of the inferior Sort were Fair, they forceably seized on them for Wives at their Pleasure.*¹²¹

372.

Q. In what Points do you consider *Noah*, as a Type of the Lord Jesus Christ? v. 2.

A. Compare 1. Pet. 3.20, 21. and 2. Pet. 2.5.¹²²

The Name of *Noah*, is as much as to say, *Rest*; [with what Expectation his Father called him so, see Gen. 5.29. and what hath been said upon it.] Now,

¹²⁰ See Appendix B.

¹²¹ Extracted from Simon Patrick's annotation on Gen. 6:2 (*Commentary* 1:32–33). Rabbinic commentators are more diverse in their explication of the Gen. 6:2, 4 than Patrick or Mather here suggest. See Midrash Rabbah (Gen. XXVI:5, 7); *Pirke Eliezer* (ch. 22), and *Mikraoth Gedoloth* (Genesis 1:81–83). The Greek LXX (Gen. 6:2, 4; Exod. 21:6, 22:28), which the early Church Fathers used, bears out Mather's argument. Maimonides (*Guide* 1.14.25), too, asserts that "the sons of the higher order (*Elohim*) saw the daughters of the lower order (*adam*)." John Selden argues that the "sons of god" who saw the "daughters of men" were none other than the children of Seth who broke their vow not to leave their mountain dwellings and to mingle with the children of Cain in the valleys. Nevertheless, the beauty of Cain's daughters and their joyous revelries were temptations too great for the sons of Seth to resist. Hence all manner of corruption and rapine ensued (*De Jure Naturali*, lib. 5, cap. 8, esp. pp. 577–83).

¹²² The following paragraphs lean on Samuel Mather's *Figures or Types* ("Sermon on Rom. 5:14," esp. pp. 91, 92 ff). See also Edward Taylor's *Upon the Types of the OT* (1989) 1:45–49.

this vast little Word, *Rest*, contains the Benefits, which wee have by our Lord Jesus Christ. [Consider Cant. 1.7. and Math. 11.28. and Rev. 14.13.] Eternal Inquietudes will distract our Souls, if estranged from this Lord.

Again, T'was *Noah's* Character, (in 2. Pet. 2.5.) to bee, *A Preacher of Righteousness*. And of our Lord Jesus Christ, it was prophesy'd, (in Dan. 9.24.) that Hee should *bring in Everlasting Righteousness*.

Further, Tho' *Noah* kept calling upon the World, for so many Years together, yett so *few* were thereby reclaimed from their Unbeleef, that it is said, (in 1. Pet. 2.20.) *A few, that is, Eight Souls were saved*; no doubt, the World generally despised what hee said. Such a deadly *Unsuccessfulness* has attended the Ministry of our Lord Jesus Christ: *His own Received Him not*; (see Prov. 1.24.) And what have been the Complaints of His Ministers in all Ages! [Isa. 53.1. Math. 11.17. Isa. 49.4.]

Moreover; For this was *Noah* admired; that tho' *all Flesh had corrupted his Way upon the Earth*, yett, Hee was a *just Man & perfect in his Generations*; [Gen. 6.9.] and, *Condemned the World*. [Heb. 11.7.] Such was the World-condemning Integrity of our Lord Jesus Christ. [See Heb. 7.26.]

Yett more, When God was going to Do a great thing in the World, Hee *Told Noah* of it. [Gen. 6.13.] Indeed, our God never *perform'd* any thing, yea, Hee never *purpos'd* any thing but Hee has *Told* it unto our Jesus. [Joh. 5.19.] Such is the *Similitudinary Omniscience* of our Lord, that Hee is acquainted, with all things, that the Most High gives a Being unto. All the *Decrees*, all the *Secrets*, of God are discovered unto this, *Wonderful Counsellour*. [Of Him lett our Faith say, as Dan. 2.22.]

Add; How came all the Children of *Noah* to bee Præserved, when the rest of Mankind were Destroyed? It was the Obedience of their *Father*, which had an Influence upon the Safety of them all. [Gen. 7.1.] And unto what is it, that wee all owe, the Salvation of our Souls? Truly, wee have been, like so many *Chams* before the Lord. But wee are beholden to the Obedience, of our *Saviour*, that wee perish not. [See, Rom. 5.19.]

To proceed; *They* for whom *Noah*, was concerned, were carried above the *Flood* which overwhelmed other Men. This will bee the Happiness of them that have an Interest with the Lord Jesus Christ. [1. Thess. 4.17.] When the World shall bee on a light Fire, the Lord Jesus Christ, will snatch Beleevers, as *Brands out of the Burning*. [Ponder, Psal. 32.6.]

Once more; What became of those that were Disobedient unto the *Spirit* of the Lord Jesus Christ, when once *the Long-suffering of God waited in the Dayes of Noah*? Wee are told of a *Flood* for their *Bodies*: (Job. 22.16.) and of a *Goal* for their *Spirits*. (1. Pet. 3.19.) This will bee the Case of them that are Disobedient unto the Lord Jesus Christ. It is judg'd by some, that the *Place* of Hell, is, *under the Waters*; because tis said of the Damned (in Job. 26.5.) They *Groan under the Waters*. But this is clear; the old Worlds going under the *Waters*, was a Figure

of Hell; for which Cause, *Hell* is called (in Prov. 21.16.) *The Congregation of the Giants*; that is, of such as the Deluge drowned.¹²³

To pass on; God made a *Covenant* with *Noah*, (in Gen. 9.11.) To *Drown the World no more*; & Hee made the *Rain-bow*, a Token of it. Such a *Covenant* ha's God made with our Lord Jesus Christ, about the Elect World: His *Covenant* is, *I will never destroy any of those Chosen Ones*; and of this *Covenant*, Hee saies, (in Isa. 54. 9.) *This is unto mee, as the Waters of Noah*. Hence our Lord now appears (in Ezek. 1.28.) with a *Rainbow*; with the *Bow that is in the Cloud, in the Day of Rain*, round about Him.

Finally. There was a *Curse* upon *Cham*, when hee beheld the *Nakedness* of his Father, without becoming lamentatious. (Gen. 9.22.) Our Lord Jesus Christ indeed had no | *Nakedness of Sin*, for Himself to bee Ashamed of; but Hee had a *Nakedness of Suffering*, which it becomes *us*, to bee affected with. Hee was *Naked*, when Hee was *Hanged* on the Cross. *Austin* speaks well, *Dormijt in passione sua, et ita nudabatur, carnis mortalis Infirmitas*. Wherefore, when wee look upon the Passion of our Lord, it should bee with a *Mournful Eye*, yea, with a *Sword entring into our Soul*.¹²⁴

2418.

Q. That Passage, *My Spirit shall not alwayes strive with Man*; how does *Grotius* take it? v. 3.

A. *My Spirit shall not long remain with Man*, as in a *Sheathe*, where it becomes as useless, as a *Sword* in a *Sheathe*. The Hebrew Word here used, is rendred elsewhere, (1. Chron. 21.27.) *A Sheathe*. And the *Body*, is by the Chaldee, (Dan. 7.15.) called so. In that *Sheathe* did the Children of Men, then retain, a *Soul*, or an Immortal *Spirit*, whereof *God* is the *Maker & Giver*. But they so Retain'd it, as to withhold it, from all those Glorious Uses, for which the *God* that *made* it, intended it, & adapted it; They were *Flesh*, they minded nothing but the *Flesh*, the feeding and pleasing of their *Flesh* was all they look'd after; The *Spirit* wherewith *God* had ennobled them, was chained up in *Flesh*, and neither Employ'd, nor indeed Regarded, as it ought to bee. From hence *Grotius* interprets, *The Spirit in Prison*, whereto *Peter* saies, (1. Pet. 3.19.) *Noah*, under the *Inspirations* of the *Spirit* of the *Messiah*, *went & preach'd*; Namely, the *Humane Spirits*, whereof

¹²³ According to Midrash Rabbah (Gen. XXXI:12), the giants in Noah's time tried to escape from drowning in the Flood by blocking the water from coming out of "the deep" and by boarding the Ark.

¹²⁴ Mather's Latin citation from St. Augustine's *Contra Faustum Manichaeum* (12.24) is adapted from "dormisset in passione sua, tamquam in ebrietate stultitiae, quae sapientior est hominibus; atque ita nudaretur mortalis carnis infirmitas per occultum Dei consilium, fortior hominibus," which translates "[Christ] had slept in His passion, as in the drunkenness of the folly which is wiser than men; and so, in the hidden counsel of God, the disclosure had been made of that infirmity of mortal flesh which is stronger than men" (NPNFi 4:191)

God complained, that Men kept them *Sheath'd* up, under the Restraints of Carnality.¹²⁵

146.

Q. Why is the Term of, *An hundred & Twenty Years*, pitch'd upon, as the Day of Patience for the old World, now ready for the Flood? v. 3.

A. *Scaliger* ha's an Ingenious Conjecture, in L.3. *Emend. Temp.* That the Antediluvians gathering up the odd Six Hours, which are above Three hundred & Sixty five Dayes in every Year, did at the End of every *Hundred & Twentyeth* Year, add an Intercalar Month of *Thirty* Dayes, which Intercalation did then sett their Times right, as our Twenty Ninth of *February* do's in the Leap-year, among ourselves. For this, Cause a Space of an *Hundred & Twenty* Years, went for a Sort of an *Age* among them; and so, the Lord now sais, Well, I'll allow them yett *One Age* more, & then I'll make an End of them. – Remember, by the way, that these 120 Years, commence not from the 500 but from the 480 Year of *Noahs* Life.¹²⁶

[▽185r] [▽Insert from 185r–190v]

*Huc quicunque Venis, Stupefactus ad Ossa Gigantum.*¹²⁷

Q. Concerning the *Dayes* before the *Flood*, the glorious Historian ha's told us; *There were GIANTS on the Earth, in those Dayes*. Could any undoubted Ruines and Remains of those GIANTS, be found under the *Earth*, among the other subterraneous Curiosities, in *our Dayes*, it would be an Illustrious Confirmation of the *Mosaic History*, and an Admirable Obturation on the Mouth of *Atheism*? v. 4.

¹²⁵ Mather's source is Hugo Grotius's *Annotationes ad Vetus Testamentum* (Gen. 6:3), in *Opera Omnia* (1:8). The "Chaldee" is the language of the Babylonians as reflected in the post-exilic Targum Onkelos.

¹²⁶ The paragraph is extracted from Joseph Justus Scaliger's *Opus De Emendatione Temporum* (1598), lib. 3, pp. 179–80. Following the end of his commentary on verse 3, Mather gives the following direction: "[o o o] See ye next Page." In the next line he adds, "[And here insert the Illustration of the Giants.]" In the first instance, Mather intends to insert his commentaries on Gen. 6:6, 7 in this location here; however, his six-page commentary on the Giants (Gen. 6:4), which he added to "BA" at a later stage, requires repositioning to maintain the verse sequence of his annotations. See Appendix B.

¹²⁷ The quotation is from a poem by Julius Pomponius Laetus (1425–97), the learned Italian humanist, classical scholar, and editor of numerous ancient Roman manuscripts. Most likely, the poem originally appeared in Pomponius Laetus's *Opera* (1521), but is here cited from an excerpt in Philipp Camerarius's *Operae Horarum Subcisivarum* (1602), cap. 82, p. 382, a chapter on the origin and meaning of giant fossils. The line from Pomponius Laetus's poem reads, "Whoever you are that comes here in awe of the giants' bones," and commemorates the giant fossils found in Puteoli (near Naples). Because they were believed to be those of the Egyptian god Typhon, they were moved north and reburied in the Etruscan soil of Tuscany (Italy).

A. Then lett the Inquisitive Part of Mankind, know that the *Bones* of those who were certainly¹²⁸ some of the Antediluvian GIANTS, have been *found under the Earth*, in these later Ages. Below the Strata of *Earth*, which the *Flood* left on the Surface of it, in the other Hæmisphere, such enormous *Bones* have been found, as all skill in Anatomy must pronounce to belong unto *Humane Bodies*, & could belong to none but *Giants*, in Comparison of whom, *Og*, and *Goliath*, and all the Sons of *Anak*, must be hardly so much as *Pygmies*. But that AMERICA too, as tis but agreeable, may throw in something, to the Treasures of the BIBLIA AMERICANA, I will surprize you, with telling you, That the *Men* who were able to have *Turned the World upside down, came hither also*; [How! No Man alive can tell!] And the *Bones*, probably¹²⁹ of the Antediluvian GIANTS, have here been mett withal.¹³⁰

128 See Appendix A.

129 See Appendix A.

130 Mather also incorporates the same commentary (Gen. 6:4) in his “Curiosa Americana,” his first letter (Nov. 17, 1712) to Dr. John Woodward of the Royal Society of London, abstracted in the *Philosophical Transactions* 29 (1714–16), sec. IV, 62–63. (See also D. Levin’s “Giants”). For Mather and his peers, the question of the biblical Nephilim is inextricably bound up with the interpretation of fossils and the debate about the universality of Noah’s Flood (*Threefold Paradise* 242–43). Since many of Mather’s leading contemporaries limited the extent of the deluge to a mere local occurrence, he thought the bones of a mastodon discovered near Claverack, NY (1705) – an animal species nowhere mentioned in scriptures – could be no other than the fossilized remains of the giant Nephilim, the fleshly offspring of fallen angels and the daughters of man (Gen. 6:4) who drowned in the Flood. Mather’s error is all too pardonable and all too common for his time; the conjectures of his confreres, published in the *Philosophical Transactions* of the Royal Society of London, more than illustrate how much the physico-theologians of the day struggled to square the geological fossil record of extinct species, flora and fauna, with biblical chronology that set the date of the universe’s creation at little more than 4,000 years before the birth of Christ. For Mather and his peers, the venerable tradition of the Nephilim at once solved not only the mystery of giant prehistoric bones – unidentified until the early nineteenth century – but also provided geological proof of the universal Flood and the trustworthiness of the Mosaic narrative. For the contemporaneous debate on the origin of fossils, their transport, and their meaning, see N. Steno’s *Prodromus* (1669); J. Woodward, *An Essay towards a Natural History of the Earth*, 2nd ed. (1702) 1–113; J. Ray, *Three Physico-Theological Discourses*, 3rd ed. (1713), Disc. II, ch. 4, pp. 122–204; W. Derham, *Physico-Theology*, 4th ed. (1716), bk. 5, ch. 4, pp. 291–93, n. 3–4; M. Lister’s “A Letter” (PT 1671); T. Molyneux’s “Part of 2 Letters” (PT 1685); E. Lhwyd’s “Part of a Letter” (PT 1698); T. Molyneux’s “An Essay concerning Giants” (PT 1700); J. Luffkin’s “Part of a Letter” (PT 1700–1); J. Morton’s “A Letter” (PT 1706–7); T. Molyneux’s “Remarks” (PT 1714–16); H. Sloane, “An Account” and “Of Fossile Teeth” (PT 1727–28); J. P. Breynne, “A Letter” (PT 1737–38); and J. Simon and G. Berkeley, “A Letter” (PT 1746–47). The discovery of the purported Nephilim bones unearthed at Claverack was published in the *Boston News-Letter* (30 July 1705), and Mather sent his scientific improvements on the subject to John Woodward, secretary of the Royal Society, who published an extract in the *Philosophical Transactions* 29 (1714): 62–63. (For the full text of Mather’s letter, see Levin’s “Giants”). The size of the Claverack fossils, Mather believed, far outmatched those of the fabled Og, the Amorite king of Bashan (Num. 21:33), sole remnant of the race of the giant Rephaim. According to Deut. 3:11, Og’s iron bedstead measured nine cubits by four cubits, “after the cubit of a man” (c. 15 ½ feet by c. 7 feet); David’s Goliath (1 Sam. 17:4) only measured a mere 6 cubits (10 ½ feet). Like the giant “Sons of Anak” (Num. 13:33), they

I will not go to trouble you, with the Opinions of the *Ancients*, who suppose the Original of those *Giants*, to be, *The Sons of God coming in unto the Daughters of Men*; and that the *Sons of God*, were *Angels*, or *Divels*; to which the Name of, *Nephilim*, which may signify, *Fallen Ones*, agrees well enough: and which the LXX induced the Fathers, to imagine; and they had *Josephus* and *Philo* to countenance it; I do not think, that it was an Error in the learned *Henricus Vorstius*, to say, that the *Scripture* does not mention the *Original* of the *Giants*; it only declares the *Time*, when God punished the World with them. And our Saviour ha's abundantly taught us, how Disagreeable *Matrimonial Affairs* are, to the *Angelical Nature*: Nor is there any Strength in the Attempts of *Drusius* to defeat the Argument which is fetched from the Words of our Saviour, to confute the *Dream* of the *Old Men*, about this Matter.¹³¹

Tho' we meddle not with the Original of the *Men*, we may touch upon that of their *Name*. The Name נפילים / *Nephilim*, comes from נפל / *To Fall*. And, without expounding it, of *Men Fallen from an Heavenly to an Earthly Temper*; [a Frivolous Exposition that some have given; and which would fill the World with *Giants*.] why should not the Name intend as much, as, *Irruentes, Prosternentes, Dejectores*; Men who took a vast Liberty to *Fall upon* other Men, and make them

all were mere "*Pygmies*" when compared to the size suggested by the Claverack fossils. How Mather's giant survived Noah's Flood and came to America may have been suggested to him by the Talmudic tradition in Zevachim (113b) and Nidah (61a). According to this legend, the giant Og of Bashan (like the huge horned "re'em" [unicorn] that could not be accommodated inside Noah's ark), clung to the side of the huge vessel or waded alongside it, where the water was cool enough for him not to be scalded.

131 Here and in the subsequent paragraphs, Mather again relies heavily on Heidegger's *Historia Sacra Patriarcharum* (1:185, 186–88, Exerc. XI, §§ 2, 4, 5). Apart from Hesiod, whose Titans and their offspring are mentioned in *Theogonia*, many of the early Church Fathers agreed that the sons of God who ravished the daughters of man were fallen angels whose offspring were the giant Nephilim (Gen. 6:4). See Lanctantius (*Divine Institutes* 2.15, in *ANF* 7:64), Joannes Chrysostom (*Homily on Genesis* 22.6, 8–12, pp. 71–72, 73–78), and St. Augustine (*De Civitate Dei* 15.23). The great Bishop of Hippo comments on the ambiguous translations of the Hebrew designation "sons of God" or "sons of gods" and acknowledges that the Septuagint (Mather's "LXX") uses both phrases (*NPNFi* 2:304–5). Both Flavius Josephus (*Antiquities* 1.3.1) and Philo Judaeus (*De gigantibus* 2.6, 13.60) mention angels and demons – "souls hovering in the air" – who descend into bodies, but whose offspring are only giants for cruelty and carnality – not for their physical size. Guilielmus Henricus Vorstius (Wilhelm Heinrich van dem Voorst, d. 1652), son of the famous German Reformed theologian and Arminian Conrad Vorstius (1569–1622), translated various rabbinic treatises into Latin, among them רבי אליעזר פרקי *Capitula R. Elieser* (1644). Mather (via Heidegger 1:185) cites R. Tzodok's gloss on the giant Nephilim, which appears in *Capitula R. Elieser* (1644), cap. 22, p. 50; the English translation is in *Pirke de Rabbi Eliezer* (ch. 22, pp. 160–61). According to Matt. 22:30 and Mark 12:25, the resurrected saints will be like the angels in heaven and neither marry nor given in marriage. Finally, Mather, via Heidegger (1:188) refers to *Ad loca difficiliora Pentateuchi* (1617), a commentary by the eminent Dutch Orientalist at Franeker, Joannes Drusius, aka. Jan van den Driesche (1550–1616), who discourages the dreams of old men once again to be young and married (Matt. 22:30), because their angelic bodies would be devoid of all carnal desires. See the synopsis of Drusius's commentary in *Critici Sacri* (1660), vol. 6, col. 655.

to *Fall*? If they were of such an horrid Magnitude, as the *Monster* I am anon to show you, the *Etymology* would be agreeable enough unto them. I doubt, they were a Sort of Men, as unlikely as any upon *Earth*, to deserve the Character, that *Bolducus*, in his Treatise, *De Ecclesiâ antè legem*, ha's provided for them; who saies, They were called, *Nephilim*, *Quòd ob veri Dei cultum à reliquis, in eo distinguerentur, quòd Deum prostrationibus adorarent, adeò ut illà ceremoniâ eos ab improbis secerneret*; Because they did use to *Fall down* prostrate upon the *Earth*, in their Adorations before the God of Heaven.¹³²

An Extremity of Incredulity, ha's led some to think, That the *Antediluvian Giants* were but *Metaphorical* Ones; That they were *Giants* for *Quality* only, and not for *Quantity*. We will not count the *Gigantomachia*, of *Goropius Becanus*, worth considering. *Temporarius* ha's endeavoured more elaborately to show, That the Name is of a *Scythian* Original, and means no more than, *A Man with long Hands*; which are no other than a World of Rapacious Mortals, {which we} are at this Day furnished withal. And indeed *Philo* the Jew, strips these *Giants* of all their *Procerity*, and makes them no more than, *ανθρωπους της γης*, *Homines Terræ*, or another sort of Men, than the *Men of Heaven*, & of God.¹³³

132 Extracted from Heidegger (1:197, Exerc. XI, § 16). According to Midrash Rabbah (Gen. XXVI:7), the Hebrew word נִפְּלִים [Nephilim] suggests נִפְּלוּ [they fell] and brought about [the fall of the world]. See also *Pirke de Rabbi Eliezer* (ch. 22, pp. 160–61). In his commentary on Num. 13:33, Rashi (whose source is *Pirke Eliezer*, ch. 22), identifies the two giants who “fell from heaven” as Shamchazai and Azael (*Mikraoth Gedoloth: Genesis* 1:83). Mather objects to this exposition as “*Frivolous*” and offers instead the one by Aquila Ponticus, according to whose Greek translation of the OT, “Nephilim” signifies “irruentes” (invaders, or those who seize others) and “*Prosternentes*” (overthrowers), and “*Dejectores*” (conquerors) – all in Origen’s *Hexaplorum quae supersunt in Genesim monitum* (Gen. 6:4) [PG 15. 188]. While Symmachus translates “Nephilim” as “violent ones,” the Chaldaic Paraphrast suggests “fortes, robustos” (strong or robust ones); Calvin (*Commentaries on the Book of Genesis* (1:244–46) more or less agrees, as does Luther who calls them “tyrants” and usurpers of power in both church and state who “sin without the least restraint” (*Works* 2:32). Following Heidegger (1:197), Mather and many of his peers here prefer the LXX translation, suggesting “giants,” but do not rule out these other significations. In his *De Ecclesia ante legem* (1626), the Parisian Capucin theologian Jacobus Bolducus, aka. Jacques Bolduc (d. 1646), calls them “Nephilim, because for the sake of the worship of the true God, they could be distinguished from the rest by the fact that they honored God by falling down, to such a degree that this ceremony set them apart from the wicked.”

133 Heidegger (1:199, Exerc. XI, §§ 18–19). Mather takes exception to such interpreters as Robert Hooke (1635–1703), one of the leading natural philosophers of his time, and Thomas Gale (1635–1702), dean of York, who reduce the venerable tradition of the antediluvian giants to mere metaphor. In response to Thomas Gale’s manuscript essay concerning giants, Hooke argues that the translators of the LXX frequently rendered obscure Hebrew words not in their literal sense, but in line with prevailing beliefs and traditions among the Greeks of Alexandria; the translators were eager “to shew that the Bible was not unacquainted with the Greek Stories.” More to the point, Hooke agrees with Gale’s mythological interpretation of “the Gigantomachia” as nothing else but “an Earthquake, or perhaps several Earthquakes,” which the ancient poets combined into one (“A Discourse of Earthquakes,” in *Posthumous Works* 384). Mather, via Heidegger (1:199), also dismisses the discussion of giants “De Gigantomachia” (lib. 2), in *Origines Antwerpianae* (1569), esp. 207–12, by the Flemish physician and linguist Joannes

But the *Apocryphal Baruch* shall be a better Interpreter for us; who, [chap. 3.26.] expressly saies of these *Giants*; They were *εμμεγεθεις, επισταμενοι πολεμον· Ingenti corporis magnitudine præditi, reique bellica scientissimi*. The *Apocrypha* several times, calls them, *Giants*. And afterwards, *Chrysostom* calls them, *ηρωας ευμηκεις, very Tall Heroes*; and, *υψηλους, High Ones*. *Theodoret* calls them, *παμμεγεθους ανθρωπους· Prægrandes Homines*. And *Cyrillus*, tells us, they were those, *Quibus Corporum Deformitas et Magnitudo data sit, in penam effrenate | Libidinis Parentum*. But I have a greater Authority than all of this; namely, That of the *Giants* themselves; The Wretches *under the Earth*, are in some sort brought up from thence, before the *Resurrection*, when they are to *Bow the Knee unto the Name of JESUS*. The *Giants* that once *Groan'd under the Waters*, are now *Found under the Earth*, and their *Dead Bones* are *Lively Proofs* of the *Mosaic History*.¹³⁴

Of all those *Curiosities*, I know none, that exceeds, what ha's lately been found, in an *American* Plantation; adjoining to *New England*: And its being found in *America*, makes it yett the more curious, and marvellous: For, I beseech you, How did the *Giant* find the Way hither?¹³⁵

Goropius Becanus, aka. Jan Gerartsen van Gorp (1519–72). Mather evidently disliked Becanus's argument that the language of Paradise was unadulterated "Diets," i.e., Dutch (*Origines Antwerpianae* 539), just as much as he would have disliked Becanus's endeavor to decipher Egyptian hieroglyphics by tracing them to their Dutch [Cimmerian] roots, in *Hieroglyphica* (1580), 12–13. This reading seemed as preposterous as the account of a young man and woman who were 9 and 10 feet tall, respectively, and lived near Becanus's home in Flanders. The work by Joannes Temporalis, aka. Jean du Temps (b. c. 1535), French jurist, mathematician, and geographer, is probably his *Chronologicarum demonstrationum libri tres* (1596), in which the author traces the word "Nephilim" to Scythian origin. Philo Judaeus strips these giants of their tall stature and allegorizes them as "men ... born of the earth" – hedonists who hunt after carnal pleasure (*De gigantibus* 13.60). Mather's Dutch colleague, Jean LeClerc was similarly dismissive of his contemporaries' gigantomachia, in his *Twelve Dissertations* (1696), Diss. II, p. 78. See also Johann Christoph Becmann's *Historia Orbis Terrarum* (1698), cap. 9, sec. 2, § 13, pp. 362–64, for an encyclopedic discussion of giants.

¹³⁴ Heidegger (1:198, Exerc. XI, § 18). According to the *Apocryphal Baruch* (3:26), in the LXX, these giants "were [by nature] of so great stature, and so expert in war." As usual, Mather omits the Greek diacritics. The forms of the Greek "γῖγαντες" (literally "earth-born," but frequently rendered "giants," appear in the *Apocryphal Baruch* 3:26, *Sirach* 16:7, 47:4; *Wisdom* 14:6, and 1 *Maccabees* 3:3 (LXX). Mather's citation of *Chrysostom's Homily on Genesis* (22.12, p. 77) is here quoted at second hand from Heidegger (1:198). *Theodoret (Quæstiones in Octateuchum: Genesis*. Quest. 48, p. 47, line 25) calls them "rather large men." Mather erroneously writes "*Cyprian*," instead of "*Cyrillus*." *Cyrillus Alexandrinus's Glaphyra in Pentateuchum* (lib. 3) [PG 69. 56] argues they were those "to whom deformity and bulk of the body were given as a punishment for the unrestrained lust of their parents." Mather's reference to the "*Giants* that *Groan'd under the Waters*" alludes to the tradition that assigns hell a place under the waters (*Job* 26:5–6), but *Midrash Rabbah* (*Gen.* XXXI:12) offers a much more literal reading in that the giant *Nephilim* tried to board the Ark, but drowned. Be that as it may, Mather is eager to validate ancient traditions with empirical evidence as the subsequent paragraphs reveal.

¹³⁵ The following paragraphs are not gleaned from Heidegger, but from different sources. Mather's question about how the giant *Nephilim* found his way to America is a legitimate concern albeit amusing to modern readers. For if Noah's Ark saved from certain death pairs of clean and unclean animals by accommodating them in the ark, how did they get across the

The *Post-Diluvian Giants* mentioned, in the Sacred Scriptures, were *Puisny* Things; in Comparison of ONE, ABOVE SEVENTY FOOT HIGH; and yett we have here the undoubted Reliques of SUCH AN ONE.¹³⁶

What *Julius Capitolinus*, and others, report of the Tyrant *Maximin*, That he was *Eight Foot High*, and what Nicknames, *Herodian* tells us, were therefore putt upon this *Typhon*, and *Cyclops*, tis no longer worth the while to mention. And as little worth a mention, is the *Suevian* in the Army of *Charlemaign*, of whom *Aventinus* tells us, That he would mow down his Enemies, and spitt good Numbers of them like so many little Birds, on his huge *Spear*, which he would so carry in his Hand about the Camp. We shall hardly regard what *Mela* tells us, *Of Indians*, who were so tall, that *Elephants* were to them instead of *Horses*.¹³⁷ We shall as little regard, the *Americans*, near the Streights of *Magellan*, to whom they assign a Stature sufficiently enormous; and a Neck as long as a Mans Arm. We shall be far from Trembling before the *Giant* seen by *Pigafetta*, taller than other Men from the Girdle upwards. Lett us make room for *Greater Company*.

Grandiaque Effossis Miraberis Ossa Sepulchris.¹³⁸

Atlantic Ocean once they were released from their shelter? And how – in the first place – did the American species get into the Ark that was waiting for them in the Old World? Questions of this nature preoccupied many theologians of note and included the Flemish Jesuit scholar Jacobus Bonfrerius (1573–1642), *Pentateuchus Moysis commentario* (1625) 150–51 (on Gen. 7:8), who argued that the animals could have come to America via Greenland, Norway, Asia, if not by Angelic help. Similarly, the German Lutheran theologian, Johannes Gerhardus (1582–1637) holds forth on the origin of the nephilim in *Commentarius super Genesin* (1653) 175, 179–80; and the Roman Catholic scholar Justus Lipsius (1547–1606), *Physiologiae stoicorum*, in *Opera* (1637) 4:593–95, puzzled over the same questions. Mather cites these scholars throughout “BA” and agrees with Lipsius that a land bridge, now submerged, must have connected the Old with the New World at one time (See also Don C. Allen, *Legend* 130).

136 Among the post-diluvian giants are Og of Bashan, Goliath, and the giant race of the Emims, Anakims, Rephaims, and of Og (Gen. 6:4, Num. 13:33, Deut. 2:10–11; 3:11; Josh. 12:4). “*Puisny*” or “*puisne*” signifies “inferior in rank,” and “puny” (*OED*). See Appendix A.

137 The history of Roman Emperor Gaius Iulius Verus Maximinus, the Thracian (235–38 CE), is related in *Historia Augusta: Maximini Duo*, by Julius Capitolinus (3rd c. CE), one of the six *Scriptores Historiae Augustae*. Capitolinus (*Maximini Duo* 6.8; 8.5–6; 28.8) argues that Maximinus was “six inches over eight feet” tall and that some nicknamed him “Cyclops, some Busiris, and others Sciron, not a few Phalaris, and many Typhon or Gyges.” According to the Greek historian Herodian (early 3rd c. CE), Maximinus’s nicknames were Typhon (the hundred-headed Titan, son of Gaia and Tartarus) and Cyclops (Homer’s one-eyed giant); his size and cruelty are described in Herodian’s *History of the Empire after Marcus* (6.8.1, 7.1.1–5, 12). The story of the giant of Suevia (Germany), who served in the army of Roman Emperor Charlemagne, is related in Joannes Aventinus’s *Annalium Boiorum* (1554), lib. 4, pp. 364–65, 420–21, 450. Mather also cites Aventinus in *Threefold Paradise* (324). The Roman geographer Pomponius Mela (1st c. CE) relates the story of his tall natives of India in his *De chorographia libri tres* (3. 52–53).

138 The giant Americans near the Straits of Magellan in Terra Del Fuego (S tip of Chile) are the Tehuelche Indians of Patagonia. Italian traveler Antonio Francesco Pigafetta of Vincenza (c. 1498–1536), who accompanied the famous Portuguese explorer Ferdinand Magellan (1519) on his quest for the Spice Islands, relates in his famous log how they encountered several Patagonian giants among the Tehuelche Indians, in 1520. They were so tall that even the largest of

We will not be too urgent in demanding a Consideration for what *Pliny* relates; That *Lucius Flaccus* and *Metellus*, in the *Cretian* War, found the Bodies of some *Giants*, that were *Thirty Cubits* long; and the *Earth* opening in an Earthquake, another was cast up, which extended unto *Forty Cubits*. We may suspect a *Cretian Story*; And, I find, the Credit of *Pliny's* Relations, runs pretty low among the Learned in our Dayes. However, we may give some Credit unto this, inasmuch as we have in grave *Plutarch* much such another; Yea, a *Skeleton* amounting to Threescore Cubits.¹³⁹

But lett us go on; The *Egyptian* Traditions of the Gigantic *Emephimi*, related by *Franciscus Patritius*, were not altogether without some Foundation. *Reineccius*, in his *Monumenta Brandenburgica*, affirms, that in his Time, there were Dug up the *Bones* of Men, whose *Legs* reach'd up to the *Waste* of other Men. *Fazellus* as an Ey-witness, affirms, that in *Italy*, there were Dug up the *Bones* of Men, which were of a stupendous Magnitude. *Camerarius* in his *Opera Succisivæ*, is much affected, with the Huge Humane *Bones*, found at *Puteoli* in *Italy*; on which, a Poem of *Pomponius Lætus* concludes thus;

*Hinc bona posteritas immanici corpora servat,
Et tales mundo testificatur avos.*¹⁴⁰

Magellan's sailors only reached to somewhere between the giant's waist or shoulder. Pigafetta's chronicle *Le voyage et navigation* was first published in Paris, without date (c. 1526–36); Richard Eden published the first English translation of this popular account in 1555. A reference to Pigafetta's account of the giant Americans also appears in Samuel Purchas's *Purchas his Pilgrimage* (1626), bk. 9, ch. 6, § 2, pp. 922–23; Pigafetta's full account is in *Magellan's Voyage* (1994), ch. 8, p. 46. Mather's rhetorical strategy of building suspense for his American giant is here supported by a variant line from Virgil: "And you will marvel at the giant bones unearthed from the graves" (*Georgics* 1.497).

¹³⁹ Roman general Lucius Flaccus and Quintus Caecilius Metellus Creticus, Roman consul of Crete (69–c. 65 BCE), finally crushed the pirates who had fought the Romans during the long Cretan War (c. 106–66 BCE). According to Solinus (*De mirabilibus mundi*, cap. 1), floodwaters lay bare a gigantic skeleton measuring 33 cubits (c. 47 feet), which L. Flaccus and Metellus Creticus examined at some length. Pliny (7.16.73–74) does not refer to this particular fossilized monster, but mentions one 46 cubits tall (c. 65 feet), the supposed remains of either Orion or Otus. In his biography of the Roman general Quintus Sertorius (c. 126–73 BCE), Plutarch (*Vitæ parallelæ: Sertorius* 9.5–9) relates how Sertorius, upon taking the city of Tingis (Tangier) in c. 81 BCE, was shown the bones of Antaeus, the mythical giant slain by Heracles (*Plutarch's Lives* 8:25). Nearly 60 cubits tall (c. 85 feet), the remains of Antaeus were honored by Sertorius who reburied his bones. For a modern discussion of how the ancient Greeks and Romans interpreted giant fossil bones as the remnants of their mythical heroes, see A. Mayor's excellent *The First Fossil Hunters* (2000), esp. chs. 3 and 5.

¹⁴⁰ Mather refers to Franciscus Patritius, aka. Francesco Patrizzi (1529–97), Italian philosopher and scientist of Dalmatia, professor of philosophy at Ferrara. As a Christian Platonist and disciple of Marsilio Ficino, Patritius opposed the Aristotelians and those who offered miraculous explanations for natural phenomena. He even tried to persuade Pope Gregory XIV to replace the peripatetic and scholastic philosophy with that of the mysteries of Hermes Trismegistus (P. Rossi, *Dark Abyss* 123–24; F. Purnell, "Francesco Patrizi"). Among Patritius's most important works are *Discussionum peripateticorum* (1571) and *Nova de universes philosophia* (1591) – both of which influenced the great Athanasius Kircher a century later. The Egyptian

I find our P. Martyr, [in Jud. 1.10.] quoting it from *Philostratus*; That the Carcase of a *Giant*, was found, of no less than *Twelve Cubits* long; of another, no less than *Twenty Two Cubits*; and of another, no less than *Thirty*.¹⁴¹

traditions of the “*Emephimi*” probably refer to the race of colossal giants, whose hapless battle against Isis and Osiris is depicted on temple walls in Egypt. However, even Diodorus Siculus relates the disagreement among the ancients, for some believe these “giants” were men “born of the earth” at the very beginning, yet others believe they were no giants at all, but “only men of unusual physical strength who achieved many deeds” (Diodorus Siculus 1.26.6–7; cf. 3.71–72). The ancients admired their colossal bones in Nitriai (Wadi Natrun) – that is, if Publius Aelius Phlegon of Tralles (fl. c. 140 CE) and his marvels can be trusted (*De mirabilibus* 15). The German historian Reinerus Reineccius (1541–95) published several histories of German principalities. Mather refers to Reineccius’s *Origines illustriss stirpis Brandeburgicae* (1581), a Latin translation of *Chronica des Chur und fürstlichen Hauses der Marggrafen zu Brandenburg*, published in Wittenberg (1580). The Italian Renaissance historian and Dominican friar Tommaso Fazello, aka. Thomas Fazelli (1498–1579), composed *De Rebus Siculis Decades Duae* (1558), which went through several editions. Fazelli relates that he witnessed the excavation of giant bones, cadavers, molars, and sepulchers in fields near Mazarennum, Panormo, and Petralium (Sicily), in *De Rebus* (decad. prioris, lib. 1, cap. 7, pp. 23–28; see also decad. post., lib. 1, cap. 1, pp. 238–39). Philipp Camerarius (1537–1624), German scholar and counselor to the Free State of Nuremberg, published *Operae Horarum Subcisivarum* (1599), an English edition of which appeared as *The Walking Library* (1621). The Mathers owned a copy of a three-volume edition (1644–50) of Camerarius’s *Opera* (Tuttle, “Libraries” 320). Puteoli (modern Pozzuoli, Italy) was an ancient Roman city on the shore of Campania, in the N part of the Bay of Naples. Finally, the Latin citation from the previously cited poem by Julius Pomponius Laetus is excerpted in Camerarius’s *Operae Horarum Subcisivarum* (1602 ed.), Centuria prima, cap. 82, p. 382, and reads, “From henceforth good posterity preserves the immense bodies, and calls forward such great forefathers as witnesses to the world.” Robert Plot (1640–96), early comparative anatomist, keeper of the Ashmolean Museum, and professor of chemistry at Oxford, allocates ample proof from both ancients and moderns that the giant bones dug up in Oxfordshire and in a London cemetery are of human origin, in his *The Natural History of Oxford-shire* (1676), ch. 5, pp. 133–39, esp. §§. 160–74. When a large “*thigh-bone* (supposed to be of a *Woman*”) and several large molars were dug up in a London churchyard and elsewhere, he first surmised that these fossils might be the remains of an elephant brought to London in Roman times. Yet providence decreed that while he was composing his *Natural History*, he had the opportunity to compare his fossils’ anatomy with that of a young live elephant then on public display in Oxford. Much to his surprise, the elephant’s bones were “not only of a different shape, but also incomparably bigger than *ours* [fossils] If then they [fossils] are neither the bones of *Horses*, *Oxen*, nor *Elephants*, as I am strongly perswaded they are not, upon comparison, and from their like found in *Churches*: It remains, that (notwithstanding their extravagant magnitude) they must have been the bones of *Men* or *Women*” – like those of the “Sons of *Anak*,” or of the “*Titans*, and of high *Giants*” as those mentioned in the apocryphal “Judith 16.v. 7” and “Baruch 3.v. 26” (*Natural History* 135–36). See also K. Thomson’s *Before Darwin* (2005), ch. 7.

¹⁴¹ Mather refers to *In Librum Iudicum D. Petri Martyris Vermiglii commentarii* (1571), a Reformed commentary on the book of Judges, by Peter Martyr Vermigli (1499–1562), Italian Reformed theologian, friend of Bucer, variously professor of theology at Strasbourg, Oxford, and finally of Hebrew at Zurich. In his commentary on Judges 1:10, Martyr cites Sophist Flavius Philostratus (d. c. 244–49 CE) of Lemnius (the “Athenian”), whose *Heroicus* (7.9; 8.3–14) tells of ancient heroes “15 feet tall,” the skeleton of Troy’s Ajax “16 feet tall,” that of Orestes discovered in Tegea “10 feet tall,” that of Aryades on the Orontes River “45 feet tall.” Yet another skeleton at Sigeum “33 feet,” that of the island of Ikos “18 feet tall,” and lastly the remains of Hyllos (Phrygia) and of the Aloadae (Thessaly), whose bones were “54 feet long” in all.

One Way of Judging alwayes allow'd, ha's been, *Ex ungue leonem*; I know not, why we may not as well Judge, *Ex Dente Gigantem*. The *Teeth*, which are a very Durable Sort of *Bones*, found, below the Surface of the Earth, may serve, as well as any *Tongues*, to tell us, what *Men* there were once upon it.¹⁴²

Austin, in his famous Treatise, *De Civitate Dei*: [Lib. 15. Cap. 9.] complains of those, who would not Beleeve, that there had been *literal Giants*, of an unusual and stupendous Magnitude. He saies, That *Most Noble Poet Virgil*, did Beleeve it, when he brought in his Champion, snatching & throwing a *Stone*, whereof he sings;

*Vix illud lecti bis sex cervice subirent,
Qualia nunc hominum producit corpora tellus.*¹⁴³

He carries them down, to confute them, into the *Sepulchres* opened of later Dayes, where they should find, *Incredibilis magnitudinis ossa mortuorum*. Yea, He affirms, that he himself, with several more, Saw with their own Eyes, the *Tooth* of a Man, which would æqual at least an *Hundred* of the *Teeth* of ordinary Men. *Vidi ipse non solus, sed aliquot mecum, in Uticensi litore molarem hominis Dentem, tam ingentem, ut si in nostrorum Dentium modulos minutatim concideretur, centum nobis videretur facere potuisse. Sed illum Gigantis alicujus fuisse crediderim.*¹⁴⁴

[▽187r]

To gett nearer home; *Cambden*, in his *Britannia*, when he comes as far as *Nesse-point*, in *Essex*; makes a Citation from *Ralph de Coggeshal*, (who wrote between Four and Five Hundred Years ago,) in these Terms. "In the Time of King *Richard*, on the Sea-shore, in a Village called *Edulfiness*, were found *Two Teeth* of a *Giant*, of such a prodigious Bigness, that *Two Hundred* of such Teeth, as Men ordinarily have now, might be cutt out of one of them. These I saw at *Cogshal*, and handled with great Admiration." *Cambden* adds; Another, I know not what

¹⁴² Empirical proof demands that those who would be natural philosophers must judge "a lion from his claw" and "a giant from his tooth."

¹⁴³ Here continues Mather's excerpt from Heidegger (1:198, Exerc. XI, § 18). In his *De Civitate Dei* (15.9) [PL 41. 448], St. Augustine complains about the skeptics of his day who do not believe that the antediluvians lived considerably longer and were considerably larger than the post-diluvians. He quotes Virgil in affirmation that a huge bolder (which served as a landmark) could easily be carried and hurled by the giant antediluvians, whereas now "Scarce twice six strong men of such frames as the earth now brings forth could lift it on their shoulders" (*Aeneid* 12.899–900), in *NPNFi* 2:291)

¹⁴⁴ St. Augustine asserts that those who dismiss as credulity the former existence of giants often become believers when they see "bones of the dead of incredibly large size" that are washed out of their terrestrial sepulchers by rain torrents or by the wear and tear of time. He clinches his argument by testifying (*De Civitate Dei* 15.9), "I myself, along with some others, saw on the shore at Utica a man's molar tooth of such a size, that if it were cut down into teeth such as we have, a hundred, I fancy, could have been made out of it. But that, I believe, belonged to some giant" (*NPNFi* 2:291). Legion is the number of theologians who wrote on the topic in the seventeenth century. One of the best sources of the day is Athanasius Kircher's *Arca Noë* (1675), lib. 1, sec. 1, cap. 3, pp. 8–11; and Matthew Poole's *Works* (1:321–24).

Gigantic Relique, was found near this Place, in the Beginning of Q. *Elizabeth*, by the Noble R. *Candish*.¹⁴⁵

And here were enough, to prevent any ones Quarrelling with *Fulgus*, for his Report, That the *Teeth* of *Giants*, which *Teeth* weigh'd each of them *Three Pound*, were found at *Drepanum* in *Sicily*.¹⁴⁶

But *America* too will come in to shelter the Reputation of these Historians. They may shield themselves, with the *Teeth*, lately Dug up at *Albany*. Had *Johannes Cassanione's* Book, *De Gigantibus* ever come over to *America*, I do not know but I might have had a fuller Entertainment for you. But what matters it, now we find the *Giants* themselves come over to *America*.¹⁴⁷

The First printed Account the Publick had of it, was from *New York*, July, 23. 1705. to this Purpose.

"There is a prodigious *Tooth* brought hither, supposed by the Shape of it, to be one of the Great Teeth of a MAN. It weighs *Four Pounds* and *Three Quarters*. The Top of it, is as sound and white as a *Tooth* can be: but the *Root* is much decay'd. Yett one of the Fangs of it, holds Half a Pint of Liquor. It was lately Dug up, a great Way under Ground; in the Side of a Bank, or Hill, Thirty or Forty Foot above it; at or near a Place called *Clavarack*, about Thirty Miles on this

¹⁴⁵ The English historian and antiquarian William Camden (1551–1623) is best remembered for his popular historical geography *Britannia; sive, Florentissimorum regnorum Anglicae* (1586), a massive history that was translated into English (1610) and appeared in many editions. The citation from Ralph de Coggeshal(l), also Coggeshale (fl. 1207–26), chronicler and abbot of the Cistercian monastery of Coggeshall, Essex, England, appears on p. 351 (1695 ed.), and is most likely from a manuscript of Coggeshall's *Chronicon Anglicanum* (ODNB). Since Camden refers to Ralph de Coggeshall as having lived "350 years ago" (or "Four and Five Hundred Years ago" from Mather's vantage point), King Richard must evidently be Richard I (1157–99), who ruled England during the last ten years of his life. John Bale's *Scriptorum Illustrum Maioris Britanniae* (1557–59), Centuria Tertia, p. 275, identifies four of Coggeshall's works written in the early 13th century. Richard Candish or Cavendish (c. 1530–1601) was an English courtier, soldier, author, and minor actor (ODNB) during the reign of Queen Elizabeth I (1558–1603).

¹⁴⁶ The Italian Renaissance humanist and antiquarian of Genoa, Baptista Fulgosus, aka. Battista Fregoso (1452–1504), mentions such giant teeth in his *Chronique de Baptista Fulgosus* (1494), lib. 1, c. 6, whose fossil remains were found in the Sicilian Drepanum (modern Drepano, the capital of Trapani province), located on the NW coast of Sicily. The same reference to Fulgosus's report appears in Raphael Holinshed's *First and second volumes of Chronicles* (1587), vol. 1, ch. 5, p. 10 (col. 2). Indeed, the entire chapter 5 (pp. 8–12) of Holinshed's famous repository contains many toothsome stories of giants and their gargantuan molars dug up from chronicles ancient and modern.

¹⁴⁷ Earlier accounts of American giants were given by Pigafetta (*Magellan's Voyage*, ch. 8, p. 46) and by Fernando Montesinos (*Memorias Antiguas*, ch. 9, pp. 40–41) – the latter echoing the discouraging report given by Moses's spies who returned from Canaan (Num. 13:32–33). Johannes Cassanione (Mather's misspells his name "*Cassion*") is the French Protestant antiquarian of Monistrol en Velay, Jean de Chassanion (1531–98), whose *De Gigantibus, eorumque reliquiis* (1580), esp. ch. 6, debates the *Gigantomachia* (1569) of the Flemish linguist Joannes Goropius Becanus, about the origin and size of fossils found in Sicily, Bordeaux (France), and Burgos (Spain). Chassanion takes issue with Goropius Becanus's giants, arguing that they were not giants of physical size, but merely of political power (tyrants).

Side *Albany*.¹⁴⁸ They also Dug up several *Bones*, which as they came to the Air crumbled away. One of them, which is thought to be a *Thigh-bone*, is Seventeen Foot long. There is since another *Tooth*, taken up in the same Place; which is a *Fore-Tooth*, broad and flat, and is as broad as a Mans Four Fingers. They dug up several *Trees* in the same Place, of great Bigness.¹⁴⁹

That I might be able, with a better Face of Authority, to assert unto the World, a Curiosity of so much Consequence; I addressed the GOVERNOUR of *New England*, with my Request, That he would give me under his Hand, what he had Seen, and Thought, of this Matter. He Readily obliged me, with the ensuing Letter.¹⁵⁰

July, 10. 1706.¹⁵¹

“Sir.

“I was surprised, a few Dayes since, with a Present laid before me, from *Albany*, by Two honest Dutchmen, Inhabitants of that City: which was a certain TOOTH, accompanied with some other Peeeces of *Bone*. These being but Fragments, without any Points, whereby they might be determined, to what *Animals* they did belong, I could make nothing of them. But the *Tooth*, was of the perfect Form of the *Ey-Tooth* of a MAN; with Four Prongs, or Roots, and Six distinct Faces, or Flatts, on the Top; a little worn, and all perfectly smoothed with Grinding. I suppose all the Cheirurgeons in Town have seen it. And I am perfectly of Opinion, it was an HUMANE TOOTH. I measured it, and as it stood upright, it was *Six Inches* high, lacking an *Eighth*; and Round, *Thirteen Inches*, lacking an *Eighth*. And (tho’ Part of it be broken off, & lost,) its Weight in the Scale, was *Two Pounds* and *Four Ounces*, Troy-weight. One of the same Growth, was last Year presented to my Lord *Cornbury*. And another of the same Figure exactly, was lately shown at *Hartford*, of near a Pound Weight more than this.¹⁵²

“Upon Examination of the Two Dutchmen, they tell me, The said *Teeth* and *Bones*, were taken up, under the Bank of *Hudsons* River, some Miles below

¹⁴⁸ I.e., Claverack (Columbia County), near Albany, NY.

¹⁴⁹ Mather excerpts his information from the *Boston News Letter*, July 30, 1705, which reprinted an earlier account that had appeared in New York, July 23, 1705. See also D. Stanford’s “Giant Bones” and P. Semonin’s *American Monster* (15–40).

¹⁵⁰ Perhaps because the Mathers had a falling out with Joseph Dudley (1647–1720), Queen Anne’s colonial governor of Massachusetts (1702–15), Mather cancels (with doubled strike-through) his panegyric on their former friend. (See Appendix A). Mather’s disgruntlement with Dudley came to a pitch in *A Memorial of the Present Deplorable State of New-England* (1707). The deteriorating relationship between the Mathers and Governor Joseph Dudley is discussed in Silverman’s *Life and Times* (202–21).

¹⁵¹ Dudley’s letter was written at Roxbury, his seat of government, near Boston. See Appendix A.

¹⁵² Thomas Dudley refers to Edward Hyde, Lord Cornbury, governor of New York (1702–08), who lately has become notorious for his alleged cross-dressing proclivities. See P. Bonomi’s *Lord Cornbury Scandal* (1998).

the City of *Albany*; about Fifty Leagues from the Sea, many Foot below the Surface of the Earth; in a Place where the Freshet, every Year does rake and waste the Bank: And that there is a plain Discoloration of the Ground, for *Seventy Five Foot* long at least; different from the Earth in Colour, and Substance: which is judged by every body that sees it, to be the Ruines and Dust of the *Body*, that bore those *Teeth* and *Bones*.

"I am altogether perswaded, That the *Tooth* will agree, only to an *Humane Body*; for whom the | FLOOD only could præpare a Funeral. And without doubt, he waded as long as he could, to keep his Head above the Clouds; but must at length be confounded with all other Creatures: And the *New Sediment* after the *Flood*, gave him the Depth we now find. [▽188v]

"I remember to have Read somewhere, a *Tradition* of the *Jewish Rabbins*; That the Issues of those *Unequal Matches*, between Heaven and Earth, at the Beginning, were such, whose Heads reached the *Clouds*; and therefore they were called, *Nephilim*. Their Issue were, *Geborim*; who shrunk away to, *Rephaim*; which were then found, not to be Invincible, but fell before less Men, the *Sons of the East*, in several Places besides *Canaan*.¹⁵³

"I am not presently satisfied, of what Rank, or Classis, this Fellow was; but I am sure, not of the last; for *Goliath*, was not half so many *Feet*, as this was *Ells* long.¹⁵⁴

"The Distance from the *Sea*, takes away all Pretension of its being a *Whale*, or Animal of the Sea, as well as the *Figure* of the *Tooth*. Nor can it be any Remains of an *Elephant*; the Shape of the *Tooth*, and the Admeasurement of the *Body* in the Ground, will not allow *That*.¹⁵⁵

"There is nothing left, but to repair unto those Antique Doctors, for his Origin; and let Dr. *Burnet*, and Mr. *Whiston* bury him at the Deluge. And, if

153 Dudley evidently confuses the different races of giants – Nephilim, Emim, Rephaim, Gibborim, Zamzumim, Anakim, Awim – with the interpretation provided by Nachmanides, that when the Nephilim procreated with the daughters of men, their children were inferior in size to those of their giant fathers, and so on. Compare Midrash Rabbah (Gen. XXVI:7) with Ramban on Gen. 6:4 (*Commentary* 1:103) and *Mikraoth Gedoloth* (*Genesis* 1:84). According to Midrash Rabbah (Deut. XI:10), Sihon and Og were the heathen giants "to whose ankles the waters of the flood did not reach because of their [great] stature."

154 Goliath's height was "six cubits and a span" (1 Sam. 17:4).

155 The question of how fossils – especially of marine animals – were transported into the interior, hundreds of miles away from the present shoreline was not solved until geologists in the late nineteenth century posited the theory of shifting tectonic plates. D. C. Allen (*Legend*, ch. 5) and R. Rappaport (*When Geologists*, chs. 4–5) remind us that Renaissance and seventeenth-century naturalists sought to answer the transport problem in several ways: Through the plastic nature of the earth, fossils were believed either to grow from "seeds" embedded in rocks, or to spring up through spontaneous generation, or were the sports of nature (*lusus naturae*), or were indeed the petrified remains of antediluvian life-forms carried to their respective locations by Noah's Flood. In his commentary on Exod. 16:33, Mather insists that animals (including insects) generate through procreation – never through spontaneous generation.

he were, what he shoves, he will be seen again, at or after the Conflagration, further to be examined.¹⁵⁶

I am,
Syr,
Your Humble Servant,”
{Joseph Dudley}¹⁵⁷

Soon after the Receipt of this Letter, the Writer of these *Illustrations*, had the Opportunity, himself, to see these enormous Reliques of *Gigantism*; & so is now to be considered as an *Ey-Witness* of what he writes. *Theutohocchus*, who was dug up, A. C. 1613. at his full Dimensions of twenty six foot, was a Pigmy to our *Albanian Memorandum*. Upon the Discovery of this horrible *Giant*, all the *Indians*, within an hundred Miles of the Place, agreed in a *Tradition*, which they said, they had among them, from Father to Son, for some hundreds of Years, concerning him; and that he lived upon the Fish of that River, (usually swallowing *Four Sturgeons* in a Morning for a Breakfast:) and that his Name was, *Maughkompos*. But there is very little in any *Tradition* of our Salvages, to be rely'd upon.¹⁵⁸

I was at a Loss, where I might find a Lady for this Gentleman, until *Olaus Magnus* advised me of one. *Reperta est puella in capite vulnerata, ac mortua, induta chlamyde purpurea, longitudinis cubitorum Quinque aginta, latitudinis intrà Humerijs Quatuor*. But it is Pitty, to have such Monsters propagated.¹⁵⁹

¹⁵⁶ Dudley seems to dismiss the causes of the Flood as explained by Thomas Burnet (*Sacred Theory* [1684]) and by William Whiston (*New Theory* [1696]) – the former arguing that the surface of the antediluvian earth collapsed upon the waters stored in subterranean caverns, the latter explaining that a passing comet inundated the earth with water.

¹⁵⁷ See Appendix A. Thomas Dudley's letter to Mather was first printed as "Letter from Governour Dudley to the Reverend Cotton Mather, D. D. Account of a fossil tooth, &c. 1706," in the *Collections of the MHS* (Second Series) 2 (1814): 263–64. A penciled reference to this effect (in another hand) appears in the upper right-hand margin of the "BA" manuscript. See also D. Levin's article "Giants."

¹⁵⁸ The description of "*Theutohocchus*" or "Teutonic heel" (the tarsal joint or ankle in the hind limb of a quadruped) is also mentioned in William Derham's *Physico-Theology*, 4th ed. (1716), bk. 5, ch. 4, p. 291 (note 3). With his height of a mere 26 feet, *Theutohocchus* is far inferior in size to the "*Maughkompos*" or "Maw-compos" ("endowed with an able jaw or stomach"), the American giant of 76 feet, found near Albany – Mather's "*Albanian Memorandum*" of the Noachic Deluge. New England's own metaphysical poet, the Rev. Edward Taylor (c. 1645–1729), Congregational minister of Westfield, Massachusetts, was equally fascinated with the giant bones of Claverack and their human origin. He recorded his thoughts in his diary and commemorated the significance of this discovery in a poem of nearly 200 lines (rpt., in Stanford, "Giant Bones," 52–61).

¹⁵⁹ Pausanias (6.20.7), too, reports that the bones of Hippodameia, wife of the giant hero Pelops, were carried from Midea (Argolis) to Olympia. Olaus Magnus (1490–1557), Swedish geographer, historian, and archbishop of Upsala, relates in his popular history of Scandinavia, *Historia de gentibus* (1555), lib. 5, cap. 2, that "A girl was also found in the lands of the West, wounded in the head and lifeless; she was attired in a purple cloak, was seventy-five feet long,

Upon this Occasion, it is not easy, to forbear some Essay, to investigate the *Original* of such an *Exorbitant Appearance* among the Sons of Men.

And the *First Thoughts*, which now visit the Mind of one, whom I must confess to be but very shallow in his *Philosophy*, are such as these.¹⁶⁰

We have heard from others, and our Faithful *Microscopes* also, which *our Fathers* knew not, *have told us, what wonderful Things the Great GOD* ha's done, in creating the *Seminal Part* of the World.¹⁶¹

Among the *Vegetables*, the *least Part* of that which we call, *The Seed*, is really so: The *True Seed* lies in so *little Room*, that it is not visible to the Naked Eye: The *Rest* serves, but as a *Lodging* for it, and for its most proper *Nourishment* and *Expansion*, at the First Opening of it. But in that *little Room*, there lies the *whole Plant*, in all the *True Parts* of it: which is afterwards evolved, and extended, and filled up, with its *Adventitious Nutriment*, until it be carried as far as the original *Stamina*, are capable: And *then*, the Growth stops. But perhaps, towards the *Period* of the Growth, so weak may be the *Stamina*, that according to the *Strength* of the Soyl that nourishes it, the *Growth* may be more or less, but a little varied.¹⁶²

And, why may not the *Seeds of Animals* have the like said of *Them*? Yea, The *Microscopical Inquisitions*, have made it more than probable; That the *True Seeds of Animals*, floating in their *Suitable Vehicle*, have, lying in a *Space* much less than the Naked Eye can discern, the whole *Bodies* of the *Animals*, even to all their *Nerves* and *Fibres*: which afterward *Grow* as aforesaid, until their original *Stamina* can be no further carried out.¹⁶³

And this, by the way, takes away the common Cavi, against the *Resurrection of the Dead*; That the *Bodies* of Men, have been devoured by *Others*, and become the *Parts* of them. For | according to this *Hypothesis*, there can be no such Thing, as a *Confusion of Humane Bodies*. They can, by being Devoured, lose no more, than their *Adventitious Nutriment*; And it is Remarkable, That

[▽189r]

and six from shoulder to shoulder" (*Description of the Northern Peoples* 1:234). The first English translation of Olaus Magnus's oft-reprinted work was published as *A Compendious History of the Goths, Swedes, & Vandals* (1658). See William Derham's *Physico-Theology* (1716), bk. 5, ch. 4, p. 291 (note 3) for the same Latin citation.

¹⁶⁰ Mather deprecates himself.

¹⁶¹ Although Hans and Zacharias Janssen seem to be the inventors of a rudimentary microscope (c. 1595), their Dutch colleague, Anton van Leeuwenhoek (1632–1723), improved their invention and thereby discovered bacteria under the microscope. However, the English physicist Robert Hooke (1635–1703), father of microscopy, was the first to publish his observations in *Micrographia* (1665).

¹⁶² Mather here summarizes the research of Nehemiah Grew, William Derham, John Ray, Marcello Malpighi, Anton van Leeuwenhoek and many others who wrote on the subject. Mather covers much of the same terrain in his *Christian Philosopher* ("Essay 26," pp. 131–37). See Appendix A.

¹⁶³ See also George Garden's *Miscellanea Curiosa* (1705–1707), vol. 1, pp. 143–49; and James Drake's *Anthropologia Nova* (1707), bk. 1, ch. 25, pp. 334–36 (misnumbered 352) – both of whom discuss contemporaneous theories of generation and hybridization.

the *Resurrection of the Dead*, is called, *The Filling of the Dead Bodies*. [Psal. 110.6. and, Eph. 2.1.]

Quare. What Provision in the Case of *Amputations*? Whether a *Seminal Principle* seated in a Part of this original *Animalcule* which is yett unknown to us, may not be furnished by our Glorious and Almighty Creator, with a *Plastic Virtue*, to *Renew* what may be lost of it? *Uterius Inquirendum, aut forsán Ignorandum!* However, I will here take Leave to transcribe some Words of Mr. *Leibniz*, whom one that was himself so, calls, *One of the greatest Witts of Europe*.¹⁶⁴

"The most excellent Observators of our Time, have made me beleieve, that Animals or any other organized Beings, do not begin to exist, when we think they do, and that their seeming Generation, is only an Unfolding, and a Kind of Augmentation. But the greatest Quæstion still remains; What becomes of those Souls or Forms, after the Death of the Animal, or the Destruction of the organized Being? The only Way, left is to say, That not only the Souls, but also the Animals themselves, and their organized Machines are, preserved, tho' the Destruction of the Gross Particles has reduced them to a Smallness, that is as imperceptible, as it was before they were born."¹⁶⁵ I will add, That some are of

¹⁶⁴ This paragraph perhaps evidences that Mather was familiar with the startling discovery that crayfish and other crustaceans are able to regenerate lost limbs. The noted French biologist and entomologist René-Antoine Ferchault de Réaumur (1683–1757) published this discovery in "Sur les diverses reproductions," *Mémoires* (1712): 223–45. For a modern discussion, see D. M. Skinner's "New Limbs." The Latin citation reads, "To be investigated further, or perhaps it must remain unknown." The German philosopher Gottfried Wilhelm Freiherr von Leibniz (1646–1716) criticized Descartes's materialist position that excepting human beings, animals are *not* endowed with a soul but operate on purely mechanical principles like primitive machines. Descartes's provocative thesis was hotly debated at the time, and Leibniz countered his French colleague with his essay "Système nouveau de la Nature," in *Journal des Savants* (27 June–4 July, 1695): 446–50, 457, by asserting that all living beings, by virtue of having a soul, are endowed with physical sensation and perception. In his biographical essay on Hieronymus Rorarius, Pierre Bayle (1647–1706), a French rationalist philosopher, literary critic, historian, and Huguenot refugee in Holland, praised Leibniz as "one of the greatest genius's in Europe" and favorably cited Leibniz's argument that ameliorated the extreme positions of Descartes and Rorarius. Mather here paraphrases Pierre Bayle's commendation of Leibniz, which appears in Bayle's famous *Dictionnaire Historique et Critique* (1696, 1701), which was first translated into English, in 1702, and subsequently appeared in multi-volume editions. Mather is likely to have been aware of the controversy over the invention of logarithms, in which mutual charges of plagiarism were traded between the disciples of Sir Isaac Newton and those of Leibniz (see F. E. Manuel, *Newton Historian* 30–33; R. Iliffe's *Newton* 120–25). Finally, at this or a later point in compiling his "BA," Mather may also have known of the famous Leibniz-Clarke correspondence (an epistolary debate between English Newtonians and Continental Leibnizians) on such epistemological concepts as God's voluntarism, mechanical laws, gravity, and space and time. Samuel Clarke (1675–1729), rector of St. James's, Westminster, published this exchange in his *Collection of Papers* (1717). For a discussion of the "*Plastic Vertue*" of the earth – a vitalist power of the earth much admired by the Cambridge Platonists – see W. B. Hunter, "Plastic Nature."

¹⁶⁵ Mather here excerpts (without using ellipses marks) Bayle's citation from Leibniz, in "Rorarius," *General Dictionary, Historical and Critical* (1734–40) 8:767, col. 1–2. A similar argument appears in Leibniz's later disquisition on the soul *Monadology* (1714, 1721), §§ 63–77.

the Opinion, that the Primitive Subject, unto which our Soul is united, goes out of our Body together with it, when we come to Die. Mr. *Poiret* thinks so; and beleeves that *Moses*, on the Day of our Saviours Transfiguration, appeared with the True Body which attended his Soul at his Departure from this Life: the *Dead Body* was but a *Rusty Cover*, he thinks, to that *Subtil One*, unto which the Soul was firstly united. I must confess myself, at a Loss about these things.¹⁶⁶

And, what should now hinder, but that GOD, having at first created Numbers of *Humane Bodies*, in these true *Seeds* of them, there may be some among them, whose original *Stamina*, may be much larger than others, and capable of being drawn forth, to the most *Gigantic Extension*? God, for the Punishment of a wicked World, might order some of these *Gigantean Stamina*, to enter the *Bodies* of the Children of Men, perhaps in their *Food*; and so ly ready to be brought forth, as the *Propagation of Mankind* proceeded. Or, what should hinder their being all at first, in the Body of the First Man according to the Conjecture we have mentioned, on Gen. III.15. The *Giants* thus brought forth, by Parents not exceeding the common Stature, were such a Plague unto the World, that if a *Flood* had not exterminated *Them*, they might in a while have exterminated all the rest, without a *Flood*; Unto *Them alone the Earth had been given, and no Stranger*, or common Man, *had passed among them*.¹⁶⁷ It was most agreeable, That this Plague should come upon the World, in the Way of Generation; (as another ha's done since:) and that when the Carnalities of the World were grown to a *Gigantic Enormity*, they should be chastised with a *Gigantic Posterity*. And that we now suffer no more of this Plague, as well as that it was once inflicted, is owing to that *Vigilant and Immediate PROVIDENCE* of GOD, which is employ'd about the *Propagation of Mankind*: And whereof, the *Proportion of SEXES*, the Difference of *FACES*, (to which I may, for a Third Instance add, what ha's rarely been mentioned, The Variety of *HANDS*, written by the many Hundreds, all of whom learn to *write* of the same *Tutors*;) are Instances that call for our Contemplation and Astonishment.

But I will proceed no further in the *Speculation*; That I do proceed so far, may need a *Pardon*.

Appendix.

After I had written the Foregoing *Illustration*, I found in my Reading, That the *Americans* in the Southern Regions, have Traditions of *Giants*, who were fought by a Man descended from Heaven, that flung upon them Torrents of Fire. A Spanish Captain, who heard them tell the Story, had the Curiosity to dig

¹⁶⁶ Mather's second-hand extract is from *Cogitationes Rationalis (de Deo, anima & malo)*, "Appendice," numero 1, (1685 ed.) 611, by Pierre Poiret (1646–1719), a learned French Protestant theologian; this extract also appears in Pierre Bayle's biographical essay "Rorarius," *General Dictionary* (1734–40) 8:767, col. 2.

¹⁶⁷ Job 15:19.

in the Place, where the *Battel* was fought, where he found *Bones* enough to make a *Skeleton*, the Teeth whereof were Four Inches Long, and Two Broad. *Acosta* relates, that another much larger was discovered at *Mexico*; for one of his *Grinders*, was as big as a Mans Fist, and the other Parts of the Body in Proportion. Lastly, other Bodies were found there, three times bigger than the ordinary *Indians*.

[See *Zarate Hist: of the Discovery of Peru*. L.1. c. 10. p. 18. *Acosta*. L.7. c. 10. *Laet de Orig. Gent. Amer.* p. 83.]¹⁶⁸

[▽190v]

But, oh! the palpable *Darkness*, under which we are languishing! After I have given you, so fair an *Hypothesis*, as at first I thought it, about the *Generations* carried on in the *Animal World*, I must now run the Hazard of destroying it all again. I find myself obliged, for to transcribe from the *Anthropologia nova* of Dr. *James Drake*, a Passage, which will render my *Hypothesis*, at best but very dubious.

“This *Hypothesis* won’t account fairly & fully, for *Mix’d Generation*. For besides the vast Variety of *Mongrel Dogs*, there have been abundance of Observations of Mixtures of Animals of more remote kinds. That of a *Bull* and a *Mare*; which ha’s been often enough observ’d, to procure a particular Name, and is call’d a *Gimar*.¹⁶⁹ But the most common of all these Animals, of mix’d Breeds, is the *Mule*, begotten by an *Ass*, upon a *Mare*. If this *Hypothesis* be true, the *Sperm* of an *Ass*, is full of *little Asses*, and the being nurs’d by a *Mare* should never make *Mules* of them; because the Species is prædetermined, and the Creature is not only form’d, but living. I might perhaps, as Reasonably object,

¹⁶⁸ Mather misspells Zárate as “Zaraet,” here silently corrected. Agostin de Zárate (1514–c. 1560), Spanish historian of Andalusia and imperial auditor to the Spanish crown in Peru, relates in his *Historia del descubrimiento y Conquista del Perú* (1555), lib. 1, cap. 5 (not 10), that giants lived among the ancient Peruvians. According to the remembrances of the Peruvian Indians, these cruel giants fed on vast quantities of fish, went naked, and were ultimately destroyed by flames of fire darted at them by a shining young man from heaven. The battle scars were still visible in the valley where the giants were vanquished. The Spanish Captain “Jhon [sic] de Holmos,” Lt. Governor of the port of Puerto Viejo, in 1543, visited the site and dug up great ribs, bones, a skull, and teeth, which were 3 fingers broad and 4 long. Mather extracts the story from the English translation of Zárate’s *Historia*, appearing as *The strange and delectable History of ... Peru* (1581), bk. 1, ch. 5, fol. pp. 6–7. The Carmelite Fray José de Acosta (1540–1600), whose famous *Historia Natural y Moral de las Indias* (Sevilla, 1590) was translated into English and appeared as *The Naturall & Morall History of the East and West Indies* (1604), gleans from Agostino Zárate the same story of the Spanish captain at Puerto Viejo (Engl. ed., bk. 1, ch. 19, pp. 62–63), which Mather here summarizes. Acosta’s story of the giant grinders discovered in Mexico is related in *Naturall & Morall History* (bk. 7, ch. 3 [not 10], pp. 501–02) and serves Mather as further evidence of the biblical Nephilim. Finally, Joannes de Laet (1593–1649), Dutch geographer of Antwerp, tells his story of the giants in the Amsterdam edition of *Notae ad dissertationem ... Hugonis Grotii, De origine gentium Americanarum* (1643) 83. See also Samuel Purchas, *Purchas his Pilgrims* (1626), bk. 9, ch. 6, § 2, pp. 922–93. A. Mayor explores the discovery of giant bones among Native Americans of the Northeast, in her *Fossils Legends of the First Americans* (2005), ch. 1.

¹⁶⁹ “Gimar” or “gimmer” is an obsolete term for a one-year old ewe or “barren” mare (*OED*).

the Similitude that the Children of the same Parents bear to their Ancestors; Some to the Fathers line, and some to the Mothers. I know some Endeavour, to gett over this Objection, by fancying that the different *Matrix* may have so much Effect, as to alter the Figure of the Animal so far, as may account for these *Mixt Appearances*. But this is so poor, so unphilosophical a shift, that it is not worth an Answer; and they might with as good Authority perswade me, that an *Orange-tree* translated from *Sevil* to *England*, would bear *Apples*; and so *vice versâ*. It is a common Practice in Gardening, to graft one Fruit, upon another Stock: But the Fruit still follows the Species of the Graft, or Cyon; & bear like the Parent Tree; not the Stock it growes upon.

“However old and exploded, the Opinion of a *Plastick Power* be, I must however embrace it; even tho’ I know not exactly wherein it lies: at least, till I meet with some what more sufficient to Resolve my Doubts, than hitherto I have done.”¹⁷⁰

4207.

Q. That Passage, *It Repented the Lord, that He had made Man on the Earth, and it Grieved Him at His Heart*: How may we understand it? v. 6.¹⁷¹

A. It is a notable Hint, which *Munster* ha’s; That it is to be understood concerning the *Spirit* of God, as exciting Regret and Sorrow in the *Hearts* of His Faithful People. Particularly, *Noah* who had the *Spirit* of God in him, seeing the Wickedness of the World, was by that *Spirit* stirred up to more than ordinary *Grief*. [Compare, Eph. 4.30.] *Noah dolet et optat hominem potius non esse quàm sic malum esse. Munster* proceeds, *Quòd si ista referas ad voluntatem substantiæ Divinæ, quòd Deus ab æterno hoc statuerit, Periculosa erit Disputatio de Prædestinatione, quæ suprà captum nostrum est. Tutius ergò est, ut consistamus in Humiliori*

170 James Drake, M. D. (1667–1707), fellow of the College of Physicians of the Royal Society, published *Anthropologia Nova* (1707), which (among other things) explored new theories of generation and hybridization. Mather’s quotation is from vol. 1, bk. 1, ch. 25, pp. 334–35, 335–36 [misnumbered 352]. The idea of the “*Plastick Power*” of nature is derived from Plato’s concept of *anima mundi* (*Timæus*), the theory that nature is endowed with a spiritual power that orders and shapes the size and growth of all biological life forms. Revived by the Cambridge Platonists to combat Cartesian materialism, the vitalist theory made a brief comeback, but was largely discredited by the end of the seventeenth century. In Mather’s time the English botanist John Ray (1628–1705) was one of its principal proponents in his popular *Wisdom of God Manifested in the Works of the Creation* (1691), esp. pp. 31–40; Mather employs Ray’s vitalist argument at some length in his *Christian Philosopher* (Essay 26). For a helpful review of the vitalist debate in the seventeenth century, see W. B. Hunter, “Plastic Nature.”

171 See Appendix B.

*loco, et sentiamus Noah, et alios patres summo Dolo affectos, postquam eis hanc Dei Iram Spiritus revelavit.*¹⁷²

866.

Q. When the Occasion of the *Flood* is mentioned, wee read, *It Repented the Lord, that Hee had made Man*. What Remarkable is there in that Expression? v. 6.

A. You know what the Expression intends. The Dispensations of God on this Occasion, were the Actions of one, who does *Repent*. But it is Remarkable, That *Repentance* is never ascribed unto God, but upon some Account of *Man*. As here, – & upon the Advancement of *Saul*; 1. Sam. 15.11. and upon the Destruction of *Ninive*. Jon. 3.10.

The Design hereof, is to preach *Repentance* unto *Man* himself. The Great God, ascribes unto Himself, that which ought to be in *Man*, that *Man*, who alone is capable of *Repentance*, may learn his Duty from it. Compare, Jer. 18. 8.

Q. That Expression *I will destroy Man, which I have created*? v. 7.

A. Our Translation will do better, to keep this Term in the Original; *I will blott out Man*; The LXX keeps it; ἀπαλειψω. The Metaphor is taken from Writing, or Graving, or Painting. It may have reference to the *Image of God* pourtray'd on Man, whom God had made after, His own Image. Because Man had by his wicked Imaginations depraved this Image, & instead of /יצר הטוב/ *The Good Image*, introduced /יצר הרע/ *The Evil Image*; the Lord threatens to *Blott out* all.¹⁷³

[△] [△Insert ends]

¹⁷² The paragraph is extracted from *Biblia Hebraica* (1546), by Sebastian Münster (1489–1552), the German Protestant reformer and professor of Hebrew and theology at Heidelberg and Basel. The Latin citation from vol. 1:16, annot. (e), translates, “Noah grieved and wished that mankind did not exist, which would be preferable to its being so evil.” Münster continues, “Because if you refer this to the will of the Divine substance, since God had established it since eternity, it will be dangerous to discuss predestination, which is out of our reach. Therefore, it is safer that we should take a more humble position and agree with Noah and the other fathers who were affected by utmost grief, after the Spirit revealed to them the wrath of God.” In his “Note Book of Authors” (Gen. 6:5), Mather lists as his source “v. 5. Charnock, vol. 2,” which is *The Works Of the late learned Divine Stephen Charnock, B. D.* (1684), vol. 2, “A Supplement”: “A Discourse of the Sinfulness and Cure of Thoughts” (on Gen. 6:5) 2:1–19 (second pagination series), by Stephen Charnock (1628–80), an English nonconformist minister in Dublin (Ireland) during Cromwell’s Interregnum and later practicing physician in London. For whatever reason, Mather excised Charnock’s excerpt altogether when he decided to drop his commentary on Gen. 6:5.

¹⁷³ The Greek “apaleipso” (LXX Gen. 6:8 and 4 Kings 21:13) signifies “shall expunge” or “wipe out.” See also Paulus Fagius’s *Targum, hoc est, Paraphrasis Onkeli* (1546), on Gen. 6, note 5 (at end).

3388.

Q. *These are the Generations of Noah?* v. 9.

A. P. Fagius (on Gen. 37.2.) expounds the Word, which we translate, *Generations*, to signify, *Events*. It may therefore be translated, *These are the Things which befel Noah & his Family*.

Philo remarks, That *Moses* instead of recounting the *Ancestors* of *Noah* here, does reckon his *Vertues*.¹⁷⁴

136.

Q. How far was the World peopled before the *Flood*? v. 12.

A. Ponder the Longævity of the Antediluvian Patriarchs, and you will not scruple to affirm it probable, *That more People perished in the Flood, than there are now alive in the World*. Lett us make a Computation, with as much Disadvantage, to our own Assertion, as can Reasonably bee desired. Wee'l abate Two or Three of the first *Centuries*, by which time, the World might bee supply'd with People not a few; & wee'l suppose a Man to have Children at *Sixty*, & in the Next *Forty* Years to have *Twenty* Children. Now single out the *Shortest Liver* of any mentioned (except *Enoch*;) before the *Flood*; and from that one Stock of *Seven Hundred* Years, multiplying still by *Twenty*, wee shall find the Produce to bee more than One Thousand, Three Hundred & forty Seven Millions: Thus that *One Family*, would long before the Flood, have afforded, it may bee more People, than are now living on the Earth. Moreover, If wee consider, that within a very few *Centuries* of Years after the *Flood*, Histories tell us of *One Army*, in which were *Thirteen Hundred thousand* Foot, *Five Hundred Thousand* Horse, *One Hundred Thousand* Chariots, & as many Camels; and *This Army*, encountered by a yett greater Force; it may facilitate our Beleef of the wonderful Populosity which might bee before. But indeed, I insist not upon this; for the Histories which tell us of *these Armies*, are not much to be relied upon.¹⁷⁵

¹⁷⁴ Mather's sources are Simon Patrick's annotation on Gen. 6:9 (*Commentary* 1:34) and *Thargum, hoc est, Paraphrasis Onkeli Chaldaica* (1546), a Latin translation with annotations of the Targum Onkelos by Paulus Fagius, aka. Paul Büchlein (1504–49), German Hebraist, professor of Hebrew at Strasbourg and Cambridge. Fagius's rendering of "generationes" as "eventa" (events) appears in his unpaginated commentary on Gen. 37 (note 1). Mather inserted his reference to Philo's *Quaestiones et Solutiones in Genesin I* (§ 97), in *Works* (812) at a later time.

¹⁷⁵ Mather's immediate source for this paragraph is unidentified. His delight in such calculations is also evident in his *Threefold Paradise* (275–76), but Mather is no exception. Sir William Petty (1623–87), in his popular *An Essay concerning the Multiplication of Mankind* (1682, 1686, 1698), has much to say on the same subject. Similar computations about antediluvian populations appear in Thomas Burnet's *Sacred Theory* (bk. 1, ch. 3, p. 36) and in William Whiston's *New Theory*, fifth ed. (pt. 2, bk. 3, ch. 3, p. 249). Mather's allusion to the epic combat between the two vast armies is to Diodorus Siculus (*Bibliotheca historica* 2.5.4, 2.17.1–2). This Graeco-Roman historian relies on Ctesias Cnidius for these impossibly large troops, whose contradictory numbers are given in superlatives. Here we learn that the legendary Assyrian King Ninus led immense troops against his Bactrian foes. However, his spouse and heir Semiramis raised

3389.

Q. What Wood, was that *Gopher-Wood*, whereof the *Ark* was made? v. 14.

A. The learned *Nic. Fuller*, in his *Miscellanies*, hath observed, That it is no other, than that which the *Greeks* call, κυπαρισσος, *The Cypress Tree*. Taking away the Termination, *Cupar*, and *Gophar* differ very little in Sound. *Bochart* hath confirmed this Conjecture, by demonstrating, that no Countrey so abounds with this Wood; as that Part of *Assyria*, which was about *Babylon*; where *Arrianus* tells us, That *Alexander* built a Navy of these Trees; for, saies he, *There is great Plenty of these Trees alone, in the Countrey of Assyria, but of others fitt for making Ships, there is great Scarcity*. *Strabo* saies the same; From whence *Bochart* thinks it probable, that *Noah* and his Children lived in this Countrey before the Flood. Nor is it likely, that such a vast Bulk as the *Ark*, was carried far from the Place, where it was made. And the Mountains of *Ararat*, are upon the Borders of *Assyria* Northward; which Way the Wind blew (if there were any) in all Probability, the Rain coming from the South Sea.¹⁷⁶

[△] [△Insert ends]

13.

Q. What further *Light* can you give about, *The Window of the Ark*? v. 16.

even more: 1,300,000 foot-soldiers, 500,000 horses, and 100,000 chariots against her Indian enemy Stabrobates (Staurobates), who ultimately trumped her with yet larger forces. The story is put to similar use in Sir Walter Raleigh's *History of the World* (1614), bk. 1, ch. 12, § 4, pp. 215–16, and in Sir Thomas Browne's *Pseudodoxia Epidemica* (1658), bk. 6, ch. 6 (*Works* 3:336). Significantly, Mather's numbers agree with those in Browne, but not with those given in Raleigh or in Diodorus Siculus – all of whom acknowledge the untrustworthiness of Ctesias Cnidius (late 5th c. BCE), the source for the Graeco-Roman historian of Sicily. Mather's disclaimer in the paragraph's last sentence was added at a later stage and suggests that he had second thoughts about using such flimsy evidence to prove his point.

176 First and foremost an editor and synthesizer of other scholars' ideas, Cotton Mather extracts this paragraph with little alteration from Simon Patrick's annotations on Gen. 6:24 (*Commentary* 1:34), but Patrick himself draws on a wealth of information from his predecessors to whom he merely alludes by name. Nicholas Fuller (c. 1557–1626) was a learned English theologian who was rector at Waltham, Hampshire, at his death (*ODNB*). His *Miscellanea Sacra* (1617), lib. 4, cap. 5, pp. 492–93, is the source in question. The Greek word "kyparissos" signifies "cypress tree." Samuel Bochart confirms the abundance of cypress trees in the area (*Geographia*, pars 1, lib. 1, cap. 4, col. 21–24), as do Arrianus (*Alexandri Anabasis* 7.19.4) and Strabo (16.1.11). Marcus Valerius Martialis (c. 38–c. 104 CE), the Spanish poet of Bilbilis, asserts that gopher wood (cypress) is incorruptible (*Epigrammaton* 6.49.5; 6.73.7). Thus Bochart believes Noah lived in the area where cypress trees abounded (*Geographia*, pars 1, lib. 1, cap. 3–4, col. 13–24). In his letter to John Woodward ("Curiosa Americana," first series, 1712), Mather conjectured that Noah's Ark was built of "*Shittim* Wood" or "black *Acacia*," also known as "the *Juniperus arbor tetragonophyllos*" common to the East-Indies," in "An Extract of several Letters from Cotton Mather, D. D." *Philosophical Transactions* 29 (1714–16) 63.

A. A learned Man, saies, The Hebrew Word, should bee Translated, rather, *A Splendor*, than, *A Window*. Whence hee infers, That God Ordered, or Directed *Noah*, to make some chymical Præparation, like the subterraneous Lamps known & used among the Ancients, to give Light unto the *Ark*. For the Air being then extremely darkened, with the Clouds of the excessive Rain, a *Window* could bee but little serviceable for the Transmission of the Light.¹⁷⁷

4208.

Q. The Lord saies unto *Noah*; *With thee will I establish my Covenant*. What Covenant? v. 18.

A. *Munster* saies, Tis the *Covenant* made at the Beginning, about the *Promised Seed*, that was to break the old *Serpents Head*. This *Covenant* is now Renewed and Confirmed unto *Noah*, who now being assured, That the *Messiah* was to descend from him, he had an Assurance that God would have His Church continued among his Posterity.¹⁷⁸

653.

Q. What Footsteps of *Noah*, and of *his Flood*, can you find in Pagan Antiquitie? v. 22.

A. Innumerable. But *These* among the rest.¹⁷⁹

Berosus, the Chaldæan Priest, relates; how wicked the old World was, & how *Noah* warned them of their Wickedness & of the approaching *Flood*.

The fame of the *Flood*, & of the *Ark*, was every where, among the Pagans. Not only *Berosus*, quoted by *Josephus*; but *Nicolaus Damascenus*, by him also quoted, and *Abydenus* the Assyrian, quoted by *Eusebius*; *Alexander Polyhistor*,

177 Mather had addressed this issue before in his “The Introduction” to “BA.” The “learned Man” is Edmond Dickinson, M. D. (1624–1707), an English alchemist, whose *Physica Vetus et Vera* (ch. 20, §§ 7–9, pp. 324–26) Mather had mined before. The Hebrew word “tsohar” (Gen. 6:16) does signify “splendor” as well as “glistening light” and “window” [Strong’s # 6671, 6672]. According to *Genesis Rabbah XXXI:11* (Gen. 6:16), R. Levi and R. Phineas argue that the word “tsohar” denotes “precious stone” or “polished gem,” a crystal which illuminated the ark throughout the year, dimming at day, but radiating at night. Simon Patrick appears to eschew supernatural explanations by suggesting that instead of “one great Window . . . many little ones” might have supplied the ark with sufficient light (*Commentary* 1:34–35).

178 The source is Sebastian Münster’s annotation on Gen. 6:18, in *Hebraica Biblia* (1:18), annot. (a).

179 Even though Simon Patrick (on Gen. 6:17, in *Commentary* 1:35) and Nehemiah Grew (*Cosmologia Sacra*, bk. 4, ch. 2, § 12, p. 146) offer quite similar evidence from the ancients, Mather here extracts his entire commentary on Gen. 6:22 from John Edwards’s *Discourse* (1693) 1:118–24.

Melo, *Hieronymus Egyptius*, *Apollodorus*, and all the *Barbarian Historians*, as *Josephus* tells us, have mentioned it.¹⁸⁰

Some call in quæstion the Credit of these Writers; but, I am sure, they can't quæstion *Lucians Dea Syria*, where you'll find most of the Passages in the Sixth & Seventh Chapters of *Genesis*; which Things, hee saies, the Greeks relate, out of their *Archives* of the Flood. I refer you to the Book it self.¹⁸¹

Plutarch also, (who, like *Lucian*, disguises *Noah* under the Name of *Deucalion*) reports the Egress and Return of a *Dove*, to signify the Decrease of the Waters, from whence likewise an *Olive-branch*, was in all succeeding Ages, made a Symbol of, *Peace*, *Concord*, and *Friendship*. *Livy* tells us, t'was thus among the *Greeks* & the *Carthaginians*, and *Polybius*, with Instances of it, saies, *πᾶσι τοῖς βαρβάροις ἐστὶ συνθημα φιλίας*. In that History wee also have a Narrative of the *Raven*; and from the same Original that *Plutarch* fetch'd his Report, wee may conceive that *Eliau* had *his*; About *Apollo's* employing a *Raven*, to bring him some fresh Water; in which Errand, hee loitered on a certain Tree till the *Figs* grew Ripe. Tho' *Ovid*, saies it was, an *Apple-Tree*;

Immemor Imperij, sedisse sub arbore fertur,

*Dum fierent Tardâ dulcia poma morâ.*¹⁸²

¹⁸⁰ Edwards (*Discourse* 1:118). Edwards's own source for the Chaldean Berosus and for the peripatetic historian Nicolaus Damascenus is Josephus Flavius's *Against Apion* (1.19) and *Antiquities* (1.3.6; 1.7.2). The Assyrian historian Abydenus, on whom Berosus draws frequently, is here cited by Eusebius Pamphilus (*Praeparatio evangelica* 9.12). The Greek ethnographer Alexander Polyhistor; Melo, who authored a tract against the Jews; the Phoenician historian Hieronymus Egyptius; the Greek chronicler Apollodorus of Athens (*The Library* 1.7.2; 3.8.2; 3.14.5), and a whole host of ancient historians – all mentioned in Josephus Flavius's *Against Apion* I, or excerpted in Eusebius's *Praeparatio evangelica* (9.11–12, 18, 19) – are favorites among those who seek to allocate extra-biblical proof to verify the Noachic Flood by identifying Deucalion, son of Prometheus, with the biblical patriarch. Significantly, Seneca (*Naturales quaestiones* 3.27.1–3.30.8) believed that the Flood was not a past, but near, future event, and developed elaborate theories on how this deluge could come about through natural causation alone. If anything, Mather's contemporaries Thomas Burnet's *Sacred Theory* (1684) and William Whiston's *New Theory* (1696) don't have anything on Seneca in scientific sophistication of their explanations. In Mather's time, the most exhaustive examination of this sort was worked up by the Dutch scholar Joannes Lomeier, whose *De veterum gentilium* (1681) argues that the biblical story of the Flood was the original blueprint for all the "corrupted" versions proliferated by pagan historians.

¹⁸¹ Edwards (*Discourse* 1:119). Edwards refers to the Greek author Lucian of Samosota (b. c. 120 CE), whose story of Deucalion's flood (*De Syria dea* 12–13, *Works* 4:350–53) is generally read as a parallel account to that in the Bible.

¹⁸² Edwards (*Discourse* 1:119–20). Both Lucian (*De Syria dea* 12–13, *Works* 4:350–53) and Plutarch (*Moralia: De sollertia animalium* 968 F, line 4) call him Deucalion. This Greek Noah interpreted diluvial signs just like his biblical counterpart. When Deucalion "released a dove from the ark, as long as she returned, it was a certain sign that the storm was still raging; but as soon as she flew away, it was a harbinger of fair weather" (*Plutarch's Moralia* 12:377). The Roman historian Livy (29.16.6 and 30.36.4) and the Greek Polybius Megalopolitanus point to the olive branch as a symbol of friendship. This is suggested by Polybius (*Historiae* 3.52.3.4), who argues that "all the barbarians use it [the olive branch] as a covenant of friendship." Poly-

For which Neglect it is added, *Apollo* turn'd him into the *Blackabird*. And from hence probably tis, that *Servius* remarks it, as an Observation of the Ancients, That the *Crowes* are *forgetful Creatures*, forgetting sometimes to Return unto their *Nests*.

Briefly, Pagan Antiquitie, ha's confounded, *Ogyges* with *Deucalion*, and both with *Noah*.¹⁸³

And what *Ovid* relates, concerning *Deucalion*, with his Wife, betaking themselves unto their Devotions, after the Flood; it is but what *Moses* relates, of *Noahs* then erecting an *Altar*.¹⁸⁴

Kircher thinks, that *Nisroch* [2. King. 19.37. Isa. 37.38.] is as much as, *Numen Arcae*; & that it was the Image of *Noahs* Ark, worshipped among the *Assyrians*.

And, you know, *Janus's* Coin, with a *Ship* upon it.

I only add; *Quere*, whether *Prometheus* were not one of the Names given to Noah, by the Ancients?¹⁸⁵

bis narrates the story of the ominous raven, in *Historiae* (1.22, 23, 27, 28). Claudius Aelianus (*De natura animalium* 1.47–48) relates that the sluggish raven waited until a field of corn (not figs) was ripe. Finally, Ovid tells us in his *Fasti* (2.255–56) that “Unmindful of his orders he [the raven] perched under the tree / to wait until the fruit should sweeten lingeringly.”

¹⁸³ Edwards (*Discourse* 1:121). The Roman grammarian and commentator Maurus Servius Honoratus (fl. 4th c. CE) alludes to the forgetful crow perched on an oak tree, in his commentary on Virgil's *Aeneid* (12.246), in *Vergili carmina commentarii* (4.06). According to the *OCD*, the mythical King Ogygus, variously located in Boeotia (Pausanias 9.5.1), Lycia, Attica, and in Thebes (the latter city bearing the epithet Ogygian), is associated with a tremendous flood that inundated the region around Athens and Achaia, about the time of the OT Patriarch Abraham (A.M. 2140), in Edwards's reckoning. Eusebius (*Praeparatio evangelica* 10.9.486; 10.10.488d–489b) associates Ogygus with the primal Flood of Noah. In this respect, Ogyges reappears in Ovid's *Metamorphoses* (1.318–94) as Deucalion, ruler of Thessaly, who with his wife Pyrrha, were the sole survivors of a flood that inundated his kingdom. This popular association of Noah with Ogyges, Saturn, Deucalion, Prometheus, and Janus – heroes all in Greek and Roman mythology – can also be found in Mathias Prideaux's *Essay and Compendious Introduction* (1650) 5; in Edmund Dickinson's *Delphi Phoenicizantes* (4–25); Joannes Bomparsius's *Parallela sacra et profana* (1689) 44–58; and in Gerard Vossius's *De Theologia Gentili* (1641), lib. 1, c. 19, pp. 144–49.

¹⁸⁴ Edwards (*Discourse* 1:122). Both Deucalion and Pyrrha implore the oracle of Themis for help, in Ovid's *Metamorphoses* (1.318–23); Noah appeases his God by offering animal sacrifices on an altar (Gen. 8:20).

¹⁸⁵ Edwards (*Discourse* 1:123). Edwards acknowledges as his source Athanasius Kircher (1601–80), renowned German Jesuit polymath, professor of mathematics, physics, and oriental languages at the Collegium Romanum, whose three-volume *Cædipus Ægyptiacus* (1652–54) attempts to decipher Egyptian hieroglyphics and the arcane symbolism of Egyptian temples. His discussion of Nisroch and Noah appears in this work, tomus 1, syntagma 4, cap. 21, pp. 376–84; Kircher also treats the story of Noah / Deucalion in his *Arca Noë* (1675), lib. 2, cap. 6, pp. 136–42, where Kircher replicates two coins of Roman Emperors Marcus Julius Philippus Augustus (244–49 CE) and of Lucius Septimius Severus Pertinax (193–211 CE); the reverse sides of these coins depict an arklike box carrying Deucalion and Pyrrha, above whom are perched ravens or doves (*Arca Noë* 138). Numismatic evidence of this nature served as proof for Noah's Flood as represented in pagan mythology. Kircher's “Numen Arcae,” or “image of

A *Flood*, was, according to them, in the Time of *Prometheus*; & *Prometheus* was by them reckoned the Restorer of Mankind. If they call'd him, *The Son of Japetus*, this is but one of their ordinary Confusions.

Was *Prometheus* chained by *Jupiter*, to Mount *Caucasus*, with an *Eagle* or *Vulture*, feeding on his Entrails? This is but more like the rambling Poets. Mount *Caucasus*, is Mount *Ararat*, on which the *Ark* rested; and the *Raven*, was the *Eagle*, or *Vulture*, whose actions, gave no little Motion to his Mind. And, if *Prometheus* had his Name from his *Foresight*; this was *Noah* all over, who being *Warned of God*, & moved with *Fear & Faith*, prepared an *Ark*.¹⁸⁶

[185r] [185v–190r inserted into 181r]

[191r]

Q. Of that most famous Monument, The ARK, Lett us resume the Consideration; and assisted by an Exercitation of *Heidegger*, Lett us again consider many Circumstances, that relate unto it? v. 22.

A. A Noble and a Grateful Subject. Had it not been for the *Third* of *Genesis*, and the *Fifteenth*, a sinful World must have wholly perished by that time it arrived unto the *Sixth* of *Genesis*.

An ARK must be employ'd for the Præservaⁿtion, and Reparation of Mankind, when a FLOOD swept away a sinful World before it.

the ark,” is associated with the obscure Assyrian god Nisroch (shaped like a dove or eagle), in whose temple Sennacherib worshipped when his two sons assassinated him (2 King 19:37 and Isa. 37:38). For a recent study of Kircher’s significance, see P. Findlen’s *Athanasius Kircher* (2004). According to Rashi, the idol Nisroch was made from one of the boards of Noah’s ark (Rashi on Isa. 37:38 and Talmudic tractate Sanhedrin 96a). The two-faced Janus, Roman god of archways, is found on many ancient Roman coins, on whose reverse side an anchor or the prow of a ship are frequent motifs of Rome’s naval power. Prometheus, son of Japetus, taught man how to tame fire and grandfathered Deucalion, who built cities and temples, and was first to rule over men (Apollonius Rhodius, *Argonautica* 3.1086–87; and Pindar, *Olympian Odes* 9.41–66) and is thus associated with the biblical Noah.

186 Edwards (*Discourse* 1:124–25). Gerard Vossius (*De Theologia Gentili*, pars 1, lib. 1, cap. 18, pp. 141–42), Theophilus Gale (*Court* [1672], part 1, bk. 2, ch. 6, pp. 72–73, §§ 4–5), and Samuel Bochart (*Geographia Sacra* [1707], pars 1, lib. 1, cap. 2, col. 10–13) discuss the parallels between Prometheus and Noah, and between Prometheus and Noah’s son Japheth. According to Hesiod (*Theogonia* 506–616), Prometheus (signifying “foresight”), son of Klymene and Japetus, is by Zeus (Jupiter) chained to a pillar as punishment for trying to outsmart him. During the day, a long-winged eagle feasts on Prometheus’s deathless liver, which regrows every night. Biblical commentators who maintain the primacy of OT history frequently associate Japetus, Prometheus, and Deucalion with Noah, who (like Prometheus) is endowed with prophetic foresight. The similarity of the names of Japheth (one of Noah’s three sons) and Japetus (Deucalion’s grandfather) suggests to many Christian apologists of Mather’s time the confusion of the pagans who, like Hesiod, allegedly borrowed much of their mythology from the Mosaic account. Warned by God, Noah is moved by faith and fear to build an ark (Heb. 11:7). Here ends Mather’s excerpt from John Edwards’s *Discourse*. D. C. Allen’s classic *Legend of Noah* (1949, 1963) is still one of the most enlightening studies of how scholars debated the evidence of Noah’s Flood from the Renaissance to the early eighteenth century.

Athanasius Kircher's *Arca Noë* (1675)

By permission of Special Collections Department, Woodruff Library, Emory University

But why called, *An Ark*, and not *A Ship*? The Reason is assigned by *Aben Ezra*; *Quia non habuit formam Navis, neque in ea fuerunt Remi*.¹⁸⁷

Gopher, the Name of the *Wood*, whereof the *Ark* was composed, being one of the *απαξ λεγόμενα*, *Words but once occurring*, in the Bible, it ha's occasion'd much Disputation. But it is determined at length, for the *Cypress* tree; whereof *Pliny* tells us, That it is, *Adversus cariem Tineasque firmissima*: And *Martial* tells us, *Nec sæcula centie{n}s peracta, Nec longe cariem timet senectæ*. For which Cause the *Athenians*, as *Thucydides* tells us, buried those who dyed serving their Coun-

¹⁸⁷ Heidegger (1:320–340 [misnumbered 430], Exerc. XVII). The second-hand Latin citation from Ibn Ezra's gloss on Gen. 6:14 appears in Heidegger (1:321, § 2) and reads, "because it [the ark] did not have the shape of a ship nor did it have oars" (Ibn Ezra, *Commentary* 1:100). D.C. Allen's *Legend of Noah* (chs. 7–8) summarizes the Renaissance debate on the size and shape of Noah's Ark. In paintings and stone carvings of the period, the Ark generally appears as a "box or chest." Since Noah is the OT type for the second Adam, the Ark was frequently portrayed as "a gravechest, like a sarcophagus, the funeral box in which the body of Christ was laid" (*Legend* 156). The English Hebraist John Lightfoot rendered the Ark as a rectangular three-story house with a pitched roof, in "A Chronicle of the Times," *Works* (1684) 1:5. The most magnificent blueprint of Noah's vessel, its interior compartments, and accommodation of the animals appears in Athanasius Kircher's *Arca Noë* (1675), lib. 1, sec. 3, cap. 2, between pp. 46–47; cap. 9, between pp. 108–09; and cap. 11, between pp. 116–17.

treys, in Coffins of *Cypress*; δια το ασηπτον ειναι. *Quia expers est putredinis*.¹⁸⁸ Both *Arrian* and *Strabo* tell us, How plentifully that Wood grew in the Countrey where we may suppose the *Ark* to be built. And whereas *Pliny* informs us, That the *Cypress*-Tree was sacred unto *Pluto*, and employ'd at Houses of Mourning, about their *Funerals*; we will not accept the Causes for it, assigned by *Hadrianus Junius*, a Physician; but rather look on it, as an Inveterate Superstition of the Gentiles, in Commemoration of the *Ark*, which was a *Cypress*-Coffin, wherein Mankind lay buried, with unspeakable Sorrow and Horrour, for a Year together.¹⁸⁹

Of the *Pitch* employ'd about the *Ark*, *Aben Ezra* tells us, that some fly to an *Arabic* Interpretation. And of them who do so, *De Dieu*, and *Schindler*, take it to be the same that the *Arabians* call, *Caphura*, or, *Camphire*, which the Orientals use to preserve the Bodies of the *Dead*. So *Goli* likewise. But it seems not likely, that *Noah* could be supplied, with so vast a *Quantity*, as must be necessary for the *Ark*; of so costly a Material. But the *Pitch* employ'd about the little *Ark* of *Moses*, may lead us to the Nature of *That* which was employ'd about the Greater one of *Noah*.¹⁹⁰

¹⁸⁸ Heidegger (1:321–22, Exerc. XVII, § 3). Much of the same information appears in Simon Patrick (*Commentary* 1:34). The Greek phrase ἀπαξ λεγόμενα [apax legomena] suggests, “things once mentioned.” The signification of קִפָּר (gopher) appears only once in the Hebrew Bible (Gen. 6:14) and attracted many commentators, most of whom concur that the term suggests “wood from the cypress tree.” See Nicholas Fuller’s *Miscellanea* (1616), bk. 4, ch. 5, pp. 490–95 for the main argument and, of course, Matthew Poole’s indefatigable *Synopsis Criticorum* (1:82–83, *Works* 1:333–35) for a summary of the main combatants and their explanations: Jerome, Bochart, Buteo, Castalio, Drusius, Fuller, Junius and Tremellius, Menochius, Münster, Oleaster, Vatablus, and the Targums Onkelos and Jonathan vote for “gopher” to signify either “cedar,” or “pine,” “boxwood,” “fir,” “Juniper,” “Terebinth,” or “Cypress.” Indeed, the hermeneutical compass of these notable theologians points in many different directions. Pliny (16.81.223) relates that the wood of the pine and of cypress trees is “the strongest to resist rot and wood-worms.” Martial (6.49.5–6) agrees and claims that the cypress tree “fears not the passage of a hundred generations nor the decay of protracted age.” And the Greek historian Thucydides (c. 460/455–c. 395 BCE), best known for his account of the Peloponnesian War (431–404 BCE), relates in his *History* (2.34.3) that the Greeks buried their heroes in “coffins of cypress wood.” His Greek scholiast comments “διὰ τὸ ἀσηπτον εἶναι” (*Scholia in Thucydides* 2.34.3, line 1); Heidegger’s Latin translation reads, “Because it is immune to rotting.” Similar speculations are offered in Mather’s letter (Nov. 18, 1712) to John Woodward, secretary of the Royal Society, extracted in *Philosophical Transactions* 29 (1714–16) 63.

¹⁸⁹ Lucius Flavius Arrianus relates that Alexander the Great built his navy from these cypress trees (*Alexandri Anabasis* 7.19.4), and Strabo (16.1.11) mentions the relative scarcity of timber in Babylonia, except for “the cypress trees in the groves and the parks.” The sacredness of the cypress, its longevity, and its use in funerals are related in Pliny (16.60.139; 16.79.213–17) and Ovid (*Metamorphosis* 10.106–142). Both Heidegger and Mather reject the typological argument of Hadrianus Junius, aka. Adriaan DeJonghe (1511–75), Dutch physician, humanist, and educator, whose analogy between Noah’s ark, man’s mortality, and the longevity of cypress wood appears in his *Animadversorum libri sex* (1556), lib. 1, cap. 20, pp. 53–55.

¹⁹⁰ Heidegger (1:323–24, Exerc. XVII, § 6). Ibn Ezra (on Gen. 6:14) lists a variety of interpretations of קִפָּר [kaphar] “pitch” [Strong’s # 03722, 08804], but rejects on grammati-

The *Dimensions* of the *Ark*, were *Three Hundred Cubits* in Length; *Fifty* in Breadth; and *Thirty*, in Height. It was observed by the Ancients, that here was a notable Correspondence to the Proportions of an Humane *Body*. And *Austin*, in his Book, *De Civitate Dei*, flourishes upon it, with a Comparison between Christ and His Church. *Nam et Mensuræ ipsæ Longitudinis, Altitudinis, Latitudinisque ejus, significant corpus Humanum; in cujus veritate, ad Homines prænunciatus est venturus, et venit.*¹⁹¹

But there have been many *Cavils*, about the Measures of these *Cubits*. *Apelles* of old complained, That a Structure no bigger than this, would hardly have carried *Four Elephants*. *Origen* therefore, to defend the History, pretends the *Egyptian Geometry*, according whereto *Six Cubits*, would be called *One*. *Capellus*, indeed would *Mend* the Reading in *Origen*, and not *Blame* it: making him say, *There were Six Feet in a Cubit*. But *Austin*, approves and applauds the Proposal of *Origen*; *Moyses scilicet, Hominem Dei eruditum, sicut Scriptum est, in omni Sapientiâ Ægyptiorum, qui Geometricam dilexerunt, Geometrica Cubita significare potuisse, ubi unum quantum sex nostra valere asseverant.* But this is a meer κρησφύγετον. The *Ark*, in this way of *Measuring*, would have been a Thousand and Eight Hundred *Vulgar Cubits* long; Three Hundred Broad; One Hundred and Eighty, High. Had the *Ark* been of such an enormous Magnitude, we should have had at least a little more Intimation of it, in the Sacred Scriptures; Nor is there Proof, that ever such large Measures, were called, *Cubits*, among the Ancients. Others have gone more modestly to Work; and have distinguished, the *Sacred Cubit*, and the *Vulgar Cubit*; making the former as large again as the latter. The best Foundation of this Distinction, is not, in the Dimensions assigned unto *Solomons* *Brasen Sea*, in the *Chronicles*; but in the Prophecies of

cal grounds those who attribute the term to an Arabic homonym (*Commentary* 1:100). The Dutch Reformed theologian and Orientalist Ludovicus de Dieu, aka. Lodewijk de Dieu (1590–1642), explores the Arabic root of “kaphar,” in his *Animadversiones in Veteris Testamenti* (1648) 19–20; the German Lutheran Orientalist Valentin Schindler (d. 1604), discusses the linguistic roots of the term in his famous *Lexicon Pentaglotton, Hebraicum, Chaldaicum, Syriacum, Talmudico-Rabbinicum & Arabicum* (1612), a magnificent polyglot lexicon (the first of its kind). Camphire (*Lawsonia alba*), the “al-henna” of the Arabs, is a fragrant shrub with cream-colored, yellowish blossoms, from which is won the *Oleum Cyprineum*, a fragrant oil used for dyeing and embalming (*SBD*). Jacobus Golius, aka. Jacob Gohl (1596–1667), Dutch Orientalist, professor of mathematics and Oriental languages at Leiden, largely agrees with his peers on the linguistic origin and meaning of “Camphire” (Camphora), in his *Lexicon Arabico-Latinum* (1653), col. 2048. This aromatic spice, Golius knowingly relates, has its fountain in paradise.

¹⁹¹ Heidegger (1:324, Exerc. XVII, § 7). D. C. Allen reviews the debate about the Ark’s size, in *Legend* (71–80). According to St. Augustine, whom Mather here quotes at second hand from Heidegger, the Ark mirrored the body of Christ in his human form: “For even its very dimensions, in length, breadth, and height, represent the human body in which He came, as it had been foretold” (*City of God* 15.26), in *NPNFi* (2:306). St. Ambrose develops this analogy at length in his *De Noë et arca*, cap. 6 [PL 14. 383–394].

Ezekiel: [ch. 40.5. and, 43.13.] where the *Vulgar Cubit*, is called, *A Cubit*; and the *Sacred Cubit*, is called, *A Cubit, & an Hands Breadth*.¹⁹²

Jerom rightly observes; The *Vulgar Cubit* contain'd, *Five Palms*, or Twenty Digits; The *Sacred Cubit*, contained *Six Palms*, or Twenty Four Digits. But it appears not that the *Sacred Cubit* was considered, before the Law, under which there were *Sacred Buildings* erected unto the Lord.¹⁹³

[192v] | We will not concern ourselves, with *Capellus* distinction of *Cubiti Majores*, and *Medij*, and *Minores*; The *Majores*, he makes to be *Three Foot*; but the Pretensions for it, are too feeble to be insisted on. We will suppose *Moses* to intend the *Common Cubit*; the same that he calls: [Deut. 3.11.] *The Cubit of a Man*. It is very probable, That from the Body of *Adam* himself, the Measure was introduced.¹⁹⁴

¹⁹² Heidegger (1:324–25, Exerc. XVII, § 8). Apelles, the heretic and disciple of Marcion, questioned the capacity of Noah's Ark to accommodate pairs of all the animals of the earth; however, Origen defends the Ark's dimension given by Moses, arguing that the Jewish Lawgiver (trained in the geometry of the Egyptians) used the Egyptian cubit, which is six times larger than the one commonly used (*Homiliae in Genesim*, "Homilia 2.2") [PG 12. 161–67], and *Homilies in Genesis* (Hom. 2.2, pp. 75–77, n. 14, 16). Similarly, the Epicurean Celsus laughs at the story of Noah's Ark as a distorted version of Deucalion's flood. Thus challenged, Origen (*Contra Celsus* 4.41) embarks on a mystical multiplication of the Ark's size "nine myriads of cubits long in the base, and two thousand five hundred in breadth" (*ANF* 4:516). Mather here refers to Louis Cappellus's linguistic retrenchment of Origen's interpretation of the cubit, in Cappellus's *Commentarii et notae criticae in Vetus Testamentum* (1689) 369–72. St. Augustine, however, was inclined to agree with Origen's amplification of the cubit's size, arguing (*De Civitate Dei* 15.27.3) [PL 41. 474], "Moses the man of God, being, as it is written, 'learned in all the wisdom of the Egyptians,' who delighted in geometry, may have meant geometrical cubits, of which they say that one is equal to six of our cubits" (*NPNFi* 2:307). For much the same see Augustine's *Quaestiones in Heptateuchum* 1.4 [PL 34. 549] and the rabbinic commentary *Midrash Rabbah* (Genesis XXXI:10). The Greek word κρησφύγετον [*kresphygeton*] signifies a (linguistic) "retreat" or "retrenchment." In "An Essay for a Further Commentary, on the Sacred Scriptures," appended to the end of "BA," Mather measures the biblical cubit at 21.888 inches and the "hands-breadth" at 3.684 inches (Sec. III. "Tables"). These measurements, however, appear to disagree with those found in modern Bible dictionaries. According to *SBD*, Hebrew measures of length included the following units: one *digit* amounted to .7938 inches, one *palm* or *hand* to 3.1752 inches, a *span* to 5.5257 inches, and a *cubit* to 19.0515 inches. Mather repeats much of the same debate about the measurements of the cubit and the dimensions of Noah's Ark in his annotations on Gen. 7:18 (below).

¹⁹³ Heidegger (1:326, Exerc. XVII, § 10). St. Jerome on Ezek. 40:5, in *Commentaria in Ezechielem*, lib. 12 [PL 25. 375D–376D]

¹⁹⁴ Heidegger (1:326–27, Exerc. XVII, § 11). Athanasius Kircher (*Arca Noë*, lib. 1, sec. 2, cap. 8–9, pp. 28–35) and Louis Cappellus (*Commentarii et notae criticae* 369–72) debate the Mosaic dimensions of the cubit and the proportions of the Ark based on those of the human body. Exact determinations, however, are notoriously difficult, because during the period of the Hebrew monarchy three different cubits were in use: "(1.) The *cubit of a man* (Deut. 3:11), or the *common cubit* of Canaan (in contradistinction to the Mosaic cubit) of the Chaldean standard; (2.) The *old Mosaic* or *legal cubit*, a handbreadth larger than the first, and agreeing with the smaller Egyptian cubit; (3.) The *new cubit*, which was still larger, and agreed with the larger Egyptian cubit, of about 20.6 inches, used in the Nilometer: and, secondly, that the ordinary cubit of the Bible did not come up to the full length of the cubit of other countries" (*SBD*).

There ha's been much Variety of Thought, upon that Passage: *A Window shalt thou make to the Ark, and in a Cubit shalt thou finish it above.* We will not spend any Time, in reciting & refuting the various Glosses, upon it. We will only give you the Opinion of our *Heidegger*. Two things are here ordered for the Studies and Labours of *Noah*. The First Thing he was to do, was, To bring *Light* and *Air* into the *Ark*. The Word, /צָהָר/ signifies, *Light*. Various Contignations must therefore be formed; which must be such, that the *Light* might come in, and yett *Noah* not be able (as we know) to look out. The other Thing he was to do, was to make a *Covering* for the *Ark*, which about the Middle, should Rise with an *Obtuse Angle*, about a *Cubit* above the Sides.¹⁹⁵

The *Door* of the *Ark*, was probably made, not on the Side of the *Breadth*, as *Pererius* and *Abulensis* will have it, but on the Side of the *Length*, as *Arias* rather Judges; by which the Animals were more easily distributed unto their several Receptacles, on the Right and Left. And probably it was at least Five *Cubits* above the *Sink*, which the *Ark* had in the bottom of it.¹⁹⁶

About the *Several Stories* in the *Ark*, and the *Several Mansions* in them, there are especially two Authors; namely, *Buteo*, and *Temporarius*, who have with much Sagacity made their Disquisitions.¹⁹⁷

195 Heidegger (1:327–28, Exerc. XVII, §§ 12, 13) relies on the annotations of both Rashi on Gen. 6:16, in *Mikraoth Gedoloth* (1:98) and on Ibn Ezra (*Commentary* 1:101) – with Rashi pointing to the disagreement among the rabbis. The term צָהָר [tzohar] literally signifies “light,” but R. Abba ben Kahana specified a “skylight,” whereas R. Levi argued that “tzohar” signified a “precious stone” that dimmed during the day and shone during the night (Midrash Rabbah: Genesis XXXI:11).

196 Heidegger (1:330, Exerc. XVII, § 16). Benedictus Pererius, aka. Bento Pereira (1535–1610), a Spanish Jesuit of Valencia who worked in Rome, describes the dimensions of Noah’s Ark and its openings in his *Commentarius et disputationes in Genesis* (1607–10) 2:139–44. Abulensis, aka. Alonso Tostado (c. 1400–55), professor of theology at Salamanca and later bishop of Avila (hence Abulensis), wrote numerous theological and philosophical works. Mather refers to Tostado’s imaginative description of the Ark in *Commentaria in Genesim*, in *Opera Omnia* (1728) 1:125–52. And Benedictus Arias Montanus (1527–98), Spanish Orientalist, is famous for his contribution to the Antwerp Polyglot Bible *Biblia Sacra, Hebraice, Chaldaice*. 8 vols. (Antverpiae, 1571). Mather (via Heidegger) refers to Arias Montanus’s discussion of the Ark, in “Noah sive de arca fabrica et forma,” in *Antiquitates Judicarum* (1593) 71–79. Saidus Patricides (Eutychius) insists that the “*Eastern Side*,” in the middle of the Ark’s long side was the most logical choice for such an opening (*Annales* [1656], lib. 1, p. 36). See also Simon Patrick (*Commentary* 1:35). D. C. Allan, in his superb *Legend* (ch. 4), sketches much of the same debate.

197 Heidegger (1:330–31, Exerc. XVII, § 18). One of the most detailed and picturesque renditions of the Ark’s economy, its size, number of floors, compartments for the animals, storage, and living quarters for Noah’s family, appears in Athanasius Kircher’s famous *Arca Noë* (1675), lib. 1, sec. 2, cap. 9 through sec. 3, cap. 12, pp. 33–116 (tabula). Mather is certainly aware of Kircher’s acclaimed source, but here goes along with Heidegger’s excerpts from Buteo, because Heidegger’s *Historia Sacra Patriarcharum* (1667–71) appeared before Kircher’s work was published. For much of the Renaissance, Buteo’s *De arca Noe* (1554) was the standard work on the Ark, primarily because Buteo demonstrated mathematically that Noah’s vessel was spacious enough to accommodate pairs of all antediluvian land animals in need of saving. Buteo, aka. Jean Borrel (c. 1492–1572), famed French mathematician, philologist, and abbot

Buteo makes a *Fourth Story* of the *Ark*; namely, The *Sink*; which he supposes left unmentioned by *Moses*, because, it was no proper Habitation. And he thinks, a *Ballast* was necessary to be lodged here. In the *Story* above this, he places the *Quadrupeds*, and *Reptiles*, and assigns their several Quarters unto them. He allotts the *Story* above *That*, wholly unto Provisions, of Corn, and Hay, and Water, & what was needful to præserve the Lives of the *Animals* aboard. And here was the large *Door*, at which all the Creatures entred. Probably from the *Repositories* of the Provisions here, there were *Tubes*, by which the Food was conveniently convey'd down into the several *Apartments* of the *Animals*, below. The *Men* were with the *Birds*, in the *Upper Story* of all. On which the Covering, a little sloping, to the Value, that is, of a *Cubit*, was imposed.¹⁹⁸

According to *Temporarius*, there were in the *Lowest Part* of the *Ark*, certain *Dens* made, for every Species of *Quadrupeds* and *Reptiles*; with such *Alleyes* between them, that Men might walk to look after them; and such *Outlets*, that the Excrements might easily be swept away, into the common *Sink* among the *Ballast*. In the *Middle Part* of the *Ark*, he also lodges all sorts of Agreeable *Provisions*; with Spaces, that rendred the several *Granaries* (as we may call them) accessible. And he contrives diverse *Passages* and *Instruments*, by which the *Meat* and the *Drink* might be lett down unto the *Animals*. In the *Highest Part* of the *Ark*, he assigns Chambers for the *Men*, and for the *Women*; an *Hearth* for a *Coal Fire*, and all the *Necessaries* of a *Kitchen*. And all such *Tools*, as *Noah* foresaw could not presently be recovered for Humane Uses after the *Flood*, might here also be præsaved. I am sorry, we have no more of the *Books*, which here likewise might have their *Præservation*. But, why should I say so? The wise Dispensation of Heaven, would allow us no more, than what served as Materials for the *Mosaic History*. Above, he finds Nests for the *Birds*; even above the Floor, that was over *Noah's Head*; between *That*, and the sloping Top of the *Ark*. This ingenious Gentleman, proceeds with the whole Work of the *Ark*; and ingeniously directs a *Carpenter* how to frame & build one; he offers the whole Process of such an Edifice. But, because tho' his Contrivance be very good, yett the Conjecture that *Noah* went just this way to work, is very arbitrary; and because, we are assured

of St. Antoine, is remembered for his *Opera geometrica* (1554), a collection of fifteen essays on mathematical subjects. Mather (via Heidegger) here refers to Buteo's first essay, *De arca Noë, cuius formae, capacitatisque fuerit*, in *Opera Geometrica* (1554) 5–30. The French Jurist and mathematician Joannes Temporarius (Jean du Temps) wrote a universal history, *Chronologicarum demonstrationum libri tres* (1596); his disquisition on the *Ark's* compartments appears in lib. 1, pp. 32 ff.

¹⁹⁸ Buteo's exposition of the *Ark's* layout (*De arca Noe* 5–30) seems so much more detail-oriented than those of *Pirke de Rabbi Eliezer* (ch. 23) and of Saidus Patricides (*Annales* [1656], lib. 1, pp. 35–40), which neglect to account for storage space for a year's provision and for the sewer. See also Simon Patrick on Gen. 6:16 (*Commentary* 1:35).

we shall never have the like Occasion, for the like Peece of *Architecture*, I will not be at the Pains to consider it.¹⁹⁹

It is quæstionable whether the *Ark* were built on that Side of *Caucasus*, which looks toward *India*, as *Temporarius* will have it; and as the *Mahometans* are of Opinion, one might rather suppose the *Ark* to be built near the *Gordiean* | Mountains, where we find it resting after the *Flood*; For, it was not a *Vessel* made for *Sailing*: And probably what Way it made, it made unto the *Northward*; For the *Ocean*, whose Irruption drown'd *Assyria* and *Armenia*, came rolling in from the *Southward*. It is most credible, That the *Ark* was built in *Chaldea*, near to *Babylon*; unto the *Northward* of which we find *Armenia*; and whither Men soon returned, after the *Flood*.²⁰⁰ [193r]

But if we have the *Place*, can we as easily come at the *Time*, which *Noah* took for building this admirable Structure? To pass by the *Seventy Eight Years* allotted for it, by the Fabulous *Berosus*, the common Opinion of the *Fathers* was, (and the *Arabians* fall in with them,) That *Noah* was *One Hundred Years* about it. They gather it from this; That upon the mention of *Noahs* being *Five Hundred Years* old, there follows the Command for Building of the *Ark*; and we know, at *Six Hundred Years* old, he entred it. *Heidegger* will not own any Solidity in the Argument. For, after the mention of *Noahs* being *Five Hundred Years* old, some things are mention'd, which occur'd long before. But then, it seems plain, That the Sons of *Noah* were married, when the Command for the Building of the *Ark* was given him. And yett the Sons of *Noah* were not born, when he was *Five Hundred Years* old. Yea, the Command for the Building of the *Ark*, seems to be given at the End of that *Hundred and Twenty Years*, which the merciful God allow'd, for the Probation of the World, whether they would Repent or no, after He had given a solemn Warning, of His Purpose to destroy the World for their

199 Heidegger (1:331–32, Exerc. XVII, § 19) here excerpts Temporarius's *Chronologicarum demonstrationum* (lib. 1, pp. 32 ff). Mather's misgivings about the loss of any antediluvian books in the Flood bespeaks his bibliolatriy as much as his angst over losing civilization's libraries in the Conflagration of Christ's Second Coming: "In the Midst of the *Desolations*," Mather lamented, "there has been scarce any thing, that some whom I know, would more beg to be spared, than the *Libraries*. Their most Pathetical Cry would be, *Oh! Spare the Libraries!*" (*Threefold Paradise* 241). Similarly, when his third wife's creditors tried to seize his prized possession, his private library of more than 3,000 volumes, Mather wailed, "My very *Library*, the Darling of my little Enjoyments, is demanded from me." Perhaps realizing his unseemly affections for worldly possessions, he quickly compensated for his error in judgment: "'Tis inexpressible, how much this Condition pleases me, gladdens me" (*Diary* 2:708; see also *Diary* 2:745, and *Paterna* 42).

200 Heidegger (1:332–33, Exerc. XVII, § 20). Temporarius has the *Ark* built on the E side of the Caucasus mountains in Armenia (*Chronologicarum demonstrationum*, lib. 1, pp. 32 ff). For the opinions of the "*Mahometans*," which Mather here summarizes at second hand, Heidegger (vol. 1, Exerc. IV, § 71, pp. 105–106) draws on John Selden's *De Synedriis* (1650), lib. 1, cap. 11, esp. pp. 450–54. The Gordian Mountains as the resting site of Noah's *Ark* are mentioned in Berosus's *Babylonika* (fragm. F4a), extant in Syncellus (*Ecloga Chronographica* 55), in G. Verbrugghe, *Berosos and Manetho* (50). Ptolemy (*Geographia* 5.12; tabula Asia III) locates them in Asia Minor, now SE Turkey, near the modern border between Syria and Iraq.

Wickedness, if they Repented not. Probably therefore, the *Ark* was dispatched in less Time, than has commonly been thought for. *Shem* was married before the *Ark* was begun; and his eldest Son was born Two Years after the *Flood*.²⁰¹

But *Eight Persons* were admitted into the *Ark*. *Berosus* will tell you, that the Name of *Noah's* Wife, was *Tytea*, and the Three Daughters in Law, were *Pandora*, and *Noella*, and *Noegla*. *Epiphanius* disputing against the *Gnosticks*, by whom the Wife of *Noah* was called *Noria*, saies her true Name was *Barthenon*. *Patricides*, from the *Oriental* Traditions tells us, That All *Noah's* Three Sons married the Daughters of *Methuselah*; *Shems* Wife was called, *Thalita*, or, *Thaliba*; *Chams* Wife was called *Nachilathah*, and *Japhets* was called, *Arlisia*. The *Erythraean Sibyl* brags, That she was *Noah's* Daughter-in-Law, & was with him in the *Ark*. But the Assertions and Oracles of that Lady, are not much to be relied upon. The *Mahometans* make Fourscore Persons in the *Ark*. And the Traditions of those Infidels are not much to be wondred at. But it is a little wonderful, that a *Christian Poet*, namely *Constantinus Manasses*, should add unto *Moses's* and *Peter's* Number in the *Ark*; and make *Daughters of Noah*, and *Sons-in-Law*, that should be their *Husbands*, there; θυγατερες, και νυμφιοι θυγατερων.²⁰²

201 Heidegger (1:333, Exerc. XVII, § 21). Mather's "Fabulous *Berosus*" is none other than the Renaissance forgery by the Dominican Friar Joannes Annius of Viterbo, aka. Giovanni Nanni (1432–1502), who published his spurious volumes of *Berosus's* fragmentary *Babylonika*, in his *Antiquitatum variorum volumina XVII cum commentaria* (1498), sec. "Berosi Babylonici dignitate Chaldei ad emendandos Antiquitatum errores," pp. f-ii(v) – i-ii(r). Richard Lynche translated an excerpt of Nanni's *Berosus*, in *An Historical Treatise of the Travels of Noah into Europe* (1601). See also E. N. Tigerstedt, "Ioannes Annius" (1964); W. E. Stephens, "Berosus Chaldaeus" (1979) and "Etruscans" (1984); and C. R. Ligota, "Annus." Calculations about how long it took Noah to build his Ark differ widely. R. Eliezer (*Pirke*, ch. 23, p. 165), citing Midrash Tanchuma, argues the Ark's construction took 52 years; Annius's "Berosus," in *Antiquitatum* (1498), pp. f-ii(v) – i-ii(r) makes a pitch for 78 years; Origen, in *Contra Celsus* 4.41 (*ANF* 4:516); Augustine, in *City of God* 15.27 (*NPNFi* 2:307); and the Arabic writer Georgius Elmacinus, excerpted in Hottinger's *Smegma Orientale* (1658), lib. 1, cap. 8, pp. 248–49 – all argue for 100 years.

202 Heidegger (1:334, Exerc. XVII, § 23). Even though Heidegger, Mather, and most of their peers roundly rejected Annius of Viterbo's spurious "Berosus," *Antiquitatum variarum volumina* (1498), pp. f-ii(v) – i-ii(r), Mather (via Heidegger) is too intrigued by Annius's details, which give the names of Noah's wife and daughters-in-law as "Tytea," "Pandora," "Noela," and "Noegla" (p. f-iii(r)). The names of the female occupants of Noah's Ark are also given in Richard Lynche's translation of Annius, in *An Historical Treatise* (1601), sign. B(r)-Bi(v). St. Epiphanius (*Panarion* 26.1.1–9) rejects the claim of the Gnostics that Noah's wife was called "Νωπία" (Noria) rather than "Βαρθενώς" (Barthenos) in his *Epiphanius* (1:276, lines 6–7). *Patricides*, better known as Eutychius (Patriarch of Alexandria), renders the name of Shem's wife "Salit," of Ham's wife "Nablat," and of Japheth's wife "Arisisah," in *Patricides, Annales* (1656), lib. 1, p. 35; see also Hottinger's *Smegma Orientale* (cap. 8, p. 245). The Erythraean Sibyl, the fifth of ten different Sibyls (prophetesses) who predicted the future in various times and places, denies she is the offspring of the goddess Circe and of Gnostos, but identifies herself as the daughter-in-law of Noah (*Oracula Sibyllina* 3.815–27). Controversial as the Sibylline Oracles were in Mather's time, William Whiston defended their authenticity in *Vindication of the Sibylline Oracles* (1715). Heidegger identifies as his source *Achmetidis Paraphrasi in Alcoranum*, which insists that besides Noah and his immediate family, their seventy-two servants also entered

There was a *Distinction* between the *Clean* and the *Unclean* Creatures, received into the *Ark*. The Jewes think, There is a *Prolepsis* in this *Distinction*; of a Matter not actually considered until the Law of *Moses*. Yea, they say, a great Part of that Law, was long before anticipated, in the Practice of the Faithful. It seems, That even in the Dayes of *Noah*, some *Animals* were thought *Clean*, and fitt for the *Altar*, (and from hence *Heidegger* gathers, for the *Table* also:) and others were thought *Unclean*, which even *Tacitus* calls, *Feda et Profana*: And it is likely that *Noah* was not without a Divine Direction for it.²⁰³

The *Clean* Creatures, were introduced, (as the Hebrew has it,) *Seven*, *Seven*; and of the *Unclean*, only, *Two*, *Two*. *Justin Martyr* hence concludes, There were *Seven Males*, and *Seven Females*, *Fourteen* of every *Clean* Sort. And *Origen* favours the Notion. But *Josephus* is of the Opinion for no more than *Seven* Individuals. And so is *Austin*, and *Ambrose*, and *Jerom*. A greater Number, would have encumbered the *Ark* too much. And this number might suffice, for *Sacrifices*; yea, and for some *Food* also; besides a sufficient Number left for the Conservation of the *Species*. *Theodoret* was in the right, for the *Odd* one, of the *Seven*; *Unum Animal reliquum ad sacrificandum*. *Heidegger* thinks, *one Pair*, was for Propagation; *another Pair*, was for the Nourishment of those that were in the *Ark*; a *third Pair* was for the Oblations that were to be offered, while they were yett in the *Ark*; and an *odd Seventh*, to be *Sacrificed*, at their coming out.²⁰⁴

the Ark. Finally, Mather abbreviates Heidegger's Greek citation from *Compendium chronicum* (427 and 428), a chronology of Byzantine emperors and patriarchs of Constantinople, by the Byzantine poet historian Constantinus Manasses (d. 1187). The citation signifies "daughters, and daughters' bridegrooms." According to Gen. 7:7 and 1 Peter 3:20, only eight members of Noah's family entered the Ark.

²⁰³ Heidegger (1:334–35, Exerc. XVII, § 24). The question of how Noah was able to distinguish clean from unclean animals – a distinction not established until the times of Moses – occupied many Hebrew commentators. According to Rashi, "*Noah studied the Torah*," which had been passed down from Adam via Seth and Enoch to Shem, Noah's son (*Mikraoth Gedoloth*: Genesis 1:102). A more miraculous explanation is offered by R. Hisda: Noah led the animals alongside the Ark, and "those which the Ark accepted were certainly clean; those which the Ark rejected were certainly unclean" (Talmudic tractate Zevachim 116a). A "*Prolepsis*" or "anticipation" of later events is also identified by Ibn Ezra on Gen. 6:18 (*Commentary* 1:103–04) and in *Mikraoth Gedoloth* (Genesis 1:100). The Roman historian Cornelius Tacitus distinguishes between "defiled and unholy" animals (*Historia* 4.60.2).

²⁰⁴ Heidegger (1:335, Exerc. XVII, § 25). The literal meaning of the Hebrew words שִׁבְעָה שִׁבְעָה (*shib'ah, shib'ah*) signifies "seven seven" [Strong's # 7651]. Rashi makes the same point (*Mikraoth Gedoloth*: Genesis 1:102). Mather (via Heidegger) refers to Pseudo-Justinus Martyr's *Quaestiones et responsiones ad orthodoxos* (p. 416, sec. C, 9–11; sec. D, 5–8). Origen implicitly agrees in his *Homilies on Genesis* (Hom. 2.2, pp. 75–76). Josephus Flavius seems a bit ambiguous on this point and argues that Noah took into the Ark "all sorts of living creatures, the male and his female, for the preservation of their kinds; and others of them by sevens" (*Antiquities* 1.3.2). St. Augustine (*De Civitate Dei* 15.27.4) [PL 41. 474–475] and *NPNFi* (2:307–8), Ambrosius Mediolanensis (*De Noë et arca*, lib. 1, cap. 12, §§ 39–40) [PL 14. 378], and St. Jerome (*Contra Jovinianum*, lib. 2) – all agree that only seven individuals (3 pairs of male and female, and 1 odd one for sacrifice) are meant here. Theodoret (*Quaestiones in Octateuchum*: Genesis. Quest. 50, p. 48, line 16) argues that "one animal [was] left over for

[194v] It may be wondred, how *Noah* could make his Collection of all these | *Animals*. The Fancy of *Hugo de S. Victore*, cited by *Buteo*, won't agree well with the Sacred History; *That as the Flood increased, the Distressed Creatures came flying and floating about the Ark, where Noah stood ready to take them in*. *Philo* thinks, that before this, they did, by a marvellous Providence of God, come to *Noah*, of his own Accord. And it is plain, They must *miraculously* many of them lay aside their *Ferocity*. Could some of the *Antediluvian Giants* have been hired by *Noah*, to hunt for him, they might have done much in a little Time, to assemble the *Animals*; But the Phrase used for this Matter, is remarkable; *They went in unto Noah*; It is not said, That he *Caught* them and *Brought* them. R. *Eliezer* saies, That the *Angel* who is by God placed over each of the *Species* of *Animals*, brought unto *Noah*, the *Species* that was under his Charge, and the Food that was to nourish them. But, what should hinder the *Spirit* of God, who works all in all, from adding this unto the *Instinct* of the several *Animals*, on this Occasion; That they should come of *their own Accord*, unto the *Place* of their Conservation. Hence R. *Solomon Jarchi*, upon the Text, *They went in unto Noah*, adds, *מאליהם / à Semet ipsis*.²⁰⁵

There was *Food* laid in for the *Animals*. But what *Food* for the *Carnivorous*? *κυνὶ δίδοναι ἄχαρα*; And yett, it would have been a wretched Ministry, for *Noah*, to have kept killing for the *Flesh-Eaters* a Year together; if there could have been *Flesh* enough laid in for the Devourers. *Austin* handles this Quæstion; and he saies upon it; *Quod potius credendum, præter carnes aliqua alimenta esse potuerunt,*

the sacrifice." According to *Mikraoth Gedoloth* (*Genesis* 1:102), R. Sifthei Chachamim offers the same explanation as Theodoret does, but *Genesis Rabbah* (XXXII:4) and Ibn Ezra, on *Gen.* 6:20 (*Commentary* 1:105) insist that God intended seven pairs of "seven males and seven females from every clean animal and fowl because they were needed for sacrifices." Heidegger's interpretation (1:335, Exerc. XVII, § 35) is within the safe parameters of Rabbinic and Patristic tradition.

²⁰⁵ Heidegger (1:336–37, Exerc. XVII, § 27). Joannes Buteo's *De arca Noë*, in *Opera geometrica* (1554) 27–28, refers to *De arcâ Noe morali et mysticâ* [PL 176. 6279], a work by Hugo of St. Victore (c. 1097–c. 1141), a German Augustinian monk, early mystic, and professor of theology in Paris. The best early edition of his collected works is *Opera Omnia, tomi tres* (1526). Hugo may have drawn on the same sources as Rashi (*Gen.* 7:9), in *Mikraoth Gedoloth* (*Genesis* 1:104), as Ibn Ezra (*Gen.* 6:20, 7:7), in his *Commentary* (1:105, 107), and as Ramban, in his *Commentary* (1:113, 116), since they all offer much of the same elucidation. In his *Adnotationes in Pentateuchon*, cap. 7 (on *Gen.* 4) [PL 175. 45A], Hugo of St. Victore further adds that before the Flood, even wild animals could be touched. Philo Judæus explains how the animals – domestic and wild – came to Noah voluntarily without harming each other (*De Vita Mosis* 2.12.61–62; *Works* 497). According to *Pirke de Rabbi Eliezer* (ch. 23, p. 167), the giant Og, king of Bashan, survived the Flood by clinging to a rung of the ladder or to the gutter of the Ark; Noah fed him daily through a hole while the deluge inundated the earth. Mather may have had this giant in mind, or the angelic agency, mentioned by R. Eliezer (*Pirke*, ch. 23, p. 166), by which means the animals were hunted down and brought into the Ark. Finally, R. Solomon Jarchi, better known by his acronym Rashi, suggests in his commentary (*Gen.* 7:9) what many others have said before and after him: the animals came on their own, "by themselves" (*Mikraoth Gedoloth: Genesis* 1:104).

quæ omnibus convenirent. There may be found a *Food*, which the *Carnivorous* Creatures may subsist upon; when there cannot any *Flesh* be gotten for them. He saies, He ha's known them feed upon *Fruits*, especially *Figs* and *Chestnuts*. And probably *Noah* was instructed from Heaven, what *Fruits* would best suit the several *Animals*; and when *Hunger* compelled them, they would soon be Reconciled unto such Things, as they had not formerly been used unto. At least, the same Touch from Heaven upon them, that caused them on this wonderful Occasion to putt off their *Ferocity*, might as easily bring some Alteration upon their *Appetites*. *Philostratus* tells of *Lion* in *Egypt*, which would enter the *Temples*, and not so much as lick the Blood of the *Sacrifices* there, but live upon *Bread*, and *Sweet-meats*, and *Honey-cakes*.²⁰⁶

And *Sulpitius Severus*, visiting a Monk at *Thebes*, was horribly frightened at the Sight of a *Lion* upon a Tree, whither he was carried by his Friend; but came out of his Fright, when he saw the *Lion* feeding on *Apples*, which he took very tamely from the Hands of the People there, and then went his Way. *J. Phocas* tells of the *Lions* about *Jordan*, that would come like *Dogs*, to *Iberus* the *Anchorite*; and he *Fed* them, with, *Madefacta legumina, aut forte olyrites, aut panis hordeacei frusta*. And we have a shrewd Intimation, that the Creatures were fed after this Manner in the *Ark*; in those Words of the Prophet, which allude unto it; Isa. 11.6, 7. *The Lion shall eat Straw like the Oxe*.²⁰⁷

But after all; was the *Ark* of Capacity enough, to hold all the *Animals* for which it was provided? *Celsus* of old, cried out upon the *Absurdity* of the Supposition. And the Primitive Hereticks cavilled at it. But the *Absurdity* of their Cavils, is *eternally* confuted by the Demonstrations of *Temporarius*. We need not allow him, his Computations of the *Animals* provided for the Mawes of the *Carnivorous*; because we have more easily provided for them. Nevertheless, we

²⁰⁶ Heidegger (1:337, Exerc. XVII, § 28). Mather's second-hand Greek citation from Heidegger "κυνὶ διδόναι ἄχυρα" can be rendered, "the dogs feed on straw." Ibn Ezra (on Gen. 6:20) at first rejects questions of this nature as foolish, but then argues that "One who cannot find meat will eat grass or fruit when hungry" (*Commentary* 1:105). St. Augustine (*De Civitate Dei* 15.27.5) [PL 41. 476] argues that it "is more probable, there might be some food which was not flesh, and which yet suited all" (*NPNFi* 2:308). In his *Vita Apollonii* (5.42.1–2), Flavius Philostratus of Lemnius relates how Apollonius of Tyana encountered a domesticated lion in Alexandria (Egypt), who lived on cakes, bread, and fruit, dressed meat, and occasionally indulged in vino veritas without ill effect. When the sage Apollonius of Tyana revealed to the priests that the lion was none less than the reincarnated soul of King Amasis of Egypt, the animal wailed, burst into tears, and was subsequently consecrated to the temple of Leontopolis.

²⁰⁷ The Latin historian and Christian convert Sulpicius Severus of Aquitaine (c. 360–c. 420 CE) relates his story of the monkish lion of Thebes, in "*De Monacho Thebaidis*" (*Dialogi* 1.7), in *Opera Omnia quæ extant* (1656). For a similar tall tale of the monk and the lioness, see Sulpicius Severus's *Dialogues* (1.15), in *NPNFii* (11:31–32). The monastic pilgrim Joannes Phocas (fl. late 12th c), in his *Descriptio Terræ Sanctæ* (cap. 23 [PG 133. 927–962], gives a much prized description of Palestine. A dual Greek-Latin edition of his work appeared in Colonia, 1543. The unidentified Iberius the Anchorite fed his lions "either moistened vegetables, or perhaps rye, or crumbs of crust of barley loaf."

will go upon his Computation; because it will *Ex abundanti* demonstrate the Capacity of the *Ark*, to entertain all the Creatures it was intended for. He reduces all the *Greater Quadrupeds*, of the Tame Sort, in the *Ark*, to the Proportion of about 45 Pair of *Oxen*; but for a more fair Concession, we will suppose them æqual to 60 Pair of *Oxen*. He reduces the *Lesser Quadrupeds* of the Tame Sort, unto the Proportion, of about 40 Pair of *Sheep*. He reduces all the *Carnivorous Quadrupeds*, unto the Proportion of 32 Pair of *Wolves*. But suppose them 40. Allow one Sheep a Day for each of them; and a Years Allowance will be 3650 Sheep. Now for *Stables* for all of these in the *Lower Story* of the *Ark*. He finds, That *Sixty Stables*, each 5 Cubits Long, & 4 Broad, might stand on *One Side* of the *Ark*; suppose the *Side* over against the *Door*. Then, on the same Side with the *Door*, you may on the Right hand, have no less than *Forty Folds*, each 3 Cubits square. On the Left Hand you may have also *Forty Dens*; each between 4 and 5 Cubits Long, and 3 Broad. There are now left 6 Cubits of the Length of the *Ark*, for a Gang Way between the Right and Left Stabulations; by which there was a Passage to the *Stables* of the first Rank; which was to be separated from the second, by a Way Three Cubits Broad. There yett remain Forty Cubits, of the
 [195r] *Breadth* of the *Ark*, in which the *Sheep* for *Food*, might | most easily be disposed of. Lett there be allotted for these, a Third Order of *Stables*, adjoined unto the Second; unto which we leave a Passage, 5 Cubits broad, on the same side with the *Door* of the *Ark*, that so, for the whole Length of the *Ark*, there may be an easy Access to every one of the Receptacles. There now remain 35 Cubits of the *Breadth* of the *Ark*, which drawn into 294 Cubits of the *Length* of it, make 14290 Square Cubits; a Space much more than the 3650 Sheep would call for. For if you distribute no more than 10290 Cubits, among 3650 Sheep; they will each of them have near three Cubits a Peece to dwell upon. But what need such *Gregarious Animals* to be so separated? They might all be in Two *Sheep-folds* well enough disposed of. We have now abundance of *Spare Room* left in the *Lower Story*, besides what might be found over the Tops of the several *Cabins*; where an unknown Quantity of *Provisions*, might also be disposed of.²⁰⁸

208 Heidegger (1:338–40, Exerc. XVII, §§ 29, 30). Origen’s adversary Celsus, the 2nd-century philosopher, who derided the Mosaic Flood narrative as an absurd derivation from Deucalion’s deluge (Ἀληθὴς λόγος [True Discourse] 1.17–20; 4.11–21ff, and *On the True Doctrine* 55–56, 77), is targeted in Origen’s *Contra Celsum* (4.41–42), in *ANF* (4:516–17). Even more generous calculations of the *Ark*’s dimensions, capacity, and number of animals, are offered in Buteo’s *De arca Noë, cuius formae, capacitatisque*, in *Opera Geometrica* (1554) 17–18. Matthew Poole crunches the same numbers and tabulates the animals in *Synopsis Criticorum* (1:83–92, *Works* 1:336–65); and Athanasius Kircher catalogs all – down to the smallest insect that entered the *Ark*, in his magisterial *Arca Noë* (lib. 1, sec. 3, cap. 2–12, pp. 46–116). Heidegger (1:338) identifies such heretics as the Marcionites, Valentinians, and Gnostics who caviled at the story of Noah’s *Ark*. Mather (via Heidegger) synthesizes Johannes Temporarius’s detailed description of the *Ark*’s capacity, compartments for the animals, and storage facilities (*Chronologicarum demonstrationum*). The learned English Hebraist John Lightfoot is also preoccupied with the capacity of the *Ark* to sustain life, and estimates “450000. square cubits within the walls of it,”

But for *Provisions*, our *Temporarius* will have the entire *Middle Story*; and he is willing to leave as much Room as may be, in the *Lower Story*, that so the *Respirations*, and *Exhalations* of the *Animals* might not be too much incommoded. The *Carnivorous Animals*, are indeed below already *provided* for. But however, we must now provide *Food* for 3650 *Sheep*, that we lodged below. And the Number of the *Sheep* continually decreasing by *Slaughter*, we need consider them, according to the Rules of *Logistical Progression*, as being æqual to no more than the Number 1820 for all the Year about. Unto these 1820 you will join the 80 proposed as the Proportion, of all the *Lesser Quadrupeds* of the Tame Sort, to be preserved for Propagation. These will make 1900. Suppose the Aliment of *Seven Sheep*, to be equal unto that of *One Ox*. Thus 1900 *Sheep* will æqual 271½ *Oxen*. These added unto the 120 *Oxen* which we formerly proposed, as the Proportion for the *Larger Quadrupeds* of the Tame Sort, will amount unto 392. Grant them 400. And Feed them for a whole Year, with *Hay*; which will not ly in so little room, as *Grain*, and other Food ordinarily provided for them. *Oxen* that are not wrought, can easily Subsist on 20 Weight of Provender, *per Day*. But wee'l be liberal; wee'l allow them 40 Pound Weight; which is the largest Measure that *Columella* {allows} for them, in *March* and *April*, when the *Plough* is going all the day. This 480 Ounces. Now, a *Solid Cubit*, will contain 40 Pound of press'd *Hay*. Well; *Four Hundred Oxen*, will then in a Years Time consume 146000 *Cubes* of *Hay* each consisting of such a *Solid Cubit*. But the *Middle Story* of the *Ark*, 300 Cubits Long, 50 Broad, 12 High, (for so High, *Temporarius* will have it,) will contain 180000 of such *Cubes*. Behold then, 44000 such *Cubes* left empty for you.²⁰⁹

About the *Upper Story* of the *Ark*, there is no Shadow of a *Difficulty*. You will find there, 90000 *Solid Cubits*. The *Birds* might have room enough to *Nest*, yea, and to *Fly* also in so large a Space.

And so much for this Matter.

I will now no longer converse with my *Heidegger*, as I have done in most of the Thoughts, that I have hitherto given you.²¹⁰

I will proceed unto another Consideration of the ARK; and say with *Nazianzen*;

Ζητω Νωε κιβωτον οπως μορον αινον αλεξω.

in "A Chronicle of the Times," *Works* (1684) 1:5. Efforts of this nature reveal how much the theologians of the day felt pressured to prop up the Mosaic narrative with feasibility studies to redress the rising skepticism among the ancients and the moderns.

²⁰⁹ Heidegger (1:340, Exerc. XVII, § 30). Lucius Junius Moderatus Columella of Cadiz, Spain (fl. 20–60 CE), Latin author of a Roman handbook on agriculture, details the quantity and types of feed for oxen during the various seasons of the year in his *De re rustica* (11.2.98–101): chaff and vetch, chickpeas, hay, oak leaves, barley, poplar leaves, fig leaves, mast, and lupines – all in specified quantities and mixtures.

²¹⁰ Mather's "conversation" with Heidegger hardly ends here, for just a few manuscript pages later (Gen. 8:19) he resumes mining Heidegger's *Historia Sacra Patriarcharum*.

Quero Ratem Nohæ ut mortis discrimina Vitem.

I will now consider the ARK, as a *Type* of the CHURCH. I will sing;

Ecclesiam pro Nave gero; mihi Climata Mundi

*Sunt Mare; Scripture, Retia; Pisas, Homo.*²¹¹

It is prettily express'd by honest *Heidfeld*.

Quæ Navis Vetustissima, Capacissima, Sanctissima,

Ditissimaque omnium fuit?

R. *Ingens illa ARCA Noë, cui totius orbis Homines et opes inclusæ fuerunt. Nota hic TYPUM Universæ Ecclesiæ; – in quam nos aggregemus, ut tuti simus, à venturo Iræ Dei Diluvio. Nam Extrà Ecclesiam nulla salus.*²¹²

As the ARK, was doubtless the *biggest Ship* that ever was; A *Ship* to which the largest *Spanish Carrack*, that carries not above 1200 *German Lasts* is not to be compared; a *Ship* outvying that of *Archimedes*, which contained 12000 Tuns; or that of *Philopater*, which was 240 Holy Cubits in *Length*, with a *Breadth* & a *Depth* not unproportionable: So, it seems to be the *First* that ever floated.²¹³

We will gett aboard it, with our Meditations on the *Typical Importance* of it. For the Apostle tells us; 1. Pet. 3.21. *It was a Figure.* | We will behold the

²¹¹ The Mather's Greek citation from Gregorius Nazianzen's *Carmina de se ipso*, line 9 [PG 37. 1243], is corrupted and should read, "Ζητῶ Νῶε κιβωτὸν ὅπως μόρον αἰνὸν ἀλυξῶ": "I seek Noah's raft that I might ward off grim death." The Latin verse representing the Ark as a type of the Church suggests the following allegorical reading: "I will manage the church as a ship; for me, the climates of the world are the sea, the scriptures are nets, and the fish are mankind."

²¹² The Latin citation from Johann Heidfeld (1563–1629), German Reformed pastor and professor of theology at Herborn, is most likely from *Sphinx theologica-philosophica* (1600), a popular florilegium containing excerpts from the Bible, from ecclesiastical and profane authors, from Greek and Roman works, and from conventional proverbs. Mather also cited him many times in his *Magnalia Christi Americana* (see Murdock edition) and in his *Durable Riches* (1695), part 1, p. 33. Heidfeld asks, "What ship was the most ancient, most spacious, most holy, most wealthy of them all?" His response (here signified by "R.") is, "That ARK of Noah, in which the men and the riches of all the world were enclosed. Note here a TYPE of the Universal Church, in which we may be gathered together, that we may be safe from the coming Flood of God's Wrath. For Outside the Church there is no safety."

²¹³ A Spanish "*Carrack*" (carack) is "a large ship of burden, also fitted for warfare, such as those formerly used by the Portuguese in trading with the East Indies: a galleon" (*OED*). A "German last" is a unit of commercial measurement of "weight, capacity, or quantity, varying for different kinds of goods and different locations," and amounting to c. 2 tons or 4,000 pounds (*OED*). According to Plutarch (*Vitæ Parallelæ: Marcellus* 14.12–15), Archimedes (c. 287–212 BCE), the famous Greek mathematician of Sicily, is to have invented a machine made of levers and pulleys that allowed him to move King Hieron's huge ship that no one had been able to launch in the harbor of Syracuse (*Plutarch's Lives* 5:473). Ptolemy IV (Philopater), who ruled Egypt (221–205 BCE), is to have built the largest galley of classical antiquity. According to Athenaeus of Naucratis (5.37.1–32), this catamaran-like warship was equipped with 4,000 rowers, 400 to manage the sails, a capacity to carry 2,850 mariners, and was over 130 m (420 ft) long, 18 m (57 ft) wide, and 22 m (72 ft) tall to the gunwale (*Deipnosophists* 5.203e–204c).

CHURCH as the *Antitype*; and run the Parallel in several observable Instances.²¹⁴

As *Noah* built an *Ark*; so JESUS ha's built a CHURCH. But *Noah*: *According to all that God had commanded him, so did he*. Thus our JESUS, in Building a *Church*, ha's done all things most Exactly and Faithfully, *according to the Mind of God*. [Heb. 3.2.] And so should we, in what we do about the *Church*. [Matth. 15.9.] *Luther* judiciously reckoned this, for one of the Three Things, by which the *Church* would be fatally endangered: *Sapientia mundi quæ vult omnia redigere in ordinem, et impijs medijs Ecclesie Paci consulere*.²¹⁵

When the *Ark* was built, *Noah* the Builder of it, shipp'd himself upon it: If the *Ark* had perished, *Noah* himself must have perished with it. But it was secured by the Presence of *Noah* there: tho' it seems to have drawn above *Sixteen Foot of Water*, as may be gathered from its resting on an Hill, when the Waters were above it, at least *Eleven Cubits*. Thus our Lord Jesus Christ, having built the *Church*, He is now Himself aboard, & will be so, *To the End of the World*. [Isa. 43.3.] *Si nos ruimus, ruit et Christus*. Tho' the *Church* be *Tossed with Tempests*, yett it cannot be lost; It ha's a greater than *Cæsar* aboard.

Niteris incassum Christi submergere Navem;
